

# Simon Fraser University Calendar 2009 • 2010

<http://students.sfu.ca/calendar>

Beginning 2010/2011, only a web version of the Simon Fraser University Calendar will be produced.

Demand for the print version has steadily decreased over the years. Focussing solely on further development of a web-based Calendar reduces paper consumption, enables more effective resource deployment, and better serves our primary audience of undergraduate and graduate students.

I will keep the University community apprised of on-going improvements to the web-based Calendar.

*Kate Ross*  
Registrar and Senior Director, Student Enrolment

## Enrolment Limitations

It should be carefully noted that possession of the minimum requirements does not in itself guarantee admission to any course, program, department or faculty at the University. In those instances where the number of qualified applicants exceeds the number that, in the opinion of the University, can be accommodated, the University reserves the right to select the quota from among the qualified applicants. Address all enquiries to: Enrolment Services, Simon Fraser University, 8888 University Drive, Burnaby, BC, V5A 1S6, Canada.

## Protection of Privacy

Simon Fraser University collects and retains student and alumni personal information under the authority of the University Act [R.S.B.C. 1996, c.468, s. 27(4)(a)]. The information is related directly to and needed by the University for the purposes of admission, enrolment, graduation and other activities related to its programs, being a member of the Simon Fraser University community and attending a public post-secondary institution in the Province of British Columbia.

The information will be used to admit, enrol and graduate students, record academic achievement, issue library cards and transit passes and administer and operate academic, athletic, recreational, residences, alumni and other University programs.

Information on admission, enrolment and academic achievement may also be disclosed and used for statistical and research purposes by the University, other post-secondary educational institutions and the provincial government.

## Disclosure of Personal Information to the BC University Student Outcomes Project

Each year, the BC University Student Outcomes Project gathers student outcomes information from graduates of BC's universities in collaboration with The University Presidents Council (TUPC) and the Ministry of Advanced Education. Each BC university provides to the University Student Outcomes Project student identification information (student's name, student ID number), student contact information (address and telephone number), student demographic characteristics and academic program information. The information is used by the project to contact BC university graduates to conduct voluntary telephone surveys two and five years after graduation.

Survey participants are asked to report their level of program satisfaction, degree of skill development, education financing and debt load, participation in further education, and employment outcomes. The information gathered by the survey is summarized in aggregate form without identifying individual students. The data is used to meet the demand for university accountability at the system level in BC; to gather timely and relevant data for use in program evaluation and planning processes; and to ensure that new, continuing and prospective students are provided with information they can use to help them make informed career decisions.

Personal information provided for admission and enrolment and any other information placed into the student record will be collected, protected, used, disclosed and retained in compliance with British Columbia's *Freedom of Information and Protection of Privacy Act* (R.S.B.C. 1996, c. 165).

## Disclosure of Personal Information to Student Societies

In addition to collecting personal information for its own purposes, the University collects specific and limited personal information on behalf of the Simon

Fraser Student Society and the Graduate Student Society. The societies use this information for the purpose of membership administration, elections, annual general meetings, special general meetings and its health plans. The University discloses the personal information to the student society only for those purposes. Please contact the student society general office if you have any questions about its collection, use and disclosure of the information.

If you have any questions about the collection, use and disclosure of your personal information by the University, please contact the Registrar, MBC 3300, Simon Fraser University, 8888 University Drive, Burnaby, BC V5A 1S6; 778.782.3111.

## Photography on Campus

From time to time students, staff, faculty and guests at Simon Fraser University may be photographed in non-public areas (i.e. classrooms, private offices, in studio, meeting rooms, etc.) by University photographers. In this notice 'photography' includes still, video and film photography. The University has the authority under the University Act (R.S.B.C. 1996, c.468, s. 27(4)(a)), to collect personal information in the form of photographs. Such photographs are related directly to and needed by the University for educational, recruitment and promotional purposes. The photographs may be used and disclosed at the University's discretion and included in the University calendar, websites, newsletters, bulletins, brochures, advertisements, annual reports, supplements, displays, reports and other publications including off-campus news media. In addition, the photograph may be placed in the University's Image Library which is a collection of photographs available for sale (<http://lidsc-imagelib.lidsc.sfu.ca/>). If you do not wish to be photographed in a non-public area, please inform the photographer before he/she begins taking photographs. If you allow yourself to be photographed in a non-public area you are giving the University your consent regarding its collection, use and disclosure of the photograph.

The above notice does not apply to individuals photographed in open, public areas where there is no expectation of privacy (i.e. Convocation Mall, cafeterias, public walkways, concourses, etc.). Photographs taken in public areas may be used and disclosed at the University's discretion.

If you have any questions about photography on campus or the University's collection, use and disclosure of photographs, please contact the manager, Media Production Group, Learning and Instructional Development Centre at 778.782.3092.

## Notification of Disclosure of Personal Information to Statistics Canada

Statistics Canada is the national statistical agency. As such, Statistics Canada carries out hundreds of surveys each year on a wide range of matters, including education.

It is essential to be able to follow students across time and institutions to understand, for example, the factors affecting enrolment demand at post-secondary institutions. The increased emphasis on accountability for public investment means that it is also important to understand outcomes. In order to carry out such studies, Statistics Canada asks all colleges and universities to provide data on students and graduates. Institutions collect and provide to Statistics Canada student identification information (student's name, student ID number, social insurance number), student contact information (address and telephone number), student demographic characteristics, enrolment information, previous education, and labor activity.

The federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used only for statistical purposes, and the confidentiality provisions of the Statistics Act prevent the information from being released in any way that would identify a student.

Students who do not wish to have their information used are able to ask Statistics Canada to remove their identification and contact information from the national database.

Further information, about the use of this information, can be obtained from Statistics Canada's web site [www.statcan.gc.ca](http://www.statcan.gc.ca).

## Calendar Changes and Corrections

The Board of Governors and the Senate of Simon Fraser University reserve the right to make changes in this Calendar without prior notice. This Calendar is printed to provide students and others with information about Simon Fraser University. The University considers this Calendar to be accurate at the time of printing. In the event of errors, the actual courses, curricula, policies, procedures, regulations and requirements in effect will prevail over the provisions printed in the Calendar. In addition, the policies, procedures, programs, regulations and requirements are constantly being reviewed and revised. Any such revision may be made by Simon Fraser University without notice and shall take effect at the time of the revision unless a later date is specified when the revision is adopted. Simon Fraser University will endeavor to give the University community as much notice of the revision as it considers the circumstances permit, and will endeavor to incorporate the revision in the next version of the Calendar. Revisions include additions, cancellations and deletions as well as changes.

## Calendar Distribution

The Calendar is available on the web, in both HTML and PDF formats, at <http://students.sfu.ca/calendar>. An errata list citing recent updates is on that website.

Enrolled Simon Fraser University students are entitled to one free printed Calendar each year, available for in-person pick-up at the SFU Bookstore (Burnaby campus), and at Information and Registration Services (Simon Fraser University Vancouver and also Simon Fraser University Surrey).

To receive a Calendar in the mail, send a request along with full payment to: Calendar Orders, SFU Bookstore, Simon Fraser University, 8888 University Drive, Burnaby, BC V5A 1S6, Canada.

The following costs apply: \$8.40 for an address within BC, \$12.60 for an address within the rest of North America, and \$31.50 for an international address. Acceptable forms of payment are Visa, MasterCard, American Express, and money orders in Canadian funds.

The Calendar is distributed to many universities, colleges, secondary schools and public libraries in BC, and to all Canadian universities.

## Calendar Production

Published by Student Services, Simon Fraser University. For changes, updates and suggestions, please email: [calendar-sfu@sfu.ca](mailto:calendar-sfu@sfu.ca).

# History of Simon Fraser University

The University is named after Simon Fraser, Loyalist, fur-trader and explorer, who in 1808 completed one of the greatest journeys in the annals of Canadian history by descending the mighty river which today bears his name. The Fraser family coat of arms forms the basis of the University's coat of arms which appears on the title page of this Calendar. The colors of Simon Fraser University are red and blue.

In January 1963 a report entitled Higher Education in British Columbia and a Plan for the Future, by Dr. J.B. Macdonald, recommended the creation of a new university in the Lower Mainland. Two months later the establishment of Simon Fraser University received formal assent in the British Columbia Legislature, and in May of the same year Dr. Gordon M. Shrum was appointed Chancellor.

From a variety of sites which were offered, the Chancellor recommended to the Provincial Government that the top of 1200 foot Burnaby Mountain be selected for the new university. Lying east of Vancouver, the site commands magnificent views of Burrard Inlet, the mountains, the Fraser River and Vancouver Harbor.

Architects were invited to compete in the design of the overall campus. The Vancouver firm of Erickson/Massey won the competition, and the four architects who had been runners-up in the competition each designed at least one building within the overall plan. The outstanding architecture has won many awards.

Construction began in the spring of 1964 and eighteen months later, on September 9, 1965, Simon Fraser University opened to 2,500 students.

Since those early years the University has grown substantially. In September 2008, 27,081 students

were enrolled in courses. At the June 2008 Convocation ceremonies 3,611 credentials were conferred, while at the University's October Convocation, 2,132 students received their credentials.

## Simon Fraser University Vancouver

First established in 1980 in a storefront classroom on Howe Street, the Simon Fraser University Harbour Centre site opened in 1989, the result of a close collaboration of the University and the business, professional and cultural communities, the City of Vancouver and the Province of British Columbia. This association has grown as the University continues to seek the advice and participation of the downtown community in the development of its mission and programs.

The campus in downtown Vancouver now comprises the headquarters at Harbour Centre, the Morris J. Wosk Centre for Dialogue, the School for Contemporary Arts studios at 611 Alexander and the Segal Graduate School of Business. Built largely through private sector funding, the Vancouver campus offers a range of programs and services directed to mid-career intellectual and professional growth, providing continuity between work and study within an environment created specifically for advanced learning and specialized graduate and undergraduate programs. Researchers at the downtown campus benefit from their proximity to others engaged in research in the urban community.

With over 27,000 square meters of space, the campus currently serves approximately 5,000 non-credit, Continuing Studies students annually. Each term approximately 2,200 undergraduates and 600 graduate students complete credit courses, and

thousands of individuals, groups and companies attend public programs, or use the campus for community, corporate and other meetings.

In 2010 the School for the Contemporary Arts will move its Burnaby campus programs to the Vancouver campus and will occupy a dynamic new 11,000 square metre facility on the redeveloped Woodward's site.

## Simon Fraser University Surrey

Simon Fraser University Surrey is one of BC's leading university campuses for study and research. Offering distinctive nationally and internationally acclaimed programs, Simon Fraser University Surrey promotes student success with a high quality learning environment based on innovative teaching approaches, small class sizes, and a vibrant research community. The campus, which opened its doors in September 2002, is located adjacent to the Surrey Central SkyTrain station at King George Highway and 102nd Avenue. Undergraduate programs in the Faculties of Applied Sciences; Arts and Social Sciences; Business Administration; Communication, Art and Technology; Education; and Science are being offered. Additionally, graduate programs are being offered in the Faculties of Applied Sciences, Education, Arts and Social Sciences, Communications, Art and Technology, and Science.

Continuing Studies programs are also offered. More than 3,000 undergraduate and graduate students are enrolled in these and many other Surrey programs.

The new campus occupies 21,500 square metres in the stunning facility, which was designed by renowned architect Bing Thom.

# Programs Offered

## Undergraduate Programs

Simon Fraser University offers three main types of undergraduate programs: honors programs leading to an **honors degree**, general programs leading to a **general degree**, and an **extended minor degree**. Most departments offer all these types of programs.

To be granted a degree, a student must satisfy certain requirements which ensure a depth of study and a coherent combination of courses. These requirements, called a **degree program**, are expressed in terms of the number of units in lower and upper division courses to be completed in and outside the subject(s) of concentration. Depending on the extent of concentration in a subject area, a degree program may offer an honors program, a major program, a minor program, or certain combinations.

Students are encouraged to sample a wide range of courses before focusing on a particular area of concentration, but normally must commit themselves to their area(s) before entering the second half of the degree program. Students should be aware of any prerequisite courses for their programs that they may need to undertake in the first four levels. (See the *Definitions* section following.)

### Degree Requirements

All students admitted to the University as of fall 2006 must meet writing, quantitative, and breadth requirements in completing their undergraduate degree. See "Writing, Quantitative, and Breadth Requirements" on page 7.

Students should refer carefully to overall requirements of the faculties for degree requirements, as the requirements for a specific degree must be fulfilled. Some departments require specific prerequisite courses for entry to some upper division courses, and some faculties require completion of a minimum number of upper division courses to fulfil degree conditions. Some faculties require completion of a minimum number of units within the faculty to qualify for a degree. If in doubt, seek advice from Academic Advising and Success.

### Honors Program

An honors degree is comprised of 132 units in a specified honors program including approximately 48-50 units in specified upper division courses in the honors subject or field. Different honors programs have varying unit requirements in the lower division courses. (See faculty and departmental requirements.)

### Joint Honors Program

A joint honors degree requires completion of at least 132 units including the completion of a specific joint honors program, which would normally consist of a total of at least 50 units in upper division courses completed in two or more disciplines, as specified. Different joint honors programs have varying unit requirements in the lower division courses. (See faculty and departmental requirements.)

### Major Program

A general degree requires at least 120 units and, normally, completion of a major program. A major program consists of approximately 28 to 30 units in upper division courses as specified in the major subject or field. Varying unit requirements are needed

in the lower division courses for different major programs. (See faculty and departmental requirements. With special approval, two minors may be substituted for a major in the bachelor of education degree. The bachelor of general studies degree has broad requirements.)

### Joint Major Program

A general degree may be obtained by completion of 120 units including the completion of a joint major program. The specific joint major requires at least 30 units in upper division courses completed in two or more disciplines, as specified. Unit requirements in the lower division courses vary for different joint major programs. (See faculty and departmental requirements.)

### Double Major Program

A general degree may include completion of two major programs. The student must complete the following.

- the lower division requirements for each of the major subjects selected
- at least 28 units of upper division courses as specified in each of the two subjects in which the majors are to be claimed
- any other requirements of the particular departments concerned
- the requirements of the faculty in which the student will receive the degree

This permits study of two majors within a single faculty or across faculties. The bachelor's degree awarded will be determined according to the faculty in which all requirements have been met or, if the requirements of more than one faculty have been met, then from the faculty that the student selects. (See *Major-Minor Program* following.)

### Minor Program

A minor requires completion of at least 14 to 18 upper division units as specified in the subject. To qualify for a specific minor, at least seven units of upper division credit used toward the minor must have been completed in Simon Fraser University courses. A minor program also requires meeting any stipulated lower division requirements and may be used toward the requirements of a degree program.

### Extended Minor Program

This program consists of the lower division requirements for a major, and the upper division

requirements for a minor. A student must have their program approved by the extended minor program advisor.

### Major – Minor Program

A general degree may include the completion of a major program and a minor program. The student must complete at least 28 units of upper division courses as specified in the major subject, and at least 14 to 18 units of upper division courses as specified in the minor subject. The same upper division course may not be used for formal credit in both the major and the minor. The student must complete the lower division requirements for the major subject selected, all other requirements of the major department, the lower and upper division requirements for the minor selected, and the requirements of the faculty in which the student will receive the degree. This permits the undertaking of a major and a minor within a single faculty or across faculties.

### Double Major and Major – Minor Programs

#### Credit Value of Courses

In order to give sufficient weight to both majors in a double major program, the student may not apply the same upper division course for formal credit in both majors. Similarly, a student in a major-minor program may not use the same upper division course for formal credit in both the major and the minor. Also, a student undertaking a program consisting of more than one minor may not use the same upper division courses for credit toward more than one minor.

Where one course fulfils the content requirements of two related areas, additional replacement units in upper division work satisfactory to one of the departments or program committees must be completed to fulfil the overall credit requirements for the double major or major-minor program.

For lower division requirements, one course could fulfil both content and credit requirements as a prerequisite, but no course can carry double credit toward the degree total. In a number of possible combinations in the bachelor of arts or bachelor of general studies degree, certain constraints exist on the use of both lower and upper division courses.

In some instances, therefore, a student seeking a double major or a major-minor involving subjects in more than one faculty may need more than 120 units to fulfil the requirements of the general degree.

### Changing Programs

A student who elects to complete a double major or a major-minor program may change his/her decision and graduate with a major only, provided that the requirements for the major and requirements of the faculty concerned have been fulfilled. Notification of such changes must be filed with the departments concerned and Student Services.

### Second Bachelor's Degrees

A student who already holds a bachelor's degree(s) from an approved institution may complete a second or subsequent bachelor's degree at the University, subject to the following conditions and regulations.

The basic requirement for a further bachelor's degree is the completion of the upper division requirements associated with a first bachelor's degree (except for the BEd degree – see "Bachelor of Education as a Second Degree" on page 200). Prior completion of lower division prerequisites may also be required or may be waived at the discretion of the department or program in which the further degree is being sought.

A student may not enrol in a further bachelor's degree program in a subject in which she/he already holds a degree. A student who has a minor (or equivalent) in a particular subject may enrol in a further degree with a major or honors program in that subject.

Credit earned towards a previous degree or diploma may not be used toward a further bachelor's degree. Transfer credit may be given for additional courses completed beyond the previous credential but prior to Simon Fraser University admission. However, the normal upper division residency requirement applies: at least two thirds of the upper division course work for the degree must be completed at Simon Fraser University. Some faculties may have additional residency requirements.

Faculties may limit inter-faculty transfer for second degree students.

Students admitted to second degrees are deemed to have met all of the breadth requirements (designated and undesignated), three units of the Q requirements and the lower division W requirement. (The remaining W and Q courses must be three units each. The W course must be upper division.)

For more information, see "Writing, Quantitative, and Breadth Requirements" on page 7.

### Post Baccalaureate Diploma Program

A diploma program should, in general, consist of regular upper division university courses; graduate courses may be included. The study program should be the equivalent of one full year or more of university study (30 or more units). A first university degree or the equivalent is normally a prerequisite, but, if

stipulated, mature applicants whose experience makes them particularly suited to a program may also be admitted.

#### Program Admission Requirements

- Completion of a recognized bachelor's degree (in any field of study) with a minimum graduation grade point average of 2.0 from a university in British Columbia or with a minimum graduation grade point average of 2.4 from a university outside of British Columbia, or equivalent.
- Students applying to the University for admission are required to meet undergraduate admission deadlines. Application forms should be accompanied by official documents and a statement of objectives in undertaking a diploma program.

#### Program Requirements

- Successful completion of an approved program comprised of 30 units of third and fourth year courses, and some graduate courses if appropriate.
- At least 15 units must be in a discipline or subject area which most closely fits the learning goals of the student.
- Minimum grade point average of 2.5 on courses applied toward the diploma.
- Completion of lower division prerequisites, if required.
- Completion of the diploma within five years of admission to the program.

#### Notes

- Students may complete more than one post baccalaureate diploma program.
- Students should consult with the diploma program advisor regarding availability of courses.
- Some of the program courses have prerequisites not included in the diploma requirements. Students are responsible for satisfying the prerequisites of all courses in their programs.
- Program applicants will need to refer to the current university calendar for detailed information concerning application and enrolment procedures, fees, program requirements, and course descriptions.
- There are program advisors in each department for that department's diploma programs.

#### Transfer Credit

- Transfer credit for work done at other institutions, before or after admission to the program, may be approved toward fulfilment of the program provided that at least 18 of the 30 required upper division units, including at least nine units in the student's area of concentration, be completed at Simon Fraser University.
- Transfer credit is normally only valid for approved courses completed within ten years of the diploma student's completion term.
- Transfer credit for use toward the diploma is granted only on approval of the registrar, the appropriate faculty post baccalaureate diploma committee, and the dean of the appropriate faculty.

- Credit for work done at Simon Fraser University or transfer credit for work done elsewhere prior to admission to the program may be approved provided that at least 15 of the 30 required upper division units, including at least eight units in the student's area of concentration, normally be completed after admission to the program.
- Units applied to one diploma may not be applied to another Simon Fraser University certificate or diploma or degree, and vice versa.

### Certificate Program

A certificate program consists mainly of regular lower division courses; upper division courses may be included. The program should be the equivalent of between one half and one full year of university study (18-30 units).

#### Program Admission Requirements

- Prospective students must apply to Simon Fraser University for admission and meet the normal admission requirements prior to undertaking a certificate program.

#### Program Requirements

- Students must maintain a minimum grade point average of 2.0 calculated on all courses applied to the certificate that are completed at Simon Fraser University. Duplicate courses are counted only once.

#### Note

- Units applied to one certificate may be applied also to major or minor programs of a bachelor's degree under the normal regulations governing those programs but may not be applied to another Simon Fraser University certificate or diploma.
- Some of the courses have prerequisites not included in the certificate requirements. Students are responsible for satisfying the prerequisites of all courses in their programs. Prerequisite information can be found in the University calendar in the course descriptions section.
- There are program advisors in each department or faculty for the certificate programs. Students intending to pursue a certificate should consult with the program advisor.
- Any student admitted to a certificate program who subsequently transfers to a degree program will need to complete the WQB degree requirements. See "Writing, Quantitative, and Breadth Requirements" on page 7.

### Co-operative Education

A co-operative education program consists of four or five work terms to be completed while doing regular academic terms. Co-op courses are granted additive credit. See "Additive Credits" on page 212 and "Additive Credit" on page 27.

## Undergraduate Degree Requirements

Students admitted to the University beginning in the fall 2006 term must meet writing, quantitative, and breadth requirements as part of any degree program they may undertake.

### Writing, Quantitative, and Breadth Requirements

All students completing an undergraduate degree program must complete a total of 36 units of courses designated as meeting writing, quantitative, or breadth requirements with a grade of C- or better.

#### Writing Requirements

Courses with a "W" designation are writing intensive, and will assist students to learn the course content through the process of writing assignments. These courses will help students to improve their writing abilities and overall communication skills.

Writing-designated courses have the letter "W" in their title, and are also identified at the end of the course description, just after the prerequisite information. For example (italics added):

- CRIM 300W-3 Current Theories... Criminology  
A detailed examination of current theories...  
Prerequisite: CRIM 101. *Writing.*

Students must achieve a grade of C- or better in a W course to obtain the W credit.

#### Lower Division W Requirement

- one lower division W course (3 units or more)

Students are advised to complete their first W course within their first 60 units of a degree program.

Students transferring from a BC college with 60 units should complete a transferable W course prior to admission to Simon Fraser University; alternatively they may enrol in an upper division W course at the University as soon as possible after admission.

**Upper Division W Requirements**

- one upper division W course, normally in the major subject (3 units or more)

The upper division W course must be completed at Simon Fraser University.

For a list of W courses, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

**Quantitative Requirements**

Quantitative-designated courses, also known as “Q” courses, will assist students to develop quantitative (numerical, geometric) or formal (deductive, probabilistic) reasoning, and to develop skills in practical problem solving, critical evaluation, or analysis.

Q courses are identified by the word “Quantitative” at the end of the course description, just after the prerequisite information. For example (*italics added*):

- BUS 251-3 Financial Accounting I  
An introduction to financial accounting...  
Prerequisite: 12 units. *Quantitative*.

Students must achieve a grade of C- or better in Q courses to obtain the Q credit.

**Lower/Upper Division Q Requirements**

- two Q courses, lower or upper division (total 6 units or more)

Students are advised to complete their first Q course within their first 60 units of a degree program.

Students transferring to Simon Fraser University from a BC college with 60 units are recommended to complete a transferable Q course prior to admission to Simon Fraser University, or to enrol in a Q course at Simon Fraser University as soon as possible after admission.

For a list of Q courses, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

**Breadth Requirements**

Breadth courses, also known as “B” courses, will expose students to concepts and ideas from a range of disciplines and perspectives, and will offer students an opportunity to examine and assess their values, beliefs and commitments.

B-designated courses are identified at the end of the course description by the words *Breadth-humanities (B-Hum)*, *Breadth-Social sciences (B-Soc)*, or *Breadth-science (B-Sci)* just after the prerequisite information. For example (*italics added*):

- CMNS 110-3 Introduction to Communication...  
An introduction to selected theories about human... communication. *Breadth-Social sciences*

Students complete a total of 24 units of breadth courses, and must achieve a grade of C- or better in B courses to obtain the B credit.

**Six Designated Breadth Courses**

Students may complete designated breadth courses outside their major throughout their degree programs, but are advised to complete them as early as possible in their program.

***Breadth-humanities***

- two courses labelled as Breadth-humanities (B-Hum, 6 units)

***Breadth-science***

- two courses labelled as Breadth-science (B-Sci, 6 units)

***Breadth-Social science***

- two courses labelled as Breadth-Social sciences (B-Soc, 6 units)

**Two Additional Breadth Courses**

- two courses outside the student's major program (undesigned, 6 units)

These additional courses may or may not be designated as breadth, and in most cases will fulfil the particular faculty or program breadth requirements.

The Faculty of Arts and Social Sciences requires two further breadth courses (see “Writing, Quantitative, and Breadth Requirements” on page 90).

Only courses outside of the student's major may count as breadth. For example, a student majoring in engineering science will not be able to count ENSC 100 as one of their B-Sci requirements. Similarly, students majoring in English will not be able to count ENGL 101 as one of their B-Hum requirements.

For a list of B courses, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

**Multiple W, Q, and B Designations**

Some courses may fulfil more than one requirement. For instance, a course may count as both Q and B, or W and B, or W and Q, or W, Q and B, and students will receive all designation credit. No course, however, may fulfil two B requirements. Some courses may have multiple B designations (such as B-Soc and B-Hum), but students must decide which designation of a course to use in order to fulfil their requirements. For example, when completing Archaeology 232, a student must decide if they are completing this course to fulfil B-Hum or B-Soc, even though the course will appear on the transcript with both labels.

Students who change degree programs may need to re-visit any breadth designations they have previously chosen in light of their new program requirements.

**Foundations Courses**

The content of W and Q courses presumes that students have met a basic competency standard. Two Foundations courses are available to students who are not ready for W and/or Q courses:

- Foundations of Academic Literacy (FAL), and
- Foundations of Analytical and Quantitative Reasoning (FAN)

Students will be advised at admission if they are required to enrol in one of both of these courses.

Students required to enrol in one or both of these courses must complete the course(s) within their first three terms at Simon Fraser University (normally 45 units). A grade of C or better is required to progress from FAL into W courses or FAN into Q courses. Students may attempt these courses no more than twice. If the required grade of C is not achieved in two attempts or within three enrolled terms at the University, students will be blocked from enrolling in further course work at Simon Fraser University until competency in English and Math are demonstrated.

This competency can be demonstrated by:

- retaking English 12 or high school Math, or
- achieving a score of 4 on the essay section of the LPI (with a minimum of 50% on each of the subsections for English competency), or
- achieving a score of 20 out of 30 on the Simon Fraser University Q placement test (if the student

has not completed this test earlier) for mathematics competency, or

- by enrolling in transferable college courses (see “Admission from British Columbia and Yukon Secondary Schools” on page 20).

Students transferring to Simon Fraser University with 60 units are recommended to enrol as soon as possible in FAL or FAN if they are required to complete one or both of these courses.

**Foundations of Academic Literacy (FAL X99)**

This course introduces students to the kinds of reading and writing they will encounter in lower-division courses across university disciplines. (See “Foundations of Academic Literacy FAL” on page 382 within the *Course Catalogue* section of this Calendar.)

Units earned in FAL X99 are additive, and do not count towards the total units required for a degree. The grade received in FAL X99 is included in calculation of the cumulative grade point average. Students must receive a C or better in this course to proceed to a W course. Students may attempt this course twice.

**Foundations of Analytical and Quantitative Reasoning (FAN X99)**

This course is for students who need to upgrade their quantitative background in preparation for Q courses, or for those who wish to refresh their skills after several years away from mathematics. (See “Foundations of Analytical and Quantitative Reasoning FAN” on page 382 within the *Course Catalogue* section of this Calendar.)

Units earned in FAN X99 are additive, and do not count towards the total units required for a degree. The grade received in FAN X99 is included in calculation of the cumulative grade point average. Students must receive a C or better in this course to proceed to a Q course. Students may attempt this course twice.

Free Q placement testing is also available. For information on the Quantitative Placement Test, visit [www.math.sfu.ca](http://www.math.sfu.ca) and look for the Q Test link. Students who receive a pass on this test may bypass FAN X99 and may enrol directly in a Q course.

**Special WQB Requirements****Joint or Double Majors, Honors and Extended Minors**

Students completing joint or double majors and honors, or two extended minors, will not be required to complete double W, Q, and B requirements. W, Q, and B designated courses in either one or both disciplines of the major, honors or minor programs may be used to satisfy the writing, quantitative and breadth requirements. Undesignated breadth requirements can also be met within the two disciplines. For example, a student completing a double major in English and Physics may count

WQB Graduation Requirements		
A grade of C- or better is required to earn W, Q or B credit.		
Requirement	Units	Notes
<b>W</b> - Writing	6	Must include at least one upper division course, normally within the student's discipline
<b>Q</b> - Quantitative	6	Q courses may be lower or upper division
<b>B</b> - Breadth	18	Must be outside the student's major, and may be lower or upper division 6 units Social sciences: B-Soc 6 units humanities: B-Hum 6 units sciences: B-Sci
	6	6 units outside the student's major program (may or may not be B-designated courses, and will likely help fulfil individual degree program requirements)

B-science designated Physics courses as B-science, and B-humanities designated English courses as B-humanities, W designated English for the lower and upper division W requirement, and Q designated Physics courses toward the Q requirement.

### Second Degrees

Students admitted to a second degree program are deemed to have met all of the breadth requirements (designated and undesignated), three units of the Q requirements, and the lower division W requirement. (The remaining W and Q courses must be three units

each. The W course must be upper division.) See "Second Bachelor's Degrees" on page 7.

### WQB Transfer Credit from College

BC college courses that transfer to Simon Fraser University courses for credit and are certified as W, Q and B will be labelled as W, Q and B on the student's Simon Fraser University record. Please review the BC Transfer Guide ([www.bctransferguide.ca](http://www.bctransferguide.ca)) to determine if transferable courses receive designations.

Students transferring to Simon Fraser University from BC colleges are recommended to complete some Q and B courses at the college level, and a lower division W course if available.

Students transferring to Simon Fraser University from all other universities, or from colleges outside of BC, may have their transfer credit reviewed for WQB designations. Transfer courses must have been completed from September 2004 onward. Courses completed prior to September 2004 will not be reviewed for WQB designation.

## Graduate Programs

Programs of advanced learning and research leading to master's and doctoral degrees are offered.

Doctoral programs engage students in research, either independently or in collaboration with larger research groups. Master's programs introduce

students to the research process or prepare them with critical and analytical skills for the professions. Graduate diploma programs provide specialized combinations of courses for students who wish to upgrade their knowledge and skills at an advanced

level. For a complete list of all graduate and undergraduate degrees offered by the University, See "University Degrees" on page 9.

## University Degrees

### Honorary Degrees

doctor of fine arts *honoris causa* DFA  
doctor of laws *honoris causa* LLD  
doctor of letters *honoris causa* DLitt  
doctor of science *honoris causa* DSc

### Degrees

#### Faculty of Applied Sciences

bachelor of applied science (honors)  
bachelor of applied science  
bachelor of arts (honors)  
bachelor of arts  
bachelor of general studies (applied sciences)  
bachelor of science (honors)  
bachelor of science  
master of applied science  
master of arts  
master of engineering  
master of science  
doctor of philosophy  
doctor of philosophy under special arrangements

#### Faculty of Arts and Social Sciences

bachelor of arts (honors)  
bachelor of arts (joint honors)  
bachelor of arts  
bachelor of general studies  
master of arts  
master of arts in liberal studies  
master of public policy  
master of urban studies  
doctor of philosophy  
doctor of philosophy under special arrangements

#### Faculty of Business Administration

bachelor of business administration (honors)  
bachelor of business administration  
master of business administration  
master of financial risk management  
doctor of philosophy  
doctor of philosophy under special arrangements

#### Faculty of Communication, Art and Technology

bachelor of arts (honors)  
bachelor of arts  
bachelor of fine arts  
bachelor of science (honors)

bachelor of science  
bachelor of science (information technology, Tech BC)  
bachelor of science (interactive arts, Tech BC)  
master of arts  
master of fine arts  
master of publishing  
master of science  
doctor of philosophy  
doctor of philosophy under special arrangements

#### Faculty of Education

bachelor of education (honors)  
bachelor of education  
bachelor of general studies (education)  
master of arts  
master of education  
master of science  
doctor of education  
doctor of philosophy  
doctor of philosophy under special arrangements

#### Faculty of Environment

bachelor of arts (honors)  
bachelor of arts  
bachelor of science (honors)  
bachelor of science  
master of arts  
master of resource management  
master of resource management (planning)  
doctor of philosophy  
doctor of philosophy under special arrangements

#### Faculty of Health Sciences

bachelor of arts  
bachelor of arts (honors)  
bachelor of science  
bachelor of science (honors)  
master of public health  
master of science

#### Faculty of Science

bachelor of science (honors)  
bachelor of science  
master of environmental toxicology  
master of pest management  
master of science  
doctor of philosophy  
doctor of philosophy under special arrangements

### Certificates and Diplomas

#### All Faculties

post baccalaureate diploma

#### Faculty of Applied Sciences

certificate in computing studies  
post baccalaureate diploma in computing science

#### Faculty of Arts and Social Sciences

certificate in African studies  
certificate in Chinese studies  
certificate in criminology (general)  
certificate in criminology (advanced)  
certificate in ethnic and intercultural relations  
certificate in explorations in the arts and social sciences  
certificate in family studies  
certificate in First Nations studies research  
certificate in First Nations language proficiency  
certificate in French Canadian studies  
certificate in French language proficiency  
certificate in German studies

certificate in teaching ESL linguistics  
certificate in urban studies  
post baccalaureate diploma  
post baccalaureate diploma in criminology  
post baccalaureate diploma in First Nations studies  
post baccalaureate diploma in French and education  
post baccalaureate diploma in gerontology  
post baccalaureate diploma in humanities  
post baccalaureate diploma in legal studies  
post baccalaureate diploma in social policy issues  
post baccalaureate diploma in sustainable community development  
post baccalaureate diploma in teaching English as a second language  
graduate certificate in Latin American studies  
graduate diploma in urban studies

#### Faculty of Business Administration

certificate in international experiential learning  
graduate diploma in business administration

## Faculty of Communication, Art and Technology

post baccalaureate diploma in communication

## Faculty of Education

certificate in literacy instruction  
certificate in professional practices  
post baccalaureate diploma (general)  
post baccalaureate diploma in counselling and human development  
post baccalaureate diploma in early childhood education  
post baccalaureate diploma in special education

post baccalaureate diploma in environmental education  
graduate diploma in advanced professional studies in education

## Faculty of Environment

certificate in spatial information systems  
certificate in sustainable community development  
certificate in urban studies  
post baccalaureate diploma in sustainable community development  
graduate certificate in development studies  
graduate diploma in quantitative methods in fisheries management

## Faculty of Health Sciences

graduate diploma in global health

## Faculty of Science

certificate in actuarial mathematics  
certificate in earth sciences  
certificate in forestry geoscience  
certificate in health and fitness studies  
certificate in applied human nutrition  
post baccalaureate diploma in biological sciences  
post baccalaureate diploma in kinesiology  
graduate diploma in bioinformatics  
graduate diploma in quantitative methods in fisheries management

# Academic Calendar of Events

## 2009 Fall Term

### September

- 7 Mon LABOR DAY. Offices closed.
- 8 Tues Classes commence.  
Last day for students completing degree requirements during summer to cancel application to graduate in October.
- 14 Mon Deadline for submission of undergraduate grade changes from 2009 summer term, summer session and intersession.  
Deadline for undergraduate applications for reactivation to the fall term.
- 21 Mon Last day for graduate students to enrol.  
Last day for graduate students to drop courses with no notation on transcript.
- 30 Tues Last day for receipt of grades deferred from previous term for graduate students.  
Deadline for application for undergraduate admission or readmission to the 2010 spring term.

### October

- 8 Thurs Fall convocation.
- 9 Fri Fall convocation.
- 12 Mon THANKSGIVING DAY. All classes cancelled. Offices closed.
- 13 Tues Last day for undergraduates to drop courses except under special procedures applicable in extenuating circumstances.
- 23 Fri Deadline for submission of undergraduate application for graduation without a late fee for students completing requirements by the end of the 2009 fall term.

### November

- 2 Mon Last day for graduate students to drop courses without academic penalty except under special procedures applicable in extenuating circumstances.
- 11 Wed REMEMBRANCE DAY. All classes cancelled. Offices closed.
- 23 Mon Last day for graduate students to drop courses under special procedures applicable in extenuating circumstances.

### December

- 2 Wed Last day for undergraduates to drop courses under special procedures applicable in extenuating circumstances.
- 7 Mon Classes end.
- 9 Wed Examination period for undergraduates begins.
- 11 Fri Final deadline for submission of undergraduate application for graduation (with a late fee) for students completing requirements by the end of the 2009 fall term.
- 16 Wed Grades available on the student information system, as they are received (approximately five working days after the final examination).
- 18 Fri Examination period for undergraduates ends.
- 23 Wed Deadline for submission of all graduate degree requirements.
- 25 Fri CHRISTMAS DAY. Offices closed.
- 26 Sat BOXING DAY. Offices closed.

## 2010 Spring Term

*Deadlines are affected by the February 15-26 Olympic Games break*

### January

- 1 Fri NEW YEAR'S DAY. Offices closed.
- 4 Mon Classes commence.  
Last day for undergraduate students completing degree requirements in fall to cancel application to graduate.
- 8 Fri Deadline for undergraduate applications for reactivation to the spring term.  
Deadline for submission of undergraduate grade changes from the 2008 fall term.
- 15 Fri Deadline for submission of application to the professional development program (PDP) for 2010 fall term.
- 18 Mon Deadline for submission of graduate student application to graduate for students completing requirements by the end of the 2009 fall term.  
Last day for graduate students to enrol.  
Last day for graduate students to drop courses with no notation on transcript.
- 29 Fri Last day for receipt of grades deferred from previous term for graduate students.

### February

- 1 Mon Deadline for application for undergraduate admission or readmission to the 2010 summer term, intersession and summer session.
- 5 Fri Last day for undergraduates to drop courses except under special procedures applicable in extenuating circumstances.  
Deadline for submission of undergraduate application for graduation without a late fee, for students completing requirements by the end of the 2010 spring term.
- 15-26 Olympic Games break. All classes cancelled. Offices open.

### March

- 1 Mon Deadline for application for BC, Canadian and US grade 12 Early Admission students to the 2010 fall term.
- 22 Mon Last day for graduate students to drop courses without academic penalty except under special procedures applicable in extenuating circumstances.

### April

- 2 Fri GOOD FRIDAY. All classes cancelled. Offices closed.
- 5 Mon EASTER MONDAY. All classes cancelled. Offices closed.
- 13 Tues Last day for undergraduates and graduates to drop courses under special procedures applicable in extenuating circumstances.
- 16 Fri Classes end.  
Deadline for submission of graduate student application to graduate for students completing requirements by the end of the 2010 spring term.  
Final deadline for submission of undergraduate application for graduation (with a late fee) for students completing requirements by the end of the 2010 spring term.

- 18 Sun Examination period for undergraduates begins.
- 23 Fri Grades available on the student information system as they are received (approximately five working days after the final examination).
- 28 Wed Examination period for undergraduates ends.  
Deadline for submission of all graduate degree requirements, including library submission.
- 30 Fri Deadline for application for undergraduate admission or readmission to the 2010 fall term.

## 2010 Summer Term

(including intersession, May-June and summer session, July-August)

### May

- 12 Wed Summer term and intersession classes commence.  
Last day for students completing degree requirements in 2010 spring term to cancel application to graduate.
- 14 Fri Deadline for submission of application to the professional development program (PDP) for 2011 spring term.
- 19 Wed Deadline for submission of undergraduate grade changes from the 2010 spring term.  
Deadline for undergraduate applications for reactivation to the summer term.  
Last day for undergraduates to drop intersession courses except under extenuating circumstances.
- 24 Mon VICTORIA DAY. All classes cancelled. Offices closed.
- 27 Tues Last day for graduate students to enrol.  
Last day for graduate students to drop courses with no notation on transcript.
- 31 Mon Last day for receipt of grades deferred from previous term for graduate students.

### June

- 15 Tues Spring convocation.
- 16 Wed Spring convocation.  
Last day for undergraduates to drop summer term courses except under special procedures applicable in extenuating circumstances.
- 17 Thurs Spring convocation.
- 18 Fri Spring convocation.  
Deadline for submission of undergraduate application for graduation without a late fee for students completing requirements by the end of the 2010 summer term.
- 22 Tues Intersession classes end.
- 23 Wed Last day for undergraduates to drop intersession courses under special procedures applicable in extenuating circumstances.
- 29 Tues Last day of Intersession.
- 30 Wed Summer session classes for undergraduates commence.

### July

- 1 Thurs CANADA DAY. All classes cancelled. Offices closed.

12 Mon	Last day for graduate students to drop courses without academic penalty except under special procedures applicable in extenuating circumstances.	6 Fri	Last day for undergraduates to drop summer session courses except under extenuating circumstances.		Final deadline for submission of undergraduate application for graduation (with a late fee) for students completing requirements by the end of the 2010 summer term.
<b>August</b>		11 Wed	Summer term classes end. Summer session classes for undergraduates end.	22 Sun	Summer term and summer session examination period for undergraduates ends.
2 Mon	BC DAY. All classes cancelled. Offices closed.	13 Fri	Summer term and summer session examination period for undergraduates begins. Deadline for submission of graduate student application to graduate for students completing requirements by the end of the 2010 summer term.	27 Fri	Deadline for submission of all graduate degree requirements. Grades available on the student information system, as they are received (approximately five working days after the final examination).
3 Tues	Last day for graduate students to drop summer term courses under special procedures applicable in extenuating circumstances.

778.782.4176 Tel  
778.782.5732 Fax

# Admission and Readmission

Simon Fraser University welcomes applications from Canadian and International students. All new students must apply for and be granted admission to the University. An admission offer is required before students may enrol in courses for academic credit.

Readmission information is given later in this section.

Direct all admission related enquiries to Admissions, Student Services, Simon Fraser University, 8888 University Drive, Burnaby, BC, V5A 1S6, 778.782.6930 Tel, 778.782.4969 Fax, <http://students.sfu.ca>

An advising service is available for potential applicants. Call 778.782.3397 for an appointment.

**When eligible applicants exceed the number that can be accommodated, the Simon Fraser**

**University reserves the right to select from among the qualified applicants.**

## Protection of Privacy

Simon Fraser University gathers and maintains information used for the purposes of admission, enrolment and other fundamental activities related to being a Simon Fraser University community member and to attending a public post-secondary institution in the Province of British Columbia.

In submitting an application for admission, all applicants are advised that the information they provide and any other information placed into the student record will be protected and used in compliance with British Columbia's Freedom of Information and Protection of Privacy Act (1992).

All British Columbian applicants will be asked to provide their BC personal education numbers (PEN) at the time of application. All others will be assigned a PEN by the British Columbia Ministry of Advanced Education, Training and Technology. Its uses are restricted to research and program evaluation. No identifiable personal information will be released.

## Retention of Documents

The documents which students supply to support admission applications will be retained for three terms following the term to which application is made. Then, application forms, transcripts and other materials related to applications will be destroyed. Irreplaceable documents will be returned to the applicant if requested at the time of application. All other documents become the property of the University.

## Introduction

This section contains five main areas.

- The **admission process** describes the 'how and when' of the various stages involved in applying to the University.

- **All applicants** details those admission requirements or policies applicable to any applicant.
- The next three sections — **British Columbia, Canada and international** — provide admission requirements for the respective areas. Within each

section, requirements are provided for *secondary school, college, and university* level applicants.

- Finally, **readmission** explains the requirements and processes to be followed by previously admitted students wishing to re-commence their studies.

## Admission Process

### How to Apply

To apply for admission, visit <http://students.sfu.ca>, which links to myBCcampus (the post-secondary application service of BC). There, you begin your application by entering basic academic and biographical data. From myBCcampus, the application continues to the Simon Fraser University part of the web application where applicants insert their intended program of studies. Applicants can pay all application fees by credit card. After the application is acknowledged, and if the applicant is a Canadian grade 12 student applying for the fall term, the applicant will be invited to report grades online.

Application fees may be sent at the time application is made or soon after. If payment is made later, quote the reference number given to the applicant when the submission is acknowledged by the University.

### Required Documents

The following supporting official documents must also be submitted from the issuing institution before any application will be considered.

- official copy of the appropriate school leaving certificate (e.g. Canadian Secondary School transcript of grades)
- official transcripts from all post-secondary institutions attended, whether completed or not
- official reports of any standard tests written.

All documents must be originals (photocopies not accepted). Replaceable documents submitted with applications become the University's property and are not returned. Irreplaceable documents are returned to the applicant if requested at the time of application.

Official translations, certified by an educational or embassy official, or made by a certified translator are required for records not in English or French. For applicants residing in BC, translations should be completed by the Society of Translators and

Interpreters of BC ([www.stibc.org](http://www.stibc.org)), or MOSAIC Translation Services at [www.mosaic-trans.com](http://www.mosaic-trans.com).

Submit applications and any available documents as early as possible but not more than 12 months before the first term. See below for deadlines for receipt of applications and in the *Academic Calendar of Events* (page 12). Applications received after the published deadline may be evaluated selectively at the discretion of the associate director, university admissions.

### English Language and Literacy Admission Requirement, and Quantitative and Analytical Skills Requirement

These requirements apply to applicants seeking entry to degree programs (see "English Language and Literacy Requirements" on page 18 and "Quantitative and Analytical Skills Requirements" on page 19).

## Application Deadlines

Term	Application Deadline
spring 2010	October 1, 2009
summer 2010	February 2, 2010
fall 2010	April 30, 2010
spring 2011	September 30, 2010
summer 2011	February 1, 2011

## Application Fee

### Level 1

Each time an applicant applies for admission or readmission, a \$45 application fee is required. This fee, non-refundable and not applicable to tuition fees, must accompany the application for admission or be paid soon after making an application.

### Level 2

A \$100 application fee is required for all applicants whose academic records, in whole or in part, originate outside of British Columbia. (A level 1 fee is assessed if the documents originate from a Canadian high school, or if the applicant is participating in a recognized exchange program between Simon Fraser University and another institution.) This fee is non-refundable and not applicable to tuition fees.

## Offers of Admission

Admission offers are valid only for one term. Applicants who are admitted but do not enrol in classes, or who enrol but withdraw from classes before or during their first term, must apply again to attend a subsequent term. On an exception basis, an admission offer to a subsequent term may be requested by completing the online admission deferral form with supporting documentation.

## Transfer Credit

Transfer credit is granted on the basis of work at another recognized institution; transfer units reduce the total required units for a Simon Fraser University degree, diploma or certificate. Transfer credit should not be confused with advanced standing. Transfer credit is often given without any concomitant advanced standing; the reverse may also be true.

### Regulations

In most cases, total transfer and course challenge credit may not exceed 60 units, and may not include more than 15 as upper division work. Within these limits, units may be transferred for all courses passed, which are acceptable under the University's policies.

Transfer credit is not used to calculate the cumulative grade point average (CGPA). Transfer credit for ungraded passes (e.g. pass/fail) will be granted only if the course has been previously articulated for transfer

credit and if all students in the course are graded in a similar manner. Transfer credit is not granted for credit assessed by other institutions for knowledge acquired outside formal instruction, but course challenge credit may be obtained.

Students who are attending, or who have attended Simon Fraser University should note that in addition to these regulations

- work completed after initial enrolment must be passed with a grade of C (2.0 or 60%) or higher to receive transfer credit; and
- admitted students who wish to complete courses at another institution for transfer towards their Simon Fraser University program must obtain advance permission using the Letter of Permission form from Student Services or <http://students.sfu.ca/forms>.

See "Student Enrolment" on page 26 for information.

Students completing certificates or diplomas should note that each program has its own specific restrictions on transfer credit permitted. Consult the appropriate Calendar sections for these limitations.

Special transfer credit regulations apply to the bachelor of general studies, bachelor of education, bachelor of applied science in engineering science, honors degree programs and to students attending other universities on formal exchange programs. Refer to the "Faculty of Arts and Social Sciences" on page 88, "Transfer Credit" on page 199 for information regarding the Faculty of Education, and "Faculty of Applied Sciences" on page 76.

Courses transferred, together with those subsequently completed at the University, must meet the general and specific requirements of the faculty and department in which the student chooses a major or honors. Some awarded transfer credit may be designated 'general elective credit.' Individual faculties may restrict the general elective credit that may be counted toward a degree. The applicant should not assume that he/she will complete the degree with a number of units equal to the difference between total units required and transferred units. Although this calculation will usually be correct for a student who remains within a field of study, it will not necessarily be correct for one who changes fields.

Transfer credit is designated as type one, two, or three. Type one is **assigned** credit, used for a Simon Fraser University equivalent. Type two is **unassigned** credit in a subject area, used for courses without a Simon Fraser University equivalent, but which are acceptable to a department as fulfilling subject requirements for a general or honors degree in that department. For example, 'BISC 1XX 3' means that three units in biological sciences have been granted. Type three is **general elective credit**, used for courses which are judged to be transferable but do not fulfil specific faculty departmental requirements.

General elective credit is counted toward the total required for the degree. Individual faculties may restrict the amount of general elective credit that may be counted toward a degree in that faculty.

Departments may require students to repeat prerequisite courses for which they have received transfer for a D grade. The repeated courses show on the student's permanent record but double credit will not be granted.

## Advanced Standing

Advanced standing is placement to a certain level in a subject area granted on admission. The department concerned examines the applicant's previous work, or asks the applicant to complete a placement test, and then places the applicant at a certain level in the sequence of courses in the department.

## Program Approval

Newly admitted students who wish to complete either a certificate, post baccalaureate diploma or a further undergraduate degree must obtain program approval from their faculty or department prior to enrolling.

## Enrolment Limitations

Completion of minimum requirements does not guarantee admission to any course, program, department, school or faculty. When the number of qualified applicants exceeds the number that, in the opinion of the University, can be accommodated, the University reserves the right to select from among qualified applicants.

## Admission and Approval into an Academic Program

Students may apply for academic program admission in one of eight faculties: applied sciences; arts and social sciences; business administration; communication, art and technology; education; environment; health sciences; and science.

Applicants may indicate an alternate program if they are not selected to their first choice of program. Normally, this alternate program will be in a different faculty. For example, a first choice may be the BBA program in the Faculty of Business Administration. Due to insufficient space, this is not approved. The second choice is the BSc program in the Faculty of Science. If this is not approved either, the University might choose to offer the applicant admission to a program that he or she did not choose. In this example, the student is offered entry to the BA program in the Faculty of Arts and Social Sciences. The student may enrol in courses, and in a subsequent term, may seek entry to either the BBA or BSc, or may complete a BA in the Faculty of Arts and Social Sciences.

## All Applicants

These admission requirements are extracted from the more complete regulations approved by senate. Regulations interpretation rests with the senate committee on undergraduate studies. The University reserves the right to reject or accept any applicant.

All percentages are based on a pass mark of 50%. For schools and colleges operating on a pass mark other than 50%, the percentage required for admission is adjusted. Applicants for off-campus and distance education programs must follow the same application procedures and meet the same requirements as regular on-campus students. Specific details on these programs are available in brochures published each term (see *Continuing Studies*).

## English Language and Literacy Requirements

All applicants to Simon Fraser University must demonstrate competence and literacy in the English language both prior to admission and as part of their undergraduate degree program. There is a minimum threshold that is required to be considered for admission and a minimum threshold that is required to register in SFU Writing Intensive (W) courses.

## English Language and Literacy Admission Requirement

English is the language of instruction at Simon Fraser University. All applicants, regardless of country of

origin or citizenship status, will be required to demonstrate competence and literacy in the English language prior to admission. Competence is expected in all four of the following skills: listening, reading, speaking and writing.

Applicants to undergraduate programs must demonstrate English language competence and literacy in one of several ways as listed below.

- obtain a minimum grade of 60% in English 12 or English Literature 12 completed at a Canadian high school; or
- obtain a minimum grade of 60% in an equivalent to English 12 or English Literature 12 course completed at an eligible international secondary school that uses English as the language of

instruction but operates in a country where the primary language is not English; or

- obtain a minimum C- grade in an English (ENGL) course or in a certified W course for which Simon Fraser University would grant transfer credit. To receive transfer credit, the course must be completed at a post-secondary institution in which the language of instruction and examination is English; or
- obtain a satisfactory score on one of the following English Language Proficiency tests\* (IELTS is preferred):
  - International English Language Testing System (IELTS) with a minimum score of 6.5 on the Academic Modules; or
  - TOEFL iBT (Test of English as a Foreign Language internet based test) with an overall score of 88 or better with a minimum score of 20 in each of the four components (listening, speaking, writing, reading); or
  - TOEFL CBT (Test of English as a Foreign Language computer based test) with a minimum score of 230 including a minimum essay score of 4.5; or
  - TOEFL CBT with a minimum score of 250; or
  - successful completion of the Simon Fraser University English Bridge Program (please see English Bridge Program below)

\*applicants who have written the IELTS or the TOEFL but whose score does not meet the minimum acceptable score as listed above may be eligible for the English Bridge Program.

### Writing Intensive Course Degree Requirement

All students must successfully complete at least two Writing Intensive (W) courses to graduate with a bachelor's degree. To register directly in a W course, students must have achieved one of the following.

- a minimum grade of 75% in English 12 or English Literature 12 (or the equivalent); or
- a minimum grade of C- in a post-secondary English or certified W course for which Simon Fraser University grants transfer credit.

Applicants who present an English 12 or English Literature grade of 60%-74% and who do not have eligible post-secondary transfer credit as listed above; and students who present an IELTS score below 6.5; and students who only present a TOEFL score, must complete one of the following before they may register in a W course.

- the Language Proficiency Index (LPI) with a minimum score of four on the essay section and 50% on all other parts; or
- Foundations of Academic Literacy (FAL X99-4) with a minimum C grade. This course must be completed within the first three enrolled terms at Simon Fraser University (normally 45 units).

For more information, please refer to Simon Fraser University's writing requirements at [http://www.sfu.ca/ugcr/For\\_Students/](http://www.sfu.ca/ugcr/For_Students/)

### Quantitative and Analytical Skills Requirements

All applicants must demonstrate quantitative and analytical skills competence both prior to admission and as part of their undergraduate program. There is a minimum threshold that is required to be considered for admission, and there is a minimum threshold required to register in Quantitative (Q) courses.

#### Quantitative Admission Requirement

Applicants must demonstrate competence in quantitative and analytical skills in one of several ways as listed below.

- obtain a minimum grade of 60% or higher in Principles of Math 11, Principles of Math 12, or Applications of Math 12 (or their equivalents); or
- obtain a minimum grade of C- in a three-unit math course or certified Q course for which Simon Fraser University grants transfer credit.

### Quantitative and Analytical Course Degree Requirement

All students must successfully complete at least two Quantitative and Analytical (Q) courses to graduate with a bachelor's degree. To register in a Q course, students must have achieved one of the following.

- a minimum grade of 70% in Principles of Math 11, Principles of Math 12, or Applications of Math 12 (or their equivalents); or
- a minimum grade of C- in a post-secondary math or certified Q course for which Simon Fraser University would grant transfer credit.

Applicants who present a high school math grade of 60%-69% and who do not have eligible post-secondary transfer credit as listed above must complete one of the following before they may register in a Q course.

- the Quantitative placement test with a minimum grade of 20 out of 30. The test must be written within the first term at Simon Fraser University; or
- Foundations of Analytical and Quantitative Reasoning (FAN X99-4) with a minimum C grade. This course must be completed within the first three enrolled terms at the University (normally 45 units).

### English Bridge Program

This ten week intensive English program is offered by the Language Training Institute in the Faculty of Arts and Social Sciences, on the main Burnaby campus. Emphasizing the English language skills needed in the academic setting, the program is for students who are otherwise fully admissible but who do not completely meet the English language requirements.

Applicants who have satisfied the academic requirements for admission and who present the following test scores are eligible to participate in the English Bridge Program.

- IELTS (academic module) overall 5.5 with no individual score below 5; or
- TOEFL: 540; CBT: 207; iBT: 76

Applicants will receive conditional University admission. Upon successful completion of the English Bridge Program with an IELTS score of 6.0, students will be granted automatic admission to an undergraduate program the following term. For more information, contact SFU International at 778.782.7131 Tel; [ebp@sfu.ca](mailto:ebp@sfu.ca); [www.sfu.ca/ebp](http://www.sfu.ca/ebp)

### Diverse Qualifications Admission Policy

Each term, many more admission applications are received than can be accepted. Academic performance is the main criterion for admission and is used exclusively in 90% of cases. However, it is recognized that some candidates have other attributes and achievements that should be considered in determining admission. The University seeks to admit not only applicants who are academically very well qualified but also those who meet minimum admission standards and have

- demonstrated commitment and/or excellence in other endeavours; or
- succeeded in their studies in spite of difficult circumstances.

The University may select up to 10% of new students, taking into account these diverse qualifications. To be considered under this policy, complete a personal

information profile (see "Personal Information Profile" below) and submit it with one letter of reference.

Applicants admitted via Diverse Qualifications are offered admission to the Faculty of Arts and Social Sciences or SFU Surrey's TechOne Program.

This policy applies only to those who meet the minimum academic admission requirements, the English language and literacy requirements, and the analytical and quantitative skills requirement (see above) except where otherwise noted.

### Personal Information Profile

To complete the personal information profile, visit <http://students.sfu.ca/admission/requirements/provinces/dqform.html>. The profile must be submitted before the application deadline.

### Students with Disabilities

Academically qualified students who have a physical, mental health, sensory or specific learning disability are encouraged to attend Simon Fraser University. The University will ensure that applicants are not denied admission as a result of their disability and that, where appropriate, accommodation will be made with respect to admission criteria. Students seeking exemption from an admission requirement on the basis of a disability should contact the Admissions Office at 778.782.5513 between the hours of 10 am and 11 am, Monday to Friday, and additionally on Tuesday from 3 pm to 4 pm, Pacific time. For all other disability-related issues, contact the Centre for Students with Disabilities directly at 778.782.3112.

### Programs for Working Adults

#### Integrated Studies Program

Integrated Studies Programs for mid-career adults are cohort-based, employer-sponsored undergraduate degree completion opportunities leading to the bachelor of general studies degree. A flexible admission policy allows recognition of non-traditional learning experiences and a set curriculum enables degree completion within a pre-established time frame (usually three years) while candidates continue to work full time.

Mature applicants with a minimum of 10 years of work experience, and employer support to complete an undergraduate degree, are encouraged to visit [www.sfu.ca/integratedstudies](http://www.sfu.ca/integratedstudies). For information, see "Integrated Studies Program" on page 90.

#### SFU NOW: Nights or Weekends

SFU NOW: Nights or Weekends provides flexibly-scheduled Simon Fraser University degree courses for working adults who would like to complete an undergraduate degree, or enrol in individual courses for personal or professional interest. SFU NOW is designed for adults who work full-time, have several years of work experience, and who cannot access university classes during the day. Classes are offered in the evenings and on weekends at the Vancouver campus. A range of classes is available, and students may complete one or more to fit busy lives and schedules. All SFU NOW classes are regular Simon Fraser University credit courses. Regular tuition and ancillary rates apply.

To enrol in SFU NOW courses, students will need to be admitted to Simon Fraser University either by meeting the university's regular admission requirements and following regular admissions procedures, or by applying as a mature student (see "Mature Student Entry" on page 22).

Visit [www.sfu.ca/sfunow](http://www.sfu.ca/sfunow) for further information and for details about admissions and enrolment.

## British Columbia and Yukon Applicants

Applicants from British Columbia or Yukon may be admitted from

- secondary school (see below)
- community college (see "Admission from BC and Yukon Community Colleges" on page 21)
- another university (see "BC University Transfer" on page 21)

Several special categories of admission also exist for British Columbia applicants (see "Special Categories" on page 22).

### Admission from British Columbia and Yukon Secondary Schools

All applicants (except as noted) must graduate from secondary school before entering Simon Fraser University.

#### Minimum Admission Requirements

The minimum admission average will vary depending on the number of applications received, and on spaces available. This minimum is determined by the

respective faculty, but in no case will be less than 67%.

Actual final percentage marks will be used whenever available. If not given, the following equivalents are used to compute the average (for BC high school admission only). A = 4.0 or 91%; B = 3.0 or 79%; C+ = 2.5 or 70%; C = 2.0 or 64%

If a grade 12 course has a provincial examination, the final mark must include the exam mark. The provincial exam policy is currently under review. For current information, visit <http://students.sfu.ca/admission>.

### BC and Yukon grade 11 and 12 course requirements

- all applicants must meet the *general admission requirements as listed below*
- *faculty requirements* may also apply (see below)
- BC and Yukon secondary school applicants must meet the English language and literacy admission requirement (see "English Language and Literacy Requirements" on page 18), and the quantitative and analytical skills requirement (see "Quantitative and Analytical Skills Requirements" on page 19)

## UNDERGRADUATE

#### General Requirements

<b>Grade 11</b> (not used to calculate admission average)	<ul style="list-style-type: none"> <li>• English 11 or Français première langue 11</li> <li>• Language 11 (includes Beginner's Language 11, American Sign Language 11 or 12, and Language 12 courses)</li> <li>• Principles of Mathematics 11 (Applications of Mathematics 12 is acceptable for admission to some programs)</li> <li>• Science 11 (includes Applications of Physics 12, Biology 11, Chemistry 11, Earth Science 11, Forests 11, IB Environmental Systems 11, Principles of Physics 11)</li> </ul>
<b>Grade 12</b>	English 12 or English 12 First Peoples or Français première langue and three provincially examinable grade 12 courses: <ul style="list-style-type: none"> <li>• BC First Nations studies 12</li> <li>• English literature 12</li> <li>• French or Français langue seconde 12</li> <li>• German 12</li> <li>• History 12</li> <li>• Japanese 12</li> <li>• Mandarin 12</li> <li>• Principles of Mathematics 12</li> <li>• Punjabi 12</li> <li>• Spanish 12</li> </ul> <i>Science 12 courses</i> <ul style="list-style-type: none"> <li>• Biology 12</li> <li>• Chemistry 12</li> <li>• Geography 12</li> <li>• Geology 12</li> <li>• Physics 12</li> </ul>

IB and AP courses – all standard and higher level IB courses may be used for admission. All AP courses may be used for admission. For IB and AP transfer credit, see "Advanced Placement Program and International Baccalaureate" on page 25.

#### Faculty Requirements

<b>Applied Sciences</b>	<i>Computing Science; Geographic Information Science; General Studies</i> <ul style="list-style-type: none"> <li>• principles of mathematics 12</li> <li>• one of biology 12, chemistry 12 or physics 12</li> </ul> <i>Engineering Science</i> <ul style="list-style-type: none"> <li>• principles of mathematics 12</li> <li>• chemistry 12</li> <li>• physics 12</li> </ul>
<b>Arts and Social Sciences</b> All programs	<ul style="list-style-type: none"> <li>• applications of mathematics 12 may be substituted for principles of mathematics 11</li> </ul>
<b>Business Administration</b>	<ul style="list-style-type: none"> <li>• principles of mathematics 12</li> </ul>
<b>Communication Art and Technology</b>	<i>Communication</i> <ul style="list-style-type: none"> <li>• applications of mathematics 12 may be substituted for principles of mathematics 11</li> </ul> <i>Contemporary Arts</i> <ul style="list-style-type: none"> <li>• applicants may have portfolio/auditions requirements; visit <a href="http://www.sfu.ca/sca">www.sfu.ca/sca</a></li> </ul> <i>Interactive Arts and Technology</i> <ul style="list-style-type: none"> <li>• principles of mathematics 12</li> </ul> <i>TechOne</i> <ul style="list-style-type: none"> <li>• principles of mathematics 12</li> </ul>
<b>Education</b>	<i>Bachelor of General Studies (Education)</i> <ul style="list-style-type: none"> <li>• applications of mathematics 12 may be substituted for principles of mathematics 11</li> </ul>
<b>Environment</b>	<i>Geography</i> <ul style="list-style-type: none"> <li>• applications of mathematics 12 may be substituted for principles of mathematics 11</li> </ul>
<b>Health Sciences</b>	<i>Bachelor of Science Program</i> <ul style="list-style-type: none"> <li>• principles of mathematics 12</li> </ul>
<b>Science</b>	<ul style="list-style-type: none"> <li>• chemistry 11</li> <li>• principles of physics 11</li> <li>• principles of mathematics 12</li> <li>• two other science 12 courses</li> </ul>

### Additional Information for BC Secondary School Applicants

#### Independent Schools

The University accepts applications from students attending independent schools adhering to the BC secondary school curriculum. Applicants must have written any secondary school examinations administered by the provincial Ministry of Education in courses used towards graduation. Examination results will be evaluated in the same manner as if the applicant were attending a public secondary school.

### Advanced Placement or International Baccalaureate Exams

BC secondary school students completing these programs should see "Advanced Placement Program and International Baccalaureate" on page 25.

#### BC Adult Graduation Diploma

This credential is available to adults who complete courses for graduation through a secondary school, adult education centre or a community college.

Applicants who have completed the diploma and who are at least 19 years of age may be admitted if they have completed:

- four courses (16 units) at grade 11 or advanced level to include English, mathematics, social studies or First Nations 12, an experimental or laboratory science; a language other than English is not required
- four courses (16 units) at the grade 12 or provincial level to include English and three additional subjects selected from: biology, mathematics, chemistry, English literature, languages, statistics, geography, history, physics

All four grade 12 or provincial level subjects must be graded: a minimum average of C+ or 67% is required,

based on the Ministry of Education grading scale, however, a higher average may be required.

Entry requirements for specific programs parallel those for BC secondary school graduates.

### BC Calculus Examination Certificate

All prospective Simon Fraser University, University of BC, University of Northern BC and University of Victoria students who have completed, or who are enrolled in, a secondary school calculus course are eligible to write a calculus challenge exam. Students who pass this exam will receive a Simon Fraser University-UBC-UNBC-UVic Calculus Challenge Examination Certificate that permits them to obtain calculus credit at one of these universities. Secondary school students can write the exam prior to entering one of the four participating BC universities. Only one attempt to write this exam is permitted. The exam's resulting grade will be converted into the individual university's equivalent grade.

#### Calculus Course Credit

Students who pass the calculus challenge exam and enrolled at Simon Fraser University may choose to be awarded transfer credit [MATH 151 (3)] or actual course credit for MATH 151. Contact J. Fabricius in the Department of Mathematics to initiate such credit. Students already eligible for transfer credit because of high AP or IB scores will keep this eligibility regardless of their exam score and can waive the exam score and/or credit.

#### Examination Locations, Schedule

Each year a university will host the calculus challenge examination, alternating between Simon Fraser University and the University of British Columbia. The June exam is held at participating high schools, or at the host university.

#### Application to Write the Exam

Application to complete the exam must be made to the mathematics department of the university that is hosting the examination in that year.

#### Examination Information

The exam is three hours in duration. For further enquiries about writing the calculus examination and the Calculus Examination Certificate, contact: Calculus Challenge Examination, Department of Mathematics, 8888 University Drive, Simon Fraser University, Burnaby, BC, V5A 1S6; 778.782.3332 Tel; 778.782.4947 Fax; or email [fabriciu@sfu.ca](mailto:fabriciu@sfu.ca).

### Upgrading BC Grade 12 Grades

Applicants who wish to improve their BC grade 12 course grades may do so in accordance with Ministry of Education policies, except that the final grade in a provincially-examinable course may not be increased by completing an equivalent college course. For example, an applicant who has achieved a mark of 66% in principles of mathematics 12 may not count in her/his admission average a subsequent, higher grade (say 'B' or 73%) in an ABE provincial level mathematics course completed through a college.

## Admission from BC and Yukon Community Colleges

BC and Yukon community college applicants must have successfully completed 24 units of transferable course work with a minimum 2.0 grade point average. Meeting this minimum does not, however, guarantee admission because the average required for admission to most programs is higher.

Applicants who met the University's admission requirements after completing grade 12 may be admitted on the basis of their secondary school grades provided that they have attempted fewer than 24 units of transfer credit. However, they will not be admitted if they present three or more transferable courses equal to nine or more units with an average of less than 2.0 or 60%.

## Specific Faculty/Program Admission Requirements

The faculties and schools listed below require additional specific course prerequisites for admission. For more detailed information, please refer to the faculty-specific pages of this Calendar.

### Business Administration, Faculty of

Students planning to enter the BBA degree program must meet the general University entrance requirements, including transferable equivalents to the following courses:

BUEC 232-4  
BUS 237-3, BUS 251-3, BUS 272-3  
ECON 103-4, ECON 105-4  
MATH 157-3 (or MATH 150-3 or MATH 151-3 or MATH 154-3)  
and two of ENGL 101-3, 102-3, 103-3, 104-3, 105-3, 199-3, PHIL 001-3, 100-3, 120-3.

A minimum grade of C- is required in each of the above mentioned courses. Most transfer students enter the University's Faculty of Arts and Social Sciences before they are approved into the Faculty of Business Administration (see "Faculty of Business Administration" on page 143).

### Computing Science, School of

Students applying for the computing science program may be admitted directly based on college grades, or may be offered general University admission with the opportunity to apply for later admission based on Simon Fraser University grades.

For direct entry from college, students must complete 24 units of transferable work; including one mathematics course and two computing courses, or one computing course and two mathematics courses that will receive the following transfer credit:

- MACM 101-3, 201-3, MATH 151-3, 152-3 and 240-3 (or 232)
- CMPT 125-3, (or 126-3 or 128-3), 150-3, 225-3, 250-3 and 275-4 (or 276-3)

Please direct email queries to [csadvise@cs.sfu.ca](mailto:csadvise@cs.sfu.ca).

### Engineering Science, School of

Students planning to enter the BASc degree program must complete at least 24 units in transferable science or engineering courses.

### Health Sciences, Faculty of

Students planning to enter the BA and BSc degree program in health sciences must complete at least 24 units of transferable work. Recommended courses for students intending to complete the BSc in health sciences are BISC 101-4, 102-4 and 202-3, CHEM 121-4 and 122-2, STAT 201-3 or 203-3.

Recommended courses for students intending to complete the BA in health sciences are SA 101-4 (or 150-4), STAT 201-3 (or 203-3), human biology.

### Interactive Arts and Technology, School of

Students complete at least 24 units of transferable course work, including at least 18 units comprised of three units from each of the following areas: CMPT, FPA, CMNS, or IAT (see "Route 3" on page 159).

In routes 2 and 3, students apply to either the BA or BSc program after completing at least 18 units of the lower division requirements listed below or equivalents.

### Science, Faculty of

Students planning to enter the BSc degree program must have the following transfer credit (minimum grade of C on each):

- MATH 100-3
- two of BISC 100-4, CHEM 110-3 or 111-4, PHYS 100-3

## Transfer Credit Guide

A transfer guide listing all first and second year (lower division) transferable courses and the Simon Fraser

University equivalents is accessible through the British Columbia Council on Admissions and Transfer website at [www.bctransferguide.ca](http://www.bctransferguide.ca)

## Associate of Arts/Science Degree Holders

Graduates holding Associate of Arts or Associate of Science degrees from BC colleges recognized by the BC Ministry of Advanced Education will receive preference in the admission process as follows:

- The minimum average for Associate Degree students will be established each term at a level 0.25 GPA points less than that required for regular transfer students, but shall not be less than 2.00.
- Transfer credit will be given for all individually transferable courses. When the individually assigned credit from all sources totals less than 60 units, additional general elective credit will be assigned to bring the transfer credit total to 60 units.

BC and Yukon community college applicants must meet the English language and literacy, and quantitative and analytical skills requirement. See "English Language and Literacy Requirements" on page 18.

## BC University Transfer

Applicants in good standing at other recognized BC universities may be considered for admission upon successful completion of 24 units of transferable course work with a minimum grade point average of 2.0. Meeting this minimum grade point average does not, however, guarantee admission because the average required for admission to most programs is higher. Other requirements are the same as those for students transferring from a BC or Yukon community college. The following conditions apply:

- BC university students must meet the English language and literacy, and quantitative and analytical skills requirement (see "English Language and Literacy Admission Requirement" and "Quantitative and Analytical Skills Requirements" on page 19)
- studies must have been completed at a fully accredited institution granting baccalaureate or higher degrees
- applicants who have been required to withdraw from the transferring institution or whose status, if they were attending Simon Fraser University, would be on Academic Probation will be admitted only if they have completed a further year (24 units) or more of transferable work, with a GPA of at least .50 points above the current admission GPA.
- Simon Fraser University supports the 'Pan-Canadian Protocol' on transferability of first and second year arts and science courses from any recognized Canadian university

Applicants must send copies of detailed course outlines to assist with the evaluation of transfer credit.

## BC Visiting Students

Students of other BC universities may apply for admission to complete specified courses for subsequent transfer back to the 'home' university. Applicants should apply in the normal manner and will be evaluated as University transfer applicants (see above). No transfer credit or enrolment priority is awarded to visiting students.

## BC University Degree Holders

Applicants holding degrees may be admitted to undergraduate studies to undertake a second or subsequent degree at the bachelor's level, or to undertake a diploma or certificate. Applicants may also gain admission as special students to complete

undergraduate courses which are not for credit toward a degree, diploma or certificate program.

Applicants with baccalaureate degrees from recognized universities will be admitted with a minimum average of 2.0 or 60% based on the last two years of degree (or post degree) work attempted.

Once admitted, applicants will need program approval directly from the department or school in which they intend to pursue a second degree, diploma or certificate program. See <http://students.sfu.ca/admission/seconddegree> for further information.

Applicants to a degree program must meet the English language and literacy, and quantitative and analytical skills requirements. See "English Language and Literacy Requirements" on page 18 and see "Quantitative and Analytical Skills Requirements" on page 19.

## Special Categories

Simon Fraser University is interested in extending learning opportunities to British Columbia residents who may not qualify under the regular categories of admission. The number of such admissions is limited by the availability of resources, and is not automatic. Four special categories are available — **mature student entry**, **early entry**, **concurrent studies** and **irregular admission**.

Only Canadian citizens or permanent residents are eligible.

## Mature Student Entry

Applicants aged 23 or older who have attempted less than 24 units of post-secondary transferable course work, and who do not meet regular admission requirements, *may* be given consideration as mature students. In addition to normal documents, mature applicants must submit a personal information profile and at least one letter of reference (see "Diverse Qualifications Admission Policy" on page 19). Applicants who have successfully completed some post-secondary work, usually three to four transferable academic courses (9-12 units), and have ensured that they have no background deficiencies in essay writing, mathematics, etc. will receive preference.

The English language and literacy, and quantitative and analytical skills requirements for admission do not apply to mature applicants. However, mature applicants whose first language is not English are expected to meet the English Language and Literacy entrance requirement prior to admission (see "English Language and Literacy Requirements" on page 18).

Mature applicants must meet the writing, quantitative and breadth requirements for graduation (see "Writing, Quantitative, and Breadth Requirements" on page 7).

Applicants who have attempted 24 or more of transferable post-secondary work are ineligible for mature student entry but may be considered for admission as transfer students.

## Concurrent Studies

Students with superior academic records (90% or higher) may apply for limited admission to complete

one or two university courses while still attending secondary school. Admission is limited to one term, with a maximum of two courses in the term. Credit for these courses may be applied to academic degrees if the student is subsequently admitted to a regular program at the University.

An admission application form for concurrent students is available at <http://students.sfu.ca/forms>.

Applications should be supported by a letter of recommendation from the school principal or designate, and an official copy of the academic record. Admission under this category is at the discretion of the director of admissions and the respective faculty dean.

## Irregular Admission (Education)

Applicants may apply for irregular admission, giving limited access to certain courses offered by the Faculty of Education. This category allows certified teachers in BC, who seek professional development opportunities, to avoid long lead times and full documentation of their academic histories. Normal admission deadlines are waived, but published minimum admission requirements apply. Irregular admission students may not pursue a credential at Simon Fraser University (e.g. a degree) and receive no enrolment priority. They may complete no more than eight units per term to a maximum of 16 in total. Eligibility to re-enrol after each term is subject to the approval of the Faculty of Education. For further information, contact the Faculty of Education at 778.782.5830.

## Applicants from Other Canadian Provinces

Information for applicants who are following Advanced Placement or International Baccalaureate programs is on page 25.

### Canadian High Schools

Applicants from Canadian high schools outside of British Columbia and Yukon will be considered for

admission on the basis of their academic program leading to high school graduation and university entrance. Students will be required to present English at the senior level and all required courses for their intended university program.

Completion of high school graduation from a recognized secondary school is mandatory and a

minimum average of 67% or equivalent is required. Because of enrolment limitations, the academic average that is required for most programs is higher than 67%.

### Canadian High School Requirements

#### Ontario

Applicants from Ontario must present an Ontario secondary school diploma with a minimum of six 4U/4M courses, including ENG4U.

#### Quebec

##### CEGEP Students

Applicants from CEGEP must present either a completed DEC or at least one year of an approved academic program.

##### Grade 12 Students

These applicants must present a grade 12 graduation diploma with standing in a minimum of six appropriate academic grade 12 courses, including English.

#### Alberta, Saskatchewan, Manitoba, New Brunswick, Nova Scotia, Prince Edward Island, Newfoundland and Labrador, Northwest Territories, Nunavut

Applicants from these provinces must present a grade 12 graduation diploma with standing in a minimum of five appropriate academic grade 12 courses, including English.

*Detailed information about appropriate academic courses is not presented in this Calendar because the list is regularly updated. To see the most recent course list, please visit <http://students.sfu.ca/admission>*

Canadian secondary school applicants must meet the English language and literacy admission requirement (see "English Language and Literacy Admission Requirement" on page 18), and the quantitative and analytical skills requirement (see "Quantitative and Analytical Skills Requirements" on page 19)

### Specific Faculty Requirements

The following specific Faculty requirements are expressed in BC/Yukon terms. Simon Fraser University's Undergraduate Admissions will determine course equivalency. These requirements are in addition to those listed above for each province.

#### Faculty of Applied Sciences

*Computing Science, Geographic Information Science, General Studies*

- principles of mathematics 12
- one of biology 12, chemistry 12, physics 12

##### Engineering Science

- principles of mathematics 12
- chemistry 12
- physics 12

#### Faculty of Arts and Social Sciences

For all programs,

- applications of mathematics 12 may be substituted for principles of mathematics 11

#### Faculty of Communication, Art and Technology

*Contemporary Arts*

- applicants may have portfolio and/or audition requirements; for further information, please visit [www.sfu.ca/sca](http://www.sfu.ca/sca)
- applications of mathematics 12 may be substituted for principles of mathematics 11

*Communication*

- applications of mathematics 12 may be substituted for principles of mathematics 11

*Interactive Arts and Technology*

- principles of mathematics 12

*TechOne*

- principles of mathematics 12

#### Faculty of Business Administration

- principles of mathematics 12

#### Faculty of Education

*Bachelor of General Studies (Education)*

- applications of mathematics 12 may be substituted for principles of mathematics 11

#### Faculty of Environment

*Geography*

- applications of mathematics 12 may be substituted for principles of mathematics 11

#### Faculty of Health Sciences

*Bachelor of Science Program*

- principles of mathematics 12

#### Faculty of Science

All programs require

- chemistry 11
- principles of physics 11
- principles of mathematics 12
- two other science 12 courses

## Applicants from Canadian Colleges

The following requirements refer to Faculty of Arts and Social Sciences admission, except where stated.

