See also input algorithm in [2304], and a faster output algorithm in [2861]. In electronic mail dated Wed, 27 Jun 90 11:55:36 EDT, Guy Steele reported that an intrepid pre-SIGPLAN 90 conference implementation of what is stated in the paper revealed 3 mistakes:

1. Table 5 (page 124):
 insert `k <-- 0` after assertion,
 and also delete `k <-- 0` from Table 6.
2. Table 9 (page 125):
 for `-1:USER!("")`;
 substitute `-1:USER!("0")`;
 and delete the comment.
3. Table 10 (page 125):
 for `fill(-k, "0")`
 substitute `fill(-k-1, "0")`
