Product and company names listed are trademarks or trade names of their respective companies.

Warning

While this bibliography has been compiled with the utmost care, the editor takes no responsibility for any errors, missing information, the contents or quality of the references, nor for the usefulness and/or the consequences of their application. The fact that a reference is included in this publication does not imply a recommendation. The use of any of the methods in the references is entirely at the user's own responsibility. Especially the above warning applies to those references that are marked by trailing '†' (or '**'), which are the ones that the editor has unfortunately not had the opportunity to read. An abstract was available of the references marked with '*'.

Chapter 1

Preface

“Living organism are consummate problem solvers.
They exhibit a versatility that puts the best computer
programs to shame.”

John H. Holland [1]

The material of this bibliography has been extracted from the genetic algorithm bibliography [2], which when this report was compiled contained 11251 items and which has been collected from several sources of genetic algorithm literature including Usenet newsgroup `comp.ai.genetic` and the bibliographies [3, 4, 5, 6]. The following index periodicals have been used systematically

- A: *International Aerospace Abstracts*: Jan. 1995 – Mar. 1998
- ACM: *ACM Guide to Computing Literature*: 1979 – 1993/4
- BA: *Biological Abstracts*: July 1996 - Aug. 1998
- CA: *Computer Abstracts*: Jan. 1993 – Feb. 1995
- CCA: *Computer & Control Abstracts*: Jan. 1992 – Apr. 1998 (except May -95)
- ChA: *Chemical Abstracts*: Jan. 1997 - Dec. 1998
- CTI: *Current Technology Index* Jan./Feb. 1993 – Jan./Feb. 1994
- DAI: *Dissertation Abstracts International*: Vol. 53 No. 1 – Vol. 56 No. 10 (Apr. 1996)
- EEA: *Electrical & Electronics Abstracts*: Jan. 1991 – Apr. 1998
- EI A: *The Engineering Index Annual*: 1987 – 1992
- EI M: *The Engineering Index Monthly*: Jan. 1993 – Apr. 1998 (except May 1997)
- N: *Scientific and Technical Aerospace Reports*: Jan. 1993 - Dec. 1995 (except Oct. 1995)
- P: *Index to Scientific & Technical Proceedings*: Jan. 1986 – May 1998 (except Nov. 1994)
- PA: *Physics Abstracts*: Jan. 1997 – Sep. 1998

1.1 Your contributions erroneous or missing?

The bibliography database is updated on a regular basis and certainly contains many errors and inconsistencies. The editor would be glad to hear from any reader who notices any errors, missing information, articles etc. In the future a more complete version of this bibliography will be prepared for the genetic algorithms in the Latin America, Portugal and Spain research community and others who are interested in this rapidly growing area of genetic algorithms.

When submitting updates to the database, paper copies of already published contributions are preferred. Paper copies (or **f****t****p** ones) are needed mainly for indexing. We are also doing reviews of different aspects and applications of GAs where we need as complete as possible collection of GA papers. Please, do not forget to include complete bibliographical information: copy also proceedings volume title pages, journal table of contents pages, etc. Observe that there exists several versions of each subbibliography, therefore **the reference numbers are not unique and should not be used alone in communication**, use the **key** appearing as the last item of the reference entry instead.

Complete bibliographical information is really helpful for those who want to find your contribution in their libraries. If your paper was worth writing and publishing it is certainly worth to be referenced right in a bibliographical database read daily by GA researchers, both newcomers and established ones.

For further instructions and information see [ftp.uwasa.fi/cs/GAbib/README](ftp://ftp.uwasa.fi/cs/GAbib/README).

1.1.1 How to cite this report?

The complete BiBT_{EX} record for this report is shown below:

You can also use the BiBT_{EX} file **GASUB.bib**, which is available in our **ftp** site [ftp.uwasa.fi](ftp://ftp.uwasa.fi) in directory **cs/report94-1** and contains records for all GA subbibliographies.

1.2 How to get this report via Internet?

Versions of this bibliography are available via anonymous **ftp** and **www** from the following sites:

<i>media</i>	<i>country</i>	<i>site</i>	<i>directory</i>	<i>file</i>
ftp	Finland	ftp.uwasa.fi	/cs/report94-1	gaLATINbib.ps.Z
www	Finland	http://www.cs.hut.fi	~ja/gaLATINbib	gaLATINbib.html

Observe that these versions may be somewhat different and perhaps reduced as compared to this volume that you are now reading. Due to technical problems in transforming L^AT_EXdocuments into **html** ones the **www** versions contain usually less information than the corresponding **ftp** ones. It is also possible that the **www** version is completely unreachable.

The directory also contains some other indexed GA bibliographies shown in table 1.1.

1.3 Acknowledgement

The editor wants to acknowledge all who have kindly supplied references, papers and other information on genetic algorithms in the Latin America, Portugal and Spain literature. At least the following GA researchers have already kindly supplied their complete autobibliographies and/or proofread references to their papers: Dan Adler, Patrick Argos, Jarmo T. Alander, James E. Baker, Wolfgang Banzhaf, Helio J. C. Barbosa, Hans-Georg Beyer, Christian Bierwirth, Joachim Born, Ralf Bruns, I. L. Bukatova, Thomas Bäck, David E. Clark, Carlos A. Coello Coello, Yuval Davidor, Dipankar Dasgupta, Marco Dorigo, J. Wayland Eheart, Bogdan Filipić, Terence C. Fogarty, David B. Fogel, Toshio Fukuda, Hugo de Garis, Robert C. Glen, David E. Goldberg, Martina Gorges-Schleuter, Hitoshi Hemmi, Vasant Honavar, Jeffrey Horn, Aristides T. Hatjimihail, Mark J. Jakiela, Richard S. Judson, Bryant A. Julstrom, Charles L. Karr, Akihiko Konagaya, Aaron Konstam, John R. Koza, Kristinn Kristinsson, D. P. Kwok, Gregory Levitin, Carlos B. Lucasius, Michael de la Maza, John R. McDonnell, J. J. Merelo, Laurence D. Merkle, Zbigniew Michalewics, Melanie Mitchell, David J. Nettleton, Volker Nissen, Ari Nissinen, Tomasz Ostrowski, Kihong Park, Nicholas J. Radcliffe, Colin R. Reeves, Gordon Roberts, David Rogers, Ivan Santibáñez-Koref, Marc Schoenauer, Markus Schewhm, Hans-Paul Schwefel, Michael T. Semertzidis, Moshe Sipper, William M. Spears, Donald S. Szarkowicz, El-Ghazali Talbi, Masahiro Tanaka, Leigh Tesfatsion, Peter M. Todd, Marco Tomassini, Andrew L. Tuson, Jari Vaario, Gilles Venturini, Hans-Michael Voigt, Roger L. Wainwright, D. Eric Walters, James F. Whidborne, Steward W. Wilson, Xin Yao, and Xiaodong Yin.

Table 1.1: Indexed GA subbibliographies.

The editor also wants to acknowledge Elizabeth Heap-Talvela for her kind proofreading of the manuscript of this bibliography.

Chapter 2

Introduction

The table 2.1 gives the queries that have been used to extract this bibliography. The query system as well as the indexing tools used to compile this report from the BiBTeX-database [7] have been implemented by the author mainly as sets of simple `awk` and `gawk` programs [8, 9].

<i>string</i>	<i>field</i>	<i>class</i>
*BRA	ANNOTE	Brazil
*MEX	ANNOTE	Mexico
*VNZ	ANNOTE	Venezuela
*ARG	ANNOTE	Argentina
*CHILE	ANNOTE	Chile
*COL	ANNOTE	Columbia
*POR	ANNOTE	Portugal
*ESP	ANNOTE	Spain
*Spanish	NOTE	In Spanish
*Portuguese	NOTE	In Portuguese

Table 2.1: Queries used to extract this subbibliography from the main database.

Chapter 3

Statistical summaries

This chapter gives some general statistical summaries of genetic algorithms in the Latin America, Portugal and Spain literature. More detailed indexes can be found in the next chapter.

References to each class (c.f table 2.1) are listed below:

- **Argentina** 11 references ([10]-[20])
- **Brazil** 45 references ([21]-[65])
- **Chile** 2 references ([66]-[67])
- **Columbia** 1 references ([68]-[68])
- **Mexico** 43 references ([69]-[111])
- **Portugal** 21 references ([112]-[132])
- **Spain** 121 references ([133]-[253])
- **Venezuela** 15 references ([254]-[268])

Observe that each reference is included (by the computer) only to one of the above classes (see the queries for classification in table 2.1; query order gives priority for classes).

3.1 Publication type

This bibliography contains published contributions including reports and patents. All unpublished manuscripts have been omitted unless accepted for publication. In addition theses, PhD, MSc etc., are also included whether or not published somewhere.

Table 3.1 gives the distribution of publication type of the whole bibliography. Observe that the number of journal articles may also include articles published or to be published in unknown forums.

<i>type</i>	<i>number of items</i>
part of a collection	10
journal article	55
proceedings article	174
report	16
PhD thesis	2
MSc thesis	1
<i>others</i>	1
<i>total</i>	259

Table 3.1: Distribution of publication type.

3.2 Annual distribution

Table 3.2 gives the number of genetic algorithms in the Latin America, Portugal and Spain papers published annually. The annual distribution is also shown in fig. 3.1. The average annual growth of GA papers has been approximately 40 % during almost the last twenty years.

<i>year</i>	<i>items</i>	<i>year</i>	<i>items</i>
1991	1	1992	4
1993	16	1994	41
1995	62	1996	67
1997	49	1998	14
1999	5		
<i>total</i>			259

Table 3.2: Annual distribution of contributions.

3.3 Classification

Every bibliography item has been given at least one describing keyword or classification by the editor of this bibliography. Keywords occurring most are shown in table 3.3.

Words occurring most in titles are shown in table 3.4.

engineering	58
neural networks	30
control	28
optimization	14
hybrid	14
machine learning	13
fuzzy systems	10
others	467

Table 3.3: The most popular subjects.

Fuzzy	54
Optimization	34
Design	28
Evolutionary	24
Learning	22
neural	21
control	15
Distribution	15
Application	15
controller	14
Optimal	13
Genético	12
planning	11
Multiobjective	11
power	10

Table 3.4: The most popular words used in titles.

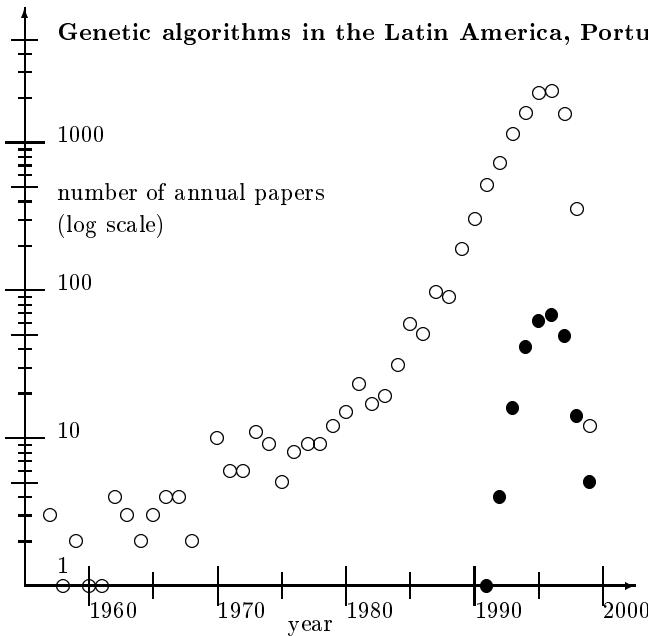

Figure 3.1: The number of papers applying **genetic algorithms in the Latin America, Portugal and Spain** (•) ○ = total GA papers. Observe that the last two years are most incomplete in the database.

3.4 Authors

Table 3.5 gives the most productive authors.

total number of authors	411
Herrera, Francisco	32
Coello Coello, Carlos A.	26
Lozano, Manuel	23
Verdegay, Jose Luis	16
Cordón, Oscar	11
1 author	9
1 author	8
2 authors	7
3 authors	6
2 authors	5
11 authors	4
15 authors	3
63 authors	2
307 authors	1

Table 3.5: The most productive genetic algorithms in the Latin America, Portugal and Spain authors.