Applicants who have attended a community college in an articulated university transfer program may be considered for admission upon successful completion of 24 units of transferable course work with a minimum grade point average of 2.0. Meeting this minimum grade point average does not, however, guarantee admission because the average required for admission to most programs is higher.

Applicants who met the University's admission requirements after completing grade 12 may be admitted on those requirements, provided that they have attempted less than 24 units of transfer credit. However, they will not be admitted if they present three or more transferable courses equal to nine or more units with an average of less than 2.0 or 60%.

English Language and Literacy requirements, and Quantitative and Analytical Skills requirements (see page 19) apply to Canadian College transfer students on a university transfer program seeking entry to degree programs.

Other requirements are parallel to those for BC college transfer students (see "Admission from BC and Yukon Community Colleges" on page 21), except that associate degrees are given no special priority.

Transfer credit may be granted to a maximum of 60 units based on approved transfer lists or advice from the appropriate Simon Fraser University departments.

### Quebec CEGEP

CEGEP applicants must present either a completed DEC or at least one year of an approved academic program.

CEGEP students must meet the English Language and Literacy, and Quantitative and Analytical Skills requirements and (see page 19).

### Institutes of Technology/Colleges of Applied Arts and Technology

Students with completed two or three year diplomas from academic programs at Canadian institutes of technology, including BCIT, or colleges of applied arts and technology may be considered for admission. Transfer credit may be granted based on overall academic background and on the recommendations of the appropriate departments at Simon Fraser University. Transfer credit is generally granted only for completed technical programs as a block and is not evaluated on a course by course basis.

Applicants from institutes of technology/colleges of applied arts and technology must meet the English Language and Literacy, and Quantitative and Analytical Skills requirements (see page 19).

### Canadian University Transfer

Applicants in good standing at other recognized Canadian universities may be considered for admission upon successful completion of 24 units of transferable course work with a minimum grade point average of 2.0. Meeting this minimum grade point average does not, however, guarantee admission because the average required for admission to most programs is higher. Other requirements are the same as those for students transferring from a BC university or college. The following conditions apply:

- students must meet the English Language and Literacy, and Quantitative and Analytical Skills requirements (see page 19).
- studies must have been completed at a fully accredited institution granting baccalaureate or higher degrees
- applicants who have been required to withdraw from the transferring institution or whose status, if they

were attending Simon Fraser University, would be on academic probation will be admitted only if they have completed 24 units or more of transferable work, with a GPA of at least .50 points above the admission GPA.

- Simon Fraser University supports the Pan-Canadian Protocol on transferability of first and second year arts and science courses from any recognized Canadian university.

Applicants must send copies of detailed course outlines to assist with the evaluation of transfer credit.

### Canadian Visiting Students

Students of other Canadian universities may apply for admission to complete specified courses for subsequent transfer back to the 'home' university. Applicants should apply in the normal manner and will be evaluated as University transfer applicants (see above). No transfer credit or enrolment priority is awarded to visiting students.

### Canadian University Degree Holders

Applicants holding degrees from a recognized Canadian University outside of BC may be admitted to undergraduate studies to undertake a second or subsequent degree at the bachelor's level, or to undertake a diploma or certificate. Applicants may also gain admission as special students to complete undergraduate courses which are not for credit toward a degree, diploma or certificate program. Applicants with baccalaureate degrees from recognized universities will be admitted with a minimum average of 2.0 or 60% based on the last two years of degree (or post degree) work attempted.

Degree program applicants must meet the English Language and Literacy, and Quantitative and Analytical Skills requirements (see page 19).

## International Applicants

International applicants may be admitted from secondary school, from a college, from a university, or applicants may already hold a university degree. Refer to those sections that follow.

Some schools offer programs that comply with international rather than national rules (i.e. International Baccalaureate). Students from these schools will be evaluated by international standards.

Some schools offer an educational program that is different from the traditional program in that country – for example, a US 12 program in Saudi Arabia. In this case, please refer to the United States admission requirements.

International applicants must meet the English Language and Literacy, and Quantitative and Analytical Skills requirements (see page 19).

### Other Requirements

#### Academic Documents

Students must arrange to send official transcripts of academic records from all schools and colleges attended to Simon Fraser University. Replaceable documents will not be returned. Irreplaceable documents will be returned to the student personally, on request. If the student's documents are not in either English or French, Simon Fraser University

requires an official translation, certified by an educational official of the student's country, an official of a Canadian Education Centre, or a Canadian consular or embassy official. Translations made by the student, relatives or friends will not be accepted. For international applicants residing in BC, translations should be completed by a member of the Society of Translators and Interpreters of British Columbia (please view their website at [www.stibc.org](http://www.stibc.org)), or through MOSAIC Translation Services at [www.mosaic-trans.com](http://www.mosaic-trans.com).

### Secondary School Applicants

Completion of minimum requirements does not guarantee admission to any course, program, department or faculty when the number of qualified applicants exceeds the number that, in the opinion of the University, can be accommodated. The University reserves the right to select from among qualified applicants. Visit <http://www.students.sfu.ca/admission/requirements> or a current list of admission requirements by country/region.

### International University or College Transfer

The studies presented for transfer credit must be acceptable to a leading university in the home country

toward a program similar to the one to which admission is sought. For further requirements, see "Canadian University Transfer" on page 24.

### International Institutes of Technology

Students with completed two or three year diplomas from academic programs at recognized international institutes of technology may be considered for admission. A competitive admission average is required for most programs. Transfer credit may be granted based on overall academic background and on the recommendations of the appropriate departments at Simon Fraser University. Transfer credit is generally granted only for completed technical programs as a block and is not evaluated on a course-by-course basis. International applicants must meet the English Language and Literacy, and Quantitative and Analytical Skills requirements (see "English Language and Literacy" and "Quantitative and Analytical Skills Requirements" on page 19).

### International University Degree Holders

See "BC University Degree Holders" on page 21.

## Advanced Placement Program and International Baccalaureate

Advanced Placement (AP) and International Baccalaureate (IB) courses may be used in place of equivalent provincially-approved grade 12 courses as listed under "British Columbia and Yukon Applicants" on page 20. The chart on the right shows how AP and IB exam grades will be converted for the purpose of determining a student's admission.

Transfer credit and/or advanced standing will be granted to students who complete AP examinations, in certain transferable subjects, with grades of 4 or 5. Course challenge (credit by examination) is also available in some disciplines.

Students who have completed the International Baccalaureate Diploma will receive a complete year of transfer credit (30 units). Transfer credit will be awarded for all standard level and higher level subjects that are passed with a grade of 4 or higher. If the total specific assigned credit for all subjects totals less than 30 units, additional general elective credit will be assigned to bring the transfer credit total to 30 units. For a detailed list of credit that is granted for IB and AP courses, please visit <http://students.sfu.ca/admission/requirements/>.

Students who are not completing the full IB diploma program must be admissible on another program

leading to secondary school graduation program. Transfer credit will be granted for higher level subjects with a final grade of 5 or higher.

AP Exam Grade	IB Exam Grade	Equivalent Percentage
5	7	96
–	6	90
4	5	86
3	–	80
–	4	76
2	3	70

## Reactivation and Readmission

Students who have previously attended may apply for reactivation or for readmission.

### Reactivation

You must fill out the reactivation form on-line at <http://students.sfu.ca/admission/readmission> if you meet the following criteria.

- absent from the University for three or more consecutive terms and were not required to withdraw in your last term at Simon Fraser University, and completed no further academic studies at a post-secondary institution during the time away from Simon Fraser University; or
- all your undergraduate programs at Simon Fraser University are complete or will be completed by the end of the term.

### Readmission

The following conditions require that you apply for readmission before enrolling in further courses:

- completion of further academic studies at a post-secondary institution during the time you were away from Simon Fraser University; or
- required to withdraw or placed on extended withdrawal from Simon Fraser University; or
- voluntary withdrawal from your first term of attendance. If you are a new student who withdraws before completing any course work, you are required to apply for readmission if you wish to enrol in a subsequent term. (This does not apply if you withdraw under extenuating circumstances, after the application deadline for the subsequent term), or
- you are a concurrent studies student who completes a term and wishes to continue at the University; or
- you previously attended as a visiting or exchange student and now wish to complete a Simon Fraser University credential.

If any of these conditions are present, you must apply for readmission on-line at [students.sfu.ca/admission/readmission](http://students.sfu.ca/admission/readmission) by the applicable application deadlines.

### Holders of Simon Fraser University Bachelor's Degrees

In addition to submitting an application for readmission or reactivation, former Simon Fraser University students who plan to undertake a program of study leading to an additional bachelor's degree or

toward a diploma are urged to obtain program approval from the appropriate department and faculty as soon as possible. Such students entering certificate programs should obtain approval from their faculty advisors.

Students holding Simon Fraser University bachelor's degrees may also apply for reactivation to undertake undergraduate courses as special students if no further academic studies at a post-secondary institution were completed during the time away. Normally, no approval is required.

### Readmission of Involuntarily Withdrawn Students

A former student who is involuntarily withdrawn from the University (required to withdraw or placed on extended withdrawal) may apply for readmission based on performance achieved in external academic course work completed after she/he last enrolled at Simon Fraser University (see below for details).

#### Readmission after Required to Withdraw

A former student who is required to withdraw (RTW) shall be eligible for readmission if she/he completes, externally, further transferable academic work according to the following schedule (any of the following five options):

- 12-17 units with a minimum 3.50 GPA (grade point average)
- 18-23 units with a minimum 3.00 GPA
- 24-29 units with a minimum 2.75 GPA or with the acceptance GPA (see *Acceptance GPA* below) whichever is higher
- 30 or more units with the acceptance GPA (see *Acceptance GPA* below)
- a completed two year technical diploma with a 70% minimum average and at least 12 units of transferable course work with a minimum 2.75 GPA. (The transferable work may be within the diploma program or supplementary to it.)

#### Readmission of Students on Extended Withdrawal (PW)

A former student on extended withdrawal (PW) shall be eligible for readmission if she/he completes further transferable academic work according to the following schedule (any of the following five options):

- 24-35 units with a minimum 3.50 GPA

- 36-47 units with a minimum 3.00 GPA
- 48-59 units with a minimum 2.75 GPA or with the acceptance GPA (see *Acceptance GPA* below), whichever is higher
- 60 or more units with the acceptance GPA
- a completed two year technical diploma with a 70% minimum average and at least 24 units of transferable course work with a minimum 2.75 GPA. (The transferable work may be within the diploma program or supplementary to it.)

#### Acceptance GPA

The acceptance GPA refers to the minimum admission GPA in effect for that term for British Columbia college transfer students, according to enrolment limitation measures. The acceptance GPA may vary.

#### Readmission Deadlines

Deadlines for consideration shall be the same as for other students seeking readmission (see "Application Deadlines" on page 18).

#### Duplicate Courses for Readmission

A repeated course attempt which was passed with a C grade or higher prior to leaving Simon Fraser University will not count in the unit or GPA calculations for readmission. Students may not complete courses at the college that are a lower level than those completed at Simon Fraser University for readmission (e.g. the student has successfully completed MATH 157 at Simon Fraser University and/or MATH 158; therefore the student may not take MATH 100, MATH XXX or MATH 1XX for readmission).

#### Final Grades Evaluated for Readmission

Evaluation for readmission is based only on final grades (i.e. courses in progress are not evaluated).

#### Transfer Credit on Readmission

Credit for transferable courses shall be granted on readmission, subject to a C minimum grade in each course, and subject to normal transfer credit limits.

#### Standing on Readmission

If readmitted, a student who was previously involuntarily withdrawn from the University (RTW or PW) is placed on academic probation (OAP) and shall again be subject to the conditions described above.

# Student Enrolment

Enrolment is the process of formally assigning and recording a student's enrolment in a course(s). Enrolment is open only to those who have been admitted or readmitted to Simon Fraser University, or who are eligible for reactivation. An exception is that special audit students need not be formally admitted before enrolment (see page 210).

In the trimester system, a student must enrol for any combination of terms or sessions during an academic year. Students have access to the enrolment system based on the number of units completed and in progress, and on the student's cumulative grade point average. Students are assigned an appointment date and time when access is activated.

**Note:** The enrolment procedure for designated off-campus programs and distance education courses is the same as for on-campus courses. Specific program details are available in brochures published each term. See "Continuing Studies" on page 210.

Information about how to enrol and details about the course's day, time, place and instructor is provided in the *Undergraduate Schedule of Classes and Examinations* and on the web at <http://sis.sfu.ca>. The University reserves the right to change arrangements without notice although it will endeavor to inform students who are affected by such changes.

## Library/Identification Card

A student library/identity card is provided to enrolled or enrolled students. This card is required when borrowing books from the Library and for other on-campus identification purposes. In the event that this card is lost, destroyed or damaged, a replacement card may be obtained from Student Services upon payment of a fee.

## Academic Advising and Student Success

3200 Maggie Benston Student Services Centre,  
778.782.4356 Tel, 778.782.4969 Fax,  
<http://students.sfu.ca>, Monday to Thursday 9 am – 6 pm, Friday 10 am – 4:30 pm

This office provides advice for newly admitted and continuing first and second year students who have not declared a specialization (for a major, minor, double major, joint major or an honors program see page 6). Academic advisors assist with course selection and program planning in any faculty. Advisors also assist students in academic difficulty to provide assistance about policies related to academic standing and continuance, course withdrawals, readmission after being required to withdraw due to poor academic performance, and retroactive withdrawals applications.

## Definitions

The following are the most commonly used terms that new students may find confusing.

### Students

Simon Fraser University does not classify students as either full time or part time although there are varying course load requirements for many types of financial aid (see "Financial Aid and Awards" on page 36).

### Continuing Students

Students who enrolled for one or more of the last three terms and who are eligible to continue will be

advised of enrolment procedures and deadlines well in advance of each term.

### Former Students

Under certain conditions, former students submit formal application for readmission in order to continue academic studies at the University (see "Admission and Readmission" on page 17).

### New Students

After the application for admission has been assessed, the applicant will be advised of admission. If admitted, the student receives instruction on the procedure to enrol in courses.

### Qualifying Student

See "1.3.6 Admission as a Qualifying Student" on page 220.

### Regular Student

A regular student is one proceeding to a degree, diploma or certificate in any faculty. A regular student may already hold one or more bachelor's degrees.

### Special Audit Student

Students who do not apply for University admission under the general admission regulations but who wish to audit credit courses may be given entry as special audit students. Special application procedures apply; see "Special Audit Student" on page 210.

### Special Student

A student already holding a first degree may, as a special student, enrol in undergraduate courses only. Credit for these courses may not be applied toward completion of any certificate, diploma, undergraduate or graduate credential at Simon Fraser University. First time applicants wishing to enrol as special students and students holding a first degree who have previously attended Simon Fraser University should see "Admission and Readmission" on page 17.

### Visiting and Exchange Students

A visiting student is a bona fide student of another accredited institution who is permitted to complete credit courses only toward a degree, certificate or diploma at the home institution. Applicants who wish to become visiting students must meet all admission requirements and must submit a letter of permission from the home institution's registrar. A visiting student wishing to become a regular Simon Fraser University student must reapply and meet admission requirements in effect at that time.

## Academic Year

### Trimester

Simon Fraser University offers three full terms or semesters within the twelve month calendar year.

### Term

The calendar year is divided into three academic terms of 16 weeks each. Each term has its own enrolment and final examinations. All academic courses are one term long, or a shorter session such as intercession or summer session. Students may enter at the beginning of any term and attend one, two or three terms in a year. By attending continuously, a student who entered from BC high school grade 12 (or equivalent) in the fall 2009 term could graduate with a bachelor's degree at the end of the spring 2012 term. The following illustrates an academic year.

fall term: September – December

spring term: January – April

summer term: May – August

intercession: May – June

summer session: July – August

To increase the accessibility of the summer program (May-August) to teachers and others, the summer term is enriched by two, two-month sessions called intercession (May-June) and summer session (July-August). These programs are offered in addition to the regular four month summer term.

### Term Codes

The University's student information system uses numeric codes for terms. Students will often encounter these codes when using <https://sis.sfu.ca>, the on-line student services portal. Here are the term codes for the upcoming year:

- 1097 = fall 2009
- 1101 = spring 2010
- 1104 = summer 2010

The codes can be interpreted as follows:

- 1 represents the 21st century
- 09 = year
- the final digit is the term: 1 for spring, 4 for summer and 7 for fall.

### Levels

Undergraduates in Canada are traditionally classified as first year (freshman), second year (sophomore), third year (junior), or fourth year (senior) students. Since 'year' does not apply to the trimester system, the student's progression is expressed in levels. 'Level' refers to the status of a student's program.

Each level normally equals one term's work with a full course load; a typical four year bachelor's degree program consists of eight levels. The first four (i.e., the first 60 units) are lower divisions. Levels 5 and above are upper divisions. The term 'level' is not used for graduate programs. Usually students in levels 1 and 2 complete 100 series courses; those in levels 3 and 4 complete 200 series courses; those beyond level 4 complete 300 and 400 series courses.

Four Year General Degree Program			
	Level	Units	Traditional Terms
Lower Levels	1	15	first year or freshman
	2	15	
	3	15	second year or sophomore
	4	15	
Upper Levels	5	15	third year or junior
	6	15	
	7	15	fourth year or senior
	8	15	
Total 120 units			

Four Year Honors Degree Program			
	Level	Units	Traditional Terms
Lower Levels	1	15	first year or freshman
	2	15	
	3	15	second year or sophomore
	4	15	
Upper Levels	5	18	third year or junior
	6	18	
	7	18	fourth year or senior
	8	18	
Total 132 units			

## Courses

### Subject

A subject (or 'discipline') is a body of knowledge with arbitrary boundary lines, e.g. philosophy, chemistry or psychology. For convenience, professors of a subject are usually grouped together in a department.

**Prerequisite**

A prerequisite, also called a requisite, is a requirement needed to enrol in a course.

**Corequisite**

A corequisite is a course to be completed at the same time as another course.

**Division**

Division relates to undergraduate courses: those numbered 001 to 299 inclusive are lower division courses; those numbered 300 to 499 are upper division courses. Graduate courses are numbered in the 500 to 999 series. In certain instances, upper division courses may be completed in the lower levels and lower division courses in the upper levels. Refer to specific regulations pertaining to requirements for degrees, certificates or diplomas.

**Course Numbering**

Each subject is divided into courses usually offered in term length units. Each course is identified by a subject name followed by a course number, the number of units, and course title, e.g. ENGL 103-3 Introduction to Drama. The first course number digit represents the division of the course; the fourth digit indicates the units. For example, ENGL 103-3 is a first division course offering three units.

**Lectures, Tutorials and Laboratories**

Although there are variations among departments, instruction in lower division courses combines a large lecture section with small tutorial groups. The large lecture enables as many students as possible to hear the very best teachers. The small tutorial groups provide more personal instruction and an opportunity for discussion of readings and lecture material. A typical course consists of two lectures and one tutorial a week. Notable exceptions are the sciences and languages, where a laboratory may be involved.

**Credit Courses**

These courses carry units and count toward the total required for a degree, certificate or diploma, subject to the regulations governing the credential.

**Credit Hours**

See "Units" below.

**Units**

Units, formerly known as credits, are assigned to each course; most have three units. A normal course load for full attendance in a term is 15 units. Requirements for credentials (e.g., degrees, diplomas and certificates) are partially expressed as units.

The unit weight is shown for each course as follows.

subject: Mathematics (MATH)

course number: 232

units: 3

**Credit-Free Courses**

These courses carry no credit and do not count toward a degree, certificate or diploma. At times, they are termed 'non-credit courses.'

**Additive Credit**

In courses deemed to have additive credit, the units do not count towards the total units required for a degree. Co-operative Education practicum courses typically have additive credit.

**Distance Education Courses**

Many courses are available as distance education courses. The majority of these are print-based. Some may also have audio and/or video support. Increasingly, educational technologies (e.g. computer conferencing) are being incorporated as courses are developed and revised. The program parallels the campus term system of the University, with the same 16 week period for course completion. For more information, see "Centre for Online and Distance Education" on page 211.

**Obligation to Declare Majors, Minors or Other Areas of Specialization**

Students are expected to obtain formal approval to enter an area of specialization by the time they have earned 60 units. 'Specialization' is a term used to cover programs such as majors, minors, double majors, honors, extended minors, etc. 'Department' refers to the faculty, department, school or unit responsible for a program. There are some other programs (e.g., post baccalaureate diplomas, certificates) which may have additional instruction regarding procedure since the students in these programs fall outside the usual flow of units.

**Undeclared**

This category will be used for any student who, prior to the successful completion of the 61st unit, has not recorded an intended specialization. Academic advising for undeclared students is available from Academic Advising and Student Success.

**Approved**

This category identifies the specialization of a student who is formally approved by the department or signing authority for that specialization and may be granted at the department's discretion or signing authority. This must be done by the 61st unit. Advising for approved students is the responsibility of the department offering the approved specialization(s).

**Course Loads**

The following maximum course loads apply to all students, but certain students may be granted permission by their respective faculties to enrol in course overloads (see below).

**Regular Session**

The maximum course load for all students who are not enrolled for summer session courses only, or intersession courses only and who are not entering their graduating term is as follows:

*Applied Sciences, Arts and Social Sciences, Business Administration or Science* – 18 units  
*Communication, Art and Technology* – 18 units  
*Education* – 20 units  
*Engineering Science* – 22 units (permission of the director is required for course loads below 15 units).  
*Environment* – 18 units  
*Health Science* – 18 units

**Intersession or Summer Session Only**

Students enrolling for the intersession or summer session only may not enrol in programs having a total value in excess of nine units, except where course combinations may require enrolment in a program of 10 units; however, no student will be permitted to undertake a program of more than 10 units of work.

**Summer Term, Intersession, Summer Session Combinations**

Normal course load limits apply to students who enrol in combinations of the above. For course load values only, in the regular summer term the course load value corresponds to the course's units. In the intersession or summer session, the course load value is twice the units because, in the shorter session, classes must meet twice as often or for longer periods to equal the regular term. Therefore, when calculating course load value, note the following example. This does not apply to the regulations for assessment of financial aid and awards.

Course	Units		Course Load Credit
ARCH 371-5 (if completed in summer term)	5	equals	5
ARCH 372-5 (if completed in eight week intersession or summer session)	5	equals	10
<b>Total Course Load</b>	<b>10</b>	<b>equals</b>	<b>15</b>

**Course Overloads**

No student who is on academic probation may enrol in a course overload.

In the Faculty of Applied Sciences, approved majors who wish to enrol in an overload require permission of the director of their school. Other Faculty of Applied Sciences students require permission of the dean of the faculty. In the School of Engineering Science, permission of the director is required for course overloads exceeding 22 units.

In the Faculties of Arts and Social Sciences; Business Administration; Communication, Art and Technology; Education; Environment; and Health Sciences only, a student who requires an overload to fulfil graduation requirements in the term for which he/she is enrolling may be allowed, with the dean's permission, to enrol in an overload.

In the Faculty of Science, a student entering the graduating term who requires specific courses to fulfil graduation requirements in the term for which the student is enrolling, may be permitted to enrol in courses totalling up to 21 units, provided either the cumulative grade point average or the most recent term grade point average is 3.0 or higher.

A limited number of overloads may be approved, by the dean of the faculty in which the student is enrolled, on an individual basis during the course change period.

**Repeated Simon Fraser University Courses**

Where a student repeats a course, the course(s) with the lower grade will be recorded on official records as an excluded course. If the same grade or grade equivalent value is earned for a repeated course, the course that was completed most recently is included in the term grade point average (GPA) and cumulative GPA, and the former course is excluded in the term GPA and cumulative GPA. A student's academic standing for previous terms does not change even though the GPA changes.

When a course is repeated and the unit value has decreased, the student must, in consultation with the department, make up the missing unit component before being credited with the full original units.

**Limits on Repeated Courses**

The number of courses which a student may repeat in a degree program is limited to five. The number of times a student may repeat a course is once. Courses completed at Simon Fraser University for which a student has already received transfer credit from another institution will count within five repeats limit.

Students can only repeat special topics courses, which they have failed, when the topic is deemed to be the same as the one for which the student has already received credit. Normally special topics courses can be repeated because the course content changes with each offering.

## Repeated Transfer Credit

Students may not receive transfer credit for a course which is a repeat of a course passed at Simon Fraser University. At Simon Fraser University, a grade of D and those above it are passing grades.

If a student enrolls for a repeat course, and completes the course with a passing grade, the transfer units will remain on the academic record as a repeat, with a zero credit or unit value. If the course is completed with a failing grade, the transfer units will remain on the academic record. A department may permit units to count for both a transfer course and a Simon Fraser University course, if the course content is judged to be sufficiently different.

Current limits on course repeats, where one course is a Simon Fraser University course, will apply to repeated transfer courses. The implementation of this policy will not affect the method of calculating grade point averages. Current limits on course repeats, where both courses are transfer credit will not apply.

## Courses at Other Institutions/Letters of Permission

Simon Fraser University students who wish to complete academic work at other institutions for undergraduate degree, diploma or certificate credit at this University must obtain permission in advance by applying for a Letter of Permission through Student Services. All students considering requesting a Letter of Permission should consult an academic advisor. The faculty advisor (and the department advisor if a program has been declared) will be contracted by Student Services for approval. Students should allow six to eight weeks for processing of their request. Normally, a Letter of Permission will not be approved retroactively.

Students must have completed a minimum of nine units at Simon Fraser University and must be in good academic standing at the time they submit their request for a Letter of Permission to Student Services. Since standing is achieved once all grades for the term have been received, students may have to wait until their third term at Simon Fraser University to be eligible to complete a course elsewhere.

Permission to complete a course at another institution will not be granted unless a valid academic reason is provided. For example, complete a course in a discipline not offered at Simon Fraser University, such as Czech language. While an approved Letter of Permission guarantees that the credit will count toward the overall credit requirement, it does not guarantee that the credit will meet a specific program requirement.

A Letter of Permission is automatically denied if a student's standing is 'on academic probation' (OAP), 'continued academic probation' (CAP), or 'required to withdraw' (RTW). Courses completed at another institution cannot be used to satisfy Simon Fraser University's minimum residency requirement and will not be included in the CGPA calculation. Therefore, such courses cannot be used to raise standing.

Students must achieve a grade of at least C (2.0 numeric equivalent) or 60% in order to receive transfer credit for courses completed at other institutions. It is the student's responsibility to ensure that an official transcript from the host institution is forwarded to Student Services at Simon Fraser University in order for transfer credit to be granted. Students participating in formal exchange programs should see "International Exchange Programs" on page 215 for more information.

## Course Challenge

Course challenge is a method by which a student may obtain credit for course material learned elsewhere (i.e. outside Simon Fraser University). A maximum of

60 units may be obtained by the combined mechanism of course challenge and transfer credit.

A student must be eligible to enrol in order to enrol for course challenge.

- course challenge is not permitted for a course for which credit has already been obtained at Simon Fraser University or through transfer credit. A student may not enrol in one term for both regular enrolment and course challenge in the same course at the same time, but must select one or the other, and may not change that decision in that term later than ten days following the commencement of University classes
- a student is not entitled to enrol for course challenge if he/she has recorded two challenges as either unsuccessful or unattempted
- a student is not permitted to challenge a course(s) he/she has previously failed at Simon Fraser University
- course challenge is not included in the grade point average
- units through course challenge do not count towards term units or units for government student assistance programs (e.g., Canada Student Loan, BC Student Loan, etc.) or Simon Fraser University administered financial assistance programs including scholarships, bursaries, awards and loans
- a department may elect to offer or not to offer the opportunity for course challenge

Please note the following with regard to course challenges in the Department of French and in the Latin American Studies Program.

With approval, a student may enrol and pay fees for challenge in a specified course sequence in a given language. If the student satisfactorily completes a course in the given language at an advanced sequence level, the department may indicate 'successful' in the preceding course(s) of the sequence in which the student is enrolled for challenge. If the student does not satisfactorily complete the advanced level course, then formal challenge assessment of the preceding level(s) should be undertaken to avoid two challenges without success based solely on the advanced assessment.

## Enrolment for Course Challenge

Any eligible student who wishes to enrol for course challenge must obtain an official course challenge enrolment form from Student Services or the academic department, seek approval of the appropriate department chair to enrol for course challenge in that department, and return the completed form to Student Services or the academic department by the tenth day following commencement of classes. Normally, a student may not complete enrolment for course challenge after the end of the tenth day of classes. During the first ten days of classes, a student may change enrolment in course challenge from one course to another or to regular enrolment in courses, but may not withdraw from course challenge without substitution of regular course enrolment. After the tenth day of classes, no further course challenge changes will be permitted.

## Course Audit

A student who has satisfied the admission requirements of the University may attend a specific course(s) as an auditor upon completion of the necessary enrolment procedures, which include written approval of the department concerned.

**Note:** Course audit and special audit are for different categories of students. Those interested in gaining entry as special audit students should see "Special Audit Student" on page 26.

## Program/Course Changes and Withdrawal

### Program Changes

Any program changes require departmental approval on the program approval form which is available from the major department or on the Student Services website at <http://students.sfu.ca/forms>, and are processed by the department.

### Course Changes

You are urged to read the tuition refund policy and penalties for dropping courses very carefully to avoid, or minimize, financial penalty for dropping courses in which you enrol. Details of the policy, and deadlines, appear in the *Undergraduate Fees* section of the Calendar and, also in the *Undergraduate Schedule of Classes and Examinations* (<http://sis.sfu.ca>). *Failure to attend classes does not constitute withdrawal from a course.* Courses that are not formally dropped will be given a failing grade; payment for the course's tuition fee is required.

### Term Course Changes

The *Undergraduate Schedule of Classes and Examinations* (<http://sis.sfu.ca>), published in pdf format each term, contains detailed instruction procedures, and term specific deadline dates to be followed to change courses during the enrolment process and after the start of classes. Deadline dates may vary for the intersession and summer session.

### Summer Session and Intersession Course Changes

For course change information in the intersession and summer session, refer to the summer term *Undergraduate Schedule of Classes and Examinations* (<http://sis.sfu.ca>). Financial penalties apply to courses dropped during class days 6 to 10. There is no refund for courses dropped after day 10 of classes.

### Normal Course Change Period

#### Regular Term – Class Days 1-5

Courses may be added or dropped or tutorial times changed using the enrolment system without prior approval of the department offering the course. Courses that are dropped will not receive a notation on the student's academic record.

Changes to courses registered for course challenge or for course audit must be approved by the department offering the course. During this time period a student may change enrolment in course challenge from one course to another, or to regular enrolment in the course.

Enrolment for course audit, course challenge and course changes must be done in person at the department offering the course.

### Extended Course Change Period

#### Regular Term – Class Days 6-15

After the fifth day of classes to the 15th day, courses may be added only with special permission of the chair and instructor concerned. No courses can be added or changed to audit status after this time. Courses may be dropped without academic record notation. However, if a student drops all term courses, the withdrawal will be noted on the academic record. A student may not withdraw from course challenge without substitution of a regular course enrolment. During the first ten days of classes, he/she may change enrolment in course challenge from one course to another, or to regular enrolment in the course. Permission of the department is required.

Financial penalties apply to courses dropped during class days 6 to 10. There is no refund for courses dropped after day 10 of classes.

## Course Drop Period

### Regular Term – Class Days 16-25

No courses can be added or changed to audit status after the fifteenth day of classes.

After the 15th to the 25th day of classes, courses may be dropped by the student via the web at <http://sis.sfu.ca>. Courses dropped within this period will be automatically recorded with a WD notation on the student's academic record. There is no refund for courses dropped during this period. Students can apply to drop courses for extenuating circumstances at this time and if approved, the notation will be WE rather than WD.

During the sixth to twelfth class week a course(s) may be dropped only in extenuating circumstances. If approved, there will be a WE notation on the student's academic record for specific courses dropped. Apply to Student Services. Requests arising after the twelfth week, or requests relating to courses completed in a previous term, are referred to as 'retroactive' and follow the same procedures as above but may take longer to adjudicate.

**Note:** Extenuating circumstances are defined as unusual circumstances beyond the student's control which make it impossible for the student to complete the course. If a course drop is being considered after the 12th week of classes, it is recommended that students seek advice from Academic Advising and Student Success or their department advisor.

### Withdrawal from the University

Students wishing to withdraw from all courses in a term must follow the same schedule as outlined above in Term Course Changes. Specific term dates can be found in <http://sis.sfu.ca>.

For regular intersession and summer session terms, there is no refund for withdrawal from all courses in a term after day 10 of classes.

Official records will be updated to record the date on which term withdrawal was effected. The withdrawal date for students who withdraw after the fifth day of classes will be recorded on the academic record.

## Examinations

Final examinations will normally be held during the last two weeks of each term (Intersession and Summer Session exams are held in the last week of the session). Examination period dates are outlined in the *Academic Calendar of Events*, and in the *Undergraduate Schedule of Classes and Examinations* (<http://students.sfu.ca/enrollment/schedule.html>). Students must check the exam schedule when planning course selections. Students are reminded that final examinations may be scheduled at any time during the examination period and that students should avoid making travel or employment arrangements for this period. Students are not normally allowed to enrol in courses with conflicting examination times. Students who have a good reason to enrol in classes with conflicting exam times must seek permission from the departments who are offering those classes.

There are instances where students are faced with examination hardship, which is defined as

- three or more end-of-term examinations scheduled within a 24 hour period
- an examination at one location (e.g. the main Burnaby campus) followed immediately by an exam at another location (e.g. the Surrey campus).

For three or more exams, a student shall be given a new exam date (within the established exam period) for the second exam causing hardship by the respective instructor or department/faculty. For students with exams at more than one location, advance arrangements will be made by the instructor or department/faculty to write both exams at a single

location. Students must notify the instructor(s) and department one month prior to the exam date.

Each student is required to participate in assigned work during the term. The grades obtained for that work may be used to determine the final course standing. A passing grade in any exam does not ensure a passing grade for the course.

Students who miss exams because of illness or for compassionate reasons must communicate with their instructor (see DE grade).

A student may not rewrite a final paper or examination unless he/she re-enrols for the course and fulfils course requirements as outlined by the instructor.

In-class final examinations are not to be held before the beginning of the official examination period. Take-home examinations cannot be due until the commencement of the official examination period.

Instructors are required to submit grades within 96 hours after the exam via the on-line grade roster, to Records and Registration. (Please refer to exam procedures at <http://students.sfu.ca/academic/integrity/resources/examprocedures.html>.)

## Grades

The following three grading systems are used at Simon Fraser University.

### Standard Grade System

Letter grade	Definition	Numerical equivalent
A+	excellent performance	4.33
A		4.00
A-		3.67
B+	good performance	3.33
B		3.00
B-		2.67
C+	satisfactory performance	2.33
C		2.00
C-	marginal performance	1.67
D		1.00
F	fail (unsatisfactory performance)	0.00
FD	fail (academic discipline)	0.00
N	did not write final exam or otherwise complete course	0.00

### Competency Based Grades

This grading system is based on satisfactory acquisition of defined skills or successful completion of the course learning outcomes.

Letter grade	Definition	Numerical equivalent
P	satisfactory performance or better (pass, ungraded)	no equivalent
F	fail (unsatisfactory performance)	0.00
FD	fail (academic discipline)	0.00

### Practicum Grades

This grading system is based on satisfactory acquisition of the practicum.

Letter grade	Definition	Numerical equivalent
P	satisfactory performance or better (pass, ungraded)	no equivalent
W	withdrawn	no equivalent

### Student Record and Transcript Notations

Notations are placed on a student's record to indicate a status or standing and provide additional

information to the student and the University. Notations do not impact a student's grade point average.

Letter grade	Definition	Numerical equivalent
AE	aegrotat standing, compassionate pass	no equivalent
AU	audit	no equivalent
CC	course challenge	no equivalent
CF	course challenge fail	no equivalent
CN	did not complete challenge	no equivalent
CR	credit without grade	no equivalent
FX	formal exchange	no equivalent
WD	withdrawal	no equivalent
WE	withdrawal under extenuating circumstances	no equivalent

### Temporary Grades

Temporary grades are assigned for specific circumstances and will convert to a final grade according to the grading system used in the course. Note that temporary grades revert to one of the standard, competency or notations as shown above.

Letter grade	Definition	Numerical equivalent
DE	deferred grade	no equivalent
GN	grade not reported	no equivalent
IP	in progress	no equivalent

### Explanation of Standard Grades

#### FD Grades

The letter grade FD (fail, academic discipline) is given by the chair of the department when a student has committed academic dishonesty (see Policy S10.01 Appendix 3). The grade will remain on a student's transcript until two years following graduation at which time it will convert to F.

#### N Grades

The letter grade N (incomplete) is given when a student has enrolled for a course, but did not write the final examination or otherwise failed to complete the course work, and did not withdraw before the deadline date. An N is considered an F for purposes of scholastic standing.

A student receiving a grade of N must re-enrol for the course and participate in the course again, completing course requirements approved by the instructor, to achieve a different evaluation.

### Explanation of Competency Based Grades

#### P Grades

The designation P (pass) will be given when a student successfully completes a course graded on a pass (P) or withdrawn (W) basis. This grade has no numerical equivalent and does not affect the term grade point average or the cumulative GPA.

#### W Grades

The designation W (withdrawn) will be given when a student is withdrawn after the course drop period for a course graded on a pass (P) or withdrawn (W) basis. The grade of W has no numerical equivalent and does not affect either the term grade point average or the cumulative grade point average.

### Explanation of Student Record and Transcript Notations

#### AE Grades

Aegrotat standing (AE) may be awarded in an incomplete course on medical or compassionate grounds by the registrar acting on the recommendation of the instructor or department chair.

Written evidence must substantiate such a request, given that the course requirements have been substantially fulfilled. This evidence normally must be received by the registrar or department within 96 hours of a scheduled final exam or within 96 hours of the last day of term lectures for which such standing is requested. Courses for which aegrotat standing is awarded are not included in the GPA calculation.

#### AU Notation

Audit is an AU notation that is recorded when a student has approval from the department not to complete the course for credit. The last day to audit a course is the end of week one of the term. Audited courses will not count toward degree requirements.

#### CC Grades

Course Challenge Completed is a grade for a student who has been enrolled for a course challenge, subject to an assessment equivalent to the course's final exam plus an interview which may include an oral and/or practical exam, all to be arranged and approved by the department chair. Departments may hold course challenge exams at any time after the term's start. A performance equivalent to a C grade or higher is required for a successful course challenge.

The department concerned must submit a report to the registrar on or before the last day for regular grades submission for that term indicating the final disposition for the course challenge in the term. There is no provision for extension or deferral. Results will be recorded by departments as successful, unsuccessful or unattempted. Successful results will appear on transcripts and statements of standing with the entry CC in the grade column and with units shown. The CC grade has no numerical equivalent and is not included in the grade point average. The grade of CC may not be applied in any way toward application for scholarships, bursaries or loans.

#### CF Grades

The Challenge Failed grade of CF is given for unsuccessful course challenge when a student performs unsatisfactorily and fails a course challenge. The grade has no numerical equivalent and is not included in the calculation of the grade point average.

#### CN Grades

The Challenge Not Completed grade of CN is given for unattempted course challenge when a student is enrolled for a course challenge but never attended the course and did not withdraw before the deadline date. The grade has no numerical equivalent and is not included in the calculation of grade point average.

#### CR Grades

The Credit Granted notation is to recognize course work completed at another institution that is also being granted credit towards a Simon Fraser University degree program. The CR grade, which has no numerical equivalent and is not included in the grade point average calculation, may only be assigned by the Office of the Registrar and is typically used for double degree programs.

#### FX Grades

The Formal Exchange/Double Degree grade of FX is assigned for formal exchange and double degree courses only. The grade has no numerical equivalent and is not included in the GPA calculation.

#### WD Notation

The Withdrawal notation of WD identifies a course freely dropped by the student. The notation WD is not a grade and does not affect the grade point average. Different time periods are in effect for intersession and summer session. For term specific dates, refer to the *Undergraduate Schedule of Classes and Examinations* located at <http://students.sfu.ca>.

#### WE Notations

The Withdrawal for Extenuating Circumstances notations of WE identifies a course drop approved for extenuating circumstances normally during week six

through to the end of week 12 of a term. The notation WE is not a grade and does not affect the grade point average. Extenuating circumstances are defined as unusual circumstances beyond the student's control which make it impossible for the student to complete the course. Different time periods are in effect for intersession and summer session. For term specific dates, refer to the *Undergraduate Schedule of Classes and Examinations* (<http://students.sfu.ca>).

### Explanation of Temporary Grades

#### DE Grades

A deferred grade is a temporary grade assigned at the end of the term for incomplete course work. A deferred grade will revert to a letter grade or notation. The DE notation can be issued in two circumstances.

- A student must request a DE within 24 hours after the final examination date or final course work is submitted on the basis of documented medical or compassionate grounds. Within four days the student must also submit a physician's certificate or other document substantiating the request for deferral. Failure to submit supporting documents may result in an F grade.
- The course instructor decides to defer submitting a final grade pending completion of further work by a student or students.

All unchanged DE notations will be converted automatically to F after the end of the first week in the following term. In exceptional cases, an extension may be granted by the instructor and must be approved by the department chair and submitted in writing to the Office of the Registrar with a final deferral date. Normally, the maximum extension allowed is the end of the term following the original deferral. DE is a temporary grade that will revert to a letter grade or notation.

#### GN Notation

The Grade Not Reported notation may be used if circumstances beyond the instructor's or University's control make it impossible for grades to be assigned for the entire class. The notation has no numerical equivalent and does not affect either the term grade point average or cumulative grade point average. The dean of the faculty responsible advises the registrar, in writing, that the notation GN is required for a course until grades can be submitted. GN is a temporary grade that will revert to a letter grade or notation.

#### IP Grades

An In Progress grade of IP is a temporary grade assigned for incomplete practicum courses in the Faculty of Education. The grade has no numerical equivalent and is not included in the grade point average. IP grades will convert to P or W.

### Credit for the Term

All credit earned for the term will be granted regardless of the term's grade point average (GPA). Credit may be granted for a specific course/topic once only. See "Repeated Simon Fraser University Courses" on page 27.

### Statement of Grades

At the end of each term, grades for that term are made available to students on the student information system. Students who are not in good academic standing will be notified. Grade changes will be processed as soon as possible. Information concerning grades is not released to unauthorized persons without written consent of the student.

### Grade Point Averages

The grade point average (GPA) is a method of expressing the student's performance as a numerical average. Each letter grade is assigned a numerical equivalent, which is then multiplied by the unit value

assigned to the course to produce the grade point. Grades without a numerical equivalent are not included in the calculation of the grade point average.

Term grade point average (GPA) is computed by dividing the total grade points earned by the total units completed in the term to the second decimal place.

	Letter Grade	Numeric Value	Units	Grade Point
course 1	A	4.00	3	12.00
course 2	A+	4.33	3	12.99
course 3	B-	2.67	3	8.01
course 4	C	2.00	3	6.00
course 5	F	0.00	4	0.00
Total			16	39.00
term grade point average: 39/16 = 2.44				

The cumulative grade point average (CGPA) expresses performance as a numerical average for all terms completed and is closed in the term in which a degree or diploma is awarded by senate. A new CGPA begins when a student returns for further studies following the awarding of a degree or diploma.

The CGPA is calculated by dividing the total grade points earned to date by the total units undertaken to date to the second decimal place. The CGPA calculated for terms completed prior to the fall term 1979 includes repeated courses.

The upper division grade point average (UDGPA) is calculated by dividing the total grade points earned in upper division courses by the total units assigned for those courses, counting only the higher grade in courses that have been repeated.

### Standing Required for Continuance

Every student is expected to maintain an acceptable scholarship standard — specifically, a minimum 2.00 CGPA. A student who does not do so is considered to be performing unsatisfactorily. The required standing for continuation will be calculated after an attempt of nine units at Simon Fraser University.

### Academic Alert

A student whose term grade point average (GPA) falls below 2.00, but who is not placed on any of the academic standings given below, should seek guidance at Academic Advising and Student Success.

### Academic Probation

A student who has attempted at least nine units and has a CGPA of less than 2.00 shall be placed on academic probation (OAP) and may not enrol in a course overload. A student on OAP may not receive a 'letter of permission' to attend another university or college. See "Reactivation and Readmission" on page 25. A student on academic probation shall be evaluated at the end of each term, and if

- the term GPA and the CGPA are each 2.00 or higher, the student shall be in good academic standing
- the term GPA is 2.00 or higher, but the CGPA is less than 2.00, the student shall continue on academic probation (CAP)
- the term GPA is less than 2.00, but the CGPA is 2.00 or higher, the student shall continue on academic probation (CAP). (This could occur if a student repeats a course.)
- both the term GPA and the CGPA are less than 2.00, the student shall be required to withdraw (RTW) from the University or, if previously required to withdraw (RTW), shall be placed on extended withdrawal (PW)

## Required to Withdraw

A student may be required to withdraw (RTW) after one or more terms on academic probation (see 'outcomes for a student on academic probation' below). A student on RTW may not receive a letter of permission to attend another university or college.

## Extended Withdrawal

A student may be placed on extended withdrawal (PW) after she/he is required to withdraw (RTW), is readmitted and subsequently is on academic probation for one or more terms (see *Outcomes for a Student on Academic Probation* below). A student on extended withdrawal (PW) may not receive a letter of permission to attend another university or college.

## Outcomes for a Student on Academic Probation

A student on academic probation shall be evaluated at the end of each term. If, at the end of the term,

- the SGPA and the CGPA are each 2.00 or higher, the student shall be in good academic standing
- the SGPA is 2.00 or higher, but the CGPA is less than 2.00, the student shall continue on academic probation
- the SGPA is less than 2.00, but the CGPA is 2.00 or higher, the student continues on academic probation (this could occur if a student repeats a course).
- both the SGPA and the CGPA are less than 2.00, the student shall be required to withdraw (RTW) from the University or, if previously required to withdraw (RTW), shall be placed on extended withdrawal (PW)

## Options for Required to Withdraw Students

Students whose status is Required to Withdraw (RTW) may choose one of the following options.

- apply for entry to the Student Success Program and an extension to the academic probation period (refer to 'Extended Academic Probation for First Time RTW Students' section below)
- apply for readmission based on subsequent completion of transferable courses from another institution (refer to 'Readmission after Required to Withdraw' section below)

**Note:** students who choose to attend another institution subsequent to being Required to Withdraw for purposes of applying for readmission are not eligible for entry to the Student Success Program.

## Extended Academic Probation for First Time RTW Students

A student who is required to withdraw for the first time may be eligible to enter the Student Success Program, a two term program focusing on academic and learning skill development with concurrent credit

course enrolment. Students cannot exceed nine units (unless advance special permission is received), and may not receive a letter of permission to attend another post-secondary institution while in the program. Entry requirements, set out by the program, are available through the Student Success Program office. Acceptance and participation provides an extended academic probation period. A student can only attend the program once in their academic career; normally withdrawal and/or unsuccessful program completion constitutes one attempt.

## Evaluation and Continuance Requirements during Extended Academic Probation

To participate and continue, students must fulfil all required components in each of the two terms. Progress evaluation occurs throughout the program and at the end of each term. Students deemed not to be meeting the requirements at any time (academic and/or non-academic) will be withdrawn from the program, dropped from enrolled courses, and will be 'Required to Withdraw' from the University.

## Outcomes for a Student on Extended Academic Probation

### End of Term One

- the semester grade point average (SGPA) and the cumulative grade point average (CGPA) are each 2.00 or higher, the student shall be in good academic standing
- the SGPA is 2.00 or higher, but the CGPA is less than 2.00, the student shall continue on academic probation
- the SGPA is less than 2.00, but the CGPA is 2.00 or higher, the student continues on academic probation (this could occur if a student repeats a course).
- both the SGPA and the CGPA are less than 2.00, the student shall be required to withdraw (RTW) from the university unless the student has satisfactory participation in the program

### End of Term Two

Evaluation of academic standing reverts to the academic standing and continuance policy that applies to students who are not on extended academic probation.

## Grade Point Averages Needed for Graduation

Grade point averages (GPAs) used for graduation are the minimum GPAs that must be achieved to satisfy the requirements for a degree or other credential. The graduation GPA must be obtained both on the overall course work (CGPA) as well as on the upper division subset of that work (UDGPA).

In addition, program GPAs are the required minimum to satisfy the requirements of an honors, major, extended minor or minor program. In each case, the

program GPA must be obtained both on the overall course work (CGPA) as well as on the upper division subset of that work (UDGPA) in the program area.

The graduation and program GPAs specified below are University minimum requirements; individual faculties and departments may, with senate approval, have higher requirements.

In the event of repeated courses, only the higher grade is used in these GPA calculations.

Overall minimum requirements for all courses (CGPA) and all upper division courses (UDGPA) completed at Simon Fraser University	
joint honors degree*	3.00
honors degree*	3.00
general degrees	2.00
certificates	2.00
post baccalaureate diplomas	2.50
Program GPAs	
Program plan minimum requirements for all courses and for all upper division courses completed in the program area	
joint honors*	3.00
honors*	3.00
joint majors	2.00
major	2.00
extended minors	2.00
minors	2.00
*students who have obtained a GPA of 3.5 or greater in both the graduation and program categories specified above will receive the designation of joint honors or honors (first class).	

## Convocation

Convocation is held in June and October. Students who fulfil degree requirements during the fall or spring terms may attend the June ceremony. Graduates of the summer term attend the October ceremony.

### Application for Graduation/Granting of Degree, Certificate or Diploma

Each candidate for a degree, certificate, or diploma must formally apply for graduation.

For information about how to apply to graduate and for specific deadlines or ceremony dates, please visit <http://www.sfu.ca/convocation>.

### Notification of Award by Senate

Following senate approval, each student who has been awarded a degree, certificate or diploma will receive a letter of confirmation from the registrar.

# General Regulations

## Student Responsibility

A student is expected to fulfil the requirements and write the examinations in all courses for which he/she is enrolled after the date shown in the *Undergraduate Schedule of Classes and Examinations* (<http://students.sfu.ca/deadlines>) as the last date to drop courses. It is the student's responsibility to ensure that Student Services has the proper information regarding courses in which the student is enrolled. Except in cases of illness, or for compassionate reasons, failure to write the exam constitutes a course failure. A student may receive credit for only the courses in which he/she is officially enrolled according to Student Service's records.

## Academic Honesty and Student Conduct

### Academic Honesty

All members of the University community share responsibility for academic standards and the reputation of the University. Academic honesty is a cornerstone of the development and acquisition of knowledge. Academic honesty is a condition of continued membership in the University community.

Academic dishonesty, like other forms of dishonesty, is misrepresentation with intent to deceive or without regard to the source or the accuracy of statements or findings. Academic dishonesty, in whatever form, is ultimately destructive of the University's values. Further, it is unfair and discouraging to the majority of students who pursue their studies honestly. Scholarly integrity is required of all members of the University.

The following examples are representative but not exhaustive of activities constituting academic dishonesty: plagiarism (presenting the work of another person as your own); submitting the same work more than once without prior approval; cheating; impersonation (having someone else write your exam); submitting false records or information (forged medical notes); stealing or destroying the work of another student; removing, mutilating, misplacing or destroying books or other library material; unauthorized or inappropriate use of computers, calculators and other forms of technology in course work, assignments or examinations.

The code of academic honesty is contained in policy S10.02 on the Web via [www.sfu.ca/policies/students](http://www.sfu.ca/policies/students).

### Penalties for Acts of Academic Dishonesty

Penalties imposed by the University for academic dishonesty may include but are not limited to one or more of the following: a warning, a verbal or written reprimand, reassessment of work, failure on a particular assignment, failure in a course, denial of admission or readmission to the University, de-registration, forfeiture of University awards or financial assistance, suspension or permanent suspension from the University or degree revocation.

### Student Conduct

Simon Fraser University is committed to creating a scholarly community characterized by civility, diversity, free inquiry, mutual respect and individual safety. The code of student conduct defines students' basic responsibilities as academic community members, to define inappropriate student conduct and to provide procedures and penalties to be invoked if they engage in such unacceptable behavior. Each student is responsible for his/her conduct which affects the University community. The

code shall not be construed to unreasonably prohibit peaceful assemblies, demonstrations or free speech.

The following are representative but not exhaustive of behaviors constituting misconduct: harm, injure or threaten any person (in person or through electronic means); disruptive or dangerous behavior; behavior which results in damage, destruction and theft of University property or the property of any University member; forgery or alteration of University documents or records; misuse of University resources including information (computing) resources; unauthorized entry or presence in University premises; misuse of student disciplinary procedures. The code of student conduct policy S10.01 is available in the Library, any department, or at [www.sfu.ca/policies/students](http://www.sfu.ca/policies/students).

### Penalties for Acts of Student Misconduct

Penalties/remedies imposed by the University for misconduct may include but are not limited to one or more of the following: a warning, a verbal or written reprimand, exclusion from specified areas of the University, restitution or other ameliorative measures, counselling, denial of admission or readmission to the University, de-registration, forfeiture of University awards or financial assistance, suspension or permanent suspension from the University.

### Procedures for Academic Dishonesty and Student Misconduct

Procedures to be followed by the University in imposing a penalty for acts of academic dishonesty or acts of misconduct or an appeal therefrom are detailed in the policy establishing the university board on student discipline and the senate committee on disciplinary appeals (policy S10.02). This policy is available in the Library or any department office, or on the website [www.sfu.ca/policies/students](http://www.sfu.ca/policies/students).

## Student Appeals

See "1.16 Graduate Student Appeals" on page 226 for graduate student appeals. Students may appeal certain University decisions as follows.

### Reconsideration of Grades

Failing grades have been checked very carefully and appeals seldom result in higher grades except where a clerical error has occurred. See academic policy T20.01 at [www.sfu.ca/policies/teaching](http://www.sfu.ca/policies/teaching).

### Admission and Readmission

Appeals for admission and readmission may be considered by the committee to review university admissions. Student Services provides appeal forms and advice about submitting an appeal. Download a pdf of the appeal form at <http://students.sfu.ca/forms>.

### Course Withdrawal

During the sixth to twelfth class week, a course(s) may be dropped only in extenuating circumstances. If approved, a WE notation appears on the academic record for specific courses dropped. Apply to the Academic Appeals Manager, Student Academic Appeals, Enrolment Services. Requests arising after the twelfth week, or requests relating to courses completed in a previous term, are 'retroactive' and follow the same procedures but may take longer to adjudicate. Student Services provides appeal forms and advice on submitting an appeal. Download an appeal form at <http://students.sfu.ca/forms>.

Extenuating circumstances are defined as unusual circumstances beyond the student's control which make it impossible to complete the course. If a course

drop is being considered after the twelfth week of classes, students should seek advice from Academic Advising or their department advisor.

### Term Withdrawals

Students wishing to withdraw from all courses in a term will follow the same schedule as outlined above. See <http://students.sfu.ca/forms> for appeal forms and <http://students.sfu.ca/deadlines> for term dates.

### Tuition Fee Appeals for Refund

The enrolment appeals committee hears appeals for tuition fee refunds, penalties for classes dropped, and for late payment due to extenuating circumstances beyond the student's control. The appeal must be supported with proper documents, i.e. medical and/or (in cases that involve a family death) a death certificate. Financial hardship alone does not qualify.

The student must appeal within one calendar year from the time the class(es) is dropped and charges incurred. If the student is uncertain about health, finances, time or other resources, students are advised to be conservative in committing themselves to classes. Student Services provides appeal forms and advice about submitting an appeal. The appeal form is available at <http://students.sfu.ca/forms>.

### Appeals of Academic Penalties

Disputes about the findings may be brought to the university board on student discipline (policy T10.03). Appeals on the following three grounds may be brought to the senate committee on disciplinary appeals (also Policy S10.04).

- that there was unfairness in the process at the hearing
- that the penalty imposed was inappropriate
- that new evidence has emerged that was not available at the hearing and which casts doubt on the accuracy of the finding

### Entry to Limited Enrolment Program or Faculty

Appeals may be considered by the appropriate chair, director or dean.

### Senate Appeals Board

The senate appeals board considers cases in which a student or former student feels aggrieved by the decision of a faculty, department or other administrative unit relating to an enrolment in courses, University withdrawal, graduation eligibility, program approval, or a matter relating to academic standing when special circumstances are present. Appeals must be submitted in writing, giving the grounds for the appeal. Student Services provides appeal forms and advice on submitting an appeal. Obtain the appeal form at <http://students.sfu.ca/forms>.

## Class Interruption

Simon Fraser University makes reasonable efforts to ensure that classes and courses proceed on a regular basis and without interruption. Faculty have certain discretion to cancel or change the timetable for their classes; they will endeavor to give reasonable notice of any cancellation or change. The University will not be responsible for cancellation or change of any class. Neither will Simon Fraser University be responsible for the interruption or termination of any class or course of instruction which results from fire, riot, labor disruption or any other event which occurs despite the University's efforts, or for failure to give notice of the interruption or termination.

# Undergraduate Fees

## Tuition Fee Schedule

Simon Fraser University assesses undergraduate tuition fees in accordance with a schedule of fees based primarily on the number of units in which the student enrolls. Various special fees may be assessed by the University in certain circumstances or for specific purposes. All fees are subject to change, subject to provincial legislation and board of governors approval.

	Basic Tuition Fee <sup>1</sup>	Differential Tuition Fee for International Students <sup>3</sup>
normal credit (per unit)	\$157.30	\$490.70
BUS courses at 200 division and above (per unit)	\$209.80	\$543.20
CMPT courses at 200 division and above (per unit)	\$165.20	\$498.60
ENSC courses at 200 division and above (per unit)	\$173.10	\$506.50
course challenge (per unit)	\$157.30	\$490.70
audit (per unit)	\$78.65	\$245.35
Co-operative Education practicum (per term)	\$665.40	\$665.40

Subject to the notes below, and to the graduate fee schedule:

1. The basic tuition fee schedule applies to an undergraduate student who enrolls for an undergraduate or graduate course, or courses, who establishes or has established to the satisfaction of the University that, at the time of commencement of the term, he or she is either a citizen of Canada or has the status of a permanent resident of Canada.
2. The differential tuition for international students schedule applies to each undergraduate student who enrolls to undertake an undergraduate or graduate course, or courses, who does not establish or has not established to the satisfaction of the University that, at the time of commencement of the term, he or she is either a citizen of Canada or has the status of a permanent resident of Canada.
3. The University reserves the right at any reasonable time to require any individual student to establish proof of status claimed.
4. For the purposes of assessing fees, an undergraduate student is any student enrolled as a student at the University except (a) a student who has been admitted by the senate graduate studies committee to undertake work towards a master's degree, PhD degree or other graduate program at Simon Fraser University and who enrolls for such work, or (b) a student who has been admitted by the senate graduate studies committee to undertake work as a qualifying, special or exchange student at Simon Fraser University and who enrolls for such work. Those in (a) and (b) are assessed fees under the graduate tuition fee schedule but if they have approval to undertake some undergraduate course work supplementary to the program, they will be assessed tuition fees according to the basic tuition fee schedule for such work.
5. Fees are not transferable from one term to another.
6. For students enrolled in any combination of eight week or 16 week courses, tuition fees will be assessed per unit as shown in the tuition fee schedule.

## Student Services and Recreation-Athletics Fees

The Student Services Fee (SSF) and Recreation-Athletics Fee (RAF) are assessed to all students enrolled for credit courses that are offered at the Burnaby, Simon Fraser University Vancouver and Simon Fraser University Surrey campuses according to the table below. Those enrolled in audit courses, on leave, designated 'off-campus' courses, or distance education courses only do not pay these fees.

	SSF	RAF	Total
three or fewer units	\$38.62	\$32.18	\$70.80
Intercession only	\$38.62	\$32.18	\$70.80
summer session only	\$38.62	\$32.18	\$70.80
four or more units	\$38.62	\$64.36	\$102.98
any combination of intercession, summer session, summer term	\$38.62	\$64.36	\$102.98
any combination of co-operative education work term and credit course	\$38.62	\$32.18	\$70.80

## Student Activity Fee

A student activity fee, determined by the Simon Fraser Student Society, is collected from all students enrolled in credit courses with the exception of students completing courses for audit purposes only. For a breakdown of this fee see "Simon Fraser Student Society" on page 457.

Student Activity Fee – payable by all students	\$62.14
*designated 'off-campus' courses only	\$31.09
*3 or fewer course units	\$31.09
*summer session courses only	\$31.09
*Intercession courses only	\$31.09
co-operative education only	\$31.09
any combination of intercession, summer session, summer term, and co-operative education term	\$62.14
*persons aged 60 or more and who are Canadian citizens or have permanent resident status in Canada are exempt from this fee	

## Special Fees

<b>Admission Deposit for New Students</b> See "Payment of the Admission Deposit for New Students" on page 35.	\$250.00
<b>Application Fee</b> <i>Level 1</i> Each time an applicant applies for admission or readmission, a \$45 application fee is required. This fee, non-refundable and not applicable to tuition fees, must accompany the application for admission or be paid soon after making an application.	\$45.00
<i>Level 2</i> A \$100 application fee is required for all applicants whose academic records, in whole or in part, originate outside of BC. (A level 1 fee is assessed if the documents originate from a Canadian high school, or if the applicant is participating in a recognized exchange program between Simon Fraser University and another institution.) This fee is non-refundable and not applicable to tuition fees.	\$100.00
<b>Library/Identification Card Replacement</b>	\$16.19
<b>U-Pass Card Replacement</b>	\$20.00
<b>Replacement for an Original Degree, Diploma or Certificate Parchment</b>	\$21.50
<b>Residence Application</b>	\$25.00
<b>Graduation</b> granting of a degree award of certificate or diploma late application to graduate (non-refundable) regalia rental fee	\$35.00 \$20.00 \$20.00 \$25.00
<b>International Program</b> For students who have been selected and have accepted the offer to participate in an international program, the following fees are applicable: formal exchange programs participation international field school administration computing science dual degree	\$150.00 \$150.00 \$700.00
<b>Back on Track Student Success Program</b> Depending on academic standing at the time of entry or continuance in the program, the fees will be as follows. BOT 100, 130 BOT 110 BOT 120, 140	\$250.00 \$350.00 \$450.00

## Universal Transit Pass

The U-Pass fee is \$104.36 per term. The following are not eligible for U-Pass and will be exempt from this fee.

- students who are not assessed Simon Fraser Student Society or Graduate Student Society fees (see "Student Activity Fee" on page 33)
- students who are enrolled in Distance Education courses only
- students who are enrolled in designated 'off-campus' courses only
- students who are on leave
- students who do not live in the GVRD and are enrolled in designated 'on-campus' courses which are scheduled to meet a total of *one day or less per week* on average throughout the term

The following will be exempted from the U-Pass fee by following the procedures for U-Pass exemption at the

U-Pass website ([www.sfu.ca/upass](http://www.sfu.ca/upass)). Please note that supporting documentation will be required.

- students who do not reside in the Greater Vancouver Regional District (GVRD) and who attend classes at a Simon Fraser University campus on average one day per week or less during the term
- students who are enrolled with TransLink as handyDART users or hold a valid non-transferable TransLink transit pass
- students who hold a valid TransLink U-Pass issued from another post-secondary educational institution
- students who have a documented physical or psychological condition which prevents public transit use

The U-Pass fee is charged to all students at the time of enrolment in courses. For exempt students, the U-Pass fee reversal will be applied to accounts by the first week of classes. The U-Pass fee is non-refundable after the end of the second week of the term.

## Mandatory Supplementary Course Fees

In addition to credit course fees, mandatory supplementary course fees may be assessed for individual courses in addition to basic tuition and are deemed necessary for successful completion of the course. Mandatory supplementary course fees cover additional costs associated with, for example, such items as field trip expenses or special costs/handling involved in distance education courses.

A schedule of these fees appears below, and is also published in the *Undergraduate Schedule of Classes and Examinations* as well as in departmental course outlines. The fees are approved by the vice-president finance and administration, following the recommendation of the advisory committee on mandatory supplementary course fees. Questions regarding these fees may be directed to the department initiating the fee, Student Services, or the vice-president finance and administration.

Mandatory supplementary course fees are not charged for regular credit instruction services which may include

- evaluation of work or performance, such as marking of papers and exams
- laboratory use, including materials and supplies that are consumed during laboratory use. (Departments may charge a refundable deposit for materials used by the student and returned to the University in reasonable condition at the end of the course.)
- basic library facilities including one library card and access to collections
- basic microcomputer laboratory use
- materials or services required as a result of the method of instruction such as audio visual equipment, course outlines, study rooms and films and video tapes that are integral to the instruction and do not become property of the student.

Photocopied materials, computer disks and audio visual tapes may replace or enhance a required text as a means of instruction and are therefore not mandatory supplementary course fees. Many prepared packages will be distributed through the SFU Bookstore. It may be necessary to distribute some materials within departments. Disclosure of these fees will be made in each course outline.

### Archaeology

ARCH 435..... \$500

### Biological Sciences

BISC 306..... up to \$153  
BISC 310..... up to \$120

### Sociology and Anthropology

SA 364..... \$40  
SA 371..... \$100

## Viewing the Student's Account

When a change is made to any part of the student's enrolment, the student account balance will be affected. This new balance will be calculated overnight by the University's computer system and will be available the next day. Students should check the new account balance before paying fees. Obtain account balance information at <http://sis.sfu.ca>.

## Payment of Fees

Regardless of the payment method, always provide a student number with all financial transactions. The Simon Fraser University student number is the only account reference that the University uses so it is very important to include this information.

There are several methods to pay fees.

### Internet/Telephone Banking

- set up Simon Fraser University as a Bill Payee from the student's bank account
- use the Simon Fraser University Student Number as the account / invoice/billing number (note: some banking institutions look for a ten digit number for the student/billing number. In this case, add a zero to the beginning of the student number.)
- go to "make a payment"
- enter amount of payment
- record "confirmation number" for the student's records
- allow two to three business days for the payment to be posted on to the student's Simon Fraser University Student Account

### In-person on campus

Students can drop off a cheque or money order in the mailbox at Simon Fraser University's main campus in the mailbox at Simon Fraser University's main campus in MBC 3000. Make the cheque payable to Simon Fraser University, with the Simon Fraser University student number clearly printed on the front.

Student can also pay by cheque, money order or debit card at the general enquiries counter on any of the three campuses. (Credit cards are not accepted for tuition fee payments.)

- Simon Fraser University's main campus at the Student Services general enquiries counter, located in MBC 3000. Monday – Thursday 9 am – 6 pm, and Friday 10 am – 4:30 pm
- Simon Fraser University Surrey, room 250, 13450 102 Avenue, Surrey, Monday – Friday 9 am – 4:30 pm, phone 778.782.7400.
- Simon Fraser University Vancouver, 515 West Hastings Street, Vancouver. 778.782.5000 Tel. Monday – Thursday 10 am – 7 pm, and Friday 10 am – 5 pm.

### By Mail

Mail a cheque or money order (do NOT send cash) to Student Accounts, Student Services, MBC 3000, Simon Fraser University, 8888 University Drive, Burnaby, BC V5A 1S6.

Please allow five working days for a payment to be posted. There is a \$25 administrative handling fee for all returned cheques.

## Payment of the Admission Deposit for New Students

New students must pay a non-refundable admission deposit to confirm acceptance of the offer of admission to undergraduate studies given by the University.

The deposit will be applied to the cost of tuition. The deposit is not an additional charge to the tuition fee assessment.

New students may pay the \$250 admission deposit by credit card through goSFU (<http://sis.sfu.ca>) under "Finances." This is the only regular fee payable by credit card.

## Outstanding Accounts

Students are required to pay any outstanding balance in their account to be eligible to enrol in classes. In order to ensure sufficient time for payments to clear, students should pay the balance of these account five working days prior to attempting to enrol in classes.

## Payment of Assessed Fees

The deadline for payment of fees is published in the *Undergraduate Schedule of Classes and Examinations* distributed each term. Credit for scholarships and bursaries will be given only on the authority of the Financial Aid and Awards office. Visit <http://students.sfu.ca/deadlines> for more information.

Students eligible for any awards or sponsorships will receive a refund from Student Services when the appropriate units are received and processed.

Students who are eligible for tuition fee waivers or holders of Faculty of Education tuition fee certificates (school associate certificates) must submit to Student Services the properly completed forms and payment for the total amount of the student activity fee, athletic fee, UPass (if applicable), and student services fee each term no later than the tuition and fee payment deadline.

## Cancellation of Enrolment

To cancel your entire enrolment, you must use the student information system to drop each of your courses.

To avoid financial penalties, you must drop all courses by the deadlines given in the *Undergraduate Schedule of Classes and Examinations* publication.

Non-payment of outstanding fees or non-attendance does not constitute cancellation of enrolment and grades based on incomplete or no work completed will be assigned. Visit <http://students.sfu.ca/deadlines> for more information.

## Refunds

When students who are enrolled in credit courses reduce the number of courses in which they enrolled, a refund may be granted provided the course change is made during the prescribed refund period. Special fees are not refundable, with the exception of the graduation fee and award of certificate or diploma fee.

## Tuition Refund Policy and Course Drop Penalties

### Regular Term and Intercession (May-June)

Space in Simon Fraser University courses is limited. Tuition refunds and penalties as outlined below are designed to discourage a student from holding space in courses(s) which the student eventually decides not to take.

The enrolment system monitors course drops by taking 'snapshots' of the number of courses (net course load) in which each student is enrolled. Penalties are assessed on decreases in net course load, not on units. The exact dates of 'snapshots' are published each term in the *Undergraduate Schedule of Classes and Examinations* under the heading *Deadlines*. However, the general dates of the three 'snapshots' taken are: first, approximately one week after all students have been given access to the enrolment system; second, end of week one of classes; and third, end of week two of classes.

The first and last 'snapshots' are compared and, if a student's course load has decreased, the student will be assessed a penalty for each course drop that resulted in a decreased course load. The penalty is \$50 is the course was dropped before the end of week two. After week two there is no refund of tuition fees for courses dropped.

### Summer Session (July-August)

Tuition penalties are not applied for dropping summer session courses.

## Overdue Accounts and Dishonored Payments

Students with overdue accounts will be considered to be in bad financial standing and will be precluded from enrolling in subsequent terms. In addition, the University will withhold certain services, including but not limited to the release of various letters and documents such as official transcripts of academic record and parchments for degrees, diplomas and certificates. An account that is delinquent without approved resolution will be forwarded to a collection agency for appropriate action.

A student who presents payment in the form of a cheque that is subsequently returned by the student's Letters of Permission financial institution for lack of sufficient funds or because a stop payment has been

placed on that cheque will be assessed a penalty fee of \$25. In the event that a student on more than one occasion submits a cheque that is dishonored for any reason, the University reserves the right to require all future financial transactions with the University to be by cash, certified cheque or money order. The University may cancel a student's enrolment in a term when payments made by the student are subsequently dishonored by the student's financial institution. Late payment fees will apply.

Students with overdue accounts will be assessed a late fee penalty on outstanding fees. 2% will be assessed each month on the outstanding balance, regardless of any pending scholarships, bursaries, awards, tuition waivers and school associate certificates. Total penalties will be adjusted to conform to Canadian laws and regulations when the final payment is made.

## Refunds Due to Overpayments

To obtain a refund due to an overpayment, students must submit a refund request. Visit <http://students.sfu.ca/fees> to obtain the refund request form. The website shows the refund cheque request deadline.

## Graduation Fee and Award of Certificate or Diploma Fee

If the candidate's application for a degree, certificate and/or diploma is not approved, a full refund is issued. Applications may not be transferred from one term to another and the required fee must accompany each application. Late fees assessed when applying after the first deadline are not refundable.

## Tuition Fee Appeals

Any student who considers he/she has just cause to appeal the application of University policy as it pertains to the assessment and refund of undergraduate tuition fees may submit an appeal in writing to the enrolment appeals committee. See "Tuition Fee Appeals for Refund" on page 32.

## Tuition Fee Certificates (T2202A)

All Simon Fraser University students, who have an active University computing ID, can print T2202A tax forms, starting from the 2003 tax year, via the web at <http://go.sfu.ca>. Financial records are retained for a period of seven years and then are destroyed. For the 2002 tax year, a \$10 fee is charged to reproduce the T2202A form.

For more information about how to print T2202A forms, visit <http://students.sfu.ca/fees/taxinfo.html>.

# Financial Aid and Awards

## Financial Aid and Awards

3200 Maggie Benston Student Services Centre,  
778.782.8600 Registrar Information Service (Touch  
Tone service only), 778.782.4356 general enquiries,  
778.782.4722 Fax, <http://students.sfu.ca/financialaid>

## Introduction

Students are eligible for a variety of financial assistance programs including entrance or continuing scholarships, bursaries, awards, and government student loans and grants. **Scholarships** recognize outstanding academic achievements; **bursaries** are awarded on the basis of a demonstrated financial need; **awards** generally acknowledge outstanding achievements or contributions to the community. **Government student loans and grants** are awarded on the basis of a demonstrated financial need by the student's province of residence. Normally, grants are funding that students do not have to repay.

These programs are administered by one of three agencies: Simon Fraser University (*University administered*), an external organization (*externally administered*), or a government (*government administered*).

### Eligibility

Students entering Simon Fraser University from secondary or high school, or transferring from a regional college or university, may be eligible for

- Simon Fraser University Entrance scholarships
- bursaries
- awards for the University community
- federal and provincial/territorial government student assistance (i.e. student loans and grants)

Students currently studying at Simon Fraser University may apply for

- scholarships for continuing students
- bursaries
- awards for the University community
- federal and provincial/territorial government student assistance (i.e. student loans and grants)

### Deadlines

#### University Administered Programs

Visit <http://students.sfu.ca/deadlines> for the most up-to-date information about deadlines for scholarships, awards, and bursaries.

#### Externally Administered Programs

See the specific award for deadlines.

#### Government Administered Programs

**The latest students can apply for full-time student loans** is six weeks before the study program ends as long as the student has provided all the required documentation. The latest a student can apply for **part-time student loans** is eight weeks before the study period ends.

#### Federal Loans for U.S. Students

For information about application deadlines, please visit <http://www.fafsa.gov>

### Special Information for Intercollegiate Athletes

Since Simon Fraser University competes in both the NAIA and the CIS, eligibility requirements for scholarships, awards and bursaries may differ for individual sports.

## General Information and Regulations

The following regulations apply generally to all financial assistance administered by the University.

- All scholarships, awards, and bursaries are given on the recommendation of the senate undergraduate awards adjudication committee. Committee decisions, when announced, are final.
- The University does not guarantee the payment of any scholarships, awards or bursaries other than those provided directly from University funds. If invested funds do not provide the necessary income for an endowed scholarship, award or bursary, payment may be reduced or withheld. The University reserves the right to withhold awards donated by individuals or organizations where the funds required have not actually been received.
- The University reserves the right to refrain from making an award if, in its opinion, none of the applicants meet the specified terms.
- Students must successfully complete the term for which they have received the award, or the award will be revoked.
- The individual student is responsible for knowing the deadlines, proper completion of the application forms and supplying all appropriate documentation for the various scholarships, awards and bursaries. Incomplete applications may be rejected.
- The senate policy committee on scholarships, awards and bursaries ensures that all scholarships, awards and bursaries administered by the University or listed in its Calendar, are in the best interests of the University as an academic institution. The terms of reference for scholarships, awards and bursaries should not include restrictive criteria unrelated to academic merit or financial

need such as race, creed, colour, sex, or national origin, when the committee determines these criteria are improper or irrelevant.

- The senate undergraduate awards adjudication committee has the right to give special consideration to course load requirements on scholarships, awards or bursaries for persons with disabilities who are unable to meet the course load requirements due to their disability. Supporting documentation may be required.
- Students who misrepresent themselves on application forms for scholarships, awards or bursaries will be subject to disciplinary action.
- Regulations which apply to a specific financial assistance category are within that subsection.

## University Administered Programs

### University Entrance Scholarships and Awards

Student Recruitment, Student Services, Maggie Benston Centre, Tel 778.782.4970 general enquiries, Fax 778.782.5399, <http://students.sfu.ca>

The University offers entrance scholarships and awards to outstanding students from across Canada. Our entrance scholarship program recognizes exceptional academic and community achievements of students entering directly from high school and BC colleges or equivalent.

The scholarships and awards described below reflect our current program. For complete descriptions and selection criteria applicable to students entering in the fall of 2010, please refer to the entrance scholarship

brochure and application material, available in fall 2009 at <http://students.sfu.ca/admission/entrancescholarships>

All scholarship applicants should have high academic standing — a minimum 90% grade average is normally required. Please read carefully the application requirements described on the above website, as not all scholarships require application. Applicants must be Canadian citizens or Permanent Residents to qualify for the majority of major entrance scholarships, except for international awards. All scholars must meet certain academic and enrolment requirements for complete disbursement of funds. Scholarship continuance regulations can be found at <http://students.sfu.ca/ps/entschols/regs.html>

### Additional Scholarships and Awards

Students may only hold one entrance scholarship from the University. Upon redeeming all of the scholarship installments, students will be considered for scholarships available to continuing students. See "Scholarships for Continuing Students" on page 38.

### Travel Allowance

An additional travel allowance is available for some scholarships or awards.

- Scholarship or award winners who live outside BC will receive a one-time travel allowance of \$1000.
- Scholarship or award winners who live within BC but outside the Lower Mainland will receive a one-time travel allowance of \$500.

### For Canadian High School Students – Application Required

The entrance scholarship application deadline for September entry is February 28.

#### \$34,000 Simon Fraser Scholarships

Recognize excellent academic performance and potential. Distributed over eight terms. Eligible for travel allowance.

#### \$29,000 Simon Fraser Alumni Leadership Scholarships

Recognize extraordinary leadership, community service, citizenship, and achievement of high academic standing. Distributed over eight terms. Eligible for travel allowance.

#### \$24,000 Gordon M. Shrum Scholarships

Recognize high academic standing and commitment to school and community service, volunteer activity, arts, or athletics. Distributed over eight terms. Eligible for travel allowance.

#### \$24,000 Shad Valley Shrum Scholarship

In addition to the Shrum criteria noted above, this scholarship recognizes outstanding achievement and participation in the Shad Valley program. Distributed over eight terms. Eligible for travel allowance.

#### \$10,000 Tadeusz Specht Memorial Scholarships in Science

Recognize academic excellence. Awarded to students entering the Faculty of Science or Health Sciences and pursuing studies in biology, microbiology, chemistry, biochemistry, biomedical physiology and kinesiology, or other health-related sciences. Eligible for travel allowance. Distributed over four terms.

