

World Scientific and **Imperial College Press** are proud to welcome you to our new 2005 catalogue featuring all our journals, including new and forthcoming ones. All our journals go through a stringent review process to make sure that the articles are world-class and serve their respective audiences.

In line with our mission of developing the highest quality knowledge-based products and services for the academic, scientific, professional, research and student communities worldwide, our rapidly expanding journal programme has grown to include more than 90 international peer reviewed journals. The programme has kept pace with the latest developments in scientific research, providing prompt responses to the demand for publication outlets and readership in rapidly advancing fields like nanoscience and the quantum computing.

WorldSciNet.com, our journal site, has been developed to further enhance our services. It provides an array of services which includes free table of contents, email alerts on new issues of our journals, the latest news related to our journals, online sample articles, forthcoming papers, search functions and related links, to name few.

*Due to a rise in the submission of high quality papers, the following journals will **expand** in 2005:*

- Fractals (Fractals)
- International Journal of Modern Physics C (IJMPC)
- International Journal of Modern Physics D (IJMPD)
- International Journal of Modern Physics E (IJMPE)
- International Journal of Reliability, Quality and Safety Engineering (IJRQSE)
- Journal of Algebra and Its Applications (JAA)
- Journal of Bioinformatics and Computational Biology (JBCB)

*Below is an exciting list of our **new** journals:*

- Asia-Pacific Journal of Operational Research (APJOR)
- International Journal of Computational Methods (IJCM)
- International Journal of Geometric Methods in Modern Physics (IJGMMP)
- International Journal of Humanoid Robotics (IJHR)
- International Journal of Information Acquisition (IJIA)
- International Journal of Innovation and Technology Management (IJITM)
- Journal of Derivatives Accounting (JDA)
- Journal of Hyperbolic Differential Equations (JHDE)
- Journal of Restructuring Finance (JRF)

*The following is a list of our **forthcoming** journals:*

- Division of Labor & Transaction Costs (DLTC)
- New Mathematics and Natural Computation (NMNC)

We are offering flexible journal packages which are tailored to suit the needs of each library and institution. To further service to our readers, we have almost completed the digitalisation of all our back issues. Please contact our marketing department at mkt@wspc.com for more information and to provide us with your feedback.

We look forward to hearing from you.

Best wishes,

World Scientific and Imperial College Press

JOURNAL OF THEORETICAL AND COMPUTATIONAL CHEMISTRY (JTCC)

www.worldscinet.com/jtcc.html

AIMS AND SCOPE

The *Journal of Theoretical and Computational Chemistry* (JTCC) is an international interdisciplinary journal, aimed at providing comprehensive coverage on the latest development of research in the ever-expanding area of theoretical and computational chemistry and their applications to broad scientific fields spanning physics, chemistry, biology, materials, and so on.

With the proliferation of sub-fields in the application of theoretical chemistry and the explosion of applications in various scientific fields, it is difficult these days for us to keep up with all the new research developments in these cross-disciplinary fields. We hope this journal will serve as a major single source of information on the latest research that can be broadly defined to be in the general area of theoretical and computational chemistry.

The journal publishes original contributions on broad aspects: from both the development of fundamental theoretical methodology and computational algorithm to extensive numerical applications to specific scientific problems ranging from gas-phase to condensed phase, and to biological systems. It covers general research areas broadly defined as quantum chemistry, chemical dynamics, statistical mechanics, and chemical biology.

INDEXING/ABSTRACTING

- Science Citation Index Expanded® • ISI Alerting Services • Chemistry Citation Index
- Current Contents®/Physical, Chemical and Earth Sciences

SELECTED PAPERS

- Recent Advances in Electronic Structure Theory (*Takahito Nakajima et al.*)
- Reaction Rates: Accurate Quantum Dynamical Calculations for Polyatomic Systems (*Uwe Manthe*)
- Chemical Reaction Dynamics with Real Wave Packets (*Stephen K Gray*)
- First Principles Molecular Dynamics Involving Excited States and Nonadiabatic Transitions (*Nikos L Doltsinis & Dominik Marx*)
- Electron Transfer Reactions Coupled to Proton Translocation: Cytochrome Oxidase, Proton Pumps, and Biological Energy Transduction (*Alexei A Stuchebrukhov*)
- Quantum Transport and Current-Triggered Dynamics in Molecular Tunnel Junctions (*Tamar Seideman & Hong Guo*)
- Algebraic Equation and Iterative Optimization for the Optimized Effective Potential in Density Functional Theory (*Qin Wu & Weitao Yang*)
- Time Dependent Density Functional Methods and their Application to Chemical Physics (*Akira Yoshimori*)
- Geometric Direct Minimization of Hartree-Fock Calculations Involving Open Shell Wavefunctions With Spin Restricted Orbitals (*Barry D Dunietz, Troy Van Voorhis & Martin Head-Gordon*)
- A Theoretical Comparison of Conformational Features of Calix[4]aromatics (*Di-Fei Wang & Yun-Dong Wu*)

INTERNATIONAL JOURNAL OF HUMANOID ROBOTICS (IJHR)

www.worldscinet.com/ijhr.html

AIMS AND SCOPE

In recent years, we have witnessed a rapid growth in not only the theory, but also the development and application of advanced robots, such as the humanoid robot. Traditionally, "Robotics R&D" focused first on mechanics, modeling, planning, and control. Today, however, it is necessary to study both the artificial body and artificial mind at the same time. Thus, the humanoid robot seems an adroit platform to investigate mind-body interaction, or psychosomatic engineering, which also includes artificial psychology, and the science of learning.

SELECTED PAPERS

- Sensing and Manipulating Built-for-Human Environments (*R Brooks et al.*)
- Whole Body Dynamic Behavior and Control of Human-Like Robots (*O Khatib et al.*)
- Mutual Telexistence System using Retro-Reflective Projection Technology (*Susumu Tachi et al.*)
- Zero-Moment Point – Thirty-Five Years of its Life (*M Vukobratovic & B Borovac*)
- Primate Anatomy, Kinematics, and Principles for Humanoid Design (*R O Ambrose & C G Ambrose*)

PRICE INFORMATION (ISSN: 0219-8436 • Vol. 2/2005 • 4 Issues)	US\$	€	S\$

INTERNATIONAL JOURNAL OF INFORMATION ACQUISITION (IJIA)

www.worldscinet.com/ijia.html

AIMS AND SCOPE

The *International Journal of Information Acquisition* is a high quality journal that aims to promote interaction and the exchange of original investigations and inventions, research findings and results, academic philosophies and opinions in information acquisition science and technology. The journal seeks to advance the fundamental theories, key technologies, and the critical applications in information acquisition science and technology.

SELECTED PAPERS

- Geometric Topology for Information Acquisition by Means of Smart Sensor Web (*Harold Szu*)
- Self-Powered Wireless Temperature Sensing using MEMS-Based AA-Size Energy Transducer (*Johnny M H Lee*)
- Rational Radial Distortion Models of Camera Lenses with Analytical Undistortion Formulae (*Lili Ma*)
- Orthogonal Moments and their Application to Motion Detection in Image Sequences (*Jun Shen et al.*)
- Sensory Information Acquisition for Monitoring and Control of Intelligent Mechatronic Systems (*C W De Silva*)

NEW MATHEMATICS AND NATURAL COMPUTATION (NMNC)

www.worldscinet.com/nmnc.html

AIMS & SCOPE

With the growing maturity of linear and reductionist paradigms, the new frontier for problem-solving tools will be *new mathematics* and algorithms. It is clear that new tools are needed for solving more difficult social and biological problems. This type of mathematics will be capable of handling uncertainties, making decisions and modeling very large systems and networks which are complex, nonlinear and distributive.

This new journal provides a forum for sharing and exchanging ideas and research findings in three very focused areas:

- (1) *Fuzzy Mathematics*: One recent paradigmatic change in science and mathematics concerns the concept of uncertainty. *New Mathematics* provides mathematical methods to deal with uncertainty and fuzzy set theory and rough set theory provide examples of the *New Mathematics*.
- (2) *Computational Intelligence in Economics & Finance*: In recent years, computational intelligence (a consortium of fuzzy logic, artificial neural networks, genetic algorithm & evolutionary computing, etc.) has been found to be powerful in solving new problems in economics and finance. This is only one example of how the wide spectrum of the social sciences can benefit from new mathematics.
- (3) *Natural Computation*: Building on the success of current approaches to computational intelligence, and exploring new paradigms in natural computing will provide a rich set of models for attacking difficult problems beyond the power of current methodology. Such problems exist in many disciplines including economics & finance, bioinformatics and other fields containing complex systems.