3.5 Geographical distribution

The following table gives the geographical distribution of authors, when the country of the author was known. Over 80% of the references of the main database are classified by country.

country	abs	%
Total	259	100.00
Spain	122	47.10
Brazil	45	17.37
Mexico	43	16.60
Portugal	21	8.11
Venezuela	15	5.79
Argentina	4	1.54
Chile	2	0.77
The Netherlands	2	0.77
Colombia	1	0.39
Finland	1	0.39
France	1	0.39
Greece	1	0.39
United States	1	0.39
Unknown country	0	0.00

Table 3.6: The geographical distribution of the authors.

3.6 Conclusions and future

The editor believes that this bibliography contains references to most genetic algorithms in the Latin America, Portugal and Spain contributions upto and including the year 1998 and the editor hopes that this bibliography could give some help to those who are working or planning to work in this rapidly growing area of genetic algorithms.

Chapter 4

Indexes

4.1 Books

The following list contains all items classified as books.

- none

4.2 Journal articles

The following list contains the references to every journal article included in this bibliography. The list is arranged in alphabetical order by the name of the journal.

- American Journal of Physics, [101]
Analytica Chimica Acta, [207, 232]
Artificial Intelligence Review, [239]
Av. Ing. Quim., [92]
Bad. Oper. Decyzje (Poland), [166]
Biophysical Journal, [238]
Chromatographia, [132]
Civil Engineering Systems, [96, 105]
Computers in Industry, [109]
Egypt. Comput. J. (Egypt), [11]
Electronics Letters, [197, 20]
Engineering Optimization, [106, 108]
Engineering with Computers, [94]
European Journal of Operational Research, [237]
EvoNews, [194]
Expert Systems with Applications, [99]
Finite Elements in Analysis and Design, [264]
Fuzzy Systems & Artificial Intelligence Reports and Letters, [144]
IEEE Transaction on Power Systems, [240]
IEEE Transactions on Pattern Analysis and Machine Intelligence, [200]
- IEEE Transactions on Power Systems, [113, 184, 67]
IEEE Transactions on Systems, Man, and Cybernetics, [191]
Inf. Syst. Eng. (Netherlands), [188]
Inform. Autom. (Spain), [183, 195]
Informática y Automática (Spain), [173, 242, 251]
Int. J. Approx. Reason. (USA), [229, 234]
Int. J. Electr. Power Energy Syst. (UK), [64]
Int. J. Power Energy Syst. (USA), [169]
Int. Numer. Meth. Eng., [259]
International Journal of Approximative Reasoning, [82]
International Journal of Intelligent Systems, [203]
Journal of Guidance, Control, and Dynamics, [14]
Knowledge and Information Systems. An International Journal, [107]
Mathware & Soft Computing, [175]
Microelectron. J. (UK), [170, 216, 225]
Midwest Symp Circuits Syst, [35]
Physical Review E, [100, 63]
Sens. Actuators A. Phys. (Switzerland), [244]
Soluciones Avanzadas. Tecnologías de Información, [82, 103, 104]
Statistics and Computing (UK), [226]
Tatra Mt. Math. Publ. (Slovakia), [220]

total 56 articles in 41 series

4.3 Theses

The following two lists contain theses, first PhD theses and then Master's etc. theses, arranged in alphabetical order by the name of the school.

4.3.1 PhD theses

Tulane University, [87]

Universidad Politécnica de Madrid, [137]

total 2 thesis in 2 schools

4.3.2 Master's theses

This list includes also “Diplomarbeit”, “Tech. Lic. Theses”, etc.

Instituto Superior Tecnico, [131]

4.4 Report series

The following list contains references to all papers published as technical reports. The list is arranged in alphabetical order by the name of the institute.

Central University of Venezuela, [258]

Laboratorio Nacional de Informática Avanzada (LANIA),
[102]

Tulane University, [73]

Universidad de Granada, [147, 177, 178, 193, 247]

Universidad de Málaga, [133, 141, 241]

University of Granada, [164, 172, 174, 176]

Utrecht University, [114]

total 16 reports in 7 institutes

4.5 Patents

The following list contains the names of the patents of genetic algorithms in the Latin America, Portugal and Spain. The list is arranged in alphabetical order by the name of the patent.

- none

4.6 Authors

The following list contains all genetic algorithms in the Latin America, Portugal and Spain authors and references to their known contributions.

total 259 articles by 411 different authors

4.7 Subject index

All subject keywords of the papers given by the editor of this bibliography are shown next.

adaption		analytical,	[50, 207, 232]	power systems,	[46]
fuzzy,	[199]	chromatography,	[132]	traffic lights,	[24]
adaptive GA		geo-,	[50]	vehicle,	[32]
fuzzy,	[202]	inorganic,	[91, 101]	controller	
agents,	[44, 49, 228]	physical,	[91, 92, 101]	fuzzy,	[222]
agriculture		ciphers,	[39]	controllers	
greenhouses,	[88, 90]	classifier systems		fuzzy, [185, 186, 204, 205]	[177, 167,
AI,	[24]	fuzzy,	[168]	fuzzy-PID,	[201]
analysing GA		classifiers,	[112]	neural,	[18]
crossover,	[172, 174]	clustering,	[218]	PID,	[201]
diversity,	[172, 174]	fuzzy,	[128, 231]	crossover, [174, 191, 203]	[136, 172,
evolution equation,	[100]	clusters		heuristic,	[189]
in machine learning,	[200]	atom,	[101]	PMX,	[191]
antennas		coding		cryptology,	[39, 55]
aperture,	[181]	real, [136, 178, 172, 174, 175, 189, 203, 239]		databases	
array,	[256]	variable length,	[230]	query optimization,	[149]
linear array,	[255, 262]			databaseases	
linear arrays,	[260]	coding theory			
application		constant weight codes,	[245]	compression,	[76]
elevators,	[23]	comparison		design,	[221]
applications		fuzzy approach,	[32]	distribution	
examples,	[161]	fuzzy sets,	[43]	systems,	[240]
artificial intelligence,	[11, 191]	hybrid,	[48]	distribution network	
automata		random search,	[182]	optimization,	[169]
finite state,	[170]	simulated annealing,	[182, 63]	distribution network planning,	[126]
finite state machine,	[214]	computer graphics,	[212]	distribution networks,	[116, 117, 123]
Bayes networks,	[191]	computer science,	[221]	distribution systems,	[139]
Bayesian networks		operating systems,	[22]	restoration,	[56]
learning,	[200]	control,	[253, 110]	diversity, [174, 189, 203]	[136, 172,
bibliography		elevators,	[23]	DNA	
fuzzy logic,	[164]	fuzzy, [247, 21, 137, 24, 27, 154, 150, 157, 160, 163, 165, 176, 180, 206, 227, 229, 234]		sequence comparison,	[190]
fuzzy logic and GA,	[211]			echocardiography,	[265, 266]
Boltzman machines		greenhouse,	[88]	economics	
design,	[68]	greenhouse climate,	[90]	power transmission,	[67]
CAD		inverted pendulum,	[12, 219]	electromagnetics,	[26, 255]
optical devices,	[79]	modelling,	[205]	electronics	
channel assignment,	[95]	optimal,	[219]	digital,	[159, 225]
chemistry		power,	[52]	layout design,	[44]

energy minimization,	[91]	min-max,	[40]	insulators,	[26, 28]
engineering		GATES,	[132]	inverted pendulum,	[219]
aerospace, 171, 124]	[142, 157, 36,	generations		job shop scheduling,	[114]
civil,	[83, 237]	100,	[63]	knapsack problem,	[209]
design,	[109]	genetic programming,	[188, 219]	layout design,	[44]
power, [253, 113, 139, 115, 116, 117, 118, 37, 169, 120, 184, 67, 123, 195, 46, 48, 125, 52, 56, 126, 213, 127, 64, 240]		control rules,	[186]	load balancing,	[22, 149]
radio,	[255, 256, 181, 260, 197, 262, 61]	GENIAL,	[134]	logic programs,	[208]
structural, [267, 135, 71, 73, 74, 75, 78, 81, 83, 84, 258, 87, 259, 94, 96, 99, 264]		GPS?,	[36]	logistics,	[143]
telecommunications,	[245]	graphs		truck routing,	[194]
transportation,	[153]	drawing,	[261]	LVQ,	[155]
vehicle,	[70]	hybrid		machine learning,	[24, 154, 167, 176, 185, 89, 98, 229, 233]
engineering design,	[106]	branch and bound,	[133]	fuzzy,	[248, 179]
evolution,	[25]	branch and bound techniques,	[151]	in optimization,	[130]
evolution strategies,	[158]	evolution strategies,	[204, 205]	rule based,	[215]
Michigan,	[218]	fuzzy,	[146, 172]	manufacturing	
expert systems		fuzzy logic,	[198]	JSS,	[148]
fuzzy,	[50]	interior point,	[195]	NC machines,	[27]
rule learning,	[215]	Lagrangian,	[48]	medicine	
fault detection,	[19]	neural network,	[17]	cardiology,	[265, 266, 257]
FEM,	[267, 135]	neural networks,	[39, 187]	learning,	[62]
shape design,	[264]	simulated annealing,	[181, 63]	messy GA,	[18]
fitting,	[132]	hybris		microscopy,	[223]
Fourier series,	[266]	fuzzy,	[17]	motion planning,	[158]
functions		hydraulics		multi level logic	
Royal road,	[130]	tank model,	[42]	circuits,	[159]
fussy systems		hydrodynamics		mutation	
rule based,	[217]	FEM,	[142]	Cauchy-Lorentz,	[63]
fuzzy GA,	[152]	image processing?,	[122]	Gaussian,	[63]
fuzzy logic,	[224]	image processing,	[10, 171, 86, 131]	navigation,	[14]
fuzzy reasoning,	[168]	classification,	[223]	networks	
fuzzy rules,	[253, 98]	medical,	[265, 266]	planning,	[113]
fuzzy sets, 150, 153, 117, 123, 228]	[115, 116, 150, 153, 117, 123, 228]	implementation		neural networks,	[246, 241, 242, 243, 250, 252, 30, 33, 38, 173, 19, 212]
fuzzy systems, 143, 166, 175, 185, 89, 189, 220]	[244, 136, 143, 166, 175, 185, 89, 189, 220]	C++,	[132]	Bayesian,	[226]
rule based,	[235]	molecular computing,	[236]	classification,	[223]
games		object-oriented,	[112]	control,	[227]
MasterMind,	[182]	PVM,	[162]	design,	[66]
mastermind,	[193]	transputer,	[162]	forecasting,	[213]
		information retrieval,	[228]	fuzzy,	[65]
				Hopfield,	[55]

image processing,	[210]	production economics,	[237]	simulation,	[25]
learning,	[263]	proteins		complex systems,	[54]
learning rules,	[268]	structure,	[238]	spectroscopy,	[207]
LVQ,	[155]	PVM,	[145]	Mössbauer,	[53]
radial basis,	[13]	reasoning,	[191]	X-ray scattering,	[238]
structure,	[18]	regression,	[53]	Stahel-Donoho,	[156]
time series,	[121]	nonlinear,	[187]	statistics	
topology,	[29, 60]	relational databases,	[149]	maximum likelihood,	[47]
training,	[134, 140]	review,	[251]	time series,	[187]
non-supervised learning,	[33]	analysing real coded GA,	[239]	survey	
novelty filter,	[19]	fuzzy logic,	[211]	multiobjective	
optics		power systems,	[125]	[102, 107]	optimization,
lens design,	[93]	real coded GA,	[239]	system planning,	[37]
telescopes,	[79]	robotics,	[111]	Tea: etsi proceedingsin nimi,	[28]
optimization		control,	[69]	telecommunication	
combinatorial,	[133]	manipulator control,	[230]	cellular networks,	[51]
constrained,	[57, 108]	manipulator design,	[85]	telecommunications

4.8 Annual index

The following table gives references to the contributions by the year of publishing.