#### \$7,000 Dean's Scholarships

Dean's Scholarships are awarded within each of the Faculties of Applied Sciences; Arts and Social Sciences; Business Administration; Education; Environment; Communication, Art and Technology, Health Sciences; and Science, to recognize academic achievement and potential in a particular area of study. Distributed over four terms. Eligible for travel allowance.

#### \$5,000 Lohn Foundation Entrance Award

The award is offered based on financial need to entering high school students with a minimum 80% admission average and demonstrated commitment to volunteer activities. To be considered eligible, candidates should demonstrate their involvement in unpaid volunteer activities by providing their resumé and cover letter describing their volunteerism, the length of service and time-commitment dedicated to such interests and including a letter of reference from a supervisor of the candidate's volunteer work.

Completion of the Application for Student Financial Aid form is required. See [students.sfu.ca/financialaid](http://students.sfu.ca/financialaid). Not eligible for travel allowance.

#### \$5,000 H.Y. Louie Entrance Award

The awards are offered based on financial need to students with a minimum 80% admission average and demonstrated commitment to volunteer activities. To be considered eligible, candidates should demonstrate their involvement in unpaid volunteer activities by providing their resume and cover letter describing their volunteerism, the length of service and time commitment dedicated to such interests and including a letter of reference from a supervisor of the candidate's work.

Completion of the Application for Student Financial Aid form is required. See [students.sfu.ca/financialaid](http://students.sfu.ca/financialaid). Not eligible for travel allowance.

#### \$2,500 Aboriginal Entrance Award

Awarded to Canadian aboriginal students entering Simon Fraser University from high school (minimum 80% average) or a BC College (minimum 3.0 average) who have a living connection to their aboriginal community. Eight awards will be granted annually. Must submit an application by the following deadlines: April 30 for the fall term. September 30 for the spring term, and January 30 for the summer term.

#### \$2,000 Community Entrance Awards

The Community Entrance Awards will be available for students entering the University in the fall term from areas of British Columbia that are under-represented at Simon Fraser University. Valued at \$2,000, the Awards will recognize students who have demonstrated a commitment to school and/or community leadership, the contemporary arts or the sciences. A minimum average of 80% is required and up to six awards will be made. Not eligible for travel allowance.

#### \$2,000 SFU Surrey Entrance Awards

The SFU Surrey Entrance Awards recognize exceptional academic and community achievement of BC secondary school students, particularly those residing in locations south of the Fraser River. A series of awards are available to applicants of the first-year cohort programs at Simon Fraser University Surrey. Students who apply for direct admission to the Faculty of Business Administration, the School of Computing Science, the Mechatronic Systems Engineering Program, or the School of Interactive Arts and Technology at the Surrey campus are also eligible to apply for the awards. Applicants for the award need a minimum admission average of 80%. Not eligible for travel allowance.

#### City of Surrey Memorial Employee Entrance Awards

One \$1,000 award will be provided to a student entering Simon Fraser University with satisfactory academic standing, volunteer or community involvement, and is a dependent of a City of Surrey employee, or a City of Surrey employee who has passed away.

#### Dr. Gordon Diewert Annual Community Service Entrance Award

A \$1,000 award will be granted on the basis of good academic performance, leadership, and community service to a graduating student from New

Westminster Secondary School who is attending Simon Fraser University. The recipient must have attended Dry Grad.

#### Dr. Gordon L. Diewert Memorial Entrance Scholarship

A scholarship will be awarded in the fall term to a graduating student from New Westminster Senior Secondary School, who is planning to pursue a major in kinesiology at Simon Fraser University. Applicants must have a record of community service, involvement in athletics and a high academic standing. The successful applicant will be recommended by the scholarship and bursary committee of New Westminster Senior Secondary School. Not eligible for travel allowance.

#### Mona F. East Memorial Entrance Scholarship

This fund provides a scholarship annually for the student graduating from Similkameen Secondary School with the highest standing and who will be attending Simon Fraser University. The amount of the award will vary, depending upon the accrued interest of the fund. Not eligible for travel allowance.

#### Rotary Club of Vancouver Sunrise Entrance Scholarship

The Rotary Club of Vancouver Sunrise provides an annual entrance scholarship from the interest earned on the endowment. The scholarship will be based on academic merit with preference for an entering student from King George Secondary School. The recipient of the scholarship will be invited to make a presentation at a meeting of the Rotary Club of Vancouver Sunrise. Not eligible for travel allowance.

### For Canadian High School Students – No Application Required

All entering Canadian high school students are considered automatically for the following scholarships; no applications are required.

#### \$20,000 Lloyd Carr-Harris Foundation Entrance Scholarship in Business Administration

This award is offered to an entering high school student of the highest academic standing who also obtains direct admission into the Faculty of Business Administration. The award is distributed over eight terms. Not eligible for a travel allowance.

#### \$5,000 Academic Excellence Entrance Scholarships

Recognize academic excellence for high school students within Canada. Students entering directly from high school with a 95% average will automatically receive an offer of this scholarship. Distributed over two terms. Eligible for travel allowance.

#### \$4,000 Jack Diamond National Entrance Awards

Recognize academic and athletic excellence. Potential candidates are identified by Simon Fraser University, and nominated by our Director of Recreation and Athletics. Eligible for travel allowance. Distributed over two terms.

#### \$3,500 Kenneth Strand National Scholarships

Recognize academic excellence for students outside of BC. Students entering directly from high school with a 90% average will automatically receive an offer of this scholarship. Eligible for travel allowance. Distributed over two terms.

#### \$3,500 Summit Scholarships

Recognize academic excellence for students within BC. Students entering directly from high school with a 90% average will automatically receive an offer of this scholarship. Eligible for travel allowance. Distributed over two terms.

## For BC College Students – Application Required

*BC College scholarship application deadlines:*

April 30 for admission to the fall term, September 30 for the spring term, and January 31 for the summer term.

### \$10,000 Honourable William M. Hamilton Scholarships

Recognize academic excellence and leadership potential. Distributed over four terms. Eligible for travel allowance.

### Columbia College Entrance Scholarship

This award provides financial support for an alumnus of Columbia College who will be attending Simon Fraser University. The award may be disbursed over one or two terms, pending interest income from the endowment fund. Applicants must have graduated from Columbia College and be enrolled at Simon Fraser and show distinct promise of achievement at the undergraduate level. Applicants must also provide a letter of application and resume summarizing all awards, medals and prizes, leadership initiatives, and service as well as two letters of reference and certified copy of school transcript. Submit all documentation to Financial Aid and Awards at Simon Fraser University by May 30th. Not eligible for travel allowance.

## For BC College Students – No Application Required

### \$3,500 Ken Caple Scholarships

Recognize outstanding academic performance. Students with a 3.70 transfer average from a BC college or BC university transfer program may automatically receive an offer of this scholarship. Distributed over two terms. Eligible for travel allowance.

## For International Students – Application Required

### \$40,000 (plus tuition) W. Ronald Heath International Entrance Scholarships

Recognize international students attending United World Colleges who demonstrate academic excellence, school involvement, community service, leadership and volunteer activity. Distributed over eight terms. Eligible for travel allowance.

### \$10,000 Tadeusz Specht Memorial Scholarships in Science

Recognize academic excellence. Awarded to students entering the Faculty of Science or Health Sciences and pursuing studies in biology; microbiology; chemistry; biochemistry; biomedical physiology and kinesiology; or other health-related sciences. Eligible for travel allowance. Distributed over four terms.

### \$10,000 SFU ZU DDP Entrance Scholarships

Two SFU ZU DDP Entrance Scholarships are awarded annually on the basis of academic and/or personal achievement, to Zhejiang University students who are studying in the SFU ZU Dual Degree Program in Computing Science. Distributed over two terms. Not eligible for travel allowance.

### \$5,000 SFU ZU DDP Entrance Awards

Eight SFU ZU DDP Entrance Awards are awarded annually on the basis of academic and/or personal achievement, to Zhejiang University students who are studying in the SFU ZU Dual Degree Program in Computing Science. Distributed in one term. Not eligible for travel allowance.

### \$5,000 Lohn Foundation Entrance Award

The award is offered based on financial need to entering high school students with a minimum 80% admission average and demonstrated commitment to volunteer activities. To be considered eligible, candidates should demonstrate their involvement in

unpaid volunteer activities by providing their resumé and cover letter describing their volunteerism, the length of service and time-commitment dedicated to such interests, and including a letter of reference from a supervisor of the candidate's volunteer work. Completion of the Application for Student Financial Aid form is required. See [students.sfu.ca/financialaid](http://students.sfu.ca/financialaid). Not eligible for travel allowance.

### \$5,000 H.Y. Louie Entrance Award

The awards are offered based on financial need to students with a minimum 80% admission average and demonstrated commitment to volunteer activities. To be considered eligible, candidates should demonstrate their involvement in unpaid volunteer activities by providing their resumé and cover letter describing their volunteerism, the length of service and time commitment dedicated to such interests, and including a letter of reference from a supervisor of the candidate's work. Completion of the Application for Student Financial Aid form is required. See [students.sfu.ca/financialaid](http://students.sfu.ca/financialaid). Not eligible for travel allowance.

### \$5,000 Mitsubishi Corporation International Scholarship

Two awards will be given annually on the basis of the highest academic performance to students who graduate from a high school in any developing country worldwide (outside the G8 list of countries), and are accepted at an undergraduate program at Simon Fraser University.

### \$3,500 Phi Theta Kappa International Summit Scholarships

Recognize Phi Theta Kappa members with a minimum 3.75 GPA on minimum 30 units from a US college. Part-time students and students with a previous bachelor degree are not eligible. Distributed over two terms. Eligible for travel allowance.

Up to three entrance scholarships are made available for Phi Theta Kappa members with a minimum 3.75 GPA. A minimum of 30 units required for application. Part-time students and students with a previous bachelors degree are not eligible. Eligible for travel allowance.

*Deadlines:* April 30 for admission to the fall term, September 30 for the spring term, and January 31 for the summer term.

### Stanley Morisse Memorial Scholarships

The Stanley Morisse Memorial Scholarship is awarded to a student transferring from the University of Cyprus or a Cypriot secondary school. The amount of the award is determined by the amount of interest earned on the endowment.

### YW Fong Annual Entrance Exchange Scholarship

Two scholarships, valued at a maximum of \$3,200 (\$400 per term) will be awarded annually to an entering Simon Fraser University student who graduated from an educational institution in the People's Republic of China or in Hong Kong.

## For International Students – No Application Required

### \$5,000 International Academic Excellence Entrance Scholarships

Recognizes academic excellence and potential. International students entering directly from high school with a 95% average (or equivalent) will automatically receive an offer of this scholarship. This scholarship is entitled to the one-time travel allowance. Distributed over two terms.

### \$3,500 International Summit

Recognizes academic excellence and potential. International students entering directly from high school with a 90% average (or equivalent) or from a BC college with a high transfer average, will automatically receive an offer of this scholarship. This

scholarship is entitled to the one-time travel allowance. Distributed over two terms.

## Scholarships for Continuing Students

### Regulations

The following regulations govern all university, private and endowed scholarships for continuing students over which the University has jurisdiction.

- A minimum 3.50 CGPA is required to be eligible for a scholarship.
- The student must be enrolled in a minimum of nine units of normally graded courses in the term of eligibility, unless otherwise stipulated. Challenge, audit and credit free courses are not considered. Students who enrol in fewer than nine units or subsequently drop below nine units may have their scholarships cancelled.
- The student must have completed at least nine units of normal graded courses at the University to be considered for most private and endowed scholarships.
- A student holding an ongoing Simon Fraser University Entrance Scholarship is not eligible for any other University administered scholarships until the entrance scholarship is fully paid out. This policy applies to any term in which an entrance scholarship is deferred.
- Funds will be credited to the successful student's University account. Outstanding University debts will be deducted from the scholarship funds before a cheque for the credit balance is issued.
- The student must apply using the Simon Fraser University Private Scholarship paper application form which is available at <http://students.sfu.ca/financialaid>. It is the student's responsibility to meet applicable deadlines and supply all required documentation. Incomplete applications may be rejected.
- Unless otherwise stated, scholarships are tenable only at Simon Fraser University.
- Candidates are permitted to hold concurrently more than one academic award only with the permission of Financial Aid and Awards.
- Scholarships are tenable for the term indicated and will not normally be deferred. Students who do not enrol in the term for which the scholarship is granted forfeit the award. To be considered for future private or endowed scholarships, students must reapply.

## Undergraduate Open Scholarship Program

The Undergraduate Open Scholarship recognizes and supports undergraduate students who are highly qualified academically and awards scholarships to students on a term by term basis.

### Eligibility

Eligibility is limited to students pursuing a first degree and will expire when a student's total accumulated units (including transfer units) exceed by 10% the minimum number of units required to complete the degree program in which the student is enrolled. (e.g., a student whose major program requires 120 units to graduate becomes ineligible when her/his total accumulated credit and transfer credit exceeds 132 units.)

To qualify, a student must have

- successfully completed at least 24 Simon Fraser University units
- a Simon Fraser University cumulative grade point average (CGPA) of 3.67 or higher.
- a minimum term GPA of 3.50 in the last term of enrolment
- been enrolled in one of the last three terms
- complete at least 24 units of normally graded courses over your last three terms of enrolment in

such courses. For students who fall short of the 24 unit requirement because one term's enrolment was in a single course of five units or fewer, the last four terms will be considered and that term of one course will be set aside in determining unit and term GPA eligibility. A student recognized as being required to take an ongoing maximum 40% course load based upon a confirmed permanent disability must complete at least 24 units of normally graded courses over the last four terms of enrolment in such courses.

All eligibility requirements must be met.

International undergraduate students are eligible on the same basis as other students.

Co-operative education students will be eligible subject to normal program guidelines. Job practicum courses, however, are excluded from the calculations (i.e., the scholarship does not cover the co-op fee). Enrolment in normally graded courses during a co-op term may affect eligibility. Co-op students should seek advice about this scholarship before enrolling in normally-graded courses while also enrolling in a co-op term.

Graduate students, including qualifying, special and exchange students, are not eligible for this scholarship.

No application is required. All undergraduate students are considered for eligibility each term; eligible undergraduate students will be notified no later than the end of the fourth week of classes.

#### *Monetary Value*

The value of the scholarship is set by the University as a portion of the actual tuition costs accrued by those eligible.

The per unit rate for normally graded courses will be determined based on the availability of funds. The per unit rate will be set for a value within a range of \$70 to \$110 each term.

### Scholarships for All Students

#### **Hy Aisenstat Scholarship**

Program code: UESO-517

Value: \$2500

Awarded: fall, spring, summer

Terms of reference: To undergraduate students with experience in the hospitality industry who are returning to university. Please document eligibility.

#### **Alumni Scholarship and Bursary Endowment Fund**

Program code: UESO-253

Value: \$500

Awarded: fall, spring, summer

Terms of reference: To undergraduate students who meet the minimum scholarship regulations.

#### **Dr. Aimee August Undergraduate Annual Scholarship**

Program code: UPAO-214

Value: \$1000

Awarded: fall, summer

Terms of reference: Awards will be granted annually in the summer term to a student of aboriginal ancestry. The purpose of this award is to provide educational support to a student enrolled in the Simon Fraser University Kamloops program who best demonstrates good academic standing combined with an appreciation for aboriginal language and culture. The Simon Fraser University Kamloops program scholarship committee will put forward a nomination based on the application received. Eligibility requirements:

- applicants must be of aboriginal ancestry and enrolled as full-time students (three courses or more in an academic term). The award is restricted to students who have successfully completed a

minimum 24 units in this Simon Fraser University program.

- the student must demonstrate full-time enrollment in one of the previous three consecutive academic terms, since this is being awarded in the summer term.
- applicants must demonstrate sensitivity to the unique cultural and linguistic traditions of the aboriginal people. The committee will consider such criteria as student's extra-curricular activities within aboriginal organizations, personal research and the nature of studies being pursued. The Kamloops program scholarship committee may weigh such factors as parental and marital status, part-time employment and band assistance in their decision.

#### **Japanese-Canadian Centennial Scholarship**

Program code: UPSO-255

Value: \$750

Awarded: fall, spring

Terms of reference: To a Japanese-Canadian student residing in British Columbia and enrolled in the first year of study at Simon Fraser University. Eligibility for this scholarship will be based on scholastic ability, character, promise of achievement and participation in extracurricular activities. Applications will be considered from first year students.

#### **Sulzer Pumps Inc. Undergraduate Scholarship**

Program code: UPSO-286

Value: \$1000

Awarded: spring

Terms of reference: Granted to an undergraduate student in any faculty based on academic merit. Preference will be given to applicants who are Sulzer Bingham employees; sons, daughters or legal dependants of Sulzer Bingham Pumps Inc. employees; or residents of Burnaby.

#### **University Women's Club of Vancouver Scholarship**

Program code: UESO-526

Value: \$1500

Awarded: spring

Terms of reference: Awarded to an undergraduate student in any faculty based on scholastic merit.

#### **Vancouver Korean Canadian Scholarship Foundation Scholarship Award**

Program code: UPSO-294

Value: \$1000

Awarded: spring

Terms of reference: Granted annually in any term to an undergraduate student in any faculty. The scholarship will be granted based on academic excellence.

### Scholarships for Applied Sciences Students

#### **Association of Professional Engineers and Geoscientists Scholarship**

Program code: UPSO-275

Value: \$1500

Awarded: fall

Terms of reference: To a student with a high academic standing who is entering the second year of engineering science at Simon Fraser University. The assessment of academic standing will be based upon previous performance during the first year of engineering at another BC post-secondary institution. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the School of Engineering Science scholarship committee.

#### **Paul Coté Endowment Scholarship in Engineering**

Program code: UESO-213

Value: \$600

Awarded: spring

Terms of reference: To an engineering science student enrolled in the Faculty of Applied Sciences. The scholarship will be awarded on the basis of high academic performance to a student who has completed at least 60 units at Simon Fraser University. This scholarship has been established by the Board of Governors.

#### **Ken and Su Jang Scholarship for Women in Science**

Program code: UESO-276

Value: \$1700

Awarded: fall

Terms of reference: To an undergraduate female student in the Faculty of Applied Sciences or the Faculty of Science. The award will be based on academic merit.

#### **Kodak Graphic Communications Canada**

Program code: UPSO-214

Value: \$1000

Awarded: spring

Terms of reference: To engineering science students in the Faculty of Applied Sciences who have successfully completed at least one year. Students will require a nomination from the faculty, who will give consideration to academic standing as well as talent and interest expressed by the student in electro-optics, precision mechanics or instrumentation.

#### **Elma Krbavac Undergraduate Scholarship in Computing Science**

Program code: UESO-322

Value: \$2000

Awarded: fall

Terms of reference: To an undergraduate student in computing science based on high academic standing and demonstrated volunteer involvement. Candidates should demonstrate their involvement in volunteer activities by providing such details in a resume and cover letter with their application.

#### **Matthew LeDuc Memorial Scholarship in Computing Science**

Program code: UESO-329

Value: \$450

Awarded: spring

Terms of reference: Awarded on the basis of academic achievement to a computing science major, with demonstrated excellence in the field of computer graphics.

#### **Joe and Mary Merchant Scholarship**

Program code: UESO-309

Value: \$750

Awarded: summer

Terms of reference: A scholarship, based on scholastic merit, will be awarded to a full-time third or fourth year undergraduate student in the Faculty of Science or the Faculty of Applied Sciences.

#### **Basil Peters/High Tech Exchange Group Scholarship**

Program code: UESO-239

Value: \$500

Awarded: spring

Terms of reference: The scholarship is given, based on academic merit, to upper level students in the engineering science program studying in the areas of high frequency electronics. The scholarships will be made by the Senate Undergraduate Awards Adjudication Committee on the recommendation of the School of Engineering Science.

#### **J. Newton Robinson Memorial Scholarship**

Program code: UESO-242

Value: \$200

Awarded: fall

Terms of reference: To a computing science major who has completed 60 units at Simon Fraser University. The scholarship will be based upon academic performance. This endowment has been

established in memory of J. Newton Robinson, former member of the Simon Fraser University Board of Governors.

#### **Scotiabank Student Scholar in the Faculty of Applied Sciences Award**

Program code: UESO-311

Value: \$1800

Awarded: summer

Terms of reference: The award will be granted to a Faculty of Applied Sciences student with at least 90 units who exemplifies the aspects of a well-rounded student scholar: academic excellence, and community involvement. Academic excellence is based on academic merit as determined by cumulative grade point average (CGPA). Community involvement may be service to the University community or the community at large.

#### **Simba Technologies Inc. Scholarships in Computing Science**

Program code: UESO-530

Value: \$500

Awarded: summer

Terms of reference: To an approved computing science student on the basis of academic performance and documented community service. Applications for the scholarship should also include a letter and résumé chronicling volunteer service in the community. When possible, preference will be given to a female student.

#### **Sophos Annual Computing Science Scholarship**

Program code: UPSO-316

Value: \$1000

Awarded: spring

Terms of reference: Granted to a third or fourth year undergraduate student enrolled as a computing science major on the basis of excellent academic standing. Preference may be given to a student with academic or industry experience in software security. The award will be made by the Senate Undergraduate Awards Adjudication Committee based upon a nomination of the Chair, School of Computing Science.

#### **Paul and Helen Trussell Science Scholarship Fund**

Program code: N/A

Value: \$20000

Awarded: fall

Terms of reference: To a student entering their last two years of undergraduate study at a BC university or college. The applicant must be a Canadian citizen or Permanent Resident, and have completed secondary schooling in the Kootenay-Boundary area (School Districts No. 1-13 inclusive). To qualify, a candidate must be pursuing an undergraduate program leading to at least a master's or PhD degree in natural or applied sciences, such as agriculture, engineering, forestry and fisheries. The award will cover the last two undergraduate years and the first two graduate years. Normally, a student must complete a minimum of 12 units of graded course work each term during tenure of the scholarship and maintain a 75% average. Apply to Science Council of British Columbia. [http://www.scbc.org/programs/scholarship\\_trussell.html](http://www.scbc.org/programs/scholarship_trussell.html)

#### **University Women's Club of Vancouver Women in Science Scholarship**

Program code: UESO-260

Value: \$1200

Awarded: fall

Terms of reference: To a female student enrolled in the Faculty of Science. The award is open to third or fourth year students majoring in science or applied science programs. A recommendation from the dean of science and/or the dean of applied science is required.

#### **Weyerhaeuser Company Limited Scholarship in Engineering Science and Environmental Science**

Program code: UPSO-302

Value: \$3000

Awarded: fall

Terms of reference: The scholarship is awarded on the basis of exceptional academic performance to an undergraduate student with an approved major in engineering science and environmental science. The scholarship will rotate these approved majors in a three-year cycle outlined as thus: Year 1: approved major in engineering science, Year 2: approved major in environmental science with emphasis on quantitative techniques in resource management, Year 3: approved major in environmental science with any emphasis except quantitative techniques in resource management. When possible, preference will be given to students from a Weyerhaeuser operating community in Canada. The award is granted by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School of Engineering Science or the director, Department of Environmental Science.

#### **Scholarships for Arts and Social Sciences Students**

##### **Father Michael Bach Memorial Scholarship**

Program code: UESO-256

Value: \$1000

Awarded: fall

Terms of reference: To an undergraduate student enrolled in either the third or fourth year of the humanities program. Friends, relatives and colleagues of the late Father Michael Bach have established an endowment fund to support one or more scholarships in the humanities program. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the department in recognition of outstanding scholastic ability.

##### **Mary Batchelor Memorial Scholarship**

Program code: UESO-257

Value: \$1500

Awarded: spring

Terms of reference: To a student in the psychology major or honors program. Selection by the Department of Psychology will be based upon academic achievement and extracurricular involvement. Applicants must have completed at least 60 units, of which 30 units are of Simon Fraser University course work, and must also include a résumé with their applications.

##### **Arthur and Eva Bell Award in Business Administration or Economics**

Program code: UPSO-203

Value: \$500

Awarded: fall

Terms of reference: To students in second, third or fourth year of business administration or economics. Eligibility is based on need for financial assistance and high academic standing. Students must provide a copy of their current transcript with the application.

##### **BOMA Undergraduate Scholarship in Urban Studies**

Program code: UESO-306

Value: \$1800

Awarded: spring

Terms of reference: Awarded to an undergraduate student in the certificate in urban studies program based on scholastic merit.

##### **Linda Brideau Memorial Scholarship**

Program code: UESO-206

Value: \$1100

Awarded: fall

Terms of reference: To an undergraduate student who is majoring in criminology. The award will be based on

academic excellence and preference will be given to a student in the honors program or who has completed at least two years of study at Simon Fraser University.

##### **Chien's Cultural Foundation Scholarship**

Program code: UESO-521

Value: \$600

Awarded: fall

Terms of reference: To an undergraduate student in the Faculty of Business Administration, or in the Faculty of Arts, preferably in political science. The scholarship will be granted on the basis of outstanding academic performance.

##### **School of Criminology Alumni Scholarships**

Program code: UESO-318

Value: \$500

Awarded: summer

Terms of reference: Scholarships will be granted on the basis of academic performance to students in the School of Criminology.

##### **Peter Crocker Annual Scholarship in Psychology**

Program code: UPSO-309

Value: \$1000

Awarded: spring

Terms of reference: Awarded annually in the Spring term to an undergraduate student entering their 3rd or 4th year of study who is interested in sport, exercise, or health psychology. Applications must include a resume outlining the candidate's research interests. In the event that no suitable applicant is identified in a given year, two scholarships may be awarded in the subsequent year.

##### **Department of French Award For Excellence**

Program code: UESO-328

Value: \$700

Awarded: summer

Terms of reference: The award will be given annually to a student pursuing a French major or a French honors program on the basis of academic excellence and service to the Department of French or the French department student union. Applications should include a resume outlining the student's volunteer activities. The award will be made by the Undergraduate Awards Adjudication Committee on the nomination of the chair of the Department of French.

##### **Mahatma Gandhi Humanitarian Scholarship**

Program code: UPSO-220

Value: \$400

Awarded: fall

Terms of reference: Offered by Dr. and Mrs. Devendra P. Goel to a student who has demonstrated overall excellence in the humanities program. Nomination required from the director of the humanities program.

##### **Dr. Alfredo E. Hurtado Memorial Scholarship**

Program code: UESO-274

Value: \$1100

Awarded: spring

Terms of reference: To an undergraduate student majoring in Spanish and/or Latin American studies.

##### **Pauline Jewett Scholarship**

Program code: UESO-524

Value: \$400

Awarded: summer

Terms of reference: To the student who has the highest CGPA among political science majors who has surpassed 90 units during that term. To be eligible, the student must have taken at least two 200 division and at least three senior (300 or 400 division) courses in Simon Fraser University's Department of Political Science. The awards will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair of the Political Science department.

**Lorne M. Kendall Memorial Scholarship in Psychology**

Program code: UESO-228

Value: \$375

Awarded: summer

Terms of reference: To an undergraduate or graduate psychology student who, in the previous year, has best exemplified Dr. Kendall's approach to psychology. Nominations for the award will be made by faculty members of the Department of Psychology. The recipient will be selected by the chair of the department, after consultation with the chair of the undergraduate and graduate studies committees.

**Jerry and Belle Lundie Memorial Scholarship**

Program code: UPSO-231

Value: \$500

Awarded: spring

Terms of reference: Available to students in their second, third or fourth year of undergraduate study. One scholarship is available to a student majoring in business management and the other scholarship is available to an economics major. Applicants must be Canadian citizens and residents of BC. Preference will be given to physically challenged students. The scholarships are made available by the Credit Union Foundation of BC, in honor of Mr. and Mrs. J. Lundie, who were credit union pioneers.

**Ted and Emily McWhinney Scholarship in International Studies**

Program code: UESO-532

Value: \$500

Awarded: summer

Terms of reference: Awarded annually to fourth year or graduating undergraduate students enrolled in the International Studies Program on the basis of outstanding academic achievement in course work and research.

One scholarship will be given to a student whose academic excellence is related to course work and research focused on Greece and the Balkans, from the 20th Century forward and the second scholarship will be given to a student whose academic excellence is related to course work and research focused on India, from the establishment of the Republic of India in 1947 on. The award will be made by the Senate Undergraduate Awards Adjudication Committee based upon the nomination of the Chair, Hellenic Studies and the Director, School of International Studies

**Ann and William Messenger Undergraduate Scholarships in English**

Program code: UESO-330

Value: \$2000

Awarded: fall, spring

Terms of reference: Awarded on the basis of academic achievement to approved English majors who have completed at least 90 units.

**Robbie Robertson Scholarship in Gerontology**

Program code: UPSO-273

Value: \$1000

Awarded: fall

Terms of reference: The Prince George branch of the Royal Canadian Legion will provide a scholarship to be awarded to a student enrolled in the gerontology diploma program who has an academic record of merit. Preference will be given, when possible, to a student from Prince George or surrounding areas. Students should apply on a Simon Fraser University private scholarship application form to be sent to the Gerontology Diploma Program, Simon Fraser University at Harbour Centre, 555 West Hastings Street, Vancouver, BC, V5B 5K3.

**Scotiabank Student Scholar in the Faculty of Arts Award**

Program code: UESO-312

Value: \$1800

Awarded: summer

Terms of reference: The award will be granted to a Faculty of Arts and Social Sciences student with at least 90 units who exemplifies the aspects of a well-rounded student scholar: academic excellence and community involvement. Academic excellence is based on academic merit as determined by cumulative grade point average (CGPA). Community involvement may be service to the University community or the community at large.

**John Stell Sykes Scholarship**

Program code: UESO-245

Value: \$430

Awarded: spring

Terms of reference: To a third or fourth year student who is a French major in a degree program. The scholarship will be adjudicated on the basis of proficiency in French and academic standing.

**Scholarships for Business Administration Students****Accenture Scholarship in Business Administration**

Program code: UESO-323

Value: \$1000

Awarded: spring

Terms of reference: To a full-time undergraduate student who is in their third year of study in the Faculty of Business Administration. To be considered eligible, candidates should have completed one 300 division management information systems course, demonstrate their involvement in extracurricular or volunteer activities and interest in information technology by providing their resume and cover letter specific to these interests, and include a letter of recommendation from a management information systems or computing science faculty member with their application.

**Bank of Montreal Undergraduate Scholarship in Business Administration**

Program code: UPSO-283

Value: \$1000

Awarded: fall

Terms of reference: To Business Administration students who intend to pursue a career in the financial industry upon graduation. Preference will be given to students in the finance area of concentration. At least one of the two awards will be given to a business administration co-op student.

**Keith and Betty Beedie Foundation Scholarship in Business Administration**

Program code: UESO-520

Value: \$1100

Awarded: fall

Terms of reference: To an undergraduate third or fourth year student in the Faculty of Business Administration with a concentration in either finance or accounting. Preference will be given to a graduate of either a Burnaby secondary school or Magee Secondary School. The scholarship will be granted on the basis of outstanding academic performance.

**Arthur and Eva Bell Award in Business Administration or Economics**

Program code: UPSO-203

Value: \$500

Awarded: fall

Terms of reference: To students in second, third or fourth year of business administration or economics. Eligibility is based on need for financial assistance and high academic standing. Students must provide a copy of their current transcript with the application.

**Faculty of Business Administration Alumni Scholarships**

Program code: UESO-316

Value: \$500

Awarded: summer

Terms of reference: Scholarships will be granted on the basis of academic performance to students in the Faculty of Business Administration.

**Chevron Canada Ltd Scholarship**

Program code: UESO-282

Value: \$1500

Awarded: fall

Terms of reference: To a student in their final year of an undergraduate program who intends to pursue a career in business. Preference will be given to a student who has graduated from a BC secondary school. At least one letter of recommendation from a dean or department chair must be submitted with the application.

**The Chief Information Officer Association of British Columbia Undergraduate Scholarship in Management Information Systems**

Program code: UPSO-308

Value: \$1500

Awarded: fall

Terms of reference: To a full-time, third year student in the management information systems concentration in the Faculty of Business Administration, on the basis of academic performance. Students must have completed 24 units in the preceding three terms. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Faculty of Business Administration.

**Chien's Cultural Foundation Scholarship**

Program code: UESO-521

Value: \$600

Awarded: fall

Terms of reference: To an undergraduate student in the Faculty of Business Administration, or in the Faculty of Arts, preferably in political science. The scholarship will be granted on the basis of outstanding academic performance.

**Chinese Federation of Commerce of Canada Scholarship**

Program code: UESO-525

Value: \$1000

Awarded: spring

Terms of reference: Award is based on scholastic merit and will be given to a full-time undergraduate student in the Faculty of Business Administration.

**Cloverdale Paint Incorporated Scholarship**

Program code: UESO-272

Value: \$600

Awarded: spring

Terms of reference: To an undergraduate upper level student in the Faculty of Business Administration whose area of study is marketing. The award will be based on academic merit. Preference will be given to Cloverdale Paint employees or their children.

**Deloitte & Touche Scholarship in Accounting**

Program code: UPSO-247

Value: \$1250

Awarded: fall, spring

Terms of reference: Granted to a third year Faculty of Business Administration student in the accounting concentration who has the highest cumulative grade point average (CGPA).

**Barbara Dunfield Undergraduate Honours Semester at Segal Annual Scholarships**

Program code: UPSO-315

Value: \$1000-\$2500

Awarded: summer

Terms of reference: Awarded to students enrolled in the Faculty of Business Administration undergraduate honors semester at Segal on the basis on demonstrated academic performance. The awards will be made by the Senate Undergraduate Awards Adjudication Committee after receiving nominations from the Faculty of Business Administration.

**Financial Executives Institute Scholarship**

Program code: UPSO-219

Value: \$1500

Awarded: fall

Terms of reference: To an undergraduate third or fourth year student in the Faculty of Business Administration concentrating in the area of finance. The scholarship is based on academic merit.

#### **Great-West Life Scholarship in Business Administration**

Program code: UESO-324

Value: \$1000

Awarded: fall

Terms of reference: The award will be made to a full-time undergraduate student who is in their fourth year of study in the Faculty of Business Administration on the basis of academic performance and demonstrated volunteer involvement. To be considered eligible, candidates should demonstrate their involvement in volunteer activities by providing their resume and cover letter specific to these interests.

#### **Honourable William M. Hamilton Memorial Scholarship**

Program code: UESO-305

Value: \$2000

Awarded: fall, spring, summer

Terms of reference: The scholarship, based on academic merit, will be awarded to a student entering the Faculty of Business Administration at Simon Fraser University with at least 30 units.

#### **Bruce Howe Memorial Scholarship in International Business**

Program code: UESO-310

Value: \$900

Awarded: spring

Terms of reference: The award, based on academic merit, will be given to the top student in the Faculty in Business Administration in the international business concentration. The applicant should be a Canadian citizen or a permanent resident of Canada and have completed at least 90 units.

#### **Human Resources Management Association of BC Scholarship**

Program code: UPSO-226

Value: \$1500

Awarded: fall

Terms of reference: The scholarship will be granted to a Faculty of Business Administration student with an approved concentration in human resources management who has completed at least two human resources management courses at the 300 division.

#### **ICABC Business Administration Co-Op Education Scholarship**

Program code: UPSO-228

Value: \$2000

Awarded: spring

Terms of reference: To a full-time undergraduate student in the Faculty of Business Administration Co-operative Education Program (CA stream). Candidates should have completed at least one practicum work term after being accepted into the Co-operative Education program before eligibility is determined. The scholarship will be granted on the basis of academic performance, with consideration given to improved academic performance, and reports of practicum work performance and the expressed intent of becoming a chartered accountant. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of candidates by the co-ordinator, Business Administration Co-operative Education Accounting Program.

#### **ICABC Desmond O'Brien Memorial Scholarship**

Program code: UPSO-227

Value: \$2000

Awarded: spring

Terms of reference: To a full-time undergraduate student in the Faculty of Business Administration. The student will have completed 75 to 105 units inclusive, including the term of application, and must have at least nine units of accounting courses. The scholarship will be granted on the basis of academic performance.

#### **ISACA Vancouver Chapter Scholarship**

Program code: UPSO-300

Value: \$250

Awarded: summer

Terms of reference: The ISACA scholarship will be awarded to the top student of the year in BUS 426, an auditing course. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Faculty of Business Administration.

#### **KPMG Annual Award in Accounting**

Program code: UPSO-307

Value: \$2500

Awarded: fall, spring

Terms of reference: To a third or fourth year student in the accounting concentration of a bachelor of business administration on the basis of demonstrated academic achievement, extra-curricular activities, community involvement, and the ability to lead others.

#### **Maria Kuchar Accounting Scholarship**

Program code: UESO-263

Value: \$5000

Awarded: fall

Terms of reference: Maria Kuchar Accounting Scholarships of approximately \$5000, awarded in two disbursements, will be awarded in the fall term to a third or fourth year undergraduate student in the Faculty of Business Administration majoring in accounting. When possible, preference will be given to a female student.

#### **Robert H. Lee Scholarship in Business Administration**

Program code: UESO-271

Value: \$1400

Awarded: fall

Terms of reference: To a third or fourth year student who is majoring in business administration. The award is also based upon academic achievement.

#### **Jerry and Belle Lundie Memorial Scholarship**

Program code: UPSO-231

Value: \$500

Awarded: spring

Terms of reference: Available to students in their second, third or fourth year of undergraduate study. One scholarship is available to a student majoring in business management and the other scholarship is available to an economics major. Applicants must be Canadian citizens and residents of BC. Preference will be given to physically challenged students. The scholarships are made available by the Credit Union Foundation of BC, in honour of Mr. and Mrs. J. Lundie, who were credit union pioneers.

#### **Methanex Robert Findlay Annual Undergraduate Scholarship in Management Information Systems**

Program code: UPSO-311

Value: \$3500

Awarded: fall

Terms of reference: To a student in his or her third or fourth year of study in the management information systems concentration in the Faculty of Business Administration. Academic achievement is the primary criterion in evaluating candidates, although demonstrated leadership and volunteerism in campus and community affairs may be taken into account. The scholarship recipient may be invited to apply for a co-operative education placement with Methanex should an opportunity be available.

#### **Gil Moser Memorial Scholarship**

Program code: UESO-238

Value: \$1400

Awarded: spring

Terms of reference: To a full-time student in the Faculty of Business Administration on the basis of high academic standing. This endowment fund has been established in memory of the late Gil Moser who served Simon Fraser University on its Board of Governors.

#### **Mr. Sub Scholarship in Business Administration**

Program code: UPSO-296

Value: \$500

Awarded: summer

Terms of reference: To a full-time student in the Faculty of Business Administration based on academic performance and demonstrated community volunteer involvement. Applications should include supporting document(s) describing such involvement.

#### **Pacific Blue Cross Scholarship in Management & Organizational Studies**

Program code: UPSO-304

Value: \$1000

Awarded: fall

Terms of reference: The scholarship will be made available, based on academic merit, to a third or fourth year student in bachelor of business administration concentrating in management and organizational studies.

#### **PricewaterhouseCoopers Co-operative Education Scholarship in Business Administration**

Program code: UESO-337

Value: \$500

Awarded: spring

Terms of reference: To a business administration student, preferably in the spring term, beginning his/her first co-operative education work term with a chartered accounting firm. Scholarships are available based on academic performance. The scholarship will be awarded by Senate Undergraduate Awards Adjudication Committee on the nomination of Faculty of Business Administration.

#### **PricewaterhouseCoopers Scholarships in Business Administration**

Program code: UESO-338

Value: \$1000

Awarded: fall

Terms of reference: To business administration majors with concentrations in accounting in their third year of their undergraduate degree program. One of the two scholarships is specifically available to an accounting major student participating in the Faculty of Business Administration accounting Co-operative Education program. Scholarships are available on the basis of academic performance.

#### **Robert Rogow Scholarship**

Program code: UESO-527

Value: \$2200

Awarded: spring

Terms of reference: Granted on the basis of academic merit, to undergraduate students in the Faculty of Business Administration with a concentration in human resources management. The recipient will have completed at least one SFU credit course offered by the Faculty of Business Administration in industrial relations or collective bargaining.

#### **Scotiabank Student Scholar in the Faculty of Business Administration Award**

Program code: UESO-313

Value: \$1800

Awarded: summer

Terms of reference: Award will be granted to a Faculty of Business Administration student with at least 90 units who exemplifies the aspects of a well-rounded student scholar: academic excellence and community

involvement. Academic excellence is based on academic merit as determined by cumulative grade point average (CGPA). Community involvement may be service to the University community or the community at large.

**Shell Canada Limited Scholarship in Business Administration**

Program code: UESO-264

Value: \$1000

Awarded: fall

Terms of reference: To a full-time undergraduate student enrolled in the co-op program of the Faculty of Business Administration.

**Vancouver Security Traders Association (VSTA) Annual Scholarship in Finance**

Program code: UPSO-310

Value: \$2000

Awarded: fall

Terms of reference: To a third year undergraduate business administration student with an approved concentration in finance on the basis of academic merit. The scholarship is renewable for a second year if the recipient maintains the scholarship requirements. Where possible, preference will be given to a student who has an interest in pursuing a career in equity trading and has completed the Canadian securities course or trader training course.

**Lis Welch Scholarship in Marketing**

Program code: UESO-522

Value: \$650

Awarded: fall

Terms of reference: Granted to an undergraduate student in the Faculty of Business Administration with a concentration in marketing, who is in third or fourth year. The award will be based on academic merit. Preference will be given to a female student who is a Canadian citizen or landed immigrant.

**Westminster Savings Barry Butler Memorial Scholarship**

Program code: UPSO-299

Value: \$2500

Awarded: fall

Terms of reference: The scholarship will be awarded in the fall term to an outstanding third or fourth year undergraduate student in the Faculty of Business Administration on the basis of academic performance.

**Grant Wilson Memorial Scholarship**

Program code: UESO-268

Value: \$3000

Awarded: fall

Terms of reference: To a BC student in the Faculty of Business Administration who is entering the final two terms of study at Simon Fraser University. The applicant must be planning to enter law school. This endowment fund has been established in memory of Grant Wilson by Stanley Pharmaceuticals Limited of North Vancouver, BC.

**Lorraine Wintrup Memorial Endowment Scholarship**

Program code: UESO-251

Value: \$190

Awarded: spring

Terms of reference: An endowment fund has been established in memory of Mrs. Lorraine Wintrup. A scholarship is available to a business administration student majoring in business management with preference being given to banking related courses. Please supply a copy of your transcript and indicate any business management and banking related courses.

**Mildred Wirtanen Scholarship in Business**

Program code: UESO-277

Value: \$2000

Awarded: fall, spring, summer

Terms of reference: To an undergraduate student in business administration who shows a significant improvement in academic studies.

**Scholarships for Communication, Art and Technology Students**

**Channel M Scholarship in Communication**

Program code: UESO-335

Value: \$1500

Awarded: fall

Terms of reference: The scholarship will be awarded based on academic merit in any term to students with an approved communication major. Preference will be given to students who are a member of a visible minority group. Recipients will be invited to Channel M for a tour at a mutually convenient time during the year in which they win the scholarship.

**School for the Contemporary Arts Scholarship**

Program code: UUAO-004

Value: \$2000

Awarded: fall

Terms of reference: The purpose of this award is to recognize achievement of excellence in the arts for outstanding artistic contribution, as evidenced in performance, exhibitions or research; as well as recognize leadership ability by providing an inspiring example to peers through the quality of artistic work, and by demonstrating ability to be self-motivated and self-directed in extra-curricular activities at Simon Fraser University or in the community at large. A 3.5 cumulative grade point average is required to receive and maintain the scholarship and full time enrolment must be maintained during the tenure of the scholarship. Further eligibility requires at least 48 graded units at Simon Fraser University, a declared major and acceptance by the School for the Contemporary Arts. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School for Contemporary Arts.

**School for the Contemporary Arts Alumni Scholarships**

Program code: UESO-317

Value: \$500

Awarded: summer

Terms of reference: Scholarships will be granted on the basis of academic performance to students in the School for the Contemporary Arts.

**Fred and Elaine Moonen Scholarship in Communication**

Program code: UESO-266

Value: \$1200

Awarded: fall, spring

Terms of reference: To students majoring in communication entering their fourth year of the communication program. Preference will be given to students in the honors program. A recommendation from a communication faculty member is required. Applications should be submitted to the director, School of Communication by January 2 (spring award) and by September 1 (fall award).

**Carla Salvail Scholarship in Communication**

Program code: UESO-531

Value: \$900

Awarded: fall

Terms of reference: Granted to a full-time student in the School of Communication on the basis of demonstrated academic excellence. Preference will be given to a student who has not only survived physical, emotional or other hardship in life but triumphed over those challenges. Applicants must provide documentation describing their experiences such as a personal statement, resume and/or letter of reference.

**Standard Broadcasting Corporation Limited Scholarship**

Program code: UESO-325

Value: \$1500

Awarded: spring

Terms of reference: The scholarship will be offered, based on academic performance, to full-time students in the information technology and interactive arts programs at the Simon Fraser University Surrey campus.

**Scholarships for Education Students**

**Carol and Gary Chapman Memorial Scholarship in Education**

Program code: UESO-518

Value: \$1500

Awarded: summer

Terms of reference: To an outstanding full-time student in the Faculty of Education's Professional Development Program based on academic merit and overall performance during the completion of the PDP practica. The award will be made by the Senate Undergraduate Awards Adjudication Committee on Scholarships, Awards and Bursaries on the nomination of the dean, Faculty of Education.

**Madge Hogarth Scholarships in Education**

Program code: UESO-224

Value: \$350

Awarded: summer

Terms of reference: Two awards will be made to the most promising students based on academic standing prior to entry into the Professional Development Program (PDP), although teaching performance may be considered. One scholarship will be awarded to a student who enters PDP in the fall term and one to a student who enters PDP in the spring term. The awards will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Faculty of Education.

**John Rosborough Memorial Scholarship in Education**

Program code: UESO-326

Value: \$650

Awarded: summer

Terms of reference: The scholarship will be awarded to an outstanding student in the Faculty of Education's Professional Development Program based on academic merit, overall performance during the completion of the PDP practica, and a demonstrated interest in some aspect of information technology in the field of education. Applications for the scholarship should include a letter and resume chronicling involvement and interest with the information technology in education. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the dean, Faculty of Education.

**Scotiabank Student Scholar in the Faculty of Education Award**

Program code: UESO-314

Value: \$1800

Awarded: summer

Terms of reference: The award will be granted to a student in the Professional Development Program who exemplifies the aspects of scholarly and professional excellence and community involvement. Community involvement may be service to the faculty, the University community, or the community at large. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the dean, Faculty of Education.

**Ethel Barbara Tuck Undergraduate Scholarship in Education**

Program code: UESO-321

Value: \$2500

Awarded: fall, spring, summer

Terms of reference: Granted on the basis of outstanding academic performance to undergraduate upper division students who intend to pursue careers teaching children or youth and wish to develop skills in aiding pupils who have reading difficulties. The application should include a discussion of the student's interest in teaching remedial reading.

### Scholarships for Environment Students

#### Enid Harris Scholarship in Environmental Science

Program code: UESO-528

Value: \$1000

Awarded: fall

Terms of reference: To a student or students enrolled in their third or fourth year of the environmental science program at Simon Fraser University on the basis of demonstrated academic performance.

#### Ron MacLeod Scholarship in Environmental Science

Program code: UESO-307

Value: \$900

Awarded: spring

Terms of reference: Granted to a third or fourth year student in the Environmental Science Program on the basis of academic performance. The application should include a letter from the student describing his/her commitment to and interest in environmental science.

#### Port Metro Vancouver Undergraduate Scholarship in Geography

Program code: UPSO-284

Value: \$2500

Awarded: fall

Terms of reference: The scholarship, based on academic merit, will be given to a geography student entering the fourth year of studies. In order to receive the second disbursement, the student must maintain academic standards.

#### Beverley Raymond Scholarship in Biological Sciences or Environmental Studies

Program code: UEAO-065

Value: \$2500

Awarded: fall

Terms of reference: To an undergraduate student in biological sciences or environmental sciences who has demonstrated interest and aptitude in these fields through academic achievement (minimum CGPA 3.00) and outdoor activities. Preference will be given to a student in their graduating year of an honors program with an honors project relating to environmental studies. The application should include a letter from the student supporting their qualifications for the award and outlining their career plans and interest in the environment.

#### Mr. and Mrs. Erwin Sommer Scholarship in Earth Sciences/Geography

Program code: UESO-308

Value: \$1200

Awarded: fall

Terms of reference: Granted, in alternate, between geography and earth sciences students on the basis of academic merit to a student majoring in geography or earth sciences who has completed at least 90 undergraduate units including 12 upper division units in geography or earth sciences.

#### Weyerhaeuser Company Limited Scholarship in Engineering Science and Environmental Science

Program code: UPSO-302

Value: \$3000

Awarded: fall

Terms of reference: The scholarship is awarded on the basis of exceptional academic performance to an undergraduate student with an approved major in engineering science and environmental science. The scholarship will rotate these approved majors in a

three-year cycle outlined as thus: Year 1: approved major in engineering science, Year 2: approved major in environmental science with emphasis on quantitative techniques in resource management, Year 3: approved major in environmental science with any emphasis except quantitative techniques in resource management. When possible, preference will be given to students from a Weyerhaeuser operating community in Canada. The award is granted by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School of Engineering Science or the director, Department of Environmental Science.

### Scholarships for Health Sciences Students

#### Maud Mary Price Scholarship in Health Sciences or Sciences

Program code: UESO-336

Value: \$1000

Awarded: spring

Terms of reference: Awarded on the basis of demonstrated academic performance to a student or students enrolled in their first year, majoring in a program within the Faculty of Health Sciences or Faculty of Science at Simon Fraser University. Preference will be given to a student or students planning to pursue a career in nursing. Application packages must include a cover letter outlining the candidate's intention to pursue a career in nursing.

### Scholarships for Science Students

#### Association of Professional Engineers and Geoscientists of BC Scholarship in Earth Sciences

Program code: UPSO-306

Value: \$1500

Awarded: fall

Terms of reference: Awarded based on academic merit, to a fourth year student with an approved earth sciences major and proved participation in the Geology or environmental geoscience stream of earth sciences, leading to an eventual professional geoscientist designation. The award will be made by the Senate Undergraduate Awards Adjudication Committee on Scholarships Awards and Bursaries upon nomination by the chair, Earth Sciences.

#### April Allen Memorial Undergraduate Scholarship

Program code: UESO-529

Value: \$3000

Awarded: spring

Terms of reference: Granted to an undergraduate student(s) enrolled full-time in the actuarial science program. The award will go to a student within their first year of being admitted into one of the actuarial sciences programs who demonstrates excellence in academic performance and exhibits potential for success in the actuarial science field. Preference will be given to students who have personally been affected by cancer and/or have demonstrated leadership and/or service to an organization involved in cancer research and care. Students will apply to the chair of the Department of Statistics and Actuarial Science. The applications will include, if applicable, a resume outlining the candidate's leadership activities and volunteer service as well as letter(s) of recommendation confirming these activities. The award will be made by the Senate Undergraduate Awards Committee on the recommendation of the chair.

#### Chemistry Undergraduate Scholarship

Program code: UESO-332

Value: \$1000

Awarded: fall

Terms of reference: To an undergraduate student(s) in their final year of an approved major or honors degree

in chemistry on the basis of academic performance in upper level chemistry and nuclear science courses. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair of the Department of Chemistry.

#### R. Bruce Coles Memorial Scholarship

Program code: UESO-283

Value: \$600

Awarded: spring

Terms of reference: To a student in an approved actuarial science program who has completed ACMA 320. More than on scholarship may be made available. Scholarships will be granted on the basis of academic performance. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair, actuarial science.

#### Earth Sciences Undergraduate Scholarship

Program code: UESO-334

Value: \$2500

Awarded: fall

Terms of reference: To an undergraduate student(s) in their final year of an approved major or honors degree in earth sciences based on academic performance in upper level earth sciences courses.

#### Mrs. Shakuntala Goel Memorial Scholarship

Program code: UPSO-223

Value: \$400

Awarded: fall

Terms of reference: To a student who has demonstrated overall excellence in the Department of Mathematics. Nomination required from the chair of mathematics. This scholarship has been established by Dr. and Mrs. D.P. Goel in memory of Mrs. Shakuntala Goel.

#### Harold Hancheroff Memorial Scholarship in Sports Education

Program code: UESO-523

Value: \$900

Awarded: spring

Terms of reference: To a full time student in the School of Kinesiology, who is pursuing an honors degree in sports education. The scholarship is also based upon academic merit.

#### Ken and Su Jang Scholarship for Women in Science

Program code: UESO-276

Value: \$1700

Awarded: fall

Terms of reference: To an undergraduate female student in the Faculty of Applied Sciences or the Faculty of Science. The award will be based on academic merit.

#### School of Kinesiology Alumni Scholarships

Program code: UESO-319

Value: \$500

Awarded: summer

Terms of reference: Scholarships will be granted on the basis of academic performance to students in the School of Kinesiology.

#### William and Amelia McMahan Scholarships

Program code: UESO-233

Value: \$1200

Awarded: fall

Terms of reference: To students who are enrolled in full time course programs in the Faculty of Science, who are in their second, third or fourth year of study on the basis of academic achievement. Preference will be given to children of employees or former employees of the logging and pulp industries of BC.

#### Patrick Duncan McTaggart-Cowan Award in Physical Sciences

Program code: UESO-234

Value: \$550

Awarded: spring

Terms of reference: This scholarship fund was established in honour of Dr. Patrick Duncan McTaggart-Cowan. This fund will provide for a student in the physical sciences on the basis of academic achievement and potential, with consideration being given to financial need. Special consideration will be given to a student who plans to proceed to studies in meteorology or the atmospheric sciences or who has demonstrated interest or aptitude in these fields, and preference might be given to a third year student going into the graduating year in an honors program.

#### **Joe and Mary Merchant Scholarship**

Program code: UESO-309

Value: \$750

Awarded: summer

Terms of reference: A scholarship, based on scholastic merit, will be awarded to a full-time third or fourth year undergraduate student in the Faculty of Science or the Faculty of Applied Sciences.

#### **Molecular Biology and Biochemistry Undergraduate Scholarship**

Program code: UESO-333

Value: \$950

Awarded: fall

Terms of reference: To an undergraduate student(s) in their final year of an approved major or honors degree in molecular biology and biochemistry on the basis of academic performance.

#### **Pacific Blue Cross Scholarship in Actuarial Science**

Program code: UPSO-303

Value: \$1000

Awarded: spring

Terms of reference: The scholarship will be made available, based on academic merit, to a third or fourth year student with a declared major in actuarial science. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair, Department of Statistics and Actuarial Science.

#### **Evelyn and Leigh Palmer Scholarship**

Program code: UESO-267

Value: \$2200

Awarded: fall

Terms of reference: The scholarships are granted in any term based on academic merit to undergraduate students in a major or honors program in the physical sciences (physics, applied physics, mathematical physics, chemical physics, chemistry, molecular biology and biochemistry, or physics and physiology). Applicants should have completed at least 60 Simon Fraser University term units toward the requirements for a degree and have completed at least 30 units in two of the last three terms in which they were enrolled.

#### **Maud Mary Price Scholarship in Health Sciences or Sciences**

Program code: UESO-336

Value: \$1000

Awarded: spring

Terms of reference: Awarded on the basis of demonstrated academic performance to a student or students enrolled in their first year, majoring in a program within the Faculty of Health Sciences or Faculty of Science at Simon Fraser University. Preference will be given to a student or students planning to pursue a career in nursing. Application packages must include a cover letter outlining the candidate's intention to pursue a career in nursing.

#### **Quadra Chemicals Ltd. Scholarship**

Program code: UESO-270

Value: \$750

Awarded: spring

Terms of reference: To a full-time undergraduate student who is enrolled in second, third, or fourth year of study, majoring in either chemistry or biochemistry in the Faculty of Science. Applicants must

demonstrate exceptional ability and not be recommended for an NSERC Summer Research Scholarship.

#### **Beverley Raymond Scholarship in Biological Sciences or Environmental Studies**

Program code: UEAO-065

Value: \$2500

Awarded: fall

Terms of reference: To an undergraduate student in biological sciences or environmental sciences who has demonstrated interest and aptitude in these fields through academic achievement (minimum CGPA 3.00) and outdoor activities. Preference will be given to a student in their graduating year of an honors program with an honors project relating to environmental studies. The application should include a letter from the student supporting their qualifications for the award and outlining their career plans and interest in the environment.

#### **Faculty of Science Alumni Scholarships**

Program code: UESO-320

Value: \$500

Awarded: summer

Terms of reference: Scholarships will be granted on the basis of academic performance to students in the Faculty of Science.

#### **Scotiabank Student Scholar in the Faculty of Science Award**

Program code: UESO-315

Value: \$1800

Awarded: summer

Terms of reference: The award will be granted to a Faculty of Science student with at least 90 units who exemplifies the aspects of a well-rounded student scholar: academic excellence and community involvement. Academic excellence is based on academic merit as determined by cumulative grade point average (CGPA). Community involvement may be service to the University community or the community at large.

#### **Mr. and Mrs. Erwin Sommer Scholarship in Earth Sciences/Geography**

Program code: UESO-308

Value: \$1200

Awarded: fall

Terms of reference: Granted, in alternate, between geography and earth sciences students on the basis of academic merit to a student majoring in geography or earth sciences who has completed at least 90 undergraduate units including 12 upper division units in geography or earth sciences.

#### **Trans-Canada Pipelines Research Scholarship in Chemistry**

Program code: UESO-261

Value: \$600

Awarded: spring

Terms of reference: To a student presently enrolled in a four year program leading to a BSc in chemistry. The Department of Chemistry scholarship committee will nominate a candidate for the scholarship on the basis of the applicant's potential for future work in research in chemistry related to the petrochemical industry and on the applicant's interest in such work.

#### **Paul and Helen Trussell Science Scholarship Fund**

Program code: N/A

Value: \$20000

Awarded: fall

Terms of reference: To a student entering their last two years of undergraduate study at a BC university or college. The applicant must be a Canadian citizen or Permanent Resident, and have completed secondary schooling in the Kootenay-Boundary area (School Districts No. 1-13 inclusive). To qualify, a candidate must be pursuing an undergraduate program leading to at least a master's or PhD degree in natural or applied sciences, such as agriculture,

engineering, forestry and fisheries. The award will cover the last two undergraduate years and the first two graduate years. Normally, a student must complete a minimum of 12 units of graded course work each term during tenure of the scholarship and maintain a 75% average. Apply to Science Council of British Columbia. [http://www.scbc.org/programs/scholarship\\_trussell.html](http://www.scbc.org/programs/scholarship_trussell.html)

#### **University Women's Club of Vancouver Women in Science Scholarship**

Program code: UESO-260

Value: \$1200

Awarded: fall

Terms of reference: To a female student enrolled in the Faculty of Science. The award is open to third or fourth year students majoring in science or applied science programs. A recommendation from the dean of science and/or the dean of applied science is required.

#### **Watson Wyatt Scholarship in Actuarial Science**

Program code: UESO-516

Value: \$2000

Awarded: spring

Terms of reference: To a student in an approved actuarial science program who has completed ACMA 320. Scholarship will be granted on the basis of academic performance. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair, Actuarial Science.

#### **Scholarships for Student Athletes**

##### **Howie Larke Scholarship in Sport Information**

Program code: UEAA-052

Value: \$55

Awarded: fall, spring, summer

Terms of reference: To a full time undergraduate student involved in sport information. The scholarship will be based on academic merit.

##### **Simon Fraser University Athletic Scholarships**

Program code: UUAO-102

Value: \$1000

Awarded: fall, spring, summer

Terms of reference: Two scholarships valued at \$1,000 each are available to students who demonstrate outstanding and sustained athletic performance on an intercollegiate team. Students must be enrolled in nine units and have a minimum CGPA of 3.5 based on completion of 60 units at Simon Fraser University. Consideration will be given to exemplary leadership and contributions to the enhancement of the athletic specialty in which the student is involved.

##### **Simon Fraser University Track and Field Alumni Scholarship**

Program code: UEAA-042

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Based on academic merit and will be awarded to a student who is a member of the Simon Fraser University track and field team.

#### **Bursaries**

##### **Regulations**

The following regulations govern all university, private, and endowed bursaries over which the University has jurisdiction.

- Bursaries are a supplemental source of funding for students in high financial need. Students are expected to find their primary funding through other sources such as government student assistance (i.e. student loans and/or grants), part time work, savings, family, etc.

- Both undergraduate and graduate students, domestic (Canadian) and international, are eligible unless otherwise indicated.
- Students must have a demonstrated financial need.
- Undergraduate students must have a minimum CGPA of 2.00 to be eligible for bursaries. Graduate students who are enrolled in eligible master's or doctoral programs must have a minimum CGPA of 3.00 to be eligible for bursaries.
- Undergraduate students must be enrolled in a minimum of nine units of normal graded courses in the term of application, unless otherwise indicated. Challenge, audit, and credit free courses will not be considered. Students who enrol in fewer than nine units or subsequently drop below nine units may have their awards cancelled.
- Graduate students must be enrolled for residence credit in an approved full-time program. Students who do not enrol or subsequently change to on-leave status may have their awards cancelled.
- Domestic (Canadian) students must be approved for government student assistance from their home jurisdiction to be eligible. In exceptional circumstances, students may appeal for exemption.
- The student must apply using the Simon Fraser University online bursary/work-study application form via the student information system (<http://sis.sfu.ca>). It is the student's responsibility to meet applicable deadlines and supply all required documentation. Incomplete applications may be rejected.
- Unless otherwise stated, bursaries are tenable only at Simon Fraser University.
- Funds will be credited to the successful student's account with the University. Outstanding debts to the University will be deducted from the bursary funds before a cheque for the credit balance is issued.
- Bursaries are tenable only for the term indicated on the notice and may not be deferred. Students who do not enrol in the term for which the bursary is granted forfeit the award. To be considered for bursaries in future terms of enrolment, students must reapply.

## Bursaries for All Students

### Aboriginal Student Bursary Program

Program code: UUBO-516

Value: \$250

Awarded: fall, spring, summer

Terms of reference: Bursaries are available each term to entering and continuing aboriginal students attending Simon Fraser University who have a living connection to their own aboriginal community. Students shall submit documentation supporting their community connection with their bursary application. Awards will be made to students in good academic standing on the basis of demonstrated financial need. The Senate Awards Adjudication Committee will make the awards.

### Alumni Scholarship and Bursary Endowment Fund

Program code: UEBO-584

Value: \$500

Awarded: fall, spring, summer

Terms of reference: To undergraduate and graduate students. The awards are based on financial need and satisfactory academic standing.

### David Armstrong Memorial Bursary

Program code: UEBO-699

Value: \$1000

Awarded: fall

Terms of reference: To an undergraduate student in the co-op program. The bursary is based on demonstrated financial need and satisfactory academic performance.

### Laura (Pat) Band and Richard W. Band Bursary for First Nations Students

Program code: UEBO-540

Value: \$400

Awarded: fall, spring, summer

Terms of reference: The bursary is granted in any term based on financial need and community service to a student who is a member of the Squamish, Fort Langley, or Cheam First Nations and who have demonstrated volunteer involvement in service to the University or the community at large. The bursary may be granted to graduate or undergraduate students in all disciplines and fields of study. The successful student will have completed a minimum of 30 credits and will have achieved a minimum cumulative GPA of 2.33. The application should include a discussion of the student's volunteer involvement in community activities and confirmation of the student's status in the Squamish, Fort Langley or Cheam First Nations.

### Ryan Beedie Annual Bursary

Program code: UPBO-713

Value: \$1000

Awarded: spring

Terms of reference: To full-time students in any faculty on the basis of demonstrated financial need and good academic standing.

### Bel-Par Industries Limited Bursary

Program code: UEBO-664

Value: \$700

Awarded: fall

Terms of reference: To an undergraduate student in any faculty. The bursary will be granted to a student who has maintained a satisfactory academic record and has financial need in the continuing pursuit of their studies. Preference will be given to students who are former employees of Bel-Par Industries or who are children or legal dependants of employees.

### Birks Family Foundation Bursary

Program code: UPBO-551

Value: \$500

Awarded: fall, spring, summer

Terms of reference: The Birks Family Foundation has established a plan of annual contributions to the student aid fund of recognized Canadian universities and colleges for the creation of these bursaries. The bursaries are awarded by the foundation on the recommendation of the university scholarship committee, are not restricted by faculty or year, and may be renewed. The number and amount of such awards may vary annually depending upon the funds available from the Foundation.

### Pat Blunden Undergraduate Bursaries

Program code: UEBO-741

Value: \$250

Awarded: fall, spring, summer

Terms of reference: Bursaries will be awarded to an undergraduate student in any faculty at Simon Fraser University.

### Louis Phillippe and L. Pierre Bonneau Memorial Bursary

Program code: UEBO-662

Value: \$850

Awarded: spring

Terms of reference: Bursaries will be awarded annually in the spring term to undergraduate students in any faculty who are in satisfactory academic standing and demonstrate financial need.

### The Honourable Angelo E. Branca and Mrs. Branca Bursary

Program code: UEBO-586

Value: \$800

Awarded: fall

Terms of reference: To students entering from secondary school. Applicants must demonstrate financial need and have satisfactory academic standing. Other bursaries valued approximately at

one term's tuition are available to students from any faculty, who have a minimum of 60 units at Simon Fraser University, have maintained satisfactory standing, and are in financial need. In honor of the 50th wedding anniversary of the Honorable Angelo E. Branca and Mrs. Branca, and on the occasion of his retirement from the bench, this bursary endowment fund has been established by the following donors, Confratellanza Italo-Canadese and friends Mr. J. Diamond, Mr. J. Segal, Mr. Ben Wosk.

### Burrard Charitable Foundation Bursary

Program code: UPBO-554

Value: \$750

Awarded: fall

Terms of reference: Available in the fall term to a disabled student who has satisfactory academic standing and is in financial need.

### Harvey and Dorothy Burt Bursary

Program code: UEBO-587

Value: \$600

Awarded: fall

Terms of reference: One or more bursaries will be awarded each year on the basis of financial need and demonstrated active involvement in the areas of conservation or environmental protection. Preference will be given to Canadian undergraduate students in their third or fourth year of studies.

### Emily Campbell Bursary Endowment Fund

Program code: UEBO-589

Value: \$125

Awarded: fall, spring, summer

Terms of reference: To students, staff and faculty parents who require some assistance with their daycare fees. Further information may be obtained from the Simon Fraser University childcare office. The Simon Fraser University Childcare Society and Simon Fraser University, through this fund, are committed to providing access to daycare services for children in the University community.

### Campus Community Bursary

Program code: UEBO-718

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Granted to undergraduate students in any faculty in any term based on demonstrated financial need and satisfactory academic performance.

### Canadian Federation of University Women – Coquitlam Bursary

Program code: UEBO-713

Value: \$750

Awarded: spring

Terms of reference: To a full-time mature undergraduate female student in any faculty who has returned to Simon Fraser University after a break in studies. Preference, where possible, will be given to a resident of School District #43 or a graduate of a School District #43 secondary school.

### Jim and Penny Cavers Bursary

Program code: UEBO-732

Value: \$2000

Awarded: summer

Terms of reference: Granted on the basis of demonstrated financial need and satisfactory academic performance to students in any faculty and who have completed at least 60 units.

### Chapman Foundation Graduate and Undergraduate Bursaries

Program code: UEBO-744

Value: \$250

Awarded: spring

Terms of reference: The Chapman Foundation Graduate and Undergraduate Bursaries will be awarded to students in any faculty in good academic standing on the basis of demonstrated financial need.

**Mr. and Mrs. Leslie Chu Bursary**

Program code: UEBO-697

Value: \$1000

Awarded: fall

Terms of reference: To an undergraduate student in any faculty. Bursaries will be granted on the basis of demonstrated financial need, demonstrated service to the community, and a satisfactory academic performance.

**Confratellanza Italo Canadese Bursary**

Program code: UEBO-591

Value: \$400

Awarded: fall

**Connell Lightbody Endowment Bursary**

Program code: UEBO-649

Value: \$1000

Awarded: fall

Terms of reference: To a full-time third year student planning to study law. Please provide a brief letter concerning your eligibility for this bursary. This bursary, established by the Connell Lightbody law firm, is in recognition of the outstanding contributions made by Dr. Arthur Fouks to both the legal community of Vancouver and the development of Simon Fraser University.

**Colin A. Conrad Bursary**

Program code: UEBO-728

Value: \$500

Awarded: summer

Terms of reference: To an undergraduate student in any faculty based on demonstrated financial need and satisfactory academic performance.

**CUPE Local 15 Vancouver Municipal, Education and Community Workers' Bursary**

Program code: UPBO-580

Value: \$1000

Awarded: fall

Terms of reference: To an applicant must be the sons, daughters, or legal dependants of union members. The member upon whom the applicant is a dependant must be a current member in good standing or retired member of CUPE Local 15 (excluding associate members). The member must have demonstrated a primary attachment to CUPE Local 15 by holding union membership through a minimum of six months employment for each of the two years prior to the date of enrolment and must be pursuing a field of study not in contradiction to the aims of the labor movement. The award selection will be made by Simon Fraser University in consultation with the executive. Award will be based primarily upon financial need and provided that academic performance is satisfactory. The applicant must be beginning or continuing full-time enrolment and must be capable of pursuing the course of study. An applicant for a bursary may only receive a bursary once every four years. Bursaries are to a maximum of \$1,000 of tuition only. One half of the tuition will be paid at the beginning of the school year and the second half will be paid at the second half of the school year. Bursary recipients are requested to submit proof of completion of program/year for which the bursary was provided.

**Alfred William Davidson Bursary**

Program code: UEBO-726

Value: \$500

Awarded: spring

Terms of reference: Granted to undergraduate students in any faculty based on demonstrated financial need and satisfactory academic performance. Preference will be given to students who contribute to the University or to the community through volunteer activities.

**Dr. Rosena Davison Bursary for France Field School**

Program code: UEBO-742

Value: \$800

Awarded: summer

Terms of reference: To full-time undergraduate students in good academic standing with an approved major in French who have been accepted to participate in a France field school. The bursary will be granted on the basis of demonstrated financial need.

**Father Della-Torre Bursary**

Program code: UEBO-592

Value: \$650

Awarded: fall

Terms of reference: Bursaries valued approximately at one term's tuition are available to students entering from secondary school. Applicants must demonstrate financial need and have satisfactory academic standing. Other bursaries valued approximately at one term's tuition are available to students in any faculty, who have a minimum of 60 units at Simon Fraser University, have maintained satisfactory academic standing and are in financial need.

**Gordon R. Diamond Bursary**

Program code: UEBO-535

Value: \$1000

Awarded: summer

Terms of reference: To undergraduate students in any faculty on the basis of demonstrated financial need and good academic standing.

**Dr. Jack Diamond Bursary**

Program code: UEBO-615

Value: \$1000

Awarded: summer

Terms of reference: Bursaries are available to students in any faculty with satisfactory academic performance and demonstrated financial need.

**Helen Egri Bursary for Students with Dependents**

Program code: UEBO-739

Value: \$250

Awarded: fall, spring, summer

Terms of reference: Bursaries will be awarded to students in any faculty on the basis of demonstrated financial need and satisfactory academic performance to students who financially support dependants.

**Fairfax Financial Holdings Limited Entrance Bursary**

Program code: UPBO-611

Value: \$2500

Awarded: fall, spring

Terms of reference: Eligible students must demonstrate financial need, be a Canadian citizen or have been granted permanent residence in Canada, have been accepted into (and must ultimately attend) the first year of a full time undergraduate degree program with a scheduled duration of not longer than five years, have achieved an average of at least 80% in their graduating year (which must have terminated no later than 18 months prior to the beginning of the academic year) at a Canadian secondary school or CEGEP, and not have previously received a Fairfax Award. Each recipients of an initial award is entitled to a renewal for four years for a total five years if the recipient continues to demonstrate financial need, intends to (and ultimately does) continue full time in the undergraduate degree program initially commenced and has not yet earned a degree therein, has achieved an average of at least B (3.0) in each previous academic year of the program and was in full time attendance in the program during the immediately preceding academic year.

**Erm Fiorillo – Hal Davis CKNW Orphan's Fund Bursary**

Program code: UEBO-651

Value: \$3000

Awarded: fall

Terms of reference: To an entering student from a secondary school in the Vancouver School District. In future the bursary may be offered to students graduating from secondary schools within the lower mainland. This award will be renewable for four academic years provided the recipient maintains a 2.00 grade point average and enrolls in nine units during the tenure of the award. This bursary is for a capable student whose family cannot provide financial assistance with the costs of post-secondary education because they are on welfare assistance. Students must be nominated by their secondary school principals and all applications will be evaluated by a school district selection committee, and the successful candidate will be recommended to the Simon Fraser University Senate Undergraduate Awards Adjudication Committee.

**Alex W. Fisher Bursary**

Program code: UEBO-596

Value: \$450

Awarded: spring

Terms of reference: To a hard-working and deserving male student in need of financial assistance. Donated by Alex W. Fisher.

**Lois M. Fisher Bursary**

Program code: UEBO-597

Value: \$450

Awarded: spring

Terms of reference: To a hard-working and deserving female student in need of financial assistance. Donated by Mr. Alex W. Fisher.

**William Gordon Memorial Bursary**

Program code: UEBO-640

Value: \$700

Awarded: fall

Terms of reference: To an undergraduate student in any faculty. The student must have a satisfactory academic standing and demonstrate financial need.

**Dr. Ben Gullison Bursary**

Program code: UPBO-640

Value: \$500

Awarded: fall

Terms of reference: To second, third or fourth year students in any undergraduate program. In recognition of Dr. Gullison's work, evidence of community service will be considered in making the award.

**Gutteridge Family Support Bursary**

Program code: UPBO-715

Value: \$1000

Awarded: summer

Terms of reference: Granted annually to a Simon Fraser University student with dependents, on the basis of demonstrated financial need and good academic standing.

**Hamber Foundation Bursary**

Program code: UPBO-559

Value: \$1000

Awarded: fall

Terms of reference: To women students with satisfactory academic standing and need for financial assistance.

**Madge Hogarth Bursaries**

Program code: UEBO-674

Value: \$325

Awarded: fall

Terms of reference: To undergraduate students in any faculty who are entering or in their fourth year of study and who have maintained satisfactory academic standing and demonstrated financial need.

**Horne Family Alumni Bursary**

Program code: UEBO-657

Value: \$1000

Awarded: fall, spring

Terms of reference: To a third or fourth year student who is a single parent, pursuing a degree at Simon Fraser University. The bursary is also based on satisfactory academic performance and demonstrated financial need.

#### **IODE Evelyn Price Memorial Bursary**

Program code: UEBO-641

Value: \$700

Awarded: fall

Terms of reference: To undergraduate students who are in the final year of a degree program. Applicants must be Canadian citizens, be maintaining a satisfactory academic standing and be in financial need.

#### **Ken and Su Jang Entrance Bursary**

Program code: UEBO-672

Value: \$1700

Awarded: fall

Terms of reference: To an entering student who demonstrates financial need and who has a satisfactory academic record prior to entrance to Simon Fraser University.

#### **Blayne and Sharon Johnson Bursary**

Program code: UEBO-523

Value: \$1100

Awarded: summer

Terms of reference: Granted on the basis of demonstrated financial need and satisfactory academic performance.

#### **Charles Chan Kent Golden Wedding Bursaries**

Program code: UPBO-563

Value: \$500

Awarded: fall

Terms of reference: To a student who is proceeding to a degree in any field, has successfully completed at least one year at Simon Fraser University, and needs financial assistance. Preferably the bursary will be made to a student of Chinese descent.

#### **Harold Lauer B'nai B'rith (Lions Gate Lodge 1716)**

Program code: UPBO-564

Value: \$750

Awarded: fall

Terms of reference: To undergraduate students, in any faculty, who have determined financial need and satisfactory academic standing.

#### **Donna Margaret Laws Undergraduate Bursary**

Program code: UEBO-546

Value: \$1000

Awarded: fall

Terms of reference: Given in the fall term to an undergraduate student in any faculty who is from outside the boundaries of the GVRD and on the basis of demonstrated financial need and satisfactory academic performance. Preference, when possible, will be given to female students.

#### **Dorothy and Alex MacDonald Bursary**

Program code: UEBO-678

Value: \$1000

Awarded: fall

Terms of reference: One or more bursaries will be awarded to undergraduate students in any faculty who have a satisfactory academic record and demonstrates financial need. A short letter outlining dedication to and involvement in the community should accompany the application.

#### **Sue MacDonald Memorial Bursary**

Program code: UEBO-654

Value: \$700

Awarded: fall, spring, summer

Terms of reference: Two or more bursaries will be awarded to undergraduate students in any faculty who have proven financial need and a satisfactory academic record.

#### **Dorothy May Martin Endowment Bursary**

Program code: UEBO-648

Value: \$1000

Awarded: fall, spring, summer

Terms of reference: To students who are returning to full-time studies subsequent to a substantial interruption of their academic career after secondary school. Students must have a satisfactory academic standing and demonstrate financial need.

#### **Dr. Carol Matusicky Family Studies Bursary**

Program code: UEBO-708

Value: \$500

Awarded: spring

Terms of reference: The bursary is given on the basis of demonstrated financial need and satisfactory academic performance. Preference will be given to a student in the certificate in family studies program or, failing that, to a student in any faculty whose course work will prepare them to work with children, youth and families after university.

#### **John Michael McLarty Bursary**

Program code: UEBO-666

Value: \$1000

Awarded: fall

Terms of reference: To an undergraduate student in any faculty. The award will be granted to a student who has a satisfactory academic record and who is experiencing financial need in the continuing pursuit of studies. Preference will be given to Canadian students.

#### **Jo-Ann Mychaluk Bursary**

Program code: UEBO-602

Value: \$750

Awarded: fall

Terms of reference: To students with satisfactory academic standing. These bursaries are available to students who are, or have been, residents of the Chilcotin or Cariboo regions of BC. This fund has been established in memory of Jo-Ann Mychaluk who worked in the Centre for Distance Education.

Ben Wosk  
Mr. and Mrs. Ben Wosk 40th Wedding Anniversary

#### **Jean Pudney Bursaries**

Program code: UEBO-750

Value: \$500

Awarded: fall

Terms of reference: To graduate or undergraduate students in good academic standing on the basis of demonstrated financial need.

#### **Office of the Registrar Bursary**

Program code: UEBO-665

Value: \$500

Awarded: fall

Terms of reference: The Office of the Registrar Bursary provides one or more annual bursaries from a portion of the earned interest on the endowment. The award(s) will be given in the fall term to a disabled graduate or undergraduate student in any faculty. The bursaries will be granted to disabled students holding satisfactory academic records and experiencing financial need in the continuing pursuit of studies.

#### **Renaissance Community Service Bursary**

Program code: UEBO-751

Value: \$1000

Awarded: summer

Terms of reference: Granted on the basis of demonstrated financial need and leadership and/or service at Simon Fraser University to a student in any faculty. The student's leadership or service may be to the University community or by representing the University to the community at large. Applications packages must include a resume outlining the candidate's leadership activities and volunteer service as well as letter(s) of recommendation confirming these activities.