INTERNATIONAL JOURNAL ON ARTIFICIAL INTELLIGENCE TOOLS (IJAIT)

www.worldscinet.com/ijait.html

AIMS AND SCOPE

The *International Journal on Artificial Intelligence Tools (IJAIT)* provides an interdisciplinary forum in which scientists and AI professionals can share their knowledge and report new advances on AI tools. It is a medium for promoting general and/or special purpose tools, which are very important for the evolution of science and manipulation of the old and new forms of knowledge. *IJAIT* can also be used as a test ground for new AI tools.

IJAIT will publish high-quality papers on the-state-of-the-art surveys and original research papers on a quarterly basis. It will also publish book reviews and brief updates on AI tools.

INTERNATIONAL JOURNAL OF COMPUTATIONAL GEOMETRY AND APPLICATIONS (IJCGA)

www.worldscinet.com/ijcga.html

AIMS AND SCOPE

This is a bimonthly journal devoted to the field of computational geometry within the framework of design and analysis of algorithms. Emphasis is placed on the computational aspects of geometric problems that arise in various fields of science and engineering including computer-aided geometry design (CAGD), computer graphics, constructive solid geometry (CSG), operations research, pattern recognition, robotics, solid modelling, VLSI routing/layout, and others. Research contributions ranging from theoretical results in algorithm design – sequential or parallel, probabilistic or randomized algorithms – to applications in the above-mentioned areas are welcome. Research findings or experiences in the implementations of geometric algorithms, such as numerical stability, and papers with a geometric flavour are also welcome.

INTERNATIONAL JOURNAL OF COMPUTATIONAL INTELLIGENCE AND APPLICATIONS (IJCIA)

www.worldscinet.com/ijcia.html

AIMS AND SCOPE

This is a refereed journal dedicated to the theory and applications of computational intelligence (artificial neural networks, fuzzy systems, evolutionary computation and hybrid systems). The main goal of this journal is to provide the scientific community and industry with a vehicle whereby ideas using two or more conventional and computational intelligence based techniques could be discussed.

The *IJCIA* welcomes original works in areas such as neural networks, fuzzy logic, evolutionary computation, pattern recognition, hybrid intelligent systems, symbolic machine learning, statistical models, image/audio/video compression and retrieval. The *IJCIA* greatly encourages new ideas, combining two or more areas, such as neuro-fuzzy, neuro-symbolic, neuro-evolutionary, neuro-symbolic, neuro-pattern recognition, fuzzy-evolutionary, evolutionary-symbolic, fuzzy-evolutionary, evolutionary-symbolic, fuzzy-symbolic, etc. to be submitted.

SELECTED PAPERS

- Industrial Production Planning using Interactive Fuzzy Linear Programming (*Pandian Vasant*)
- Features Extraction for Protein Homology Detection using Hidden Markov Models Combining Scores (*Nazar M Zaki, Safaai Deris & Rosli M Illias*)

INTERNATIONAL JOURNAL OF COOPERATIVE INFORMATION SYSTEMS (IJCIS)

www.worldscinet.com/ijcis.html

AIMS AND SCOPE

The *International Journal of Cooperative Information Systems (IJCIS)* addresses the intricacies of cooperative work in the framework of distributed interoperable information systems. It provides a forum for the presentation and dissemination of research covering all aspects of CIS design, requirements, functionality, implementation, deployment, and evolution.

INTERNATIONAL JOURNAL OF COMPUTER PROCESSING OF ORIENTAL LANGUAGES (IJCPOL)

www.worldscinet.com/ijcpol.html

AIMS AND SCOPE

This journal was founded in Summer 1983 under the name of *Computer Processing of Chinese and Oriental Languages*. It covers all aspects related to the computer processing of Oriental languages. Of special interest are web-based applications, e-commerce, multilingual distance learning and the use of XML in multilingual applications. *IJCPOL* will publish papers on topics that include: • natural language processing and machine translation • optical character recognition and document processing • speech recognition and synthesis • computer input and output of characters • typesetting and design of characters • coding and compression of data • man-computer communications • representation of knowledge and inference • software and design of Oriental language components • database management and systems • information storage and retrieval • multimedia system design • oriental languages WWW • oriental languages e-commerce • computer-based Oriental languages education • web-based tools for Oriental languages teaching as a second language.

INTERNATIONAL JOURNAL OF FOUNDATIONS OF COMPUTER SCIENCE (IJFCS)

www.worldscinet.com/ijfcs.html

AIMS AND SCOPE

This journal publishes articles which contribute new theoretical results in all areas of foundations of computer science. The theoretical and mathematical aspects covered include:

- Algebraic theory of computing and formal systems
- Analysis and design of algorithms
- Automata and formal languages
- Categories in computer science
- Combinatorics
- Complexity theory
- Computational Biology and DNA Computing
- Computer theorem proving
- Concurrency
- Constructive logic
- Cryptography
- Database theory
- Logic and semantics of program
- Logic in artificial intelligence
- Logic programming
- Models of computation
- Program verification and synthesis
- Proof and specification in computer science
- Quantum Computing
- Theories and models of Internet computing
- Theory of learning and inductive inference
- Theory of parallel and distributed computing
- Type theory

INTERNATIONAL JOURNAL OF HIGH SPEED COMPUTING (IJHSC)

www.worldscinet.com/ijhsc.html

AIMS AND SCOPE

This journal is directed at researchers, educators, and engineers in the field of parallel computations. Its goal is to foster the advance of the state-of-the-art in the field. The journal solicits original research papers and survey articles in areas that include:

- Algorithm–architecture interaction and impact on applications
- Programming environments and debugging tools
- Performance evaluation

INTERNATIONAL JOURNAL OF IMAGE AND GRAPHICS (IJIG)

www.worldscinet.com/ijig.html

AIMS AND SCOPE

International Journal of Image and Graphics (IJIG) will emphasize on efficient and effective image and graphics technologies and systems, and provide a central forum for scientists, researchers, engineers and vendors from different disciplines to exchange ideas, identify problems, investigate relevant issues, share common interests, explore new directions, and initiate possible collaborative research and system development. This journal will significantly benefit a large variety of academic and industrial sectors. More specifically, this journal will cover the following research and application issues:

- Image Processing • Image Analysis and Understanding • Pattern Recognition Application
- Computer Vision • Graphics Modeling, Rendering and Animation • Visualization, Virtual Reality and Augmented Reality • Multimedia Systems and Techniques • Graphics User Interface • Image and Graphics Applications.

INDEXING/ABSTRACTING

INTERNATIONAL JOURNAL OF NEURAL SYSTEMS (IJNS)

www.worldscinet.com/ijns.html

"...The range is broad, covering mathematical, biological and engineering interests. Duplication with the content of other journals is low and editorial filtering has kept the quality of the papers high."

Igor Aleksander, Nature

"... IJNS has perhaps the widest-ranging selection of articles [among the latest batch of journals in neural networks]. ... IJNS is commendably interdisciplinary."

Catherine Myers, The Times Higher Education Supplement

AIMS AND SCOPE

A bimonthly journal covering information processing in natural and artificial neural systems. The journal presents a fresh, undogmatic approach towards this multidisciplinary field, aiming to be a forum for novel ideas and improved understanding of collective and cooperative phenomena in systems with computational capabilities.

It publishes original contributions on all aspects of this broad subject involving physics, psychology, computer science and engineering. Contributions include research papers, articles, short communications and Letters to the Editors (papers under about 3,000 words which will be published within about six months of receipt). In addition, the journal carries reviews of books of interest to the neural nets/AI community.

INTERNATIONAL JOURNAL OF PATTERN RECOGNITION AND ARTIFICIAL INTELLIGENCE (IJPRAI)

www.worldscinet.com/ijprai.html

AIMS AND SCOPE

This journal publishes both applications and theory-oriented articles on new developments in the fields of pattern recognition and artificial intelligence, and is of interest to both researchers in industry and academia. From the beginning, there has always been a close relationship between the disciplines of pattern recognition and artificial intelligence. The recognition and understanding of sensory data like speech or images, which are major concerns in pattern recognition, have always been considered as important subfields of artificial intelligence. On the other hand, topics like knowledge representation, inference, search or learning that belong to the center of artificial intelligence, have constantly attracted the attention of researchers working in pattern recognition. *IJPRAI* is the first to cover both fields in one periodical, and particular emphasis is put on papers which are in the intersection of both fields. However, it is open to articles from "pure" pattern recognition and "pure" artificial intelligence as well.

INTERNATIONAL JOURNAL OF SOFTWARE ENGINEERING AND KNOWLEDGE ENGINEERING (IJSEKE)

www.worldscinet.com/ijseke.html

AIMS AND SCOPE

The *International Journal of Software Engineering and Knowledge Engineering* is intended to serve as a forum for researchers, practitioners, and developers to exchange ideas and results for the advancement of software engineering and knowledge engineering. Three types of papers will be published:

- Research papers reporting original research results
- Technology trend surveys reviewing an area of research in software engineering and knowledge engineering
- Survey articles surveying a broad area in software engineering and knowledge engineering

In addition, tool reviews (no more than three manuscript pages) and book reviews (no more than two manuscript pages) are also welcome.