1991,	[246]	
1992,	[241, 251, 253, 65]	
1993,	[242, 243, 265, 266, 244, 245, 110, 267, 247, 248, 249, 132, 250, 268, 252, 111]	
1994,	[21, 133, 134, 22, 23, 135, 136, 137, 138, 112, 113, 24, 25, 139, 140, 114, 69, 141, 26, 142, 70, 27, 143, 71, 10, 144, 145, 115, 72, 28, 146, 73, 147, 116, 74, 75, 76, 77, 154, 177, 178]	
1995,	[29, 148, 149, 30, 78, 150, 151, 66, 254, 152, 153, 255, 155, 117, 31, 156, 157, 118, 32, 158, 159, 119, 79, 160, 33, 161, 11, 162, 34, 163, 164, 12, 13, 14, 15, 16, 165, 166, 167, 256, 168, 17, 35, 36, 37, 169, 170, 171, 38, 80, 172, 173, 81, 174, 82, 175, 83, 176, 84, 85, 179, 180]	
1996,		[39, 181, 86, 40, 182, 41, 120, 257, 258, 183, 18, 87, 184, 185, 121, 186, 88, 187, 42, 19, 259, 89, 188, 122, 67, 189, 90, 190, 91, 191, 43, 192, 260, 193, 123, 44, 45, 261, 92, 194, 195, 46, 47, 48, 93, 49, 196, 197, 124, 94, 198, 50, 51, 199, 20, 95, 200, 262, 125, 201, 96, 202, 97, 203, 204, 205, 206]
1997,		[52, 263, 53, 54, 55, 207, 56, 208, 57, 58, 209, 210, 126, 211, 59, 212, 60, 213, 61, 127, 214, 215, 98, 216, 217, 218, 219, 62, 220, 221, 222, 223, 224, 225, 226, 227, 228, 128, 229, 129, 130, 230, 68, 231, 232, 99, 233, 234, 235]
1998,		[264, 100, 236, 237, 238, 239, 63, 101, 64, 240, 131, 102, 103, 104]
1999,		[105, 106, 107, 108, 109]

4.9 Geographical index

The following table gives references to the contributions by country.

- Argentina: [12, 13, 18, 19]
- Brazil: [65, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64]
- Chile: [66, 67]
- Colombia: [68]
- Mexico: [110, 111, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109]
- Portugal: [112, 113, 114, 115, 116, 117, 118, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131]
- Spain: [246, 241, 251, 253, 242, 243, 244, 245, 267, 247, 248, 249, 250, 252, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 154, 177, 178, 148, 149, 150, 151, 152, 153, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240]
- The Netherlands: [132, 119]
- Venezuela: [265, 266, 268, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264]

Chapter 5

Permuted title index

The words of the titles of the articles are shown in the next table arranged in alphabetical order. The most common words have been excluded. The key word is shown by a disk (•) in the title field with the exception that it is omitted when appearing as the first word of the title after shown keyword. The other abbreviation used to compress titles are shown in appendix A.

- [67] **access** Economically adapted transmission-syst. in open
• schemes - Appl. of GAs
- [207] **acetemethacin** GA-based wavelength sel. in multicomponent spectrometric determinations by PLS: Appl. on indomethacin and • mixture
- [199] **Adaptation** of GA parameters based on fuzzy logic cntr.
- [67] **adapted** Economically • transmission-syst. in open access schemes - Appl. of GAs
- [228] **adaptive** An appr. to an • info retrieval agent using GAs with fuzzy set genes
- [142] — Mesh generation and • remeshing by GAs on transonic flow simulation
- [192] • + Darwinian appr. for the estimation and tracking of time delays
- [122] • contour estimation with GAs
- [202] • GAs based on fuzzy techniques
- [41] • hierarchical censored production rule-based syst. : a GA appr.
- [228] **agent** An appr. to an adaptive info retrieval • using GAs with fuzzy set genes
- [33] **agents** Non-supervised sensory-motor • learning
- [49] — Placement opt. using behavior based software • and the GA
- [44] — Placement opt. using behavior-based software • and the GA
- [124] **aircraft** An opt. • conflict resolution syst. based on hybrid models
- [103] **Alemana** Estrategias Evolutivas: La Versión • del Algoritmo Genético (Parte I)
- [104] — Estrategias Evolutivas: La Versión • del Algoritmo Genético (Parte II)
- [207] **algorithm-based** Gen. • wavelength sel. in multicomponent spectrometric determinations by PLS: Appl. on indomethacin and acetemethacin mixture
- [18] — Messy gen. • new learning-method for structurally optimized neurofuzzy cntr.
- [204] **algorithm-evolution** A hybrid gen. • strategy process for learning fuzzy logic cntr. knowledge bases
- [242] **algoritmos** Aplicación de los • genéticos para el diseño de redes neuronales [Appl. of GAs for the design of neural networks]
- [241] — Los • genéticos como heurístico en problemas de optimización
- [141] • genéticos paralelos para problemas combinatorios sobre sistemas multiprocesadores de memoria distribuida
- [77] **Algoritmo** El • Genético como Alternativa a la Prog. acción Dinámica
- [103] **Algoritmo** Estrategias Evolutivas: La Versión Alemana del • Genético (Parte I)
- [104] — Estrategias Evolutivas: La Versión Alemana del • Genético (Parte II)
- [31] **algoritmo** Um • paralelo distribuido para o travelling purchaser problem [A par. distr. alg. for the traveling salesman problem]
- [16] **allocation** High-level synthesis sch. and • using GAs
- [77] **Alternativa** El Algoritmo Genético como • a la Prog. acción Dinámica
- [86] **analysis** Parameter determination for quantitative pixel • using GAs
- [200] — Structure learning of Bayesian networks by GAs: a perf. • of cntr. parameters
- [178] — Tackling real-coded GAs: operators and tools for behavioural •
- [239] — Tackling real-coded GAs: Operators and tools for behavioural •
- [10] **anatomical** GAs and deformable geometric models for • object recognition
- [208] **AND** A gen. appr. to computing independent • par. in logic prog.
- [243] **ANN** Full automatic • design: a gen. appr.
- [38] — Novel intelligent environment dedicated to • fast prototyping
- [55] **annealed** Cryptanalysis of speech signals ciphered by TSP using • Hopfield neural network and GAs
- [39] — Cryptanalysis of speech signals ciphered by TSP using • hopfield neural-network and GAs
- [256] **antenna** Synthesis of • arrays using GAs
- [197] **antenna array** Appl. of GAs and simulated annealing technique in optimising the aperture distributions of • patterns
- [260] **antenna arrays** Application of GAs for the synthesis of linear •
- [181] — Appl. of GAs and simulated annealing technique in opt. the aperture distributions of •
- [255] — Synthesis of multiple beam linear • using GAs
- [197] **aperture** Appl. of GAs and simulated annealing technique in optimising the • distributions of antenna array patterns
- [181] — Appl. of GAs and simulated annealing technique in opt. the • distributions of antenna arrays
- [137] **aplicación** Estudio de la coordinación inteligente en robots bípedos: • de lógica borrosa y algoritmos genéticos
- [242] • de los alg. os genéticos para el diseño de redes neuronales [Appl. of GAs for the design of neural networks]
- [147] **aplicaciones** Algoritmos genéticos: Fundamentos, extensiones y •
- [260] **Application** of GAs for the synthesis of linear antenna arrays
- [177] **Applicability** of the fuzzy operators in the design of fuzzy logic cntr.

- [242] **Application** Aplicación de los alg. os genéticos para el diseño de redes neuronales • of GAs for the design of neural networks]
- [67] **Application** Economically adapted transmission-syst. in open access schemes - • of GAs
- [207] — GA-based wavelength sel. in multicomponent spectrometric determinations by PLS: • on indomethacin and acetaminophen mixture
- [23] — GAs and discrete event syst. : an •
- [115] — GAs and fuzzy models – an • to gas and electricity distribution planning under uncertainty
- [145] — GAs on lan-message passing architectures using PVM: • to the routing problem
- [173] — Gen. prog. : foundations and • on the opt. of NNs
- [42] • of a GA for calibration and structural modification of tank model
- [197] • of GAs and simulated annealing technique in optimising the aperture distributions of antenna array patterns
- [181] • of GAs and simulated annealing technique in opt. the aperture distributions of antenna arrays
- [20] • of par. GA and property of multiple global optima to VQ codevector index assignment for noisy channels
- [37] • of stochastic opt. to power syst. planning and operation
- [169] — Opt. of power distribution network design by • of GAs
- [249] **applications** GA • to fuzzy logic based syst.
- [139] — GAs • to the opt. power distribution syst. design
- [154, 167] **applied** Evol.-based learning • to fuzzy cntr.
- [240] — GAs • to the design of large power distribution syst.
- [187] — Hybrid syst. : neural networks and GAs • in nonlinear regression and time series forecasting
- [253] — Inductive learning • to fossil power plants cntr. opt.
- [69] — Parameter determination for a GA • to robot cntr.
- [144] **Applying** GAs in fuzzy opt. problems
- [11] • GAs in scientific discovery: a case study
- [22] • GAs to the load balancing problem
- [229] **approximate** A three-stage evol. process for learning descriptive and • fuzzy-logic-cntr. knowledge bases from examples
- [60] **architectures** Evol. design of MLP neural network •
- [145] — GAs on lan-message passing • using PVM: Appl. to the routing problem
- [51] **area** GAs and the location • partitioning problem in cellular networks
- [71] **Armaduras** Uso de Algoritmos Genéticos para el Diseño Optimo de •
- [256] **arrays** Synthesis of antenna • using GAs
- [121] **artificial** An evol. • neural network time series forecasting syst.
- [140] — Evol. generation and training of recurrent • neural networks
- [118] **assessment** Derivation of classification structures for fast evaluation of dynamic security • in power syst. using GAs
- [20] **assignment** Appl. of par. GA and property of multiple global optima to VQ codevector index • for noisy channels
- [79] **astronomical** Design of • telescopes of two mirrors using GA in the stage of opt.
- [171] **attitude** Two spacecraft • determination using NNs and image processing
- [243] **automatic** Full • ANN design: a gen. appr.
- [157] — GAs for fuzzy cntr. of • docking with a space station
- [70] **automotive** Use of GAs to optimize the cost of • wire harness
- [75] **Axial** Uso de Algoritmos Genéticos para la Optimización de Columnas no Prismáticas Sometidas a Carga •
- [96] **axially** A GA for the opt. design of • loaded non-prismatic columns
- [30] **backpropagation** Um estudo de paralelismo em redes •
- [149] **balancing** A GA for load • in par. query evaluation for deductive relational databases
- [85] — Use of GAs for multiobjective opt. of counterweight • of robot arms
- [133] **basadas** Diseño y evaluación de técnicas mixtas • en algoritmos genéticos y de branch-and-bound para la resolución de problemas de optimización combinatoria
- [234] **base** A fuzzy logic cntr. with learning through the evol. of its knowledge •
- [180] — Design of a cntr. rules • based on GAs
- [229] **bases** A three-stage evol. process for learning descriptive and approximate fuzzy-logic-cntr. knowledge • from examples
- [76] — Compresión de • de Datos
- [191] **Bayesian network** Learning • structures by searching for best ordering with GA
- [226] **Bayesian networks** Decomposing • triangulation of the moral graph with GAs
- [200] — Structure learning of • by GAs: a perf. analysis of cntr. parameters
- [255] **beam** Synthesis of multiple • linear antenna arrays using GAs
- [94] **beams** A simple GA for the design of reinforced concrete •
- [83] — An appr. to opt. design of reinforced concrete • using GAs
- [81, 99] — Opt. design of reinforced concrete • using GAs
- [78] — Use of GAs for the opt. design of reinforced concrete •
- [49] **behavior** Placement opt. using • based software agents and the GA
- [44] **behavior-based** Placement opt. using • software agents and the GA
- [132] **behaviour** Modelling chromatographic • as a function of pH and solvent composition in RPLC
- [25] — Simulation of exaptive •
- [178] **behavioural** Tackling real-coded GAs: operators and tools for • analysis
- [239] — Tackling real-coded GAs: Operators and tools for • analysis
- [26] **BEM** Design opt. using the • coupled with GA
- [164] **bibliography** A classified review on the combination fuzzy logic – GAs •
- [264] **bidimensional** Opt. of finite element • models: an appr. based on GAs
- [198] **bidirectional** On the • integration of GAs and fuzzy logic
- [223] **biological** A GA-optimized neural network for classification of • particles from electron-microscopy images
- [68] **Boltzmann machines** design using GAs in a par. environment
- [225] **Boolean** networks decomposition using GAs
- [29] — Sistema gen. o hierarquico para escolha topologica de redes neurais Booleanas [A hierarchical genetic syst. for selecting topology of • NNs]
- [29] **Booleanas** Sistema gen. o hierarquico para escolha topologica de redes neurais • [A hierarchical genetic syst. for selecting topology of Boolean NNs]
- [137] **borrosa** Estudio de la coordinación inteligente en robots bipedos: aplicación de lógica • y algoritmos genéticos
- [266] **boundary** Model-based epicardial • detection using GAs
- [265] — Model-based, knowledge-based epicardial • detector
- [151] **branch and bound techniques** Hybridizing GAs with • for the resolution of the TSP
- [133] **branch-and-bound** Diseño y evaluación de técnicas mixtas basadas en algoritmos genéticos y de • para la resolución de problemas de optimización combinatoria
- [42] **calibration** Appl. of a GA for • and structural modification of tank model
- [75] **Carga** Uso de Algoritmos Genéticos para la Optimización de Columnas no Prismáticas Sometidas a • Axial
- [51] **cellular networks** GAs and the location area partitioning problem in •
- [95] **cellular systems** Channel assignment in • using GAs
- [41] **censored** Adaptive hierarchical • production rule-based syst. : a GA appr.
- [15] **chaining** Software test data generation using the • appr.
- [95] **Channel assignment** in cellular syst. using GAs
- [20] **channels** Appl. of par. GA and property of multiple global optima to VQ codevector index assignment for noisy •
- [50] **chemical-analyses** A fuzzy expert-syst. for qualitative • of minerals
- [201] **choice** Between fuzzy-PID and PID-conventional cntr. : a good •
- [35] — GAs in the opt. • of neural networks for signal processing
- [132] **chromatographic** Modelling • behaviour as a function of pH and solvent composition in RPLC
- [55] **ciphered** Cryptanalysis of speech signals • by TSP using annealed Hopfield neural network and GAs