#### **Rotary Club of Vancouver Sunrise Entrance Bursary**

Program code: UEBO-706

Value: \$1000

Awarded: fall

Terms of reference: Based on financial need, to a student entering Simon Fraser University. Preference will be given to a student who resides in the City of Vancouver. The recipient of the award may be invited to make a presentation at a meeting of the Rotary Club of Vancouver Sunrise.

#### **Saskexpo '86 Bursary**

Program code: UPBO-636

Value: \$3000

Awarded: fall

Terms of reference: Saskatchewan secondary school student entering either Simon Fraser University in British Columbia or The University of Saskatchewan at Saskatoon in Saskatchewan. The award will alternate between Simon Fraser University and the University of Saskatchewan. For 1988-1989 (the first year of the award), the bursary was for a student attending Simon Fraser University. Selection will be made on the basis of financial need, the student's demonstrated contribution to his/her school and community, and leadership potential. Consideration may also be given to the student's academic record. Applications will be submitted to the Simon Fraser University Senate Scholarships, Awards and Bursaries Committee, in care of the director of Financial Aid and Awards at Simon Fraser University for students who plan to attend Simon Fraser University; and to the University of Saskatchewan Scholarships, Awards and Bursaries Committee, in care of the registrar, for students planning to attend The University of Saskatchewan.

#### **Sceptre Investment Counsel Ltd Bursary**

Program code: UEBO-701

Program code: UEBO-721

Value: \$1500

Awarded: fall

Terms of reference: Granted to a student in any faculty on the basis of demonstrated financial need and satisfactory academic performance.

#### **Mrs. Rosalie Segal Endowment Fund for Students With Special Needs**

Program code: UEBO-604

Value: \$500

Awarded: fall, spring, summer

Terms of reference: This fund has been established to provide bursaries to physically challenged students. Up to three bursaries will be awarded on the basis of financial need. Adjudication will occur in consultation with the physically challenged students' co-ordinator.

#### **Stanley Sievenpiper Bursary**

Program code: UEBO-605

Value: \$500

Awarded: fall, spring

Terms of reference: One award in the fall and one in the spring on the basis of financial need. Preference will be given to third and fourth year students. This fund has been established in memory of Stanley Sievenpiper.

#### **Simon Fraser Student Society Bursary**

Program code: UPBO-571

Value: \$800

Awarded: spring

Terms of reference: To students with special or emergency financial need with preference to those students who may not otherwise be able to attend Simon Fraser University. Applications are open to part or full time, beginning or continuing students as well as international students.

#### **Simon Fraser University 10th Anniversary Endowment Bursary**

Program code: UEBO-504

Value: \$500

Awarded: fall, spring, summer

Terms of reference: This fund has been established to provide bursaries for students in financial need who maintain a GPA of 2.00.

#### **Simon Fraser University Bursary Endowment Fund**

Program code: UEBO-502

Value: \$500

Awarded: fall, spring, summer

Terms of reference: All undergraduates in financial need are eligible to apply for these bursaries. A minimum CGPA of 2.00 is required.

#### **Simon Fraser University Daycare Bursaries**

Program code: UUBO-700

Value: \$100

Awarded: fall, spring, summer

Terms of reference: Applications for daycare bursaries are available at the Daycare Centre. Eligible students may qualify for a bursary provided that financial need can be demonstrated by a completed Canada Student Loan assessment or an open bursary assessment. Daycare bursaries are available to both graduate and undergraduate students.

#### **SFU Field School Bursary**

Program code: UUBO-510

Value: variable

Awarded: fall, spring, summer

Terms of reference: Bursaries will be available each term to Simon Fraser University students who are participating in a Simon Fraser University field school. Awards will be made to students in good academic standing on the basis of demonstrated financial need.

#### **SFU Foreign Exchange Bursary**

Program code: UUBO-512

Value: variable

Awarded: fall, spring, summer

Terms of reference: Bursaries will be available each term to Simon Fraser University students who are participating in formal exchange programs organized by Simon Fraser University. Awards will be made to students in good academic standing on the basis of demonstrated financial need.

#### **SFU International Co-operative Education Bursary**

Program code: UUBO-514

Value: variable

Awarded: fall, spring, summer

Terms of reference: Bursaries will be granted in any term to students in good academic standing who are accepted to the Co-operative Education Program and are enrolled in a work term outside of Canada. To be eligible students must be placed with a co-operative education employer and be in good standing with the

co-op program. The award will be made on the basis of demonstrated financial need.

#### **SFU International Students' Bursary Fund**

Program code: UUBO-600

Value: \$500

Awarded: fall, spring, summer

Terms of reference: This fund has been established to assist undergraduate visa students who have critical financial need. Students applying for this bursary must be enrolled in a minimum of nine units and have satisfactory academic standing.

#### **Simon Fraser University International Students' Emergency Assistance Fund**

Program code: UPBO-637

Value: \$500

Awarded: fall, spring, summer

Terms of reference: This fund has been established primarily to assist undergraduate visa students who have critical financial need. Students applying for this bursary must be enrolled in a minimum of nine units and have satisfactory academic standing.

#### **Simon Fraser University Open Bursaries**

Program code: UUBO-500

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Must be enrolled in a minimum of nine units and have satisfactory academic standing.

#### **SFU Punjabi Students Association Bursary**

Program code: UEBO-521

Value: \$450

Awarded: summer

Terms of reference: The SFU Punjabi Students Association Bursary valued at a portion of the income earned on the endowment, will be awarded annually in any term. Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to undergraduate students in any faculty.

#### **Jennifer Allen Simons Bursary**

Program code: UEBO-669

Value: \$1000

Awarded: fall

Terms of reference: To an undergraduate or graduate woman student in any faculty. The bursary will be granted in the fall term to a student who is a single parent supporting a child, and who is in financial need and who has satisfactory academic performance. Applicants must have completed one term at Simon Fraser University as a full-time student.

#### **B and B Sivertz Bursary**

Program code: UEBO-656

Value: \$1000

Awarded: fall

Terms of reference: To undergraduate students who demonstrate financial need and satisfactory academic performance, and who have completed 30 units at Simon Fraser University.

#### **Harry and Dora Annie Smee Bursary**

Program code: UEBO-606

Value: \$800

Awarded: fall

Terms of reference: Up to three bursaries will be awarded to students in any faculty who have completed at least 30 units at Simon Fraser University. The awards will be based on financial need and satisfactory academic standing. Preference will be given to female students.

#### **Merle L. Smith Bursary**

Program code: UPBO-572

Value: \$525

Awarded: spring

Terms of reference: A physically challenged student in any faculty who is beyond first year studies. Initial preference will be given to wheelchair users.

#### **Squamish Nation Bursary**

Program code: UEBO-738

Value: \$500

Awarded: fall, spring, summer

Terms of reference: The bursary, based on financial need and community service, is granted to a student who is a member of the Squamish Nation. The bursary may be granted to graduate or undergraduate students in all disciplines. The successful student will have completed a minimum of 24 units and will have achieved a minimum CGPA of 2.00. The application should include a discussion of the student's involvement in Simon Fraser University or Squamish Nation community activities and confirmation of the student's status with the Squamish Nation.

#### **Dorothy Sullivan Bursary**

Program code: UEBO-690

Value: \$800

Awarded: fall, spring, summer

Terms of reference: To an undergraduate student in any faculty who has been a federal or provincial prisoner. Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance.

#### **TCG International Undergraduate Bursaries**

Program code: UEBO-644

Value: \$1500

Awarded: fall

Terms of reference: The bursaries will be granted to undergraduate students in any faculty with satisfactory academic standing and experiencing financial need in the continuing pursuit of their studies. Preference for one of the bursaries will be given to applicants who are sons, daughters, or legal dependants of employees of TCG International Inc. However, where no such candidate is identified, disbursement of the awards will be at the discretion of Simon Fraser University.

#### **Trident Enrichment Society Bursary**

Program code: UEBO-696

Value: \$600

Awarded: fall

Terms of reference: To an entering or first year undergraduate student in any faculty. The bursary will be awarded to a student with a satisfactory academic record and demonstrated financial need in the continuing pursuit of their studies. The application must be accompanied by a letter outlining the applicant's participation in community service.

#### **TSSU Member Child Care Bursary**

Program code: UUBO-550

Value: variable

Awarded: fall, spring, summer

Terms of reference: TSSU employees are eligible to apply to the TSSU Member Child Care Bursary for each term in which they hold an appointment and are enrolled as students at Simon Fraser University and in which they receive child care services from a paid child care provider. All applications are subject to verification. The applicant must identify him/herself as an employee in the bargaining unit on the bursary application.

#### **University Women's Club of Coquitlam Bursary**

Program code: UPBO-573

Value: \$1000

Awarded: summer

Terms of reference: To a full-time undergraduate female student who has returned to her studies at Simon Fraser University. Preference, where possible, is to be given to a resident of School District #43 or a graduate of a School District #43 secondary school.

#### **University Women's Club of Vancouver Bursary**

Program code: UPBO-575

Value: \$985

Awarded: spring

Terms of reference: To a female student in any faculty enrolled in any program of study leading to a degree.

The basis of the award is demonstration of financial need and satisfactory academic standing.

#### **Vancouver East Rotary Entrance Bursary**

Program code: UEBO-743

Value: \$250

Awarded: fall

Terms of reference: To an entering student on the basis of financial need. Preference will be given to a student graduating from Killarney, Windemere or Gladstone Secondary Schools in Vancouver who are entering an undergraduate program showing interest in pursuing a career in K-12 education. If no suitable candidates are identified, the bursary will be made available to students from Killarney, Windemere or Gladstone Secondary Schools in Vancouver entering any undergraduate program.

Terms of reference: To an undergraduate third or fourth year student in the Faculty of Education. The bursary will be granted on the basis of demonstrated financial need and satisfactory academic performance.

**Delta Kappa Gamma Society – Delta Chapter Bursary**

Program code: UPBO-610

Value: \$500

Awarded: fall

Terms of reference: The bursary is offered based on demonstrated financial need and satisfactory academic performance to students with dependants who are entering or enrolled in the Professional Development Program in the Faculty of Education at Simon Fraser University.

**Faculty of Education Alumni Bursaries**

Program code: UEBO-533

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the Faculty of Education.

**Faculty of Education Special Bursary**

Program code: UEBO-595

Value: \$1000

Awarded: fall, spring

Terms of reference: To a student enrolled in the Professional Development Program who is also enrolled in a minor in learning disabilities, and who is entering EDUC 405 in either spring or fall term. The bursary is awarded for the term in which EDUC 405 is undertaken.

**Polly Evenden Bursary in Geography Education**

Program code: UEBO-544

Value: \$900

Awarded: fall, spring, summer

Terms of reference: The bursary will be granted on the basis of demonstrated need and satisfactory academic performance to a student who has completed a bachelor's degree from Simon Fraser University with an honors or major in geography or who is approved in such a program and is entering the Professional Development Program. Applicants must be intending to teach geography upon graduation and provide a supporting letter outlining their career goals and this intent.

**JimMar Bursary in Education**

Program code: UEBO-539

Value: \$500

Awarded: summer

Terms of reference: Bursaries will be granted to undergraduate students in the Faculty of Education. The bursary is granted in any term based on demonstrated financial need and satisfactory academic performance.

**Pacific National Foundation Endowment Bursary**

Program code: UEBO-655

Value: \$2000

Awarded: fall

Terms of reference: To a single parent, undergraduate student in the Faculty of Business Administration, Faculty of Education, Faculty of Applied Sciences or the Faculty of Science. The bursary will be granted to a student wishing to upgrade their professional skills. The student should have satisfactory academic standing and a demonstrated financial need. A letter expressing job goals and direction should accompany the application form.

**Maureen Pollard Memorial Bursary**

Program code: UEBO-734

Value: \$750

Awarded: summer

Terms of reference: Granted on the basis of demonstrated financial need and satisfactory academic performance to students in the Professional Development Program in the Faculty of Education. Preference, when possible, will be given to students in the elementary stream.

**Sylvia R.H. Rice Memorial Bursary**

Program code: UEBO-660

Value: \$2000

Awarded: fall

Terms of reference: To a first year student in the Professional Development Program in the Faculty of Education. Satisfactory academic standing and demonstrated financial need is required.

**R.R. Smith Bursary in Education**

Program code: UEBO-745

Value: \$850

Awarded: fall

Terms of reference: To a student in good academic standing who is enrolled in the Professional

Development Program (PDP) on the basis of demonstrated financial need.

#### **Dina Taddei Bursary in Education**

Program code: UEBO-756

Value: \$500

Awarded: fall

Terms of reference: Awarded annually on the basis of demonstrated financial need to a student in good academic standing registered in the Professional Development Program (PDP).

#### **Vancouver Elementary School Teachers' Association Bursary**

Program code: UPBO-577

Value: \$600

Awarded: fall

Terms of reference: To students who are residents of Vancouver or students who have attended a Vancouver elementary school and are proceeding to a degree or certificate in teaching. Recipients are selected also on the basis of need. The awards offered are as follows.

- Elizabeth Dobbins Memorial Bursary open to students entering third year in the Faculty of Education at Simon Fraser University.
- Owen J. Thomas Memorial Bursary open to students entering the fourth year in the Faculty of Education at Simon Fraser University.

#### **Bursary for Environment Students**

##### **Jennifer O'Neill Memorial Annual Bursary in Environmental Science**

Program code: UPBO-705

Value: \$500

Awarded: fall, spring, summer

Terms of reference: To an undergraduate student in their third year of study in the Environmental Science Program.

#### **Bursaries for Health Sciences Students**

##### **Dr. Cam Coady Foundation Annual Undergraduate Bursary in Health Sciences**

Program code: UPBO-708

Value: \$2000

Awarded: fall

Terms of reference: To an undergraduate student in the Faculty of Health Sciences on the basis of financial need and satisfactory academic standing. Where possible, preference will be given to students entering their first year of study in the Faculty of Health Sciences.

##### **Vancouver Foundation Health Science Bursaries**

Program code: UPBO-578

Value: \$1000

Awarded: fall, spring

Terms of reference: The bursary assistance program is limited to full-time students studying in health sciences. The funds are directed to students who have completed at least one year of post-secondary education and can demonstrate financial need. Areas of study include any of the following: pre-med program, kinesiology, biomedical engineering, and gerontology.

#### **Bursaries for Science Students**

##### **Peter and Elizabeth Belton Bursary in Biology**

Program code: UEBO-729

Value: \$500

Awarded: summer

Terms of reference: To undergraduate students in the Faculty of Science majoring in biology. The bursary is granted on the basis of demonstrated financial need and satisfactory academic performance.

##### **Undergraduate Biology Student Union Bursary**

Program code: UPBO-695

Value: \$100

Awarded: summer

Terms of reference: One bursary valued at \$100 will be available annually in any term. The bursary, based on financial need, will be granted to an undergraduate student who is an approved biology major and is in good academic standing.

##### **Canadian Federation of University Women - North Vancouver Bursary**

Program code: UPBO-574

Value: \$1000

Awarded: spring

Terms of reference: To a female undergraduate student enrolled in the second, third, or fourth year in any math or science faculty or professional school. The recipient should be in financial need and in satisfactory academic standing. The recipient must be a resident of North Vancouver or a graduate of a North Vancouver secondary school (School District #44).

##### **Curzon-Digman Bursary**

Program code: UEBO-594

Value: \$750

Awarded: fall, spring, summer

Terms of reference: Available to graduate students in physics or for majors or honors undergraduate students in physics, mathematical physics, chemical physics, biophysics or other joint programs with physics. These bursaries are subject to demonstrated financial need and good academic standing. Nominations will be made by the chair of the Department of Physics in consultation with Financial Aid and Awards.

##### **IODE Burnaby Municipal Chapter Bursary**

Program code: UEBO-658

Value: \$750

Awarded: fall, spring

Terms of reference: To third or fourth year students majoring in science or applied sciences. Students must be Canadian citizens and graduates of Burnaby Senior Secondary School. Financial need and satisfactory academic standing is required.

##### **Ralph Kerr Memorial Bursary**

Program code: UEBO-599

Value: \$1000

Awarded: fall

Terms of reference: To undergraduate students. Preference will be given to students who are in their third or fourth year of studies in the physics or engineering programs. This bursary fund has been established in memory of Ralph Kerr, a charter member of Simon Fraser University and a former employee of the Department of Physics.

##### **School of Kinesiology Alumni Bursaries**

Program code: UEBO-532

Value: \$500

Awarded: summer

Terms of reference: Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the School of Kinesiology.

##### **Lantic Inc. Bursaries**

Program code: UPBO-553

Value: \$1000

Awarded: fall

Terms of reference: To undergraduate students, who are in their third or fourth year of study at Simon Fraser University. Two bursaries are available to students majoring in business administration, and three bursaries to students majoring in economics, or the sciences, including mathematics and statistics.

##### **Margaret Lawson McTaggart-Cowan Alumni Bursary**

Program code: UEBO-600

Value: \$550

Awarded: fall

Terms of reference: To a female student who is majoring in mathematics and who has completed at least two full-time terms at Simon Fraser University.

##### **Oakley Family Endowed Bursary in Science**

Program code: UEBO-736

Value: \$450

Awarded: summer

Terms of reference: Granted on the basis of demonstrated financial need and satisfactory academic performance to students in the Faculty of Science.

##### **Pacific National Foundation Endowment Bursary**

Program code: UEBO-655

Value: \$2000

Awarded: fall

Terms of reference: To a single parent, undergraduate student in the Faculty of Business Administration, Faculty of Education, Faculty of Applied Sciences or the Faculty of Science. The bursary will be granted to a student wishing to upgrade their professional skills. The student should have satisfactory academic standing and a demonstrated financial need. A letter expressing job goals and direction should accompany the application form.

##### **Faculty of Science Alumni Bursaries**

Program code: UEBO-528

Value: \$500

Awarded: summer

Terms of reference: Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the Faculty of Science.

##### **SFU Molecular Biology and Biochemistry Student Union Bursary**

Program code: UPBO-608

Value: \$100

Awarded: spring

Terms of reference: The bursary will be granted annually in the spring term to a student with an approved major in MBB. The bursary is based on financial need and satisfactory academic performance.

##### **Irene May Surbey Bursary**

Program code: UEBO-723

Value: \$900

Awarded: spring

Terms of reference: Granted to undergraduate students in the Faculty of Science or in the Faculty of Applied Sciences. The bursary is granted on the basis of demonstrated financial need and satisfactory academic performance.

##### **Ken Turner Memorial Endowment Fund Bursary**

Program code: UEBO-639

Value: \$1000

Awarded: fall, spring

Terms of reference: To third or fourth year undergraduate students with a specialization in marine biology. All students are welcome to apply. However, preference will be given to a student from the Kimberly area if all other qualifications have been met. This bursary is in memory of Ken Turner, a graduate of the resource management program. A departmental recommendation is also required.

##### **Urea Formaldehyde Foam Insulation Action Association Bursary**

Program code: UEBO-607

Value: \$250

Awarded: fall, spring

Terms of reference: To students who have completed at least 60 units and who are studying in the areas of toxic chemicals or pollutants and their effects on human health and functioning. Please document eligibility. The endowment has been established by the association.

### Vancouver Foundation Health Science Bursaries

Program code: UPBO-578

Value: \$1000

Awarded: fall, spring

Terms of reference: The bursary assistance program is limited to full-time students studying in health sciences. The funds are directed to students who have completed at least one year of post-secondary education and can demonstrate financial need. Areas of study include any of the following: pre-med program, kinesiology, biomedical engineering, and gerontology.

### Scott Wilson Memorial Bursary in Physics

Program code: UEBO-748

Value: \$800

Awarded: fall

Terms of reference: To an undergraduate student(s) enrolled full time in a physics program in good academic standing on the basis of demonstrated financial need. Preference will be given to students who are returning to university after a break in their studies, lasting at least one year or more.

## Awards for the University Community

Awards are given in recognition of distinguished intellectual, cultural, social or athletic contribution to university life. Awards usually consist of monetary remuneration but may also come in the form of a prize or medal. Many of the following awards have been made possible by generous donations.

### Regulations for Academic and Service Awards

The following regulations govern all prizes, medals or awards over which the University has jurisdiction.

- In most cases, nominations are submitted directly to Financial Aid and Awards. Both undergraduate and graduate students are eligible unless otherwise indicated.
- Undergraduate students must have achieved a minimum CGPA of 2.00 during the term of their contribution and must not be on academic probation, or in the case of first term or transfer students, must possess an equivalent secondary school or college standing.
- Undergraduates must be enrolled in a minimum of nine units of normal graded courses in the term of eligibility. Challenge, audit, and credit free courses are not considered. Students who enrol in fewer than nine units or subsequently drop below nine units may have their awards cancelled.
- Graduate students must be enrolled for residence credit in an approved full time program in the term of eligibility. Students who do not enrol or subsequently change to on-leave status may have their awards cancelled.
- Candidates must submit a paper application form to Financial Aid and Awards or be nominated by a member (or members) of the Simon Fraser University faculty, staff, student body or alumni. Individuals submitting a nomination for an award must file the nomination form with Financial Aid and Awards.
- Normally, only one intervening term will be allowed between the term in which the enrolled student made their contributions and the term in which the award is adjudicated.
- Where contributions are over and above usual expectations, remunerated or assigned activities, such as course assignments or teaching duties, may be considered for recognition.
- Unless otherwise stated, awards are tenable only at Simon Fraser University for the term indicated on the notice and may not be deferred.

## Awards for All Students

### Aboriginal Student Leader Award

Program code: UUAO-120

Value: \$2000

Awarded: fall, spring, summer

Terms of reference: Awards are available each year to graduate and undergraduate aboriginal students attending Simon Fraser University who have a living connection to their own aboriginal community and who have completed 30 units at the University. The recipient will be in good academic standing and have demonstrated excellence in one or more of service to the University, community service, cultural contribution and overcoming personal or systemic barriers. Documentation supporting the student's community connection, service and volunteer activities shall be submitted to Financial Aid and Awards. The Senate Undergraduate Awards Adjudication Committee will make the award.

### Alumni Association Outstanding Student Leadership Award

Program code: UPAO-167

Value: \$2000

Awarded: summer

Terms of reference: Granted to a student in any faculty who is in his/her third or fourth year with a minimum of thirty (30) units completed at Simon Fraser University. The recipient will have demonstrated a combination of outstanding academic achievement and outstanding performance or leadership in another endeavor at Simon Fraser University or in the broader community. The achievement may be in athletics or the arts, in service to the University or to the community at large. Nominations, including a letter and resume from the nominee and a supporting letter from an individual who can speak to the achievements of the nominee, should be sent from the chair or director of the nominee's department or school to the registrar by April 15 each year. The award will be made by the Senate Undergraduate Awards Adjudication Committee. Presentation of the Alumni Association Outstanding Student Leadership Award will take place at the annual outstanding alumni awards ceremony. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

### Dr. B. R. Ambedkar Humanitarian Award

Program code: UPAO-201

Value: \$1000

Awarded: summer

Terms of reference: The recipient will have demonstrated a combination of outstanding academic achievement and outstanding leadership and/or service at Simon Fraser University. This may be service to the University or by representing the University to the community at large. When possible, preference will be given to service in relation to human rights. Applicants may apply for the award themselves, or may be recommended by a member of the University community. Applicants should provide a copy of volunteer service with the application. Letters of recommendation will also be considered. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

### BC Bearing Engineers Limited Award

Program code: UEAO-537

Value: \$300

Awarded: summer

Terms of reference: Granted to a co-op student in any faculty who is doing his/her work term(s) in Latin America, including Mexico. The award is intended to off-set travel and/or living expenses for the period of time (not exceeding one year) spent in Latin America, or Mexico. If more than one student applies for the award, then the best CGPA will be the deciding factor. The award will be made by the Senate Undergraduate Awards Adjudication Committee on

the recommendation of the director, Co-operative Education.

### B.C. Sugar Achievement Award

Program code: UEAO-526

Value: \$4500

Awarded: summer

Terms of reference: Granted to a Simon Fraser University faculty, staff member, student or multiple of the same who meet the following criteria: winner of national or international competition, or recipient of national or international prize or award; history of leadership in recipient's field; accomplishment(s) relate directly to responsibilities and activities at Simon Fraser University. Nominations of an individual or group should be forwarded to Financial Aid and Awards by April 15th of each year. Nominations should include a description of the nominee's achievements, a curriculum vitae (if appropriate), and three letters of recommendation.

### Fiona Candy Award

Program code: N/A

Value: \$2000

Awarded: spring

Terms of reference: Awarded annually to an international undergraduate student in any faculty in good academic standing who has overcome personal adversity and/or bureaucratic difficulties in the pursuit of their education. Application packages must include a letter from the candidate outlining their adverse circumstances. The award will be granted upon the completion of the student's last term at Simon Fraser University to obtain their undergraduate degree. The recipient of the award will be determined by the Senate Undergraduate Awards Adjudication Committee based upon the nomination of the Associate Vice-President, Students and International.

### Deans' Convocation Medals

Program code: UUAO-002

Awarded: summer

Terms of reference: To a graduating student from each faculty. The dean of the respective faculty will recommend a student who is from the top five percent of graduating students within that faculty. The top five percent is defined by cumulative GPA. All nominations are to be forwarded to Financial Aid and Awards.

### Terry Fox Gold Medal

Program code: UUAO-001

Value: \$1000

Awarded: summer

Terms of reference: To any person who has demonstrated those personal qualities of courage in adversity and dedication to society which have been exemplified by Terry Fox and his Marathon of Hope. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

### Alexander Fraser Award in Piping and Drumming

Program code: UEAO-011

Value: \$500

Awarded: spring

Terms of reference: These awards are made following a competition among the pipers and drummers on campus. A cash award will be made to the student judged best in each of the two categories. In addition, a cash award may also be made to the student who has contributed most significantly to the development of highland tradition at Simon Fraser University.

### Mahatma Gandhi Annual Student Award

Program code: UPAO-210

Value: \$1500

Awarded: fall

Terms of reference: Granted to a current or newly admitted full-time Simon Fraser University student in good academic standing on the basis of demonstrated community service and leadership. Voluntary service may include any voluntary service

which contributes toward the betterment of the human conditions: health related and caring services, literacy and training programs, peer group assistance, work with peace organizations, social justice initiatives, community building services, anti-violence programs, anti-poverty programs, and local, national and international programs that address issues related to peace, justice, and human rights. Applications packages must include

- a) a one page description of the student's volunteer work including: why the specific volunteer work was chosen, the student's experience as a volunteer, and the effectiveness (or impact of their volunteer work
- b) include at least one letter of reference from a person in the organization or group with which they volunteered
- c) a resume which includes all paid and volunteer work to date.

Complete application packages must be received no later than August 31 of each year. Recipients will be recognized at the Gandhi Jayanti each year. The recipient of award will be determined by the Senate Undergraduate Awards Adjudication Committee based upon the nomination of the Institute of Humanities Gandhi Committee.

#### **Governor General's Silver Medal**

Program code: UPAO-001

Awarded: summer

Terms of reference: The silver medal will be awarded to the student whose record, in the opinion of the faculties, is the most outstanding in the graduating classes in any faculty. Eligible candidates should have completed a minimum of 60 units at Simon Fraser University. The award shall be made to the student who has maintained a high scholastic standing during not fewer than six terms or the equivalent of 60 units or more at Simon Fraser University.

#### **Laurine Harrison Undergraduate Service Award**

Program code: UEAO-545

Value: \$1250

Awarded: summer

Terms of reference: Granted annually to students in good academic standing from any faculty. The award will be disbursed on the basis of demonstrated leadership and/or service at Simon Fraser University. The student's leadership or service may be to the student community, (demonstrated by service to the Student Society, Board of Governors, Senate, or some other University body on which students are represented) or by advocating for students in the community at large (as demonstrated by fundraising activities, or service to off-campus student advocacy groups). Application packages must include a letter from the candidate outlining either volunteer service, as well as letter(s) of recommendation confirming these activities. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **Laurine Harrison Courage to Succeed Undergraduate Award**

Program code: UEAO-546

Value: \$1250

Awarded: summer

Terms of reference: To a student in good academic standing from any faculty who has overcome adversity in the pursuit of their education. Application packages must include a letter from the candidate outlining their adverse circumstances, as well as confirming letter(s) of recommendation.

#### **Stephen Harold Edward Herring Prize**

Program code: UEAO-048

Value: \$1500

Awarded: summer

Terms of reference: The Herring Prize will honor the development of a device or innovative way to restore lost functions and provide increased independence for people who have been paralyzed. Submissions will be evaluated by the Herring committee based on the originality of the research, keeping in mind the contribution of direct and effective research in alleviation and curing injuries made by impact that cause any paralysis. Eligible candidates will be graduate or undergraduate students at Simon Fraser University in any faculty. The submission should include a description of the research, device or innovation to alleviate or cure injuries causing paralysis, and two letters of support from faculty who know the student well and can attest to the originality of the research and role played by the student. Submissions should be sent to Financial Aid and Awards by April 15th. The Herring Prize will be awarded at the February awards ceremony in the following year. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Stephen Herring prize committee.

#### **Hong Kong University BC Alumni Award**

Program code: UEAO-538

Value: \$1000

Awarded: spring

Terms of reference: To a co-op student in any faculty who is doing his/her work placement in Hong Kong. The award is intended to offset travel and/or living expenses for the period of time (not exceeding one year) spent in Hong Kong. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the recommendation of the Co-operative Education program director.

#### **Honor Roll**

Program code: N/A

Awarded: fall, spring, summer

Terms of reference: A limited number of students will be admitted each term to the University honor roll, mainly on the basis of excellent work completed in the previous term. This award will be shown on the student's permanent record. Admission to the honor roll requires that the student

- must have completed a minimum of 30 units at Simon Fraser University by the end of the term being evaluated
- must have completed at least 12 units in the term being evaluated
- must achieve a minimum term GPA of 4.00 calculated on all normally graded courses completed in the term being evaluated.

#### **International Co-operative Education Awards**

Program code: UUAO-203

Value: variable

Awarded: fall, spring, summer

Terms of reference: To students in good academic standing from any faculty who are accepted for a prioritized Simon Fraser University international co-operative education placement. These awards will be granted by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, Work Integrated Learning. In prioritizing placements the director of Work Integrated Learning's considerations will include but not necessarily be limited to the following: geographical location, salary rate and placement costs (i.e. work permits, association fees, immunization, travel etc.) Awards will be made to students participating in prioritized placements on the basis of academic performance.

#### **International Mobility Awards**

Program code: UUAO-204

Value: variable

Awarded: fall, spring, summer

Terms of reference: To students in good academic standing from any faculty who are accepted for an SFU International exchange or field school program in

targeted locations. Awards values will be determined based on location of the formal exchange or field school. Awards will be made to students participating in targeted programs on the basis academic performance and their engagement in internationalization activities (i.e. volunteer activities, mentorships, community activities, international work experience). These awards will be granted by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, SFU International.

#### **Judy Kelly Humanitarian Award**

Program code: UEAO-522

Value: \$650

Awarded: summer

Terms of reference: To an undergraduate student in any faculty who has provided volunteer services to the university community. Particular preference will be given to students who have provided aid to students with physical disabilities. Applicants may apply for the award themselves, or may be recommended by a member of the University community. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **Living Personal Truths Award**

Program code: UPAO-195

Value: \$400

Awarded: summer

Terms of reference: The award is given to a student in any faculty who has demonstrated a significant contribution to reducing discrimination and/or increasing awareness of sexual orientation and gender diversity. Applications must include a letter and resume from the student and a supporting letter from an individual who can speak to their achievements. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **London Drugs 60th Anniversary Student Awards**

Program code: UEAO-540

Value: \$1000

Awarded: summer

Terms of reference: The awards will be granted to graduate or undergraduate students in any faculty whose volunteer activities have made a significant contribution to the development and/or improvement of campus community life. Candidates must be in good academic standing and should demonstrate their involvement in unpaid volunteer activities by providing their resumé and cover letter describing their volunteerism, the length of service and time commitment dedicated to such interests and include a letter of reference from a supervisor of the candidate's volunteer work. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **Iain and Mary Ormsaig MacKinnon Memorial Award**

Program code: UEAO-045

Value: \$2500

Awarded: fall

Terms of reference: The award is granted to an undergraduate student who plays the bagpipe either as a solo musician or as part of any pipe band, and who has a CGPA of 2.5 (or greater). Applications for the award should include a letter of reference from an appropriate individual discussing the applicant's activities as a solo piper or participation in a pipe band.

#### **Meloche Monnex Outstanding Student Leadership Award**

Program code: UPAO-199

Value: \$1000

Awarded: summer

Terms of reference: The award will be granted to a student in any faculty who is in his/her third or fourth year with a minimum of 30 units completed at Simon

Fraser University. The recipient will have demonstrated a combination of outstanding academic achievement and outstanding performance or leadership in another endeavor at Simon Fraser University or in the broader community. The achievement may be in athletics or the arts, in service to the University or to the community at large. Applications must include a letter and resume from the student and a supporting letter from an individual who can speak to their achievements. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **Minerva Foundation Annual Award for BC Aboriginal Women**

Program code: UPAO-211

Value: \$2500

Awarded: fall

Terms of reference: Awarded in any term to Aboriginal women who are residents of BC. These awards assist single mothers in advancing their education, retrain mature women returning to the workplace after a long absence and assist women with disabilities to overcome education barriers. Preference will be given to students attending the Simon Fraser University Kamloops program. The awards will be granted on the basis of good academic standing and any one or more of the criteria listed above. Supporting documentation confirming the candidate's aboriginal status and reference to any of the above criteria may be required.

#### **Mitsubishi Canada Limited Student Exchange Awards**

Program code: UEAO-064

Value: \$2000

Awarded: fall, spring, summer

Terms of reference: The Mitsubishi Canada Limited Student Exchange Awards will be awarded annually to undergraduate students who are undertaking study in Japan on a formal exchange program with one of Simon Fraser University's Japanese exchange partners. Eligibility criteria is as follows.

- 1) 2.7 cumulative grade point average
- 2) completion of at least one year of study at Simon Fraser University
- 3) two letters of reference from faculty
- 4) accepted for enrollment by one of Simon Fraser University's Japanese exchange partners.

Awards will be made on the basis of academic performance. The awards will be made by the Senate Undergraduate Adjudication Committee on the nomination of the director, SFU International.

#### **Muslim Students' Association Award**

Program code: UPAO-183

Value: \$300

Awarded: fall

Terms of reference: One award will be available annually in the fall term. The award is granted to an undergraduate student in good academic standing from any faculty. The successful applicant will be involved in the Muslim Students' Association for two terms promoting better understanding and open dialogue between Muslims and the campus community at large. The applicant should submit a letter detailing his/her volunteer activities and a brief synopsis of how this activity helped to promote Islamic awareness.

#### **C.D. Nelson Memorial Prize**

Program code: UEAO-019

Value: \$500

Awarded: summer

Terms of reference: The C.D. Nelson Memorial Prize was established at Simon Fraser University in 1975 in memory of Professor C.D. Nelson, first head of the Department of Biological Sciences, who gave so fully of himself to the whole University community. One C.D. Nelson Memorial Prize, valued at approximately \$500 for the purchase of a work of art, will be

awarded annually. The prize will be granted to a current or retired faculty or staff member, or to a current student who has made an outstanding contribution to Simon Fraser University other than normal or academic work. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th. Note, will be offered every other year given insufficient interest on an annual basis.

#### **Dr. M. Sheila O'Connell Prize for Children's Literature**

Program code: UEAO-534

Value: \$1500

Awarded: summer

Terms of reference: To an undergraduate student who has completed work in the general subject area of children's literature, fiction or criticism, or is working toward publication of a piece of children's literature. A proposal outlining the story should be forwarded by candidates to the cross-disciplinary committee from the Faculty of Education, the Department of English and the School of Communication. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the recommendation of the joint committee.

#### **Eileen Purkiss Memorial Endowment Award**

Program code: UEAO-023

Value: \$100

Awarded: summer

Terms of reference: The award will be available to graduate and undergraduate international students. In adjudicating the award, consideration will be given to the special contributions made by the student to the social and cultural exchange and development of international students at Simon Fraser University with specific reference to volunteer service, promotion of goodwill, and the organization of social, cultural and related events. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th, with appropriate letters of reference. The endowment fund is established in memory of Eileen Purkiss.

#### **Recreation Leadership Awards**

Program code: UUAO-101

Value: \$600

Awarded: fall, spring

Terms of reference: The purpose of these awards is to recognize and encourage students' contribution in, and development of, leadership initiatives in the University recreation programs. Up to 32 awards of \$600 each are available to: entering students on the basis of recommendations from secondary school of demonstrated leadership in the school program, and to continuing students who have demonstrated consistent leadership skills and potential for further development. Students must be nominated by the director of Recreational Services and Athletics, maintain a cumulative 2.00 grade point average and enrol in nine units. Nomination will be made by the director of Recreational Services and Athletics to the Senate Undergraduate Awards Adjudication Committee.

#### **Recreation Promotion Award**

Program code: UUAO-110

Value: \$500

Awarded: fall, spring

Terms of reference: The awards recognize and encourage gifted physically active university students who contribute to the promotion of a university culture of physical activity. The award is available to entering and continuing full-time undergraduate students in good academic standing (maintain a minimum CGPA of 2.00) who have demonstrated a personal physical activity commitment and promoted physical activity on-campus. Student must be nominated by the director of Recreational Services and Athletics. The awards will be granted by the Senate Undergraduate Awards Adjudication Committee.

#### **Louise Berthe Samson Undergraduate Award**

Program code: UEAO-060

Value: \$450

Awarded: summer

Terms of reference: To a third or fourth year undergraduate student who is doing volunteer work or a work project related to the applicant's field of study in a recognized charitable or community organization. The successful applicant may be in any faculty and should have a cumulative GPA of at least 3.0. The application should include a letter outlining the applicant's chosen course of studies, a resume, an explanation of the volunteer or work project activity, and its impact on the applicant. There can be no more than a one-term gap between the volunteer or work project activity and the awarding of the Samson Award. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **Simon Fraser University Seniors Lifelong Learners Society Community Service Award**

Program code: UEAO-547

Value: \$1000

Awarded: summer

Terms of reference: Granted on the basis of good academic performance and leadership and/or service at Simon Fraser University to a student in any faculty. The student's leadership or service may be to the university community or by representing the university to the community at large. Applications packages must include a resume outlining the candidate's leadership activities and volunteer service as well as letter(s) of recommendation confirming these activities. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **Simon Fraser University Co-operative Education Merit Award**

Program code: UPAO-198

Value: \$500

Awarded: fall, spring, summer

Terms of reference: The award will be to a full-time undergraduate student who has demonstrated outstanding performance on a co-operative education work placement focusing on business projects in any of the last three terms. The award will be given upon the successful completion and return from the work placement. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, Work Integrated Learning.

#### **SFU-India Student Mobility Awards**

Program code: UPAO-209

Awarded: fall, spring, summer

Terms of reference: Awarded to Simon Fraser University students in any faculty undertaking study or experiential learning in India with one of Simon Fraser University's India exchange partners, field schools, projects or co-op partners. Eligibility criteria are as follows.

- 1) awards will be available each term to students in good academic standing from any faculty,
- 2) students must be accepted and approved for a Simon Fraser University experiential learning opportunity in India such as an international exchange, field school program, co-operative education work term, volunteer or service learning assignment,
- 3) awards values will be up to \$4000 based on academic performance and their prior engagement in internationalization activities (e.g. volunteer activities, mentorships, community activities),
- 4) award eligibility consideration will include but not necessarily be limited to, the following criteria: geographical location within India, salary, stipends, honorariums and placement costs (e.g. work permits, association fees like AIESEC, immunization, travel, etc.)

The award will be made by the Senate Undergraduate Awards Adjudication Committee on

the nomination of the director, SFU International and director, Simon Fraser University's Work Integrated Learning.

#### **Gordon M. Shrum Gold Medal**

Program code: UPAO-002

Value: \$500

Awarded: summer

Terms of reference: An award of a gold medal and \$500 is to be awarded in May of each year to an outstanding student in any faculty who has completed the requirements for the bachelor's degree during the preceding summer, fall or spring term. The award shall be made to the student who has maintained a high scholastic standing during not fewer than six terms or the equivalent of 60 units or more at Simon Fraser University and who, by participating in extracurricular activities, has shown outstanding qualities of character and unselfish devotion to Simon Fraser University. The award shall be made upon the recommendation of the Awards Committee after consultation with members of the faculty and representatives of the student body.

#### **Simon Fraser University Pipe Band Memorial Award**

Program code: UEAO-043

Value: \$2300

Awarded: fall

Terms of reference: To a Simon Fraser University student playing with the University pipe band who has particular promise in piping or drumming and who has maintained a satisfactory academic record. Recommendation is required from the Simon Fraser University Pipe Band major.

#### **Simon Fraser University Piping Award**

Program code: UUAO-006

Value: \$800

Awarded: fall, spring, summer

Terms of reference: Thirteen awards are available to Simon Fraser University students who are members of the Simon Fraser University Pipe Band. The awards are awarded to full-time students in good academic standing in recognition of significant contribution to the University and community through their participation with the Simon Fraser University Pipe Band. The awards will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director of ceremonies.

#### **Ted Sinnott Memorial Award**

Program code: UEAO-027

Value: \$450

Awarded: summer

Terms of reference: To a student who has made a contribution of a voluntary nature to the University community, thereby reflecting positively the cheer and goodwill which the late Ted Sinnott generated at Simon Fraser University for so many years. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **William A. (Bill) Stewart Volunteer Leadership Award**

Program code: UEAO-049

Value: \$850

Awarded: summer

Terms of reference: To graduate or undergraduate students in any faculty whose volunteer activities have made a significant contribution to the development and/or improvement of campus community life. The application should include a letter from the student outlining his/her volunteer activities and the impact those activities have had on campus life. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **Dr. Abe Unrau Memorial Co-op Prize**

Program code: UEAO-039

Value: \$400

Awarded: summer

Terms of reference: The prize is granted to an outstanding co-op student in any faculty at the time of graduation on the basis of cumulative grade point average, written evaluations from work term employers and demonstrated leadership. Successful candidates must have completed a minimum of four work terms. A student from the School of Engineering Science co-op program may also be considered if he/she has successfully completed three work terms and a research term (the undergraduate thesis project) producing an undergraduate thesis. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, Work Integrated Learning.

#### **Joan H. Walter Memorial Award**

Program code: UEAO-030

Value: \$90

Awarded: fall

Terms of reference: This award will be awarded biennially to a student who has been employed in the tour guide service. Special consideration will be given to the student's willingness to serve and personal commitment to the University community, and to the degree to which Simon Fraser University has been promoted with enthusiasm and accurate information. A nomination from the director of student recruitment is required.

#### **Roger G. Welch Alumni Prize**

Program code: UEAO-172

Value: \$900

Awarded: summer

Terms of reference: To an alumnus/alumni of Simon Fraser University pursuing a degree program or a post baccalaureate diploma. The prize will honor or recognize students who have demonstrated leadership, citizenship and dedication in service to the University community. Participation in the wider community will also be considered. The granting of the prize will be based on evidence submitted by the applicant or by another person, group or association. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **Ben West Student Exchange Annual Award**

Program code: UPAO-203

Value: \$1000

Awarded: summer

Terms of reference: To a student in good academic standing in his or her third or fourth year of study in any undergraduate program, enrolled to participate in a term exchange. The award will be granted on the basis of outstanding community service. Where possible preference will be given to students enrolled in the Faculty of Business Administration pursuing an exchange in Asia.

#### **Westcoast Coalition for Human Dignity Community Service Award**

Program code: UEAO-201

Value: \$300

Awarded: summer

Terms of reference: The award is offered to students in any faculty based on demonstrated commitment to and leadership in opposing bigotry and advancing human rights through their work in schools, community or non-governmental organizations that work to eliminate racism, sexism, xenophobia, and/or homophobia, or that work to provide services to victims of such. To be considered eligible, candidates must demonstrate their involvement in unpaid volunteer activities by providing their resume and cover letter describing their volunteerism, the length of service and time-commitment dedicated to such interests and including a letter of reference from a supervisor of the candidate's volunteer work. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

### **Awards for Applied Sciences Students**

#### **Mark and Nancy Brooks Computing Science Innovation Award**

Program code: UEAO-052

Value: \$750

Awarded: fall

Terms of reference: Granted to a computing science student in good academic standing who demonstrates exceptional accomplishment, promise or innovation in the area of computing science outside classroom work. The application should include a description of the interest or innovative ideas that student is considering. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School of Computing Science.

#### **Computing Science Graduation Award**

Program code: UEAO-529

Value: \$500

Awarded: summer

Terms of reference: To the top graduating student in computing science. If there are two students who qualify, the award will be given to the student who has demonstrated service to the computing science undergraduate student body or to the University. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director of the School of Computing Science.

#### **Computing Science Student Society Award**

Program code: UEAO-042

Value: \$2000

Awarded: fall, spring

Terms of reference: To undergraduate students in computing science, who, if declared majors, meet the GPA requirements to stay in the school or, if not a declared major, meets the school's GPA requirements to declare. Candidates need not have completed all the courses required to declare a major in computing science. Applicants must demonstrate service to the University community, in particular to the undergraduate Computing Science Student Society and/or the computing science undergraduate student body. Financial need may be taken into account if more than one student qualifies for the award. Applications for the award should be submitted to the director of the School of Computing Science and will include a letter discussing University community involvement or involvement with the society. Recommendations from any member may be submitted to the director. The awards will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director of the School of Computing Science in consultation with the undergraduate computing science student society. Applications for the award should be submitted to the director of the School of Computing Science by January 2 (spring award) or by September 1 (fall award).

#### **Engineering Science Undergraduate Student Project Award**

Program code: UEAO-535

Value: \$100

Awarded: fall, spring, summer

Terms of reference: Given annually for projects proposed by Simon Fraser University engineering science undergraduate students. The project proposals submitted for consideration should contain a description of the project, category as noted below, the benefits to engineering science students, the University or to industry, an implementation schedule including a deadline and a contact student who is enrolled, and a complete cost breakdown. The project can fall into one of four categories that will be ranked according to the rating criteria (first criteria being the highest).

**Category A - Competition**

- projects that will be entered to compete in competition
- rating criteria: within the scope of Simon Fraser University engineering science, ambitious, team oriented, scientific merit
- awards will include travel costs associated with competition participation

**Category B - Entrepreneurial**

- projects that expect to produce a workable prototype. A brief business plan should be included in the project proposal

- rating criteria: pragmatic, cost effective, visionary

**Category C - Class**

- projects that originated from an engineering science class or a special projects laboratory

- rating criteria: originality, usability, team oriented

**Category D - Miscellaneous**

- travel and projects not covered under Category A through C and/or purchase of lab equipment and/or teaching aids

The award(s) will be granted by the Senate Undergraduate Awards Adjudication Committee on the nominations of the funding council and the director of the School of Engineering Science.

**Engineering Undergraduate Student Society Award**

Program code: UEAO-512

Value: \$500

Awarded: fall, spring

Terms of reference: To an undergraduate students in engineering science who have demonstrated service to the engineering science undergraduate student body. Students must be in good academic standing to apply for the award. Preference will be given to those students who have not previously received the award. Applications for the award should be made to the director of the School of Engineering Science. The application should include a letter from the student or the EUSS discussing the student's involvement in and service to the engineering science student body. In addition, any member of the engineering science undergraduate student body may nominate a recipient to the director of the School of Engineering Science. The director will consult with the EUSS prior to making the recommendation. The award will be made by the Senate Undergraduate Award Adjudication Committee on the nomination of the director of School of Engineering Science.

**G&F Financial Group Annual Awards**

Program code: UPAO-207

Value: \$1000

Awarded: summer

Terms of reference: Granted to undergraduate students in good academic standing who are enrolled at any Simon Fraser University campus in either the Faculty of Business Administration, Faculty of Arts and Social Sciences, or Faculty of Applied Sciences. Awards will be granted on the basis of demonstrated service to the Simon Fraser University community or the community at large. Preference will be given to active members or immediate family of an active member of G&F Financial Group.

**Ken Spencer SFU Business/Engineering Venture Plan Competition**

Program code: UPAO-191

Value: \$100

Awarded: fall

Terms of reference: The Ken Spencer SFU Business/Engineering Venture Plan is organized as part of undergraduate courses offered in both the Faculty of Business Administration (BUS 477), and the Faculty of Applied Sciences (ENSC 201). To ensure that the venture plan includes technical and business aspects, teams must consist of at least one undergraduate student from each of the applied sciences (engineering) and business administration faculties. A management of technology MBA student

with an engineering degree will be selected to assist the course instructors by providing mentorship to the competitors. This mentor will provide technical expertise and guide students as they hone venture plans and polish presentation skills. As part of the courses BUS 477 and ENSC 201, teams of students for both courses (with a minimum of one business student and one engineering student per team) will prepare a business plan to be graded jointly by the two course instructors. Typically, the business plan will comprise 35% of the course grade. At the end of the term in which the courses are offered, the two course instructors will identify the top six business plans to be entered into the jury-adjudicated Ken Spencer Venture Plan competition. Written and oral presentations will be made to the jury who will rank their recommended first, second and third place teams. Once the Venture Plan competition jury has determined their recommendations, the chair of the Venture Plan competition jury will present and discuss the selected winners with the deans of applied sciences and business administration who will forward their nominations to the Senate Undergraduate Awards Adjudication Committee. Of the finalists, three teams will receive prizes: a first prize of \$3000, a second prize of \$1500 and a third prize of \$500. Prize values may change in succeeding years. Winners will be announced at an annual function attended by faculty, students and competition sponsors.

**Triple A Award in Mechatronics**

Program code: UPSO-312

Value: \$1000

Awarded: fall

Terms of reference: Granted annually to an undergraduate student in the Faculty of Applied Sciences at SFU Surrey. The award will go to a student who is in good academic standing with demonstrated leadership skills and/or service to the community. Applications must include a resume outlining the candidate's leadership activities and volunteer service as well as letter(s) of recommendation confirming these activities. Preference will be given to a student enrolled in the Mechatronics program at SFU Surrey. If no suitable candidate is identified, the award may be disbursed to any student in the Faculty of Applied Sciences at SFU Surrey who is in good academic standing with demonstrated leadership skills and/or service to the community.

**VTech Graduation Prize in Engineering Science**

Program code: UEAO-544

Value: \$1000

Awarded: summer

Terms of reference: An annual prize will be awarded to the top engineering science undergraduate student from each calendar year's graduating class who successfully completes their degree with the highest CGPA. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of School of Engineering Science.

**Awards for Arts and Social Sciences Students****Archaeometry Prize**

Program code: UEAO-003

Value: \$280

Awarded: summer

Terms of reference: To an undergraduate or graduate student who has shown exceptional scholarship and an interest in the application of physical science to archaeology. This prize will be awarded by the Senate Undergraduate Awards Adjudication Committee on the nomination of the faculty members involved in archaeometry.

**Jane Austen Society Prize**

Program code: UPAO-132

Value: \$120

Awarded: summer

Terms of reference: To a student for the best essay by an upper level undergraduate student on the subject of Jane Austen, her life, works, or closely related social history. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the recommendation by the Department of English. Applications and/or nominations are to be forwarded to the Dean of Graduate Studies office for adjudication.

**G.A.B.C. Chuck Bayley Memorial Award**

Program code: UEAO-519

Value: \$940

Awarded: fall

Terms of reference: To graduate or undergraduate students, full or part-time, who have, through volunteer or paid work experience, demonstrated an aptitude for, and interest in, the field of gerontology. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the gerontology alumni chapter.

**B.C. Federation of Labour Award**

Program code: UPAO-190

Value: \$500

Awarded: fall

Terms of reference: The award will be given to an undergraduate student with an approved minor in labour studies, on the basis of satisfactory academic performance and involvement in volunteer activities. Candidates should demonstrate their involvement in volunteer activities by providing their resume and cover letter specific to these interests. A representative of the BC Federation of Labour will be invited to meet each award winner. This award is granted by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director of the Centre for Labour Studies.

**Robert C. Brown Award**

Program code: UEAO-195

Value: \$2000

Awarded: summer

Terms of reference: To a student in the Faculty of Arts and Social Sciences who has completed a minimum of 60 units at Simon Fraser University. The recipient will have demonstrated a combination of outstanding academic achievement and outstanding performance or leadership in another endeavor at Simon Fraser University. This may be in athletics, in service to the University, or in representing the University to the community at large. The nominations should include the nominee's résumé and a letter of recommendation from a faculty member in the Faculty of Arts and Social Sciences. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Faculty of Arts and Social Sciences. Nominations should be forwarded to Financial Aid and Awards office by April 15th.

**Bureau du Quebec Book Prizes in Quebec Studies**

Program code: UPAO-177

Awarded: summer

Terms of reference: To one top ranking undergraduate student and one top ranking graduate student in the Department of French having a concentration in Quebec studies within the department's French-Canadian course offerings, including Quebec literature and/or linguistics. The awards will be made by the Senate Undergraduate Awards Adjudication Committee and the senate graduate awards adjudication committee on the recommendation of the chair, Department of French. The Department of French reserves the right to withhold one or both prizes in any given year.

**The Chan Sisters Foundation Non-Profit Co-op Employment Grant**

Program code: N/A

Awarded: fall, spring, summer

Terms of reference: The grant will subsidize co-op students in the Faculty of Arts and Social Sciences whose next co-op work terms will be in not-for-profit organizations. The Chan Sisters Foundation Non-Profit Co-op Employment Grant will be administered by the director, Work Integrated Learning.

**John Chant Award**

Program code: UEAO-541

Value: \$750

Awarded: summer

Terms of reference: To a student in economics graduating with the highest CGPA. The award will be made by the Senate Undergraduate Awards Adjudication Committee upon a nomination from the chair of the Department of Economics.

**William L. Cleveland Essay Prize in African Middle-Eastern Asian History**

Program code: UEAO-053

Value: \$500

Awarded: summer

Terms of reference: To the author of a superior undergraduate term report or essay on any topic concerning African, Middle-Eastern or Asian history. Special consideration will be given for originality in analysis and treatment of the area. Essays are to be submitted to the Department of History by April 15, and must have been written in one of the three previous terms.

**Consulat General de France in Vancouver Book Prizes in French Studies**

Program code: UPAO-193

Awarded: summer

Terms of reference: The Consulat General de France in Vancouver provides annual book prizes to graduate and undergraduate students in the Department of French based on academic performance. Awards will be made in each of three categories: a graduate student, a graduating undergraduate student and an undergraduate student who has completed at least two terms of French studies. The awards will be made by the Senate Undergraduate Awards Adjudication Committee on the recommendation of the chair, Department of French.

**Criminology Award in Diversity & Public Safety**

Program code: UPAO-194

Value: \$750

Awarded: summer

Terms of reference: An award will be made available to an undergraduate student in criminology, studying the interaction between visible minorities and traditional Canadian crime prevention programs and law enforcement. The award will be granted by the Senate Undergraduate Awards Adjudication Committee, on the nomination of the director of the School of Criminology.

**Criminology Student Association Community Service Award**

Program code: UPAO-208

Value: \$500

Awarded: fall

Terms of reference: Granted to a student in good academic standing with a declared major in criminology. The recipient will have demonstrated outstanding community involvement at Simon Fraser University in the field of criminology, including involvement within the Criminology Student Association. Volunteer service within the field of criminology over the past two years is the primary criterion. Involvement within the CSA will be given priority/preference. Please submit with your volunteer resume, one letter of reference from a volunteer

supervisor, as well as a 250 word paragraph explaining what you feel your largest volunteer contribution has been.

**Paul Delany Graduation Award in English**

Program code: UEAO-058

Value: \$500

Awarded: summer

Terms of reference: Awarded annually to the student graduating with the highest CGPA upon completion of an English major. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Department of English.

**Al Eisenring Gerontology Award**

Program code: UEAO-041

Value: \$1000

Awarded: fall

Terms of reference: To an undergraduate mature student whose area of study is gerontology. A departmental nomination is required from the chair of gerontology.

**European History Book Prize**

Program code: UEAO-174

Value: \$200

Awarded: summer

Terms of reference: The author of a superior undergraduate term report or essay on any topic concerning European history. Special consideration will be given for originality in analysis and treatment of the area. Essays are to be submitted to the Department of History by April 15th and must have been written in one of the three previous terms. The Department of History awards committee will make a nomination to the Senate Undergraduate Awards Adjudication Committee. The history department will undertake to publicize and adjudicate the essay competition.

**French Cohort Program Exchange Awards**

Program code: UEAO-549

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Available to full-time third year undergraduate students in the French Cohort Program, in good academic standing, who have been accepted to participate in a formal exchange program at a francophone university. The award will be made by the Senate Undergraduate Awards Adjudication Committee, on the recommendation of the Office of Francophone and Francophile Affairs.

**French Cohort Program Language Training Award**

Program code: UUAO-202

Value: \$2300

Awarded: summer

Terms of reference: Awarded to student(s) enrolled in the French Cohort Program at Simon Fraser University to cover the costs associated with attending a French summer language program, of at least four weeks' duration, within an accredited Francophone university or college. Application must be made by letter to the associate director, FASS, Office of Francophone and Francophile Affairs, and must include confirmation of acceptance in a French summer language program within an accredited Francophone university or college, a statement describing the relevance of the language program to the student's academic program at Simon Fraser University and two letters of reference from Simon Fraser University faculty. Consideration will be given to the applicants' GPA, the importance of the language training to the student's program of study, and the letters of reference. Application deadline is March 15th. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the associate director, FASS, Office of Francophone and Francophile Affairs.

**G&F Financial Group Annual Awards**

Program code: UPAO-207

Value: \$1000

Awarded: summer

Terms of reference: Granted to undergraduate students in good academic standing who are enrolled at any Simon Fraser University campus in either the Faculty of Business Administration, Faculty of Arts and Social Sciences, or Faculty of Applied Sciences. Awards will be granted on the basis of demonstrated service to the Simon Fraser University community or the community at large. Preference will be given to active members or immediate family of an active member of G&F Financial Group.

**Institute for the Humanities Travel-Study Award**

Program code: UPAO-200

Value: \$1500

Awarded: spring, summer

Terms of reference: Awarded to a third or fourth year student(s) who have completed two humanities courses. Application must be made by March 15th by letter to the director, Institute for the Humanities, and must include a resume, a copy of university transcript, a statement describing the relevance of the program/field school to the student's academic program and goal and two letters of reference from Simon Fraser University faculty. Consideration will be given to the applicants' GPA, the importance of the field school to the student's program of study, and the letters of reference. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, Institute for the Humanities.

**Jack Knetsch Award**

Program code: ueao-542

Value: \$750

Awarded: summer

Terms of reference: To the student with the best essay in the economics honors thesis course. The award will be made by the Senate Undergraduate Awards Adjudication Committee upon a nomination from the chair of the Department of Economics.

**Nick Kravariotis Memorial Scholarship in Hellenic Studies**

Program code: UEAO-200

Value: \$500

Awarded: summer

Terms of reference: Granted to a student with the highest GPA in intermediate modern Greek language. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, Hellenic studies.

**Betty Lambert Memorial Prize**

Program code: UEAO-014

Value: \$300

Awarded: summer

Terms of reference: To an undergraduate student enrolled in at least nine units. The prize will be based upon the best unpublished play submitted. Students must apply to the Department of English by February 15th. The endowment fund is established in memory of Betty Lambert.

**Evelyn Lett Award in Women's Studies University Women's Club of Vancouver**

Program code: UPAO-196

Value: \$1300

Awarded: fall, spring, summer

Terms of reference: The award is available to a student who is enrolled in a women's studies major or joint major, women's studies minor, women's studies extended minor or gender studies minor. Preference will be given to those students who have contributed to the Department of Women's Studies and/or to women's issues on campus or in the community. Students should document their community service in a letter and resume along with their application

package. The award is granted by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair, women's studies.

#### **Cliff Lloyd Memorial Award**

Program code: UEAO-016

Value: \$1500

Awarded: summer

Terms of reference: To an honors student in economics graduating with the highest CGPA. The awards will be made by the Senate Undergraduate Awards Adjudication Committee upon a nomination from the chair of economics.

#### **Stephen McIntyre Book Prize in History**

Program code: UPAO-018

Value: \$400

Awarded: summer

Terms of reference: To the top graduating student in history in recognition of academic excellence on the nomination of the department of history awards committee.

#### **Richard Morgan Memorial Book Prize**

Program code: UEAO-038

Value: \$300

Awarded: summer

Terms of reference: To an undergraduate student who submits a superior term report or essay on any topic concerning Canadian Native history. Special consideration will be given for originality in analysis and treatment of the area. Essays are to be submitted to the history department by April 15, and must have been written in one of the three previous terms. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Department of History awards committee.

#### **Ingrid Nystrom Archaeology Award**

Program code: UEAO-180

Value: \$1800

Awarded: spring

Terms of reference: To an undergraduate student majoring in archaeology to further studies in archaeology or physical anthropology. Please consult the Department of Archaeology for further details and application procedures by November 1st.

#### **Margaret Ormsby History Prize**

Program code: UEAO-521

Value: \$275

Awarded: summer

Terms of reference: For the best essay written by an undergraduate upper level student enrolled in a Canadian history course at Simon Fraser University. Special consideration will be given for originality in analysis and treatment of the subject. Essays are to be submitted to the Department of History by April 15th, and must have been written in one of the three previous terms. The prize will be granted by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair of the Department of History.

#### **Rosslyn and Mary Penney Community Service Award**

Program code: UEAO-548

Value: \$1000

Awarded: summer

Terms of reference: Granted annually on the basis of good academic standing and leadership and/or service at Simon Fraser University to an undergraduate student in the Faculty of Arts and Social Sciences in his/her second, third or fourth year of study. Preference will be given to students with disabilities who experience issues accessing the physical environment. Applications packages must include a resume outlining the candidate's leadership activities and volunteer service as well as letter(s) of recommendation confirming these activities. Nominations or applications should be forwarded to Financial Aid and Awards by April 15th.

#### **Philippa Polson Memorial Prize in English**

Program code: UEAO-059

Value: \$300

Awarded: summer

Terms of reference: To a student for the best English honors essay completed during the previous three terms. Graduated students, part-time students, as well as those still completing a degree, are eligible. The selection committee, composed of the Department of English undergraduate committee, will consider all essays completed during the year. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair, Department of English.

#### **Psychology Alumni Honors Prize**

Program code: UEAO-037

Value: \$500

Awarded: summer

Terms of reference: To a student enrolled in psychology 490/499. The award will be based on the quality of research conducted for the honors project. The recipient will be expected to give a talk on his/her research at the Department of Psychology's annual convention. Both graduates and undergraduates are eligible. Awards will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair of the Department of Psychology.

#### **Rama Reddy Political Science Award**

Program code: UEAO-527

Value: \$400

Awarded: summer

Terms of reference: To the top graduating student in political science. The awards will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair of the Department of Political Science.

#### **Simon Fraser University Gold Medal and Prize In History**

Program code: UPAO-026

Awarded: summer

Terms of reference: The Department of History wishes to recognize and encourage academic excellence with the award of a medal to the best history student in each graduating year. The award will be based on the best grade point average for upper level work. The prize will be granted by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair of the Department of History.

#### **Simons Student Citizenship Program and Awards**

Program code: UPAO-202

Value: \$1000

Awarded: spring

Terms of reference: Each year (2006-2008), eight students will be selected for participation in the program and be provided with a \$1000 stipend to prepare and deliver a piece of work suitable for publication or performance at a special conference to be organized that year. Paper topics should focus on one or more of the themes of the Institute for the Humanities Imagining Citizenship Project: environment, culture, social justice, religion, the university, modernity. The program is open to all Simon Fraser University graduate and upper level undergraduate students. Students should submit a letter of application together with a one-page abstract summarizing the proposed topic and approach, a resume, a sample of written work (no more than six pages) and a transcript to the Institute for the Humanities by March 31 each year. Successful applicants will be notified by April 30. Awards will be made by the Senate Undergraduate Adjudication Committee based on the nomination of the subcommittee of the Institute for the Humanities' steering committee.

#### **Robert L Stanfield Book Prize**

Program code: UEAO-028

Value: \$100

Awarded: summer

Terms of reference: To outstanding graduating students in political science. Awards will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair of the Department of Political Science.

#### **Prize of the Ambassador of Switzerland in Canada**

Program code: UPAO-022

Awarded: summer

Terms of reference: To students in their final year with the highest grades in German and French languages on recommendation by the departments.

#### **Winnie Topping Memorial Prize**

Program code: UEAO-032

Value: \$190

Awarded: summer

Terms of reference: To a female student in honors anthropology or sociology who shows the greatest promise of becoming both a scholar and a humanitarian. Applicants must submit a letter of nomination from a faculty member of the Department of Sociology and Anthropology.

#### **Brian Williamson Memorial Award in Archaeology**

Program code: UEAO-515

Value: \$1250

Awarded: spring

Terms of reference: To a student who has declared a major in archaeology, is enrolled in a minimum of 9 units (not necessarily in archaeology) when application is made, and intends to use the award to help defray travel costs to participate in field research in archaeology or physical anthropology. The award will be based on use of the award, academic achievements, and relevance of travel to the applicant's academic career. Applications should be sent in writing to the chair, Department of Archaeology. The application should include evidence that the student is an archaeology major in good academic standing, a copy of the most recent transcript, a statement describing how the award will be used, and any other relevant information that will aid the committees in their decision. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Department of Archaeology undergraduate awards committee.

#### **Awards for Business Administration Students**

##### **Peter R.B. Armstrong/Rocky Mountaineer Award for Entrepreneurship**

Program code: UEAO-051

Value: \$4000

Awarded: fall

Terms of reference: Granted to third or fourth year students in the Faculty of Business Administration who have evidenced or achieved some level of entrepreneurial activities. Applications should include a letter discussing the student's interest and involvement in entrepreneurial activities.

##### **Ryan Beedie Annual Community Service Award in Business**

Program code: UPAO-212

Value: \$5000

Awarded: summer

Terms of reference: Awarded on the basis of good academic performance and leadership and or service at Simon Fraser University to a student enrolled in the Faculty of Business Administration. The student's leadership or service may be to the University community or by representing the University to the community at large. Applications packages must

include a resume outlining the candidate's leadership activities and volunteer service as well as letter(s) of recommendation confirming these activities. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of Faculty of Business Administration.

#### **Samuel Belzberg Award of Excellence in Finance**

Program code: UEAO-035

Value: \$500

Awarded: summer

Terms of reference: To an outstanding graduating student in finance who has also made an important voluntary contribution to the University community or who has otherwise demonstrated leadership and management capability. The award is supported by The Diamond Fund in Business. A departmental nomination is required.

#### **Business Administration Students Endowment Fund Prizes**

Program code: UEAO-006

Value: \$100

Awarded: summer

Terms of reference: To the two finalists in the dean's medal competition. Students will be chosen by the dean of business administration.

#### **Dean's Student Service Award**

Program code: UUAO-200

Awarded: spring

Terms of reference: In 1995, the dean of the Faculty of Business Administration established the Dean's Student Service Award. The purpose of the award is to recognize outstanding service in the university community by an undergraduate student in the Faculty of Administration. The Dean's Student Service Award will be awarded annually in the spring term to recognize service in the preceding calendar year. The award, an engraved plaque and a gift, will be granted to a student, approved in a business program, who has been nominated by the executive of a Faculty of Business Administration student club as their most valuable member. The student should have a minimum CGPA of 3.0 and must have been active in one of the student clubs in two of the three terms in the preceding year. The award will be made by the Senate Undergraduate Award Adjudication Committee on the nomination of the dean, Faculty of Business Administration.

#### **Ernst & Young Chartered Accountants Accounting Award**

Program code: UPAO-197

Value: \$2000

Awarded: fall

Terms of reference: To a third or fourth year student in business administration with an approved accounting concentration who is in good academic standing. The award will be made on the basis of involvement in volunteer and leadership activities. Applicants must supply documentation to demonstrate their involvements.

#### **G&F Financial Group Annual Awards**

Program code: UPAO-207

Value: \$1000

Awarded: summer

Terms of reference: Granted to undergraduate students in good academic standing who are enrolled at any Simon Fraser University campus in either the Faculty of Business Administration, Faculty of Arts and Social Sciences, or Faculty of Applied Sciences. Awards will be granted on the basis of demonstrated service to the Simon Fraser University community or the community at large. Preference will be given to active members or immediate family of an active member of G&F Financial Group.

#### **Barry Macdonald Award in Business Administration**

Program code: UEAO-525

Value: \$2000

Awarded: summer

Terms of reference: Awarded annually to students who: demonstrate outstanding academic achievement while enrolled in the Faculty of Business Administration; are registered in a term exchange, co-op work placement, field school or dual degree program, and; demonstrate exceptional community service. Where possible, preference will be given to students enrolled in an exchange, co-op work placement, field school or dual degree program in Asia. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination from the Faculty of Business Administration.

#### **William K. McCourt and TEC Canada Awards in Business**

Program code: UEAO-543

Value: \$850

Awarded: spring

Terms of reference: To students who have demonstrated a serious interest in the business issues at the undergraduate level. Financial need may be taken into consideration. By the end of September each year, the undergraduate program in the Faculty of Business Administration will identify the business issue for the essay. The essay can be a maximum of 10 pages, double spaced. The application and essay must be received by the executive director of the undergraduate program by January 31 of the subsequent term. Awards will be disbursed annually in the spring term. The award will be made by the Senate Undergraduate Awards Adjudication Committee based upon nomination from the dean, Faculty of Business Administration.

#### **SFU Accounting Student Association Award**

Program code: UPAO-181

Value: \$300

Awarded: spring

Terms of reference: To a third or fourth year student in the Faculty of Business Administration with a concentration in accounting. The award is based on academic performance and extra-curricular involvement. The successful applicant should have a minimum CGPA of 3.0. Extra-curricular interests can include active memberships in clubs, volunteer experiences, sports activities and community involvement. Candidates should demonstrate their involvement in these activities by providing their resume and cover letter specific to these interests.

#### **Ken Spencer SFU Business/Engineering Venture Plan Competition**

Program code: UPAO-191

Value: \$100

Awarded: fall

Terms of reference: The Ken Spencer SFU Business/Engineering Venture Plan is organized as part of undergraduate courses offered in both the Faculty of Business Administration (BUS 477), and the Faculty of Applied Sciences (ENSC 201). To ensure that the venture plan includes technical and business aspects, teams must consist of at least one undergraduate student from each of the applied sciences (engineering) and business administration faculties. A management of technology MBA student with an engineering degree will be selected to assist the course instructors by providing mentorship to the competitors. This mentor will provide technical expertise and guide students as they hone venture plans and polish presentation skills. As part of the courses BUS 477 and ENSC 201, teams of students for both courses (with a minimum of one business student and one engineering student per team) will prepare a business plan to be graded jointly by the two course instructors. Typically, the business plan will comprise 35% of the course grade. At the end of the term in which the courses are offered, the two course instructors will identify the top six business

plans to be entered into the jury-adjudicated Ken Spencer Venture Plan competition. Written and oral presentations will be made to the jury who will rank their recommended first, second and third place teams. Once the Venture Plan competition jury has determined their recommendations, the chair of the Venture Plan competition jury will present and discuss the selected winners with the deans of applied sciences and business administration who will forward their nominations to the Senate Undergraduate Awards Adjudication Committee. Of the finalists, three teams will receive prizes: a first prize of \$3000, a second prize of \$1500 and a third prize of \$500. Prize values may change in succeeding years. Winners will be announced at an annual function attended by faculty, students and competition sponsors.

#### **Awards for Communication, Art and Technology Students**

##### **Noel Archambault Memorial Award in Film**

Program code: UEAO-050

Value: \$1300

Awarded: summer

Terms of reference: Granted to an undergraduate student in the School for the Contemporary Arts, film major program whose fourth year film/video project best invokes Noel Archambault's spirit of independence, innovation and technical ingenuity. The award will be adjudicated on the basis of the proposal for their upcoming fourth year film or video project that the film major students present at the conclusion of their third year in the film program. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School for Contemporary Arts.

##### **Bice Caple Awards**

Program code: UUAO-005

Value: \$1000

Awarded: fall

Terms of reference: To students who have made outstanding contribution to the fine arts at Simon Fraser University during the previous year.

During the tenure of the award each recipient must:

- be an enrolled student at Simon Fraser University
- pursue a course of studies and demonstrate academic competence
- continue to be active in arts at Simon Fraser University

Normally, the award may be held only once, but in no case may an individual receive the award more than twice. Each recipient will be nominated by the director of the School of the Contemporary Arts, the award of \$1,000 will be disbursed in two equal installments, one in the fall term and one in the spring term.

##### **Communication Alumni Endowment Award**

Program code: UEAO-155

Value: \$1200

Awarded: summer

Terms of reference: To a third or fourth year undergraduate student in communication who submits the best essay in the field of communication. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School of Communication.

##### **Simon Fraser University Service Awards (Contemporary Arts)**

Program code: UUAO-000

Value: \$100

Awarded: fall, spring, summer

Terms of reference: To students in the School for Contemporary Arts who have made a significant contribution in their field of study. Candidates must have been enrolled in a minimum of six units (hours with a calculated GPA) with satisfactory academic standing in the qualifying term of contribution.

Graduate students may also be recognized for these awards. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School for Contemporary Arts.

#### **Marcia Scholarship in Electroacoustics**

Program code: UEAO-130

Value: \$300

Awarded: summer

Terms of reference: To a graduate or undergraduate student from any discipline who shows promise and/or excellence in the field of electroacoustics, whether for composition, research, performance or production. A department nomination is required.

#### **Gerald and Sheahan McGavin Award**

Program code: UEAO-056

Value: \$1500

Awarded: summer

Terms of reference: To undergraduate students in the School for the Contemporary Arts based on demonstrated volunteer involvement in community service and academic merit. The application must include a detailed discussion of the student's volunteer involvement in community activities. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School for the Contemporary Arts.

#### **Sean McLeod Memorial Award in Music**

Program code: UPAO-180

Value: \$500

Awarded: fall

Terms of reference: To an undergraduate student in the School for the Contemporary Arts majoring in music. The successful applicant will be a full-time student who achieved a GPA of 2.8 or more in their previous terms of full-time studies at Simon Fraser University. Preference, when possible, will be given to students who have returned to full-time studies subsequent to a substantial interruption of their academic career after secondary school. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School for Contemporary Arts.

#### **Orangecorporation Annual Award in Visual Arts**

Program code: UPAO-206

Value: \$400

Awarded: summer

Terms of reference: To a student in good academic standing in his or her fourth year of study in the visual arts major program. The award will be awarded to a student who demonstrates a high degree of ambition within his/her chosen medium and interests, and who's practice to date exploits the interdisciplinary, self-motivated, and liberal nature of the visual arts program at Simon Fraser University. The award will be granted by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director of the School for the Contemporary Arts.

#### **Helen Pitt Graduating Award in Visual Arts**

Program code: UPAO-189

Value: \$1000

Awarded: summer

Terms of reference: The Helen Pitt Graduating Award in Visual Arts will be awarded in the summer term to a graduating student with an approved major or extended minor in visual arts. The award will be given by the Senate Undergraduate Awards Adjudication Committee on the nomination of the school for the contemporary arts visual arts committee.

#### **Radio Station CHMB AM1320 Award in Communication**

Program code: UEAO-523

Value: \$1600

Awarded: spring

Terms of reference: Available to a student enrolled in the communications honors program to assist with the

cost of completing the honors project. Preference will be given to a multi-lingual student whose honors project addresses issues regarding the diversity of languages and cultures in the Greater Vancouver area with a focus on the role of the mass media, preferably radio. Applications should be submitted to the School of Communication by January 2. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School of Communication.

#### **Rogers Communications Inc. Award in Communication**

Program code: UEAO-120

Value: \$2300

Awarded: spring

Terms of reference: To a student enrolled in the communications honors program to assist with the cost of completing the honors project. Preference will be given to a student whose honors project addresses recent issues in communication (e.g. relating to television or to the production of a video). Applications should be submitted to the School of Communication by January 2. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School of Communication.

#### **F.W. Sullivan Visual Arts Award**

Program code: UEAO-029

Value: \$100

Awarded: summer

Terms of reference: To a student majoring in the Centre for the Arts visual arts program. The award will be based upon a student's contribution to the visual arts and the financial need associated with the public exhibition of his or her work. Nominations will be forwarded from the Centre for the Arts to the Senate Undergraduate Awards Adjudication Committee.

#### **Takao Tanabe Annual Undergraduate Award in Visual Arts**

Program code: UPAO-205

Value: \$2000

Awarded: summer

Terms of reference: To a student in good academic standing going into his or her fourth year of study in the visual arts concentration of the School for the Contemporary Arts. The award will be by departmental nomination for the student who shows the strongest promise in visual arts. The award will be made by the Senate Undergraduate Awards Adjudication Committee based upon the nomination of the director, School for the Contemporary Arts.

#### **Volunteers of the Burnaby Art Gallery Award in Visual Arts**

Program code: UEAO-046

Value: \$750

Awarded: summer

Terms of reference: To the most promising student in third year in the visual arts major program. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the School for the Contemporary Arts departmental awards committee.

#### **Zoe Award in Painting or Sculpture**

Program code: UPAO-192

Value: \$500

Awarded: summer

Terms of reference: To an undergraduate student in the School for the Contemporary Arts, who is in the final year of study for the production of work that uses contemporary painting or sculpture in an innovative and challenging way. Student recipients will be invited to meet Robert Wilson at a luncheon hosted by University Advancement. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School for the Contemporary Arts.

### **Awards for Education Students**

#### **Dr. Maxwell A. Cameron Memorial Medals and Prize**

Program code: UPAO-007

Value: \$250

Awarded: summer

Terms of reference: Granted to students in the Faculty of Education, one to a student in the elementary or middle school stream, and another to a student in the secondary stream. The prizes will be given in the summer term to the outstanding student in each stream based on his/her academic accomplishments and overall performance during the completion of the Professional Development Program practica. The prizes commemorate the distinguished life and work of Dr. Maxwell A. Cameron (1907-1951), first director of the School of Education at the University of British Columbia and author of the Cameron Report on Education. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the dean, Faculty of Education.

#### **Aleta Iberg Annual Memorial Award in the Faculty of Education**

Program code: UPAO-215

Value: \$1000

Awarded: summer

Terms of reference: Established in 2009 in memory of Aleta Iberg and to honour Aleta's passion for teaching and commitment to education. The award will be granted annually from 2009-2011. Preference will be given to a student enrolled in the Professional Development Program who graduated from the Surrey School District #36. This award is intended to provide an opportunity to a student enrolled in the Professional Development Program in the Faculty of Education who possesses some of the qualities that were hallmarks of Aleta Iberg's life: passion for education and teaching, and willingness to learn from her students. The student must be nominated by the Director of Professional Program Development to the Dean of the Faculty of Education. The nomination must be accompanied by a statement, no more than one page in length which addresses the applicant's suitability for the award and exemplifies qualities that were hallmarks of Aleta Iberg's life and personality. The award will be granted by the Senate Undergraduate Awards Adjudication Committee on the recommendation of the Dean of Education.