INTERNATIONAL JOURNAL OF UNCERTAINTY, FUZZINESS AND KNOWLEDGE-BASED SYSTEMS (IJUFKS)

www.worldscinet.com/ijufks.html

AIMS AND SCOPE

The *International Journal of Uncertainty, Fuzziness and Knowledge-Based Systems (IJUFKS)* is a forum for research on various methodologies for the management of imprecise, vague, uncertain or incomplete information. The aim of the journal is to promote theoretical, methodological or practical works dealing with all kinds of methods to represent and manipulate imperfectly described pieces of knowledge. It is published bi-monthly, with worldwide distribution to researchers, engineers, decision-makers, and educators.

INTERNATIONAL JOURNAL ON WIRELESS AND OPTICAL COMMUNICATIONS (IJWOC)

www.worldscinet.com/ijwoc.html

AIMS AND SCOPE

International Journal on Wireless and Optical Communications is a high quality journal with the aim of publishing technical papers in the emerging and important fields of wireless and optical communications and networks. The journal seeks to address and capture highly innovative and state of the art research and work in Wireless and Optical communications.

The scope of this journal includes a wide range of technical challenges in view of the growing interest for wireless access to the Internet and the evolution of third generation cellular systems including ITU IMT/UMTS. Radio interface design, adaptive antennas and arrays and indoor propagation, measurements and predictions are also considered. A growing number of digital devices inside homes and the application of Ultra Wide Band, as well as Spectrum efficiency and low power consumption including low cost and secure wireless personal access, Ad Hoc and Sensor networks, Imbedded systems and miniaturization, space exploration are some of the areas to be considered in this journal.

SELECTED PAPERS

- A Simple RLC/MAC Protocol Architecture for a Wireless IP Network (*Jamil Y Khan*)
- Dynamic Routing of Bandwidth Guaranteed Connections in MPLS Networks (*Antonio Capone, Luigi Fratta & Fabio Martignon*)
- Suspended Center-Fed Slot-Loaded Plate Antennas (*Terence S P See & Zhi Ning Chen*)
- PLATO: A Generic Modeling Technique for Optical Packet-Switched Networks (*Shun Yao, Biswanath Mukherjee & Sudhir Dixit*)

JOURNAL OF INTERCONNECTION NETWORKS (JOIN)www.worldscinet.com/join.html**AIMS AND SCOPE**

The *Journal of Interconnection Networks (JOIN)* is an international scientific journal dedicated to advancing the state-of-the-art of interconnection networks. The journal addresses all aspects of interconnection networks including their theory, analysis, design, implementation and application, and corresponding issues of communication, computing and function arising from (or applied to) a variety of multifaceted networks.

Interconnection problems occur at different levels in the hardware and software design of communicating entities in integrated circuits, multiprocessors, multicomputers, and communication networks as diverse as telephone systems, cable network systems, computer networks, mobile communication networks, satellite network systems, the Internet and biological systems.

PARALLEL PROCESSING LETTERS (PPL)www.worldscinet.com/ppl.html**AIMS AND SCOPE**

Parallel Processing Letters (PPL) aims to rapidly disseminate results on a worldwide basis in the field of parallel processing in the form of short papers. It fills the need for an information vehicle which can convey recent achievements and further the exchange of scientific information in the field. This journal has a wide scope and topics covered included:

- * design and analysis of parallel and distributed algorithms
- * theory of parallel computation
- * parallel programming languages
- * parallel programming environments
- * parallel architectures and VLSI circuits

Letters of high scientific quality containing original results will be published. Experimental results are also welcome for publication if they contain an analysis corresponding to an abstract model of computation.

INTERNATIONAL JOURNAL OF INNOVATION AND TECHNOLOGY MANAGEMENT (IJITM)

www.worldscinet.com/ijitm.html

AIMS AND SCOPE

The objectives of the journal are to develop and promote the fields of innovation and technology management by providing a platform for reporting, sharing as well as the exchange of ideas, research findings, industry best practice and trends in the selected fields. In particular, the journal will focus on the managerial issues and challenges (and ways to address them) brought about by the increasing pace of technological advancement globally. This international dimension is emphasized in order to promote greater exchange between researchers of different cultural and national background, thus contributing and enriching our knowledge in the fields of innovation and technology management.

SELECTED PAPERS

- The Adoption of Advanced Manufacturing Technology and Innovation Strategy in Small Firms (*Nola Hewitt-Dundas*)
- ROAM — The Research Opportunity Assessment Model for Targeted Innovation (*James M Donatello & John E Sawyer*)
- t-Innovation: Using Information and Communication Technology to Achieve Strategic Innovation (*Jamie Anderson & Constantinos Markides*)
- Embodying Corporate Entrepreneurship in Strategic Orientation for Technology Firms (*Yim-Teo Tien Hua & Chao Jang Tao, Christian*)

DIVISION OF LABOR & TRANSACTION COSTS (DLTC)

A Journal of the Society for Inframarginal Economics
www.worldscinet.com/dltc.html

AIMS AND SCOPE

The aim of this journal is to help resurrect the spirit of classical economic thinking regarding the key relevance of network effects of division of labor. In particular, this journal provides an outlet for original studies that apply inframarginal analysis to the networking decisions of individuals in choosing their levels and patterns of specialization in a general equilibrium setting. In this context, inframarginal analysis involves total cost-benefit analysis across different network patterns of trade and division of labor, as well as marginal analysis of resource allocation for any given pattern of organization.

This journal operates in cooperation with the Society for Inframarginal Economics (www.inframarginal.com) and the Centre for Increasing Returns and Economic Organization, Department of Economics, Monash University.

ASIAN CASE RESEARCH JOURNAL (ACRJ)

www.worldscinet.com/acrj.html

AIMS AND SCOPE

The *Asian Case Research Journal's* principal objective is to provide case instructors, whether academics, consultants, or company in-house trainers, a selection of high-quality cases on Asian companies and MNCs operating in Asia-Pacific. These cases, not having been previously published, provide a fresh and topical pool of cases for teaching purposes.

The cases are either decisional — that is, requiring some business decision from the reader — or illustrative in nature, such as reasons for a firm's success. The cases come from various business disciplines including strategic management, marketing, organizational behavior/human resources, operations management, and MIS. All cases have been double blind refereed to ensure quality. The journal's Editorial Advisory Board is drawn from a distinguished, international panel of academics, including George Lodge (Harvard), William Naumes (University of New Hampshire), and Pradeep Khandwalla (Indian Institute of Management, Ahmedabad).

CHINA: AN INTERNATIONAL JOURNAL (CIJ)www.worldscinet.com/cij.html**AIMS AND SCOPE**

China: An International Journal focuses on contemporary China, including Hong Kong, Macau and Taiwan, covering the fields of politics, economics, society, law, culture and international relations.

While established China scholars are the main target of CIJ, the editors hope the Journal will be of particular interest to new China scholars just beginning their careers.

CIJ will be published twice yearly in March and September.

INTERNATIONAL GAME THEORY REVIEW (IGTR)www.worldscinet.com/igtr.html**AIMS AND SCOPE**

International Game Theory Review (IGTR) is a refereed quarterly journal published by World Scientific. It emphasizes rigorous analysis, and will offer up-to-date insights and perspectives through original research in game theory and its applications. It welcomes game-oriented papers from all fields of study. *IGTR* publishes both original articles and state-of-the-art surveys, and will seek to maintain a balanced orientation between game-theoretic modeling and practical implications. Theoretical significance as well as empirical relevance are key criteria for acceptance of an article, and *IGTR* is accessible to readers from a wide range of disciplines.

Addressing and reviewing designs, problems, solutions, and applications pertaining to the game theoretic analysis of strategic decisions, *IGTR* aims at maintaining a balanced interest between theory and applications.

INTERNATIONAL JOURNAL OF INNOVATION MANAGEMENT (IJIM)

www.worldscinet.com/ijim.html

AIMS AND SCOPE

The *International Journal of Innovation Management (IJIM)* is a quarterly publication dedicated to the advancement of academic research and management practice in the field of innovation management. The *IJIM* adopts an interdisciplinary, multifunctional approach, and welcomes contributions which seek to integrate the management of technological, market and organisational innovation. Contributions are based on original empirical research and the observations of experienced managers. Case studies which provide new conceptual or theoretical insights are also invited. The *IJIM* aims to provide a forum for the insights of academics, practising managers and consultants, and to integrate the theory and practice of innovation management.

INTERNATIONAL JOURNAL OF INFORMATION TECHNOLOGY AND DECISION MAKING (IJITDM)

www.worldscinet.com/ijitdm.html

AIMS AND SCOPE

International Journal of Information Technology and Decision Making (IJITDM) provides a global forum for exchanging research findings and case studies which bridge the latest information technology and various decision-making techniques. It promotes how information technology improves decision techniques as well as how the development of decision-making tools affects the information technology era. The journal is peer-reviewed and publishes both high-quality academic (theoretical or empirical) and practical papers in the broad ranges of information technology related topics.