- [39] – Cryptanalysis of speech signals • by TSP using annealed hopfield neural-network and GAs
- [97] **circuits** Using GAs to design combinational logic •
- [101] **Cl** Evolving few-ion clusters of Na and •
- [223] **classification** A GA-optimized neural network for • of biological particles from electron-microscopy images
- [118] – Derivation of • structures for fast evaluation of dynamic security assessment in power syst. using GAs
- [164] **classified** A • review on the combination fuzzy logic – GAs bibliography
- [168] **classifier** Fuzzy and probabilistic reasoning in simple learning • syst.
- [112] **classifiers** GAs, • and par. – An object-oriented appr.
- [90] **climate** Greenhouse • cntr. by evol. computation - GAs and evol. ary prog.
- [88] – Greenhouse • cntr. by evol. computation: GAs and evol. ary prog.
- [128] **clustering** A gen. appr. to fuzzy • with a validity measure fitness function
- [218] – Experimental results of a Michigan-like evol. strategy for non-stationary •
- [231] – Gen. fuzzy • for the definition of fuzzy sets
- [101] **clusters** Evolving few-ion • of Na and Cl
- [91] – Evolving • with GAs
- [245] **codes** Using GAs to design constant weight •
- [221] **codesign** Functional partitioning for hardware-software • using GAs
- [20] **codevector** Appl. of par. GA and property of multiple global optima to VQ • index assignment for noisy channels
- [222] **coding** A new appr. to fuzzy cntr. designing and • via GAs
- [131] **Cognition** Evol. and • in Image Analysis
- [62] **cognitive** An evol. appr. to simulate • feedback learning in medical domain
- [111] **collision-free** Generation of • paths, a gen. appr.
- [232] **colorimetric** Evaluation of nat. computation techniques in the modeling and opt. of a sequential injection flow syst. for • iron(III) determination
- [75] **Columnas** Uso de Algoritmos Genéticos para la Optimización de • no Prismáticas Sometidas a Carga Axial
- [96] **columns** A GA for the opt. design of axially loaded non-prismatic •
- [164] **combination** A classified review on the • fuzzy logic – GAs bibliography
- [155] – G-LVQ, a • of GAs and LVQ
- [97] **combinational logic** Using GAs to design • circuits
- [141] **combinatorios** Alg. os genéticos paralelos para problemas • sobre sistemas multiprocesadores de memoria distribuida
- [77] **como** El Algoritmo Genético • Alternativa a la Prog. acción Dinámica
- [241] – Los alg. os genéticos • heurístico en problemas de optimización
- [162] **comparative** A • study of two distr. syst. : PVM and transputers
- [190] **comparison** GA for DNA/RNA sequence •
- [119] • of two Rep. for the simple and the enhanced job-shop Sch. problem
- [250] **competitive** Opt. of a • learning neural network by GAs
- [110] – The design of • alg. via GAs
- [54] **complex systems** A new appr. for GA as a support to the simulation of •
- [132] **composition** Modelling chromatographic behaviour as a function of pH and solvent • in RPLC
- [107] **comprehensive** A • survey of evol. -based multiobjective opt. techniques
- [76] **Compresión** de Bases de Datos
- [232] **computation** Evaluation of nat. • techniques in the modeling and opt. of a sequential injection flow syst. for colorimetric iron(III) determination
- [114] – Evol. • for the job-shop sch. problem
- [64] – Evol. • in power syst.
- [125] – Evol. • in power syst.
- [34] – GAs and evol. •
- [90] – Greenhouse climate cntr. by evol. • - GAs and evol. ary prog.
- [88] – Greenhouse climate cntr. by evol. • GAs and evol. ary prog.
- [236] – Molecular • for GAs
- [208] **computing** A gen. appr. to • independent AND par. in logic prog.
- [133] **combinatoria** Diseño y evaluación de técnicas mixtas basadas en algoritmos genéticos y de branch-and-bound para la resolución de problemas de optimización •
- [43] **concepts** The • of fuzzy sets and GAs: contrasts and similarities of expectations and development patterns (or would you rather mutate or go fuzzy?)
- [94] **concrete** A simple GA for the design of reinforced • beams
- [83] – An appr. to opt. design of reinforced • beams using GAs
- [81, 99] – Opt. design of reinforced • beams using GAs
- [78] – Use of GAs for the opt. design of reinforced • beams
- [84] **Concreto** Diseño Óptimo de Vigas de • Reforzado mediante Algoritmos Genéticos
- [124] **conflict** An opt. aircraft • resolution syst. based on hybrid models
- [203] **connectives** Dynamic and heuristic fuzzy • based crossover operators for cntr. the diversity and convergence of real-coded GAs
- [172] – Fuzzy • based crossover operators to model GAs pop. diversity
- [189] – Heuristic crossovers for real-coded GAs based on fuzzy •
- [175] – The use of fuzzy • to design real-coded GAs
- [245] **constant** Using GAs to design • weight codes
- [61] **constellations** Generating fading-resistant • using GA
- [57] **constrained** A GA for • and multiobjective opt.
- [193] **constraint** Gen. Mastermind, a case of dynamic • opt.
- [182] – Solving *MasterMind* using GAs and simulated annealing: a case of dynamic • opt.
- [108] **constraints** Treating • as objectives for single-objective evol. opt.
- [122] **contour** Adaptive • estimation with GAs
- [43] **contrasts** The concepts of fuzzy sets and GAs: • and similarities of expectations and development patterns (or would you rather mutate or go fuzzy?)
- [46] **control** A gen. -based • design for damping power syst. inter-area oscillations
- [176] – A learning process for fuzzy • rules using GAs
- [180] – Design of a • rules base based on GAs
- [206] – Generating and selecting fuzzy • rules using evol. strategies and GAs
- [59] – GA for weight sel. in H • design
- [157] – GAs for fuzzy • of automatic docking with a space station
- [90] – Greenhouse climate • by evol. computation - GAs and evol. ary prog.
- [88] – Greenhouse climate • by evol. computation: GAs and evol. ary prog.
- [253] – Inductive learning appl. to fossil power plants • opt.
- [32] – Intelligent solutions for cybernetics vehicle •
- [219] – Opt. • of an inverted pendulum by gen. prog. : practical aspects
- [69] – Parameter determination for a GA appl. to robot •
- [200] – Structure learning of Bayesian networks by GAs: a perf. analysis of • parameters
- [138] – The routing problem in traffic • using GAs
- [160] **control systems** GAs in fuzzy •
- [234] **controller** A fuzzy logic • with learning through the evol. of its knowledge base
- [204] – A hybrid GA-ES process for learning fuzzy logic • knowledge bases
- [222] – A new appr. to fuzzy • designing and coding via GAs
- [163] – A wall following robot with a fuzzy logic • optimized by a GA
- [199] **controllers** Adaptation of GA parameters based on fuzzy logic •
- [177] – Applicability of the fuzzy operators in the design of fuzzy logic •
- [201] – Between fuzzy-PID and PID-conventional • a good choice
- [186] – Evol. design of fuzzy logic •
- [154, 167] – Evol. -based learning appl. to fuzzy •
- [18] – Messy GA-based new learning-method for structurally optimized neurofuzzy •
- [247] – Tuning fuzzy logic • by GA
- [165] – Tuning fuzzy-logic • by GAs
- [52] – Tuning of power syst. damping • using GAs

- [174] **controlling** Dynamic and heuristic crossover operators for • the diversity and convergence of real-coded GAs
- [203] – Dynamic and heuristic fuzzy connectives based crossover operators for • the diversity and convergence of real-coded GAs
- [174] **convergence** Dynamic and heuristic crossover operators for cntr. the diversity and • of real-coded GAs
- [203] – Dynamic and heuristic fuzzy connectives based crossover operators for cntr. the diversity and • of real-coded GAs
- [120] – Opt. distribution network expansion planning under uncertainty by evol. decision •
- [137] **coordinación** Estudio de la • inteligente en robots bípedos: aplicación de lógica borrosa y algoritmos genéticos
- [158] **Coordinated** motion planning of manipulators by ES
- [70] **cost** Use of GAs to optimize the • of automotive wire harness
- [85] **counterweight** Use of GAs for multiobjective opt. of • balancing of robot arms
- [26] **coupled** Design opt. using the BEM • with GA
- [48] – GA • with a deterministic method for opt. in electromagnetics
- [203] **crossover** Dynamic and heuristic fuzzy connectives based • operators for cntr. the diversity and convergence of real-coded GAs
- [174] **crossover operators** Dynamic and heuristic • for cntr. the diversity and convergence of real-coded GAs
- [172] – Fuzzy connectives based • to model GAs pop. diversity
- [189] **crossovers** Heuristic • for real-coded GAs based on fuzzy connectives
- [55] **Cryptanalysis** of speech signals ciphered by TSP using annealed Hopfield neural network and GAs
- [39] • of speech signals ciphered by TSP using annealed hopfield neural-network and GAs
- [32] **cybernetics** Intelligent solutions for • vehicle cntr.
- [46] **damping** A gen. -based cntr. design for • power syst. inter-area oscillations
- [52] – Tuning of power syst. • cntr. using GAs
- [192] **Darwinian** Adaptive + • appr. for the estimation and tracking of time delays
- [149] **databases** A GA for load balancing in par. query evaluation for deductive relational •
- [76] **Datos** Compresión de Bases de •
- [120] **decision** Opt. distribution network expansion planning under uncertainty by evol. • convergence
- [127] **decision-making** An evol. appr. to • in distribution planning
- [226] **Decomposing** Bayesian networks: triangulation of the moral graph with GAs
- [225] **decomposition** Boolean networks • using GAs
- [38] **dedicated** Novel intelligent environment • to ANN fast prototyping
- [149] **deductive** A GA for load balancing in par. query evaluation for • relational databases
- [231] **definition** Gen. fuzzy clustering for the • of fuzzy sets
- [10] **deformable** GAs and • geometric models for anatomical object recognition
- [100] **degrees** Effective • of freedom in GAs
- [103] **del** Estrategias Evolutivas: La Versión Alemana • Algoritmo Genético (Parte I)
- [104] – Estrategias Evolutivas: La Versión Alemana • Algoritmo Genético (Parte II)
- [194] **delivery** DISTOS: Efficient petrol • syst. using optimized truck routing
- [118] **Derivation** of classification structures for fast evaluation of dynamic security assessment in power syst. using GAs
- [229] **descriptive** A three-stage evol. process for learning • and approximate fuzzy-logic-cntr. knowledge bases from examples
- [96] **design** A GA for the opt. • of axially loaded non-prismatic columns
- [46] – A gen. -based cntr. • for damping power syst. inter-area oscillations
- [94] – A simple GA for the • of reinforced concrete beams
- [83] – An appr. to opt. • of reinforced concrete beams using GAs
- [87] – An Empirical Study of Evol. Techniques for Multiobjective Opt. in Eng. •
- [242] – Aplicación de los alg. os genéticos para el diseño de redes neuronales [Appl. of GAs for the • of neural networks]
- [177] – Applicability of the fuzzy operators in the • of fuzzy logic cntr.
- [68] – Boltzmann machines • using GAs in a par. environment
- [186] – Evol. • of fuzzy logic cntr.
- [60] – Evol. • of MLP neural network architectures
- [235] – Evol. • of TSK fuzzy rule-based syst. using
- [243] – Full automatic ANN • a gen. appr.
- [59] – GA for weight sel. in H cntr. •
- [139] – GAs appl. to the opt. power distribution syst. •
- [240] – GAs appl. to the • of large power distribution syst.
- [93] – Lens • using GA in the stage of opt.
- [106] – MOSES: A multiobjective opt. tool for eng. •
- [180] • of a cntr. rules base based on GAs
- [79] • of astronomical telescopes of two mirrors using GA in the stage of opt.
- [26] • opt. using the BEM coupled with GA
- [81, 99] – Opt. • of reinforced concrete beams using GAs
- [169] – Opt. of power distribution network • by appl. of GAs
- [175] – The use of fuzzy connectives to • real-coded GAs
- [110] – The • of competitive alg. via GAs
- [78] – Use of GAs for the opt. • of reinforced concrete beams
- [97] – Using GAs to • combinational logic circuits
- [245] – Using GAs to • constant weight codes
- [134] **designer** GENIAL: an evol. recurrent neural network • and trainer
- [222] **designing** A new appr. to fuzzy cntr. • and coding via GAs
- [185] – A three-stage method for • gen. fuzzy syst. by learning from examples
- [66] • max-min propagation NNs by hyperplane switching
- [73] **Designs** Opt. of Truss • using GAs
- [266] **detection** Model-based epicardial boundary • using GAs
- [265] **detector** Model-based, knowledge-based epicardial boundary •
- [232] **determination** Evaluation of nat. computation techniques in the modeling and opt. of a sequential injection flow syst. for colorimetric iron(III) •
- [69] – Parameter • for a GA appl. to robot cntr.
- [86] – Parameter • for quantitative pixel analysis using GAs
- [171] – Two spacecraft attitude • using NNs and image processing
- [207] **determinations** GA-based wavelength sel. in multi-component spectrometric • by PLS: Appl. on indomethacin and acetemthacin mixture
- [233] **determining** Using info measures for • the relevance of the predictive variables in learning problems
- [48] **deterministic method** GA coupled with a • for opt. in electromagnetics
- [43] **development** The concepts of fuzzy sets and GAs: contrasts and similarities of expectations and • patterns (or would you rather mutate or go fuzzy?)
- [77] **Dinámica** El Algoritmo Genético como Alternativa a la Prog. acción •
- [11] **discovery** Applying GAs in scientific • a case study
- [23] **discrete** GAs and • event syst. : an appl.
- [74] • opt. of trusses using GAs
- [252] **discrete-time** Gen. synthesis of • recurrent neural network
- [184] **Discussion** [of [269]]