#### **Claude E. Lewis Award**

Program code: UEAO-015

Awarded: summer

Terms of reference: Granted in the fall or spring term to each of two students who have demonstrated excellence in overall performance during completion of the Professional Development Program in the Faculty of Education. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the dean, Faculty of Education.

#### **Professional Development Program Awards of Excellence**

Program code: UUAO-003

Value: \$500

Awarded: summer

Terms of reference: Awarded in recognition of excellence in overall performance during the Professional Programs practica and course work as well as for demonstrated potential and future professional growth. The awards will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the dean, Faculty of Education.

#### **University Women's Club of Vancouver Laura Tripp Award**

Program code: UEAO-054

Value: \$1000

Awarded: summer

Terms of reference: Awarded to a student who has demonstrated excellence in overall performance during completion of the Professional Development Program. Preference will be given to a student who has completed the program at an external site outside of the Lower Mainland region.

## Awards for Science Students

### Archaeometry Prize

Program code: UEAO-003

Value: \$280

Awarded: summer

Terms of reference: To an undergraduate or graduate student who has shown exceptional scholarship and an interest in the application of physical science to archaeology. This prize will be awarded by the Senate Undergraduate Awards Adjudication Committee on the nomination of the faculty members involved in archaeometry.

### Biological Sciences Merit Award

Program code: UESO-205

Value: \$1450

Awarded: fall

Terms of reference: To a biology major who has the highest academic record at the conclusion of the sixth term of study or the equivalent thereof. A student may receive this award only once during their undergraduate career. Awarded upon nomination of the Department of Biological Sciences.

### Biological Sciences Undergraduate Research Award

Program code: UEAO-061

Value: \$500

Awarded: spring

Terms of reference: The award will be granted based on research work carried out as an undergraduate. Written work, such as an independent study term report, undergraduate research (BISC 498 or 499) report, a published paper, or submitted manuscript is especially valuable in the deliberations for this award, but any evidence of strong research ability will be considered. Generally, the research must have been carried out at Simon Fraser University during the previous two years. Work carried out as part of a larger research effort (e.g. while working in a Simon Fraser University faculty member's group) is eligible. To apply, write a cover letter explaining the research and your role in it, and append a copy of the reports or other material. (These will be returned.) Solicit a letter of reference from the Simon Fraser University faculty member who supervised or was closest to the work. Consideration will be given to the applicant's outstanding research potential, letters of reference and CGPA. A student may receive this award only once during their undergraduate career. Submit application to the biological sciences scholarship committee by January 30. The award will be made by the Senate Undergraduate Awards Adjudication Committee upon the recommendation of the biological sciences department scholarship committee.

### Chemistry Book Award - Dr. E.J. Wells

Program code: UEAO-008

Value: \$80

Awarded: summer

Terms of reference: Awarded to graduating students in chemistry, chemical physics or biochemistry for outstanding graduation grade point average. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Department of Chemistry.

### Dean of Science Award

Program code: UEAO-009

Value: \$240

Awarded: fall

Terms of reference: Awarded on the basis of academic merit to a student in the Faculty of Science,

who has completed a minimum of 90 units in a major or honors degree program. The prize will be based upon the student's cumulative GPA in the previous two terms of full-time study at Simon Fraser University (at least 12 term units in each term) and the nominee will be nominated by the Faculty of Science undergraduate curriculum committee.

### Greater Vancouver Mining Women's Association Award In Earth Sciences

Program code: UPAO-213

Value: \$500

Awarded: fall

Terms of reference: One award is available to a female undergraduate student pursuing an undergraduate degree with an approved major in earth sciences on the basis of good academic standing and extracurricular involvement. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of chair, Department of Earth Sciences.

### Rudi Haering Award in Physics

Program code: UEAO-013

Value: \$600

Awarded: summer

Terms of reference: On the nomination of the Department of Physics to an outstanding physics or chemical physics undergraduate who has completed six terms of study. A book prize may be included as part of the award. Established by members of the Simon Fraser University Department of Physics in honor and recognition of Dr. R.R. Haering, founding department head and professor, 1964-72.

### Management and Systems Science Prize

Program code: UEAO-040

Value: \$450

Awarded: summer

Terms of reference: The Management and Systems Science Graduation Prize is an annual award valued at approximately 20% of the awardable income from the Management and Systems Science Endowment. The award will be given to an outstanding graduating student who has exhibited leadership through entrepreneurial skills, contribution to the program or contribution to the University in general. To be eligible, a student must be completing his/her degree in the preceding fall term, the spring term of the award, or the summer term following the award. Students may be nominated for the award by faculty members in any of the constituent departments of the MSSC program, the executive of MSSC Student Society or co-op co-ordinators placing MSSC students. The Management and Systems Science Prize provides an annual award valued at approximately 80% of the awardable income from the Management and Systems Science Endowment. Prizes are awarded on the basis of academic excellence to two students with an approved MSSC major or honors program and a minimum CGPA of 3.00. Preference should be given to a student who has not previously received the award. The awards will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the Management and Systems Science Program steering committee.

### Department of Mathematics Awards

Program code: UEAO-017

Value: \$50

Awarded: spring

Terms of reference: Awards will be given to full-time students in the Department of Mathematics on the nomination of the chair, Department of Mathematics. The fund provides support to further mathematics undergraduate education at Simon Fraser University and seeks to encourage secondary school students to enter into the study of mathematics.

### National Bank Financial Award in Kinesiology

Program code: UEAO-533

Value: \$2000

Awarded: fall

Terms of reference: Available in the fall to a student interested in developing a career in the health and fitness industry. Student must have an approved major in kinesiology and have completed 90 units of course work with a CGPA of 3.0 and higher. Candidates must already be in possession of CPR, RFA and preferably, an industrial first aid certification. The successful candidate will work under supervision in the Simon Fraser University Vancouver teaching and research kinesiology lab for a minimum of five hours per week in the awarded term. The suitable candidates on completion of one term of supervised study will be offered an opportunity to work independently as a consultant in the lab. Applications for the award will be received by the director, School of Kinesiology in August each year. Selection will be made and announced on the first of September. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, School of Kinesiology.

### Physics Charter Faculty Prize

Program code: UEAO-055

Value: \$500

Awarded: summer

Terms of reference: The prize will be given annually to the top graduating student in any major or honors physics program on the recommendation of the chair of the Department of Physics. The endowment was established in recognition of physics charter faculty: John F. Cochran, Konrad Colbow, Richard H. Enns, Robert F. Frindt, Rudi R. Haering, David J. Huntley, J.C. Irwin, Klaus E. Rieckhoff and K.S. Viswanathan.

### Putnam Awards

Program code: UPAO-024

Value: \$100

Awarded: spring

Terms of reference: Awarded by the Department of Mathematics to Simon Fraser University students listed as top participants in the William Lowell Putnam Mathematical Competition. The winners will be determined according to the official list provided by the organizers of this competition. The ranking and the financial value of the award are as follows.

Rank	Award
P (Putnam fellow)	\$350
N	\$300
H	\$250
I	\$200
II	\$150
Top 500	\$100

### Department of Statistics and Actuarial Science Awards

Program code: UEAO-018

Value: \$100

Awarded: spring

Terms of reference: Awards will be given to full-time students in the Department of Statistics and Actuarial Science on the nomination of the chair, Department of Statistics and Actuarial Science. The fund provides support for further statistical and actuarial undergraduate education at Simon Fraser University and seeks to encourage secondary school students to enter into the study of statistics and actuarial science.

### Wes Sydor Memorial Co-op Award

Program code: UEAO-063

Value: \$900

Awarded: fall

Terms of reference: To a full-time science and environment undergraduate co-op student who has demonstrated outstanding performance on a Co-operative Education work placement focusing on science projects in any of the last three terms. The award will be given upon the successful completion and return of the co-op student from the work placement. Applicants should submit a resume

outlining their community involvement. Volunteer work through sports organizations will be considered. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the director, Co-operative Education.

#### **Webber Chemistry Co-op Book Prize**

Program code: UPAO-031

Value: \$50

Awarded: summer

Terms of reference: Awarded to Chemistry students who have completed a co-op term in the year, have demonstrated excellence in their work placement and have the highest CGPA. The award will be made by the Senate Undergraduate Awards Adjudication Committee on the nomination of the chair, Department of Chemistry.

### **Awards for Student Athletes**

#### **Regulations for Athletic Awards**

The following regulations apply to athletic and recreation awards:

- Students must have achieved a minimum cumulative grade point average (CGPA) of 2.00 in the previous term and must not be on academic probation, or, in the case of a first term or transfer student, must possess an equivalent high school or college standing.
- Undergraduate students must be eligible to compete and be registered in a minimum of nine units of normal graded courses in the term of eligibility. Challenge, audit, and credit-free courses are not considered. Students who enrol in fewer than nine units or subsequently drop below nine hours may have their awards cancelled.
- Graduate students must be eligible to compete and be registered for residence credit in an approved full-time program. Students who do not register or subsequently change to on-leave status may have their awards cancelled.
- Unless otherwise noted, candidates must be nominated by the director, recreation services and athletics.
- Only one intervening term will be allowed between the term in which the registered student made their contribution and the term in which the award is adjudicated.
- Unless otherwise noted, students must be included in the official roster of a varsity team. Specific team membership may be required for individual awards.
- Athletic awards are tenable only at the University for the term indicated on the notice and may not be deferred.
- Funds will be credited to the successful student's account with the University. Outstanding debts to the University will be deducted from the award funds before a cheque for the credit balance is issued.

#### **Bob Ackles Football Award**

Program code: UEAA-001

Value: \$500

Awarded: fall, spring, summer

Terms of reference: To a student in good academic standing in any faculty who has demonstrated high standards of leadership and performance as members of the SFU football team. Academic accomplishment may be considered in selection of the recipient.

#### **Yolande D. Anderson Women's Basketball Award**

Program code: UEAA-060

Value: \$800

Awarded: fall, spring, summer

Terms of reference: To a full-time student in good standing who is on the Simon Fraser University women's basketball team and who demonstrates athletic ability in basketball.

#### **G.F. Kym Anthony Wrestling Award**

Program code: UEAA-087

Value: \$700

Awarded: fall, spring, summer

Terms of reference: The award is based on athletic merit in the wrestling program and will be awarded to a full or part-time student in good standing who is a wrestler attending Simon Fraser University.

#### **Tony Antunovic Memorial Award in Football**

Program code: UPAO-021

Value: \$1000

Awarded: fall, spring, summer

Terms of reference: To students in good academic standing in any faculty who have demonstrated high standards of leadership and performance as a member of the varsity men's football team. Academic accomplishment may be considered in selection of the recipient.

#### **Aon Reed Stenhouse Inc. Athletic Award**

Program code: UEAA-034

Value: \$350

Awarded: fall, spring, summer

Terms of reference: Athletes who meet the academic requirements and demonstrate outstanding athletic ability.

#### **C.G. "Chuck" Arnold Golf Award**

Program code: UEAA-002

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Two students who demonstrate outstanding ability in golf and meet the academic requirements. Preference will be given to residents of the Lower Mainland of BC.

#### **Athlete Assistance Awards**

Program code: UUAO-105

Value: \$250

Awarded: fall, spring, summer

Terms of reference: A number of awards are available each term from funds raised by Simon Fraser University athletic teams to assist student athletes in meeting educational costs. Candidates must be members of a Simon Fraser University athletic team and have demonstrated dedication to their sport. Recipients must be enrolled in nine units and maintain a CGPA of 2. Awards will be made by the Senate Undergraduate Awards Adjudication Committee on nominations from the director of Recreational Services and Athletics.

#### **Athletic Entrance Awards**

Program code: UUAO-104

Value: \$1000

Awarded: fall, spring, summer

Terms of reference: Thirty awards valued at \$1,000 are available to students on the basis of demonstrated leadership in an intercollegiate sport. Students must maintain a 2.00 CGPA and be enrolled in nine units during the tenure of award.

#### **Athletic and Recreation Awards**

Program code: UUAO-100

Value: \$700

Awarded: fall, spring

Terms of reference: The purpose of the Athletic and Recreation Awards is to recognize significant contributions to the athletic activities of Simon Fraser University, or to recognize excellence in extraordinary amateur athletic activities. Up to 50 awards valued at \$700 each are available to students who:

- have achieved a minimum grade point average of 2.00 in the previous term and must not be on academic probation, or, in the case of a first term or transfer student, possess an equivalent high school or college standing
- are enrolled in nine or more units of normally graded courses. Students who enrol in less than nine units or subsequently drop below nine units may have their awards cancelled

Nomination will be made by the director of Recreational Services and Athletics to the Senate Undergraduate Awards Adjudication Committee.

#### **Bank of Nova Scotia Football Award**

Program code: UEAA-003

Value: \$300

Awarded: fall, spring, summer

Terms of reference: To a student enrolled in a program of study in any faculty at Simon Fraser University demonstrating outstanding ability in football, as well as proven academic achievement. This \$3,000 self-perpetuating athletic award has been established by the Bank of Nova Scotia.

Value: \$500

Awarded: fall, spring, summer

Terms of reference: To student in good academic standing in any faculty who has demonstrated high standards of leadership and performance as a team member of the varsity men's basketball team. Academic accomplishment may be considered in selection of the recipient.

**Lynn and Florence Sully Award in Women's Basketball**

Program code: UEAA-043

Value: \$900

Awarded: fall, spring, summer

Terms of reference: To a student in good academic standing in any faculty who has demonstrated high standards of leadership and performance as a team member of the varsity women's basketball team. Preference will be given to students with high academic standing.

**Team Skyline Ltd Athletic Award**

Program code: UEAA-031

Value: \$400

Awarded: fall, spring, summer

Terms of reference: An award is available to an athlete who exhibits outstanding athletic ability as well as maintains satisfactory academic performance.

**Brit Townsend Women's Track and Field Award**

Program code: UEAA-083

Value: \$600

Awarded: fall, spring, summer

Terms of reference: To a full-time student in good academic standing who is on the women's track and field team at Simon Fraser University. Based also on athletic merit in track and field (preferably distance running).

**Barbara J. Towriss Award in Women's Basketball**

Program code: UEAA-039

Value: \$1200

Awarded: fall, spring, summer

Terms of reference: To a student in good academic standing in any faculty who has demonstrated high standards of leadership and performance as a team member of the varsity women's basketball team. Academic accomplishment may be considered in selection of the recipient.

**Jay Triano Basketball Award**

Program code: UEAA-057

Value: \$500

Awarded: fall, spring, summer

Terms of reference: To a full or part-time student in good standing. The award is based on athletic merit in basketball to a student who is on the Simon Fraser University basketball team.

**Valley Royals Award in Track and Field**

Program code: UPAA-014

Value: \$2000

Awarded: fall, spring, summer

Terms of reference: To a Simon Fraser University student who exhibits outstanding athletic merit on the Simon Fraser University track and field team and who maintains a satisfactory academic standing. \$2,000 in total will be awarded annually in two installments. Preference will be given to students who are members of the Valley Royals Track and Field Club. If a suitable candidate from the Valley Royals club is not found in a given year, the award may be granted to a student on the Simon Fraser University track and field team who is from the Fraser Valley region (zone 3) that includes Maple Ridge, Langley, Abbotsford, Mission, Agassiz, Coquitlam, Port Coquitlam and Hope. If neither a Valley Royals club member nor a student from zone 3 is available, the award may be granted to a track and field team member from British Columbia or from Canada. The recipient may be granted the Valley Royals award more than one time provided all criteria noted above are met.

**Vancouver Golf Club/MCL Motors Golf Tournament Award in Golf**

Program code: UEAA-066

Value: \$50

Awarded: fall, spring, summer

Terms of reference: Granted to a full-time student in good standing who is on the golf team at Simon Fraser University.

**Vancouver Ski Club Award**

Program code: UEAA-011

Value: \$500

Awarded: fall, spring, summer

Terms of reference: To a student who has a combination of real talent in skiing and satisfactory academic background. Students should seek a nomination through the director of athletics.

**Joe Vieira Award for Swimming**

Program code: UEAA-115

Value: \$800

Awarded: fall, spring, summer

Terms of reference: To students in good academic standing in any faculty who have demonstrated high standards of leadership and performance as members of the Simon Fraser University men's or women's swimming and diving teams. Academic accomplishment may be considered in selection of the recipient.

**Water Polo Award**

Program code: UEAA-082

Value: \$250

Awarded: fall, spring, summer

Terms of reference: The award will be given to students in good academic standing in any faculty who have demonstrated high standards of leadership and performance as a member of the Simon Fraser University women's water polo club and/or the Simon Fraser University men's water polo club.

**West Coast Reduction Ltd Athletic Award**

Program code: UEAA-038

Value: \$600

Awarded: fall, spring, summer

Terms of reference: To a student athlete who exhibits exceptional ability in any intercollegiate sport and maintains a good academic standing.

**White Rock Renegades Women's Softball Awards**

Program code: UEAA-045

Value: \$1000

Awarded: fall, spring, summer

Terms of reference: To a member of the Simon Fraser University women's intercollegiate softball team and must be a student at Simon Fraser University. The recipient must have been a member of the Renegade

softball organization (South Surrey White Rock) for at least two complete seasons.

### Women's Athletic Awards (She Can Play!)

Program code: UEAA-091

Value: \$100

Awarded: fall, spring, summer

Terms of reference: To a female student in good academic standing in any faculty who has demonstrated high standards of leadership and performance in a varsity sport offered through the University.

## Work-Study Program

The Simon Fraser University Work-Study program provides part-time on-campus employment for full-time students.

### Regulations

The following regulations apply to participate in the Work-Study Program.

- Students must have a demonstrated financial need.
- Undergraduate and graduate students, both domestic (Canadian) and international, are eligible to apply.
- Undergraduate students must have a minimum CGPA of 2.00 to be eligible.
- Graduate students in eligible master's or doctoral programs must have a minimum CGPA of 3.00.
- Undergraduate students must be enrolled in a minimum of nine units of normal graded courses in the term of application. Challenge, audit, and credit-free courses will not be considered. Students who enrol in fewer than nine units or subsequently drop below nine units may have their work-study position cancelled.
- Graduate students must be enrolled for residence credit in an approved full-time program. Students who do not enrol or subsequently change to on-leave status may have their work-study position cancelled.
- Domestic (Canadian) students must be approved for government student assistance from their home jurisdiction to be eligible.
- The student must apply using the Simon Fraser University online bursary/work-study application form via the student information system (<http://sis.sfu.ca>). It is the student's responsibility to meet applicable deadlines and supply all required documentation. Incomplete applications may be rejected. Note: some BC students may be identified as eligible candidates through their StudentAid BC application and be notified of this opportunity.

## University Administered Loans

### Student Emergency Loan Fund

#### Regulations

The following regulations govern all loans for continuing students over which the University has jurisdiction.

- Short term emergency funds are available to students who urgently need money while awaiting receipt of other sources of funding.
- Emergency loans are not available for outstanding fees owed to the University.
- Students must have a demonstrated financial need and a secured source of repayment.
- Undergraduate students must be registered in a minimum of nine units of normal graded courses in the term of application. Challenge, audit, and credit-free courses will not be considered.
- Graduate students must be registered for residence credit in an approved full-time program.
- Students must meet with a Financial Aid and Awards advisor. It is the student's responsibility to

supply all requested documentation. Incomplete applications may be rejected.

- Simon Fraser University Emergency Loans are tenable only at Simon Fraser University and only for the term indicated on the notice.

## Externally Administered Scholarships, Awards and Bursaries

Externally administered scholarships, awards and bursaries are not administered by Simon Fraser University and therefore are not listed here. The information which is provided through the Financial Aid and Awards office is intended for general reference only and is subject to change. The student is responsible for enquiring and applying through the appropriate agency. For more information, visit <http://students.sfu.ca/financialaid>.

## Government Administered Programs

### Canadian Armed Forces Subsidization Plans

#### Admission Requirements

An applicant must be a Canadian citizen; be physically fit for enrolment in the Canadian Forces; and be at least 16 years of age on the first day of January of the year the student commences first year studies at the university.

#### How to Apply

Individuals interested in obtaining more information or wishing to apply for any of these plans are requested to contact: Commanding Officer, Canadian Forces Recruiting Centre, 757 West Hastings Street, Vancouver, BC, V6C 1A1.

### Government Loans and Grants

A loan is a repayable sum of money borrowed by a student who demonstrates financial need. A grant is funding that a student is not normally required to repay.

#### Student Loan and Grant Programs

##### BC Residents Studying Full-Time

StudentAid BC assists eligible students with the cost of post-secondary education through loans, grants, bursaries, scholarships and special programs. It also offers programs for students who need help to repay a student loan.

Most StudentAid BC programs are based on need, and provide financial assistance to students and their immediate families who do not have the financial resources to pay for post-secondary education and basic living expenses.

StudentAid BC administers programs on behalf of the Government of Canada including Canada student loans and Canada Student Grants.

For detailed information about available opportunities, eligibility requirements, and how to apply, visit the Student Aid BC website at [www.studentaidbc.ca](http://www.studentaidbc.ca).

##### Out-of-Province Students Studying Full-Time

Students must apply to their province of residence for provincial/territorial funding. On-line applications are available for most provinces. Check the Financial Aid and Awards website at <http://students.sfu.ca/>

[financialaid](http://financialaid) for links to each of the provincial/territorial ministries.

### New 2009/2010 Federal Government Programs

The federal government is improving access to post-secondary education by assisting students and families to manage the cost through new and improved programs including

- a new Canada Student Grant for students from low-income or middle-income families
- more effective support for students with permanent disabilities
- a new Repayment Assistance Plan to help students who have difficulty repaying loans

There are also many other changes for married students, part-time students, and students with dependents. For detailed information, visit the CanLearn website at [www.canlearn.ca](http://www.canlearn.ca).

#### Students Studying Part-Time

Part-time students whose family income falls below established thresholds may be eligible for up to \$1,200 per year in grants and/or up to \$10,000 in part-time Canada Student Loan funding.

For detailed information about eligibility requirements and how to apply, visit the StudentAid BC website at [www.studentaidbc.ca](http://www.studentaidbc.ca) or the CanLearn website at [www.canlearn.ca](http://www.canlearn.ca)

### Program Exceptions to Government Student Loans and Grants

Although the majority of Simon Fraser University programs are eligible for government student loans and grants, some programs do not meet federal and provincial/territorial eligibility criteria (e.g. executive MBA, MEd off-campus, graduate diploma in business administration (GDBA), non-credit continuing studies programs). Contact Financial Aid and Awards to determine if a program is eligible.

### International Students

Students who are not Canadian citizens or Permanent Residents, and who will require financial assistance to attend Simon Fraser University must arrange such assistance in their country of origin before arrival in Canada.

Simon Fraser University permits non-Canadian students to compete for most University administered scholarships and awards at the undergraduate or graduate level, once they have enrolled at the University, on the basis of course work undertaken at Simon Fraser University and/or community service. Bursaries are awarded on the basis of financial need, but only as supplemental funding, not as core funding needed to meet immigration requirements. Students are expected to exhaust all other sources of funding including government aid from their home country before being eligible for bursaries. See the bursary section for details.

It must be stressed that non-Canadian students should not predicate their tuition and living expense estimates upon these sources. Non-Canadian students are expected and required by federal law to have sufficient funds guaranteed for their education prior to arrival in Canada.

### United States Students

Citizens (or eligible non-citizens) of the United States attending the University may apply for funding through the US Department of Education's Federal Family Education Loan (FFEL) program. US students with permanent resident status or dual citizenship may also be eligible to apply for Canadian student loans.

For more information, visit the Financial Aid and Awards website at <http://students.sfu.ca/financialaid>

or the US Department of Education website at [www.studentaid.ed.gov](http://www.studentaid.ed.gov)

### For More Information

For further information on programs offered by Financial Aid and Awards (Student Services) visit <http://students.sfu.ca/financialaid>.

### Index

Note: this index is compiled in simple alphabetical order according to the first word of the scholarship, award, or bursary. For example, the Al Eisenring Gerontology Award appears under "A," not "E."

# Faculty of Applied Sciences

9861 Applied Sciences Building, 778.782.4724 Tel,  
778.782.5802 Fax, <http://fas.sfu.ca>

## Dean

N. Rajapakse BSc (SLanka), MEng, DEng (AIT),  
PEng

## Associate Dean

F. Popowich BSc (Alta), MSc (S Fraser), PhD (Edin)

## Advisor

Ms. M. Trautman BA, MEd (S Fraser),  
778.782.8795 Tel

The Faculty of Applied Sciences offers programs in computing science, engineering science, general studies, and geographic information science. Bringing together the University's educational and research activities in the applied sciences, the faculty is concerned with major areas of applied science and technology, and human and social aspects of the application of science.

## Undergraduate Degrees Offered

bachelor of applied science (honors)  
bachelor of applied science  
bachelor of arts (honors)  
bachelor of arts  
bachelor of general studies (applied sciences)  
bachelor of science (honors)  
bachelor of science

## Diploma and Certificate Offered

certificate in computing studies  
post baccalaureate diploma in computing science

## Residency Requirements

The University may award substantial transfer credit for course work completed elsewhere. These transfer units reduce the amount of work needed to complete a Simon Fraser University credential, subject to minimum residency requirements for work completed at Simon Fraser University. In addition to University-wide residency requirements, the Faculty of Applied Sciences also defines program-based residency requirements for each of its programs.

Overall, the residency requirements define three conditions that apply to every program offered through the Faculty of Applied Sciences.

- At least half of the program's total units must be earned through Simon Fraser University study.
- At least two thirds of the program's total upper division units must be earned through Simon Fraser University study.
- At least two thirds of the upper division units in the courses of a school offering (or joint offering) a program must be earned through that school at Simon Fraser University.

These conditions apply to all Faculty of Applied Sciences undergraduate degree, post baccalaureate diploma and certificate programs and also apply to major, honors, minor, extended minor and specialist programs that form part of an overall degree program, whether the program is offered by the Faculty of Applied Sciences or by any other faculty.

## Programs Offered

Computing Science Major: this program leads to a BSc or BA degree with a major or honors in computing science; students may complete specialist programs and concentrations  
Software Systems Major  
Joint Programs  
Post Baccalaureate Diploma in Computing Science  
Second Degree Program  
Simon Fraser University – Zhejiang University Dual Degree Program

The school offers a general program leading to a BSc or BA degree with major or honors in computing science, and specialist programs leading to a BSc degree with a computing science major. It also offers many joint major programs, and also participates in the cognitive science program (see "Cognitive Science Program" on page 98) and the Management and Systems Science Program see "Management and Systems Science Program" on page 195). The school also offers a minor program.

## Transfer Credit and Residency Requirements

Transfer students are advised that residency requirements apply to all programs offered or jointly offered by the School of Computing Science. See "Residency Requirements" on page 76.

## Prerequisite Grade Requirement

Computing science course entry requires a C- or better in each prerequisite course. A minimum 2.40 cumulative grade point average is required for upper division computing courses.

## Admission Requirements

Entry into computing science programs is possible via

- direct admission from high school
- direct transfer from a recognized post-secondary institution, or combined transfer units from more than one post-secondary institution
- internal transfer from within Simon Fraser University

Admission is competitive. A separate admission average for each entry route is established each term, depending on spaces available and subject to the approval of the Dean of Applied Sciences. Admission averages are calculated over a set of courses satisfying particular breadth constraints.

See "Admission and Readmission" on page 17 for provisions governing high school direct entry or direct transfer from another post-secondary institution.

Please contact an advisor at [www.cs.sfu.ca/undergrad/Advising/](http://www.cs.sfu.ca/undergrad/Advising/)

## Guaranteed Placement Program

This admission entry program has been created for high school students who are not eligible for our direct admission program (based on their high school grade average), but still have a good grade average.

This program assures students of timely access to the courses needed to enter the computing science major or honors programs under the internal transfer model.

Students may continue in the program for up to two years with a 2.40 or better CGPA.

Students who are considering this program are strongly recommended to meet with a school academic advisor within the first two terms of study. See [www.cs.sfu.ca/undergrad/Advising/](http://www.cs.sfu.ca/undergrad/Advising/)

## Internal Transfer

Simon Fraser University students applying for School of Computing Science admission are selected on the basis of an admission Computing Related Grade Point Average. The CRGPA is calculated over the best three courses chosen as follows.

- one mathematics course chosen from: MACM 101, 201, MATH 150 (or 151), 152 and 240 (or 232)
- one computing course chosen from: CMPT 125 (or 126 or 128), 150, (or ENSC 150), 225, 250 and 275
- one additional mathematics or computing science course chosen from the above lists

No course may be included in the average if it is a duplicate of any previous course completed at Simon Fraser University or elsewhere. All three courses must be completed prior to application. See [www.cs.sfu.ca/undergrad/Advising/](http://www.cs.sfu.ca/undergrad/Advising/) for information.

## Continuation Requirements

Students who do not maintain at least a 2.40 CGPA, will be placed on the school's probation. Courses available to probationary students may be limited. Each term, these students must consult an advisor prior to enrolment and must achieve either a term 2.40 term GPA or an improved CGPA. Reinstatement

from probationary standing occurs when the CGPA improves to 2.40 or better and is maintained.

Students must obtain permission from the department if they wish to complete, for further credit, any course that is a prerequisite for a course the student has already completed with a grade of C- or higher.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information or visit [www.cs.sfu.ca/undergrad/Advising/](http://www.cs.sfu.ca/undergrad/Advising/).

For students entering from Simon Fraser University, Chinese language and culture courses completed at Zhejiang University may fulfil up to two Breadth-Social Sciences (B-Soc) and two Breadth-Humanities (B-Hum) requirement.

For students entering from Zhejiang University, selected cultural, social science and humanities courses completed at Zhejiang University may fulfil up to two Breadth-Social Sciences (B-Soc) and two Breadth-Humanities (B-Hum) requirement.

## Second Degree Program

This is a direct admission program and holders of a recognized bachelor's degree in another discipline may follow this program to earn a second degree.

Applicants should indicate their program interest by selecting the computing science, Faculty of Applied Sciences BSc major as their first choice. Applicants are selected primarily on upper division (third and fourth year) performance in the prior bachelor's degree and subsequent professional experience.

Well-prepared students can complete the program in one year (three terms) of full-time study. The ideal preparation is a mathematics background with programming experience comparable to the first two years of the computing science major program and a prior degree in which English was the language of instruction. Students without this may need additional time to complete lower division prerequisites prior to starting upper division courses.

In accord with University regulations, the second degree program consists of the upper division requirements of the full computing science degree, including WQB requirements as assessed by the school. For a general BSc degree majoring in computing science, 45 upper division units must be completed including the 39 upper division units as specified for the major. For more information visit [www.cs.sfu.ca/undergrad/Advising/](http://www.cs.sfu.ca/undergrad/Advising/)

## Major and Honors Programs

These programs are organized to take advantage of many options. Some prepare for employment in computer-related positions in government, business, or industry, and for computing science graduate studies or a related area. This undergraduate degree is appropriate for many interdisciplinary areas.

## Lower Division Requirements

Students who plan a major or honors in computing science must complete the courses listed below. It is suggested that students complete a recommended schedule of courses within the first two years.\*

### Courses

Students complete one of\*\*

- CMPT 125-3 Introduction to Computing Science and Programming II
- CMPT 126-3 Introduction to Computing Science and Programming

and all of

- CMPT 150-3 Introduction to Computer Design
- CMPT 225-3 Data Structures and Programming
- CMPT 250-3 Introduction to Computer Architecture
- CMPT 275-4 Software Engineering I
- MACM 101-3 Discrete Mathematics I
- MACM 201-3 Discrete Mathematics II
- MATH 151-3 Calculus I\*\*\*
- MATH 152-3 Calculus II\*\*\*
- MATH 240-3 Algebra I: Linear Algebra\*\*\*

and one of

- STAT 270-3 Introduction to Probability and Statistics I
- BUEC 232-4 Data and Decisions I (with permission of an advisor) 37-38 units

\*see [www.cs.sfu.ca/undergrad/Advising/programs\\_majors.html](http://www.cs.sfu.ca/undergrad/Advising/programs_majors.html) for recommended schedule

\*\*to aid your choice, prior to enrolment, complete the self-evaluation test at [www.cs.sfu.ca/undergrad/Advising/120-126/](http://www.cs.sfu.ca/undergrad/Advising/120-126/)

\*\*\*MATH 150 may be substituted for MATH 151. MATH 154/155 or MATH 157/158 with a grade of at least B+ may be substituted with school permission. MATH 232 may be substituted for MATH 240.

Students are encouraged to meet the Simon Fraser University undergraduate degree requirements for writing, quantitative, and breadth courses as early as possible in their degree (see "Writing, Quantitative, and Breadth Requirements" on page 7).

## Upper Division Requirements

Major and honors students must consult an advisor before commencing upper division requirements. For information, see [www.cs.sfu.ca/undergrad/Advising/](http://www.cs.sfu.ca/undergrad/Advising/)

The primary upper division requirements for a major or honors are structured according to breadth, depth and credential requirements listed below.

### Table I – Computing Science Concentrations

<i>Artificial Intelligence</i>
CMPT 310-3 Artificial Intelligence Survey
CMPT 340-3 Biomedical Computing
CMPT 411-3 Knowledge Representation
CMPT 412-3 Computational Vision
CMPT 413-3 Computational Linguistics
CMPT 414-3 Model-Based Computer Vision
CMPT 417-3 Intelligent Systems
CMPT 418-3 Computational Cognitive Architecture
CMPT 419-3 Special Topics in Artificial Intelligence
<i>Computer Graphics and Multimedia</i>
CMPT 361-3 Introduction to Computer Graphics
CMPT 363-3 User Interface Design
CMPT 365-3 Multimedia Systems
CMPT 368-3 Introduction to Computer Music Theory and Sound Synthesis
CMPT 461-3 Image Synthesis
CMPT 464-3 Geometric Modeling in Computer Graphics
CMPT 466-3 Animation
CMPT 467-3 Visualization
CMPT 469-3 Special Topics in Computer Graphics
<i>Computing Systems</i>
CMPT 300-3 Operating Systems I
CMPT 305-3 Computer Simulation and Modeling
CMPT 371-3 Data Communications and Networking
CMPT 379-3 Principles of Compiler Design
CMPT 401-3 Operating Systems II
CMPT 431-3 Distributed Systems
CMPT 432-3 Real-time Systems
CMPT 433-3 Embedded Systems
CMPT 471-3 Networking II
CMPT 479-3 Special Topics in Computing Systems
CMPT 499-3 Special Topics in Computer Hardware
<i>Information Systems</i>
CMPT 301-3 Information Systems Management
CMPT 354-3 Database Systems I
CMPT 370-3 Information System Design

CMPT 441-3 Introduction to Computational Biology  
 CMPT 454-3 Database Systems II  
 CMPT 456-3 Information Retrieval and Web Search  
 CMPT 459-3 Special Topics in Database Systems  
 CMPT 470-3 Web-based Information Systems  
 CMPT 474-3 Web Systems Architecture

#### *Programming Languages and Software*

CMPT 373-3 Software Development Methods  
 CMPT 383-3 Comparative Programming Languages  
 CMPT 384-3 Symbolic Computing  
 CMPT 473-3 Software Quality Assurance  
 CMPT 475-3 Software Engineering II  
 CMPT 477-3 Introduction to Formal Verification  
 CMPT 480-3 Foundations of Programming Languages  
 CMPT 481-3 Functional Programming  
 CMPT 489-3 Special Topics in Programming Languages

#### *Theoretical Computing Science*

CMPT 307-3 Data Structures and Algorithms  
 CMPT 308-3 Computability and Complexity  
 CMPT 404-3 Cryptography and Cryptographic Protocols  
 CMPT 405-3 Design and Analysis of Computing Algorithms  
 CMPT 406-3 Computational Geometry  
 CMPT 407-3 Computational Complexity  
 CMPT 408-3 Theory of Computer Networks/Communications  
 CMPT 409-3 Special Topics in Theoretical Computing Science  
 MACM 300-3 Introduction to Formal Languages and Automata with Applications

#### **Table II – Application Courses**

CMPT 340-3 Computers in Biomedicine  
 CMPT 441-3 Introduction to Computational Biology

#### **Table III – Computing Mathematics Courses**

MACM 316-3 Numerical Analysis I  
 MACM 401-3 Symbolic Computation  
 MATH 308-3 Linear Programming  
 MATH 343-3 Combinatorial Aspects of Computing  
 MACM 416-3 Numerical Analysis II

The following courses may be counted in one of the above tables with permission of the school.

CMPT 318-3 Special Topics in Computing Science  
 CMPT 415-3 Special Research Projects  
 CMPT 416-3 Special Research Projects  
 CMPT 496-3 Directed Studies  
 CMPT 497-6 Dual Degree Program Capstone Project  
 CMPT 498-6 Honors Research Project

#### **Upper Division Requirements for a Major Breadth Requirement**

Five courses from five of the six table 1 areas of concentration must be completed including both of CMPT 300-3 Operating Systems I  
 CMPT 307-3 Data Structures and Algorithms 15 units  
 CMPT 354 is also recommended.

#### **Depth Requirement**

Twelve units of additional CMPT courses numbered CMPT 400 or above must be completed (excluding CMPT 415, 416 and 498, which may be included by special permission). 12 units

#### **BSc Credential**

For a BSc degree with a major in computing science, the following additional requirements must be met.

- two additional courses chosen from tables I, II or III
- MACM 316 and
- CMPT 320 or CMNS 353

Other courses may be approved on submission of a detailed course outline to the school. 12 units

#### **BEd Credential**

For a major in computing science in conjunction with a BEd program as offered by the Faculty of

Education, one additional CMPT course chosen from table I or table II must be completed, to total at least 30 upper division units in CMPT courses. 3 units

#### **BA Credential**

For a BA degree with a major in computing science within the Faculty of Applied Sciences, the following additional requirements must be met.

- one additional CMPT upper division course chosen from table I or table II must be completed bringing the total upper division units in CMPT courses to a minimum of 30 units.
- a concentration of 15 units in a Faculty of Arts and Social Sciences discipline (department) including at least six units of upper division credit. 18 units

#### **Graduation Requirements**

For all computing science major programs, the upper division CMPT GPA of 2.00 must be maintained.

For a computing science major, students complete

- 120 units including an overall minimum of 45 upper division units
- a minimum of at least 30 upper division CMPT units must be counted towards the major and cannot at the same time be counted towards the unit requirements of any other program.

See “Major – Minor Program” on page 6 for regulations governing university graduation requirements, or see [www.students.sfu.ca/calendar](http://www.students.sfu.ca/calendar) to find “General Information” from the Table of Contents.

#### **Upper Division Requirements for Honors**

For a BA or BSc degree with honors in computing science, students fulfil the following requirements for a BA or BSc major in computing science, with the following modifications and additions.

#### **Unit Requirement**

Additional computing science courses must be completed to bring the total upper division units in CMPT/MACM to at least 50 within the minimum of 60 upper division units and an overall total of 132 units are required for the degree, together with a graduation grade point average of at least 3.00.

#### **Breadth Requirement**

One course each in the six areas of table I is required. These courses must include CMPT 300, 307 and 354. 18 units

#### **Depth Requirement**

Six additional courses from table I are required. These courses must include CMPT 405 and at least one other course in the theoretical computing science concentration. At least four of the courses must be numbered 400 or above.

In addition, six units of research courses are required including both of

CMPT 415-3 Special Research Projects  
 CMPT 416-3 Special Research Projects

or

CMPT 498-6 Honors Research Project 24 units

#### **Concentrations**

As part of a major or honors program, students may complete one or more concentrations from these six areas: artificial intelligence, computer graphics and multimedia, computing systems, information systems, programming languages and software engineering, and theoretical computing science.

To complete a concentration, students complete the major or honors requirements, including four courses in the corresponding section of table 1, at least two of which must be at the 400 division. Courses used to meet the requirements of a concentration may also be used to meet other program requirements.

## **Specialist Programs**

Students must consult an advisor before commencing a specialist program, preferably early in their second year. See [www.cs.sfu.ca/undergrad/Advising/](http://www.cs.sfu.ca/undergrad/Advising/)

### **Specialist Program in Multimedia Computing**

#### **Lower Division Requirements**

Students complete all lower division requirements for the computing science major program plus

FPA 111-3 Issues in the Fine and Performing Arts

plus at least two of

CMNS 259-3 Acoustic Dimensions of Communication I

FPA 147-3 Introduction to Electroacoustic Music

FPA 247-3 Electroacoustic Music I

FPA 289-3 Special Topics in the Fine and Performing Arts I

FPA 290-3 Video Production I 58-61 units

#### **Upper Division Requirements**

Students complete at least 39 units of computing science upper division courses, which should include CMPT courses in the following required and elective courses.

Students complete all of

CMPT 300-3 Operating Systems I

CMPT 307-3 Data Structures and Algorithms

CMPT 320-3 Social Implications of a Computerized Society

CMPT 361-3 Introduction to Computer Graphics

CMPT 363-3 User Interface Design

CMPT 365-3 Multimedia Systems

MACM 316-3 Numerical Analysis I 21 units

At least six of the following are required, three of which must be 400 division, three must be designated CMPT and two must be non-CMPT courses.

CMNS 358-4 Sound Tape Recording: Theory and Uses

CMNS 359-4 Acoustic Dimensions of Communication II

CMPT 310-3 Artificial Intelligence Survey

CMPT 354-3 Database Systems and Structures

CMPT 371-3 Data Communications and Networking

CMPT 412-3 Computational Vision

CMPT 414-3 Model-Based Computer Vision

CMPT 461-3 Advanced Computer Graphics

CMPT 466-3 Animation

CMPT 468-3 Introduction to Computer Music and Sound Synthesis

CMPT 469-3 Special Topics in Computer Graphics

FPA 311-5 The Arts in Context: Selected Topics

FPA 353-3 Playmaking IV

FPA 390-3 Video Production II 18 units

Relevant FPA and CMNS lower and upper division special topics courses may be applied to the above requirement with the approval of the director of undergraduate studies in the School of Computing Science. Some FPA courses listed above require prerequisites that are not included here.

### **Specialist Program in Software Engineering**

The completion of a bachelor of science degree in computing science with the completion of a specialist program in software engineering is not a professional engineering degree as it is not certified by professional engineering societies. It is instead an area of study recognized by computing science.

#### **Lower Division Requirements**

These requirements are identical to those of the major and honors program listed above.

## Upper Division Requirements

### Required Courses

Students complete all eight of  
 CMPT 300-3 Operating Systems I  
 CMPT 307-3 Data Structures and Algorithms  
 CMPT 320-3 Social Implications of a Computerized Society  
 CMPT 354-3 Database Systems I  
 CMPT 363-3 User Interface Design  
 CMPT 371-3 Data Communications and Networking  
 CMPT 475-3 Software Engineering II  
 MACM 316-3 Numerical Analysis I 24 units

### Elective Courses

Students complete five or more courses chosen from the following list, at least three of which must be at the 400 division.

CMPT 301-3 Information Systems Management  
 CMPT 370-3 Information System Design  
 CMPT 379-3 Principles of Compiler Design  
 CMPT 383-3 Comparative Programming Languages  
 CMPT 401-3 Operating Systems II  
 CMPT 454-3 Database Systems II  
 CMPT 459-3 Special Topics In Database Systems  
 CMPT 470-3 Web-based Information Systems  
 CMPT 471-3 Networking II  
 CMPT 477-3 Introduction to Formal Verification  
 CMPT 487-3 Software Engineering Tools and Environments  
 CMPT 489-3 Special Topics in Programming Languages  
 ENSC 351-4 Real Time and Embedded Systems 15 units

Additional upper CMPT courses are required to bring the total CMPT units to 45 or more (ENSC 351 is treated as CMPT credit for this purpose). 6 units

## Software Systems Major Program

This program provides skills, knowledge and thought processes necessary for professional software production, while also providing a broad background various computing systems that graduates encounter in their careers. For course planning information, visit <http://www.cs.sfu.ca/undergrad/Advising>

### Systems Requirements

Students complete all of  
 CMPT 150-3 Introduction to Computer Design  
 CMPT 250-3 Introduction to Computer Architecture  
 CMPT 300-3 Operating Systems I  
 and two of  
 CMPT 170-3 Introduction to Web Application Development  
 CMPT 371-3 Data Communications and Networking  
 CMPT 471-3 Networking II  
 CMPT 354-3 Database Systems I  
 CMPT 454-3 Database Systems II  
 CMPT 401-3 Operating Systems II  
 CMPT 432-3 Real-time Systems  
 CMPT 433-3 Embedded Systems  
 CMPT 470-3 Web-based Information Systems 15 units

### Fundamentals Requirements

Students complete all of  
 CMPT 307-3 Data Structures and Algorithms  
 MACM 101-3 Discrete Mathematics I  
 MATH 151-3 Calculus I  
 MATH 232-3 Elementary Linear Algebra  
 and one of  
 CMPT 322-3 Professional Responsibility and Ethics  
 CMPT 322W-3 Professional Responsibility and Ethics  
 and one of  
 STAT 101-3 Introduction to Statistics  
 STAT 270-3 Introduction to Probability and Statistics 18 units

## Software Engineering Requirements

Students complete all of  
 CMPT 212-3 Object-Oriented Applications Design in C++  
 CMPT 225-3 Data Structures and Programming  
 CMPT 276-3 Introduction to Software Engineering  
 CMPT 373-3 Software Development Methods  
 CMPT 379-3 Principles of Compiler Design  
 CMPT 473-3 Software Quality Assurance  
 and either  
 CMPT 125-3 Introduction to Computing Science and Programming  
 or  
 CMPT 128-3 Introduction to Computing Science and Programming for Engineers  
 or both of  
 CMPT 120-3 Introduction to Computing Science and Programming I  
 CMPT 125-3 Introduction to Computing Science and Programming II  
 and one of  
 CMPT 383-3 Comparative Programming Languages  
 CMPT 384-3 Symbolic Computing  
 CMPT 477-3 Formal Verification  
 CMPT 474-3 Web Systems Architecture 24-27 units

### Specialization Requirements

Students are required to complete a specialization consisting of nine additional CMPT or MACM units at the 300 or 400 division. This specialization must be approved by the School of Computing Science. Preapproved sets of courses can be found at [www.cs.sfu.ca/undergrad/Advising](http://www.cs.sfu.ca/undergrad/Advising). 9 units

### Depth Requirement

Students must complete at least nine CMPT or MACM units at the 400 division.

## Simon Fraser University – Zhejiang University Dual Degree Program

This unique program developed by Simon Fraser University and Zhejiang University (China) offers a dual degree, with a major in computing science from both institutions. Program admission inquiries may be sent to [cschina@sfu.ca](mailto:cschina@sfu.ca).

### Admission Requirements

This is a direct admission program. Simon Fraser University applicants indicate their interest on the *Application for Undergraduate Admission to Simon Fraser University* by selecting the 'China Dual Degree Zhejiang University' under Program/Plan in Computing Science, Faculty of Applied Sciences.

Admission is competitive and enrolment is limited.

The program begins each fall term. Applicants must meet the standard requirements for admission to Simon Fraser University and the School of Computing Science. Concurrent to the Simon Fraser University admission application, students must also submit a 'Statement of Interest' to the SFU-ZU admissions committee, School of Computing Science. Applicants will be selected based on their *Statement of Interest* and their academic standing. Program admission inquiries may be sent to [cschina@sfu.ca](mailto:cschina@sfu.ca).

### Program Structure

#### Simon Fraser University Students

Students with no previous knowledge of Chinese will complete a five year curriculum with customized intensive Chinese language courses at Simon Fraser University in addition to some foundational courses in the Prep/0th year, plus Chinese immersion in the summer.

#### First and Second Year

Simon Fraser University students study at Zhejiang University, completing 80 lower division units (including 20 for Chinese language and culture.)

#### Third and Fourth Year

Students complete 60 units at Simon Fraser University (including a minimum of 45 upper division units).

### Zhejiang University Students

#### First and Second Year

Zhejiang University students study at Zhejiang University, completing 80 lower division units plus 18 units (Chinese moral education, etc.).

#### Third and Fourth Year

Students complete 60 units at Simon Fraser University (including a minimum of 45 upper division units).

All core courses are scheduled according to the articulation documents shown on the website [www.cs.sfu.ca/SFU-ZU](http://www.cs.sfu.ca/SFU-ZU). All students in the dual degree program are expected to fulfil the WQB requirements (see "Writing, Quantitative, and Breadth Requirements" on page 7) for their Simon Fraser University degree.

The option for work experience is available to students after the fourth term at Zhejiang University.

Upon completion, students receive dual degrees from Simon Fraser University and Zhejiang University.

### Tuition and Program Fee

All students pay undergraduate fees (including tuition and other fees) to Simon Fraser University. All students must pay a \$700 program fee each year in addition to the other tuition fees. Students are also responsible for travel, accommodation, insurance, textbooks and general living expenses (noting that in China, books, housing meals, transportation and living expenses will be lower than in Canada). Domestic students pay the basic Simon Fraser University tuition. International students attending the SFU-ZU dual degree program pay the basic Simon Fraser University tuition in years one and two when studying at Zhejiang University. In years zero, three and four, when studying at Simon Fraser University, international students will pay differential tuition fees.

### Dual Degree Credential

Students will receive two degrees after completing lower division courses at Zhejiang University, and upper division courses at Simon Fraser University, as specified in the articulation documents at [www.cs.sfu.ca/SFU-ZU](http://www.cs.sfu.ca/SFU-ZU).

All students must complete the following Simon Fraser University upper division courses.

CMPT 300-3 Operating Systems I  
 CMPT 307-3 Data Structures and Algorithms  
 CMPT 320-3 Social Implications of a Computerized Society  
 CMPT 354-3 Database Systems I  
 CMPT 371-3 Data Communications and Networking  
 CMPT 376-3 Technical Writing and Group Dynamics  
 MACM 316-3 Numerical Analysis I

two CMPT courses from two different concentrations selected from: artificial intelligence, computer graphics and multimedia, or programming languages and software (see Table I Computing Science Concentration) at the 300 division

four CMPT courses numbered 400 or higher from Table I (see "Table I – Computing Science Concentrations" on page 77)

CMPT 497 capstone projects (or six units of approved upper division CMPT courses)

## Minimum Credit and Residency Requirement

Students must complete at least 54 units at Zhejiang University (ZU) including at least 34 computing science core course units. Students must also complete at least 54 units at Simon Fraser University. Students admitted from Zhejiang University must complete at least 39 upper division units of these minimum 54 units at Simon Fraser University. Courses completed at ZU are not transfer credits. They are marked as DDP credits in the *other credits* section of the Simon Fraser University transcript.

## Co-operative Education and Work Experience

All students may choose to participate in co-operative education or work placements.

## Minor Program

### Admission Requirements

Admission to a computing science minor is open to all Simon Fraser University students with a major in a discipline other than computing science. Admission is competitive and requires the lower division courses listed below. The admission GPA is established each term, and will never be less than 2.40.

### Lower Division Requirements

Students who plan to undertake a minor in computing science should normally obtain credit for the following lower division courses.

one of\*

CMPT 125-3 Introduction to Computing Science and Programming I

CMPT 126-3 Introduction to Computing Science and Programming

and all of

CMPT 150-3 Introduction to Computer Design  
CMPT 225-3 Data Structures and Programming  
MACM 101-3 Discrete Mathematics I  
MATH 151-3 Calculus I\*\*

and one of

CMPT 250-3 Introduction to Computer Architecture  
CMPT 275-4 Software Engineering I

and one of

PHIL 100-3 Knowledge and Reality  
PHIL 120-3 Introduction to Moral Philosophy  
TECH 101-3 Fundamentals of Teamwork and Communication II

or any 100 division ENGL course 18-22 units

\*to aid your choice, prior to enrolment, complete the self-evaluation test at [www.cs.sfu.ca/undergrad/Advising/120-126/](http://www.cs.sfu.ca/undergrad/Advising/120-126/)

\*\*MATH 150 may be substituted for MATH 151. MATH 154 or 157 with a grade of at least B+ may be substituted with permission of the school

### Upper Division Requirements

For a minor, 15 units of upper division CMPT or MACM courses is required, including at least nine CMPT units chosen from Table I – Computing Science Concentrations (see page 77). 15 units

### Graduation Requirements

A grade point average of 2.00 must be obtained for upper division courses used to fulfil the above requirements. See [www.students.sfu.ca/calendar](http://www.students.sfu.ca/calendar).

## Computing Science and Linguistics Joint Major Program

The School of Computing Science and the Department of Linguistics offer this joint major in the

area of computational linguistics. Contact advisors in both departments for permission to enrol. Student enrolment, appeals and graduation processing are handled by the school.

### Lower Division Requirements

Students complete all of  
MATH 151-3 Calculus I\*  
MATH 152-3 Calculus II\*  
MATH 240-3 Algebra I: Linear Algebra\*  
and one of  
BUEC 232-4 Data and Decisions I  
STAT 270-3 Introduction to Probability and Statistics  
and one of  
COGS 100-3 Introduction to Cognitive Science  
or one course chosen from the social sciences electives list in the computing science major program's lower division requirements 46-51 units

\*MATH 150 may be substituted for MATH 151. MATH 154/155 or 157/158 with a grade of at least B+ may be substituted with permission of the school. MATH 232 may be substituted for MATH 240.

### Computing Science Requirements

Students complete either  
CMPT 126-3 Introduction to Computing Science and Programming\*

or both of

CMPT 120-3 Introduction to Computing Science and Programming I\*

CMPT 125-3 Introduction to Computing Science and Programming II\*

and all of

CMPT 150-3 Introduction to Computer Design  
CMPT 225-3 Data Structures  
CMPT 275-4 Software Engineering  
MACM 101-3 Discrete Mathematics I  
MACM 201-3 Discrete Mathematics II

\*to aid in your choice, prior to enrolment, complete the self-evaluation test at [www.cs.sfu.ca/undergrad/Advising/120-126](http://www.cs.sfu.ca/undergrad/Advising/120-126)

### Linguistics Requirements

Students complete all of  
LING 220-3 Introduction to Linguistics  
LING 221-3 Introduction to Phonetics and Phonology  
LING 222-3 Introduction to Syntax

### Upper Division Requirements

#### Computing Science Requirements (24 units)

Students complete all of  
CMPT 300-3 Operating Systems  
CMPT 307-3 Data Structures and Algorithms  
CMPT 320-3 Social Implications of a Computerized Society  
CMPT 413-3 Computational Linguistics

In addition, students choose four courses from the following distinct concentration areas: computer graphics and multimedia; information systems; programming languages and software; computing systems (CMPT 379 is recommended); theoretical computer science (CMPT 308 is recommended).

#### Linguistics Requirements (21 units)

Students complete both of  
LING 321-3 Phonology  
LING 322-3 Syntax  
and one of  
LING 400-3 Formal Linguistics  
MACM 300-3 Introduction to Formal Languages and Automata with Applications

and 12 units chosen from the following  
LING 323-3 Morphology  
LING 324-3 Semantics  
LING 330-3 Phonetics

LING 401-3 Topics in Phonetics  
LING 405-3 Topics in Syntax  
LING 406-3 Topics in Semantics  
LING 480-3 Topics in Linguistics I\*  
LING 481-3 Topics in Linguistics II\*

\*when offered with a suitable topic

### Other Requirements

Depending on the student's choice, either a bachelor of arts from the Faculty of Arts and Social Sciences (FASS), or a bachelor of science from the Faculty of Applied Sciences (FAS) will be awarded. Students must fulfil their chosen faculty's distinct requirements, such as FASS breadth requirements, or FAS residency requirements. For details about Faculty requirements, see "Bachelor of Arts Program" on page 88 in the Faculty of Arts and Social Science, and also see "Residency Requirements" on page 76 in the Faculty of Applied Sciences.

Students are encouraged to enrol in the Co-operative Education program.

## Computing Science and Molecular Biology and Biochemistry Joint Major Program

The School of Computing Science and the Department of Molecular Biology and Biochemistry offer this joint major program. See "Department of Molecular Biology and Biochemistry" on page 200 within the *Faculty of Science*. Student enrolment, appeals and graduation processing are handled by the School of Computing Science in the Faculty of Applied Sciences ([www.cs.sfu.ca](http://www.cs.sfu.ca)). Contact an advisor at [www.cs.sfu.ca/undergrad/Advising/](http://www.cs.sfu.ca/undergrad/Advising/)

## Computing Science and Philosophy Joint Major Program

The School of Computing Science and the Department of Philosophy co-operate in offering this joint major program. The administrative home is within the Faculty of Applied Sciences for purposes of student enrolment, appeals and graduation processing. Interested students should contact advisors in both departments.

### Lower Division Requirements

(50-55 units)

Students complete all of  
MATH 152-3 Calculus II  
MATH 232-3 Elementary Linear Algebra

and one of

MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I

and one of

BUEC 232-4 Data and Decisions I  
STAT 270-3 Introduction to Probability and Statistics

and one physical science course chosen from the physical sciences electives list for the computing science lower division requirements.

### Computing Science Requirements

Students complete all of  
CMPT 120-3 Introduction to Computing Science and Programming I\*  
CMPT 125-3 Introduction to Computing Science and Programming II\*  
CMPT 150-3 Introduction to Computer Design  
CMPT 225-3 Data structures  
CMPT 275-4 Software Engineering  
MACM 101-3 Discrete Mathematics I  
MACM 201-3 Discrete Mathematics II

\*\*CMPT 126 may be completed in lieu of CMPT 120 and 125

**Philosophy Requirements**

Students complete at least 16 units of lower division courses including one of

PHIL 100-3 Knowledge and Reality

PHIL 120-3 Introduction to Moral Philosophy

and one of

PHIL 150-3 History of Philosophy I

PHIL 151-3 History of Philosophy II

and all of

PHIL 201-3 Epistemology

PHIL 203-3 Metaphysics

PHIL 210-4 Deductive Logic

**Upper Division Requirements**

(44 units)

**Computing Science Requirements**

Students complete all of

CMPT 300-3 Operating Systems

CMPT 307-3 Data Structures and Algorithms

CMPT 310-3 Artificial Intelligence Survey

CMPT 354-3 Database Management Systems

and one of

CMPT 320-3 Implications of a Computerized Society

PHIL 320-3 Social and Political Philosophy

PHYS 321-3 Moral Issues and Theories

and one of

CMPT 383-3 Comparative Programming Languages

CMPT 384-3 Symbolic Computing

and one 400 division course from the Artificial

Intelligence concentration (see "Artificial Intelligence" on page 77)

and one 400 division courses from the theoretical

computing science concentration (see "Theoretical Computing Science" on page 78)

**Philosophy Requirements**

A total of 20 upper division philosophy units are required including

PHIL 341-3 Philosophy of Science

PHIL 343-3 Philosophy of Mind

PHIL 344-4 Philosophy of Language I

and at least one four-unit course at the 400 division.

**Other Requirements**

For a bachelor of arts degree from the Faculty of Arts and Social Sciences, students must fulfil the Faculty of Arts and Social Sciences requirements, such as the breadth requirements (see "Writing, Quantitative, and Breadth Requirements" on page 88).

For a bachelor of science degree from the Faculty of Applied Sciences, students must fulfil the Faculty of Applied Sciences requirements, such as the residency requirements (see "Residency Requirements" on page 76).

The University's writing, quantitative and breadth requirements must also be completed for either degree (see "Writing, Quantitative, and Breadth Requirements" on page 90).

**Co-operative Education**

Students are encouraged to enrol in this program.

**Information Systems in Business Administration and Computing Science Joint Major Program**

In co-operation with the Faculty of Business Administration, the School of Computing Science offers the Information Systems in Business Administration and Computing Science Joint Major Program. For course requirements see the Faculty of Business Administration's listing on page 148.

Upon completion, students may choose either a BBA (Faculty of Business Administration) or a BSc (Faculty of Applied Sciences) with the completion of MACM

316 and a course from tables I, II, or III (see "Upper Division Requirements" above), excluding CMPT 301, in addition to those listed in the Business Administration section for the joint major.

**Computing Science and Molecular Biology and Biochemistry Joint Honors Program**

See "Computing Science and Molecular Biology and Biochemistry Joint Honors Program" on page 202.

**Computing Science and Philosophy Joint Honors Program**

The School of Computing Science and the Department of Philosophy co-operate in offering this joint honors program. The administrative home is within the Faculty of Applied Sciences for purposes of student enrolment, appeals and graduation processing. Interested students should contact advisors in both departments.

At least 132 units is required for an honors degree.

**Lower Division Requirements**

(53-57 units)

In addition to completing the same lower division requirements as stipulated for the joint major in computing science and philosophy (see "Computing Science and Philosophy Joint Major Program" on page 80), students must also complete

CMPT 250-3 Introduction to Computer Architecture

**Upper Division Requirements**

(61 units)

**Computing Science Requirements**

In addition to completing the same lower division requirements as stipulated for the joint major in computing science and philosophy (see "Computing Science and Philosophy Joint Major Program" on page 80), students must also complete

CMPT 405-3 Design and Analysis of Computing Algorithms

Whereas the joint major stipulates that students must complete one 400 division course from the theoretical computing science concentration, joint honors students instead are required to complete any two additional 400 division CMPT course.

**Philosophy Requirements**

Students complete a total of 28 upper division

philosophy units including all of

PHIL 341-3 Philosophy of Science

PHIL 343-3 Philosophy of Mind

PHIL 344-3 Philosophy of Language I

PHIL 477-5 Honors Tutorial I

and one of

PHIL 322-3 History of Ethics

PHIL 331-3 Selected Topics

PHIL 332-3 Selected Topics

PHIL 333-3 Selected Topics

PHIL 350-3 Ancient Philosophy

PHIL 352-3 Seventeenth century Philosophy

PHIL 356-3 Century Philosophy

PHIL 357-3 Topics in the History of Philosophy

and one of

PHIL 444-4 Philosophy of Language II

PHIL 455-4 contemporary Issues in Epistemology and Metaphysics

and one four unit course at the 400 division.

**Other Requirements**

See "Other Requirements" on page 81 within the *Joint Major in Computing Science and Philosophy* for additional requirements.

**Mathematics and Computing Science Joint Honors Program**

With the Department of Mathematics, the School of Computing Science offers this joint honors program. For requirements see "Mathematics and Computing Science (MACM) Joint Major and Joint Honors Program" on page 199 in the Department of Mathematics section.

**Cognitive Science Program**

With the Departments of Linguistics, Philosophy and Psychology, the school contributes to the undergraduate program in cognitive science, leading to a BA. See "Cognitive Science Program" on page 98 for details.

**Management and Systems Science Program**

With the Department of Mathematics, the Department of Economics and the Faculty of Business Administration, the school contributes to the Management and Systems Science Program leading to a BSc. See "Management and Systems Science Program" on page 195 for requirements.

**Certificate in Computing Studies**

This program provides both part time and full time students with an opportunity to understand the fundamentals of computers and programming without necessarily specializing in computing science.

**Program Requirements**

(24-28 units)

A 2.00 grade point average is required on the CMPT courses that are used for graduation. Only courses completed at Simon Fraser University are used in this calculation.

**Required Courses**

Students complete one of\*

CMPT 125-3 Introduction to Computing Science and Programming II

CMPT 126-3 Introduction to Computing Science and Programming

and all of

CMPT 150-3 Introduction to Computer Design

CMPT 225-3 Data Structures and Programming

and one of

CMPT 275-4 Software Engineering I

CMPT 276-3 Introduction to Software Engineering

and one of

MACM 101-3 Discrete Mathematics I

MATH 240-3 Linear Algebra

STAT 270-3 Introduction to Probability and Statistics

\*to aid your choice, prior to enrolment, complete the self-evaluation test at [www.cs.sfu.ca/undergrad/Advising/120-126/](http://www.cs.sfu.ca/undergrad/Advising/120-126/)

**Elective Courses**

A total of nine elective units must be completed and must include two of the following lower division electives.

CMPT 110-3 Event-Driven Programming in Visual Basic

CMPT 165-3 Introduction to Multimedia and the Internet

CMPT 212-3 Object-Oriented Applications Design in C++

plus a three unit 300 or 400 division CMPT course.

## Post Baccalaureate Diploma in Computing Science

This program is for students who already possess a university degree. It includes studies in computing science at a more advanced level.

### Requirements

Students complete an approved program consisting of at least 30 units which include the following or equivalent.

CMPT 300-3 Operating Systems I

CMPT 307-3 Data Structures and Algorithms

CMPT 354-3 Database Systems and Structures

Students complete additional upper division courses to bring the total to at least 30 units. At least 24 units must be CMPT courses. Graduate courses may be included with permission of the school.

Courses must be selected in consultation with a program advisor to achieve a coherent program of study. The student is responsible for satisfying the prerequisites of program courses. This may entail completing more or all courses listed in the lower division requirements of the major in computing science (depending upon the student's prior transcript). Please contact an advisor at [www.cs.sfu.ca/undergrad/Advising/](http://www.cs.sfu.ca/undergrad/Advising/)

### Co-operative Education

Co-operative education is a system which combines work experience with academic studies. The student spends alternate terms on campus and in paid, study related jobs.

Arrangements for the work experiences are made through the school's co-op co-ordinators and the University's Co-operative Education. For further details, see "Co-operative Education" on page 212.

## School of Engineering Science

9801 Applied Science Building, 778.782.4371 Tel, 778.782.4951 Fax, [www.ensc.sfu.ca](http://www.ensc.sfu.ca)

### Director

M. Saif BSEE, MSEE, PhD (Cleveland), PEng

### Professors Emeriti

T.W. Calvert BSc(Eng) (Lond), MSEE (Wayne), PhD (Carnegie Tech), PEng

J.K. Cavers BAsC, PhD (Br Col), PEng

M. Saif BSc, MSc, PhD (Cleveland), PEng

S.P. Stapleton BEng, MEng, PhD (Carleton), PEng

M. Syrzycki MSc, PhD (Warsaw)

L. Trajkovic DiplElecEng (Pristina), MS (Syr), PhD (Calif)

R.G. Vaughan BE, ME (Cant), PhD (Aalborg), Sierra

Wireless Professorship in Mobile Communication

### Associate Professors

J.D. Jones BSc (Sus), PhD (Reading), PEng

D.C. Lee BS, BCEE (Maryland), MSc, PhD (MIT)

M. Moallem BSc (Shiraz, Iran), MSc (Sharif, Iran), PhD (C'dia), PEng

E.J. Park BAsC (Br Col), MAsC, PhD (Tor)

G. Wang BSc, MSc (Huazhong), PhD (Vic, BC), PEng

### Assistant Professors

S. Arzanpour BSc (Tehran), MAsC (Tor), PhD (Wat)

M. Bahrami BSc (Sharif, Iran), MAsC (Amirkabir), PhD (Wat)

B. Bahreyni BSc (Sharif, Iran), MSc, PhD (Manit)

I.V. Bajic BSc (Natal), MSEE, MSc, PhD (Rensselaer), PEng

M.F. Beg BTech (Kharagpur), MSBE (Boston), PhD (Johns H), PEng

B.L. Gray BSc (Rensselaer), MSc, PhD (Calif), PEng

E. Kjeang MSc (Umea), PhD (Vic, BC)

J. Liang BE, ME (Xi'an Jiaotong), ME (NU Singapore), PhD (Johns H), PEng

C. Menon BSc, MAsC, PhD (Padova)

S. Muidat BSc (Yarmouk), MSc (Wis), PhD (Wat)

P. Saeedi BSc (IranScTech), MSc, PhD (Br Col), PEng

M.V. Sarunic BAsC, MAsC (S Fraser), PhD (Duke)

L. Shannon BSc (New Br), MAsC, PhD (Tor)

### Adjunct Professors

H. Farhangi BSc (Tabriz), MSc (Brad), PhD (Manc)

A. Hajshirmohammadi BSc, MSc (Isfahan), PhD (Wat)

K. Kohli BSc (PglMER), MSc (Mag), PhD (Punj, India)

J.B. Kuo BS (Natnl Taiwan), MS (Ohio State), PhD (Stan)

W. New BS, MS, MBA (Stan), MD (Duke), PhD (Calif)

R. Rameshan BSc, MSc, PhD (Poona)

T. Randhawa BEng (Thapar IET), MSc (Sask), PhD (S Fraser)

S.F. Shamoun BSc (Mosul), MSc (N Carolina State), PhD (Arkansas)

### Associate Members

M. Donelan, Kinesiology

J.A. Hoffer, Kinesiology

M. Volker, University and Industry Liaison Office

J.M. Wakeling, Kinesiology

### Senior Lecturers

P. Leung BSEE (Texas Tech), PEng

L. One BSc (S Fraser)

S.A. Stevenson BA, MA (Br Col)

S. Whitmore BA (Nelson), MA (S Fraser)

### Lecturers

A. Hajshirmohammadi BSc, MSc (Isfahan), PhD (Wat), PEng

W.C. Scratchley BAsC (S Fraser), PhD (Car), PEng

M. Sjoerdma BSc, MSc (S Fraser)

### Advisors

Mr. A. Jenkins, Co-operative Education Advisor, 9701 Applied Science Building, 778.782.6703, [djenkins@sfu.ca](mailto:djenkins@sfu.ca)

Ms. H. Keeping, Co-operative Education Advisor, 9701 Applied Science Building, 778.782.6931, [heather\\_keeping@sfu.ca](mailto:heather_keeping@sfu.ca)

Dr. W.C. Scratchley BAsC (S Fraser), PhD (Car), Program Planning and Graduation Advisor, 10830 Applied Science Building, 778.782.4428, [ensc\\_advise\\_ak@sfu.ca](mailto:ensc_advise_ak@sfu.ca)

\*joint appointment with biomedical physiology and kinesiology

### Programs Offered

#### Engineering Science Program

This program leads to a BAsC or BAsC (Honors) degree.

#### Mechatronics Systems Engineering Program

This program, located at Simon Fraser University Surrey, leads to a BAsC or BAsC (Honors) degree.

#### Computer and Electronics Design Minor

This program is available to all non-engineering science majors at Simon Fraser University who have high academic standing. This program does not lead to an accredited engineering degree.

### Admission Requirements

#### Minimum Admission Requirements

Students must be eligible for University admission and must submit an application as described in the "Admission and Readmission" on page 17 or at [www.students.sfu.ca/admission/](http://www.students.sfu.ca/admission/)

Courses required: physics 12, mathematics 12, chemistry 12, and English 12. See "Admission and Readmission" on page 17 for complete admission requirements.

The program begins each fall. However, admitted students may enter in the spring or summer term. Engineering science admission inquiries may be sent by email to [ensc-adm@sfu.ca](mailto:ensc-adm@sfu.ca). More detailed admission information is available at [www.ensc.sfu.ca](http://www.ensc.sfu.ca).

#### External Transfer from Another Post-Secondary Institution

Students transferring from other universities, regional colleges, or technical institutions may apply to begin study in any term and must have an admission average of 2.5.

#### Internal Transfer from Another Simon Fraser University Program

Simon Fraser University students who wish to transfer to engineering science require a 2.5 CGPA from the Faculty of Science, School of Computing Science, Science One, TechOne programs on a full course load (minimum 12 units). Students transferring from any other Simon Fraser University faculty, school, or program must have a CGPA of 2.7 on a full course load (minimum 12 units).

#### Transfer Credit and Residency Requirements

Transfer students are advised that residency requirements apply to all programs offered by the School of Engineering Science. See "Residency Requirements" on page 76.

#### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfill writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and

Breadth Requirements” on page 7 and the school’s website ([www.ensc.sfu.ca](http://www.ensc.sfu.ca)) for more information. For students in engineering science, these university requirements are modified as follows.

- for students in the computer engineering, electronics engineering, systems engineering, and engineering physics options, the total number of Breadth-Social Sciences (B-Soc) and Breadth-Humanities (B-Hum) courses is reduced to three courses, with at least one course in each category
- for students in the biomedical engineering option, one course in each of the Breadth-Social Sciences (B-Soc) and Breadth-Humanities (B-Hum) categories may be waived
- the B-Sci requirements are waived for engineering science students who complete PHYS 125 and 126 instead of PHYS 120 and 121

In addition, the Canadian Engineering Accreditation Board (CEAB) requires that one complementary studies elective in the ENSC curriculum must be in the *Central Issue, Methodology, and Thought Process* category.

### Minimum Grade Requirement

A C- grade or better in prerequisite courses is required to register in engineering science courses.

## Engineering Science Major Program

Engineering science students develop skills in systems design with a high level of scientific knowledge. This demanding program is aimed at the superior student. The program produces well educated, innovative engineer/scientists with entrepreneurial skills and attitudes who are oriented to new technologies. Program entry is competitive.

Students must achieve both a cumulative grade point average (CGPA) and an upper division grade point average (UDGPA) of at least 3.00 to graduate from the honors program. The honors program requires an undergraduate thesis.

The general degree program requires a CGPA and UDGPA each of at least 2.0 in accordance with University graduation requirements.

Students undertake a basic core of pure, applied and engineering sciences followed by studies in a specialized option. The general BASc program may be completed in four years, which includes eight terms. A BASc (honors) typically requires an additional two terms for thesis completion.

There are five major areas of concentration where the faculty members’ research strengths are interrelated with the undergraduate curriculum. Students should select one of the following options: electronics engineering option, computer engineering option, engineering physics option, systems option and biomedical engineering option.

ENSC courses emphasize learning, conceptualization, design and analysis. Built into the program are courses on social impacts of technology, finance, management, design methods and entrepreneurship intended to complement scientific studies. A special, integrated communications course completed throughout the program ensures that all graduates have the communication skills necessary to be effective engineers.

### Co-operative Education Work Experience

Every student completes a co-op education program of at least three work terms. After the first year, students typically alternate between academic and work terms. The goal is a complementary

combination of work in an industrial or research setting and study in one of the engineering options.

At least two of the three mandatory work terms must be completed in industry (ENSC 195, 295, 395). Students may participate in additional work terms but are encouraged to seek diversity in their experience. The three mandatory work terms may include one special co-op term (ENSC 196, 296, 396). Special co-op may include, but is not restricted to, self-directed, entrepreneurial, service or research co-op work terms. Permission of the engineering science co-op office is required.

An optional non-technical work term (ENSC 194) is also available through the engineering science co-op education office and is often completed after the first two study terms. ENSC 194 does not count toward the mandatory three course requirement.

The engineering science co-op program will also seek opportunities for students wishing to complete their thesis requirements in an industrial setting.

### BASc Requirements

Requirements of one of the five options must be completed. Each provides basic science, general studies, engineering science, specialized engineering and science, plus project and laboratory work.

For an honors in any option, a capstone project (ENSC 440) and an undergraduate thesis (ENSC 498 and 499) must be completed.

For a general degree with any option other than engineering physics and biomedical engineering, a capstone project (ENSC 440) must be completed. The engineering physics and biomedical engineering options are honors programs only.

Graduation with BASc (honors) requires both a CGPA and an upper division grade point average (UDGPA) of at least 3.0.

Students complete a three term co-op education program of practical experience in an appropriate industrial or research setting leading to a project under the technical direction of a practising engineer or scientist. The internship may be within the University but in most cases the work site is off campus. A member of the external organization and a school faculty member jointly supervise the project.

Specialized study is completed in one of five options: electronics engineering, computer engineering, engineering physics, systems and biomedical engineering (see below).

Although there is no strict requirement to follow these course sequences, but completing less may lead to scheduling and prerequisite problems in subsequent terms. Failure to complete courses identified with an asterisk in the designated term will almost certainly lead to such problems. Any term with fewer than 15 units requires prior approval by the director.

This program’s general studies section consists of non-technical courses which broaden education and develop awareness of social, economic and managerial factors affecting engineering and scientific work. All units of the engineering communication course must be completed. In complementary studies, at least one course must deal with science and technology within society and one with central issues, methodologies and thought processes of humanities and social sciences. Other complementary studies courses may contain these subjects or may be chosen from business, arts, humanities and social sciences. Permission may be required from the appropriate department, school or faculty to enrol in some courses. A pre-approved complementary studies course list is available from the school. Other courses may be acceptable with undergraduate curriculum committee chair approval.

## Engineering Science Common Core Courses and Typical Schedule

### Term One (Fall)

CHEM 121-4 General Chemistry and Laboratory  
CMPT 128-3 Introduction to Computing Science and Programming for Engineers\*  
ENSC 100-3 Engineering Technology and Society\*  
ENSC 101-1 Writing Process, Persuasion and Presentations\*  
MATH 151-3 Calculus I<sup>1</sup>  
PHYS 120-3 Modern Physics and Mechanics\*,<sup>2</sup>

17 units

### Term Two (Spring)

Cmpl I-3 first complementary elective<sup>3</sup>  
ENSC 102-1 Form, Style and Professional Genres\*  
ENSC 150-3 Introduction to Computer Design\*  
MATH 152-3 Calculus II\*  
MATH 232-3 Elementary Linear Algebra\*  
PHYS 121-3 Optics, Electricity and Magnetism\*,<sup>2</sup>  
PHYS 131-2 General Physics Laboratory I\*

18 units

### Term Three (Fall)

CHEM 122-2 General Chemistry II (PM)  
CHEM 126-2 General Chemistry Laboratory II (PM)  
CHEM 180-3 The Chemistry of Life (B)  
CMPT 225-3 Data Structures and Programming (B, PM)  
ECON 103-4 Principles of Microeconomics (E,P,S)  
ENSC 215-3 Microcontroller/Assembly Programming  
ENSC 220-3 Electric Circuits I\*  
MACM 101-3 Discrete Mathematics I\* (C,S)  
MATH 251-3 Calculus III\*  
MATH 310-3 Introduction to Ordinary Differential Equations\*  
PHYS 211-3 Intermediate Mechanics\* (P)  
STAT 270-3 Introduction to Probability and Statistics\* (C,E) (C), (B) 18 units  
for (E), (P), (S), pre-med (PM) concentration 19 units

### Term Four (Summer)

BISC 101-4 General Biology\* (PM)  
CMPT 225-3 Data Structures and Programming\* (C,S)  
ENSC 204-1 Graphical Communication for Engineering\*  
ENSC 224-3 Electronic Devices\* (C,E)  
ENSC 225-4 Microelectronics I\*  
ENSC 250-3 Introduction to Computer Architecture\*  
ENSC 320-3 Electric Circuits II\* (B,C,E,P, PM)  
KIN 208-3 Introduction to Physiological Systems\* (B, PM)  
MATH 254-3 Vector and Complex Analysis\* (B,E,P)  
PHYS 221-3 Intermediate Electricity and Magnetism\* (S)  
STAT 270-3 Introduction to Probability and Statistics\* (P,S) 17 units  
for pre-med (PM) concentration 18 units

\*should be completed in the designated term; consequences of deviating from this schedule are the responsibility of the student.

Courses are only required by the program option that appears in parenthesis next to them: B (biomedical engineering option, except pre-med concentration), PM (biomedical engineering, pre-med concentration), C (computer engineering option), E (electronics engineering option), P (engineering physics option), and S (systems option). As an example, a student in the systems option in his or her third term would be expected to complete 18 units.