SELECTED PAPERS

- Enabling Technologies for the Creation and Restructuring Process of Emergent Enterprise Alliances (*M Ulieru & R Unland*)
- Reputation, Utility and Technological Innovation Strategies (*T Xiao, G Yu & Z Sheng*)
- Automated Video Segmentation using Computer Vision Techniques (*H-W Yoo & D-S Jang*)
- Towards A Generic Object Oriented Decision Support System for University Timetabling: An Interactive Approach (*S Piechowiak & C Kolski*)

INTERNATIONAL JOURNAL OF THEORETICAL AND APPLIED FINANCE (IJTAF)

www.worldscinet.com/ijtaf.html

AIMS AND SCOPE

State-of-the-art financial modelling draws upon expertise from various disciplines besides finance; in particular, experts from mathematics, physics and computer science have made significant contributions to this field. *IJTAF* brings together experts from these multi-disciplines and provide a platform for the synergy and synthesis of the various specializations that are actively involved in financial modelling.

The disciplines covered by the journal include: Financial mathematics and financial engineering; decision theory; probability theory; optimization; statistical analysis; data analysis; modelling; computer algorithms and simulations; numerical methods; calibration and institutional implementation of models; regulatory aspects of the financial markets; emerging markets. There are also special issues covering country/regional experiences.

JOURNAL OF ENTERPRISING CULTURE (JEC)

www.worldscinet.com/jec.html

AIMS AND SCOPE

The purpose of this journal is to publish conceptual, research, and/or case based works that can be of practical value to business persons, educators, students and advocates.

In addition, the journal will also be dedicated to developing young researchers and teachers in the entrepreneurship discipline and to provide them with an opportunity to pursue more practical-oriented works. Under these circumstances, there will be a continuing flow of resource persons to serve the need of entrepreneurship research and education.

JOURNAL OF INFORMATION AND KNOWLEDGE MANAGEMENT (JIKM)

www.worldscinet.com/jikm.html

AIMS AND SCOPE

The *Journal of Information & Knowledge Management (JIKM)* is the official publication of the *Information and Knowledge Management Society (IKMS)*. JIKM is a refereed journal published quarterly by World Scientific and dedicated to the exchange of the latest research and practical information in the field of information processing and knowledge management. The journal publishes original research and case studies by academic, business and government contributors on all aspects of information processing, information management, knowledge management, tools, techniques and technologies, knowledge creation and sharing, best practices, policies and guideline.

JIKM is an international journal aimed at providing quality information to *IKMS* members as well as subscribers around the world. Managed by international editorial board, JIKM positions itself as one of the leading scholarly journals in the field of information processing and knowledge management. It is a good reference for both information and knowledge management professionals.

SELECTED PAPERS

- Knowledge Management Practices and Attitudes of IT Departments: Do They Practise What They Preach? (*Graham Pervan & Ruth Ellison*)
- Team Building as a Foundation for Knowledge Management: Findings from Research into Social Learning in the Australian Defence Organisation (*Leoni Warne, Irena M Ali & Celina Pascoe*)
- A Scorecard for Supporting Enterprise Knowledge Management (*Kathryn Cormican & David O'Sullivan*)
- Business Intelligence from Web Usage Mining (*Ajith Abraham*)
- Knowledge Management Initiatives in a Global IT Outsourcing Company: A Case Study of Infosys Technologies (*Ravi Shankar Mayasandra N & Shan L Pan*)

REVIEW OF PACIFIC BASIN FINANCIAL MARKETS AND POLICIES (RPBFMP)

www.worldscinet.com/rpbfmp.html

AIMS AND SCOPE

This journal concentrates on global interdisciplinary research in finance, economics and accounting. It particularly emphasizes the economic and financial relationship among Pacific rim countries. The major topics include:

1. Business, economic and financial relations among the Pacific rim countries.
2. Financial markets and industries (Banking and Insurance of the United States and other Pacific rim countries).
3. Options and futures markets of the United States and other Pacific rim countries.
4. International accounting issues related to U.S. companies investing in Pacific rim countries.
5. The issue of and strategy for developing Tokyo, Taipei, Shanghai, Sydney, Seoul, Hong Kong, Singapore, Kuala Lumpur, Bangkok, Jakarta, and Manila as international or regional financial centers.
6. Global monetary and foreign exchange policy, and
7. Other high quality interdisciplinary research in global accounting, business, economics and finance.

THE SINGAPORE ECONOMIC REVIEW (SER)

www.worldscinet.com/ser.html

AIMS AND SCOPE

The *Singapore Economic Review* is a biannual journal devoted to the publication of high-quality theoretical and empirical papers on all aspects of economics with a special emphasis on the economic problems related to Asian countries. The journal has a long history of publication of a broad range of economic issues impinging on Southeast Asia and the broader Asia-Pacific region.

The SER publishes scholarly work of contemporary interest with a special emphasis on the following fields:

- Public Policy and Economics • Economic Theory • Developmental Issues • Markets and Industry • Banking and Financial Issues • International Trade Issues • The Asian Crisis, China's Economic Reform, the Economic Resurgence of India. • Transitional Economics • The Economics of Information • Environmental and Health Economics • Innovation and Growth • Globalization and Competitiveness • Interdisciplinary Studies • Notes and Comments • Book Reviews

INDEXING/ABSTRACTING

• International Bibliography of the Social Sciences (IBSS)

SELECTED PAPERS

- Asian Crises: Theory, Evidence Warning Signals (*Jerome L Stein & Guay C Lim*)
- Locational Choice for Export Processing Zones in Developing Countries (*Kazuhiro Tetsu*)
- Opening the Financial Sector to Foreign Sector Competition: Assessing the Dynamic Macroeconomic Consequences using a Two-Sector Growth Model (*Yuan K Chou & Martin S Chin*)

INTERNATIONAL JOURNAL OF COMPUTATIONAL METHODS (IJCM)

www.worldscinet.com/ijcm.html

AIMS AND SCOPE

The purpose of this journal is to provide a unique forum for the fast publication and rapid dissemination of original research results and innovative ideas on the state-of-the-art on computational methods. The methods should be innovative and of high scholarly, academic and practical value. The journal is devoted to all aspects of modern computational methods including: mathematical formulations and theoretical investigations; interpolations and approximation techniques; error analysis techniques and algorithms; fast algorithms and real-time computation; multi-scale bridging algorithms; adaptive analysis techniques and algorithms; implementation, coding and parallelization issues; novel and practical applications.

SELECTED PAPERS

- Singular Enrichment Finite Element Method for Elastodynamic Crack Propagation (*Ted Telytschko Hao Chen*)
- Multiscale Numerical Methods for Singularly Perturbed Convection-Diffusion Equations (*Peter J Park & Thomas Y Hou*)
- Generalized Finite Element Methods: Main Ideas, Results, and Perspective (*Ivo Babuška, Uday Banerjee & John E Osborn*)
- The Moving Friction Cone Approach for Three-Dimensional Contact Simulations (*Peter Wriggers & Lovre Krstulović-Opara*)

COASTAL ENGINEERING JOURNAL (CEJ)

www.worldscinet.com/cej.html

AIMS AND SCOPE

Coastal Engineering Journal is a peer-reviewed medium for the publication of research achievements and engineering practices in the field of coastal, harbor and offshore engineering. The *CEJ* editors welcome original papers and comprehensive reviews on waves and currents, sediment motion and morphodynamics, as well as on structures and facilities. Reports on conceptual developments and predictive methods of environmental processes are also published. Topics also include hard and soft technologies related to coastal zone development, shore protection, and prevention or mitigation of coastal disasters. The journal is intended to cover not only fundamental studies on analytical models, numerical computation and laboratory experiments, but also results of field measurements and case studies of real projects.

INTERNATIONAL JOURNAL OF HIGH SPEED ELECTRONICS AND SYSTEMS (IJHSES)

www.worldscinet.com/ijhses.html

AIMS AND SCOPE

The *International Journal of High Speed Electronics and Systems (IJHSES)* will serve well graduate students and those in R&D, managerial and marketing positions by giving state-of-the-art data, and the latest research trends. Its main charter is to promote engineering education by advancing interdisciplinary science between electronics and systems and to explore high speed technology in photonics and electronics. IJHSES, a quarterly journal, continues to feature a broad coverage of topics relating to high speed or high performance devices, circuits and systems.

Papers published will cover:

- New milestones in research and development
- New materials, device structures, processing technologies, circuit and system architectures that lead to speed and performance
- In-depth analyses or critical evaluation of pertinent topics in the field
- Tutorial, review papers and technical reports.