- [105] **G A-based** Two new • methods for multiobjective opt.
- [223] **G A-optimized** A • neural network for classification of biological particles from electron-microscopy images
- [115] **gas** GAs and fuzzy models - an appl. to • and electricity distribution planning under uncertainty
- [148] **G A/TS** a hybrid appr. for job shop sch. in a production syst. .
- [77] **Genético** El Algoritmo • como Alternativa a la Prog. ación Dinámica
- [103] **Genético** Estrategias Evolutivas: La Versión Alemana del Algoritmo • (Parte I)
- [104] — Estrategias Evolutivas: La Versión Alemana del Algoritmo • (Parte II)
- [141] **genéticos** Alg. os • paralelos para problemas combinatorios sobre sistemas multiprocesadores de memoria distribuida
- [147] — Algoritmos • Fundamentos, extensiones y aplicaciones
- [242] — Aplicación de los alg. os • para el diseño de redes neuronales [Appl. of GAs for the design of neural networks]
- [84] — Diseño Optimo de Vigas de Concreto Reforzado mediante Algoritmos •
- [133] — Diseño y evaluación de técnicas mixtas basadas en algoritmos • y de branch-and-bound para la resolución de problemas de optimización combinatoria
- [137] — Estudio de la coordinación inteligente en robots bípedos: aplicación de lógica borrosa y algoritmos •
- [82] — Introducción a los Algoritmos •
- [241] — Los alg. os • como heurístico en problemas de optimización
- [71] — Uso de Algoritmos • para el Diseño Optimo de Armaduras
- [206] **Generating** and selecting fuzzy cntr. rules using evol. strategies and GAs
- [217] • and tuning fuzzy rules using hybrid syst.
- [61] • fading-resistant constellations using GA
- [179] • fuzzy rules from examples using GAs
- [123] **generation** Dynamic planning of distribution networks including dispersed •
- [140] — Evol. • and training of recurrent artificial neural networks
- [142] — Mesh • and adaptive remeshing by GAs on transonic flow simulation
- [135] — Mesh • using GAs
- [111] • of collision-free paths, a gen. appr.
- [15] — Software test data • using the chaining appr.
- [228] **genes** An appr. to an adaptive info retrieval agent using GAs with fuzzy set •
- [46] **genetic-based** A • cntr. design for damping power syst. inter-area oscillations
- [17] **Genetic-neuro-fuzzy** syst. : a promising fusion
- [29] **genetico** Sistema • hierarquico para escolha topolsgica de redes neurais Booleanas [A hierarchical gen. syst. for selecting topology of Boolean NNs]
- [75] **Genéticos** Uso de Algoritmos • para la Optimización de Columnas no Prismáticas Sometidas a Carga Axial
- [56] **genetics** Opt. energy restoration in distribution syst. using • alg.
- [134] **GENIAL** an evol. recurrent neural network designer and trainer
- [10] **geometric** GAs and deformable • models for anatomical object recognition
- [212] **global** A neuro-evol. unbiased • illumination alg.
- [20] **global optima** Appl. of par. GA and property of multiple • to VQ codevector index assignment for noisy channels
- [155] **G-LVQ** a combination of GAs and LVQ
- [166] **goals** An evol. prog. for the multiobjective solid transportation problem with fuzzy •
- [226] **graph** Decomposing Bayesian networks: triangulation of the moral • with GAs
- [261] **graphs** A GA for drawing • in an interactive environment
- [90] **Greenhouse** climate cntr. by evol. computation - GAs and evol. ary prog.
- [88] • climate cntr. by evol. computation: GAs and evol. ary prog.
- [221] **hardware-software** Functional partitioning for • codesign using GAs
- [126] **hedging** Distribution network expansion planning under uncertainty: a • alg. in an evol. appr.
- [241] **heurístico** Los alg. os genéticos como • en problemas de optimización
- [174] **heuristic** Dynamic and • crossover operators for cntr. the diversity and convergence of real-coded GAs
- [203] — Dynamic and • fuzzy connectives based crossover operators for cntr. the diversity and convergence of real-coded GAs
- [189] • crossovers for real-coded GAs based on fuzzy connectives
- [41] **hierarchical** Adaptive • censored production rule-based syst. : a GA appr.
- [29] — Sistema gen. o hierarquico para escolha topolsgica de redes neurais Booleanas [A • genetic syst. for selecting topology of Boolean NNs]
- [29] **hierarquico** Sistema gen. o • para escolha topolsgica de redes neurais Booleanas [A hierarchical genetic syst. for selecting topology of Boolean NNs]
- [16] **High-level** synthesis sch. and allocation using GAs
- [55] **Hopfield** Cryptanalysis of speech signals ciphered by TSP using annealed • neural network and GAs
- [39] **hopfield** Cryptanalysis of speech signals ciphered by TSP using annealed • neural-network and GAs
- [58] **hybrid** A • appr. to solve real make-to-order job shop sch. problems
- [254] — A • GA appr. for the 'no-wait' flowshop sch. problem
- [209] — A • GA for the 0-1 multiple knapsack problem
- [204] — A • GA-ES process for learning fuzzy logic cntr. knowledge bases
- [124] — An opt. aircraft conflict resolution syst. based on • models
- [148] — G A/TS: a • appr. for job shop sch. in a production syst. .
- [217] — Generating and tuning fuzzy rules using • syst.
- [187] **Hybrid system** neural networks and GAs appl. in non-linear regression and time series forecasting
- [151] **Hybridizing** GAs with branch and bound techniques for the resolution of the TSP
- [66] **hyperplane** Designing max-min propagation NNs by • switching
- [205] **identification** Fuzzy • by means of GAs
- [13] **identifying** GA for • selfgenerating radial basis neural networks
- [212] **illumination** A neuro-evol. unbiased global • alg.
- [210] **image** Facial • recognition using neural networks and GAs
- [131] **Image Analysis** Evol. and Cognition in •

- [171] **image processing** Two spacecraft attitude determination using NNs and •
- [223] **images** A GA-optimized neural network for classification of biological particles from electron-microscopy •
- [72] **Implementation** of a parametric spectral estimator using GAs
- [19] • of neural-network and GAs for novelty filters for fault-detection
- [170] **incompletely** A GA for reducing the number of states in • specified finite state machines
- [208] **independent** A gen. appr. to computing • AND par. in logic prog.
- [230] **individuals** Using GAs with variable-length • for planning two-manipulators motion
- [207] **indomethacin** GA-based wavelength sel. in multicomponent spectrometric determinations by PLS: Appl. on • and acemethacin mixture
- [253] **Inductive** learning appl. to fossil power plants cntr. opt.
- [130] **influence** The • of learning in the opt. of Royal road functions
- [228] **information** An appr. to an adaptive • retrieval agent using GAs with fuzzy set genes
- [244] – Gen. processing of the sensorial •
- [233] – Using • measures for determining the relevance of the predictive variables in learning problems
- [232] **injection** Evaluation of nat. computation techniques in the modeling and opt. of a sequential • flow syst. for colorimetric iron(III) determination
- [28] **insulators** Opt. of • using a GA
- [198] **integration** On the bidirectional • of GAs and fuzzy logic
- [137] **inteligente** Estudio de la coordinación • en robots bípedos: aplicación de lógica borrosa y algoritmos genéticos
- [32] **Intelligent** solutions for cybernetics vehicle cntr.
- [38] – Novel • environment dedicated to ANN fast prototyping
- [261] **interactive** A GA for drawing graphs in an • environment
- [46] **inter-area** A gen. -based cntr. design for damping power syst. • oscillations
- [195] **interior point** Unit commitment by • GAs
- [82] **Introducción** a los Algoritmos Genéticos
- [219] **inverted pendulum** Opt. cntr. of an • by gen. prog.: practical aspects
- [12] – Stabilization of • by the GA
- [232] **iron(III)** Evaluation of nat. computation techniques in the modeling and opt. of a sequential injection flow syst. for colorimetric • determination
- [148] **job shop scheduling** GA/TS: a hybrid appr. for • in a production syst. .
- [58] **job shop scheduling problems** A hybrid appr. to solve real make-to-order •
- [119] **job-shop** Comparison of two Rep. for the simple and the enhanced • Sch. problem
- [114] **job-shop scheduling problem** Evol. computation for the •
- [209] **knapsack problem** A hybrid GA for the 0-1 multiple •
- [234] **knowledge** A fuzzy logic cntr. with learning through the evol. of its • base
- [229] – A three-stage evol. process for learning descriptive and approximate fuzzy-logic-cntr. • bases from examples
- [204] **knowledge bases** A hybrid GA-ES process for learning fuzzy logic cntr. •
- [265] **knowledge-based** Model-based, • epicardial boundary detector
- [145] **lan-message** GAs on • passing architectures using PVM: Appl. to the routing problem
- [188] **large-scale** Finding the opt. policy for a • syst. using gen. prog.
- [234] **learning** A fuzzy logic cntr. with • through the evol. of its knowledge base
- [204] – A hybrid GA-ES process for • fuzzy logic cntr. knowledge bases
- [229] – A three-stage evol. process for • descriptive and approximate fuzzy-logic-cntr. knowledge bases from examples
- [185] – A three-stage method for designing gen. fuzzy syst. by • from examples
- [248] – A • method of fuzzy reasoning by GAs
- [176] – A • process for fuzzy cntr. rules using GAs
- [62] – An evol. appr. to simulate cognitive feedback • in medical domain
- [154, 167] – Evol. -based • appl. to fuzzy cntr.
- [168] – Fuzzy and probabilistic reasoning in simple • CSs
- [268] – GA like • rule for neural networks
- [253] – Inductive • appl. to fossil power plants cntr. opt.
- [191] • Bayesian network structures by searching for best ordering with GA
- [215] • rules from the experience of an expert syst. using GAs
- [33] – Non-supervised sensory-motor agents •
- [250] – Opt. of a competitive • neural network by GAs
- [263] – Recognition alg. using evol. • on the random neural networks
- [98] – Rule • in fuzzy syst. using evol. prog.
- [89] – Rule • in fuzzy syst. using evol. prog.
- [200] – Structure • of Bayesian networks by GAs: a perf. analysis of cntr. parameters
- [130] – The influence of • in the opt. of Royal road functions
- [233] – Using info measures for determining the relevance of the predictive variables in • problems
- [18] **learning-method** Messy GA-based new • for structurally optimized neurofuzzy cntr.
- [93] **Lens** design using GA in the stage of opt.
- [47] **likelihood** A GA solution to the maximum • statistical problem
- [260] **linear** Application of GAs for the synthesis of • antenna arrays
- [255] – Synthesis of multiple beam • antenna arrays using GAs
- [262] **linear-array** Synthesis of • using Schelkunoffs method and GAs
- [149] **load** A GA for • balancing in par. query evaluation for deductive relational databases
- [213] – Electric • forecasting with gen. neural networks
- [22] **load balancing problem** Applying GAs to the •
- [96] **loaded** A GA for the opt. design of axially • non-prismatic columns
- [51] **location** GAs and the • area partitioning problem in cellular networks
- [234] **logic** A fuzzy • cntr. with learning through the evol. of its knowledge base
- [159] – Multilevel • synthesis using alg. based on nat. processes
- [208] **logic programs** A gen. appr. to computing independent AND par. in •
- [242] **los** Aplicación de • alg. os genéticos para el diseño de redes neuronales [Appl. of GAs for the design of neural networks]
- [82] – Introducción a • Algoritmos Genéticos
- [241] • alg. os genéticos como heuristicó en problemas de optimización
- [238] **Low-resolution** structures of proteins in solution retrieved from X-ray scattering with a GA
- [155] **LVQ** G-LVQ, a combination of GAs and •
- [27] **machine tool** Fuzzy cntr. and GAs in NC •
- [170] **machines** A GA for reducing the number of states in incompletely specified finite state •
- [58] **make-to-order** A hybrid appr. to solve real • job shop sch. problems
- [158] **manipulators** Coordinated motion planning of • by ES
- [182] **MasterMind** Solving • using GAs and simulated annealing: a case of dynamic constraint opt.
- [193] **Mastermind** Gen. • a case of dynamic constraint opt.
- [47] **maximum** A GA solution to the • likelihood statistical problem
- [66] **max-min** Designing • propagation NNs by hyperplane switching
- [128] **measure** A gen. appr. to fuzzy clustering with a validity • fitness function
- [233] **measures** Using info • for determining the relevance of the predictive variables in learning problems
- [24] **mechanism** An evolutive fuzzy • based on past experiences
- [84] **mediante** Diseño Optimo de Vigas de Concreto Reforzado • Algoritmos Genéticos
- [62] **medical** An evol. appr. to simulate cognitive feedback learning in • domain
- [141] **memoria** Alg. os genéticos paralelos para problemas combinatorios sobre sistemas multiprocesadores de • distribuida
- [142] **Mesh** generation and adaptive remeshing by GAs on transonic flow simulation