<sup>1</sup>students may complete MATH 150 in place of MATH 151

<sup>2</sup>PHYS 120 can be replaced by either PHYS 125 or 140; PHYS 121 can be replaced by either PHYS 126 or 141; students with credit for both PHYS 140 and 141 are not required to complete PHYS 131

<sup>3</sup>must be an approved course; a pre-approved list of complementary studies courses is available from the

School of Engineering Science; biomedical signals and instrumentation concentration (BI), and rehabilitation and assistive devices (RD) must complete an acceptable Breadth-Humanities course.

### Biomedical Engineering Option

This option concerns engineering problems encountered in medical and surgical treatment, in rehabilitation procedures and assistive devices, in medical electronics, in biomedical imaging, and in biophotonics.

#### Concentrations

The biomedical engineering option is available in one of three concentrations: rehabilitation and assistive devices (RD); biomedical signals and instrumentation (BI); and pre-medical (PM). A 3.0 grade point average is required to remain in these concentrations. The following elective courses are recommended in each concentration. Suggestions for additional electives for all concentrations are available at [www.ensc.sfu.ca](http://www.ensc.sfu.ca).

#### Biomedical Signals and Instrumentation Concentration (BI)

Students who choose this concentration will complete two of the following engineering science electives  
 ENSC 425-4 Electronic System Design  
 ENSC 429-4 Digital Signal Processing  
 ENSC 474-4 Biomedical Signal and Image Processing  
 ENSC 476-4 Biophotonics

The other two required ENSC electives may be constrained by the need to satisfy prerequisites for the two choices from the above four possible courses.

#### Pre-medical Concentration (PM)

Students who choose this concentration should consider completing the following science electives.  
 CHEM 281-4 Organic Chemistry I  
 MBB 231-3 Cellular Biology and Biochemistry  
 and two of the following complementary electives are strongly recommended.  
 ENGL 101W-3 Introduction to Fiction  
 ENGL 102W-3 Introduction to Poetry  
 ENGL 103W-3 Introduction to Drama  
 ENGL 104W-3 Introduction to Prose Genres

#### Rehabilitation and Assistive Devices Concentration (RD)

Students who choose this concentration should consider completing the following science elective  
 KIN 448-3 Rehabilitation of Movement Control  
 and the following engineering science electives  
 ENSC 387-4 Introduction to Electro-Mechanical Sensors and Actuators  
 ENSC 429-4 Digital Signal Processing<sup>1</sup>  
 ENSC 472-4 Rehabilitation Engineering and Assistive Devices

### Courses and Typical Schedule

The courses and typical schedule for the degree are listed below.

#### Term Five (Spring)

ENSC 304-1 Human Factors and Usability Engineering\*  
 ENSC 330-4 Engineering Materials  
 ENSC 370-3 Biomedical Engineering Directions\*  
 ENSC 380-3 Linear Systems\*  
 KIN 201-3 Biomechanics\*  
 MACM 316-3 Numerical Methods  
 PHYS 321-3 Intermediate Electricity and Magnetism (BI, RD)\*  
 for biomedical signals and instrumentation (BI) concentration, and for rehabilitation and assistive devices (RD) concentration 20 units  
 for pre-medical (PM) concentration 17 units

#### Term Six (Fall)

CHEM 282-2 Organic Chemistry II (PM)  
 CHEM 286-2 Organic Chemistry Laboratory II (PM)  
 Ensc I-4 first Engineering Science elective<sup>2</sup>

ENSC 383-4 Feedback Control Systems\*  
 KIN 308-3 Experiments and Models in Physiology  
 Scie I-3 first Science elective<sup>4</sup>  
 STAT 270-3 Introduction to Probability and Statistics  
 17 units  
 for pre-medical (PM) concentration 21 units

#### Term Seven (Spring)

Ensc II-4 second Engineering Science elective<sup>2</sup> (BI, RD)  
 ENSC 305-1 Project Documentation and Team Dynamics\*  
 ENSC 350-3 Digital Systems Design  
 ENSC 372-4 Biomedical Instrumentation\*  
 ENSC 406-2 Social Responsibility and Professional Practice\*  
 ENSC 440-4 Capstone Engineering Science Project  
 MBB 222-3 Molecular Biology and Biochemistry (PM)  
 18 units  
 pre-medical (PM) concentration 17 units

#### Term Eight (Fall)

GERO 300-3 Introduction to Gerontology (BI, RD)  
 Ensc II-4 second Engineering Science elective<sup>2</sup> (PM)  
 Ensc III-4 third Engineering Science elective<sup>3</sup>  
 Ensc IV-4 fourth Engineering Science elective<sup>3</sup> (BI, RD)  
 ENSC 201-3 The Business of Engineering  
 Scie II-3 second science elective<sup>4</sup> 17 units  
 pre-medical (PM) concentration 14 units

#### Term Nine (Spring)

Students in the Rehabilitation and Assistive Devices (RD) concentration or the Biomedical Signals and Instrumentation (BI) concentration will complete the following.  
 ENSC 498-3 Engineering Science Thesis Proposal  
 ENSC 499-9 Engineering Science Undergraduate Thesis  
 for biomedical signals and instrumentation (BI) concentration, and for rehabilitation and assistive devices (RD) concentration 12 units

Students in the pre-medical (PM) concentration will complete the following.  
 BISC 102-4 General Biology  
 Cmpl II-3 second complementary studies elective<sup>5</sup>  
 ENSC 374-4 Biomedical Image Acquisition  
 Ensc IV-4 fourth Engineering Science elective<sup>3</sup>  
 MBB 321-3 Intermediary Metabolism  
 pre-medical (PM) concentration 18 units

\*should be completed in the designated term; consequences of deviating from this schedule are the responsibility of the student.

<sup>1</sup>ENSC 428 has prerequisite that must be satisfied

<sup>2</sup>must be a 300 or 400 division ENSC course. The defined concentrations above set some constraints on selection of electives.

<sup>3</sup>must be a 400 division ENSC course. The concentration chosen will set some constraints on selection of electives.

<sup>4</sup>must be an approved course; consult pre-approved electives list available from the school. See separate notes for pre-medical option.

<sup>5</sup>see earlier notes for complementary studies courses

**Note:** In the typical schedule shown above, honors students will start their thesis work (ENSC 498 and 499) between terms seven and eight. This work can be done on or off campus, either integrated with an optional (or mandatory) work term or as independent work with appropriate supervision.

### Computer Engineering Option

The dynamic, on-going development and application of computer and digital systems requires computer systems engineers to have a balanced capability in software and hardware, and a solid engineering base.

### Courses and Typical Schedule

The courses and typical schedule for both general and honors are listed. The notation (G) is for general degree requirements only, while (H) is for requirements applying to the honors degree only. Courses without (G) or (H) designations are required of both the general and honors students.

#### Term Five (Spring)

CMPT 275-4 Software Engineering\*  
 MACM 201-3 Discrete Mathematics II\*  
 ENSC 304-1 Human Factors and Usability Engineering\*  
 ENSC 350-3 Digital Systems Design  
 ENSC 351-4 Real Time and Embedded Systems\*  
 ENSC 380-3 Linear Systems\* 18 units

#### Term Six (Fall)

ECON 103-4 Principles of Microeconomics  
 ENSC 325-4 Microelectronics II\*  
 ENSC 327-4 Communication Systems\*  
 ENSC 383-4 Feedback Control Systems\*  
 Scie I-3 first science elective<sup>3</sup> 18 units

#### Term Seven (Spring)

CMPT 300-3 Operating Systems I  
 Ensc I-4 first Engineering Science elective<sup>2</sup>  
 ENSC 305-1 Project Documentation and Team Dynamics\*  
 ENSC 406-2 Social Responsibility and Professional Practice\*  
 ENSC 440-4 Capstone Engineering Science Project  
 MACM 316-3 Numerical Analysis I 17 units

#### Term Eight (Fall)

Cmpl II-3 second complementary studies elective<sup>1</sup>  
 Ensc II-4 second Engineering Science elective<sup>2</sup>  
 ENSC 201-3 The Business of Engineering  
 ENSC 450-4 VLSI Systems Design  
 Scie II-3 second science elective<sup>3</sup> 17 units

#### Additional Requirements for Honors

ENSC 498-3 Engineering Science Thesis Proposal (H)  
 ENSC 499-9 Engineering Science Undergraduate Thesis (H)

\*should be completed in the designated term. Consequences of deviating from this schedule are the responsibility of the student.

<sup>1</sup>must be an approved course. A pre-approved list of complementary studies courses is available from the School of Engineering Science.

<sup>2</sup>chosen from ENSC 424, 425, 426, 427, 428, 429, 452, 472, 474, 476, 481, 483, 488, 489, 495. Special topics courses in the 400 division that have been approved by the undergraduate curriculum committee chair and the director can be counted here. With permission of the undergraduate curriculum committee chair, students may replace one engineering science elective with an engineering science directed studies course or a special project laboratory course. Such replacements for an engineering science elective must have four units and be 400 division courses.

<sup>3</sup>must be an approved course; consult the pre-approved electives list available from the school. Under special circumstances, approval for other courses from the undergraduate curriculum committee chair may be granted.

**Note:** In the typical schedule shown above, honors students will start their thesis work (ENSC 498 and 499) between terms seven and eight. This work can be done on or off campus, either integrated with an optional (or mandatory) work term or as independent work with appropriate supervision.

### Electronics Engineering Option

This specialization within electrical engineering directly relates to microelectronics and its applications in communications, control and computing. Engineers

in this field design and fabricate systems utilizing electronic components and subsystems.

### Courses and Typical Schedule

The courses and typical schedule for both the general degree and the honors degree are listed below. The notation (G) is used for requirements applying to the general degree only, while the notation (H) is used for requirements applying to the honors degree only. Courses without (G) or (H) designations are required of both the general and honors students.

#### Term Five (Spring)

ENSC 304-1 Human Factors and Usability Engineering\*  
ENSC 330-4 Engineering Materials  
ENSC 350-3 Digital Systems Design  
ENSC 351-4 Real Time and Embedded Systems\*  
ENSC 380-3 Linear Systems\*  
PHYS 321-3 Intermediate Electricity and Magnetism\* 18 units

#### Term Six (Fall)

ENSC 325-4 Microelectronics II\*  
ENSC 327-4 Communication Systems\*  
ENSC 383-4 Feedback Control Systems\*  
PHYS 421-3 Electromagnetic Waves\*  
Scie I-3 science elective<sup>3</sup> 18 units

#### Term Seven (Spring)

ENSC 305-1 Project Documentation and Team Dynamics\*  
Ensc I-4 first Engineering Science elective<sup>2</sup>  
Ensc II-4 second Engineering Science elective<sup>2</sup>  
ENSC 406-2 Social Responsibility and Professional Practice\*  
ENSC 440-4 Capstone Engineering Science Project  
MACM 316-3 Numerical Analysis I 18 units

#### Term Eight (Fall)

Cmpl II-3 second complementary studies elective<sup>1</sup>  
Ensc III-4 third Engineering Science elective<sup>2</sup>  
Ensc IV-4 fourth Engineering Science elective<sup>2</sup>  
Ensc V-4 fifth Engineering Science elective<sup>2</sup> (G)  
ENSC 201-3 The Business of Engineering  
Tech I-3 technical (computing science, science or math) elective<sup>3</sup> (H)

#### Additional Requirements for Honors

ENSC 498-3 Engineering Science Thesis Proposal (H)  
ENSC 499-9 Engineering Science Undergraduate Thesis (H)

\*should be completed at this point in the program; consequences of deviations from this schedule are the responsibility of the student.

<sup>1</sup>must be an approved course. A pre-approved list of complementary studies courses is available from the School of Engineering Science.

<sup>2</sup>chosen from ENSC 424, 425, 426, 427, 428, 429, 450, 452, 472, 474, 476, 481, 483, 488, 489, 495. Special topics courses in the 400 division that have been approved by the undergraduate curriculum committee chair and the director can be counted here. With permission of the undergraduate curriculum committee chair, students may replace one engineering science elective with an engineering science directed studies course or a special project laboratory course. Such replacements for an engineering science elective must have four units and be 400 division courses.

<sup>3</sup>must be an approved course; consult the pre-approved electives list available from the school. Under special circumstances, approval for other courses from the undergraduate curriculum committee chair may be granted.

**Note:** In the typical schedule shown above, thesis work (ENSC 498 and 499) starts between terms seven and eight and can be done on or off campus, either integrated with an optional (or mandatory) work term or as independent work with supervision.

### Engineering Physics (Electronics) Option

This option prepares for work in engineering, applied sciences and is strongly dependent on a sound knowledge of physics and engineering fundamentals.

#### Courses and Typical Schedule

The courses and typical schedule for the honors degree are listed below. The engineering physics option is not available through the general degree.

#### Term Five (Spring)

ENSC 304-1 Human Factors and Usability Engineering\*  
ENSC 351-4 Real Time and Embedded Systems\*  
ENSC 380-3 Linear Systems\*  
PHYS 233-2 Introductory Physics Laboratory A\*  
PHYS 321-3 Intermediate Electricity and Magnetism\*  
PHYS 344-3 Thermal Physics  
PHYS 365-3 Semiconductor Device Physics 19 units

#### Term Six (Fall)

ENSC 325-4 Microelectronics II\*  
ENSC 327-4 Communication Systems\*  
ENSC 383-4 Feedback Control Systems\*  
PHYS 385-3 Quantum Physics  
PHYS 421-3 Electromagnetic Waves\* 18 units

#### Term Seven (Spring)

ENSC 305-1 Project Documentation and Team Dynamics\*  
ENSC 406-2 Social Responsibility and Professional Practice\*  
ENSC 440-4 Capstone Engineering Science Project  
Ensc I-4 first Engineering Science elective<sup>2</sup>  
Ensc II-4 second Engineering Science elective<sup>2</sup>  
Cmpl II-3 second complementary elective<sup>1</sup> 18 units

#### Term Eight (Fall)

Ensc III-4 third Engineering Science elective<sup>2</sup>  
ENSC 201-3 The Business of Engineering  
PHYS 332-3 Optics Laboratory  
PHYS 384-3 Methods of Theoretical Physics  
PHYS 455-3 Modern Optics  
Phys 4XX-3 physics elective 19 units

#### Other Requirements

ENSC 498-3 Engineering Science Thesis Proposal  
ENSC 499-9 Engineering Science Undergraduate Thesis

\*should be completed in the designated term; consequences of deviating from this schedule are the responsibility of the student.

<sup>1</sup>must be an approved course. A pre-approved list of complementary studies courses is available from the School of Engineering Science.

<sup>2</sup>chosen from ENSC 424, 425, 426, 427, 428, 429, 450, 452, 472, 474, 476, 481, 483, 488, 489, 495. Special topics courses in the 400 division that are approved by the undergraduate curriculum committee chair and the director can be counted here. With undergraduate curriculum committee chair approval, students may replace one engineering science elective with an engineering science directed studies course or a special project laboratory course. Such replacements for an engineering science elective must have four units and be 400 division courses.

**Note:** In the typical schedule shown above, thesis work (ENSC 498 and 499) starts between terms seven and eight and can be done on or off campus, either integrated with an optional (or mandatory) work term or as independent work with supervision.

### Systems Option

This option prepares students for careers in design and integration of computer-controlled machines, and for graduate study in robotics, control and mechatronic systems. Students integrate knowledge from electronic engineering, mechanical engineering, and computer engineering into the fundamental design process. This focused program includes study

of mechanical structures and mechanisms, electro-mechanical sensors and actuators, control engineering, and real-time systems. Electives may be used to tailor curriculum to specific interests.

#### Courses and Typical Schedule

The courses and typical schedule for both the general degree and the honors degree are listed below. The notation (G) is used for requirements applying to the general degree only, while the notation (H) is used for requirements applying to the honors degree only. Courses without (G) or (H) designations are required of both the general and honors students.

#### Term Five (Spring)

ENSC 230-4 Introduction to Mechanical Design\*  
ENSC 304-1 Human Factors and Usability Engineering\*  
ENSC 320-3 Electric Circuits II\*  
ENSC 330-4 Engineering Materials  
ENSC 351-4 Real Time and Embedded Systems\*  
ENSC 380-3 Linear Systems\* 19 units

#### Term Six (Fall)

Cmpl II-3 second complementary elective<sup>1</sup>  
ENSC 325-4 Microelectronics II\*  
ENSC 383-4 Feedback Control Systems\*  
ENSC 387-4 Introduction to Electromechanical Sensors and Actuators\*  
Scie I-3 science elective<sup>3</sup> 18 units

#### Term Seven (Spring)

Ensc I-4 first Engineering Science elective<sup>2</sup>  
ENSC 305-1 Project Documentation and Team Dynamics\*  
ENSC 406-2 Social Responsibility and Professional Practice\*  
ENSC 440-4 Capstone Engineering Science Project  
ENSC 483-4 Modern Control Systems\*  
MACM 316-3 Numerical Analysis I 18 units

#### Term Eight (Fall)

ENSC 201-3 The Business of Engineering  
ENSC 488-4 Introduction to Robotics\*  
ENSC 489-4 Computer Aided Design and Manufacturing\*  
Ensc II-4 second Engineering Science elective<sup>2</sup> 15 units

#### Additional Requirements for Honors

ENSC 498-3 Engineering Science Thesis Proposal (H)  
ENSC 499-9 Engineering Science Undergraduate Thesis (H)

\*should be completed in the designated term; consequences of deviating from this schedule are the responsibility of the student.

<sup>1</sup>must be an approved course. A pre-approved list of complementary studies courses is available from the School of Engineering Science.

<sup>2</sup>chosen from ENSC 424, 425, 426, 427, 428, 429, 450, 481, 483, 488, 489, 495. Special topics courses in the 400 division that have been approved by the undergraduate curriculum committee chair and the director can be counted here. With permission of the undergraduate curriculum committee chair, students may replace one engineering science elective with an engineering science directed studies course or a special project laboratory course. Such replacements for an engineering science elective must have four units and be 400 division courses.

<sup>3</sup>must be an approved course; consult the pre-approved electives list available from the school. Under special circumstances, approval for other courses from the undergraduate curriculum committee chair may be granted.

**Note:** In the typical schedule shown above, thesis work (ENSC 498 and 499) starts between terms seven and eight and can be done on or off campus, either integrated with an optional (or mandatory) work term or as independent work with supervision.

## Mechatronics Systems Engineering Major Program

This major program, located at Simon Fraser University Surrey, leads to a BASc degree. Students complete a total of 146 units as follows.

### Courses and Typical Schedule

Complete the following asterisk\* courses in the term indicated. The consequences of deviating from this schedule are the responsibility of the student.

#### Term One (Fall)

Students complete all of  
 CMPT 128-3 Introduction to Computing Science and Programming for Engineers\*  
 MATH 151-3 Calculus I\*<sup>1</sup>  
 PHYS 140-4 Studio Physics – Mechanics and Modern Physics  
 TECH 106-3 Spatial Thinking and Communicating  
 TECH 114-3 Technology in Everyday Contexts  
 and one of  
 CHEM 120-3 General Chemistry I  
 CHEM 121-4 General Chemistry and Laboratory I  
 19 or 20 units

#### Term Two (Spring)

Students complete all of  
 Cmpl I-3 first complementary elective\*  
 ENSC 182-3 Mechatronics Design I\*  
 MATH 152-3 Calculus II\*  
 MATH 232-3 Elementary Linear Algebra  
 PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism\*  
 TECH 101-3W Communication, Teamwork and Collaborative Process  
 19 units

#### Term Three (Fall)

Students complete all of  
 Cmpl II-3 second complementary elective\*  
 ENSC 220-3 Electric Circuits I  
 ENSC 231-3 Engineering Materials  
 ENSC 281-3 Statics and Strength of Materials\*  
 MATH 251-3 Calculus III\*  
 MATH 310-3 Introduction to Differential Equations  
 18 units

#### Term Four (Spring)

Students complete all of  
 ENSC 226-4 Electronic Circuits\*  
 ENSC 282-3 Kinematics and Dynamics of Rigid Bodies and Mechanisms\*  
 ENSC 283-3 Introduction to Fluid Mechanics\*  
 ENSC 380-3 Linear Systems\*  
 MACM 316-3 Numerical Analysis I  
 PHYS 231-3 Physics Laboratory II\*  
 19 units

#### Term Five (Fall)

Students complete all of  
 ENSC 311-3 The Business of Engineering I: Fundamentals\*  
 ENSC 329-4 Introduction to Digital Logic\*  
 ENSC 381-3 Systems Modelling and Simulation\*  
 ENSC 382-3 Machine Design\*  
 PHYS 344-3 Thermal Physics\*  
 ENSC 387-4 Introduction to Electromechanical Sensors and Actuators\*<sup>2</sup>  
 20 units

<sup>1</sup>students may complete MATH 150 in place of MATH 151

<sup>2</sup>must be an approved course; a pre-approved list of complementary studies courses is available from the School of Engineering Science

#### Term Six (Summer)

Students complete all of  
 ENSC 312-3 The Business of Engineering II: Applications and Commercialization\*  
 ENSC 331-3 Introduction to MEMS\*  
 ENSC 332-4 Microprocessors and Interfacing\*  
 ENSC 383-4 Feedback Control Systems\*<sup>3</sup>  
 ENSC 384-4 Mechatronics Design II\*<sup>3</sup>  
 18 units

<sup>3</sup>strongly recommended to be completed concurrently

#### Term Seven (Spring)

Students complete all of  
 ENSC II-4 second Engineering Science elective\*  
 ENSC 305-1 Project Documentation and Team Dynamics  
 ENSC 451-4 Real Time and Embedded Systems\*  
 ENSC 441-3 Capstone Design Technical Project I\*  
 ENSC I-4 First Engineering elective<sup>3</sup>  
 16 units

<sup>4</sup>chosen from a list of ENSC approved courses. With permission of the undergraduate curriculum committee chair, students may replace one engineering science elective with either a directed study or a special project laboratory course. Special topics courses that have been approved by the undergraduate curriculum committee chair and the director may be counted here.

#### Term Eight (Summer)

Students complete all of  
 ENSC 406-2 Engineering Ethics, Law and Professional Practice  
 ENSC 442-3 Capstone Design Technical Project II\*  
 ENSC 484-4 Industrial Control Systems\*  
 ENSC IV-4 fourth Engineering Science elective<sup>3</sup>  
 ENSC III-4 third Engineering Science elective<sup>3</sup>  
 17 units

<sup>4</sup>chosen from a list of ENSC approved courses. With undergraduate curriculum committee chair permission, students may replace one engineering science elective with either a directed study or a special project laboratory course. Special topics courses that have been approved by the undergraduate curriculum committee chair and the director may be counted here.

## Mechatronics Systems Engineering Honors Program

This honors program at the Surrey campus leads to a BASc (honors). Students complete 156 units which includes the same requirements as the mechatronics systems engineering major program (see "Mechatronics Systems Engineering Major Program" on page 86) and the following courses.

ENSC 498-3 Engineering Science Thesis Proposal  
 ENSC 499-9 Engineering Science Undergraduate Thesis

## Computer and Electronics Design Minor Program

### Admission Requirements

Entrance is open to all non-engineering science majors. Apply by letter to the school's admissions chair after completing a minimum of 15 units, including CMPT 150 or ENSC 150, with a cumulative GPA of at least 2.4. Enrolment is limited.

### Program Requirements

This program consists of computer engineering option and the electronics engineering option courses.

Students complete all of  
 ENSC 150-3 Introduction to Computer Design  
 ENSC 215-3 Microcontroller Interfacing and Assembly-Language Programming  
 ENSC 220-3 Electric Circuits I  
 ENSC 250-3 Introduction to Computer Architecture  
 ENSC 305-1 Project Documentation and Group Dynamics  
 ENSC 320-3 Electric Circuits II  
 ENSC 380-3 Linear Systems  
 ENSC 440-3 Capstone Engineering Science Project  
 plus at least one of  
 ENSC 225-4 Microelectronics I  
 ENSC 351-4 Real time and Embedded Systems

plus at least three, and no more than five (students cannot count the same course twice) of the following  
 ENSC 225-4 Microelectronics I  
 ENSC 325-4 Microelectronics II  
 ENSC 327-4 Communication Systems  
 ENSC 350-3 Digital Systems Design  
 ENSC 351-4 Real Time and Embedded Systems  
 ENSC 424-4 Multimedia Communications Engineering  
 ENSC 425-4 Electronic System Design  
 ENSC 427-4 Communication Networks  
 ENSC 429-4 Discrete Time Systems  
 ENSC 450-4 VLSI Systems Design  
 ENSC 489-4 Computer Aided Design and Manufacturing  
 ENSC 495-4 Introduction to Microelectronic Fabrication

The engineering science graduation GPA in the above courses must be 2.4 or better. If it drops below 2.4, the student may be required to withdraw.

## General Studies Program

9861 Applied Sciences Building, 778.782.4724 Tel,  
 778.782.5802 Fax, <http://fas.sfu.ca/programs/bgs>

### Advisor

Ms. M. Trautman BA, MEd (S Fraser), 778.782.8795

## Major Program

The non-specialist bachelor of general studies (applied sciences) degree offers a broad education with an applied orientation, and is available as a general applied sciences option or a double minor option.

### Admission Requirements

Faculty of Applied Sciences students may apply for admission to the general applied sciences option or the double minor option at any time. Students in other faculties may apply for the double minor option upon acceptance into two qualifying minors by the schools or departments concerned.

Limited spaces are available for students transferring to the general applied sciences option from other faculties. Admission is competitive, based on a GPA in upper division applied sciences courses. At least nine units of upper division applied sciences courses with a 2.25 GPA is required for admission.

Enrolment in the upper division courses of a particular school may be limited to those bachelor of general studies students who also meet the admission standards of that school. Admission to the BGS program may not be used to bypass the enrolment limitations of any other applied sciences program.

### Program Requirements

Students complete 120 units overall for the degree, including 45 upper division units. A 2.00 graduation CGPA and UD GPA is required.

### General Applied Sciences Option

Students complete 30 upper division Faculty of Science and Faculty of Applied Sciences units subject to the following.

- no more than nine units of these courses may be from the Faculty of Science
- Faculty of Applied Sciences residency requirements must be satisfied. See "Residency Requirements" on page 76.
- a 2.00 GPA is required on the courses used for the general applied sciences option.

For this requirement, MACM courses are counted as School of Computing Science courses.

**Double Minor Option**

Students may satisfy the double minor option by completing two minors (or extended minors), at least one of which must be in the Faculty of Applied Sciences.

## Geographic Information Science Program

9861 Applied Sciences Building

**Advisor**

Ms. M. Trautman BA, MEd (S Fraser),  
778.782.8795 Tel

Ms. R. Multani, 7126 Robert C. Brown Hall,  
778.782.4529 Tel

The School of Computing Science and the Department of Geography offers a major and honors leading to a bachelor of science.

**Admission Requirements**

Entry is via direct admission from high school, direct transfer from a recognized post-secondary institution, or internal transfer from within Simon Fraser University. Admission is competitive. A separate admission average for each entry route is established each term depending on available spaces and subject to the approval of the Dean of Applied Sciences.

Admission averages and calculations for direct program admission (from high school or post-secondary) are the same as the major program. Internal transfers are assessed on the lower division requirements GPA (see below). Only Simon Fraser University courses are used in GPA calculation. Grades from all course attempts (including repeats) are used equally to calculate the average. Apply anytime after at least 18 Simon Fraser University lower division units (100 or 200 division courses) are completed, and all 100 division requirements (completed at either Simon Fraser University or a BC community college) have been satisfied.

Students must maintain a 2.5 cumulative grade point average (CGPA) to remain in the program.

**Writing, Quantitative, and Breadth Requirements**

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7.

**Major Program****Lower Division Requirements**

Students complete all of  
CMPT 120-3 Introduction to Computing Science and Programming I  
CMPT 125-3 Introduction to Computing Science and Programming II  
CMPT 225-3 Data Structures and Programming  
GEOG 100-3 Human Geography I  
GEOG 111-3 Earth Systems  
GEOG 250-3 Cartography I  
GEOG 253-3 Aerial Photographic Interpretation  
GEOG 255-3 Geographical Information Science I

MACM 101-3 Discrete Mathematics I  
MACM 201-3 Discrete Mathematics II  
MATH 151-3 Calculus I  
MATH 152-3 Calculus II  
MATH 232-3 Applied Linear Algebra

and one of  
GEOG 213-3 Introduction to Geomorphology  
GEOG 214-3 Climate and Environment  
GEOG 215-3 Biogeography  
GEOG 221-3 Economic Geography  
GEOG 241-3 Social Geography  
GEOG 261-3 Introduction to Urban Geography

and one of  
GEOG 251-3 Quantitative Geography  
STAT 270-3 Introduction to Probability and Statistics (45 units)

**Upper Division Requirements**

Students complete all of  
CMPT 307-3 Data Structures and Algorithms  
CMPT 354-3 Database Systems I  
CMPT 361-3 Introduction to Computer Graphics

and one of  
CMPT 300-3 Operating Systems I  
CMPT 363-3 User Interface Design  
CMPT 371-3 Data Communications and Networking  
CMPT 384-3 Symbolic Computing

and three of  
GEOG 351-4 Cartography and Visualization  
GEOG 352-4 Spatial Analysis  
GEOG 353-4 Remote Sensing  
GEOG 355-4 Geographical Information Science II

and two of  
CMPT 406-3 Computational Geometry  
CMPT 412-3 Computational Vision  
CMPT 454-3 Database Systems II  
CMPT 461-3 Image Synthesis  
CMPT 470-3 Web-based Information Systems

and two of  
GEOG 451-4 Spatial Modelling  
GEOG 453W-4 Remote Sensing of Environment  
GEOG 455-4 Theoretical and Applied GIS

and four additional upper division units in physical or human geography. Students should consult with the program advisor in choosing these units.

and three additional upper division units in CMPT or MACM courses. (45 units)

**Honors Program****Lower Division Requirements**

CMPT 120-3 Introduction to Computing Science and Programming I  
CMPT 125-3 Introduction to Computing Science and Programming II

CMPT 470-3 Web-based Information Systems

and two of  
GEOG 451-4 Spatial Modelling  
GEOG 453W-4 Remote Sensing of Environment  
GEOG 455-4 Theoretical and Applied GIS

and four additional upper division units in physical or human geography. Students should consult with the geography program advisor when choosing these units. (58 units)

Admission, continuation and graduation are contingent upon maintaining 3.00 or better on all relevant grade point averages (cumulative GPA, upper division GPA, computing science GPA, computing science upper division GPA, geography GPA, geography upper division GPA).

**Co-operative Education**

Students are strongly encouraged to enrol in co-operative education. Geographic information science students will be in great demand while still completing the program. The number of co-op posting requests exceeds the supply by a large margin. Co-op employers are actively seeking students with broad GIS skills, especially programming, database management, and statistics, in addition to substantive knowledge in geography and resource management.

## Undergraduate Degrees Offered

bachelor of arts (honors)  
bachelor of arts (joint honors)  
bachelor of arts  
bachelor of general studies

## Diplomas and Certificates Offered

certificate in African studies  
certificate in Chinese studies  
certificate in sustainable community development  
certificate in criminology (general)  
certificate in criminology (advanced)  
certificate in ethnic and intercultural relations  
certificate in explorations in the arts and social sciences  
certificate in family studies  
certificate in First Nations studies research  
certificate in First Nations language proficiency  
certificate in French Canadian studies  
certificate in French language proficiency  
certificate in German studies  
certificate in Hellenic studies  
certificate in Italian studies  
certificate in labor studies  
certificate in liberal arts  
certificate in religious studies  
certificate for senior citizens  
certificate in Spanish language  
certificate in spatial information systems  
certificate in teaching ESL linguistics  
certificate in urban studies  
post baccalaureate diploma  
post baccalaureate diploma in criminology  
post baccalaureate diploma in First Nations studies  
post baccalaureate diploma in French and education  
post baccalaureate diploma in gerontology  
post baccalaureate diploma in humanities  
post baccalaureate diploma in legal studies  
post baccalaureate diploma in social policy issues  
post baccalaureate diploma in sustainable community development  
post baccalaureate diploma in teaching English as a second language

## Program Enrichment

International Activities (see page 90)

Co-operative Education (see page 90)

## Student Responsibility

It is the responsibility of each student to be aware of faculty regulations as stated in this Calendar. Departmental and faculty advisors and staff are available for advice and guidance. However, the

ultimate responsibility for completeness and correctness of course selection, for compliance with and completion of program and degree requirements and for observance of regulations and deadlines rests with the student.

## Academic Advice

Each department in the Faculty of Arts and Social Sciences provides an advisory service to assist students in planning their program and course selection to satisfy degree requirements. Students who have declared a program (major, joint major, honors, extended minor, minor) in one of our departments should avail themselves of these services. Students who are registered in the bachelor of arts who have not yet declared a program, but have completed 60 units and students in the bachelor of general studies should seek advice from the faculty advisors in Arts Central (AQ 3020).

Students in all programs leading to Faculty of Arts and Social Sciences bachelor's degrees must consult an advisor

- prior to first enrolment at Simon Fraser University, and
- during that term when they are completing their 45th unit, and
- during that term when they are completing their 90th unit

Students in certificate and post baccalaureate diploma programs are governed by the requirements of the specific programs.

## Transfer into the Faculty of Arts and Social Sciences

Students currently enrolled in other Simon Fraser University Faculties must have a 2.0 grade point average, or greater, to enter the Faculty of Arts and Social Sciences (FASS).

Students who withdraw, or are required to withdraw, while in the FASS and are subsequently readmitted to the University will be permitted to re-enter the FASS, even though their Simon Fraser University cumulative grade point average is less than 2.00.

Students in Science One and Tech One may not transfer into the FASS until the end of the second term following their admission to the Science One or Tech One programs.

## Course Regulations

Students may count any Simon Fraser University course for which credit is received toward the bachelor of arts (BA), bachelor of fine arts (BFA), or bachelor of general studies (BGS) degrees with the exceptions of co-operative education courses, FAL X99 and FAN X99, EDUC 401, 402, 405 and 406.

Only the first five course duplications will count toward any degree completed in the Faculty of Arts and Social Sciences. See "Limits on Repeated Courses" on page 27.

A maximum of nine units completed through the Tri-Education Summer Institute may be used toward a Faculty of Arts and Social Sciences degree or post baccalaureate program.

Upper division courses completed within a BA, BFA or BGS can be used to satisfy the requirements of only one program. For example, upper division courses used to satisfy the upper division requirements of a major cannot be used to also satisfy the upper division requirements of a minor.

## Letters of Permission

Please see "Courses at Other Institutions/Letters of Permission" on page 28 and visit [www.sfu.ca/arts/current/LOP.html](http://www.sfu.ca/arts/current/LOP.html) for important information regarding letter of permission requests.

## Bachelor of Arts Program

Students can meet the bachelor of arts requirements through one of the following five options: a major program, a joint major program, two extended minor programs, an honors program, or a joint honors program. In addition to the degree requirements set out below, students may also fulfil the requirements for one or more additional extended minor(s) or minor(s).

## Residency and Transfer Credit Regulations

Students may use up to 60 units of transfer credit towards their Simon Fraser University degree. Students must complete a minimum of 60 units at Simon Fraser University, including at least 30 upper division Simon Fraser University units. No more than 15 upper division units can be completed outside of Simon Fraser University toward a major. In the case of a minor, a minimum of seven upper division units (eight upper division units for psychology) must be completed at Simon Fraser University.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements in their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for more information. Please note that the Faculty of Arts and Social Sciences BA and BFA students must complete 12 additional breadth units rather than the normal University regulation of six additional breadth units. Additional breadth units must be from outside the student's major and may or may not be B-designated (B-Hum, B-Soc, B-Sci courses). Students choosing to complete the BA degree with a joint major, joint honors, double major, or two extended minors may satisfy the breadth requirements (designated or not designated) with courses completed in either one or both disciplines.

## Major Program

To concentrate in a subject area, students may complete a major consisting of at least 30 upper division units in that subject area. A major provides a strong subject background and is preparation for a range of occupations, or for further study following graduation. The major program is the most common option chosen by students pursuing a BA degree.

At least 120 units are required, which include:

- at least 65 units in Faculty of Arts and Social Sciences subjects
- at least 45 upper division units, including at least 30 upper division units in a Faculty of Arts and Social Sciences major program; no more than 15 upper division units transferred from another institution may be used toward the requirements for a major
- lower division requirements for at least one Faculty of Arts and Social Sciences major
- satisfaction of the Faculty of Arts and Social Sciences writing, quantitative, and breadth requirements (see above)

**Note:** A department may designate up to eight units of program-related upper division courses offered by other departments as being acceptable in fulfilling part of the required units in a major program.

### Joint Major Program

A joint major is a combination of two subject areas. Students complete at least 20 upper division units in each of the two joint major subject areas. Students are advised to check individual department listings for possible additional requirements.

A joint major provides preparation for a range of occupations, or for further study following graduation.

At least 120 units are required, which include:

- at least 65 units in Faculty of Arts and Social Sciences subjects
- at least 45 units in upper division courses, which must include at least 20 upper division units in each of the two joint major subjects; no more than 15 upper division units transferred from another institution can be used toward this requirement
- lower division prerequisites for both joint major programs
- satisfaction of the Faculty of Arts and Social Sciences writing, quantitative and breadth requirements (see above)

**Note:** Students choosing to complete two separate majors (double major) will complete two major programs, with at least one major subject in the Faculty of Arts and Social Sciences. Therefore, students will complete at least 30 units of upper division courses in each of the two major subjects.

**Students completing two majors will graduate with one BA degree.**

### Extended Minor Program

Students wishing to prepare themselves in two subject areas, but not desiring to undertake a major or a joint major program, may complete an extended minor program consisting of two extended minors for the BA degree.

An extended minor consists of the lower division requirements for a major, plus the upper division requirements for a minor. At least seven upper division units counted toward this requirement must be completed at Simon Fraser University.

At least 120 units are required, which include:

- at least 65 units in Faculty of Arts and Social Sciences subjects
- at least 45 upper division units, including 30 units in two extended minor programs (at least 15 upper division units in each of two extended minor programs); at least seven upper division units (eight units for psychology) must be completed at Simon Fraser University toward an extended minor.
- lower division requirements for at least two extended minor programs; the requirements for an extended minor program are the same as the lower division requirements for a major program
- satisfaction of the Faculty of Arts and Social Sciences writing, quantitative and breadth requirements (see above)

**Note:** There are programs which have individually defined extended minors, but no majors. Students declaring this option must obtain approval from the advisors in their two extended minor departments, as well as the approval of the faculty advisor.

### Minor Program

All Faculty of Arts and Social Sciences minor programs require at least 15 upper division units within a single discipline unless otherwise specified in the Calendar. At least seven upper division units counted towards this requirement must be completed at Simon Fraser University.

### Honors Program

At least 132 units are required, which include:

- at least 65 units in Faculty of Arts and Social Sciences subjects
- at least 60 units in upper division courses, which must include at least 50 units in upper division courses in a Faculty of Arts and Social Sciences honors program; no more than 15 upper division units transferred from another institution can be used toward this requirement
- lower division prerequisites for at least one Arts and Social Sciences honors program
- satisfaction of the Faculty of Arts and Social Sciences writing, quantitative and breadth requirements (see above)

**Note:** A department may designate up to 12 units of program-related upper division courses offered by other departments as being acceptable in fulfilling part of the required upper division units in the honors program.

### Joint Honors Program

At least 132 units are required, which include:

- at least 65 units in Faculty of Arts and Social Sciences subjects
- at least 60 upper division units which must include at least 28 in upper division courses in each of the two honors subjects; no more than 15 upper division units transferred from another institution can be used
- lower division prerequisites for both honors programs
- satisfaction of the Faculty of Arts and Social Sciences writing, quantitative and breadth requirements (see above)
- satisfactory completion of an honors essay jointly supervised by and acceptable to both honors departments

Students must maintain a 3.0 GPA in upper division courses in each subject of the joint honors program.

### Program Declaration

Prior to or upon enrolling for the term in which the 61st unit is completed, students in the bachelor of arts program must formally declare and be accepted into a major or two extended minors and may apply for an honors program, subject to the regulations below. Program declaration establishes the exact major, or extended minor requirements for graduation as they appear in the Calendar in effect at the time of declaration. Students are urged to keep a copy of this Calendar, known as the Graduating Calendar, for reference.

Program requirements may be changed any time prior to graduation. A new formal declaration must be approved by the new program department and the Office of the Dean, Faculty of Arts and Social Sciences if a faculty change is involved. The Calendar then in effect becomes the new Graduating Calendar, and the requirements it specifies for the program must be fulfilled.

### Admission into an Honors Program

Program acceptance is contingent upon satisfying the entrance requirements of the department concerned. Applicants normally have a 3.0 GPA in subject(s) of the honors field. When admission is granted, the student then enrolls as an honors student. In order to continue, this 3.0 GPA must be maintained. Failure to do so will place the student in the corresponding general degree program. Students will still be subject to the regulations of the original graduating Calendar. If a student is subsequently reinstated into the honors program, the graduating Calendar is that which was in effect at the time of the original program acceptance.

### Graduation GPA Requirements

Please see "Grade Point Averages Needed for Graduation" on page 31 for current GPA requirements for graduation.

Individual departments may have additional GPA requirements for graduation. Please check individual department Calendar listings for further information.

Please note that the minimum GPA requirements for graduation differed during the following time periods: September 1965 to August 1991; September 1991 to August 2003. Please see the appropriate Calendar(s)\* for information about GPA requirements during these time periods.

\*Calendar in effect at the time of entry to Simon Fraser University and the Calendar that was in effect at the time of approval to credential and/or program.

### Second Bachelor of Arts Degree

Bachelor's degree holders may complete a second bachelor of arts (BA) degree, but are encouraged to determine whether a second BA degree is actually required for their purposes because post-degree studies may be more appropriate. For information regarding second BA degrees and/or post-degree studies, seek advice from the faculty advisors in Arts Central, located in 3020 Academic Quadrangle.

A student may not enrol in a second BA degree in a subject in which they already hold a degree. A student who has a minor in a particular subject may enrol in a second BA degree with a major or honors program in that subject. Students may not complete a bachelor of general studies as a second degree.

The minimum requirement for a second BA degree is completion of 60 units, including at least 45 upper division units. Prior completion of lower division requirements for the major program may be required or may be waived at the discretion of the department.

Second degree students complete one upper division writing (W) course and one quantitative (Q) course.

Residency requirements for the second BA require at least 45 Simon Fraser University units, including at least 30 in upper division.

Courses not used toward a previous degree (as determined by the institution awarding that degree) may be used to reduce the number required in the second BA degree where applicable. Courses extra to previous degrees may be counted toward the second BA degree if completed before admission into the second BA degree, to a maximum of 15 units, in accordance with faculty regulations. Students must obtain approval from a faculty advisor in Arts Central, located in 3020 Academic Quadrangle.

Second degree students may not complete courses at another institution through a letter of permission.

### Concurrent Degrees

Students have the option of completing two undergraduate degrees concurrently by meeting the requirements of a first bachelor's degree and the requirements of a second bachelor of arts (BA) degree. Students choosing this option will complete both degrees simultaneously and apply for graduation from both degrees in the same term.

In most instances, instead of two concurrent degrees, it may be preferable to complete two extended minors, a joint major, a double major or a joint honors program leading to one bachelor's degree. Students are encouraged to determine whether a second BA degree is actually required because, in many cases, post-degree studies may be more appropriate.

For information regarding concurrent degrees and/or post-degree studies, seek advice from faculty advisors in Arts Central, located in 3020 Academic Quadrangle.

## Bachelor of General Studies Program

This non-specialist degree program, administered within the Faculty of Arts and Social Sciences, is designed for students whose educational goals are not met by other, more structured, undergraduate degree programs. Students may complete one or more minors or extended minors (but no major), in any academic area(s) as part of the BGS degree. Students considering this program are strongly urged to consult the faculty advisor before declaring the BGS as their degree.

### Requirements

Students complete a minimum of 120 units, including at least 45 upper division units. The minimum GPA requirements for graduation are a GPA of 2.0 and a cumulative GPA of 2.0 calculated on all upper division courses completed, except duplicate courses.

University regulations governing the duplication of courses (see "Limits on Repeated Courses" on page 27) are rigorously applied in the Faculty of Arts and Social Sciences. No more than five course duplications will be allowed.

With the exception of co-op courses, FAL X99 and FAN X99, EDUC 401, 402, 405 and 406, courses completed from any faculty may be used to satisfy the degree requirements, but admission to courses is subject to the prerequisite requirements of the various departments.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. For the University's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 7.

### Residency and Transfer Credit Regulations

Students admitted into the BGS in the fall of 2009 or later may use up to 60 units of transfer credit towards their Simon Fraser University degree. Students must complete a minimum of 60 units at Simon Fraser University, including at least 30 upper division Simon Fraser University units.

Students admitted into the BGS prior to the fall of 2009 may receive up to 90 units of transfer credit, according to the calendar in effect at the time of declaration.

### Graduation GPA Requirements

See "Grade Point Averages Needed for Graduation" on page 31 for current GPA graduation requirements. Individual departments may have additional GPA requirements for graduation. Please check individual department Calendar listings for further information.

Note that the minimum GPA graduation requirements differed during these time periods: September 1965 to August 1991; September 1991 to August 2003. See the appropriate Calendar(s)\* for information about GPA requirements during these time periods.

\*Calendar in effect at the time of entry to Simon Fraser University and the Calendar that was in effect at the time of approval to credential and/or program.

### Integrated Studies Program

#### Advisor

Ms. T. Mandic, 778.782.8655, tatjanam@sfu.ca, www.sfu.ca/integratedstudies

Information is available from the director of the Integrated Studies Program, Continuing Studies, at Simon Fraser University Vancouver. Integrated studies programs within the bachelor of general

studies degree are highly structured cohort-based programs that meet the educational needs of specific student groups. Such programs integrate liberal studies with knowledge and skills associated with a particular field of practice, or with a background common to its students. Students may undertake this degree option only through special admission to an individual program. Integrated studies programs are designed and structured in consultation with external agencies or employers and may have special locations, admission requirements and fee structures.

Because these programs may require and build upon varying levels of previous post-secondary education, related employment experience, and demonstrated intellectual maturity, the required number of units may be less than the normal 120 units. All such programs will require a minimum of 60 units in designated Simon Fraser University courses offered within the program, to include at least 45 upper division units.

Each integrated studies program will be governed by an academic steering committee. The curriculum, including both designated courses and total units, admission criteria, and any other special conditions for each individual integrated studies program will be approved in advance by the Faculty of Arts and Social Sciences curriculum committee.

## Program Enrichment

### International Activities

#### International Student Advisor

Mr. N.P. Navasero BA (S Fraser), 3020 Academic Quadrangle, 778.782.3338, npn@sfu.ca

### Double Degree Program with Monash University, Australia

Simon Fraser University's Faculty of Arts and Social Sciences, and Monash University's Faculty of Arts, have partnered to offer two complete degrees concurrently in both Canada and Australia. Students choose a major from one of criminology, international studies, or world literature, leading to a BA degree, or a minor in First Nations studies leading to a BGS degree, from Simon Fraser University. In addition, students will earn a BA (Global) degree from Monash University.

For more information, visit [www.sfu.ca/arts/undergraduate/monash](http://www.sfu.ca/arts/undergraduate/monash) or contact the advisor.

### Kefalonia Semester Abroad Program

This full-credit fall term program in Kefalonia, Greece, offered annually, is led by a Simon Fraser University faculty member. Students will learn about the language, literature, and culture of modern Greece and, through active participation in an archaeological excavation, also learn about the history of this region.

Students complete a total of 14 units including both of ARCH 339-5 Lab Practicum: The Material Culture of Greece and Excavation Finds Processing ARCH 435-6 Field Work Practicum

and a three-unit modern Greek language course (to be announced)

#### Eligibility

Applicants must be 19 years of age or older prior to departure, have completed a minimum of 45 units and be in good academic standing. Students should also have completed at least one Faculty of Arts and Social Sciences course.

### The application deadline is June 30.

For more information, including a list of information sessions and the program cost, see [www.sfu.ca/hellenic-studies/diggreece.html](http://www.sfu.ca/hellenic-studies/diggreece.html), or contact the Hellenic studies advisor at 778.782.8466 or email [hellenic@sfu.ca](mailto:hellenic@sfu.ca).

### Exchange

For a list of exchange destinations, application information and deadlines, please visit the SFU International website at [www.sfu.ca/international](http://www.sfu.ca/international).

### Field Schools

For an up-to-date list of field school destinations, visit [www.sfu.ca/international](http://www.sfu.ca/international).

### Co-operative Education Program

6046 Academic Quadrangle, 778.782.3041/5751/3776/5839 Tel, 778.782.5875 Fax, [www.sfu.ca/coop/arts](http://www.sfu.ca/coop/arts)

#### Co-ordinators

K. Binpal BA (Lanc)  
M. Fordham  
E. Lewis BA (S Fraser)

This program is available for students who wish to acquire practical experience with their academic programs. The student normally spends alternate terms on campus and in paid, study-related jobs.

Refer also to *Archaeology, Cognitive Science, Criminology, Economics, English, First Nations, French, Geography, History, Humanities, International Studies, Latin American Studies, Linguistics, Political Science, Psychology, Sociology/Anthropology, and Women's Studies* as well as the *Co-operative Education* sections of this Calendar.

Students who are completing programs in departments that do not list co-operative education practicum courses can enrol in LBRL 101, 201, 301, 401 and 402.

### Entry for Declared Major Students

The following are recommended prior to co-op education entry: one course from either set 2 or set 8 as listed under the *certificate in liberal arts* (page 91), and at least 12 units of required lower division courses in the major program.

### Entry for BGS and BEd Students

To be admitted to co-op education, students pursuing a bachelor of general studies or a bachelor of education must have completed a minimum of 30 units with a minimum CGPA of 2.75. Prior to admission, all students must complete

either

ENGL 199-3 Introduction to University Writing

or any two 100 division ENGL courses.

A quantitative research course in your area of interest is strongly recommended. Computer literacy is a requirement. For further information, contact one of the Faculty of Arts and Social Sciences co-operative education co-ordinators (see "Co-operative Education" on page 212 for a list of Faculty of Arts and Social Sciences co-op advisors).

### Requirements

To be admitted, students must have completed a minimum of 30 units with a minimum CGPA of 2.75. Prior to admission, all students must complete ENGL 199-3 University Writing (or any two 100 division English courses) PHIL 001-3 Critical Thinking

A quantitative research course in your area of interest is strongly recommended. Computer literacy is a requirement. See the Faculty of Arts and Social Sciences co-op co-ordinators for further information.

### Transfer Students

Transfer students should contact the co-ordinators in the first week of their first Simon Fraser University term. College transfer students who participated in co-op programs elsewhere may be credited with the terms already completed. Students contemplating transfer to the Simon Fraser University Faculty of Arts and Social Sciences co-op program should contact an admissions advisor in Student Services early.

## Post Baccalaureate Diploma Programs

The Faculty of Arts and Social Sciences offers disciplinary and interdisciplinary post baccalaureate diplomas (PBDs). See "Post Baccalaureate Diploma Program" on page 7. In addition to the specific PBD programs available, the Faculty of Arts and Social Sciences offers a PBD in Arts and Social Sciences. This program is comprised of 30 upper division units, of which at least 15 upper division units must be completed in the arts and social sciences discipline which most closely fits the learning goals of the student. Through this program, students can complete a PBD with a concentration of courses in a discipline that does not offer a specific PBD.

## Certificate Programs

The certificate programs below are administered by the Faculty of Arts and Social Sciences.

Units applied toward a certificate may not be applied toward any other Simon Fraser University certificate or diploma, but may also be applied toward major program or minor program requirements or toward a bachelor's degree under the normal regulations governing those programs.

## Certificate in Explorations in the Arts and Social Sciences

Simon Fraser University Surrey, Galleria 5, Central City, 250-13450 102nd Avenue, Surrey, BC V3T 0A3, 778.782.8731 Tel, surrey-arts@sfu.ca, www.surrey.sfu.ca/arts/expl

### Director

P.M. St. Pierre BA (Br Col), MA (Qu), PhD (Syd)

### Associate Professor

H. Dawkins BFA (Nova Scotia Art & Des), MA, PhD (Leeds)  
J. Marchbank BA (Strath), MA (Central London), PhD (Strath)

### Assistant Professors

S. Colby BA, MA (Vic, BC), PhD (Sus)\*  
S. Markey MA (York, Can), PhD (S Fraser)

### Advisor

Ms. M. Yao BA (Br Col), 778.782.8478 Tel, surrey-arts@sfu.ca

\*joint appointment with world literature

This interdisciplinary program provides a broad, coherent and stimulating introduction to university studies. Students explore ideas and issues in courses that introduce arts and social science perspectives to first year students. Students learn to question, research and think independently and they are encouraged to develop the communication and reasoning skills that are required to debate central ideas that shape society and community.

This cohort program, in which students complete core courses together as a group, is an excellent choice for first year students as they make the transition from high school to university.

Core courses are offered in fall and spring terms at Simon Fraser University Surrey during which students can also complete electives. Core courses are a foundation for the certificate which recognizes the completion of an individual plan for interdisciplinary inquiry.

The certificate is awarded upon completion of required and elective courses for a total of 27 units.

Students who completed the pilot program for explorations in arts and social sciences in the 2005/2006 academic year may be eligible for the certificate in explorations in arts and social sciences if

they complete all other requirements and obtain the permission of the director.

Certificate students complete a minimum of nine units from the following.

EXPL 110-3 Organising Society  
EXPL 120-3 Experiencing Society  
EXPL 130-3 Global Development: Issues and Patterns  
EXPL 140-3 Global Identities\*  
EXPL 145-3 Selected Topic\*

\*in exceptional circumstances, and with permission of the director, another 100 division Faculty of Arts and Social Sciences courses that is germane to a student's interest may be substituted.

plus both of

EXPL 150-3 Introduction to Research Approaches in the Social Sciences  
EXPL 160-3 Introduction to Research and Interpretation in the Arts

### Additional Requirements

After their first year, students are encouraged to meet with the director or student advisor for the program, to discuss their interdisciplinary interests. The remaining units for the certificate consist of courses chosen in relation to those interests, as well as the completion of at least one 300 division explorations capstone course (see below) A minimum of six units for the certificate must be at the 200 division or higher -- three units in arts or humanities disciplines and three units in social sciences.

Students must complete at least one of the following Explorations capstone courses  
EXPL 310-3 Selected Topic I\*  
EXPL 320-3 Selected Topic II\*

\*In exceptional circumstances, and with permission of the director, another 300 division Faculty of Arts and Social Sciences course that is germane to a student's interest may be substituted.

General University regulations pertaining to certificate programs also apply.

Courses completed for this certificate may also apply toward major or minor program requirements, or toward a bachelor's degree within normal University regulations.

Students who fail a core course must make a written request for permission to continue in the program.

### From First Year University to the Major

Students are encouraged to meet with the advisor about the major or minors being considered, and to prevent unnecessary education delays by planning ahead to meet program requirements. Programs may have enrolment limitations with competitive entry standards based on academic performance. Students who are unable to gain admission to such programs should consult the advisor regarding other options.

## Certificate in Liberal Arts

### Advisor

Ms. S. Cowan, 3020 Academic Quadrangle, 778.782.5426, secowan@sfu.ca, www.sfu.ca/arts/undergraduate/CLA.html

This program, which provides broad exposure to areas of knowledge and inquiry methods essential to a liberal education, is for students who desire breadth of learning. It may be completed in conjunction with a degree program, or by students not seeking a degree.

The certificate requires ten courses comprising at least 30 units from designated course lists. These courses, which include both lower and some upper division courses, were carefully chosen for suitability in providing accessible and valuable material.

## Course Sets

Applicable certificate courses are listed in 12 sets. Each set includes courses from a variety of University departments. For a certificate student to be acquainted with various fields of inquiry and approaches to knowledge, the ten required courses must be distributed across these sets as described below. See "Distribution Requirements" on page 92. A brief description of the kinds of courses in each set are as follows.

### Set 1 – Verbal Skills

These courses enhance the mastery of some basic tools of verbal reasoning and expression. They include courses on writing and critical thinking, and introductory language courses. Students who complete an introductory course in a language other than English are strongly urged to complete a second course in that language as part of their certificate program.

### Set 2 – The Study of Theory and Theory Building

These courses introduce the nature of explanatory systems in various fields of inquiry. They include various discipline courses that focus on dynamics of theory construction and historical evolution of theory within that discipline. Courses in this set provide appreciation for ways in which the processes of reasoning, argument, observation and analysis are included within the development of disciplines.

### Set 3 – The Analysis of Contemporary Issues

These courses examine current social problems and controversies, emphasizing the application of appropriate conceptual and investigative methods to areas of public concern. Courses in this set will give students some appreciation for the ways in which careful reasoning and disciplinary knowledge can be applied in clarifying the discussion of public issues.

### Set 4 – The Study of Literature

These courses introduce important literary works and to ways of understanding literary expression. They include courses on literature written in English and in other languages, as well as literature in translation.

### Set 5 – Fine and Performing Arts

These courses familiarize students with non-literary modes of artistic expression and with important works of art including history and criticism of arts forms courses.

### Set 6 – Studies in Culture and Civilization

These courses introduce a wide study of cultures and civilizations. They include courses that consider the development of human values, and that take comparative and interdisciplinary approaches to culture, as well as historical studies that include substantial attention to cultural themes.

### Set 7 – The Study of Period and Place

These courses study developments in human society with emphasis on historical or regional particularity, and introduce methods associated with such study. They include courses that focus on regions and regionalism, as well as on specific historical periods.

### Set 8 – Foundations of Social Science

These courses introduce fundamental concepts and investigation methods in social science disciplines.

### Set 9 – Social and Behavioral Analysis

These courses articulate an approach to social structures or to individual or group behavior and apply that perspective to an area of social investigation.

### Set 10 – Natural Science

These courses introduce methods that are basic to natural sciences and to at least one specific science.

### Set 11 – The Impact of Science and Technology

These courses investigate the social impact of developments in science, technology, and computational and quantitative methods.

**Set 12 – Quantitative Skills**

These courses enhance the mastery of mathematical skills and tools for quantitative reasoning. They include basic level mathematics and computing, and statistics oriented research methods courses.

**Distribution Requirements**

Eight of the required ten courses must be distributed among the above sets as follows. (See course lists for applicable courses.)

two courses drawn from any **TWO** of the sets 1-3  
two courses drawn from any **TWO** of the sets 4-6  
two courses drawn from any **TWO** of the sets 7-9  
two courses drawn from any **TWO** of the sets 10-12

The two additional courses required may be selected from any TWO sets.

Within these distribution requirements, students may select any listed courses, and may tailor choices to their academic needs and interests. Courses applied toward the certificate in liberal arts **may** also be applied to any degree program, but **may not** be applied to another certificate or diploma program.

**Course Lists**

A list of courses within each set, published annually, is available at Student Services Academic Advising, Arts Central (3020 Academic Quadrangle), and at [www.sfu.ca/arts/undergraduate/CLACourses.html](http://www.sfu.ca/arts/undergraduate/CLACourses.html). Lists include Senate approved courses for program inclusion and occasional courses approved for single offering. Some have prerequisites. In most instances, the specific prerequisites may also be completed within the certificate program. Consult the Calendar and course outlines to understand courses and prerequisites. Advice is available through department advisors, Arts Central (3020 Academic Quadrangle) and Student Services Academic Advising.

**Transfer Credit**

A maximum of 15 transfer units are permitted towards the certificate in liberal arts. Normally, only credit assigned as directly equivalent to a course regularly listed within the program may be transferred.

**Certificate for Senior Citizens****Advisor**

Mr. J. Benedict, 2300 Simon Fraser University Vancouver, 515 West Hastings Street, Vancouver, BC, V6B 5K3, 778.782.5212, [seniors@sfu.ca](mailto:seniors@sfu.ca), [www.sfu.ca/seniors](http://www.sfu.ca/seniors)

This innovative credit certificate offers maximum flexibility to seniors (aged 60 or better) who are interested in exploring what the University has to offer. Whether students enrol in a sampling of courses or wish to complete a full undergraduate degree, the certificate can be part of this academic plan.

**Admission Requirements**

Contact the advisor to learn more about the application process, and for further information. The advisor can also answer questions about individual learning objectives and will assist with developing a personalized education plan.

**Program Requirements**

Senior students (age 60 or better) must complete 30 undergraduate units (approximately 10 courses), with a minimum grade of C, calculated on all courses. Courses applied toward the certificate must be approved by the program director or other official appointed by the Dean of Arts and Social Sciences.

## Department of Archaeology

9635 Education Building, 778.782.3135 Tel,  
778.782.5666 Fax, [www.sfu.ca/archaeology](http://www.sfu.ca/archaeology)

\*joint appointment with resource and environmental management

\*\*joint appointment with First Nations studies

The department offers various programs leading to the BA degree. Students must meet requirements for the degree (described in the *Faculty of Arts and Social Sciences* section), should complete courses in some complementary disciplines, and should seek departmental advice early in their university careers.

**Recommended Courses**

The following courses are recommended.

SA 101 (recommended for majors and honors)  
STAT 203 (prerequisite for ARCH 376 which is recommended for majors and required for honors)

**Upper Division ARCH Course Groups**

Upper division archaeology courses are divided into the following groups.

**Group I – Core Program**

ARCH 372-5 Material Culture Analysis

ARCH 373-5 Human Osteology

ARCH 376-5 Quantitative Methods in Archaeology

ARCH 471W-5 Archaeological Theory

**Group II – Laboratory Courses**

ARCH 335-5 Special Laboratory Topics in Archaeology

ARCH 340-5 Zooarchaeology

ARCH 348-5 Archaeological Conservation

ARCH 349-5 Management of Archaeological Collections

ARCH 377-5 Historical Archaeology

ARCH 385-5 Paleoanthropology

ARCH 390-5 Archaeobotany

ARCH 432-5 Advanced Physical Anthropology

ARCH 442-5 Forensic Anthropology

ARCH 452-5 Introduction to Paleopathology

ARCH 485-5 Lithic Technology

**Group III – Regional Courses**

ARCH 321-3 Archaeology of Britain

ARCH 330W-3 Prehistory of Latin America

ARCH 338-3 Archaeology of China

ARCH 360-5 Native Cultures of North America

ARCH 370-3 Western Pacific Prehistory

ARCH 378-3 Pacific Northwest North America

ARCH 379-3 Archaeology of the American Southwest

**Group IV – Topical Courses**

ARCH 301-3 Prehistoric and Indigenous Art

ARCH 302-3 Art of Ancient Civilizations

ARCH 311-5 Archaeological Dating

ARCH 336-3 Special Topics in Prehistoric and Indigenous Art

ARCH 344-3 Primate Behavior

ARCH 365-3 Ecological Archaeology

ARCH 383-3 Molecular Bioarchaeology

ARCH 386-3 Archaeological Resource Management

ARCH 438-5 Geoarchaeology

Special topics and/or directed studies courses may substitute for group II, III or IV courses, provided the content suggests a suitable substitution, and written department consent is obtained prior to enrolment.

Students completing degree programs must fulfill writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information about University-wide requirements. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

**Writing, Quantitative, and Breadth Requirements**

Students completing degree programs must fulfill writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information about University-wide requirements. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

**Major Program****Lower Division Requirements**

ARCH 131-3 Human Origins

ARCH 201-3 Introduction to Archaeology

ARCH 272-3 Archaeology of the Old World

ARCH 273-3 Archaeology of the New World

**Upper Division Requirements**

Students complete at least 30 upper division archaeology units which must include

- at least three group I courses (ARCH 372, 471W, and either 373 or 376). It is strongly recommended that majors students, students interested in physical anthropology, and those contemplating graduate studies, complete all four group I courses.
- at least one group II course
- at least one group III course
- at least two group IV courses

If students complete both ARCH 373 and 376, they may use both as group I requirements, or use ARCH 373 as a group II requirement, or ARCH 376 as a group IV requirement.

## Honors Program

Archaeology majors who wish honors program admission must have a minimum 3.0 CGPA and department permission. To remain in the program, students must maintain that CGPA and successfully complete 132 units with 50 of those in upper division archaeology. As well as meeting group II, III, and IV requirements for the major, honors students complete all four group I courses, ARCH 498 and 499. See "Bachelor of Arts Program" on page 88.

## Minor Program

### Lower Division Requirements

ARCH 131-3 Human Origins  
ARCH 201-3 Introduction to Archaeology  
and one of  
ARCH 272-3 Archaeology of the Old World  
ARCH 273-3 Archaeology of the New World

### Upper Division Requirements

At least 16 units of upper division archaeology are required including at least one course from each of groups I, II, III and IV listed above.

## Extended Minor Program

This program consists of the lower division requirements for a major and the upper division requirements for an archaeology minor. Programs must be approved by the department advisor.

## Languages Other Than English

Those contemplating graduate work are advised to acquire a reading knowledge of at least one language other than English.

## Archaeology and Anthropology Joint Major Program

### Advisors

Ms. C. Papaiani, Department of Archaeology, 9633A Education Building, 778.782.4687

Ms. K. Payne, Department of Sociology and Anthropology, 5055 Academic Quadrangle, 778.782.3726

This program explores inter-relationships between anthropology and archaeology. Students should plan their program in consultation with both advisors.

### Lower Division Anthropology Requirements

Students complete the following courses.

SA 101-4 Introduction to Anthropology (A)  
SA 201W-4 Anthropology and Contemporary Life (A)  
SA 255-4 Introduction to Social Research (S or A)

plus one additional 200 division course chosen in anthropology and/or sociology/anthropology.

### Lower Division Archaeology Requirements

Students complete the following courses.

ARCH 131-3 Human Origins  
ARCH 201-3 Introduction to Archaeology  
ARCH 272-3 Archaeology of the Old World  
ARCH 273-3 Archaeology of the New World

## Upper Division Anthropology Requirements

At least 20 units of upper division anthropology are required including the following.

SA 301-4 Contemporary Ethnography (A)  
SA 356W-4 Ethnography and Qualitative Methods (S or A)  
SA 402-4 The Practice of Anthropology (A)

plus eight additional upper division units chosen from the Calendar list of anthropology (A) courses.

### Highly Recommended

SA 486-4 Aboriginal Peoples and British Columbia: Advanced Seminar (A)

## Upper Division Archaeology Requirements

Students complete at least 23 upper division archaeology units including one of  
ARCH 301-3 Prehistoric and Indigenous Art  
ARCH 386-3 Archaeological Resource Management  
and all of  
ARCH 360-5 Native Cultures of North America  
ARCH 372-5 Material Culture Analysis  
ARCH 471W-5 Archaeological Theory  
plus one group II archaeology course.  
ARCH 378 and 385 are strongly recommended.

## Archaeology and First Nations Studies Joint Major Program

See "Archaeology and First Nations Studies Joint Major Program" on page 108 for program information.

## Archaeology and Latin American Studies Joint Major Program

See "Joint Major Programs" on page 122.

## Co-operative Education

This program offers work experience in archaeology and physical anthropology and entails planned terms of study and employment (term practicums) in an area of the student's choice.

### Requirements

To be admitted, a major must have been declared and the student must have at least 45 units, with a minimum CGPA of 3.0. The following courses (or equivalent as approved by the department co-op education co-ordinator) are recommended.

Students complete both  
ARCH 131-3 Human Origins  
ARCH 201-3 Introduction to Archaeology  
and one of  
ARCH 272-3 Archaeology of the Old World  
ARCH 273-3 Archaeology of the New World  
and three of  
ARCH 372-5 Material Culture Analysis  
ARCH 373-5 Human Osteology  
ARCH 376-5 Quantitative Methods in Archaeology  
ARCH 377-5 Historical Archaeology  
ARCH 386-3 Archaeological Resource Management  
ARCH 442-5 Forensic Anthropology

Contact the co-op co-ordinator, undergraduate chair, and/or departmental assistant at least one term before the first work term to participate. See "Co-operative Education" on page 212 regarding job competition, student employer responsibilities, student fees, pay rates and evaluation. During work terms, co-op students are formally enrolled in a job practicum course and are assessed a fee.

Program continuance requires a minimum 3.0 CGPA in all courses. College transfer students must have at least 15 Simon Fraser University units to be eligible for co-op admission. Transfer students who participated in co-operative education programs elsewhere **may** be credited with the term(s) already completed pending evaluation and approval of the Simon Fraser University co-op program.

## Asia-Canada Program

5115 Academic Quadrangle, 778.782.3689 Tel, 778.782.4504 Fax, [www.sfu.ca/AsiaCanada](http://www.sfu.ca/AsiaCanada)

### Director

T. Kawasaki LLB (Doshisha), MA (Tor), PhD (Prin)\*

### Steering Committee

P. Crowe, Department of Humanities  
T. Kawasaki, Department of Humanities, Department of Political Science  
S. Kong, Department of Humanities  
D. Mirhady, Department of Humanities

### Advisor

Ms. C. Prisland, 5114 Academic Quadrangle, 778.782.4094, [prisland@sfu.ca](mailto:prisland@sfu.ca)

\*joint appointment with political science

This extended minor program investigates connections between contemporary Canadian society and culture, and a variety of Asian countries. Part of the program studies one or more Asian languages. The goal is to introduce students to the economic, social and cultural connections between Asian countries and Canada. The Asia-Canada extended minor along with another extended minor can be used toward a BA degree, or with a major in any bachelor's degree, or use it toward a bachelor of general studies.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 90.

## Extended Minor Program

### Lower Division Requirements

Students complete 18 units including  
ASC 101-3 Introduction to Asia-Canada Studies I  
ASC 102-3 Introduction to Asia-Canada Studies II

plus one of

ASC 200-3 Introduction to Chinese Civilization  
ASC 201-3 Introduction to Japanese Civilization  
ASC 202-3 Studies in Asian Cultures

plus one of

CNS 160-3 The Social Background of Canada  
CNS 210-3 Foundations of Canadian Culture  
HIST 102-3 Canada Since Confederation  
HIST 204-3 The Social History of Canada  
SA 100-4 Perspectives on Canadian Society

and six units of Chinese or Japanese or another Asian language (approved by the advisor). Students who can demonstrate prior knowledge and proficiency that is equivalent to a 100 division Asian language course should choose another Asian language or substitute the six language units with further lower division Asia-Canada courses. Students eligible for these options must have their language level assessed and receive prior approval from the director and advisor.

## Upper Division Requirements

Students complete 15 units including at least one of  
ASC 300-3 Asians and North Americans in Public  
Discourse  
ASC 301-3 Asia-Canada Identities: Experiences and  
Perspectives

and at least one other upper division Asia-Canada  
course.

**Note:** If both ASC 300 and 301 are completed,  
students can count one course toward fulfilling the  
remaining upper division requirements.

To fulfil the remaining nine required units, students  
must complete courses from the following. With prior  
permission from the director, students may count  
other Asia-Canada related courses at the upper  
division which do not appear on this list. Consult with  
the program advisor.

ASC 302-3 Selected Topics in Chinese Studies  
ASC 303-3 Selected Topics in Japanese Studies  
ASC 400-3 Selected Topics in Asia-Canada Studies  
ASC 401-3 Directed Studies  
BUS 431-3 Business with East Asian Countries  
ENGL 394-4 World Literature in English II\*  
HIST 366-4 Social History of China Since 1800  
HIST 368W-4 Selected Topics in the History of the  
Wider World\*  
HIST 371-4 The Asia-Pacific War in Modern  
Japanese History  
HIST 471-4 Women in Modern Japanese History  
HIST 479-4 Change, Conflict, and Resistance in  
Twentieth Century China  
HUM 331-4 Studies in Asian Religions  
HUM 340-4 Great Cities in Their Time\*  
HUM 350-4 Great Figures in the Humanistic  
Tradition\*  
HUM 383-4 Selected Topics in the Humanities III\*  
POL 335-4 Government and Politics: People's  
Republic of China I  
POL 336-4 Government and Politics: People's  
Republic of China II  
POL 381-4 Politics and Government of Japan I  
POL 382-4 Politics and Government of Japan II  
POL 430-4 Government and Politics: Selected Asian  
Nations

\*when the topic is Asia-Canada related. Consult the  
program advisor.

**Note:** Students are responsible for meeting the  
prerequisites for the upper division courses they are  
applying to the extended minor.

## Certificate in Chinese Studies

This program offers courses related to the study of  
China. Students receive an introduction to Chinese  
language and complete other related courses.

The program is offered by the Asia-Canada  
Program/Department of Humanities and is  
administered by the program advisory committee  
appointed by the Dean of Arts and Social Sciences.

## Admission Requirements

There are no specific admission requirements. See  
the Asia-Canada advisor for certificate program  
approval.

## Program Requirements

Students complete 24 units, of which 12 are earned  
by completing four required core courses. The  
remaining are selected from the electives list below.

### Core Courses (12 units)

Students complete one of  
ASC 200-3 Introduction to Chinese Civilization  
ASC 205-3 Field Studies in Chinese Culture

and all of  
CHIN 100-3 Mandarin Chinese I  
CHIN 101-3 Mandarin Chinese II

and one of  
HIST 254-3 China to 1800  
HIST 255-3 China Since 1800

Students who complete CHIN 151 and/or 152 may  
apply the credit to either the elective or required  
courses for the certificate for complete or partial  
replacement of CHIN 100/101/200/201.

### Electives (12 units)

ASC 202-3 Studies in Asian Cultures\*  
ASC 302-3 Selected Topics in Chinese Studies  
ASC 400-3 Selected Topics in Asia-Canada Studies\*  
BUS 431-3 Business with East Asian Countries\*  
CHIN 200-3 Mandarin Chinese III  
CHIN 201-3 Mandarin Chinese IV  
HIST 254-3 China to 1800 (or HIST 255)  
HIST 256-3 The People's Republic of China  
HIST 366-4 Social History of China Since 1800  
HIST 479-4 Change, Conflict, and Resistance in  
Twentieth Century China  
HUM 203-3 Great Texts in the Humanities III\*  
HUM 204-3 Great Religious Texts\*  
HUM 330-4 Religion in Context\*  
HUM 331-4 Studies in Asian Religions\*  
HUM 383-4 Selected Topics in the Humanities III\*  
POL 335-3 Government and Politics: People's  
Republic of China I  
POL 336-3 Government and Politics: People's  
Republic of China II  
SA 275-4 Asian Societies\*

\*when the topic is China related. Consult the program  
advisor.

With prior permission from the director, students may  
count other China-related courses which do not  
appear on this list. Consult with the program advisor.

# Behavioral Neuroscience Program

*Department of Biomedical Physiology and  
Kinesiology*

K9625, 778.782.3573 Tel, 778.782.3040 Fax,  
kin\_advisor@sfu.ca, www.neuroscience.sfu.ca

*Department of Psychology*

5246 Robert C. Brown Hall, psyc-advisor@sfu.ca  
778.782.3354 Tel, 778.782.3427 Fax

*Director*

M. Liotti MD (Naples), PhD (Parma)

The Department of Psychology and the Department  
of Biomedical Physiology and Kinesiology co-operate  
to offer this major and honors program leading to a  
bachelor of science or bachelor of science (honors) in  
the Faculty of Arts and Social Sciences or the Faculty  
of Science. The program is administered by a  
co-ordinating committee of two members each  
department. The committee chair, who serves as  
program director, is appointed from either of the two  
departments, alternating every two years.

## Admission

The admission requirements for the three possible  
entry routes appear below.

## High School Admission

Students pursuing this major via the Faculty of Arts  
and Social Sciences will satisfy the faculty's general  
admission requirements. Students seeking Faculty of  
Science admission to this major will satisfy the same  
admission requirements as students seeking  
admission into the Department of Biomedical  
Physiology and Kinesiology.

## Post Secondary Transfer and Internal Transfer Applicants

Post-secondary transfer applicants may apply after at  
least 18 Simon Fraser University units are completed.  
Post-secondary transfer and internal transfer  
applicants are required to achieve a 2.5 cumulative  
grade point average (CGPA) for admission.

As well, applicants must have completed the following  
courses with a grade of C or better.

BISC 101-4 General Biology  
CHEM 121-4 General Chemistry and Laboratory I  
KIN 142-3 Introduction to Kinesiology  
PSYC 100-3 Introduction to Psychology I  
PSYC 102-3 Introduction to Psychology II  
PSYC 201W-4 Introduction to Research Methods in  
Psychology  
PSYC 210-4 Introduction to Data Analysis in  
Psychology

and one of  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences

and one of  
PHYS 101-3 Physics for the Life Sciences I  
PHYS 120-3 Mechanics and Modern Physics  
PHYS 140-4 Studio Physics – Mechanics and  
Modern Physics

## Program Continuation

Students must maintain a 2.5 cumulative grade point  
average to remain in the program, and obtain a C  
grade or higher in all required courses.

## Major Program

This program requires 120 units: 60 required lower  
division, plus 45 upper division units including 42  
required upper division units plus three upper division  
Simon Fraser University elective units, plus six units  
designated Breadth-Humanities; plus nine lower or  
upper division Simon Fraser University elective units.

## Lower Division Requirements

Students complete all of the following 60 units.

### Biology

BISC 101-4 General Biology  
MBB 221-3 Cellular Biology and Biochemistry

### Chemistry

CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 281-4 Organic Chemistry I

### Kinesiology

KIN 142-3 Introduction to Kinesiology  
KIN 205-3 Introduction to Human Physiology  
KIN 207-3 Human Motor Systems

### Mathematics

MATH 154-3 Calculus for the Biological Sciences  
MATH 155-3 Calculus II for the Biological Sciences

### Physics

PHYS 101-3 Physics for the Life Sciences I  
PHYS 102-3 Physics for the Life Sciences II  
PHYS 130-2 Physics for the Life Sciences Laboratory

### Psychology

PSYC 100-3 Introduction to Psychology I  
PSYC 102-3 Introduction to Psychology II  
PSYC 201W-4 Introduction to Research Methods In  
Psychology  
PSYC 210-4 Introduction to Data Analysis in  
Psychology  
PSYC 221-3 Introduction to Cognitive Psychology  
PSYC 280-3 Introduction to Biological Psychology

## Upper Division Requirements

Students complete a total of 45 units including 42 required units as shown below.

### Kinesiology

Students complete 21 units including these 12 units.  
KIN 305-3 Human Physiology I  
KIN 306-3 Human Physiology II (Principles of Physiological Regulation)  
KIN 324-3 Principles of Human Anatomy  
KIN 426-3 Neuromuscular Anatomy

plus nine additional units selected from the following.  
KIN 336-3 Histology  
KIN 407-3 Human Physiology Laboratory  
KIN 415-3 Neural Control of Movement  
KIN 416-3 Control of Limb Mechanics  
KIN 446-3 Neurological Disorders  
KIN 448-3 Rehabilitation of Movement Control  
KIN 461-3 Physiological Aspects of Aging  
KIN 467-3 Human Motor Control

### Psychology

Students complete 21 units including these 12 units.  
PSYC 300W-3 Critical Analysis of Issues in Psychology  
PSYC 381-3 Behavioral Endocrinology  
PSYC 382-3 Cognitive Neuroscience  
PSYC 388-3 Biological Rhythms and Sleep

plus nine additional units selected from the following.  
PSYC 303-3 Perception  
PSYC 330-3 Attention  
PSYC 335-3 Sensation  
PSYC 383-3 Psychopharmacology  
PSYC 384-3 Developmental Psychobiology  
PSYC 386-4 Laboratory in Behavioral Neuroscience  
PSYC 387-3 Human Neuropsychology  
PSYC 480-4 Selected Topics in Biological Psychology I  
PSYC 482-4 Selected Topics in Biological Psychology II  
PSYC 491-3 Selected Topics in Psychology  
PSYC 493-3 Directed Studies  
PSYC 494-3 Directed Studies  
PSYC 495-3 Directed Studies

plus three upper division elective units.