INTERNATIONAL JOURNAL OF RELIABILITY, QUALITY AND SAFETY ENGINEERING (IJRQSE)

www.worldscinet.com/ijrqse.html

AIMS AND SCOPE

This is a refereed journal focusing on both the theoretical and practical aspects of reliability, quality, and safety in engineering. The journal is intended to cover a broad spectrum of issues in manufacturing, computing, software, aerospace, control, nuclear systems, power systems, communication systems, and electronics. Papers are sought in the theoretical domain as well as in such practical fields as industry and laboratory research and is published quarterly. It is intended to bridge the gap between the theoretical experts and practitioners in the academic, scientific, government, and business communities. Review articles and case studies are also welcome in addition to innovative works in all key areas of the journal.

Submission topics include but are not limited to the following: Reliability, quality assurance and engineering, software, algorithms, design and manufacturing, fuzzy logic, reliability growth and prediction, safety engineering, software testing and reliability, modeling and control issues, concurrent engineering, optimization of system reliability, performance analysis of systems, quality planning and measurements, risk assessment and analysis, fault-tolerant computing, and critical systems design.

INTERNATIONAL JOURNAL OF SHAPE MODELING (IJSM)

www.worldscinet.com/ijsm.html

AIMS AND SCOPE

The main goal of computer graphics and computer vision is to discover the essential rules of representing and generating shapes. Shapes are fundamental attributes of visible objects, and reasoning about the shape is a common way of describing and representing real objects in computer science, engineering, mathematics, biology, physics, chemistry, and even in one's daily life. Research on shape information is hence multidisciplinary. From this point of view, this journal is aimed at creating a suitable environment for exchanging research results obtained in advanced theories and techniques devised for handling the shape of objects, pointing out the three main aspects of modeling: disciplines, roles and applications. Shape modeling should be intended both in a creative and in an analytical sense. On the one hand, a precise definition of shape characteristics is an essential step for reproducing certain features in synthetic objects (e.g., computer graphics), while on the other hand, mathematical models for shapes are needed to perform tasks such as shape classification, recognition and characterization (e.g., computer vision). The journal also includes topics regarding the necessary advanced mathematical theories for describing and analyzing shapes such as differential geometry, differential topology, the singularity/catastrophe theory, fractal theory, theory of topological atoms, molecules and Hamilton systems.

INTERNATIONAL JOURNAL OF STRUCTURAL STABILITY AND DYNAMICS (IJSSD)

www.worldscinet.com/ijssd.html

AIMS AND SCOPE

The aim of this journal is to provide a unique forum for the publication and rapid dissemination of original research on stability and vibration of structures. It is devoted to all aspects of structural stability and dynamics, ranging from mathematical formulations to novel methods for solutions to experimental investigations and practical applications in civil, aerospace, mechanical and naval engineering.

This journal features a section for technical notes that allows researchers to publish their initial findings or new ideas more speedily. It also publishes discussions so that researchers can have a vibrant and timely communication with other.

JOURNAL OF COMPUTATIONAL ACOUSTICS (JCA)

www.worldscinet.com/jca.html

AIMS AND SCOPE

The aim of this journal is to provide an international forum for the dissemination of the state-of-the-art information in the field of Computational Acoustics.

Topics covered by this journal include research and tutorial contributions in *OCEAN ACOUSTICS* (a subject of active research in relation with sonar detection and the design of noiseless ships), *SEISMO-ACOUSTICS* (of concern to earthquake science and engineering, and also to those doing underground prospection like searching for petroleum), *AEROACOUSTICS* (which includes the analysis of noise created by aircraft), *COMPUTATIONAL METHODS*, and *SUPERCOMPUTING*. In addition to the traditional issues and problems in computational methods, the journal also considers theoretical research acoustics papers which lead to large-scale scientific computations.

The journal will occasionally publish significant contributions which are larger than the usual format for regular papers. Special issues which report results of high quality workshops in related areas and monographs of significant contributions in the Series of Computational Acoustics will also be published.

JOURNAL OF CONSTRUCTION RESEARCH (JCR)www.worldscinet.com/jcr.html**AIMS AND SCOPE**

The *Journal of Construction Research (JCR)* is to investigate and expand the frontiers of knowledge that cover business decision making applications of scholarly construction research.

Construction research consists of construction operations, management, economics and engineering services. The *JCR* aims to provide an international forum for the interchange of information and ideas relating to operations management and production management in the construction industry. Market and policy papers introducing and analyzing the operational and institutional setting, the supply side of real estate, policy issues and related laws and regulations of construction markets are also welcomed.

JOURNAL OF CIRCUITS, SYSTEMS, AND COMPUTERS (JCSC)www.worldscinet.com/jcsc.html**AIMS AND SCOPE**

The *Journal of Circuits, Systems and Computers* is an archival, peer reviewed bimonthly publication covering a wide scope of subjects, ranging from mathematical foundations to practical engineering design in the general areas of circuits, systems and computers. Although primary emphasis will be on research papers; *survey, expository and tutorial papers are welcome*. It aims to provide a natural home for a significant body of current research, and to serve as a forum for exchanges of ideas among the researchers. To this end, the journal is divided into two sections: **Papers:** Contributions in this section may be of a research or tutorial nature. Research papers must be original and must not have any duplicate descriptions or derivations available elsewhere. **Letters:** This section provides a vehicle for speedy publication of new results and information of current interest in circuits, systems and computers. Focus will be directed to practical design and applications-oriented contributions, but publication in this section will not be restricted to this material. These letters are to concentrate on reporting the results obtained, their significance and the conclusions, while including only the minimum of supporting details required to understand the contribution.

JOURNAL OF EARTHQUAKE ENGINEERING (JEE)www.worldscinet.com/jee.html**AIMS AND SCOPE**

The *Journal of Earthquake Engineering* is a quarterly publication of peer-reviewed papers on research and development in analytical, experimental and field studies of earthquakes from an engineering seismology as well as a structural engineering viewpoint. The Journal combines the three most important ingredients for a successful technical publication; the highest possible technical quality, speed of publication and competitive subscription rates.

The journal draws on research and development work from engineering communities worldwide in the fields of earthquake engineering and engineering seismology. Work on experimental, analytical, design and field studies will be considered for publication.

JOURNAL OF ENVIRONMENTAL ASSESSMENT POLICY AND MANAGEMENT (JEAPM)

www.worldscinet.com/jeapm.html

AIMS AND SCOPE

The *Journal of Environmental Assessment Policy and Management* is an interdisciplinary, peer reviewed, international journal covering policy and decision-making relating to environmental assessment (EA) in the broadest sense. Uniquely, its specific aim is to explore the horizontal interactions between assessment and aspects of environmental management (not just the vertical interactions within the broad field of impact assessment) and thereby to identify comprehensive approaches to environmental improvement involving both qualitative and quantitative information. As the concepts associated with sustainable development mature, links between environmental assessment and management systems become all the more essential; their development in isolation and without reference to each other becomes increasingly problematic. The focus of the journal is on law, policy and procedures, covering policy formulation, development and implementation, public participation and the institutional basis for EA. The journal aims to provide a forum for imaginative and creative thinking around the theoretical and empirical foundations of environmental assessment and management. Areas covered, and their inter-relationships in informing decision-making, therefore include:

Environmental Impact Assessment (EIA), Strategic Environmental Assessment (SEA), Sustainability Assessment/Appraisal, Environmental and Sustainability Indicators, Life Cycle Assessment, Eco-Labeling, Cumulative Effects Assessment, Social and Health Impact Assessment, Environmental Management Systems, Environmental Auditing, Philosophy of Clean Technology, Risk Assessment, Integrated Pollution Control, Stakeholder Communication, Public Participation in Environmental Decision-Making, Access to Information, Environmental Tools for the Financial Community, Environmental Economic Appraisal.

CHINESE SCIENCE BULLETIN (CSB)www.worldscinet.com/csb.html**AIMS & SCOPE**

Since its establishment in 1950, *Chinese Science Bulletin* has reported numerous achievements of scientific researchers in China, of which many are up to the advanced international standard, contributing much to the domestic and international academic exchange, and to the development of scientific undertakings, hence winning high praise from academic circles at home and abroad.

Chinese Science Bulletin has been on the **selections lists of some international retrieval journals, such as CA, EI, Bulletin of Japanese Scientific and Technological Documents, On Line Database, and Current Content, and some reports in this journal have been reviewed by newspapers or journals.** According to a latest report of China Scientific and Technological Institute, *Chinese Science Bulletin* ranks the first among the 20 most frequently cited journals of China. And *Chinese Science Bulletin* is counted among the 62 International journals listed in the column Multidisciplinary Sci. in the JCR of SCI.

Chinese Science Bulletin now mainly presents concise reports on the latest research in basic and applied sciences and a column "letters" covering briefly the most recent research news. Thus, this journal is essential reading for all scientists and students involved in these areas of research.