- [135] • generation using GAs
- [18] **Messy** GA-based new learning-method for structurally optimized neurofuzzy cntr.
- [248] **method** A learning • of fuzzy reasoning by GAs
- [185] – A three-stage • for designing gen. fuzzy syst. by learning from examples
- [117] **methodology** A general • for distribution planning under uncertainty, including GAs and fuzzy models in a multi-criteria environment
- [105] **methods** Two new GA-based • for multiobjective opt.
- [218] **Michigan-like** Experimental results of a • evol. strategy for non-stationary clustering
- [50] **minerals** A fuzzy expert-syst. for qualitative chemical-analyses of •
- [63] **minima** Alg. for multiple • search
- [116] **minimum** Dynamic planning of distribution networks for • regret strategies
- [40] **min-max problems** A GA for •
- [79] **mirrors** Design of astronomical telescopes of two • using GA in the stage of opt.
- [133] **mixtas** Diseño y evaluación de técnicas • basadas en algoritmos genéticos y de branch-and-bound para la resolución de problemas de optimización combinatoria
- [207] **mixture** GA-based wavelength sel. in multicomponent spectrometric determinations by PLS: Appl. on indomethacin and acemethacin •
- [60] **MLP** Evol. design of • neural network architectures
- [42] **model** Appl. of a GA for calibration and structural modification of tank •
- [172] – Fuzzy connectives based crossover operators to • GAs pop. diversity
- [266] **Model-based** epicardial boundary detection using GAs
- [265] • knowledge-based epicardial boundary detector
- [232] **modeling** Evaluation of nat. computation techniques in the • and opt. of a sequential injection flow syst. for colorimetric iron(III) determination
- [132] **Modelling** chromatographic behaviour as a function of pH and solvent composition in RPLC
- [117] **models** A general methodology for distribution planning under uncertainty, including GAs and fuzzy • in a multi-criteria environment
- [124] – An opt. aircraft conflict resolution syst. based on hybrid •
- [10] – GAs and deformable geometric • for anatomical object recognition
- [264] – Opt. of finite element bidimensional • an appr. based on GAs
- [267] – Opt. of structural and finite element • via GAs
- [45] **modes** An evol. alg. for resource-constrained project sch. and multiple execution •
- [42] **modification** Appl. of a GA for calibration and structural • of tank model
- [246] **modular** Simulated evol. of • networks
- [236] **Molecular** computation for GAs
- [226] **moral** Decomposing Bayesian networks: triangulation of the • graph with GAs
- [106] **MOSES** A multiobjective opt. tool for eng. design
- [158] **motion** Coordinated • planning of manipulators by ES
- [230] – Using GAs with variable-length individuals for planning two-manipulators •
- [207] **multicomponent** GA-based wavelength sel. in • spectrometric determinations by PLS: Appl. on indomethacin and acemethacin mixture
- [117] **multi-criteria** A general methodology for distribution planning under uncertainty, including GAs and fuzzy models in a • environment
- [159] **Multilevel** logic synthesis using alg. based on nat. processes
- [107] **multiobjective** A comprehensive survey of evol. - based • opt. techniques
- [57] – A GA for constrained and • opt.
- [146] – A GA for the • solid transportation problem: a fuzzy appr.
- [143] – A GA for the • solid transportation problem: a fuzzy appr.
- [80] – An appr. to • opt. using GAs
- [87] – An Empirical Study of Evol. Techniques for • Opt. in Eng. Design
- [166] – An evol. prog. for the • solid transportation problem with fuzzy goals
- [102] – An Updated Survey of GA-based • Opt. Techniques
- [153] **multi-objective** Fuzzy • solid transportation problem via evolutive prog.
- [106] **multiobjective** MOSES: A • opt. tool for eng. design
- [105] – Two new GA-based methods for • opt.
- [85] – Use of GAs for • opt. of counterweight balancing of robot arms
- [141] **multiprocesadores** Alg. os genéticos paralelos para problemas combinatorios sobre sistemas • de memoria distribuida
- [113] **multistage** GAs in opt. • distribution network planning
- [43] **mutate** The concepts of fuzzy sets and GAs: contrasts and similarities of expectations and development patterns (or would you rather • or go fuzzy?)
- [101] **Na** Evolving few-ion clusters of • and Cl
- [232] **natural** Evaluation of • computation techniques in the modeling and opt. of a sequential injection flow syst. for colorimetric iron(III) determination
- [159] – Multilevel logic synthesis using alg. based on • processes
- [14] **Navigation** Terrain-Aided • Using the Viterbi Alg.
- [27] **NC** Fuzzy cntr. and GAs in • machine tool
- [237] **network** Distribution • opt. : Finding the most economic solution by using GA
- [113] – GAs in opt. multistage distribution • planning
- [120] – Opt. distribution • expansion planning under uncertainty by evol. decision convergence
- [169] – Opt. of power distribution • design by appl. of GAs
- [129] **networked** Par. GAs in a • workstation environment
- [225] **networks** Boolean • decomposition using GAs
- [66] – Designing max-min propagation neural • by hyperplane switching
- [173] – Gen. prog. : foundations and appl. on the opt. of neural •
- [246] – Simulated evol. of modular •
- [29] – Sistema gen. o hierarquico para escolha topologica de redes neurais Booleanas [A hierarchical genetic syst. for selecting topology of Boolean neural •]
- [171] – Two spacecraft attitude determination using neural • and image processing
- [29] – Sistema gen. o hierarquico para escolha topologica de redes neurais Booleanas [A hierarchical genetic syst. for selecting topology of Boolean NNs]
- [66] **neural** Designing max-min propagation • networks by hyperplane switching
- [173] – Gen. prog. : foundations and appl. on the opt. of • networks
- [29] – Sistema gen. o hierarquico para escolha topologica de redes neurais Booleanas [A hierarchical genetic syst. for selecting topology of Boolean • networks]
- [171] – Two spacecraft attitude determination using • networks and image processing
- [223] **neural network** A GA-optimized • for classification of biological particles from electron-microscopy images
- [121] – An evol. artificial • time series forecasting syst.
- [55] – Cryptanalysis of speech signals ciphered by TSP using annealed Hopfield • and GAs
- [60] – Evol. design of MLP • architectures
- [252] – Gen. synthesis of discrete-time recurrent •
- [134] – GENIAL: an evol. recurrent • designer and trainer
- [250] – Opt. of a competitive learning • by GAs
- [242] **neural networks** Aplicación de los alg. os genéticos para el diseño de redes neuronales [Appl. of GAs for the design of •]
- [213] – Electric load forecasting with gen. •
- [140] – Evol. generation and training of recurrent artificial •
- [65] – Evolutive fuzzy •
- [210] – Facial image recognition using • and GAs
- [13] – GA for identifying selfgenerating radial basis •
- [268] – GA like learning rule for •
- [35] – GAs in the opt. choice of • for signal processing
- [187] – Hybrid syst. : • and GAs appl. in nonlinear regression and time series forecasting
- [263] – Recognition alg. using evol. learning on the random •
- [39] **neural-network** Cryptanalysis of speech signals ciphered by TSP using annealed hopfield • and GAs
- [19] – Impl. of • and GAs for novelty filters for fault-detection
- [212] **neuro-evolutionary** A • unbiased global illumination alg.
- [18] **neurofuzzy** Messy GA-based new learning-method for structurally optimized • cntr.