## Breadth, Quantitative and Writing Intensive Requirements

A minimum of six units of designated humanities breadth (B-Hum) courses must be completed. The social sciences breadth (B-Soc), science breadth (B-Sci), undesignated breadth (UB) and quantitative (Q) requirements are satisfied through completion of the behavioral neuroscience lower division required courses so no additional course work is required. As well, the writing intensive requirement is satisfied by the completion of required courses PSYC 201W and 300 W. For more information, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

## Honors Program

This program is for behavioral neuroscience major students who wish to pursue advanced study.

## Admission Requirements

To apply for admission, students must have completed a minimum of 60 units in the behavioral neuroscience major program with a minimum 3.00 cumulative grade point average (CGPA). Applicants complete a program approval form that is available at [www.neuroscience.sfu.ca](http://www.neuroscience.sfu.ca) and submit this, together with a recent unofficial transcript, to the chair of the behavioral neuroscience co-ordinating committee.

## Graduation Requirements

A minimum of 132 units is required consisting of the major program requirements (see above) plus one of KIN 457-3 Behavioral Neuroscience Undergraduate Honors Thesis Proposal

PSYC 457-3 Behavioral Neuroscience Undergraduate Honors Thesis Proposal

and one of

KIN 459-9 Behavioral Neuroscience Undergraduate Honors Thesis

PSYC 459-9 Behavioral Neuroscience Undergraduate Honors Thesis

At least 60 upper division units including 50 in upper division psychology and kinesiology are required with the following CGPAs: an overall University CGPA of 3.00; an overall upper division CGPA of 3.00; an overall behavioral neuroscience CGPA of 3.0 calculated on lower and upper division requirements; an upper division behavioral neuroscience CGPA of 3.00 calculated on upper division requirements.

## Centre for Canadian Studies

*Students will no longer be admitted to the Canadian studies major, minor, honors or joint major programs effective for the fall 2009 term. Also, Canadian studies courses will not be offered after the summer 2009 term. Students contemplating entering one of these programs are advised to check with the advisor.*

Advisor

Ms. L. Kool BA (S Fraser), 778.782.3588 Tel, [polda@sfu.ca](mailto:polda@sfu.ca)

The Centre for Canadian Studies promotes study and understanding of Canada from a comprehensive cultural, social, political and economic perspective, emphasizing both historical context and contemporaneous development. The centre fully utilizes programs developed by other academic departments that contain relevant Canadian subject matter, and offers limited interdisciplinary courses that integrate knowledge from several relevant disciplines.

For those with a predominant interest in Canadian studies, a major and honors program is provided. The centre also accommodates students whose primary interest is in another discipline. Such students may enrol in a joint major or honors program, combining specialization in the department of their choice with complementary work in Canadian studies.

A certificate in French Canadian studies may be completed concurrently with, and as part of, specialization in Canadian studies honors, major or minor programs, or independent of specialization.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

## Major Program

The requirements are as follows. See "Major Program" on page 6 for additional information.

## Lower Division Requirements

Students complete both of  
CNS 160-3 The Social Background of Canada  
HIST 102W-3 Canada Since Confederation

and two of

GEOG 162-3 Canada  
POL 221-3 Introduction to Canadian Government  
POL 222-3 Introduction to Canadian Politics  
POL 223-3 Canadian Political Economy (or CNS 280)  
SA 100W-4 Perspectives on Canadian Society

and one of

CNS 210-3 Foundations of Canadian Culture  
CNS 250-3 Perspectives on the Environment in Canada  
CNS 260-3 Screening Canadian Experience

Students must demonstrate a working knowledge of French which is determined by completing FREN 122, or the former FREN 298, or equivalent, or by passing a placement exam at this level.

### Upper Division Requirements

Students complete 30 upper division units minimum, including at least four upper division CNS courses plus 18 additional upper division Canadian studies/Canadian content units. No more than 12 may be from curriculum of any single department or program other than Canadian studies.

### Distribution Requirements

To ensure adequate breadth of knowledge, students must complete at least eight required key courses from at least five departments having courses recognized as carrying Canadian studies credit. These courses can be both upper and lower division.

### Honors Program

For honors, students complete the same lower division courses and meet the same distribution requirements that apply to the Canadian Studies major, in addition to the following courses.

### Lower Division Requirements

Students complete three of  
GEOG 162-3 Canada  
HIST 101-3 Canada to Confederation  
POL 221-3 Introduction to Canadian Government  
POL 222-3 Introduction to Canadian Politics  
POL 223-3 Canadian Political Economy (or CNS 280)  
SA 100W-4 Perspectives on Canadian Society

### Upper Division Requirements

Students must complete a minimum of 50 upper division units, including  
CNS 495-5 Canadian Studies Honors Essay

Four additional upper division CNS courses must be completed, plus 33 additional upper division units in Canadian studies/Canadian content. No more than 18 units may be from curriculum of any single department or program other than Canadian studies.

Honors students must demonstrate functional bilingual English/French proficiency by completing FREN 221. See "Joint Honors Program" on page 96 regarding level of entry and course challenge.

### Minor Program

Students complete nine Canadian studies lower division units from the following.

CNS 160-3 The Social Background of Canada  
CNS 210-3 Foundations of Canadian Culture  
CNS 250-3 Perspectives on the Environment in Canada  
CNS 260-3 Screening Canadian Experience  
CNS 280-3 Canadian Political Economy (or POL 223)

Also, 15 units of upper division Canadian studies/Canadian content are required, one of which must be a CNS upper division course.

Students completing this minor with a major, minor or honors in another department or program may not count any Canadian content course used by that department or program as part of the minor. A working knowledge of French is recommended. Minor students do not satisfy key course requirements.

### Extended Minor Program

This program consists of the lower division requirements for a major and the upper division requirements for a minor. Certain other criteria may be set by individual departments. Students must have their program approved by the advisor.

## Joint Major Programs

Canadian Studies joint majors are available with the Departments of Archaeology, Criminology, English, Geography, History, Political Science, and Sociology and Anthropology, and the School of Communication.

Exception for a history joint major (see page 96), students complete all requirements for a Canadian studies major and the other subject. Any lower division course that counts toward the separate Canadian studies requirements and for the other subject may count towards both. Up to 12 upper division units in both Canadian studies and the other subject may count toward the upper division requirements of both. A joint major in Canadian studies and another subject that also specifies 30 upper division units will therefore require a total of 48 upper division units in the two subjects (30 Canadian studies plus 30 in the other subject minus 12 overlap). Joint majors complete all key courses listed for the other department's major.

### Criminology and Canadian Studies Joint Major Program

See "Criminology and Canadian Studies Joint Major Program" on page 102.

### Canadian Studies and Sociology and/or Anthropology Joint Major Program

There are three joint major combinations of Canadian studies with sociology and anthropology. The total upper division unit requirement for this is 58 (30 Canadian studies plus 20 sociology plus 20 anthropology minus 12 overlaps).

### Canadian Studies and History Joint Major Program

Students complete all Canadian Studies major requirements plus 24 upper division history units, of which 12 must be 400 division. All upper division courses must be distributed within groups 1, 2 and 3. Students complete at least two from any two groups, and one from the remaining group. See "Major Program" on page 116 for the three groups.

## Joint Honors Program

Students complete all requirements for a Canadian studies major and honors in the other subject. Any lower division course that counts toward the separate Canadian studies requirements and the other subject may count towards both. Up to 15 upper division units in both Canadian studies and the other subject may be used toward the upper division requirements of both. Joint honors in Canadian studies and another subject that require 50 upper division units will therefore require 65 upper division units in the two subjects (30 CNS plus 50 in the other subject minus 15 overlap). For joint honors with sociology or anthropology, 75 upper division units are required (30 CNS plus 28 sociology plus 28 anthropology plus four additional sociology or anthropology minus 15 overlap with Canadian studies).

Students also complete the key overlap courses specified below for the Canadian studies joint major and the other subject, and the French language qualification specified above. To determine the French language entry level, a Department of French placement test is required. Students may challenge FREN 210, 211, 221 and 222. See "Course Challenge" on page 28.

## Canadian Content Courses

There are two categories that carry Canadian studies credit. 'Internal' Canadian studies (CNS) courses are multidisciplinary or may be special topics courses,

and are unique to the Canadian studies curriculum. See "Canadian Studies CNS" on page 327.

The other category comprises predominantly Canadian content courses offered by other departments (listed below). Some are considered key and are identified below each departmental listing. Asterisked courses (\*) completed for Canadian studies credit require the approval of the Canadian studies director. Additional courses may be approved for Canadian studies credit while others may be dropped. Check with the centre for a current list.

**Certificate in French Canadian Studies**

This program serves full and part-time students, and those seeking academic enrichment who are attracted by Continuing Studies' evening courses. French Canadian background material requires basic French language competency.

**Requirements**

Students complete

FREN 230-3 Introduction to French-Canadian Literature

HIST 328-4 The Province of Quebec from Confederation

POL 424-4 Quebec Government and Politics

Students must also achieve competence in the French language by either

- completing six units from group B courses below, or equivalent transfer credit as confirmed by a Department of French placement test. (Students requiring a reading knowledge of French should complete FREN 198 and the former FREN 298. The others stress speaking and understanding French.)
- or by passing a placement exam at the grade 12 French level, administered by the department.

**List of Relevant Courses**

In addition, at least 27 units are required, chosen from the list of relevant courses below, of which no more than six units in group B may be counted.

**Relevant Courses****Group A French Canadian Studies**

CNS 160-3 The Social Background of Canada

CNS 210-3 The Foundations of Canadian Culture

CNS 280-3 Canadian Political Economy

Ms. S. Senaratne BA (S Fraser), 8115 Robert C.  
 Brown Hall, 778.782.7127, [ssenarat@sfu.ca](mailto:ssenarat@sfu.ca)

The following programs are offered.

BA with a major in cognitive science  
 BA with a minor in cognitive science  
 honors in cognitive science: option A and option B

Research in cognition has surged recently, which affects fields such as psychology, linguistics, philosophy, computing science, education, anthropology, communications, and sociology. The greatest impact within psychology is in the sub-fields of psycholinguistics, cognitive psychology, and developmental psychology; within philosophy, on philosophy of language, philosophical logic, and

philosophy of mind; within linguistics, on semantics, syntax, phonology, and phonetics; and within computing science, on artificial intelligence.

Those working in these areas find they read the same literature and ask closely related questions in research and teaching. Increasingly, work in these fields belongs to a common area which cuts across traditional departmental organization. At Simon Fraser University, this interrelation is reflected in courses which draw on research, cognition and language from different departments. This program offers a structured and integrated study of cognition.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 90.

### Breadth Requirements

Students must fulfil the Faculty of Arts and Social Sciences breadth requirements (see "Writing, Quantitative, and Breadth Requirements" on page 90).

### Languages Other Than English

Most graduate schools require some proficiency in one or two languages other than English. Those who contemplate graduate studies are advised to include language courses in their programs.

### Grade Point Average Requirement

The cognitive science grade point averages (GPA) (cognitive science GPA and cognitive science upper division GPA) are calculated on all the courses selected to satisfy the graduation requirements for a major, minor or honors. Only courses from each discipline that satisfy the requirements of the major or minor will be used to calculate the COGSGPA.

### Major Program

A Cognitive Science Program GPA (COGSGPA) of 2.0 or higher is required for program continuation.

### Lower Division Requirements Introductory Courses

(21-27 units)

Students complete  
 COGS 100-3 Exploring the Mind  
 plus the following requirements.

#### Computing Science

Students complete either  
 CMPT 126-3 Introduction to Computing Science and Programming  
 or both of  
 CMPT 120-3 Introduction to Computing Science and Programming I  
 CMPT 125-3 Introduction to Computing Science and Programming II

Additionally students who choose intermediate level computing science, must complete  
 MACM 101-3 Discrete Mathematics I

**Linguistics**  
 LING 220-3 Introduction to Linguistics

**Philosophy**  
 PHIL 100-3 Knowledge and Reality

**Psychology**  
 PSYC 100-3 Introduction to Psychology I  
 PSYC 102-3 Introduction to Psychology II

### Intermediate Courses

(18-25 units)

#### Cognitive Science

COGS 200-3 Foundations of Cognitive Science

Plus students must fulfil the requirements listed below for at least three of the four disciplines.

#### Computing Science

CMPT 225-3 Data Structures and Programming

#### Linguistics

LING 221-3 Introduction to Phonetics and Phonology  
 LING 222-3 Introduction to Syntax

#### Philosophy

PHIL 201-3 Epistemology  
 PHIL 210-4 Natural Deductive Logic

#### Psychology

PSYC 201-4 Introduction to Research Methods in Psychology  
 PSYC 221-3 Introduction to Cognitive Psychology  
 PSYC 280-3 Introduction to Biological Psychology

### Upper Division Requirements

(33-35 units)

Students complete both  
 COGS 300-3 Selected Topics in Cognitive Science  
 COGS 310-3 Consciousness

plus they must also fulfil the requirements listed below for the three disciplines selected previously at the intermediate level with an upper division cognitive science grade point average (COGSGPA) of 2.0 or higher in each of these three disciplines.

#### Computing Science

one of  
 CMPT 379-3 Principles of Compiler Design  
 CMPT 383-3 Comparative Programming Languages  
 CMPT 384-3 Symbolic Computing  
 MACM 300-3 Formal Languages and Automata with Applications

plus any two of  
 CMPT 310-3 Artificial Intelligence Survey  
 CMPT 411-3 Knowledge Representation  
 CMPT 412-3 Computational Vision (or CMPT 414)  
 CMPT 413-3 Computational Linguistics  
 CMPT 417-3 Intelligent Systems  
 CMPT 418-3 Computational Cognitive Architecture  
 CMPT 419-3 Topics in Artificial Intelligence

#### Linguistics

any three of  
 LING 321-3 Phonology  
 LING 322-3 Syntax  
 LING 323-3 Morphology  
 LING 324-3 Semantics  
 LING 330-3 Phonetics  
 LING 350-3 First Language Acquisition  
 LING 400-3 Formal Linguistics  
 LING 480-3 Topics in Linguistics I\*  
 LING 481-3 Topics in Linguistics II\*

\*relevant topics include discourse analysis, functional linguistics, language and the brain, computational linguistics

#### Philosophy

any three of  
 PHIL 302-3 Topics in Epistemology and Metaphysics  
 PHIL 314-3 Topics in Logic I  
 PHIL 341-3 Philosophy of Science  
 PHIL 343-3 Philosophy of Mind  
 PHIL 344-3 Philosophy of Language I  
 PHIL 444-4 Philosophy of Language II

#### Psychology

any three of  
 PSYC 303-3 Perception  
 PSYC 325-4 Memory and Mind  
 PSYC 330-3 Attention

PSYC 335-3 Sensation  
 PSYC 354-3 Development of Children's Thinking  
 PSYC 363-3 Psychopharmacology  
 PSYC 382-3 Cognitive Neuroscience  
 PSYC 385-3 Evolutionary Psychology

## Honors Program

A cognitive science grade point average (COGSGPA) of 3.0 or higher is required for entrance and continuation in this program. Those interested in the honors program should consult the co-ordinator of the cognitive science program.

Two options are available: option A and option B.

### Option A

A student must fulfil the requirements for a major in cognitive science and choose the courses listed below for one of the disciplines, and complete COGS 490-5 Honors Project I  
 COGS 491-5 Honors Project II

### Computing Science

Students complete one of the following courses which has not been completed previously  
 CMPT 379-3 Principles of Compiler Design  
 CMPT 383-3 Comparative Programming Languages  
 CMPT 384-3 Symbolic Computing  
 MACM 300-3 Formal Languages and Automata with Applications

plus any three of the following courses which have not been completed previously  
 CMPT 310-3 Artificial Intelligence Survey  
 CMPT 411-3 Knowledge Representation  
 CMPT 412-3 Computational Vision (or CMPT 414)  
 CMPT 413-3 Computational Linguistics  
 CMPT 417-3 Intelligent Systems  
 CMPT 418-3 Computational Cognitive Architecture  
 CMPT 419-3 Topics in Artificial Intelligence

### Linguistics

Students complete any four of the following courses which have not been completed previously  
 LING 400-3 Formal Linguistics  
 LING 401-3 Topics in Phonetics  
 LING 403-3 Topics in Phonology  
 LING 405-3 Topics in Syntax  
 LING 406-3 Topics in Semantics  
 LING 423-3 Topics in Morphology  
 LING 480-3 Topics in Linguistics I\*  
 LING 481-3 Topics in Linguistics II\*

\*relevant topics include Discourse Analysis, Functional Linguistics, Language and the Brain, Computational Linguistics

### Philosophy

Students complete any four of the following courses which have not been completed previously  
 PHIL 302-3 Topics in Epistemology and Metaphysics  
 PHIL 314-3 Topics in Logic I  
 PHIL 341-3 Philosophy of Science  
 PHIL 343-3 Philosophy of Mind  
 PHIL 344-3 Philosophy of Language I  
 PHIL 444-3 Philosophy of Language II

or any topics course approved by the cognitive science advisor.

### Psychology

Students complete any three of the following courses which have not been completed previously  
 PSYC 303-3 Perception  
 PSYC 330-3 Attention  
 PSYC 430-3 Selected Topics in Cognition I  
 PSYC 432-3 Selected Topics in Cognition II  
 PSYC 480-3 Selected Topics in Biological Psychology I  
 PSYC 482-3 Selected Topics in Biological Psychology II

### Option B

Students choose any course combination listed above totalling at least 11 units accepted by the cognitive science steering committee, and COGS 490 and 491.

## Minor Program

### Lower Division Requirements

(21-31 units)

Students complete both of  
 COGS 100-3 Exploring the Mind  
 COGS 200-3 Foundations in Cognitive Science

Students fulfil the requirements listed below for two of the four disciplines. When provided with a choice between different 200 division courses, students should consider which course can be used as a prerequisite for a subsequent 300 division course.

### Computing Science

Students complete one of  
 CMPT 125-3 Introduction to Computing Science and Programming II  
 CMPT 126-3 Introduction to Computing Science and Programming

and all of  
 CMPT 225-3 Data Structures and Programming  
 MACM 101-3 Discrete Mathematics I

### Linguistics

LING 220-3 Introduction to Linguistics  
 and one of  
 LING 221-3 Introduction to Phonetics and Phonology  
 LING 222-3 Introduction to Syntax

### Philosophy

PHIL 100W-3 Knowledge and Reality  
 PHIL 201-3 Epistemology  
 PHIL 210-3 Natural Deductive Logic

### Psychology

PSYC 100-3 Introduction to Psychology I  
 PSYC 102-3 Introduction to Psychology II  
 PSYC 201-4 Introduction to Research Methods in Psychology  
 PSYC 221-3 Introduction to Cognitive Psychology  
 PSYC 280-3 Introduction to Biological Psychology

### Upper Division Requirements

(15-16 units)

Students complete both of  
 COGS 300-3 Selected Topics in Cognitive Science  
 COGS 310-3 Consciousness

Students complete three courses from the following, including at least one course in each of the two disciplines selected previously at the lower division.

### Computing Science

CMPT 310-3 Artificial Intelligence Survey  
 CMPT 411-3 Knowledge Representation  
 CMPT 412-3 Computational Vision  
 CMPT 413-3 Computational Linguistics  
 CMPT 414-3 Model-based Computer Vision  
 CMPT 417-3 Intelligent Systems  
 CMPT 418-3 Computational Cognitive Architecture  
 CMPT 419-3 Special Topics in Artificial Intelligence

**Note:** 400 division courses require instructor consent

### Linguistics

LING 321-3 Phonology  
 LING 322-3 Syntax  
 LING 324-3 Semantics  
 LING 330-3 Phonetics  
 LING 350-3 First Language Acquisition

### Philosophy

PHIL 302-3 Topics in Epistemology and Metaphysics  
 PHIL 314-3 Topics in Logic I  
 PHIL 341-3 Philosophy of Science  
 PHIL 343-3 Philosophy of Mind  
 PHIL 344-3 Philosophy of Language I

### Psychology

PSYC 303-3 Perception  
 PSYC 325-4 Memory and Mind  
 PSYC 330-3 Attention  
 PSYC 335-3 Sensation  
 PSYC 382-3 Cognitive Neuroscience  
 PSYC 383-3 Psychopharmacology  
 PSYC 385-3 Evolutionary Psychology

## Co-operative Education

This program, for qualified students who wish cognitive science practical experience, entails planned study and employment terms. To be eligible, students must normally have completed 30 units including COGS 100 and four other COGS courses. At least 15 of these 30 must be completed at Simon Fraser University with a minimum CGPA of 2.75.

College transfer students must complete at least 15 units at Simon Fraser University for co-op admission and must satisfy the requirements given above, or their equivalents. College transfer students who participated in co-op programs elsewhere may be credited with the term(s) already completed. The applicability of such terms depends on the evaluation of the Cognitive Science Program.

The following are completed during four work terms.

COGS 370-0 Cognitive Science Practicum I  
 COGS 371-0 Cognitive Science Practicum II  
 COGS 470-0 Cognitive Science Practicum III  
 COGS 471-0 Cognitive Science Practicum IV

Arrangements for work terms are made through the Faculty of Arts and Social Sciences co-op co-ordinator at least two terms in advance.

To continue in the program, students must maintain a minimum 2.75 CGPA in the academic course work.

Contact the cognitive science co-ordinator for further information; see "Co-operative Education" on page 212.

## School of Criminology

10125 Arts and Social Sciences Complex 1,  
 778.782.3213 Tel, 778.782.4140 Fax,  
[www.sfu.ca/criminology](http://www.sfu.ca/criminology), [crimgo@sfu.ca](mailto:crimgo@sfu.ca)

### Director

R.M. Gordon BA (La Trobe), MA (S Fraser),  
 PhD (Br Col)

### Professors Emeriti

E.A. Fattah LLL (Cairo), MA, PhD (Montr), FRSCan  
 K. Faith BA, PhD (Calif)

### Professors

G.S. Anderson BSc (Manc), MPM, PhD (S Fraser),  
 Burnaby Mountain Endowed Professor  
 N.T. Boyd BA (WOnt), LLB, LLM (Law Soc Upper Canada)  
 P.J. Brantingham AB, JD (Col), RCMP Chair in Crime Analysis  
 P.L. Brantingham AB (Col), MA (Fordham), MSP,  
 PhD (Florida State), RCMP Chair in Computational Criminology  
 J. Brockman BA (Sask), MA (Alta), LLB (Calg),  
 LLM (Br Col)  
 B. Burtch BA (Qu), MA (Tor), PhD (Br Col)  
 R.R. Corrado BA (Mich), MA, PhD (Northwestern)  
 R.M. Gordon BA (La Trobe), MA (S Fraser),  
 PhD (Br Col)  
 C.T. Griffiths BA, MA, PhD (Montana)  
 M.A. Jackson BA (Calif), MA, PhD (Tor)  
 J. Lowman BA (Sheff), MA (York, Can), PhD (Br Col)  
 T.S. Palys BA, MA (Manit), PhD (Car)  
 S.N. Verdun-Jones BA, MA (Camb), LLM, JSD (Yale)

### Associate Professors

L.S. Bell BSc (Brad), MSc, PhD (Univ Coll, London)

E.O. Boyanowsky BA (WOnt), MS, PhD (Wis)  
W.G. Glackman BA (Calif), MA, PhD (S Fraser)  
J.A. Osborne LLB (Edin), MA (Tor), LLM (Br Col),  
Associate Vice-President, Academic

#### Assistant Professors

M.A. Andresen BA, MA (S Fraser), PhD (Br Col)  
E. Beauregard BSc, MSc, PhD (Montr)  
M. Bouchard BSc, MSc, PhD (Montr)  
G.J. Davies BA, MA (S Fraser), PhD (Rutgers)  
E. Elliott BPE (Ott), MSW (Car), PhD (S Fraser)  
B. Kinney BA (Br Col), MA, PhD (S Fraser)  
P. Lussier BSc, MSc, PhD (Montr)  
D. MacAlister JD (Br Col), BA, MA (S Fraser),  
LLM (Qu)  
B. Morrison BS (Calif, PhD (ANU)  
R. Parent BA, MA, PhD (S Fraser)  
J.S. Wong BA (Br Col), MA (Claremont), MPhil,  
PhD (RAND)

#### Lecturers

B. Cartwright BA (S Fraser), MA (Br Col)  
S. Fabian BA (Br Col), MA (S Fraser)  
N.A. Madu BA (S Fraser), MA (Vic, BC)

#### Adjunct Professors

G. Bowbrick BA (S Fraser), LLB (Vic, BC)  
J. Brink FRCPC (Canada), FCPsych, BA (SA), MB,  
ChB (Capetown)  
D. Chappel BA, LLB (Tasmania), PhD (Camb)  
K. Davidson, Inspector OIC "E" Division, Behavioural  
Sciences Group, RCMP  
J. Faubert BA, MA (Guelph), PhD (S Fraser)  
D. Gustafson BA (Uvic), MA (Associated Mennonite  
Seminaries, Indiana)  
K. Heed BGS, MA (S Fraser)  
P. McCold BA (EWash), MA, PhD (NY State)  
P. McKnight LLB, MA (WOnt)  
P. Monture BA (WOnt), LLB (Qu), LLM (York, Can)  
K. Pranis BA, MA (Northwestern)  
C. Reasons BA (Central Wash), LLB (Br Col), MA  
(Ohio), PhD (Wash State)  
K. Rossmo BA (Sask), MA, PhD (S Fraser)  
S. Sharpe BA (N Dakota State), MA (N Colorado),  
PhD (Denver)  
B.D. Stuart BA (Bishop's), LLB (Qu), LLM (York, Can)

Mr. G. Sauro BA (S Fraser), 10156 Arts and Social  
Sciences Complex 1, 778.782.7800, gsauro@sfu.ca

Criminology offers courses leading to a bachelor of  
arts with a comprehensive, interdisciplinary approach.

The study of criminology attempts to unify all aspects  
of crime by an interdisciplinary and integrative  
approach. The curriculum assists students to acquire  
an in-depth understanding of the complexities of  
criminal, delinquent, and deviant behavior and of  
society's reaction to crime and deviance. Students  
concurrently acquire a theoretical and practical  
knowledge of the criminal justice system and its  
components, and gain insight into the philosophy,  
sociology, and present state of criminal law.

A wide range of disciplines including psychology,  
sociology and anthropology, political science,  
business administration, economics, philosophy,  
computing science, and mathematics are integrated  
with criminology courses into a curriculum which  
covers the following areas.

### Understanding Individuals, Society, the System and the Law

understanding the individual in society  
understanding human behavior  
understanding the criminal justice system  
understanding criminal behavior  
understanding the law  
understanding specific criminological problems

### Learning the Techniques

research methods and techniques  
techniques of intervention  
techniques of management, administration and  
planning  
relating theory to practice  
field work

This interdisciplinary program and the wide variety of  
criminology courses and other behavioral and social  
sciences integrated within it, allow students to pursue  
an interest in a different sector of applied criminology:  
crime prevention, corrections, criminal law reform and  
social reform.

## Enrolment Limitations

### Admission Requirements

The school limits upper division admission to its  
major, minor and honors programs. Entry is based on  
a formal application as soon as the lower division  
requirements are complete, for upper division  
admission effective the following term. Students are  
eligible to apply for entry to the major/honors program  
after successful completion of 60 units, including the  
lower division group A and B required courses.  
Students are eligible to apply for entry to the minor  
program after successful completion of 60 units  
including CRIM 101, 131 and 135. Students should  
make application to the school immediately after they  
have completed the above requirements.

### Continuation in Major, Honors or Minor

To continue in the major or minor programs, students  
must maintain a 2.25 CGPA. Students whose CGPA  
falls below 2.25 cannot enrol in any upper division  
CRIM courses including those offered through  
distance education. When it is restored to 2.25,  
students will be readmitted after review and approval  
of the director of undergraduate programs.

For honors continuance, a 3.00 CGPA must be  
maintained. Those with a lower CGPA cannot enrol in  
CRIM 499 and, therefore, cannot complete the  
program.

### Appeal Procedure

Applicants denied admission to a criminology  
major/honors/minor may appeal in writing to the  
school's director. If that appeal results in a negative  
decision, a written appeal to the dean of the Faculty of  
Arts and Social Sciences may be submitted. Appeals  
will be granted only in very exceptional  
circumstances.

### Enrolment Priority

Enrolment priority for limited enrolment upper division  
seminar courses in the school will be established on  
the basis of cumulative GPA.

### Transfer Students

Students transferring to Simon Fraser University from  
a two-year college that has articulated the first 60  
units of study in criminology with the School of  
Criminology will be considered on the basis of their  
college cumulative GPA (recalculated on the basis of  
grades received in courses transferable to the  
University), as well as other relevant materials.

## Writing, Quantitative, and Breadth Requirements

Degree program students must fulfil writing,  
quantitative and breadth requirements as part of their  
program. See "Writing, Quantitative, and Breadth  
Requirements" on page 7 for more information. For  
the faculty's requirements, see "Writing, Quantitative,  
and Breadth Requirements" on page 88.

## Major Program

Students in the general degree program must  
complete a total of 120 units (see "Major Program" on  
page 6 and the following requirements.)

Students majoring in criminology must obtain a  
minimum grade of C- in all required group A and  
group B courses.

### Lower Division Requirements

(normally the first 60 units)

Students complete 60 units including the  
requirements set out below under Group A, Group B  
and general electives.

- eight courses from group A
- seven courses from group B
- an additional five courses of general electives

The Faculty of Arts and Social Sciences breadth  
requirements must be completed for graduation and  
the general electives should be considered for that  
purpose.

Students may not complete group B requirements  
other than those listed below unless permission is  
obtained from the school's undergraduate curriculum  
committee prior to completing the course.

### Group A Lower Division Requirements

For admission to the major program, students who  
have completed PSYC 201 with a C- grade or better  
may request a waiver from CRIM 220 by petitioning  
the undergraduate advisor. Only in exceptional cases  
will this waiver be granted, and if approved, an  
additional three units of upper division criminology  
must be completed to replace CRIM 220.

Students are required to complete all of  
CRIM 101-3 Introduction to Criminology  
CRIM 103-3 Psychological Explanations of Criminal  
and Deviant Behavior  
CRIM 104-3 Sociological Explanations of Criminal  
and Deviant Behavior  
CRIM 131-3 Introduction to the Criminal Justice  
System — A Total System Approach  
CRIM 135-3 Introduction to Canadian Law and Legal  
Institutions: A Criminal Justice Perspective  
CRIM 220-3 Research Methods in Criminology  
CRIM 230-3 Criminal Law

plus one of  
CRIM 203-3 Historical Reaction to Crime and  
Deviance  
CRIM 210-3 Law, Youth and Young Offenders  
CRIM 213-3 Introduction to Women and Criminal  
Justice  
CRIM 231-3 Introduction to the Judicial Process  
CRIM 241-3 Introduction to Corrections  
CRIM 251-3 Introduction to Policing

### Group B Lower Division Requirements

Students are required to complete seven courses,  
including all of  
PSYC 100-3 Introduction to Psychology I  
PSYC 102-3 Introduction to Psychology II  
SA 150-4 Introduction to Sociology

plus one of  
POL 100-3 Introduction to Politics and Government  
POL 151-3 The Administration of Justice

plus one of  
PSYC 210-4 Data Analysis in Psychology

STAT 100-3 Chance and Data Analysis  
 STAT 101-3 Introduction to Statistics  
 STAT 203-3 Introduction to Statistics for Social Sciences\*

\*STAT 203 is recommended

plus one of

PHIL 001-3 Critical Thinking  
 PHIL 100-3 Knowledge and Reality  
 PHIL 110-3 Introduction to Logic and Reasoning  
 PHIL 120-3 Introduction to Moral Philosophy  
 PHIL 150-3 History of Philosophy I  
 PHIL 151-3 History of Philosophy II  
 PHIL 220-3 Introduction to Social and Political Philosophy  
 PHIL 244-3 Introduction to the Philosophy of Natural and Social Science  
 PHIL 280-3 Introduction to Existentialism

plus at least one lower division course chosen from the following disciplines.

archaeology (ARCH)  
 business administration (BUS)  
 Canadian studies (CNS)  
 communication (CMNS)  
 computing science (CMPT)  
 economics (ECON and BUEC)  
 education (EDUC)  
 English (ENGL)  
 geography (GEOG)  
 history (HIST)  
 mathematics (MATH)  
 philosophy (PHIL)  
 political science (POL)  
 psychology (PSYC)  
 sociology and anthropology (SA)  
 statistics (STAT)  
 women's studies (WS)

### General Electives Lower Division Requirements

Students are required to complete the balance of the first 60 units by choosing any other 100-200 division courses or the transfer equivalent thereof. Faculty of Arts and Social Sciences breadth requirements must be completed for graduation and general electives should be considered for that purpose.

**Note:** Declared criminology majors normally complete all lower division group A and B requirements before proceeding to upper division. Students may proceed to upper division courses without having completed these lower division courses only with the express written approval of the criminology undergraduate curriculum and articulation committee.

### Upper Division Requirement

Students complete a minimum of 48 units in courses as set out below. Of these 48, students are required to complete a minimum of 36 in criminology (excluding CRIM 301), which must include the following four courses.

CRIM 300-3 Current Theories and Perspectives in Criminology  
 CRIM 320-3 Quantitative Research Methods in Criminology  
 CRIM 321-3 Qualitative Research Methods in Criminology  
 CRIM 330-3 Criminal Procedure and Evidence

Please see "Criminology CRIM" on page 348 for the listing of upper division criminology courses.

An additional 12 required units may be chosen from criminology or other disciplines excluding CRIM 301.

**Note:** Many upper division courses have prerequisites or enrolment restrictions. If in doubt about eligibility to enrol in a non-criminology course, contact the advisor in the appropriate department *well in advance* of any attempt to enrol.

### Additional Electives

To satisfy degree requirements, the remaining units may be selected at the student's discretion. Faculty of Arts and Social Sciences breadth requirements must be completed for graduation so general electives should be considered for that purpose.

### Police Studies Concentration

Advisor

Mr. P. Jong, Arts and Social Sciences Complex 1, 778.782.3645, philjong@sfu.ca

This concentration is offered to those completing a major, honors, minor or post baccalaureate diploma in criminology. While the concentration is offered primarily at the Simon Fraser University Surrey campus, many will be taught at the main Burnaby campus, and through the Centre for On-Line and Distance Education. The concentration is aimed at students who wish to focus their criminology undergraduate studies on policing-related courses, and they are advised to complete the following.

CRIM 251-3 Introduction to Policing  
 CRIM 455-3 Advanced Issues in Policing

In addition, students are advised to complete a minimum of 18 upper division units (additional to CRIM 455), as well as any lower division prerequisites. Policing courses are divided into the following areas of specialty.

#### *Minorities and the Criminal Justice System*

CRIM 311-3 Minorities and the Criminal Justice System  
 CRIM 419-3 Aboriginal/Indigenous Justice  
 CRIM 429-3 Indigenous Peoples and International Law

#### *Forensic Studies*

CRIM 315-3 Restorative Justice  
 CRIM 355-3 The Forensic Sciences  
 CRIM 356-3 The Forensic Sciences II  
 CRIM 357-3 Forensic Anatomy  
 CRIM 451-3 Advanced Techniques in Forensic Science  
 CRIM 452-3 Skeletal Pathology and Criminalistics  
 CRIM 442-3 Restorative Justice Practice: Advanced Topics

#### *Crime Analysis and Crime Prevention*

CRIM 350-3 Techniques of Crime Prevention I  
 CRIM 352-3 Environmental Criminology: Theory and Practice  
 CRIM 433-3 Communities and Crime  
 CRIM 450-5 Techniques of Crime Prevention II

#### *Special Types of Offenders or Crimes*

CRIM 316-3 Sexual Offenders and Sexual Offences  
 CRIM 317-3 Prostitution in Canada  
 CRIM 454-3 Criminal Profiling

#### *Key Issues in Policing*

CRIM 310-3 Young Offenders and Criminal Justice: Advanced Topics  
 CRIM 314-3 Mental Disorder, Criminality and the Law  
 CRIM 410-3 Decision-making in Criminal Justice  
 CRIM 413-3 Terrorism  
 CRIM 453-3 Policing Illegal Drug Markets

and any other 300 or 400 division course that is designated as a police studies course (see the advisor for further information).

### Honors Program

The School of Criminology's structured honors program for outstanding undergraduate students dovetails with the criminology major and consists of two terms of advanced course work and supervised research. Honors students write and defend a short thesis. Students are admitted as a group each September, and must complete and defend their theses by the following April.

Students normally enter the program with a minimum of 110 units (see below) but may enter with less and complete one additional course in the first term with undergraduate program director permission. Students complete 132 units minimum with GPAs in accordance with general and Faculty of Arts and Social Sciences graduation requirements including a minimum 3.00 CGPA (3.50 for first class honors).

Students may also complete a police studies concentration (see "Police Studies Concentration" on page 101).

See "Honors Program" on page 6 and "Grade Point Averages Needed for Graduation" on page 31.

### Admission Requirements

Eligible students should apply to the undergraduate program director. The selection process normally happens each spring for September admission.

### Lower Division Requirements

Lower division requirements are the same as for the major in criminology.

### Upper Division Requirements

Students complete a minimum of 60 upper division units. Of these 60, 50 units minimum must be from upper division criminology courses and must include

CRIM 300W-3 Current Theories and Perspectives in Criminology  
 CRIM 320-3 Quantitative Research Methods in Criminology  
 CRIM 321-3 Qualitative Research Methods in Criminology  
 CRIM 330-3 Criminal Procedure and Evidence  
 CRIM 490-5 Honors Thesis I  
 CRIM 491-5 Current Theory and Research in Criminology: Advanced Topics  
 CRIM 499-12 Honors Thesis II

The remaining units, to satisfy degree requirements, may be selected at the student's discretion. Faculty of Arts and Social Sciences breadth requirements must be completed for graduation; general electives should be considered for that purpose.

For program continuation, students must maintain a 3.0 cumulative grade point average (CGPA). Those whose CGPA falls below 3.0 cannot enrol in CRIM 499 and therefore cannot complete the program.

### Criminology Minor Program

Students complete all of

CRIM 101-3 Introduction to Criminology  
 CRIM 131-3 Introduction to the Criminal Justice System — a Total System Approach  
 CRIM 135-3 Introduction to Canadian Law and Legal Institutions: A Criminal Justice Perspective

and at least 18 other units in criminology courses numbered 300 and above. A minimum C- grade in each of CRIM 100/101/102, 131 and 135 is also required.

Students may also complete a police studies concentration (see "Police Studies Concentration" on page 101).

### Legal Studies Minor Program

#### Lower Division Requirements

Students complete a minimum of nine lower division units including both

CRIM 135-3 Introduction to Canadian Law and Legal Institutions  
 POL 151-3 The Administration of Justice

and at least one of  
 CRIM 210-3 Law, Youth and Young Offenders

CRIM 230-3 Criminal Law  
 CRIM 231-3 Introduction to the Judicial Process  
 PHIL 120 is strongly recommended.

### Upper Division Requirements

Students complete one of  
 CRIM 332-3 Sociology of Law  
 CRIM 338-3 Philosophy of Law

Students must select additional courses totalling at least 15 units from the upper division courses listed from those listed below. Students must be careful to ensure they have necessary lower level prerequisites.

Note: Students who have completed both CRIM 332 and 338 need only complete 12 units from the list below. Criminology majors who wish to complete the this minor must complete six of the upper division units in a discipline outside of their major.

BUEC 391-3 Law in the Economic Society  
 BUEC 427-3 Industrial Organization: Law and Economics  
 BUS 393-3 Commercial Law  
 CRIM 310-3 Young Offenders and Criminal Justice: Advanced Topics  
 CRIM 314-3 Mental Disorder, Criminal Procedure and Evidence  
 CRIM 331-3 Advanced Criminal Law  
 CRIM 333-3 Women, Law and the State  
 CRIM 335-3 Human Rights and Civil Liberties  
 CRIM 336-3 Corporate Crime and Corporate Regulation  
 CRIM 416-3 Current Issues in Criminology and Criminal Justice\*  
 CRM 417-3 Current Issues in Criminology and Criminal Justice\*  
 CRIM 418-3 Current Issues in Criminology and Criminal Justice\*  
 CRIM 430-3 Judicial Administration and Planning

\*when offered as a legal topic

\*\*when offered as the topic Women and the Law

Check with the school for additional relevant courses.

Students may also complete a police studies concentration (see "Police Studies Concentration" on page 101).

### Extended Minor Program

This program consists of the lower division requirements for a major and the upper division requirements for a minor. Certain other criteria may be set by individual departments and programs. A student must have their program approved by the advisor for the extended minor program.

## Criminology and Canadian Studies Joint Major Program

A joint major with the School of Criminology and the Centre for Canadian Studies is available. Students complete all requirements for a criminology major and a Canadian studies major. Any lower division course that counts toward the separate requirements for Canadian studies and for criminology may be counted towards both. Up to 12 upper division units in both Canadian studies and criminology may be counted toward the upper division unit requirements of both. A joint major in Canadian studies and criminology that also specifies 30 upper division units will therefore require a total of 48 upper division units in the two subjects (30 Canadian studies plus 30 criminology minus 12 overlap). Joint majors are required to complete all the key courses listed for the department in which they are pursuing the other major.

## Criminology and Psychology Joint Major Program

### Program Requirements

This program explores relationships between the study of criminology and psychology. Students should consult advisors in both departments.

Students must satisfy the admission requirements for both criminology and psychology major programs and have School of Criminology approval before being approved by the Department of Psychology. To continue in the joint major, students must maintain a 2.25 CGPA and cannot enrol in upper division criminology courses with a CGPA of less than 2.25. However, a student whose CGPA is between 2.00 and 2.25 may be eligible for a major in psychology.

Students who complete CRIM 220 must obtain a Department of Psychology waiver of the PSYC 201 prerequisite for PSYC 210 and all 300/400 division PSYC courses, in advance of attempting to enrol for any of these courses. Students who complete PSYC 201 must obtain from the criminology advisor a waiver of the CRIM 220 prerequisite for CRIM 320, in advance of attempting to enrol for this course.

### Criminology Requirements

#### Group A Lower Division Requirements

all of

CRIM 101-3 Introduction to Criminology  
 CRIM 103-3 Psychological Explanations of Criminal and Deviant Behavior  
 CRIM 104-3 Sociological Explanations of Criminal and Deviant Behavior

plus all of

CRIM 131-3 Introduction to the Criminal Justice System — A Total System Approach  
 CRIM 135-3 Introduction to Canadian Law and Legal Institutions: A Criminal Justice Perspective  
 CRIM 230-3 Criminal Law

plus one of

CRIM 203-3 Historical Reaction to Crime and Deviance  
 CRIM 210-3 Law, Youth, and Young Offenders  
 CRIM 213-3 Introduction to Women and Criminal Justice  
 CRIM 231-3 Introduction to the Judicial Process  
 CRIM 241-3 Introduction to Corrections  
 CRIM 251-3 Introduction to Policing

#### Group B Lower Division Requirements

SA 150-4 Introduction to Sociology

plus one of

POL 100-3 Introduction to Politics and Government  
 POL 151-3 The Administration of Justice

plus one of

PHIL 001-3 Critical Thinking

PHIL 100-3 Knowledge and Reality  
 PHIL 110-3 Introduction to Logic and Reasoning  
 PHIL 120-3 Introduction to Moral Philosophy  
 PHIL 150-3 History of Philosophy I  
 PHIL 151-3 History of Philosophy II  
 PHIL 220-3 Introduction to Social and Political Philosophy  
 PHIL 244-3 Introduction to the Philosophy of Natural and Social Science  
 PHIL 280-3 Introduction to Existentialism

### Upper Division Requirements

all of

CRIM 300-3 Current Theories and Perspectives in Criminology  
 CRIM 320-3 Quantitative Research Methods in Criminology  
 CRIM 330-3 Criminal Procedure and Evidence

plus a minimum of 12 units of upper division criminology group A courses (excluding CRIM 369 and 462) and six units of upper division non-criminology (group B) courses *other than* psychology.

### Psychology Requirements

#### Lower Division Requirements

all of

PSYC 100-3 Introduction to Psychology I\*  
 PSYC 102-3 Introduction to Psychology II\*  
 PSYC 207-3 Introduction to the History of Psychology\*  
 PSYC 210-4 Introduction to Data Analysis in Psychology\*

plus one of

CRIM 220-3 Research Methods in Criminology\*  
 PSYC 201-4 Introduction to Research Methods in Psychology\*

\*students must obtain a final course grade of C (2.0) or better in **each** of these courses.

plus one group A course

PSYC 221-3 Introduction to Cognitive Psychology  
 PSYC 280-3 Introduction to Biological Psychology

plus one group B course

PSYC 241-3 Introduction to Abnormal Psychology  
 PSYC 250-3 Introduction to Developmental Psychology  
 PSYC 260-3 Introduction to Social Psychology  
 PSYC 268-3 Introduction to Law and Psychology  
 PSYC 270-3 Introduction to Theories of Personality

### Upper Division Requirements

Students complete 21 units in upper division psychology courses. No more than three of these units may be in directed studies. At least 11 upper division psychology units must be completed at Simon Fraser University.

## Sociology or Anthropology and Criminology Joint Major Program

See "Sociology or Anthropology and Criminology Joint Major Program" on page 135.

## Women's Studies and Criminology Joint Major Program

See "Criminology and Women's Studies Joint Major Program" on page 140 for requirements.

## Certificate Programs

Advisor

Mr. P. Jong, 10125 Arts and Social Sciences  
 Complex 1, 778.782.3645

Two criminology certificate program are offered: general certificate in criminology; advanced certificate in criminology. Both are primarily directed toward

undergraduates and criminal justice professionals, but are open to all. Those who hold a bachelor's degree (in any field of study) should refer to the post baccalaureate diploma in criminology.

The certificates are not designed to satisfy specific employment credentials. Rather, the general certificate provides a basic theoretical and descriptive criminology foundation; the advanced certificate provides in-depth understanding with intensive study.

These certificate program courses are offered through the Centre for Distance Education to assist students in understanding the complexities of illegal behaviors, as well as society's reactions.

### Admission Requirements

Applicants must meet undergraduate admission deadlines as shown in this Calendar. Application forms and official documents must be submitted to Student Services. In addition to applying for University admission, students apply in writing to the school's advisor for certificate program admission.

## General Certificate

### Program Requirements

- successful completion of 60 units, including the required courses as listed below
- a minimum grade of C- in each of the courses required for the certificate
- the majority of criminology courses must be completed through the Centre for Distance Education
- completion of the certificate within five years of admission to the program

### Required Courses

CRIM 101-3 Introduction to Criminology  
CRIM 103-3 Psychological Explanations of Criminal and Deviant Behavior  
CRIM 104-3 Sociological Explanations of Criminal and Deviant Behavior

plus all of

CRIM 131-3 Introduction to the Criminal Justice System – A Total System Approach  
CRIM 135-3 Introduction to Canadian Law and Legal Institutions: A Criminal Justice Perspective  
CRIM 220-3 Research Methods in Criminology  
CRIM 230-3 Criminal Law  
PHIL 110-3 Introduction to Logic and Reasoning  
POL 151-3 The Administration of Justice  
PSYC 100-3 Introduction to Psychology I  
PSYC 102-3 Introduction to Psychology II  
SA 150-4 Introduction to Sociology  
STAT 101-3 Introduction to Statistics

The remaining units must be selected from specific groups of optional courses as follows.

- one course must be chosen from group A
- two courses must be chosen from group B
- the balance may be satisfied with courses chosen from groups A, B or C

### Optional Courses

#### Group A

Students may choose from any of the remaining 100 and 200 division distance education courses, such as

CRIM 213-3 Introduction to Women and Criminal Justice  
CRIM 241-3 Introduction to Corrections  
CRIM 251-3 Introduction to Policing

#### Group B

Any 100 and 200 division distance education courses from the group B disciplines may be chosen, such as archaeology (ARCH)  
business administration (BUS)  
Canadian studies (CNS)  
communication (CMNS)

computing science (CMPT)  
economics (ECON and BUEC)  
education (EDUC)  
English (ENGL)  
geography (GEOG)  
history (HIST)  
mathematics (MATH)  
philosophy (PHIL)  
political science (POL)  
psychology (PSYC)  
sociology and anthropology (SA)  
statistics (STAT)  
women's studies (WS)

### Group C

Any lower division courses offered at Simon Fraser University or which transfer from another post-secondary institution (including the Open Learning Agency) to the equivalent of 100-200 division Simon Fraser University courses.

**Note:** Students enrolled at Simon Fraser University must obtain prior permission of Student Services by completing the letter of permission form.

## Advanced Certificate

### Program Requirements

- completion of Simon Fraser University's general criminology certificate, or two years (equivalent to 60 Simon Fraser University units) of accredited course work at a university or community college, or completion of a criminology certificate or diploma from a BC regional college prior to entering the advanced certificate program

**Note:** Students without a criminology certificate or diploma must complete CRIM 101, 131 and 135, and obtain at least C- in each.

- successful completion of 18 units from criminology courses numbered 300/400 (refer to the group A courses in the criminology major program section)
- the majority of courses must be completed through distance education (consult the Centre for Distance Education for a list of criminology distance education courses)
- completion of the certificate within five years of admission to the program

## Post Baccalaureate Diploma Programs

### Advisor

Mr. P. Jong, 10125 Arts and Social Sciences Complex 1, 778.782.3645

This program is for students who hold a bachelor's degree in a discipline other than criminology to expand their knowledge of criminology through a recognized program. Students pursue individual interests in specific criminology areas. The program is available through distance education, at the Burnaby and Vancouver campuses.

For information about post baccalaureate diploma program general regulations, see "Post Baccalaureate Diploma Program" on page 7.

## Post Baccalaureate Diploma in Criminology

### Program Requirements

- completion of lower division prerequisite courses CRIM 101, 131 and 135
- successful completion of an approved program comprised of 30 units of third and fourth year courses
- of the 30 units, a minimum of 15 must come from criminology courses numbered 300/400 and the

remaining from any upper division on campus or distance education courses, or a combination of both

- minimum 2.5 GPA on courses applied toward the diploma
- completion of the diploma within five years of admission to the program

For information, contact the advisor in criminology.

### Application Deadlines

Written application for program admission must be received by the advisor no later than

February 1 (summer term admission)  
April 30 (fall term admission)  
September 30 (spring term admission)

Students must make separate application for admission to the University, in accordance with University deadlines for the appropriate term.

Applications received by the school after the deadline will be considered only if resources permit following consideration of those applications received on time.

## Post Baccalaureate Diploma in Legal Studies

### Program Requirements

Students complete 30 approved upper division units, ensuring that they have the necessary lower division prerequisites for all courses in which they enrol.

Students complete both of  
CRIM 332-3 Sociology of Law  
CRIM 338-3 Philosophy of Law

In addition, students select one of the following concentrations and complete all of the courses listed.

#### *Criminal Law*

CRIM 310-3 Young Offenders and Criminal Justice:  
Advanced Topics  
CRIM 314-3 Mental Disorder, Criminality and the Law  
CRIM 330-3 Criminal Procedure and Evidence  
CRIM 331-3 Advanced Criminal Law  
CRIM 335-3 Human Rights and Civil Liberties

#### *Women and Law*

CRIM 333-3 Women, Law and the State  
CRIM 335-3 Human Rights and Civil Liberties  
CRIM 432-3 Gender in the Courts and the Legal Profession  
WS 303-4 Special Topics in Women's Studies\*

\*when offered as the topic Women and the Law

#### *Psychology and the Law*

PSYC 369-3 Law and Psychology  
PSYC 469-4 Selected Topics in Psycholegal Issues  
CRIM 314-3 Mental Disorder, Criminality and the Law  
CRIM 435-3 Adult Guardianship Law

#### *Education and Law*

EDUC 445-4 Legal Context of Teaching  
EDUC 446-4 Law for the Classroom Teacher  
EDUC 448-4 Law in the Curriculum

#### *Business, Economics and the Law*

BUEC 391-3 Law in the Economic Society  
BUEC 427-3 Industrial Organization: Law and Economics  
BUS 393-3 Commercial Law  
ECON 388-3 Introduction to Law and Economics

#### *Fundamental Rights and Law*

CRIM 335-3 Human Rights and Civil Liberties  
PHIL 320-3 Social and Political Philosophy (or 321)  
POL 324-4 Canadian Constitution  
POL 417-4 Human Rights Theories

To total 30 units, students choose additional courses from the Legal Studies Minor Program electives list (see "Legal Studies Minor Program" on page 101). Exemptions and replacements for required courses

may be granted by the criminology associate director who is responsible for undergraduate programs.

Students may also complete a police studies concentration (see page 101).

## Co-operative Education

### Program Requirements

This program, offered to qualified students who want practical criminology experience, entails planned terms of study and employment in the area of the student's choice. To be admitted, students must have completed 30 units, including all of

CRIM 101-3 Introduction to Criminology  
 CRIM 103-3 Psychological Explanations of Criminal and Deviant Behavior  
 CRIM 104-3 Sociological Explanations of Criminal and Deviant Behavior  
 CRIM 131-3 Introduction to the Criminal Justice System — A Total System Approach  
 CRIM 135-3 Introduction to Canadian Law and Legal Institutions: A Criminal Justice Perspective  
 CRIM 220-3 Research Methods in Criminology

plus one of

PSYC 210-4 Data Analysis in Psychology  
 STAT 100-3 Chance and Data Analysis  
 STAT 101-3 Introduction to Statistics  
 STAT 203-3 Introduction to Statistics for the Social Sciences

and have a 2.75 minimum CGPA. Transfer students must have completed at least 15 units at Simon Fraser University.

See "Co-operative Education" on page 212. Work term arrangements are made through the Faculty of Arts and Social Sciences co-op co-ordinator, who should be consulted at least one term in advance.

\*joint appointment with business administration

The Department of Economics offers honors and major programs leading to the BA degree, and joint honors and joint major programs in co-operation with the Faculty of Business Administration and the Departments of Political Science, Geography (environmental specialty) and Latin American Studies. A minor program is offered for students who are majoring or completing honors programs in disciplines other than economics.

## Admission Requirements

Major, honors and minor program admission (including joint honors and joint majors) is limited. Entry is via a formal department application. Students may apply for admission once ECON 103, 105 and MATH 157 are completed with at least a C- grade in each course and the minimum CGPA is met.

On recommendation of the department and the Dean of Arts and Social Sciences office, the University establishes a yearly quota to admit students to major, honors, and minor programs, based on projected course space and department resources. The department announces the minimum CGPA below which students will not normally be considered.

Applications with appropriate documentation should be filed with the departmental advisor. Those whose applications are not approved may appeal to the department's undergraduate program chair. Students not accepted upon initial application may reapply.

## Non-Majors Access to Courses

### Lower Division

Access to lower division ECON and BUEC courses is available to all students meeting the prerequisites.

### Upper Division ECON Courses

Non-majors who meet the current CGPA entrance requirements have the same access as approved economics students to upper division ECON courses.

### Upper Division BUEC courses

Non-majors who meet the current CGPA entrance requirements have the same access as approved students in Economics and Business programs to upper division BUEC courses.

### Transfer Students

Students transferring to Simon Fraser University will be considered on the basis of their entrance CGPA (calculated for grades received in courses transferable to the University). Transfer students must be admitted to the University before applying for admission to the department's major, honors or minor programs. Students who meet these requirements will be admitted provisionally to the program and will retain the provisional status until 15 units have been completed at the University. To continue, the CGPA for these 15 must equal or exceed the CGPA entrance requirement for non-transfer students.

### Exchange and Visiting Students

Exchange and visiting students must obtain approval from the Department of Economics prior to enrolling in upper division ECON/BUEC courses.

## Course Information

For a course to fulfil a prerequisite, or for a required course to be accepted in a student's Economics program, a grade of C- or higher must be obtained.

BUEC courses are offered jointly by the Faculty of Business Administration and the Department of Economics. They may count for credit in either Business Administration or Economics programs, but not for both. A student may not receive credit for both BUEC courses and (former) ECON/COMM courses which have the same number.

Prerequisites may be waived for individuals by the department. In order for a course to be accepted as fulfilling a prerequisite, or for a required course to be accepted in a student's program in Economics (i.e. major, joint major, honors, joint honors or minor), a student must have obtained a grade of C- or higher.

## Requirements for the BA Degree

All major and honors students must meet BA degree requirements for either the honors or general program as described in the *Faculty of Arts and Social Sciences* section. Students should fulfil Faculty requirements early in their programs and obtain broadly based backgrounds before entering upper division courses. Major and honors must complete lower division requirements in the first 60 units prior to program acceptance (including joint programs).

For a course to fulfil a prerequisite, or for a required course to be accepted in an economics program (i.e., major, joint major, honors, joint honors, minor) students must have a grade of C- or higher.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

## Major Program

### Lower Division Requirements

Students complete the following with at least a C- in each course prior to admission to the major program.

ECON 103-4 Principles of Microeconomics  
ECON 105-4 Principles of Macroeconomics  
MATH 157-3 Calculus for the Social Sciences I (or equivalent)

To meet the requirements for the major program, students must also complete

BUEC 232-4 Data and Decisions I

Two 200 division ECON or BUEC courses (in addition to BUEC 232)

Students who earn at least an A- in both ECON 103 and 105 are exempt from the requirement of two 200 division ECON or BUEC courses. These students should see *Early Access to Upper Division Courses* below for additional program information.

### Upper Division Requirements

Normally, majors will include 45 units of upper division credit in their last 60 units of work toward the degree.

At least 30 units of upper division credit in economics is required, including

BUEC 333-4 Statistical Analysis of Economic Data  
ECON 301-4 Microeconomic Theory I: Competitive Behavior  
ECON 302-4 Microeconomic Theory II: Strategic Behavior  
ECON 305-5 Intermediate Macroeconomic Theory

and at least one 400 division ECON or BUEC course (excluding ECON 402, 403, 431 and 435, BUEC 433 and 485).

### Early Access to Upper Division Courses

Students normally cannot enter ECON upper division courses during the first 60 units, but for those who have the minimum Simon Fraser University grade point average required to access upper division ECON/BUEC courses, the following exceptions are permitted.

Students who earn a grade of A- or better at Simon Fraser University on their first attempt in ECON 103 and 105 may enrol for ECON 301 and 305, and all courses for which they have satisfied the prerequisites, once 30 units is completed.

Students who earn an A- grade or better at Simon Fraser University on their first attempt in BUEC 232 or STAT 270 may enrol for BUEC 333 once they have completed 30 units. These upper division courses will count towards Department of Economics and Simon Fraser University upper division requirements. See individual course descriptions for access information.

### Advanced Upper Division Courses

Access to ECON 402, 403, 435 and 499 is restricted to students who have excelled in their studies (see "Economics ECON" on page 357 for individual course description details). These advanced courses are recommended for students wishing to pursue more challenging work or who plan an additional degree.

### Group Requirements

To meet the requirements for the major program, students must include at least one of the following, with a grade of C- or higher.

ECON 102-3 The World Economy  
ECON 104-3 Economics and Government  
ECON 110-3 Foundations of Economic Ideas  
ECON 208-3 History of Economic Thought  
ECON 250-3 Economic Development in the Pre-industrial Period  
ECON 309-5 Introduction to Marxian Economics

ECON 353-4 Economic History of Canada  
ECON 354-3 Comparative Economic Institutions  
ECON 355-4 Economic Development  
ECON 404-3 Methodology of the Social Sciences  
ECON 409-3 Seminar in Economic Thought  
ECON 450-3 Seminar in Quantitative Economic History  
ECON 451-3 Seminar in European Economic History  
ECON 452-3 Seminar in Economic Prehistory  
ECON 453-3 Seminar in the Economics of Education  
ECON 455-3 Seminar in Economic Development  
ECON 490-3 Seminar in Public Choice

## Honors Program

In addition to the required lower division courses for the economics major, students must receive credit for at least 50 upper division units in economics including the following.

BUEC 333-4 Statistical Analysis of Economic Data  
ECON 301-4 Microeconomic Theory I: Competitive Behavior  
ECON 302-4 Microeconomic Theory II: Strategic Behavior  
ECON 305-5 Intermediate Macroeconomic Theory  
ECON 331-5 Introduction to Mathematical Economics\*  
ECON 402-3 Advanced Microeconomic Theory  
ECON 499-6 Honors Seminar in Economics

and at least two of the following.

ECON 402-3 Advanced Microeconomic Theory  
ECON 403-3 Advanced Macroeconomic Theory  
ECON 435-5 Econometric Methods

plus two 400 division ECON courses (excluding ECON 402, 403, 431, 435, BUEC 433 and 485)

\*honors students who have successfully completed both MATH 232 and 251 need not complete ECON 331. However, at least 50 upper division units in economics must still be completed.

### Group Requirements

Students must also include at least one course from the economics group requirement (see "Group Requirements" on page 106) and are responsible for fulfilling all requirements for an honors degree set up by the Faculty of Arts and Social Sciences.

## Minor Program

### Lower Division Requirements

A minimum C- grade in all of the required courses listed below is required.

ECON 103-4 Principles of Microeconomics  
ECON 105-4 Principles of Macroeconomics

two 200 division ECON or BUEC courses (excluding BUEC 232)

### Upper Division Requirements

At least 15 upper division units in economics or BUEC courses, completed following the completion of 60 units are required. A maximum of eight ECON upper division units from another institution can be applied to the minor in economics.

## Extended Minor

### Lower Division Requirements

Students complete the same lower division requirements as a major with a minimum C- grade in each course.

### Upper Division Requirements

Students complete least 15 upper division ECON or BUEC units following the completion of 60 lower division units.

## Business Administration and Economics Joint Major Program

### Lower Division Requirements

Requirements are the same as for the economics major and business administration major.

### Upper Division Requirements

Students complete at least 29 upper division business administration or BUEC units including the core courses with the following exception:

- BUS 207 and 303 are waived
- BUEC 333, which must be completed, will count as upper division economics units rather than upper division business administration units
- three courses beyond the core must be completed within the requirements of a single concentration
- at least **two** 400 division BUS or BUEC courses excluding practicum courses and BUS 478. These courses may be within the area of concentration.

Students also complete at least 25 units of upper division credit in BUEC\*\* or economics including BUEC 333-4 Statistical Analysis of Economic Data  
ECON 301-4 Microeconomic Theory I: Competitive Behavior

ECON 302-4 Microeconomic Theory II: Strategic Behavior

ECON 305-5 Intermediate Macroeconomic Theory

and at least one 400 division ECON or BUEC course (excluding ECON 431, 435, BUEC 433 and 485)

\*\*BUEC courses may count only once as business administration or economics credit.

### Group Requirements

Students must include at least one course from the economics groups requirements. For information, see "Group Requirements" on page 105.

## Economics and Political Science Joint Major Program

For requirements, see "Political Science and Economics Joint Major Program" on page 130.

## Geography and Economics – Environmental Specialty Joint Major Program

For requirements, see "Geography and Economics – Environmental Specialty BA Joint Major Program" on page 175.

## Latin American Studies and Economics Joint Major Program

See "Joint Major Programs" on page 122.

## Business Administration and Economics Joint Honors Program

### Lower Division Requirements

Students must satisfy the lower division requirements for a joint major in business administration and economics.

### Upper Division Requirements

Students complete at least 35 upper division business administration units including the core courses with the exception of BUEC 333, which is counted as economics upper division units rather than business administration upper division units. See "Core Courses" on page 145.

As well, students complete an area of concentration and at least **three** 400 division business administration courses\* (excluding practicum courses and BUS 478) plus at least 30 units of upper division credit in economics or BUEC including all of

BUEC 333-4 Statistical Analysis of Economic Data  
ECON 301-4 Microeconomic Theory I: Competitive Behavior  
ECON 302-4 Microeconomic Theory II: Strategic Behavior  
ECON 305-5 Intermediate Macroeconomic Theory  
ECON 331-5 Introduction to Mathematical Economics\*\*

and one of  
ECON 402-3 Advanced Topics in Microeconomics  
ECON 403-3 Advanced Topics in Macroeconomics

and one of  
ECON 435-5 Quantitative Methods in Economics  
ECON 499-6 Honors Seminar in Economics

\*these courses may be within the areas of concentration

\*\*joint honors students who have successfully completed both MATH 323 and 251 need not complete ECON 331. However, at least 30 upper division units in economics must still be completed.

### Group Requirements

Students must include at least one course from the economics group requirements. For details, see Group Requirements.

### Grade Point Averages

For information about required grade point averages for the BA credential, See "Graduation GPA Requirements" on page 89.

### Post Baccalaureate Diploma

This program is for students who hold a bachelor's degree in a discipline other than economics. Students pursue individual interests in specific economics areas. For information, please see "Post Baccalaureate Diploma Program" on page 7.

### Co-operative Education

This program, for qualified students who wish to acquire practical experience in economics, entails planned terms of study and employment in the student's choice of area. For admission, students must have completed 30 units including ECON 103 (or 200) and ECON 105 (or 205). At least 12 of these 30 must be completed at Simon Fraser University with a minimum 2.75 CGPA. Arrangements for work terms are made through the Faculty of Arts and Social Sciences co-op co-ordinator at least one term in advance. See page 212 for details.

Ms. M. Curtin BA (McG), 6137 Academic Quadrangle, 778.782.3371

The associate chair and other faculty are available for Department of English advice. Enquire at the departmental office. Students planning to enter the honors program are particularly encouraged to consult with departmental advisors. Course outlines vary each term. Check at the general office.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

## Major Program

### Lower Division Requirements

Students complete two of  
ENGL 101W-3 Introduction to Fiction  
ENGL 102W-3 Introduction to Poetry  
ENGL 103W-3 Introduction to Drama  
ENGL 104W-3 Introduction to Prose Genres  
ENGL 105W-3 Introduction to Issues in Literature and Culture  
ENGL 199W-3 Introduction to University Writing

and four of the following courses, one of which must be ENGL 201 or 203, and one of which must be ENGL 205 or 206

ENGL 201-3 Medieval Literature  
ENGL 203-3 Early Modern Literature  
ENGL 205-3 Restoration and 18th Century Literature  
ENGL 206-3 Nineteenth Century Literatures in English  
ENGL 207-3 Twentieth Century Literatures in English  
ENGL 210W-3 Writing and Critical Thinking  
ENGL 212-3 Metrics and Prosody  
ENGL 214-3 History and Principles of Rhetoric  
ENGL 216-3 History and Principles of Literary Criticism

Any one, but not more than one, of ENGL 101W, 102W, 103W, 104W, 105W and 199W may be replaced by any three unspecified transfer units in English or in ENGL-Writing. Any one, but not more than one of ENGL 207, 210W, 212, 214 and 216 may be replaced by any three unspecified 200 division transfer units in English.

Students with 18 lower division English transfer units have met the lower division requirements for a major provided those units include any one of ENGL 101W, 102W, 103W, 104W, 105W, or 199W; one of ENGL 201 or 203; one of ENGL 205 or 206; and six additional 200 division units in English.

Students wishing to major in English are strongly advised to submit a formal declaration to this effect to the undergraduate advisor upon completing all lower division requirements.

### Upper Division Requirements

An English major must obtain 32 units in upper division English courses, two of which must come from Group 1 and one from Group 2.

#### Group 1

ENGL 300-4 Old English  
ENGL 304-4 Studies in Medieval Literature  
ENGL 306-4 Chaucer  
ENGL 310-4 Studies in Early Modern Literature Excluding Shakespeare  
ENGL 311-4 Early Shakespeare  
ENGL 313-4 Late Shakespeare  
ENGL 320-4 Studies in 18th Century Literature (1660-1800)  
ENGL 322-4 Studies in the Eighteenth Century British Novel  
ENGL 400W-4 Advanced Old English  
ENGL 404W-4 Topics in Medieval Literature  
ENGL 407W-4 Topics in Early English Drama  
ENGL 410W-4 Topics in Early Modern English Non-Dramatic Literature  
ENGL 416W-4 Milton  
ENGL 420W-4 Topics in 18th Century Literature

#### Group 2

ENGL 354-4 Studies in Canadian Literature before 1920  
ENGL 357-4 Studies in Canadian Literature since 1920  
ENGL 359-4 Studies in the Literature of British Columbia

Eight English units must be at the 400 division, excluding Directed Studies courses (ENGL 441, 442, 443 and 444).

With permission of the department, other English courses of equivalent content may be substituted for those required in Group 1 and 2. The department may designate up to eight units of program related upper division courses that are offered by other departments as being acceptable in fulfilling part of the required units in the major program.

Students must maintain at least a 2.00 grade point average in English courses.

## Honors Program

This program is for those with special interest in English literature and who wish to pursue studies beyond the major program. The honors program requires the study of theory, criticism and research methods in ENGL 364, 465W and 494. The honors essay (ENGL 496) allows for independent research and writing on a topic of the student's choice.

## Lower Division Requirements

Students proposing to enter the honors program complete the same lower division English courses as English majors. ENGL 216 is recommended. Normally a 3.5 GPA in all Simon Fraser University English courses is required for program acceptance and continuance but does not guarantee either.

## Upper Division Requirements

English honors must obtain 52 upper division English units, including one of ENGL 300, 304, and 306; one of ENGL 310, 311 and 313; one of ENGL 320, 322, 327, and 330; and one of ENGL 354, 357 and 359. ENGL 364, 465W, 494 and 496 are required and 20 units must be at the 400 division excluding directed studies courses (ENGL 441, 442, 443 and 444). On completion, students may apply for honors admission.

## Minor Program

### Lower Division Requirements

An English minor must complete 12 units of lower division English courses including two of ENGL 101W-3 Introduction to Fiction  
ENGL 102W-3 Introduction to Poetry  
ENGL 103W-3 Introduction to Drama  
ENGL 104W-3 Introduction to Prose Genres  
ENGL 105W-3 Introduction to Issues in Literature and Culture  
ENGL 199W-3 Introduction to University Writing  
and two of the following courses, one of which must be ENGL 201, 203, 205 or 206.

ENGL 201-3 Medieval Literature  
ENGL 203-3 Early Modern Literature  
ENGL 205-3 Restoration and Eighteenth Century Literature  
ENGL 206-3 Nineteenth Century Literatures in English  
ENGL 207-3 Twentieth Century Literatures in English  
ENGL 210W-3 Writing and Critical Thinking  
ENGL 212-3 Metrics and Prosody  
ENGL 214-3 History and Principles of Rhetoric  
ENGL 216-3 History and Principles of Literary Criticism

Any one but not more than one of ENGL 101W, 102W, 103W, 104W, 105W and 199W may be replaced by any three unspecified transfer units in English or in ENGL – Writing. Any one, but not more than one, of ENGL 207, 210W, 212, 214 and 216 may be replaced by any three unspecified 200 division transfer units in English.

## Upper Division Requirements

An English minor must complete 16 units in upper division English courses, one of which must come from within the grouping ENGL 300, 304, 306, 310, 311, 313, 320, and 322; and one from within the grouping ENGL 354, 357, 359. Four units must be at the 400 division, excluding Directed Studies courses (ENGL 441, 442, 443 and 444). No courses from other departments may be substituted for this program's English courses. Students must maintain at least a 2.00 grade point average in English courses.

## Extended Minor Program

An extended general minor consists of the lower division requirements for a major and the upper division requirements for a minor. Approval by the Department of English advisor is required.

## Languages Other Than English

Most graduate schools require some proficiency in one or two languages other than English. Those contemplating graduate studies should complete language courses other than English.

## English and Canadian Studies Joint Major Program

See "Joint Major Programs" on page 96 for program information.

## English and French Literatures Joint Major Program

See "English and French Literatures Joint Major Program" on page 113 for program information.

## English and Humanities Joint Major Program

See "English and Humanities Joint Major Program" on page 118 for program information.

## English and Women's Studies Joint Major Program

See "English and Women's Studies Joint Major Program" on page 140 for program information.

## Co-operative Education

This program, for students who wish work experience in areas related to English studies, entails planned terms of study and employment. To be admitted, 30 units with a minimum 3.0 CGPA is required. Prior to admission, students must have completed five English courses (15 units) including the lower division requirements for a minor in English. College transfer students must complete at least 15 Simon Fraser University units before being eligible for co-op admission and must satisfy the requirements shown above, or the equivalent. Transfer students who participated in co-op programs elsewhere may be credited with the term(s) already completed. The applicability of such terms depends on the evaluation. Arrangements for the work terms are made through the Faculty of Arts and Social Sciences co-operative education co-ordinators.

To continue in the program, students must maintain a minimum 3.0 CGPA in their academic course work.

Contact the Department of English for information. Also, see "Co-operative Education" on page 212.

The First Nations Studies Program offers sequential, comprehensive courses rooted in traditional and contemporary aboriginal logic, methodology, practice and theory by a distinguished aboriginal faculty. First Nations studies courses address, inform and reflect a wide range of academic disciplines including archaeology, history, women's studies, linguistics, cultural resource management, sociology and anthropology, fine arts, criminology and English. Current program offerings include a minor, two joint majors with both archaeology and linguistics, a post baccalaureate diploma and two certificates.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

## Minor Program

This program studies traditional and contemporary issues involving aboriginal peoples of North America and Canada in particular. Designed for both First Nations and non-First Nations students, its focus is on First Nations traditional cultures, languages,

indigenous knowledge and histories as well as Indian-White relations, the development of federal and provincial policy toward aboriginal peoples, aboriginal rights and title questions, economic development and self-government. The minor critically presents and examines these issues with the perspectives of aboriginal peoples, and will present research methods pertinent to past, present and future issues affecting aboriginal peoples. In this respect, it is especially relevant for First Nations students who wish to put knowledge of First Nations/aboriginal issues and research skills to practice when serving their communities and nations.

This program may be completed in conjunction with any major or honors bachelor's degree, or with a bachelor of general studies degree. It is expected that First Nations studies courses will be taught by faculty with appointments in First Nations or joint appointments in First Nations and other disciplines.

### Lower Division Requirements

Students complete at least nine units including  
FNST 101-3 The Cultures, Languages and Origins of Canada's First Peoples  
FNST 201-3 Canadian Aboriginal Peoples' Perspectives on History

and at least one course from the following.  
ARCH 200-3 Special Topics in World Prehistory (when topic is Ancient Peoples of British Columbia)  
ARCH 223-3 The Prehistory of Canada  
BISC 272-3 Special Topics in Biology (when topic is Native Ethnobotany)  
HIST 201-3 The History of Western Canada  
LING 160-3 Language, Culture, and Society (when topic appropriate)  
LING 231-3 Introduction to a First Nations Language I  
LING 232-3 Introduction to a First Nations Language II  
SA 286-4 Aboriginal Peoples and British Columbia: Introduction

STAT 203 (or equivalent) and SA 255 (or equivalent course in research methods) are strongly recommended.

Other courses which have First Nations content may be applied toward the minor as an elective, subject to approval by the program director.

### Upper Division Requirements

At least 15 upper division units are required, including at least six units from the following.

FNST 301-3 Issues in Applied First Nations Studies Research  
FNST 401-3 Aboriginal Rights and Government Relations  
FNST 402-3 The Discourse of Native Peoples  
FNST 403-3 Indigenous Knowledge in the Modern World

Students must also complete at least nine units from  
ARCH 332-3 Special Topics in Archaeology I\*  
ARCH 333-3 Special Topics in Archaeology II\*  
ARCH 360-5 Native Cultures of North America  
ARCH 378-3 Pacific Northwest North America  
ARCH 386-3 Archaeological Resource Management  
ARCH 479-3 Directed Readings\*  
FNST 301-3 Issues in Applied First Nations Studies Research\*\*  
FNST 322-3 Special Topics in First Nations Studies  
FNST/HIST 325-4 History of Aboriginal Peoples of North America to 1850†  
FNST/HIST 326-4 History of Aboriginal Peoples of North America Since 1850†  
FNST/WS 327-4 Aboriginal Women in Canada†  
FNST 329-3 Sexuality and Gender: Indigenous Perspectives  
FNST 332-3 Ethnobotany of British Columbia First Nations

FNST/ENGL 360-4 Popular Writing by Indigenous Authors†  
FNST 363-5 Indigenous Poetry, Poetics, Printmaking  
FNST 383-5 Indigenous Technology: Art and Sustainability  
FNST 401-3 Aboriginal Rights and Government Relations  
FNST 402-3 The Discourse of Native Peoples  
FNST 403-3 Indigenous Knowledge in the Modern World  
FNST/CRIM 419-3 Aboriginal/Indigenous Justice†  
FNST/CRIM 429-3 Indigenous Peoples and International Law†  
FNST 433-5 Indigenous Environmental Activism  
FNST 442-3 Directed Readings  
LING 331-3 Description and Analysis of a First Nations Language I  
LING 332-3 Description and Analysis of a First Nations Language II  
LING 430-3 Native American Languages  
LING 431-3 Language Structures I\*\*\*  
LING 432-3 Language Structures II\*\*\*  
SA 386-4 The Ethnography of Politics  
SA 388-4 Comparative Studies of Minority Indigenous Peoples

\*when offered as archaeological field school. This combination counts as only one course for satisfying requirements for the minor.

\*\*\*when not used toward requirement of six units

†only when the topic is an aboriginal language

‡only one of the two courses may be used

Other courses with First Nations content may be applied toward the minor as electives, subject to approval by the program director.

Credit accumulated in the certificate in First Nations studies research may be applied toward the minor in First Nations studies.

## Archaeology and First Nations Studies Joint Major Program

This program focuses and expands expertise in areas where archaeology and First Nations intersect. Offered predominantly at the Burnaby campus, Kamloops program students may also participate.

Joint major students, who will gain insight into ancient and contemporary First Nations cultures in British Columbia and North America, will also learn about aboriginal perspectives on the contemporary world including First Nations issues in archaeology, cultural heritage, resource management, government relations and land claims. Students are trained in material culture studies, techniques and technologies to analyze the ancient and historic past, ancient and modern artistic traditions, conservation and management of archaeological and museum collections, and other public exhibits related to First Nations heritage. Students should plan their program in consultation with First Nations Studies and Archaeology advisors.