INNOVATION

THE MAGAZINE OF RESEARCH AND TECHNOLOGY

www.innovationmagazine.com**AIMS & SCOPE**

INNOVATION is a world-class publication highlighting the recent works of Singapore-based researchers, their collaborations with external organisations, as well as the latest breakthroughs in science, technology and medicine from around the world. The magazine's readers include researchers from national and international research organisations and universities, CEOs and top-level business decision-makers in science and technology companies, major R&D firms, government bodies, and other interested individuals.

INNOVATION provides the bridge that links the esoteric technicalities of R&D to everyday's life. It presents the significance of current work being undertaken by researchers in a style accessible to the educated layperson.

TOPICS OF PREVIOUS AND UPCOMING ISSUES

JOURNAL OF HYPERBOLIC DIFFERENTIAL EQUATIONS (JHDE)

www.worldscinet.com/jhde.html

AIMS AND SCOPE

This journal publishes original research papers on nonlinear hyperbolic problems and related topics, of mathematical and/or physical interest. Specifically, it invites papers on the theory and numerical analysis of hyperbolic conservation laws and of hyperbolic partial differential equations arising in mathematical physics.

The Journal aims to provide a forum for the community of researchers who are currently working in the very active area of nonlinear hyperbolic problems, and will also serve as a source of information for the users of such research.

ANALYSIS AND APPLICATIONS (AA)www.worldscinet.com/aa.html**AIMS AND SCOPE**

Analysis and Applications publishes high quality mathematical papers that treat those parts of analysis which have direct or potential applications to the physical and biological sciences and engineering. Some of the topics from analysis include approximation theory, asymptotic analysis, calculus of variations, integral equations, integral transforms, ordinary and partial differential equations, delay differential equations, and perturbation methods. The primary aim of the journal is to encourage the development of new techniques and results in applied analysis.

CHINESE ANNALS OF MATHEMATICS (CAM)www.worldscinet.com/cam.html**AIMS AND SCOPE**

Chinese Annals of Mathematics (CAM), founded in 1980, is a comprehensive international mathematical journal carrying original papers on pure and applied mathematics. It aims at presenting latest achievements in mathematical research and promoting international academic exchanges. From 1983 onwards, CAM is being published in two series: Series A published bimonthly in Chinese, Series B published quarterly in English. Papers published in Series A (or B) do not appear in Series B (or A). Both Series A and Series B are distributed all over the world.

The present Editorial Board is headed by Prof. Li Ta-tsien as Editor-in-Chief who is a member of the Chinese Academy of Sciences. The Editorial Board consists of 30 outstanding mathematicians, including 16 Academicians from various countries such as China, the United States, France, Sweden, Canada etc and 2 Fields Prize winners. Besides, 5 famous mathematicians are invited as its Honorary Editors.

As an international journal of mathematics, CAM Ser.B has attained high recognition in the community of mathematics for its good quality.

COMMUNICATIONS IN CONTEMPORARY MATHEMATICS (CCM)

www.worldscinet.com/ccm.html

AIMS AND SCOPE

Traditional boundaries between various specialized fields of mathematics are becoming less and less visible. Ideas and techniques from physics have brought major developments to mathematics. To reflect such a trend in mathematical science, *Communications in Contemporary Mathematics* intends to communicate the research in the fields of: Algebra, Analysis, Applied Mathematics, Dynamical Systems, Geometry, Mathematical Physics, Number Theory, Partial Differential Equations, and Topology, among others. It hopes to provide a forum to stimulate interactions between different areas. Both original research papers and expository articles will be published. The journal will strive for the highest quality.

INFINITE DIMENSIONAL ANALYSIS, QUANTUM PROBABILITY & RELATED TOPICS (IDAQP)

www.worldscinet.com/idaqp.html

AIMS AND SCOPE

In the past few years the fields of infinite dimensional analysis and quantum probability have undergone increasingly significant developments and have found many new applications, in particular, to classical probability and to different branches of physics. The number of first-class papers in these fields has grown at the same rate. This is currently the *only* journal which is devoted to these fields.

It constitutes an essential and central point of reference for the large number of mathematicians, mathematical physicists and other scientists who have been drawn into these areas. The journal reflects this interdisciplinarity and welcomes high quality papers in all such related fields, particularly those which reveal connections with the main fields of this journal.

JOURNAL OF KNOT THEORY AND ITS RAMIFICATIONS (JKTR)

www.worldscinet.com/jktr.html

AIMS AND SCOPE

This journal is intended as a forum for new developments in knot theory, particularly developments that create connections between knot theory and other aspects of mathematics and natural science. The stance is interdisciplinary due to the nature of the subject.

Knot theory as a pure mathematical discipline is subject to many forms of generalization (higher-dimensional knots, knots and links in other manifolds, non-spherical knots, recursive systems analogous to knotting). Knots live in a wider mathematical framework (classification of three and higher dimensional manifolds, quantum groups, combinatorics, algorithms and computational complexity, category theory, algebraic topology, topological quantum field theories). Papers that will be published include: (1) new research in the theory of knots and links, and their applications; (2) new research in related fields; (3) tutorial and review papers.

With this journal, we hope to serve well researchers in knot theory and related areas of topology, researchers using knot theory in their work, and scientists interested in becoming informed about current work in the theory of knots and its ramifications.

MATHEMATICAL MODELS AND METHODS IN APPLIED SCIENCES (M³AS)www.worldscinet.com/m3as.html**AIMS AND SCOPE**

This journal provides a medium of exchange for scientists engaged in applied sciences (physics, biology, economy, finance, social sciences, natural and technological sciences) where there exists a non-trivial interplay between mathematics, mathematical modeling of complex systems and mathematical and computer methods oriented towards the qualitative and quantitative analysis of mathematical models.

The principal areas of interest of this journal are: 1. Mathematical modeling of systems in applied sciences; 2. Mathematical methods for the qualitative and computational analysis of models of systems of real world; 3. Numerical and computational treatment of mathematical models or real systems.

Special attention will be paid to the analysis of nonlinearities and stochastic aspects.

REVIEWS IN MATHEMATICAL PHYSICS (RMP)

www.worldscinet.com/rmp.html

AIMS AND SCOPE

Reviews in Mathematical Physics fills the need for a review journal in the field, but also accepts original research papers of high quality. The review papers – introductory and survey papers – are of relevance not only to mathematical physicists, but also to mathematicians and theoretical physicists interested in interdisciplinary topics. Original research papers are not subject to page limitations provided they are of importance to this readership.

THE AMERICAN JOURNAL OF CHINESE MEDICINE (AJCM)

An International Journal of Comparative Medicine East and West
www.worldscinet.com/ajcm.html

AIMS AND SCOPE

The *American Journal of Chinese Medicine*, which is defined in its broadest sense possible, publishes original articles and essays relating to traditional or ethnomedicine of all cultures. Areas of particular interest include:

1. Basic scientific and clinical research in indigenous medical techniques, therapeutic procedures, medicinal plants, and traditional medical theories and concepts;
2. Multidisciplinary study of medical practice and health care, especially from historical, cultural, public health, and socioeconomic perspectives;
3. International policy implications of comparative studies of medicine in all cultures, including such issues as health in developing countries, affordability and transferability of health-care techniques and concepts;
4. Translating scholarly ancient texts or modern publications on ethnomedicine.

HAND SURGERY (HS)*An International Journal Devoted to Hand and Upper Limb Surgery and Related Research**Journal of the Asian-Pacific Federation of Societies for Surgery of the Hand*
www.worldscinet.com/hs.html

"Articles are well written and generally of high quality ... Review articles solicited from prominent hand surgeons are well written and concise and treat the topics fairly, with astute criticism of both the author's results and those previously published on the subject. ... Hand Surgery represents a well-organized, professional publication ... Hand surgeons and libraries that serve Asian populations would find it a useful addition."

JAMA

AIMS AND SCOPE

Hand Surgery is an international journal, devoted to injury and disease of the hand and upper limb and related research. The journal has been established to represent the thoughts and experiences of hand surgeons within the Asia-Pacific region. This journal will publish scientific articles, including case reports, articles on surgical techniques, letters to the Editor, and information regarding meetings and education programmes. The editorial board is drawn from hand surgeons of high standing throughout the world. The journal will accept submissions in English from all countries and will encourage contributions worldwide. It is intended that *Hand Surgery* reach the high standards attained by the British and European, and American volumes of the *Journal of Hand Surgery*, and that these three journals complement each other. The editors invite the support of hand surgeons and medical institutions throughout the world and hope that you will join with us in ensuring the success of this publication.

JOURNAL OF BIOINFORMATICS AND COMPUTATIONAL BIOLOGY (JBCB)

www.worldscinet.com/jbc.html

AIMS AND SCOPE

The *Journal of Bioinformatics and Computational Biology* aims to publish high quality, original research articles, expository tutorial papers and review papers as well as short, critical comments on technical issues associated with the analysis of cellular information.