- [242] **neuronales** Aplicación de los alg. os genéticos para el diseño de redes • [Appl. of GAs for the design of neural networks]
- [20] **noisy** Appl. of par. GA and property of multiple global optima to VQ codevector index assignment for • channels
- [187] **nonlinear** Hybrid syst. : neural networks and GAs appl. in • regression and time series forecasting
- [96] **non-prismatic** A GA for the opt. design of axially loaded • columns
- [218] **non-stationary** Experimental results of a Michigan-like evol. strategy for • clustering
- [33] **Non-supervised** sensory-motor agents learning
- [19] **novelty** Impl. of neural-network and GAs for • filters for fault-detection
- [254] **no-wait** A hybrid GA appr. for the • flowshop sch. problem
- [170] **number** A GA for reducing the • of states in incompletely specified finite state machines
- [10] **object** GAs and deformable geometric models for anatomical • recognition
- [108] **objectives** Treating constraints as • for single-objective evol. opt.
- [112] **object-oriented** GAs, classifiers and par. – An • appr.
- [224] **Obtaining** fuzzy solutions to the fuzzy solid transportation problem with GAs
- [67] **open** Economically adapted transmission-syst. in • access schemes - Appl. of GAs
- [37] **operation** Appl. of stochastic opt. to power syst. planning and •
- [177] **operators** Applicability of the fuzzy • in the design of fuzzy logic cntr.
- [203] – Dynamic and heuristic fuzzy connectives based crossover • for cntr. the diversity and convergence of real-coded GAs
- [178, 239] – Tackling real-coded GAs: • and tools for behavioural analysis
- [96] **optimal** A GA for the • design of axially loaded non-prismatic columns
- [83] – An appr. to • design of reinforced concrete beams using GAs
- [124] – An • aircraft conflict resolution syst. based on hybrid models
- [188] – Finding the • policy for a large-scale syst. using gen. prog.
- [139] – GAs appl. to the • power distribution syst. design
- [35] – GAs in the • choice of neural networks for signal processing
- [113] – GAs in • multistage distribution network planning
- [219] • cntr. of an inverted pendulum by gen. prog. : practical aspects
- [81, 99] • design of reinforced concrete beams using GAs
- [120] • distribution network expansion planning under uncertainty by evol. decision convergence
- [56] • energy restoration in distribution syst. using gen. alg.
- [78] – Use of GAs for the • design of reinforced concrete beams
- [26] **optimisation** Design • using the BEM coupled with GA
- [197] **optimising** Appl. of GAs and simulated annealing technique in • the aperture distributions of antenna array patterns
- [133] **optimización** Diseño y evaluación de técnicas mixtas basadas en algoritmos genéticos y de branch-and-bound para la resolución de problemas de • combinatoria
- [241] – Los alg. os genéticos como heurístico en problemas de •
- [75] – Uso de Algoritmos Genéticos para la • de Columnas no Prismáticas Sometidas a Carga Axial
- [107] **optimization** A comprehensive survey of evol. -based multiobjective • techniques
- [57] – A GA for constrained and multiobjective •
- [80] – An appr. to multiobjective • using GAs
- [87] – An Empirical Study of Evol. Techniques for Multiobjective • in Eng. Design
- [102] – An Updated Survey of GA-based Multiobjective • Techniques
- [144] – Applying GAs in fuzzy • problems
- [79] – Design of astronomical telescopes of two mirrors using GA in the stage of •
- [74] – Discrete • of trusses using GAs
- [237] – Distribution network • Finding the most economic solution by using GA
- [232] – Evaluation of nat. computation techniques in the modeling and • of a sequential injection flow syst. for colorimetric iron(III) determination
- [214] – Finite state machine • using GAs
- [48] – GA coupled with a deterministic method for • in electromagnetics
- [251] – GAs: a strategy for search and •
- [193] – Gen. Mastermind, a case of dynamic constraint •
- [173] – Gen. prog. : foundations and appl. on the • of NNs
- [253] – Inductive learning appl. to fossil power plants cntr. •
- [93] – Lens design using GA in the stage of •
- [106] – MOSES: A multiobjective • tool for eng. design
- [250] • of a competitive learning neural network by GAs
- [264] • of finite element bidimensional models: an appr. based on GAs
- [28] • of insulators using a GA
- [169] • of power distribution network design by appl. of GAs
- [267] • of structural and finite element models via GAs
- [73] • of Truss Designs using GAs
- [92] – Parametric • of an equation of state by GAs
- [49] – Placement • using behavior based software agents and the GA
- [44] – Placement • using behavior-based software agents and the GA
- [182] – Solving *MasterMind* using GAs and simulated annealing: a case of dynamic constraint •
- [258] – Structural • alg. based on gen. simulation
- [130] – The influence of learning in the • of Royal road functions
- [108] – Treating constraints as objectives for single-objective evol. •
- [105] – Two new GA-based methods for multiobjective •
- [109] – Use of a self-adaptive penalty appr. for eng. • problems
- [85] – Use of GAs for multiobjective • of counterweight balancing of robot arms
- [259] **optimize** GAs as an appr. to • real-world trusses
- [70] – Use of GAs to • the cost of automotive wire harness
- [163] **optimized** A wall following robot with a fuzzy logic cntr. • by a GA
- [194] – DISTOS: Efficient petrol delivery syst. using • truck routing
- [18] – Messy GA-based new learning-method for structurally • neurofuzzy cntr.
- [181] **optimizing** Appl. of GAs and simulated annealing technique in • the aperture distributions of antenna arrays
- [84] **Optimo** Diseño • de Vigas de Concreto Reforzado mediante Algoritmos Genéticos
- [71] – Uso de Algoritmos Genéticos para el Diseño • de Armaduras
- [191] **ordering** Learning Bayesian network structures by searching for best • with GA
- [46] **oscillations** A gen. -based cntr. design for damping power syst. inter-area •
- [141] **para** Alg. os genéticos paralelos • problemas combinatorios sobre sistemas multiprocesadores de memoria distribuida
- [242] – Aplicación de los alg. os genéticos • el diseño de redes neuronales [Appl. of GAs for the design of neural networks]
- [133] – Diseño y evaluación de técnicas mixtas basadas en algoritmos genéticos y de branch-and-bound • la resolución de problemas de optimización combinatoria
- [29] – Sistema gen. o hierarquico • escolha topologica de redes neurais Booleanas [A hierarchical genetic syst. for selecting topology of Boolean NNs]
- [31] – Um algoritmo paralelo distribuído • o travelling purchaser problem [A par. distr. alg. for the traveling salesman problem]
- [71] – Uso de Algoritmos Genéticos • el Diseño Optimo de Armaduras

- [144] **problems** Applying GAs in fuzzy opt. •
- [109] — Use of a self-adaptive penalty appr. for eng. opt. •
- [233] — Using info measures for determining the relevance of the predictive variables in learning •
- [204] **process** A hybrid GA-ES • for learning fuzzy logic cntr. knowledge bases
- [176] — A learning • for fuzzy cntr. rules using GAs
- [229] — A three-stage evol. • for learning descriptive and approximate fuzzy-logic-cntr. knowledge bases from examples
- [159] **processes** Multilevel logic synthesis using alg. based on nat. •
- [244] **processing** Gen. • of the sensorial info
- [41] **production** Adaptive hierarchical censored • rule-based syst. : a GA appr.
- [148] **production system** GA/TS: a hybrid appr. for job shop sch. in a •
- [77] **Programación** El Algoritmo Genético como Alternativa a la • Dinámica
- [188] **programming** Finding the opt. policy for a large-scale syst. using gen. •
- [153] — Fuzzy multi-objective solid transportation problem via evolutive •
- [173] — Gen. • foundations and appl. on the opt. of NNs
- [45] **project** An evol. alg. for resource-constrained • sch. and multiple execution modes
- [17] **promising** Gen.-neuro-fuzzy syst. : a • fusion
- [66] **propagation** Designing max-min • NNs by hyperplane switching
- [20] **property** Appl. of par. GA and • of multiple global optima to VQ codevector index assignment for noisy channels

- [238] **proteins** Low-resolution structures of • in solution retrieved from X-ray scattering with a GA
- [196] **Protocol** GAs for • Validation
- [38] **prototyping** Novel intelligent environment dedicated to ANN fast •
- [31] **purchaser** Um algoritmo paralelo distribuido para o travelling • problem [A par. distr. alg. for the traveling salesman problem]
- [162] **PVM** A comparative study of two distr. syst. : • and transputers
- [145] — GAs on lan-message passing architectures using • Appl. to the routing problem
- [50] **qualitative** A fuzzy expert-syst. for • chemical-analyses of minerals
- [86] **quantitative** Parameter determination for • pixel analysis using GAs
- [149] **query** A GA for load balancing in par. • evaluation for deductive relational databases
- [13] **radial basis** GA for identifying selfgenerating • neural networks
- [263] **random** Recognition alg. using evol. learning on the • neural networks
- [43] **rather** The concepts of fuzzy sets and GAs: contrasts and similarities of expectations and development patterns (or would you • mutate or go fuzzy?)
- [58] **real** A hybrid appr. to solve • make-to-order job shop sch. problems
- [174] **real-coded** Dynamic and heuristic crossover operators for cntr. the diversity and convergence of • GAs
- [203] — Dynamic and heuristic fuzzy connectives based crossover operators for cntr. the diversity and convergence of • GAs
- [189] — Heuristic crossovers for • GAs based on fuzzy connectives
- [178] — Tackling • GAs: operators and tools for behavioural analysis
- [239] — Tackling • GAs: Operators and tools for behavioural analysis
- [175] — The use of fuzzy connectives to design • GAs
- [259] **real-world** GAs as an appr. to optimize • trusses
- [248] **reasoning** A learning method of fuzzy • by GAs
- [168] — Fuzzy and probabilistic • in simple learning CSs
- [210] **recognition** Facial image • using neural networks and GAs
- [10] — GAs and deformable geometric models for anatomical object •
- [263] • alg. using evol. learning on the random neural networks
- [140] **recurrent** Evol. generation and training of • artificial neural networks
- [252] — Gen. synthesis of discrete-time • neural network
- [134] — GENIAL: an evol. • neural network designer and trainer
- [242] **redes** Aplicación de los alg. os genéticos para el diseño de • neuronales [Appl. of GAs for the design of neural networks]
- [29] — Sistema gen. o hierarquico para escolha topologica de • neurais Booleanas [A hierarchical genetic syst. for selecting topology of Boolean NNs]
- [30] — Um estudo de paralelismo em • backpropagation
- [170] **reducing** A GA for • the number of states in incompletely specified finite state machines
- [84] **Reforzado** Diseño Optimo de Vigas de Concreto • mediante Algoritmos Genéticos
- [187] **regression** Hybrid syst. : neural networks and GAs appl. in nonlinear • and time series forecasting
- [116] **regret** Dynamic planning of distribution networks for minimum • strategies
- [94] **reinforced** A simple GA for the design of • concrete beams
- [83] — An appr. to opt. design of • concrete beams using GAs
- [81, 99] — Opt. design of • concrete beams using GAs
- [78] — Use of GAs for the opt. design of • concrete beams
- [149] **relational** A GA for load balancing in par. query evaluation for deductive • databases
- [233] **relevance** Using info measures for determining the • of the predictive variables in learning problems
- [142] **remeshing** Mesh generation and adaptive • by GAs on transonic flow simulation
- [119] **representations** Comparison of two • for the simple and the enhanced job-shop Sch. problem
- [133] **resolución** Diseño y evaluación de técnicas mixtas basadas en algoritmos genéticos y de branch-and-bound para la • de problemas de optimización combinatoria
- [124] **resolution** An opt. aircraft conflict • syst. based on hybrid models
- [151] — Hybridizing GAs with branch and bound techniques for the • of the TSP
- [45] **resource-constrained** An evol. alg. for • project sch. and multiple execution modes
- [56] **restoration** Opt. energy • in distribution syst. using gen. alg.
- [228] **retrieval** An appr. to an adaptive info • agent using GAs with fuzzy set genes
- [238] **retrieved** Low-resolution structures of proteins in solution • from X-ray scattering with a GA
- [164] **review** A classified • on the combination fuzzy logic — GAs bibliography
- [163] **robot** A wall following • with a fuzzy logic cntr. optimized by a GA
- [69] — Parameter determination for a GA appl. to • cntr.
- [85] **robot arms** Use of GAs for multiobjective opt. of counterweight balancing of •
- [137] **robots** Estudio de la coordinación inteligente en • bípedos: aplicación de lógica borrosa y algoritmos genéticos
- [183, 216] **routing** A • strategy based on GAs
- [194] — DISTOS: Efficient petrol delivery syst. using optimized truck •
- [138] — The • problem in traffic cntr. using GAs
- [145] **routing problem** GAs on lan-message passing architectures using PVM: Appl. to the •
- [130] **Royal road functions** The influence of learning in the opt. of •
- [132] **RPLC** Modelling chromatographic behaviour as a function of pH and solvent composition in •
- [268] **rule** GA like learning • for neural networks
- [98] • learning in fuzzy syst. using evol. prog.
- [89] • learning in fuzzy syst. using evol. prog.
- [235] **rule-based** Evol. design of TSK fuzzy • syst. using
- [41] **rule-based system** Adaptive hierarchical censored production • a GA appr.
- [176] **rules** A learning process for fuzzy cntr. • using GAs
- [180] — Design of a cntr. • base based on GAs
- [206] — Generating and selecting fuzzy cntr. • using evol. strategies and GAs
- [217] — Generating and tuning fuzzy • using hybrid syst.
- [179] — Generating fuzzy • from examples using GAs
- [215] — Learning • from the experience of an expert syst. using GAs
- [36] **satellite** An experience in • Doppler positioning using an evol. appr.
- [238] **scattering** Low-resolution structures of proteins in solution retrieved from X-ray • with a GA
- [254] **scheduling** A hybrid GA appr. for the 'no-wait' flowshop • problem
- [45] — An evol. alg. for resource-constrained project • and multiple execution modes
- [119] — Comparison of two Rep. for the simple and the enhanced job-shop • problem
- [16] — High-level synthesis • and allocation using GAs
- [262] **Schelkunoffs method** Synthesis of linear-array using • and GAs
- [67] **schemes** Economically adapted transmission-syst. in open access • - Appl. of GAs
- [11] **scientific** Applying GAs in • discovery: a case study
- [63] **search** Alg. for multiple minima •
- [251] — GAs: a strategy for • and opt.
- [156] — Topology-based gen. • for the Stahel-Donoho estimator
- [191] **searching** Learning Bayesian network structures by • for best ordering with GA
- [118] **security** Derivation of classification structures for fast evaluation of dynamic • assessment in power syst. using GAs
- [206] **selecting** Generating and • fuzzy cntr. rules using evol. strategies and GAs
- [29] — Sistema gen. o hierarquico para escolha topologica de redes neurais Booleanas [A hierarchical genetic syst. for • topology of Boolean NNs]
- [59] **selection** GA for weight • in H cntr. design
- [207] — GA-based wavelength • in multicomponent spectrometric determinations by PLS: Appl. on indomethacin and acemethacin mixture