The research papers will be technical presentations of new assertions, discoveries and tools, intended for a narrower specialist community. The tutorials, reviews and critical commentary will be targeted at a broader readership of biologists who are interested in using computers but are not knowledgeable about scientific computing, and equally, computer scientists who have an interest in biology but are not familiar with current thrusts nor the language of biology. Such carefully chosen tutorials and articles should greatly accelerate the rate of entry of these new creative scientists into the field.

JOURNAL OF BIOLOGICAL SYSTEMS (JBS)

www.worldscinet.com/jbs.html

AIMS AND SCOPE

The *Journal of Biological Systems* is published quarterly. The goal of the journal is to promote interdisciplinary approaches in Biology and in Medicine. Mathematical methods and general systems theory should be brought into the study of biological situations. The Journal solicits original research papers and survey articles in areas that include (but are not limited to):

1. Complex systems studies;
2. Interdisciplinary approaches in Biology and Medicine;
3. Environmental studies;
4. Evolutionary biology;
5. Medical systems;
6. Numerical simulations and computations;
7. Epistemology.

JOURNAL OF MUSCULOSKELETAL RESEARCH (JMR)

www.worldscinet.com/jmr.html

AIMS AND SCOPE

Journal of Musculoskeletal Research is an international interdisciplinary journal aimed at publishing up-to-date contributions on clinical and basic research in the musculoskeletal system. Research into the musculoskeletal system has grown tremendously in the past few decades. Meanwhile, several outstanding journals in the field have appeared, but with a different emphasis and objective. With the growing number of studies in the field, the review process has become increasingly longer. We hope this journal will serve as a new forum for both scientists and clinicians to share their ideas and the results of their studies.

Journal of Musculoskeletal Research explores all facets of musculoskeletal disorders, with emphasis on both the clinical and basic aspects of study. It covers the fields of orthopedics, neurology, rheumatology and rehabilitation. The method of study used can be clinical studies, molecular biology, biomechanics or biomaterial research. The journal publishes review articles, original articles, technical notes and case reports.

ADVANCES IN COMPLEX SYSTEMS (ACS)

A Multidisciplinary Quarterly Journal

www.worldscinet.com/acs.html

AIMS AND SCOPE

World Scientific is presently the exclusive publisher and distributor for this established journal. *Advances in Complex Systems* aims to provide a unique medium of communication for multidisciplinary approaches, either empirical or theoretical, to the study of complex systems. Its goal is to promote the cross-fertilization of ideas among all the scientific disciplines having to deal with their own complex systems. It is in fact the exchange of concepts and techniques — developed within areas as diverse as spin glass physics, decision sciences, mathematical economics, evolutionary biology, or psychology — which proved to be a major driving force in complex systems research.

FLUCTUATION AND NOISE LETTERS (FNL)

An Interdisciplinary Scientific Journal on Random Processes in Physical, Biological and Technological Systems

www.worldscinet.com/fnl.html

"Before its appearance on the scene there was not one journal in which the community of 'noise scientists' could converge; it fills an important and previously unoccupied niche. The editors are an outstanding multidisciplinary and multicontinental group who have a serious scientific interest in working towards the journal's success. It offers an appealing variety of papers (letters, current opinions and reviews), is highly effective, efficient and selective in its peer-review process, and is attractive in format, including the easy inclusion of colour figures. The electronic accessibility is most attractive. Those of us who find this an extremely useful and interesting venue must encourage our libraries to subscribe."

Nature

AIMS AND SCOPE

Fluctuations and Noise Letters (FNL) is a strongly interdisciplinary journal with emphasis on both fundamental and applied scientific values. The name "Letter" mostly indicates the speed of publication, and not the limitation of length. There is an emphasis to publish new original ideas and results. The main areas of focus include: • materials, nanostructures • electronic devices and systems • biological and biomedical systems • nonlinear system.

FRACTALS**Complex Geometry, Patterns, and Scaling In Nature and Society**www.worldscinet.com/fractals.html

"Fractals demonstrates the breadth, depth and vitality of the area, and it is essential reading for anybody whose research involves structures and forms that are irregular yet have a definite character of their own."

Ian Stewart, Warwick

"Fractals is physically impressive: large format, glossy pages, profusely illustrated with occasional colour. Scientifically it is fairly impressive too, with an attractive mix of theory and experiment, simulations and proofs ... Fractals demonstrates the breadth, depth and vitality of the area, and it is essential reading for anybody whose research involves structures, and forms that are irregular yet have a definite character of their own."

Ian Stewart, Nature

AIMS AND SCOPE

The investigation of phenomena involving complex geometry, patterns and scaling has gone through a spectacular development in the past decades. For this relatively short time, geometrical and/or temporal scaling have been shown to represent the common aspects of many processes occurring in an unusually diverse range of fields including physics, mathematics, biology, chemistry, economics, technology and human behavior. As a rule, the complex nature of a phenomenon is manifested in the underlying intricate geometry which in most of the cases can be described in terms of objects with non-integer (fractal) dimension. In other cases, the distribution of events in time or various other quantities show specific scaling behavior, thus providing a better understanding of the relevant factors determining the given processes.

Using fractal geometry and scaling as a language in the related theoretical, numerical and experimental investigations, it has been possible to get a deeper insight into previously intractable problems. Among many others, a better understanding of growth phenomena, turbulence, iterative functions, colloidal aggregation, biological pattern formation, stock markets and inhomogeneous materials has emerged through the application of such concepts as scale invariance, self-affinity and multifractality.

The main challenge of the journal devoted exclusively to the above kinds of phenomena lies in its interdisciplinary nature; it is our commitment to bring together the most recent developments in these fields so that a fruitful interaction of various approaches and scientific views on complex spatial and temporal behaviors in both nature and society could take place.

The journal "FRACTALS: Complex Geometry, Patterns, and Scaling in Nature and Society" will publish the following types of peer-reviewed articles. i) Full-length research papers, ii) Short communications, iii) Reviews of both technical and pedagogical nature, and iv) Popular (educational, Scientific American type) articles.

INTERNATIONAL JOURNAL OF BIFURCATION AND CHAOS (IJBC)

In Applied Sciences and Engineering

www.worldscinet.com/ijbc.html

"The International Journal of Bifurcation and Chaos is the most handsomely produced, with its large pages and type, and it is the place to publish colour figures. The covers are breathtaking and the articles are rich with brilliant colour pictures (free to authors). When lack of shelf space forces the clearing of my office some years from now, I shall hesitate to throw out any of these issues. Each begins with valuable tutorials and reviews, and is followed by papers and letters. It is evident that much effort has been expended to bring high-quality readable papers from a variety of scientific fields into this ... publication. Not just in terms of its low cost, I consider this journal the best buy."

Nature (UK)

AIMS AND SCOPE

IJBC is widely regarded as the leading journal in the exciting field of chaos and nonlinear science. Represented by an international editorial board comprising eighty top researchers from a wide variety of disciplines, it is setting the standard in scientific and production quality. The journal has been highly acclaimed by the scientific community around the world, and has featured many important papers by leading researchers from various fields.

The scope of this journal encompasses experimental, computational, and theoretical aspects of bifurcations, chaos and complexity of biological, economic, engineering, fluid dynamic, neural, physical, social, and other dynamical systems. This broad but focused coverage includes, but is not restricted to, those areas of expertise provided by the members of the editorial board, whose composition will evolve continuously in order to respond to emerging new areas and directions in nonlinear dynamics and complexity.

INTERNATIONAL JOURNAL OF MODERN PHYSICS A (IJMPA)

Particles and Fields, Gravitation, Cosmology and Nuclear Physics

www.worldscinet.com/ijmpa.html

AIMS AND SCOPE

Started in 1986, *IJMPA* has gained international repute as a high-quality scientific journal. It consists of important review articles and original papers covering the latest research developments in Particles and Fields, Gravitation and Cosmology. The journal also features articles of long-standing value and importance which can be vital to research into new unexplored areas.

INTERNATIONAL JOURNAL OF MODERN PHYSICS B (IJMPB)

Condensed Matter Physics, Statistical Physics and Applied Physics

www.worldscinet.com/ijmpb.html

AIMS AND SCOPE

Launched in 1987, this journal covers the most important aspects as well as the latest developments in Condensed Matter, Statistical, Applied Physics and High T_c Superconductivity. One unique feature of this journal is its review section which contains articles with permanent research value besides the state-of-the-art research work in the relevant subject areas.

To ensure top quality, review articles are by invitation only and all research papers undergo stringent refereeing. We welcome you to submit your research papers to *IJMPB* for publication.

INTERNATIONAL JOURNAL OF MODERN PHYSICS C (IJMPC)

Physics and Computers

www.worldscinet.com/ijmpc.html

AIMS AND SCOPE

The scope of this journal covers Computational Physics, Physical Computation and related subjects. *IJMPC* aims at publishing both review and research articles on the use of computers to advance knowledge in physical sciences and the use of physical analogies in computation. Topics covered include: algorithms; astrophysics; atomic, molecular and chemical physics; computational biophysics; computational fluid dynamics; computer and information science; condensed matter physics, materials science; data analysis and computation in experimental physics; electromagnetism; high energy physics; nuclear and plasma physics; environmental physics; physical computation including neural nets, cellular automata and complex systems; quantum chemistry; statistical physics; symbolic manipulation; etc.

INTERNATIONAL JOURNAL OF MODERN PHYSICS D (IJMPD)

Gravitation, Astrophysics and Cosmology

www.worldscinet.com/ijmpd.html

AIMS AND SCOPE

Gravitation, astrophysics and cosmology are exciting and rapidly advancing fields of research. This journal aims to accommodate and promote this expansion of information and ideas, and it features research papers and reviews on theoretical, observational and experimental findings in these fields. Among the topics covered are general relativity, quantum gravity, gravitational experiments, quantum cosmology, observational cosmology, particle cosmology, large scale structure, high energy astrophysics, compact objects, cosmic particles and radiation.

INTERNATIONAL JOURNAL OF MODERN PHYSICS E (IJMPE)

Nuclear Physics

www.worldscinet.com/ijmpe.html

AIMS AND SCOPE

This bi-monthly journal covers the topics of experimental, theoretical and computational nuclear science and its applications and interface with astrophysics and particle physics. The journal includes both invited review articles and research papers.

INDEXING/ABSTRACTING

• Science Citation Index Expanded® • ISI Alerting Services • Current Contents®/Physical, Chemical & Earth Sciences • Astrophysics Data System (ADS) Abstract Service • INSPEC

SELECTED PAPERS

- Progress in the Physics of Massive Neutrinos (*V Barger, D Marfatia & K Whisnant*)
- About Excited States of Deformable Non-Axial Odd Nuclei (*SH Sharipov & M J Ermamatov*)
- 2004 Review of Light Cone Field Theory (*L S Kisslinger*)
- Application of Classical Formulations of Quantum Mechanical Time-Dependent Variational Principles to the Shell and Collective Models (*B H Lavenda*)

INTERNATIONAL JOURNAL OF NANOSCIENCE (IJN)

www.worldscinet.com/ijn.html

AIMS AND SCOPE

This inter-disciplinary, internationally-reviewed research journal covers all aspects of nanometer scale science and technology. Articles in any contemporary topical areas are sought, from basic science of nanoscale physics and chemistry to applications in nanodevices, quantum engineering and quantum computing. *IJN* will include articles in the following research areas (and other related areas):

- Properties Effected by Nanoscale Dimensions
- Atomic Manipulation, Coupling of Properties at the Nanoscale
- Controlled Synthesis, Fabrication and Processing at the Nanoscale
- Nanoscale Precursors and Assembly, Nanostructure Arrays, Fullerenes, Carbon Nanotubes and Organic Nanostructures
- Quantum Dots, Quantum Wires, Quantum Wells, Superlattices
- Nanoelectronics, Single Electron Electronics and Devices, Molecular Electronics, Quantum Computing
- Nanomechanics, Nanobiological Function and Life Sciences
- Nanoscale Instrumentation and Characterization
- Nano-optics, Photonic Crystals with Nanoscale Structural Fidelity

INDEXING/ABSTRACTING

- CSA Aerospace Sciences Abstracts

SELECTED PAPERS

- Inorganic Semiconductor Nanowires (*Peidong Yang, Yiyang Wu & Rong Fan*)
- Quantum Well Luminescence from Metallic Monolayers (*Gerhard Hoffmann & Richard Berndt*)
- Engineering Carbon Nanotubes via Template Growth (*C Papadopoulos et al.*)
- Nanotube Light-Controlled Electronic Switch (*Slava V Rotkin & Ilya Zharov*)

PRICE INFORMATION (ISSN: 0219-581X • Vol. 4/2005 • 6 Issues)	US\$	€	S\$

INTERNATIONAL JOURNAL OF QUANTUM INFORMATION (IJQI)

www.worldscinet.com/ijqi.html

AIMS AND SCOPE

This journal provides a forum for the interdisciplinary field of Quantum Information Science. In particular, we welcome contributions in these areas of experimental and theoretical research:

- Quantum Cryptography
- Quantum Computation
- Quantum Communication
- Fundamentals of Quantum Mechanics

SELECTED PAPERS

- Geometry of Decomposition Dependent Evolutions of Mixed States (*David Kult & Erik Sjöqvist*)
- Entanglement Bounds for a Family of Two-Mode Gaussian States (*Li-Zhen Jiang*)
- Wigner Rotations, Bell States, and Lorentz Invariance of Entanglement and Von Neumann Entropy (*Chopin Soo & Cyrus C Y Lin*)
- Finite Size Effects in Entangled Rings of Qubits (*T Meyer et al.*)
- Analytic Solutions for Quantum Logic Gates and Modeling Pulse Errors in a Quantum Computer with a Heisenberg Interaction (*G P Berman, D I Kamenev & V I Tsifrinovich*)

INTERNATIONAL JOURNAL OF PIXE (IPIXE)

www.worldscinet.com/ijpixe.html

AIMS AND SCOPE

This is a quarterly journal covering the latest developments in the various aspects of particle-induced X-ray emission (PIXE), including the fundamentals of this process, its applications and the techniques employed in different kinds of applications. It seeks to enhance communication between basic and applied scientists by compiling relevant research papers and review articles which would otherwise be widely dispersed in a number of specialized journals that cover PIXE only as one of the related subjects.

The scope of the journal encompasses the following:

1. *Fundamental Aspects:* Ion-atom, electron-atom and photon-atom collisions; ionization; X-ray and Auger electron production; solid state effect; excitation-assisted chemical reactions.
2. *Techniques:* Microbeam and external-beam techniques; data handling; RBS; synchrotron radiation; sample preparation.
3. *Applications:* Biomedical, pharmaceutical, biological, archaeological, geological, environmental, high-technological and industrial applications.

JOURNAL OF NONLINEAR OPTICAL PHYSICS AND MATERIALS (JNOPM)

www.worldscinet.com/jnopm.html

AIMS AND SCOPE

This journal is devoted to the rapidly advancing research and development in the field of nonlinear interactions of light with matter. Topics of interest include, but are not limited to, fundamental nonlinear optical processes, novel nonlinear material properties, guided waves and solitons, intense field phenomena, and their applications in laser and coherent lightwave amplification, guiding, switching, modulation, communication and information processing. Original papers, comprehensive reviews and rapid communications reporting original theories and observations are sought for in these and related areas. This journal will also publish proceedings of important international meetings and workshops. It is intended for graduate students, scientists and researchers in academic, industrial and government research institutions.

SURFACE REVIEW AND LETTERS (SRL)www.worldscinet.com/srl.html**AIMS AND SCOPE**

Surface Review and Letters is an international journal devoted to the elucidation of properties and processes that occur at the boundaries of materials. The scope of the journal covers a broad range of topics in experimental and theoretical studies of surfaces and interfaces. The latter include solid-solid and liquid-solid interfaces. Both the physical and chemical properties are covered. The journal also places emphasis on emerging areas of cross-disciplinary research where new phenomena occur due to the presence of a surface or an interface. Representative areas include surface and interface structures; their electronic, magnetic and optical properties; dynamics and energetics; chemical reactions at surfaces; phase transitions, reconstruction, roughening and melting; defects, nucleation and growth; and new surface and interface characterization techniques. The journal publishes scientific papers in the following three categories:

- (a) **Letters:** Letters are short communications announcing particularly significant discoveries where timely publication is a key factor. Each letter should contain a coherent and reasonably complete discussion of the discovery within the constraints of a short communication. A letter should not exceed eight printed pages.
- (b) **Research Articles:** Research articles are comprehensive presentations of original research. The presentation should contain enough details so that a knowledgeable scientist in the field could follow the steps of derivation with reasonable ease.
- (c) **Review Articles:** Review articles are selected for their critical assessment of important areas of interest. Either a single review or a group of reviews covering a spotlight area is featured. The authors and subject matter of the reviews are recommended by the Editorial Board.

THE HONG KONG JOURNAL OF SOCIAL WORK (HKJSW)

www.worldscinet.com/hkjsw.html

AIMS AND SCOPE

The *Hong Kong Journal of Social Work* is a bilingual publication of the Hong Kong Social Workers Association Limited. It is committed to the improvement of practice, extension of knowledge and promotion of communications in very broad fields of social work. While it publishes symposia, original research, theoretical papers, review articles, notes and discussions on social work theory and practice, and new developments in social work, letters to the Chief Editor are welcome, as are responses to published articles and reviews. Priority will be given to indigenous materials and research having a strong local flavour.

INDEXING/ABSTRACTING