- [109] **self-adaptive** Use of a • penalty appr. for eng. opt. problems
- [13] **selfgenerating** GA for identifying • radial basis neural networks
- [244] **sensorial** Gen. processing of the • info
- [33] **sensory-motor** Non-supervised • agents learning
- [190] **sequence** GA for DNA/RNA • comparison
- [232] **sequential** Evaluation of nat. computation techniques in the modeling and opt. of a • injection flow syst. for colorimetric iron(III) determination
- [231] **sets** Gen. fuzzy clustering for the definition of fuzzy •
- [257] **signal analysis** Electrocardiographic • using GAs (GAs)
- [35] **signal processing** GAs in the opt. choice of neural networks for •
- [55] **signals** Cryptanalysis of speech • ciphered by TSP using annealed Hopfield neural network and GAs
- [39] – Cryptanalysis of speech • ciphered by TSP using annealed hopfield neural-network and GAs
- [43] **similarities** The concepts of fuzzy sets and GAs: contrasts and • of expectations and development patterns (or would you rather mutate or go fuzzy?)
- [62] **simulate** An evol. appr. to • cognitive feedback learning in medical domain
- [246] **Simulated** evol. of modular networks
- [197] **simulated annealing** Appl. of GAs and • technique in optimising the aperture distributions of antenna array patterns
- [181] – Appl. of GAs and • technique in opt. the aperture distributions of antenna arrays
- [182] – Solving *MasterMind* using GAs and • a case of dynamic constraint opt.
- [54] **simulation** A new appr. for GA as a support to the • of complex syst.
- [142] – Mesh generation and adaptive remeshing by GAs on transonic flow •
- [25] • of exaptive behaviour
- [258] – Structural opt. alg. based on gen. •
- [108] **single-objective** Treating constraints as objectives for • evol. opt.
- [29] **Sistema** gen. o hierarquico para escolha topologica de redes neurais Booleanas [A hierarchical genetic syst. for selecting topology of Boolean NNs]
- [141] **sistemas** Alg. os genéticos paralelos para problemas combinatorios sobre • multiprocesadores de memoria distribuida
- [161] **skills** GAs: A stochastic improvement technique. Tools, • pitfalls and examples
- [141] **sobre** Alg. os genéticos paralelos para problemas combinatorios • sistemas multiprocesadores de memoria distribuida
- [15] **Software** test data generation using the chaining appr.
- [49] – Placement opt. using behavior based • agents and the GA
- [44] – Placement opt. using behavior-based • agents and the GA
- [146] **solid** A GA for the multiobjective • transportation problem: a fuzzy appr.
- [143] – A GA for the multiobjective • transportation problem: a fuzzy appr.
- [166] – An evol. prog. for the multiobjective • transportation problem with fuzzy goals
- [153] – Fuzzy multi-objective • transportation problem via evolutive prog.
- [224] – Obtaining fuzzy solutions to the fuzzy • transportation problem with GAs
- [47] **solution** A GA • to the maximum likelihood statistical problem
- [237] – Distribution network opt. : Finding the most economic • by using GA
- [238] – Low-resolution structures of proteins in • retrieved from X-ray scattering with a GA
- [32] **solutions** Intelligent • for cybernetics vehicle cntr.
- [224] – Obtaining fuzzy • to the fuzzy solid transportation problem with GAs
- [132] **solvent** Modelling chromatographic behaviour as a function of pH and • composition in RPLC
- [182] **Solving** *MasterMind* using GAs and simulated annealing: a case of dynamic constraint opt.
- [75] **Sometidas** Uso de Algoritmos Genéticos para la Optimización de Columnas no Prismáticas • a Carga Axial
- [157] **space** GAs for fuzzy cntr. of automatic docking with a • station
- [171] **spacecraft** Two • attitude determination using NNs and image processing
- [170] **specified** A GA for reducing the number of states in incompletely • finite state machines
- [72] **spectral estimator** Impl. of a parametric • using GAs
- [207] **spectrometric** GA-based wavelength sel. in multicomponent • determinations by PLS: Appl. on indomethacin and acemethacin mixture
- [55] **speech** Cryptanalysis of • signals ciphered by TSP using annealed Hopfield neural network and GAs
- [39] – Cryptanalysis of • signals ciphered by TSP using annealed hopfield neural-network and GAs
- [12] **Stabilization** of inverted pendulum by the GA
- [79] **stage** Design of astronomical telescopes of two mirrors using GA in the • of opt.
- [93] – Lens design using GA in the • of opt.
- [156] **Stahel-Donoho estimator** Topology-based gen. search for the •
- [170] **state** A GA for reducing the number of states in incompletely specified finite • machines
- [170] **states** A GA for reducing the number of • in incompletely specified finite state machines
- [157] **station** GAs for fuzzy cntr. of automatic docking with a space •
- [47] **statistical** A GA solution to the maximum likelihood • problem
- [161] **stochastic** GAs: A • improvement technique. Tools, skills, pitfalls and examples
- [37] **stochastic optimization** Appl. of • to power syst. planning and operation
- [158] **strategies** Coordinated motion planning of manipulators by evol. •
- [116] – Dynamic planning of distribution networks for minimum regret •
- [204] **strategy** A hybrid GA-evol. • process for learning fuzzy logic cntr. knowledge bases
- [183, 216] – A routing • based on GAs
- [251] – GAs: a • for search and opt.
- [42] **structural** Appl. of a GA for calibration and • modification of tank model
- [258] • opt. alg. based on gen. simulation
- [267] – Opt. of • and finite element models via GAs
- [18] **structurally** Messy GA-based new learning-method for • optimized neurofuzzy cntr.
- [200] **Structure** learning of Bayesian networks by GAs: a perf. analysis of cntr. parameters
- [118] **structures** Derivation of classification • for fast evaluation of dynamic security assessment in power syst. using GAs
- [191] – Learning Bayesian network • by searching for best ordering with GA
- [238] – Low-resolution • of proteins in solution retrieved from X-ray scattering with a GA
- [54] **support** A new appr. for GA as a • to the simulation of complex syst.
- [107] **survey** A comprehensive • of evol. -based multiobjective opt. techniques
- [102] – An Updated • of GA-based Multiobjective Opt. Techniques
- [66] **switching** Designing max-min propagation NNs by hyperplane •
- [260] **synthesis** Application of GAs for the • of linear antenna arrays
- [252] – Gen. • of discrete-time recurrent neural network
- [16] – High-level • sch. and allocation using GAs
- [159] – Multilevel logic • using alg. based on nat. processes
- [256] • of antenna arrays using GAs
- [262] • of linear-array using Schelkunoffs method and GAs
- [255] • of multiple beam linear antenna arrays using GAs
- [152] **Tackling** fuzzy GA
- [178] • real-coded GAs: operators and tools for behavioural analysis
- [239] • real-coded GAs: Operators and tools for behavioural analysis

Notations

†(ref) = the bibliography item does not belong to my collection of genetic papers.
 (ref) = citation source code. ACM = ACM Guide to Computing Literature, EEA = Electrical & Electronics Abstracts, BA = Biological Abstracts, CCA = Computers & Control Abstracts, CTI = Current Technology Index, EI = The Engineering Index (A = Annual, M = Monthly), DAI = Dissertation Abstracts International, P = Index to Scientific & Technical Proceedings, BackBib = Thomas Bäck's unpublished bibliography, Fogel/Bib = David Fogel's EA bibliography, etc
 * = only abstract seen.
 ? = data of this field is missing (BiBTeX-format).

The last field in each reference item in Teletype font is the BiBTeXkey of the corresponding reference.

Appendix A

Abbreviations

The following other abbreviations were used to compress the titles of articles in the permutation title index:

AI	= Artificial Intelligence	Int.	= International
Alg.	= Algorithm(s)	ImPr	= Image Processing
AL	= Artificial Life	JSS	= Job Shop Scheduling
ANN(s)	= Artificial Neural Net(work)(s)	ML	= Machine Learning
Appl.	= Application(s), Applied	Nat.	= Natural
Appr.	= Approach(es)	NN(s)	= Neural Net(work)(s)
Cntr.	= Control, Controlled, = Controlling, Controller(s)	Opt.	= Optimization, Optimal, = Optimizer(s), Optimierung
Coll.	= Colloquium	OR	= Operation(s) Research
Comb.	= Combinatorial	Par.	= Parallel, Parallelism
Conf.	= Conference	Perf.	= Performance
CS(s)	= Classifier System(s)	Pop.	= Population(s), Populational(ly)
Distr.	= Distributed	Proc.	= Proceedings
Eng.	= Engineering	Prog.	= Programming, Program(s), Programmed
EP	= Evolutionary Programming	Prob.	= Problem(s)
ES	= Evolutionsstrategie(n), = Evolution(ary) strategies	QAP	= Quadratic Assignment Problem
Evol.	= Evolution, Evolutionary	Rep.	= Representation(s), Representational(ly)
ExS(s)	= Expert System(s)	SA	= Simulated Annealing
FF(s)	= Fitness Function(s)	Sch.	= Scheduling, Schedule(s)
GA(s)	= Genetic Algorithm(s)	Sel.	= Selection, Selectionism
Gen.	= Genetic(s), Genetical(ly)	Symp.	= Symposium
GP	= Genetic Programming	Syst.	= System(s)
Ident.	= Identification	Tech.	= Technical, Technology
Impl.	= Implementation(s)	TSP	= Travel(l)ing Salesman Problem

Appendix B

Bibliography entry formats

footnotesize This documentation was prepared with L^AT_EX and reproduced from camera-ready copy supplied by the editor. The ones who are familiar with BIBTEX may have noticed that the references are printed using abbrv bibliography style and have no difficulties in interpreting the entries. For those not so familiar with BIBTEX are given the following formats of the most common entry types. The optional fields are enclosed by "[]" in the format description. Unknown fields are shown by "?". † after the entry means that neither the article nor the abstract of the article was available for reviewing and so the reference entry and/or its indexing may be more or less incomplete.

Book: Author(s), *Title*, Publisher, Publisher's address, year.

Example

John H. Holland. *Adaptation in Natural and Artificial Systems*. The University of Michigan Press, Ann Arbor, 1975.

Journal article: Author(s), Title, *Journal*, volume(number): first page – last page, [month,] year.

Example

David E. Goldberg. Computer-aided gas pipeline operation using genetic algorithms and rule learning. Part I: Genetic algorithms in pipeline optimization. *Engineering with Computers*, 3(?):35–45, 1987. †.

Note: the number of the journal unknown, the article has not been seen.

Proceedings article: Author(s), Title, editor(s) of the proceedings, *Title of Proceedings*, [volume,] pages, location of the conference, date of the conference, publisher of the proceedings, publisher's address.

Example

John R. Koza. Hierarchical genetic algorithms operating on populations of computer programs. In N. S. Sridharan, editor, *Eleventh International Joint Conference on Artificial Intelligence (IJCAI-89)*, pages 768–774, Detroit, MI, 20.-25. August 1989. Morgan Kaufmann, Palo Alto, CA. †.

Technical report: Author(s), Title, type and number, institute, year.

Example

Thomas Bäck, Frank Hoffmeister, and Hans-Paul Schwefel. Applications of evolutionary algorithms. Technical Report SYS-2/92, University of Dortmund, Department of Computer Science, 1992.