### Lower Division First Nations Studies Requirements

Students complete all of  
FNST 101-3 The Cultures, Languages and Origins of Canada's First Peoples  
FNST 201-3 Canadian Aboriginal Peoples' Perspectives on History  
SA 101-4 Introduction to Anthropology

and one of  
LING 100-3 Communication and Language  
LING 160-3 Language, Culture, and Society  
SA 286-4 Aboriginal Peoples and British Columbia: Introduction

### Lower Division Archaeology Requirements

Students complete all of  
ARCH 131-3 Human Origins  
ARCH 201-3 Introduction to Archaeology  
ARCH 272-3 Archaeology of the Old World  
ARCH 273-3 Archaeology of the New World

### Upper Division First Nations Studies Requirements

Students complete at least 22 units of upper division First Nations studies, including all of  
FNST 301-3 Issues in Applied First Nations Studies Research  
FNST 401-3 Aboriginal Rights and Government Relations  
FNST 402-3 The Discourse of Native Peoples  
FNST 403-3 Indigenous Knowledge in the Modern World

and the remaining 10 units from the following.  
CRIM 311-3 Minorities and the Criminal Justice System  
FNST 322-3 Special Topics in First Nations Studies  
FNST/HIST 325-4 History of Aboriginal Peoples of North America to 1850†  
FNST/HIST 326-4 History of Aboriginal Peoples of North America since 1850†  
FNST/WS 327-4 Aboriginal Women in Canada†  
FNST 329-3 Sexuality and Gender: Indigenous Perspectives  
FNST 332-3 Ethnobotany of British Columbia First Nations  
FNST/ENGL 360-4 Popular Writing by Indigenous Authors†  
FNST 363-5 Indigenous Poetry, Poetics, Printmaking  
FNST 383-5 Indigenous Technology: Art and Sustainability  
FNST 419/CRIM 419-3 Aboriginal/Indigenous Justice†  
FNST/CRIM 429-3 Indigenous Peoples and International Law†  
FNST 433-5 Indigenous Environmental Activism  
FNST 442-3 Directed Readings in First Nations Studies  
LING 430-3 Native American Languages  
SA 388-4 Comparative Studies of Minority Indigenous Peoples  
SA 486-4 Aboriginal Peoples and British Columbia: Advanced Seminar

†only one of the two courses may be used

Other First Nations content courses may be applied, subject to approval by the program director.

### Upper Division Archaeology Requirements

Students complete at least 24 units of upper division archaeology including  
ARCH 372-5 Material Culture Analysis  
ARCH 471-5 Archaeological Theory

and at least 14 units from the list below including  
ARCH 386-3 Archaeological Resource Management

and one of  
ARCH 301-3 Prehistoric and Indigenous Art  
ARCH 336-3 Special Topics in Prehistoric and Indigenous Art

and one of  
ARCH 348-5 Archaeological Conservation  
ARCH 349-5 Management of Archaeological Collections

and one of  
ARCH 360-5 Native Cultures of North America  
ARCH 378-3 Pacific Northwest North America

Special topics and/or directed readings courses may be applied toward the program, subject to approval by the program director.

## First Nations Studies and Linguistics Joint Major Program

This joint major will focus and expand expertise where these two disciplines intersect. Students will gain insight into the languages and cultures of British Columbia and North America First Nations people. The program provides in-depth understanding of at least one First Nations language and develops skills related to language teaching and curriculum development. Students should plan their studies in consultation with both the First Nations Studies Program and the Department of Linguistics advisors.

### Lower Division First Nations Studies Requirements

Students complete at least 13 units of lower division First Nations studies courses including all of FNST 101-3 The Cultures, Languages and Origins of Canada's First Peoples  
FNST 201-3 Canadian Aboriginal Peoples' Perspectives on History  
SA 101-4 Introduction to Anthropology  
and three additional units in a 100 or 200 division course with significant First Nations content, subject to approval by the program director. Examples of these courses follow.

ARCH 273-3 Archaeology of the New World  
SA 286-4 Aboriginal Peoples and British Columbia: Introduction

### Lower Division Linguistics Requirements

Students complete at least 15 units of lower division linguistics courses including both of LING 220-3 Introduction to Linguistics  
LING 221-3 Introduction to Phonetics and Phonology  
plus nine additional 100 or 200 division linguistics units. Note that LING 222 is required for many upper division courses. The following are recommended.  
LING 231-3 Introduction to First Nations Language I  
LING 232-3 Introduction to First Nations Language II  
LING 241-3 Languages of the World

Subject to approval by the program director, other lower division courses that have First Nations language content may be applied toward this program

### Upper Division First Nations Studies Requirements

Students complete at least 21 units of upper division First Nations studies including all of FNST 301-3 Issues in Applied First Nations Studies Research  
FNST 322-3 Special Topics in First Nations Studies  
FNST 401-3 Aboriginal Rights and Government Relations  
FNST 402-3 The Discourse of Native Peoples  
FNST 403-3 Indigenous Knowledge in the Modern World

and the remaining six units from the following  
ARCH 360-5 Native Cultures of North America  
ARCH 378-3 Pacific Northwest North America  
CRIM 311-3 Minorities and the Criminal Justice System  
ENGL 453W-4 Aboriginal Literatures  
FNST/HIST 325-4 History of Aboriginal Peoples of North America to 1850†  
FNST/HIST 326-4 History of Aboriginal Peoples of North America since 1850†  
FNST/WS 327-4 Aboriginal Women in Canada†  
FNST 329-3 Sexuality and Gender: Indigenous Perspectives†  
FNST 332-3 Ethnobotany of BC First Nations  
FNST/ENGL 360-4 Popular Writing by Indigenous Authors†  
FNST 363-5 Indigenous Poetry, Peotics, Printmaking

FNST 383-5 Indigenous Technology: Art and Sustainability  
FNST/CRIM 419-3 Aboriginal/Indigenous Justice†  
FNST/CRIM 429-3 Indigenous Peoples and International Law†  
FNST 433-5 Indigenous Environmental Activism  
FNST 442-3 Directed Readings in First Nations Studies  
HIST 427-4 Problems in the History of Aboriginal Peoples  
SA 388-4 Comparative Studies of Minority Indigenous Peoples  
SA 486-4 Aboriginal Peoples and British Columbia: Advanced Seminar

†only one of the two courses may be used

Other courses that have First Nations content may be applied toward this program, subject to approval by the program director.

### Upper Division Linguistics Requirements

Students complete at least 21 units of upper division linguistics courses including two of LING 321-3 Phonology  
LING 322-3 Syntax  
LING 323-3 Morphology  
LING 324-3 Semantics  
LING 330-3 Phonetics

and two of LING 331-3 Description and Analysis of a First Nations Language I  
LING 332-3 Description and Analysis of a First Nations Language II  
LING 408-3 Field Linguistics  
LING 430-3 Native American Languages  
LING 431-3 Language Structures I  
LING 432-3 Language Structures II  
LING 433-3 First Nations Language Mentoring I  
LING 434-3 First Nations Language Mentoring II

and nine additional upper division linguistics units.

The following are recommended.  
LING 309W-3 Sociolinguistics  
LING 335-3 Topics in First Nations Language I  
LING 350-3 First Language Acquisition  
LING 360-3 Linguistics and Language Teaching  
LING 362-3 English as a Second Language: Theory  
LING 407 Historical Linguistics  
LING 435-3 Topics in First Nations Language II  
LING 441-3 Linguistic Universals and Typology

Special topics and/or directed readings courses may be applied toward this program, subject to approval by the program director.

## Post Baccalaureate Diploma in First Nations Studies

Through First Nations Studies courses and courses from other disciplines, the program provides in-depth knowledge of Aboriginal and indigenous issues including First Nations cultures and indigenous knowledge, historical contexts, natural and cultural resource management, and legal and public policy issues. Learners engage in dialogue and discussion around these issues and evaluate them, considering Aboriginal perspectives. This program is comprised of at least 30 units of upper division or graduate level courses. Courses are offered on an ongoing basis at both the Burnaby and Kamloops campuses.

### Admission Requirements

Applicants must have a bachelor's degree with a minimum 2.00 GPA from a BC university, or a 2.4 GPA from a university outside of BC, or equivalent. Students can apply for entry in the fall, spring or summer terms. Consult with the Burnaby or Kamloops program offices for admission deadlines.

## Program Requirements

The post baccalaureate diploma (PBD) program can be completed through full-time or part-time study, or a combination by attending Simon Fraser University's Burnaby and/or Kamloops locations. Upon University admission, students must be approved for entry and must complete a PBD course plan. Completion is expected within two or three years, to a maximum of five years, with a 2.5 GPA in all diploma courses. Transfer credit may be approved if it meets the program requirements, and at least 18 of the 30 required units are completed at Simon Fraser University. Transfer credit application must be initiated at the time of University application. Credit applied to this program may not be applied to another Simon Fraser University certificate, diploma or degree, or vice-versa.

### Prerequisite Courses

Students complete both of FNST 101-3 The Cultures, Languages and Origins of Canada's First Peoples  
FNST 201-3 Canadian Aboriginal Peoples' Perspectives on History

### Core Courses

Students complete all of FNST 301-3 Issues in Applied First Nations Studies Research  
FNST 401-3 Aboriginal Rights and Government Relations  
FNST 402-3 The Discourse of Native Peoples  
FNST 403-3 Indigenous Knowledge in the Modern World

### First Nations Studies Elective Courses

Students complete at least two of FNST 322-3 Special Topics in First Nations Studies  
FNST 332-3 Ethnobotany of British Columbia First Nations  
FNST 442-3 Directed Readings in First Nations Studies

### Additional Electives

The remaining 12 elective units will be chosen by completing additional units from the list above (FNST 322, 332, 442) and/or from the following courses.

ARCH 360-5 Native Cultures of North America  
ARCH 386-3 Archaeological Resource Management\*  
ARCH 435-6 Fieldwork Practicum\*  
CRIM 311-3 Minorities and the Criminal Justice System  
FNST/HIST 325-4 History of Aboriginal Peoples of North America to 1850†  
FNST/HIST 326-4 History of Aboriginal Peoples of North America since 1850†  
FNST/WS 327-4 Aboriginal Women in Canada†  
FNST 329-3 Sexuality and Gender: Indigenous Perspectives  
FNST/ENGL 360-4 Popular Writing by Indigenous Authors†  
FNST 363-5 Indigenous Poetry, Poetics, Printmaking  
FNST 383-5 Indigenous Technology: Art and Sustainability  
FNST/CRIM 419-3 Aboriginal/Indigenous Justice†  
FNST/CRIM 429-3 Indigenous Peoples and International Law†  
FNST 433-5 Indigenous Environmental Activism  
LING 331-3 Description and Analysis of a First Nations Language I  
LING 332-3 Description and Analysis of a First Nations Language II  
LING 430-3 Native American Languages  
LING 431-3 Language Structures I  
LING 432-3 Language Structures II  
LING 433-3 First Nations Language Mentoring I  
LING 434-3 First Nations Language Mentoring II  
SA 386-4 Native Peoples and Public Policy

SA 388-4 Comparative Studies of Minority Indigenous Peoples

SA 486-4 Aboriginal Peoples and British Columbia: Advanced Seminar

\*if topic is appropriate

†only one of the two courses may be used

Additional upper division courses with First Nations content, as well as graduate courses, may be approved by the Faculty of Arts and Social Sciences to be used to satisfy program requirements.

## SFU Kamloops Program

365 Yellowhead Highway, Kamloops, BC V2H 1H1, 250.828.9799 Tel, or 1.800.399.5565 toll free Tel, 250. 828.9864 Fax, www.sfu.ca/kamloops, sfu\_kamloops@sfu.ca

## Collaborative Major Program with Thompson Rivers University

Applications are not being accepted for the 2009/2010 academic year.

This collaborative major is a joint initiative between Thompson Rivers University (TRU) and Simon Fraser University, the latter facilitated through the University's Aboriginal partnership program on the Kamloops Indian Reserve in the BC Interior. The program is available to Simon Fraser University and Thompson Rivers University students who wish to complete this major as part of their degree requirements for either a TRU or Simon Fraser University bachelor of arts degree.

Courses marked with † are offered at Thompson Rivers University.

### Lower Division Requirements

(24-25 units)

#### Required Courses

Students complete

FNST 201-3 Canadian Aboriginal Peoples' Perspectives on History\*

and either both of

LING 231-3 Introduction to First Nations Language I  
LING 232-3 Introduction to First Nations Language II

or, for those with an introductory or intermediate level background in an Aboriginal language, both of  
LING 433-3 First Nations Language Mentoring I  
LING 434-3 First Nations Language Mentoring II

and one of

ANTH 214-3 Canadian Native Peoples†  
FNST 101-3 The Cultures, Languages and Origins of Canada's First Peoples\*

and one of

ANTH 121-3 Introduction to Cultural Anthropology†  
SA 101-4 Introduction to Anthropology

and one of

ANTH 119-3 Introduction to Archaeology†  
ARCH 100-3 Ancient Peoples and Places  
ARCH 201-3 Introduction to Archaeology

\*also available as distance education courses

#### Elective Courses

Students must also complete at least six units of elective courses, with First Nations/Aboriginal studies content, selected from the following.

ANTH 219-3 Ancient North Americans†  
ANTH 223-3 Indians of British Columbia†  
ANTH 260-3 Minorities in the Modern World†  
ARCH 200-3 Special Topics in World Prehistory  
ARCH 223-3 The Prehistory of Canada  
ARCH 273-3 Archaeology of the New World  
CNST 200-3 Introduction to Canadian Studies†  
ENG 241-3 Canadian Native Literature†

GEOG 223-3 The Regional Geography of BC and the Yukon†

HIST 201-3 The History of Western Canada

HIST 202-3 Native History of Canada†

SA 286-4 Aboriginal Peoples and British Columbia: Introduction

SOCI 201-3 Race and Ethnic Relations†

TMGT 102-3 Cultural, Heritage and Nature

Interpretation†

To meet this group requirement, and with the approval of the program advisor, students may use other Simon Fraser University or TRU courses that contain significant First Nations/Aboriginal studies content.

#### Recommended Courses

In addition, the following are strongly recommended.

SA 255-4 Introduction to Social Research

and one of

MATH 120-3 Introduction to Statistics†

STAT 203-3 Introduction to Statistics for the social Sciences

### Upper Division Requirements

Students complete at least 30 upper division units from Simon Fraser University or from Thompson Rivers University. It is the student's responsibility to ensure that they have met the prerequisites for the upper division courses in which they wish to enrol.

#### Required Courses

Students complete 12 units including both of  
FNST 301-3 Issues in Applied First Nations Studies Research  
FNST 403-3 Indigenous Knowledge in the Modern World

and one of

ANTH 327-3 First Nations Natural Resource Management†

FNST 401-3 Aboriginal Rights and Government Relations

and one of

ENG 447-3 Studies in Aboriginal Literature†  
FNST 402-3 The Discourse of Native Peoples

#### Group Requirements

In addition to the above, students must complete at least one course from each of the following groups.

To meet this group requirement, and with the approval of the program advisor, students may use other Simon Fraser University or TRU courses that contain significant First Nations/Aboriginal studies content.

FNST 322 and 442 may be used to fulfil this group requirement only if the topics are deemed appropriate to at least one of the four group titles as shown below.

*Group I Aboriginal Language and/or Linguistics of Aboriginal Languages, Indigenous Philosophy, Literature, Fine and Performing Arts*

ENG 447-3 Studies in Aboriginal Literature† \*\*

FNST 322-3 Special Topics in First Nations Studies

FNST 402-3 The Discourse of Native Peoples \*\*

FNST 442-3 Directed Readings in First Nations Studies

LING 323-3 Morphology\*

LING 331-3 Description and Analysis of a First Nations Language I

LING 332-3 Description and Analysis of a First Nations Language II

LING 335-3 Topics in First Nations Language I:

Teaching and Learning an Aboriginal Language

LING 430-3 Native American Languages

LING 431-3 Language Structures I

LING 432-3 Language Structures II

LING 433-3 First Nations Language Mentoring I

LING 434-3 First Nations Language Mentoring II

LING 435-3 Special Topics in Linguistics II: Topics in First Nations Language II

*Group II Aboriginal History and Public Policy*

ANTH 405-3 Canadian Status Treaty Indian Reserve Communities†

FNST 322-3 Special Topics in First Nations Studies

FNST/HIST 325-4 History of Aboriginal Peoples of North America to 1850\*\*\*

FNST/HIST 326-4 History of Aboriginal Peoples of North America since 1850\*\*\*

FNST 401-3 Aboriginal Rights and Government Relations\*\*

FNST 419/CRIM 419-3 Aboriginal/Indigenous Justice\*\*\*

FNST/CRIM 429-3 Indigenous Peoples and International Law\*\*\*

FNST 442-3 Directed Readings in First Nations Studies

SA 386-4 Native Peoples and Public Policy

*Group III Cultural and Natural Resource Management and Archaeology*

ANTH 306-3 Summer Field Training in Archaeology†\*

ANTH 327-3 First Nations Natural Resource Management† \*\*

ANTH 420-3/6 Archaeology of British Columbia†

ARCH 349-5 Management of Archaeological Collections\*

ARCH 365-3 Ecological Archaeology\* (or ANTH 326†)

ARCH 372-5 Material Culture Analysis\*

ARCH 386-3 Archaeological Resource Management\*

ARCH 435-6 Field Work Practicum\* (or ANTH 411-3/6†)

ARCH 485-5 Lithic Technology\*

FNST 322-3 Special Topics in First Nations Studies

FNST 332-3 Ethnobotany of British Columbia First Nations

FNST 442-3 Directed Readings in First Nations Studies

*Group IV Comparative Study of Indigenous and Aboriginal Peoples*

ANTH 401-3 Native Peoples of North America†

ANTH 404-3 Peoples and Cultures of the North American Arctic†

ARCH 360-5 Native Cultures of North America

CRIM 311-3 Minorities and the Criminal Justice System

ENG 446-3 Studies in Commonwealth Post Colonial Literature: Indigenous Literatures of Canada, Australia and New Zealand†

FNST 322-3 Special Topics in First Nations Studies

FNST 442-3 Directed Readings in First Nations Studies

SA 388-4 Comparative Studies of Minority Indigenous Peoples

SA 486-4 Aboriginal Peoples and British Columbia: Advanced Seminar

\*if the topic includes a significant component of First Nations/Aboriginal content

\*\*students may count this for credit if this course(s) was not used as an upper division required course

\*\*\*only one of the two courses may be used

†Thompson Rivers University course

#### Elective Courses

If, after meeting the upper division required courses and group requirements, the total upper division units is less than 30, the student is required to complete an additional three to eight units of electives from any of the above *Upper Division Group Requirement* courses, or from additional courses in FNST, or with First Nations/Aboriginal studies content offered at either Simon Fraser University or TRU.

## Certificate in First Nations Studies Research

This program explores the history, prehistory, culture, language and contemporary situation of Canadian Aboriginal peoples, and teaches basic research skills

about First Nations/Aboriginal issues with emphasis on BC Interior Aboriginal people. All program can be completed at the Kamloops site or the Burnaby campus. Normal completion requires five full time terms. The certificate, which can be completed as a two year program or as part of a BA, is especially suited to Aboriginals who wish to gain proficiency in First Nations/Aboriginal issues, social research skills, and basic cultural resource management skills. It is also open to non-Aboriginal students.

### Admission Requirements

Normal University admission requirements apply. Students may be admitted under regular or special categories. Assistance is available at the Kamloops site office or First Nations Studies' Burnaby office.

### Lower and Upper Division Requirements

Requirements include

- successful completion of at least 30 units, of which a minimum 18 are earned by completing six required courses. In addition, students complete one practicum option (Option 1, 2, or 3). The remaining nine units are selected from the specified list of optional courses.
- minimum grade point average of 2.0 calculated on all courses applied to the certificate. Duplicate courses are counted only once.
- completion of the certificate normally within five years of program admission.

Students complete all of  
 ARCH 273-3 Archaeology of the New World  
 FNST 201-3 Canadian Aboriginal Peoples' Perspectives on History  
 FNST 301-3 Issues in Applied First Nations Studies Research  
 LING 231-3 Introduction to First Nations Language I plus one of  
 FNST 101-3 The Cultures, Languages and Origins of Canada's First Peoples  
 SA 286-4 Aboriginal Peoples and British Columbia: Introduction

plus one of  
 ARCH 201-3 Introduction to Archaeology  
 SA 101-4 Introduction to Anthropology (A)

The following course is strongly recommended.  
 SA 255-4 Introduction to Social Research (SA)

plus nine additional units\*\* chosen from  
 ARCH 200-3 Special Topics in World Prehistory\*  
 ARCH 332-3 Special Topics in Archaeology I\*  
 ARCH 333-3 Special Topics in Archaeology II\*  
 ARCH 336-3 Special Topics in Prehistoric and Indigenous Art  
 ARCH 360-5 Native Cultures of North America  
 ARCH 386-3 Archaeological Resource Management\*  
 FNST 101-3 The Cultures, Languages and Origins of Canada's First Peoples  
 FNST 322-3 Special Topics in First Nations Studies  
 FNST/HIST 325-4 History of Aboriginal Peoples of North America to 1850†  
 FNST/HIST 326-4 History of Aboriginal Peoples of North America since 1850†  
 FNST/WS 327-4 Aboriginal Women in Canada  
 FNST 329-3 Sexuality and Gender: Indigenous Perspectives  
 FNST 332-3 Ethnobotany of British Columbia First Nations  
 FNST/ENGL 360-4 Popular Writing by Indigenous Authors  
 FNST 363-5 Indigenous Poetry, Poetics, Printmaking  
 FNST 383-5 Indigenous Technology: Art and Sustainability  
 FNST 401-3 Aboriginal Rights and Government Relations  
 FNST 402-3 The Discourse of Native Peoples  
 FNST 403-3 Indigenous Knowledge in the Modern World

FNST/CRIM 419-3 Aboriginal/Indigenous Justice†  
 FNST/CRIM 429-3 Indigenous Peoples and International Law†  
 FNST 433-3 Indigenous Environmental Activism  
 FNST 442-3 Directed Readings in First Nations Studies  
 LING 160-3 Language, Culture and Society  
 LING 232-3 Introduction to a First Nations Language II  
 SA 386-4 The Ethnography of Politics (SA)\*  
 SA 388-4 Comparative Studies of Minority Indigenous Peoples (SA)  
 SA 486-4 Aboriginal Peoples and British Columbia: Advanced Seminar (A)  
 WS 200-3 Women in Cross-Cultural Perspective\*

\*when topic is appropriate

\*\*other courses that have significant First Nations/Aboriginal content may be counted towards this certificate with First Nations Studies approval †only one of the two courses may be used and may count toward the certificate  
 (A) anthropology courses; (S) sociology courses

The program's practicum component can be fulfilled by selecting one of three options. Some courses within each option have prerequisites; accordingly, students should plan their programs in advance.

#### Option 1

SA 141 or ARCH 350 is required. This is the first term of co-operative education in either sociology and anthropology, or archaeology. The employment situation must be acceptable to the First Nations Studies research program.

#### Option 2

At least five units of an archaeology field school, involving survey and excavation of a First Nations heritage site are required. The Kamloops site offers a 14 unit archaeology field school bi-annually.

#### Option 3

FNST 442 is required, which permits a faculty member to supervise an independent field research project acceptable to the First Nations Studies research certificate.

**Note:** Some Burnaby or Vancouver campus courses may be used toward the certificate with steering committee approval. A three course maximum (10 units) of comparable content and level from an approved college or university may be transferred, subject to University regulations and certificate steering committee approval. Units applied to this certificate may also be applied to a major or minor or bachelor's degree under normal program regulations, but may not be applied to another Simon Fraser University certificate or diploma.

### Co-operative Education

In conjunction with other Faculty of Arts and Social Sciences departments and other faculties offering co-op education, eligible First Nations studies minors may apply for work placements in native groups or with private, public and non-profit sectors employers.

## Department of French

The Department of French offers honors, major and extended minor programs encompassing French language, literature and linguistics. In addition, joint major programs are available in English and French literatures, in French, history and political science, and in French and humanities. A certificate program in French language proficiency is also offered for those who wish to enhance their knowledge of French for cultural, professional or employment purposes. The department also offers a certificate in Italian studies (see page 114).

### Initial Course Selection (French)

Native French speakers, or those who received secondary education entirely within a French-speaking community will not normally be admitted to a French language course numbered 100 to 300 inclusive.

#### French Language Placement Test

Students qualifying in the following categories need not complete the placement test but should enrol in the course indicated below.

- BC grade 12 French completed within the last three years with a final grade of A: enrol in **FREN 211**
- BC grade 12 French completed (irrespective of grade) within the last three years and who have subsequently spent at least five weeks in a French-speaking environment: enrol in **FREN 211**
- BC grade 12 French completed within the last three years who do not meet either of the above two conditions: enrol in **FREN 210**
- Students who have completed grade 11 French within the last three years and have not completed anymore French since: enrol in **FREN 122**
- Fewer than three years of French completed in high school and no other French: enrol in **FREN 121**
- No French at all: enrol in **FREN 120**
- High school in a Francophone educational system in a Francophone country or province: enrol in **FREN 230/240, 270, or 301**

All others are **required** to complete the placement test including the following.

- French immersion, Francophone programme, IB and AP students
- college/university transfer students with transfer units in French
- students from other provinces or countries
- students who have completed any credit/non-credit French course of six or more weeks duration since high school
- students who have lived (minimum 30 months) in a Francophone environment

- special cases and any students seeking advice on eligibility to earn challenge credit for 210, and/or 211, and/or 221, and/or 222

See [www.sfu.ca/french](http://www.sfu.ca/french) for test dates and times.

### Course Challenge

Up to 12 lower division French units may be challenged by students who place in more advanced language courses. Courses open to challenge are: FREN 210, 211 or 212, 221 or 222. Students may challenge lower division language courses only when enrolled in one of FREN 211 (or 212), 221, 222, and 301. Challenge of language courses lower than the one in which the student is actually enrolled may be initiated by a course challenge form available from the French general office. The challenge must have department approval and be submitted to Student Services prior to the tenth day of classes. Successful completion (with at least a C grade) of the language course actually completed automatically adds the challenge credit to the student's transcript. Please see "Course Challenge" on page 28.

Many FREN courses were renumbered effective fall 2003. Students with FREN credit prior to this time should consult the department advisor.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements. See "Writing, Quantitative, and Breadth Requirements" on page 7 for more information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

### Honors, Major, Extended Minor Programs

For program approval, a student must have successfully completed (i.e. obtained a minimum 2.0 grade or better in each of) the following courses or equivalents: FREN 210, 211 or 212, 221, 222, 230 or 240 and 270. Students who place in FREN 301 in the placement test will complete only FREN 230/240 and FREN 270 prior to acceptance in the program.

For a French degree, the following are required.

#### Lower Division Requirements

Students complete all of  
FREN 210-3 Intermediate French I\*  
FREN 211-3 Intermediate French II\* (or 212)  
FREN 221-3 French Writing I\*  
FREN 222-3 French Writing II\*  
FREN 270-3 Introduction to French Linguistics I

and one of  
FREN 230-3 Introduction to French-Canadian Literature

FREN 240-3 Introduction to French Literature: Modern French Literature

\*exemption is gained by successful completion of a more advanced French language course. Lower division language courses may be challenged if students wish to receive credit (see above).

#### Upper Division Requirements

##### Major

Students complete all of  
FREN 301-3 Advanced French Composition  
FREN 360-3 Intermediate French Literature  
FREN 370-3 Introduction to French Linguistics II

plus 21 units of French, to be chosen from among the remaining courses at the 300 and 400 division, must be completed.

**Note:** A minimum of 12 of the remaining 21 units must be from 400 division French courses.

##### Honors

Students complete all of  
FREN 301-3 Advanced French Composition  
FREN 360-3 Intermediate French Literature  
FREN 370-3 Introduction to French Linguistics II  
plus 41 units of French, to be chosen from among the remaining courses at the 300 and 400 division, must be completed.

**Note:** A minimum of 24 of the remaining 41 units must be from 400 division French courses, including the following which should be completed during the last terms of study.

FREN 491-3 Readings in French Linguistics and/or Literary Criticism  
FREN 492-3 Honors Essay

In addition, the honors student must acquire proficiency (i.e. the equivalent of two terms) in another language in addition to English and French.

##### Extended Minor

Students complete  
FREN 301-3 Advanced French Composition I

and one of  
FREN 360-3 Intermediate French Literature  
FREN 370-3 Introduction to French Linguistics II

A further nine units of French, to be chosen from among the remaining courses at the 300 and 400 division, must be completed.

#### French Language Cohort Program in Public Administration and Community Services Extended Minor

Students complete  
FREN 301-3 Advanced French Composition

and one of  
FREN 425-3 Topics in the Varieties of French  
FREN 452-3 Topics in French Cultures

A further nine units of French, to be chosen from among the remaining 300 and 400 division courses, must be completed. (FREN 360 and/or 370 may be completed in partial fulfilment of this requirement.)

See "Political Science Major, French Extended Minor Program Requirements" on page 130.

### Courses in French

Courses are offered in the following fields.

#### French Language

FREN 120-3 French for Beginners  
FREN 121-3 Introductory French I  
FREN 122-3 Introductory French II  
FREN 199-3 Writing French I: Spelling and Grammar\*  
FREN 210-3 Intermediate French I  
FREN 211-3 Intermediate French II  
FREN 212-3 French for Immersion Program Students  
FREN 215-3 Intermediate French Language: Oral Practice  
FREN 217-3 French Pronunciation  
FREN 221-3 French Writing I  
FREN 222-3 French Writing II  
FREN 225-3 Topics in French Language  
FREN 299-3 Writing French II: Intermediate Composition\*  
FREN 300-3 Advanced French: Oral Practice  
FREN 301-3 Advanced French Composition  
FREN 304-3 Advanced French Grammar  
FREN 307-3 French Vocabulary

\*restricted entry to these distance education courses

#### French Linguistics

FREN 301, 304 and 307 represent the formal culmination (but not the end) of the student's training in French language use. FREN 270 and 370 represent the bridge between this knowledge of French (i.e. ability to use) and a knowledge about

French (i.e. how to approach, analyze and describe various linguistic aspects of the French language). These latter concerns form the central objectives of the 400 division French linguistics courses. Topics courses may be completed more than once for credit, provided that the content is different each time.

##### Linguistic Theories

FREN 270-3 Introduction to French Linguistics I  
FREN 370-3 Introduction to French Linguistics II  
FREN 424-3 Topics in French Linguistics

##### Structure of French

FREN 411-3 Aspects of French Morphology  
FREN 412-3 Aspects of French Syntax  
FREN 413-3 Aspects of French Phonetics and Phonology  
FREN 415-3 Aspects of French Semantics and Lexicology

##### Evolution of French

FREN 423-3 Topics in the History of French

##### French Dialects

FREN 425-3 Topics in the Varieties of French

##### French Applied Linguistics

FREN 416-3 French Applied Linguistics

### French Literature

#### 200 Division Courses

FREN 240 and 230 introduce basic concepts and methods of literary analysis and sociocultural background of a few short modern French and French Canadian fiction, drama and poetry works. They also improve language competence: all lectures, class discussions and assignments are in French. FREN 230 or 240 are prerequisites for FREN 360.

#### 300 Division Courses

FREN 360 continues the introduction to the textual analysis of literary texts (fiction, drama and poetry) offered in 240, 230. The historical background of the works selected from the Middle Ages to the 19th century is also discussed. FREN 360 is a prerequisite for all 400 division French literature courses.

#### 400 Division Courses

These courses study specific literary movements or genres through various critical approaches: thematic or structural. The emphasis is on close textual analysis rather than literary history.

##### 400 Division Courses on Literary Movements and Periods

FREN 461-3 French Medieval Literature  
FREN 462-3 French Renaissance Literature  
FREN 463-3 Literature of the Seventeenth Century  
FREN 465-3 Literature of the Eighteenth Century  
FREN 467-3 Romanticism  
FREN 470-3 Realism to Naturalism  
FREN 476-3 Interdisciplinary Approaches to French Studies

##### 400 Division Courses on Genres

FREN 430-3 Topics in French-Canadian Literature  
FREN 472-3 The Contemporary Theatre  
FREN 474-3 French Poetry  
FREN 475-3 The Contemporary Novel

### French Linguistics/Literature

The following courses are for students who, once they have acquired a sufficient background in linguistics and literary criticism, wish to explore the relationship between the two disciplines.

FREN 410-3 French Stylistics  
FREN 480-2 Seminar I  
FREN 491-3 Readings in French Linguistics and/or Literary Criticism  
FREN 492-3 Honors Essay

### French Civilization and Cultures

FREN 330-3 Francophone World  
FREN 452-3 Topics in French Cultures

**Other Course(s)**

The following is taught in English and available to students who do not wish to specialize in French.

FREN 198-3 French for Reading Knowledge I

## English and French Literatures Joint Major Program

The joint major is an interdepartmental program, usually within a BA, to explore the many close relationships between English and French literatures.

**Advisors**

Miss B. Harrison BA (Birm), Department of French, 2630 Diamond Building, 778.782.4505

Ms. K. Ward, Department of English, 6133 Academic Quadrangle, 778.782.4835

**Lower Division Requirements**

Students complete the same lower division prerequisites as for both English and French majors.

**French (15 units)**

Students complete all of  
FREN 210-3 Intermediate French I  
FREN 211-3 Intermediate French II  
FREN 221-3 French Writing I  
FREN 222-3 French Writing II

(or exemption from all of FREN 210, 211, 221, 222)

and one of

FREN 230-3 Introduction to French-Canadian Literature

FREN 240-3 Introduction to French Literature: Modern French Literature

**Recommended**

FREN 270-3 Introduction to French Linguistics I

**English**

Students complete the lower division requirements of the English major program.

**Upper Division Requirements**

Students complete 21 upper division French and 20 upper division English units for a literary studies specialization and complementary courses as follows.

**French**

Students complete both of  
FREN 301-3 Advanced French Composition  
FREN 360-3 Intermediate French Literature 6 units

plus one of

FREN 300-3 Advanced French: Oral Practice  
FREN 304-3 Advanced French Grammar  
FREN 307-3 French Vocabulary  
FREN 330-3 Francophone World

plus 12 units from 400 division French literature courses.

The following are recommended if the student is interested in the linguistic analysis of literary texts.

FREN 370-3 Introduction to French Linguistics II  
FREN 410-3 French Stylistics

**English**

Please refer to the Department of English (see "Department of English" on page 106).

## French, History and Politics Joint Major Program

**Steering Committee**

S. Steele, Department of French  
L. Dobuzinkis, Department of Political Science (vacant), Department of History

**Advisors**

Miss B. Harrison BA (Birm), Department of French, 2630 Diamond Building, 778.782.4505, bharriso@sfu.ca

Mrs. T. Wright BA (S Fraser), Department of History, 6026 Academic Quadrangle, 778.782.3446

Ms. L. Kool, Department of Political Science, 6025 Academic Quadrangle, 778.782.3588

This program concentrates on languages, literature, history and politics of France and French-speaking peoples of Canada and the world. It prepares for careers in teaching, journalism, archival work, civil and diplomatic services and is offered by the Departments of French, History and Political Science. It is organized into three main themes: the French-speaking peoples of Canada, the French-speaking peoples of France and Europe, and the French-speaking peoples of the world. Students are not confined to any one theme; they may complete any combination of courses within the program. The only requirement is that there must be some demonstrable French content in the course.

The relevance of courses is frequently obvious, e.g., courses dealing with France, French Canada, and the French language, but in cases where there is doubt as to sufficient French content, the student should consult the appropriate steering committee representative and review the *Guidelines for Course Selection* (contained in the information brochure relating to the joint major) which lists suitable sample courses. The program is in nature: the emphasis is on the role played in the world by French language, literature, history and politics; hence the selected courses may represent a variety of interests.

Courses offered by the Canadian studies program might be of interest to many students.

**Lower Division Requirements**

As prerequisites, the following 42 units are required.

12 units of history  
12 units of political science  
15 units of French\*  
3 additional units of history or political science

\*see below for possible exemptions for those already proficient in French

**Upper Division Requirements**

The following are required for a total of 48 units.

16 units of history  
16 units of political science  
15 units of French (FREN 301, 360 or 370 and nine units of 400 division courses)

**French**

Students must acquire appropriate proficiency in both oral and written French by completing a certain number of French language courses. Exemption can be obtained through a placement test administered by the Department of French. The course challenge procedure may also be used to fulfil lower division language requirements in part or in full.

**Lower Division**

Students complete all of  
FREN 210-3 Intermediate French I (or exemption)  
FREN 211-3 Intermediate French II (or exemption)  
FREN 221-3 French Writing I (or exemption)  
FREN 222-3 French Writing II (or exemption)

and one of

FREN 230-3 Introduction to French-Canadian Literature

FREN 240-3 Introduction to French Literature: Modern French Literature

FREN 270-3 Introduction to French Linguistics I

**Recommended**

FREN 215-3 French Language: Oral Practice

**Upper Division**

Students complete  
FREN 301-3 Advanced French Composition

and one of

FREN 360-3 Intermediate French Literature

FREN 370-3 Introduction to French Linguistics II

**Note:** Students wishing to complement this joint major specialization with greater competence in oral and written French may complete FREN 300 or 330 and FREN 304 in addition to the above requirements. FREN 330 is highly recommended.

At least nine units must be at the 400 division.

Students may choose courses in consultation with the Department of French student advisor or the representative of the Department of French on the program steering committee.

**History**

See the Department of History for requirements.

**Political Science**

Students complete 12-15 lower division units and at least 16 upper division political science units. Choose courses in consultation with the political science student advisor or the representative of the Department of Political Science on the program steering committee after reviewing the *Guidelines for Course Selection*. Such choices must fit with the thematicity criteria of the joint major to the satisfaction of the steering committee.

## French and Humanities Joint Major Program

See "French and Humanities Joint Major Program" on page 118 for information.

## Certificate in French Language Proficiency

This program is for students who may or may not be enrolled in a degree program and who wish to improve oral and written French proficiency. It is also for those who wish to enhance their knowledge of the language for cultural or professional needs. The program is not intended for native French speakers.

Recommendations for the award of the certificate will be made by the Department of French and the Faculty of Arts and Social Sciences.

**Admission Requirements**

Normal University admission regulations apply.

**Requirements**

Students will successfully complete 30 units, of which 21 units are earned by completing seven required courses. The remaining nine units may be selected from any other French courses, excluding FREN120, 121, 122, 198, and 342.

Students complete all of

FREN 210-3 Intermediate French I

FREN 211-3 Intermediate French II (or 212)

FREN 215-3 Intermediate French Language: Oral Practice

FREN 221-3 Writing French I

FREN 222-3 Writing French II

FREN 301-3 Advanced French Composition

and one of

FREN 230-3 Introduction to French-Canadian Literature

FREN 240-3 Introduction to French Literature: Modern French Literature

**Recommended**

FREN 300-3 Advanced French: Oral Practice

FREN 330-3 Francophone World

FREN 304-3 Advanced French Grammar

Program completion normally takes five to six terms. A minimum 2.5 GPA is calculated on all Simon Fraser

University courses that are applied to the certificate. Duplicate courses are counted only once.

**Note:** It is possible to obtain exemption, up to a maximum of 12 units, from lower division French language courses by being placed in a more advanced French language course. Exempted courses must be replaced with credit obtained by

- approved transfer credit for French courses completed at another post-secondary institution (subject to University transfer credit regulations), up to a maximum of six units
- challenge credit for exempted courses (subject to University regulations governing approval of challenge credit), up to a maximum of six units
- successful completion of other French courses at the University, excluding FREN 120, 121, 122, 198, and 342.

Students who gain, or hope to gain, exemption should consult the advisor early. In accordance with certificate regulations (see page 7), units for the certificate may be applied also to majors or extended minors or to a bachelor's degree.

## Post Baccalaureate Diploma in French and Education

The Department of French and the Faculty of Education jointly offer this program comprising a set of courses for practising or future French teachers. This program includes courses directly related to the pedagogy of French as a second language as well as courses enhancing previous language competence, or knowledge of French literature or linguistics.

### Admission Requirements

Students must seek University admission or readmission and, once admitted, must separately apply to the Department of French advisor for diploma program admission. Qualifications for application to the program include the following.

- The completion of a recognized bachelor's degree with a minimum graduation 2.0 GPA from British Columbia institutions and 2.4 from institutions outside the province. University course work undertaken subsequent to the bachelor's degree will also be considered for admissibility to this program.
- A demonstrated knowledge of spoken and written French e.g. competence equivalent to successful completion of FREN 222.

Application packages are available from the Department of French and the Faculty of Education. Before applying, consult with the French department advisor, Miss B. Harrison, 778.782.4505.

### Program Requirements

Students will successfully complete an approved program comprised of at least 30 upper division units. Graduate courses may be completed with prior approval. Normally 15 units are completed from each of the French and education course lists below. A minimum 2.5 CGPA is necessary. The diploma must be completed within five years of program admission. Teachers seeking a reclassification should note that, since integrated programs are looked upon as upgrading work, all courses must be completed no more than 10 years before the date of reclassification through the Teachers' Qualification Service.

Formal graduation application is made through Student Services. See "Academic Calendar of Events" on page 12 for graduation deadlines.

### Transfer Credit

Transfer credit for course work in education and/or in French may be considered to fulfil requirements for this program. A maximum of six transfer units in each of French and education may be awarded.

### French Requirements

Students normally choose 15 units from the following courses including a minimum of two of  
FREN 304-3 Advanced French Grammar  
FREN 307-3 French Vocabulary  
FREN 416-3 French Applied Linguistics

The remaining units may be selected from 300 and 400 division French courses except FREN 342.

Please note that all course selections must be approved by the advisor in the French department.

Students with credit for the above courses or equivalents must select approved substitutes from upper division French courses. Students with no previous undergraduate courses in French linguistics or French literature must complete the lower division prerequisites FREN 270 and/or FREN 230/240.

### Education Requirements

Students normally choose 15 units from among the following courses, including both of  
EDUC 441-4 Multicultural Education  
EDUC 450-4 French Curriculum Studies

The remaining units may be chosen from  
EDUC 325-3 Assessment of Classroom Teaching  
EDUC 326-3 Classroom Management and Discipline  
EDUC 384-2,3,4,6 Special Topics\*  
EDUC 385-2,3,4,6 Special Topics\*  
EDUC 451-4 Classroom French Curriculum Practices  
EDUC 472-4 Language Arts  
EDUC 473-4 Reading\*\*  
EDUC 474-4 Social Studies  
EDUC 475-4 Mathematics  
EDUC 476-4 Natural Sciences  
EDUC 480-4 French as a Second Language  
EDUC 481-4 French Immersion and Programme-cadre de Français\*\*\*

\*courses offered in French during summer institutes

\*\*this course may be substituted with EDUC 826 if EDUC 473 has already been completed (special permission required).

\*\*\*this course may be substituted with EDUC 858 if EDUC 481 has already been completed (special permission required).

### Co-operative Education

Co-op education courses are available to those meeting the faculty's co-operative education requirements, and who want practical experience related to French studies. The program entails planned study terms and employment. See page 382 for descriptions of FREN 185, 285, 385, and 485.

### Italian Courses

Italian courses are administered by the Department of French. For courses, see "Italian ITAL" on page 408. Students with a competence in the language beyond the course in which they are enrolled will be required to withdraw. Students who are unsure of their language division are responsible for proficiency assessment prior to course enrolment. Consult the advisor or inquire at the general office.

### Certificate in Italian Studies

A minimum of 30 units comprising both lower and upper division courses is required. A maximum of six transfer units may be counted (up to six units of 100-division Italian language courses or up to six assigned transfer units in humanities, history or FPA courses or a combination thereof).

The program serves full and part-time students seeking educational enrichment in Italian Humanism from the early Renaissance to modern times. It may be completed concurrently with, and complements

major/minor programs in French, humanities, history and contemporary arts. It requires basic Italian language proficiency (writing, reading and oral skills), is intended for further literature, history and arts study, and may be completed with a degree program. Faculty of Arts and Social Sciences BA students may complete the certificate so that some of the FASS breadth requirements are fulfilled by the same courses. Certificate courses may also be used toward majors or minors.

### Program Requirements

Students complete 15 units in Italian language instruction including

ITAL 100-3 Introductory Italian I  
ITAL 101-3 Introductory Italian II  
ITAL 200-3 Intermediate Italian I  
ITAL 201-3 Intermediate Italian II  
ITAL 300-3 Advanced Italian: Language and Culture

and a minimum of 15 more units to be selected from  
ENGL 377-4 Italy Field School I  
ENGL 378-4 Italy Field School II  
FPA 337-3 Intermediate Selected Topics in Film and Video Studies\*

FPA 436-3 Advanced Seminar in Film and Video Studies\*

FREN 461-3 French Medieval Literature  
FREN 462-3 French Renaissance Literature  
HIST 402-4 Renaissance Italy  
HUM 303-4 The Latin Humanist Tradition  
HUM 305-4 Medieval Studies  
HUM 311-4 Italian Renaissance Humanism  
HUM 312W-4 Renaissance Studies  
HUM 320-4 The Humanities and Philosophy

\*providing that content of the course covers primarily Italian film and/or video

**Note:** Some of the above courses have specific prerequisites and it is the student's responsibility to ensure that all prerequisites are met for upper division courses listed in this program.

#### Associate Members

R.W. Gordon, School of Criminology  
 M. Hayes, Faculty of Health Sciences  
 W. Parkhouse, Department of Biomedical Physiology and Kinesiology  
 S.N. Robinovitch, Schools of Biomedical Physiology and Kinesiology, Engineering Science

#### Advisor

Ms. A. Barrett BA (C'dia), 2800 Simon Fraser University Vancouver, 778.782.5065

\*joint appointment with sociology and anthropology

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

### Minor Program

The minor provides specialized education for those interested in combining course work in aging-related issues with an existing major program. Admission requires a minimum of 60 units with a 2.0 or higher cumulative GPA. The following prerequisite courses are recommended for entering students.

KIN 105-3 Fundamentals of Human Structure and Function  
 KIN 142-3 Introduction to Kinesiology  
 PSYC 100-3 Introduction to Psychology I  
 PSYC 102-3 Introduction to Psychology II  
 SA 150-4 Introduction to Sociology (S)  
 STAT 203-3 Statistics for the Social Sciences

Approved minor students must complete GERO 300-3 Introduction to Gerontology

plus 12 units chosen from the following  
 GERO 301-3 Research Methods in Gerontology  
 GERO 302-3 Health Promotion and Aging  
 GERO 400-4 Seminar in Applied Gerontology  
 GERO 401-3 Environment and Aging  
 GERO 402-3 Drug Issues in Gerontology  
 GERO 403-3 Counselling Issues with Older Adults  
 GERO 404-3 Health and Illness in Later Life  
 GERO 406-3 Death and Dying  
 GERO 407-3 Nutrition and Aging  
 GERO 408-4 Families over the Life course  
 GERO 409-3 Mental Health and Aging  
 GERO 410-3 Special Topics in Gerontology I  
 GERO 411-3 Special Topics in Gerontology II  
 GERO 412-3 Special Topics in Gerontology III  
 GERO 414-4 Special Topics in Gerontology IV  
 GERO 420-4 Sociology of Aging  
 GERO 435-3 Adult Guardianship law

A list of additional courses from various departments that are designated for inclusion in the minor is available. Six units maximum of designated courses may be applied toward the minor with prior advisor approval. Candidates intending to apply for admission to the post baccalaureate diploma in gerontology or to the master's program should contact the advisor before selecting courses for the minor.

### Post Baccalaureate Diploma

This program, for those with a bachelor's degree who are working or plan to work with the elderly, provides a broadly based, multidisciplinary perspective on aging as well as requisite knowledge and skills for meaningful intervention and application of research findings to practice. For information about the program's general regulations, see "Post Baccalaureate Diploma Program" on page 7.

#### Admission Requirements

- completion of a bachelor's degree from a recognized university with a minimum graduation grade point average of 2.5
- three reference letters attesting to personal qualities and characteristics, ability to complete a post baccalaureate program, and career potential and dedication to the gerontology field. Obtain an application package from the program office including letter of reference forms, program information and a separate application to the gerontology diploma program.

#### Program Requirements

Successful completion of 32 approved units, 20 of which are earned by completing the six required courses below is required. The remaining 12 units are from the specified list of optional courses.

A 2.5 CGPA is required on courses applied toward the diploma. Students entering without experience of working directly with older persons in a job or volunteer setting may be required to complete a practicum. Some organizations may require a criminal record check search prior to starting the practicum.

Visit [www.sfu.ca/gerontology](http://www.sfu.ca/gerontology) for applications.

#### Required Courses

Students complete all of  
 GERO 300-3 Introduction to Gerontology  
 GERO 301-3 Research Methods in Gerontology  
 GERO 400-4 Seminar in Applied Gerontology  
 GERO 420-4 Sociology of Aging  
 KIN 461-3 Physiological Aspects of Aging  
 PSYC 357-3 Adulthood and Aging  
 SA 420-4 Sociology of Aging

#### Optional Courses

EDUC 351-3 Teaching the Older Adult  
 GERO 302-3 Health Promotion and Aging  
 GERO 401-3 Environment and Aging  
 GERO 402-3 Drug Issues in Gerontology  
 GERO 403-3 Counselling Issues with Older Adults  
 GERO 404-3 Health and Illness in Later Life  
 GERO 406-3 Death and Dying  
 GERO 407-3 Nutrition and Aging  
 GERO 408-4 Families over the Life course  
 GERO 409-3 Mental Health and Aging  
 GERO 410-3 Special Topics in Gerontology I  
 GERO 411-3 Special Topics in Gerontology II  
 GERO 412-3 Special Topics in Gerontology III  
 GERO 414-4 Special Topics in Gerontology IV  
 GERO 435-3 Adult Guardianship Law  
 SA 319-4 Culture, Ethnicity and Aging

#### Notes:

Most diploma program courses have prerequisites and should be completed before enrolling in the program. Contact the program advisor for information on prerequisites and general program requirements.

Students should complete GERO 300 and 301 when they begin the program, and GERO 400 near the end.

Students may choose PSYC 301, SA 355 or any other approved courses in research methodology as an alternative to GERO 301; however, only one of these courses may be applied toward the diploma.

Courses other than above may be designated for gerontology diploma credit from term to term. Check with the program for listings.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 90.

## Major Program

### Lower Division Requirements

To enter, students must complete 18 units of 100 and 200 division history courses. One hundred and 200 division courses introduce four groupings of history course offerings: the history of the Americas; European history; the history of Africa, the Middle East, and Asia; and Global/Comparative history.

Students entering 400 division seminars should have an appropriate background in 100, 200 division and/or 300 division history. Normally, students should complete 45 units (or equivalent) prior to enrolment in any upper division history course.

Students should plan lower division work with upper division requirements in mind. The program offers a wide range of courses in four lower division groups, providing introduction to a broad curriculum. A careful selection of lower division courses lays the foundation for specialization in specific upper division areas. For this reason, complete at least one course from at least three of the four lower division courses.

#### Group 1 – Europe

HIST 106-3 The Making of Modern Europe  
HIST 215-3 The Making of the British Isles  
HIST 220-3 Late Medieval and Renaissance Europe  
HIST 223-3 Early Modern Europe, 1500-1789  
HIST 224-3 Europe from the French Revolution to the First World War  
HIST 225-3 20th Century Europe  
HIST 288-3 History of Christianity to 1500

#### Group 2 – The Americas

HIST 101-3 Canada to Confederation  
HIST 102W-3 Canada Since Confederation  
HIST 104-3 The Americas from Colonization to Independence  
HIST 201-3 The History of Western Canada  
HIST 204-3 The Social History of Canada  
HIST 208-3 Latin America: the Colonial Period  
HIST 209-3 Latin America: the National Period  
HIST 212-3 The United States to 1877  
HIST 213-3 The United States since 1877

#### Group 3 – Africa, Middle East, Asia

HIST 146-3 Africa after the Transatlantic Slave Trade  
HIST 151-3 The Modern Middle East  
HIST 205-3 Premodern Japan  
HIST 206-3 Japan Since 1868  
HIST 231-3 History of Africa to the 19th Century: From Ancient Times to the Slave Trade  
HIST 249-3 Classical Islamic Civilization  
HIST 252-3 Islamic India  
HIST 254-3 China to 1800  
HIST 255-3 China Since 1800  
HIST 256-3 The People's Republic of China

#### Group 4 – Global/Comparative

HIST 104-3 The Americas from Colonization to Independence  
HIST 130-3 Modern World History  
HIST 208-3 Latin America: the Colonial Period  
HIST 249-3 Islamic Civilization

**Note:** History majors may count one or both of WS 201 and 202 toward the required 18 lower division history units.

Students must complete at least nine lower division history units before enrolling in upper division work.

### Upper Division Requirements

Major students obtain credit in at least 32 units (eight courses) of 300 and 400 division work; 12 units (three courses) must be in 400 division courses. Courses must be distributed within all four groups. Students complete at least one course from each group. Global/Comparative courses that are also included in another group may only be counted towards fulfilling the upper division course requirement for one group.

#### Group 1 – Europe

HIST 307-4 Selected Topics in Hellenic Studies  
HIST 308-4 The Byzantine Empire  
HIST 315-4 Politics and Society in England, 1500-1707  
HIST 316-4 English Society since the Mid 18th Century  
HIST 319-4 The Modern French Nation  
HIST 320-4 European Reformation  
HIST 321-4 State and Society in Early Modern Europe  
HIST 331-4 Germany from the Reformation to 1815  
HIST 332-4 Politics and Culture in Modern Germany  
HIST 334-4 The Making of Imperial Russia  
HIST 335-4 The Soviet Project  
HIST 336-4 Absolutism and Enlightenment  
HIST 337-4 The Balance of Power in Europe  
HIST 338-4 World War II  
HIST 339-4 The British Empire and Commonwealth  
HIST 345W-4 Selected Topics in European History  
HIST 360-4 The History of Science: 1100-1725  
HIST 361-4 The History of Science: The 18th Century to the Present  
HIST 362-4 Ireland from the Penal Era to Partition  
HIST 401-4 Problems in Modern German History  
HIST 402-4 Renaissance Italy  
HIST 403-4 The European Reformation  
HIST 404-4 Protestants, Papists and Puritans: Culture and Belief in Early Modern England, 1500 – 1640  
HIST 405-4 Authority and Community in Early Modern English Society, 1500 – 1700  
HIST 407-4 Popular Culture in Great Britain and Europe  
HIST 411-4 Class and Gender in Modern Europe  
HIST 412-4 Marxism and the Writing of History  
HIST 413-4 Britain and Europe in the Twentieth Century  
HIST 414-4 The Impact of the Great War  
HIST 415-4 Victorian Britain  
HIST 416-4 The French Revolution  
HIST 417-4 Modern French Problems in History  
HIST 419-4 Problems in Modern Russian History  
HIST 420-4 Russia as a Multiethnic Empire  
HIST 421-4 Modern Greece, 1864-1925  
HIST 422-4 Greece, 1935-1944: Occupation and Resistance  
HIST 439-4 Catholicism in Early Modern Europe  
HIST 462-4 Religion, Ethnicity, and Politics in Twentieth-Century Northern Ireland

#### Group 2 – The Americas

HIST 322-4 Atlantic and Pacific Migration  
HIST 324-4 Slavery in the Americas  
HIST/FNST 325-4 History of Aboriginal Peoples of North America to 1850\*  
HIST/FNST 326-4 History of Aboriginal Peoples of North America Since 1850\*\*  
HIST 327-4 Canadian Labor and Working Class History  
HIST 329-4 Canadian Family History  
HIST 373-4 Conquest in North America, 1500-1900  
HIST 374W-4 Selected Topics in the History of the Americas  
HIST 376-4 North American West  
HIST 377-4 Environmental History  
HIST 378-4 The United States in the World since 1865  
HIST 382-4 African-American History, since 1865  
HIST 384-4 North American Urban History  
HIST 409-4 Disease and Society  
HIST 424-4 Problems in the Cultural History of Canada  
HIST 425-4 Gender and History  
HIST 426-4 State Power and Social Regulation in North America  
HIST 427-4 Problems in the History of Aboriginal Peoples

HIST 428-4 Problems in the Social and Economic History of Canada  
HIST 430-4 New France  
HIST 432-4 Problems in Environmental History  
HIST 436-4 British Columbia  
HIST 442-4 America's Empires  
HIST 444-4 Conceptualizing Atlantic Canada  
HIST 446-4 American Revolution and the Making of the Constitution  
HIST 450-4 Race, Expansion and War in the Early American Republic  
HIST 453-4 The United States in Depression and War  
HIST 454-4 The History of Sexuality  
HIST 455-4 Race in the Americas  
HIST 458-4 Problems in Latin American Regional History  
HIST 459-4 Problems in the Political and Social History of Latin America

\*only one of FNST 325 and HIST 325 can be completed for credit

\*\*only one of FNST 326 and HIST 326 can be completed for credit

#### Group 3 – Africa, Middle East, Asia

HIST 343-4 Africa and the Slave Trade  
HIST 344-4 East Africa  
HIST 348-4 A History of 20th Century South Africa  
HIST 350-4 The Ottoman Empire and Turkey  
HIST 352-4 Religion and Politics in Modern Iran  
HIST 354-4 Imperialism and Modernity in the Middle East  
HIST 355-4 The Arab Middle East in the Twentieth Century  
HIST 366-4 Social History in China since 1800  
HIST 368W-4 Selected Topics in the History of the Wider World  
HIST 371-4 The Asia Pacific War in Modern Japanese History  
HIST 388-4 Christianity and Globalization  
HIST 456-4 The Late Ottoman Empire: State, Culture and Social Transformation, 1750-1923  
HIST 457-4 The Turkish Republic: Politics, Society and Culture, 1918-present  
HIST 465-4 The Palestinian-Israeli Conflict  
HIST 466-4 Religion and Society in Africa, Nineteenth and Twentieth Century  
HIST 467-4 Modern Egypt  
HIST 468-4 Problems in the History of Religion  
HIST 469-4 Islamic Social and Intellectual History  
HIST 471-4 Women in Modern Japanese History  
HIST 472-4 Problems in World History  
HIST 473-4 The Making of South African Society  
HIST 479-4 Change, Conflict and Resistance in Twentieth-Century China

#### Group 4 – Global/Comparative

HIST 300-4 Approaches to History  
HIST 322-4 Atlantic and Pacific Migration  
HIST 334-4 The Making of Imperial Russia  
HIST 335-4 The Society Project  
HIST 373-4 North American Conquest  
HIST 376-4 North American West  
HIST 378-4 The United States in the World since 1865  
HIST 388-4 Christianity and Globalization  
HIST 412-4 Marxism and the Writing of History  
HIST 420-4 Russia as a Multiethnic Empire  
HIST 425-4 Gender and History  
HIST 442-4 America's Empires  
HIST 446-4 American Revolution in International Context  
HIST 454-4 The History of Sexuality  
HIST 466-4 Religion and Society in Africa, Nineteenth and Twentieth Century  
HIST 469-4 Islamic Social and Intellectual History  
HIST 472-4 Problems in World History  
These interdisciplinary courses below have some Canadian history content.

CNS 160-3 The Social Background of Canada

CNS 210-3 Foundations of Canadian Culture

CNS 391-3 Special Canadian Topics

CNS 490-3 Canadian Intellectual Tradition

Consult an advisor before beginning the program.

### Concentration in Middle Eastern and Islamic History

Students may qualify for this concentration by completing two of

HIST 151-3 The Modern Middle East

HIST 249-3 Classical Islamic Civilization

HIST 252-3 Islamic India

plus four of

HIST 350-4 The Ottoman Empire and Turkey

HIST 352-4 Religion and Politics in Modern Iran

HIST 354-4 Imperialism and Modernity in the Middle East

HIST 355-4 The Arab Middle East in the Twentieth Century

HIST 456-4 The Late Ottoman Empire: State, Culture and Social Transformation, 1750-1923

HIST 457-4 The Turkish Republic: Politics, Society and Culture, 1918-Present

HIST 465-4 The Palestinian-Israeli Conflict

HIST 467-4 Modern Egypt

HIST 469-4 Islamic Social and Intellectual History

### Concentration in British History and Irish History

Students may qualify for this concentration by completing

HIST 215-3 The Making of the British Isles

plus one of

HIST 315-4 Politics and Society in England, 1500-1707

HIST 316-4 English Society since the Mid 18th Century

HIST 339-4 The British Empire and Commonwealth

HIST 362-4 Ireland from the Penal Era to Partition

plus four of

ARCH 321-3 Archaeology of Britain

HIST 404-4 Protestants, Papists and Puritans: Culture and Belief in Early Modern England, 1500 – 1640

HIST 405-4 Authority and Community in Early Modern English Society, 1500 – 1700

HIST 407-4 Popular Culture in Great Britain and Europe

HIST 413-4 Britain and Europe in the Twentieth Century

HIST 415-4 Victorian Britain

HIST 462-4 Religion, Ethnicity, and Politics in Twentieth-Century Northern Ireland

### Honors Program

In intensive, small (30 student) seminars, students refine discussion skills, expository writing, and critical thought. Apply for admission to the program supervisor at the end of the fourth level. Admitted students must maintain a minimum 3.33 GPA in honors courses, and a minimum 3.0 in all other upper division courses. The three required honors courses must be completed in two or three terms in a fall/spring sequence and all other work must be completed within six terms of program admission.

Honors students must complete the following.

HIST 300-4 Approaches to History

HIST 305-4 Honors Seminar

HIST 400-4 Seminar in Historical Methods

HIST 498-6 Honors Essay

In addition to the 18 honors units, 42 upper division units are also required. Students are encouraged to complete courses outside the department but at least 50 of the 60 upper division units must be in history courses. For honors requirements, see page 89.

### History Minor Program

To enter, students must obtain at least nine units in 100 and 200 division history. Minors must obtain credit in 300 and 400 division work, totalling at least 15 or 16 units with at least four units in each division.

### Labor Studies Minor Program

Students complete 24 units comprised of nine lower division units including

LBST 101-3 Introducing Labor Studies

and 15 upper division units including

LBST 301-3 Labor Movements: Contemporary Issues and Images

The remaining electives may be from the following.

BUS 484-3 Workplace Industrial Relations

BUS 488-3 Human Relations in Business

BUEC 280-3 Introduction to Labor Economics

BUEC 384-3 Industrial Relations

BUEC 396-3 The Structure of Industry

BUEC 485-3 Collective Bargaining

CNS 280-3 Canadian Political Economy

CMNS 454-4 Computer Mediated Work and

Workplace Communication

ECON 103-4 Principles of Microeconomics

ECON 309-5 Introduction to Marxian Economics

ECON 353-4 Economic History of Canada

ECON 381-4 Labor Economics

ECON 480-3 Seminar in the Economics of Labor Market Policy

GEOG 426-4 Industrial Change and Local Development

HIST 327-4 Canadian Labor and Working Class History

HIST 412-4 Marxism and the Writing of History

HIST 424-4 Problems in the Cultural History of Canada\*

HIST 428-4 Problems in the Social and Economic History of Canada\*

HIST 453-4 The United States in Depression and War

KIN 381-3 Psychology of Work and Human Performance

KIN 382-3 Physical Hazards in the Workplace

LAS 318-4 Political Economy of Latin American Development

POL 222-3 Introduction to Canadian Politics

POL 223-3 Canadian Political Economy

POL 327-4 Globalization and the Canadian State

POL 343-4 Global Political Economy

POL 356-4 The Political Economy of Labor

POL 383-4 Political Economy of Latin America

POL 423-4 BC Government and Politics

SA 202-4 Post-Industrial Society

SA 263-4 Peasants, Proletarians and the Global Economy

SA 321-4 Social Movements

SA 328-4 Political Economy of Latin American Development

SA 340-4 Social Issues and Social Policy Analysis

SA 362-4 The Global Division of Labor

WS 308-4 Women and Work

WS 310-4 Special Topics in Women's Studies\*

WS 314-4 Race, Class and Gender Relations

\*when topic is appropriate

Students may substitute relevant special topics courses for those above with labor studies approval.

### History Extended Minor

This program consists of the lower division requirements for a major and the upper division requirements for a minor. Other criteria may be set by individual departments and programs. A student must have their program approved by the extended minor advisor. The program requires 18 units in 100 and

200 division courses and 15 or 16 units in 300 and 400 division, with at least four units in each division.

### Languages Other Than English

Although not required for a history BA, it is useful to be acquainted with a language other than English for many history courses. Students, especially those who intend to pursue graduate courses, should consider including a second language in their programs.

### History and Canadian Studies Joint Major Program

See "Joint Major Programs" on page 96.

### French, History and Politics Joint Major Program

This joint major offers study of the language, history, politics and culture of French speaking people of Canada and the world. It prepares for careers in civil service, politics (emphasizing Canadian government and politics or international relations), diplomatic service, international organizations, journalism, teaching and archival work. See page 113.

### History and Humanities Joint Major Program

See "History and Humanities Joint Major Program" on page 119.

### History and Latin American Studies Joint Major Program

See "Joint Major Programs" on page 122.

### History and Women's Studies Joint Major Program

For program requirements, see "History and Women's Studies Joint Major Program" on page 140.

### Certificate in Hellenic Studies

6219 Academic Quadrangle, 778.782.5886

The certificate, which requires 24 units, is for those with Hellenic studies interest and also for those interested in graduate Greek history. The latter should complete two language courses. Upper division prerequisite completion is the student's responsibility. Special topics courses may be completed in place of those below with advisor approval.

### Lower Division Requirements

Students complete three of

HUM 102-3 Classical Mythology

HUM 151-3 Ancient Greek I

HUM 152-3 Ancient Greek II

HUM 201-3 Great Texts in Humanities I

GRK 110-3 Modern Greek for Beginners I

GRK 160-3 Modern Greek for Beginners II 9 units

A student who successfully completes all four language courses (HUM 151, 152, LANG 110, 160) needs only three from the upper division list.

### Upper Division Requirements

Students complete four of

HIST 308-4 The Byzantine Empire

HIST 421-4 Modern Greece, 1864-1925

HIST 422-4 Greece, 1935-1944: Occupation and Resistance

HUM 302-4 The Golden Age of Greece: An Integrated Society

PHIL 350-3 Ancient Philosophy

15 or 16 units

## Certificate in Labor Studies

Students complete a minimum of 24 units including both of  
LBST 101-3 Introducing Labor Studies  
LBST 301-3 Labor Movements: Contemporary Issues and Images

The remaining electives may be chosen from the list of optional courses as shown for the Labor Studies Minor. See page 117.

## Co-operative Education

Co-operative Education combines work experience with academic studies. Students spend alternate terms on campus and in paid, study related jobs which provide practical experience in social sciences, interpretive skills and complements a history degree.

\*joint appointment with history

\*\*joint appointment with political science

Humanities studies a broad range of ideas and subjects drawn from philosophy, art, literature, history, religion, science, and social and political thought. Through a comparative and interdisciplinary approach to classical, medieval, renaissance, and modern culture, the study of humanities raises critical questions about achievements and controversies associated with civilization itself. Students are

encouraged to examine knowledge and ideas central to the humanities and to integrate these concerns with degree programs in original and critical ways.

The Asia-Canada Program and the graduate Liberal Studies Program are affiliated with the department. See "Asia-Canada Program" on page 93 and also see "Liberal Studies Program" on page 263.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfill writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

## Major Program

### Lower Division Requirements

Students complete 18 lower division units including HUM 101W-3 Introduction to the Humanities

and two of  
HUM 102W-3 Classical Mythology  
HUM 105-3 Western Civilization from the Ancient World to the Reformation Era  
HUM 130-3 Introduction to Religious Studies

and one of  
HUM 201-3 Great Texts in the Humanities I  
HUM 202-3 Great Texts in the Humanities II  
HUM 203-3 Great Texts in the Humanities III  
and two further lower division humanities courses.

### Upper Division Requirements

Thirty units in upper division humanities\* courses which must include

HUM 495-2 Humanities Graduating Seminar

Students are expected to include a breadth of humanities courses in fulfilling the upper division requirement. Therefore, they must consult the student advisor to plan their upper division course selection.

\*with humanities advisor prior approval, students may substitute one humanities-related upper division course from another academic unit towards the upper division humanities requirement. The same course may not be used toward more than one program (honors, joint honors, major, joint major, minor or extended minor). See the first paragraph for a definition of humanities related subjects.

## Minor Program

### Lower Division Requirements

Students complete nine lower division units including HUM 101-3 introduction to the Humanities

and one of  
HUM 201-3 Great Texts in the Humanities I  
HUM 202-3 Great Texts in the Humanities II  
HUM 203-3 Great Texts in the Humanities III

and one further humanities course.

### Upper Division Requirements

Students complete 16 units in upper division humanities courses.

## Extended Minor Program

Students may qualify for a BA with an extended minor in humanities plus one other extended minor, or may use the extended minor in combination with other programs in other degrees.

## Lower Division Requirements

Students complete the lower division requirements for the major in humanities.

## Upper Division Requirements

Students complete 16 upper division units in humanities courses.

## English and Humanities Joint Major Program

This joint major is for those interested in exploring relationships between English literature and humanities. Students must plan their program in consultation with advisors in each department.

### Lower Division Requirements

#### English

Students complete the lower division requirements of the English major program. Please see page 106.

#### Humanities

Students complete 15 units including  
HUM 101W-3 introduction to the Humanities  
and one of  
HUM 102W-3 Classical Mythology  
HUM 105-3 Western Civilization from the Ancient World to the Reformation Era  
HUM 130-3 Introduction to Religious Studies  
and one of  
HUM 201-3 Great Texts in the Humanities I  
HUM 202-3 Great Texts in the Humanities II  
HUM 203-3 Great Texts in the Humanities III  
and two further lower division humanities courses.

### Upper Division Requirements

#### English

Students complete 20 upper division English units. One course must come from ENGL 300, 304, 306, 310, 311, 313, 320, 322; and one from ENGL 354, 357, 359. Four units must be 400 division, excluding directed studies (ENGL 441, 442, 443 and 444).

#### Humanities

Students complete 22 units in upper division humanities courses which must include  
HUM 495-2 Humanities Graduating Seminar

#### Recommended

HUM 305-4 Medieval Studies  
HUM 307-4 Carolingian Civilization  
HUM 311-4 Italian Renaissance Humanism  
HUM 312W-4 Renaissance Studies  
HUM 321-4 The Humanities and Critical Thinking

## French and Humanities Joint Major Program

This inter-departmental program explores the relationship between the study of humanities and French. Interested students must plan their program in consultation with advisors in each department.

### Lower Division Requirements

#### French

Students complete the lower division requirements of the French major program. Please see page 112.

#### Humanities

Students complete 15 units including  
HUM 101W-3 introduction to the Humanities  
and one of  
HUM 102W-3 Classical Mythology  
HUM 105-3 Western Civilization from the Ancient World to the Reformation Era  
HUM 130-3 Introduction to Religious Studies  
and one of  
HUM 201-3 Great Texts in the Humanities I

HUM 202-3 Great Texts in the Humanities II  
HUM 203-3 Great Texts in the Humanities III  
and two further lower division humanities courses.

### Upper Division Requirements

#### French

Students complete  
FREN 301-3 Advanced French Composition  
and one of  
FREN 360-3 Intermediate French Literature  
FREN 370-3 Introduction to French Linguistics II

and 15 units from the 400 division French linguistics or literature offerings. FREN 461 and 462 are recommended.

#### Humanities

Students complete 22 units in upper division humanities courses which include  
HUM 495-2 Humanities Graduating Seminar

#### Recommended

HUM 307-4 Carolingian Civilization  
HUM 311-4 Italian Renaissance Humanism

### History and Humanities Joint Major Program

This joint major explores relationships between the two disciplines. Students must plan their program in consultation with advisors in each department.

### Lower Division Requirements

#### History

Students complete the lower division requirements of the history major program. Please see "Lower Division Requirements" on page 119.

#### Humanities

Students complete 15 units including  
HUM 101W-3 introduction to the Humanities  
and one of  
HUM 102W-3 Classical Mythology  
HUM 105-3 Western Civilization from the Ancient World to the Reformation Era  
HUM 130-3 Introduction to Religious Studies  
and one of  
HUM 201-3 Great Texts in the Humanities I  
HUM 202-3 Great Texts in the Humanities II  
HUM 203-3 Great Texts in the Humanities III  
and two further lower division humanities courses.

### Upper Division Requirements

#### History

Students complete 24 units of 300 and 400 division history courses, of which 12 must be in 400 division. Students complete at least two courses from any two groups, and at least one from the remaining group. For a description of the three groups, see page 116.

#### Humanities

Students complete 22 units in upper division humanities courses which must include  
HUM 495-2 Humanities Graduating Seminar  
*Recommended*  
HUM 302W-4 The Golden Age of Greece: An Integrated Society  
HUM 303-4 The Latin Humanist Tradition  
HUM 305-4 Medieval Studies  
HUM 307-4 Carolingian Civilization  
HUM 311-4 Italian Renaissance Humanism  
HUM 312W-4 Renaissance Studies

### Philosophy and Humanities Joint Major Program

This joint major explores the relationship between the two disciplines. Students must plan their program in consultation with advisors in each department.

### Lower Division Requirements

#### Humanities

Students complete 15 units including  
HUM 101W-3 introduction to the Humanities  
and one of  
HUM 102W-3 Classical Mythology  
HUM 105-3 Western Civilization from the Ancient World to the Reformation Era  
HUM 130-3 Introduction to Religious Studies

and one of  
HUM 201-3 Great Texts in the Humanities I  
HUM 202-3 Great Texts in the Humanities II  
HUM 203-3 Great Texts in the Humanities III

and two further lower division humanities courses.

#### Philosophy

Students complete 12 units including all of  
PHIL 100-3 Knowledge and Reality  
PHIL 120-3 Introduction to Moral Philosophy  
PHIL 203-3 Metaphysics  
and one of  
PHIL 150-3 History of Philosophy I  
PHIL 151-3 History of Philosophy II

### Upper Division Requirements

#### Humanities

Students complete 22 units in upper division humanities courses which include  
HUM 495-2 Humanities Graduating Seminar  
*Recommended*  
HUM 320-4 The Humanities and Philosophy  
HUM 321-4 The Humanities and Critical Thinking

#### Philosophy

Twenty-one units are required.

### Women's Studies and Humanities Joint Major Program

For requirements, see "Humanities and Women's Studies Joint Major Program" on page 140.

### Certificate in Religious Studies

This program encourages and facilitates interdisciplinary study of religious thought and its effects on civilization. Students may select courses that focus on one tradition or a broader thematic study across traditions and cultures. Courses are mainly drawn from the Departments of Humanities, History, Asia-Canada Program, and others. The program is available to those without a bachelor's degree. Credits earned may be applied to a major or minor. Units applied to one certificate may not be applied to another Simon Fraser University certificate or diploma. Students may apply for relevant transfer credit to a maximum of 15 transfer units.

### Admission Requirements

Prospective students must apply for Simon Fraser University admission and meet the normal admission requirements. Certificate program admission approval must be obtained from the department advisor.

### Program Requirements

Students complete at least 30 units, 13-14 of which are earned by completing the four required courses. The remaining units are selected from the elective list. Students are responsible for meeting the prerequisite requirements for courses used toward the certificate.

### Required Courses

(minimum of 13 units)

Students complete both of  
HUM 130-3 Introduction to Religious Studies  
HUM 330-4 Religion in Context

and two of

ARCH 226-3 The Prehistory of Religion: Shamans, Sorcerers and Saints  
HUM 204-3 Great Religious Texts  
HUM 331-4 Studies in Asian Religions  
PHIL 240-3 Philosophy of Religion

### Elective Courses

(17 units)

The remaining 17 units are chosen from the following.

ASC 202-3 Studies in Asian Cultures\*  
ASC 302-3 Selected Topics in Chinese Studies\*  
ASC 303-3 Selected Topics in Japanese Studies\*  
ASC 400-3 Selected Topics in Asia-Canada Studies\*  
HIST 220-3 Late Medieval and Renaissance Europe  
HIST 249-3 Classical Islamic Civilization  
HIST 288-3 History of Christianity to 1500  
HIST 320-4 European Reformation  
HIST 352-4 Religion and Politics in Modern Iran  
HIST 388-4 Christianity and Globalization  
HIST 404-4 Protestants, Papists and Puritans: Culture and Belief in Early Modern England 1500-1640  
HIST 439-4 Catholicism in Early Modern Europe  
HIST 466-4 Religion and Society in Africa, Nineteenth and Twentieth Centuries  
HIST 468-4 Problems in the History of Religion  
HIST 469-4 Islamic Social and Intellectual History  
HUM 102W-3 Classical Methodology  
HUM 203-3 Great Texts in the Humanities III\*  
HUM 219-3 The Early Middle Ages  
HUM 305-4 Medieval Studies \*  
HUM 307-4 Carolingian Civilization  
HUM 332-4 Mythology in Context  
HUM 350-4 Great Figures in Humanistic Tradition\*  
HUM 375-4 The Woodsworth Seminar\*  
SA 322-4 Sociology of Religion (S)  
SA 323-4 Symbol, Myth and Meaning (A)  
WS 304-4 Women and Religion  
WS 305-4 Conceiving Creativity

\*when topics are appropriate; consult with the advisor; other courses with appropriate content may be counted with prior approval of the advisor.

### Post Baccalaureate Diploma in Humanities

This program is for those who have completed a bachelor's degree. For information about the program's general regulations, see "Post Baccalaureate Diploma Program" on page 7.

### Program Requirements

Students must successfully complete an approved program comprising 30 upper division or graduate units including at least 16 HUM units. The remaining 14 are selected in consultation with an advisor in the subject or discipline which most closely fits the student's goals. Contact the humanities advisor.

### Co-operative Education

Co-op education courses are for students who meet Faculty of Arts and Social Sciences Co-operative Education Program requirements and who wish practical experience related to Humanities studies. The program entails planned study terms and employment. See the course descriptions for HUM 471, 472, 473, 474 (page 399). Work term arrangements are made through the faculty's co-op co-ordinator who should be consulted at least one term in advance. See page 212 for more details.

\*joint appointment with history

\*\*joint appointment with political science

The program is primarily for students with a background or interest in political science, history, economics, geography, sociology, anthropology, and humanities, as well as other areas. Students can specialize in international issues through a curriculum which integrates training and experience concerning the complex and challenging issues that are central to global affairs. Public or private sector employees who wish to specialize in specific dimensions that are necessary to understand and address international issues may also be interested in this program.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

## Program Requirements

The school limits admission to its major based on a competitive application process. Students are eligible to apply for entry to the major after successfully completing 30 units, which must include IS 101, plus two of IS 200, 210 or 220. Application should be made in the third term week for admission in the following term. Criteria for selection are the student's CGPA and performance in IS courses.

Students must obtain a C- grade or higher in all required lower division and upper division courses used toward an international studies major, minor or honors program.

## Appeal Procedure

Applicants denied admission to the major may appeal in writing to the school's director. If that appeal results in a negative decision, a written appeal to the dean of the faculty may be submitted. Appeals will be granted only in very exceptional circumstances.

## Major Program

### Lower Division Requirements

Students complete 24 lower division units including ECON 102-3 The World Economy  
IS 101-3 Introduction to International Studies:  
Studying Global Conflict and Co-operation  
IS 240-3 Research Methods in International Studies  
plus 15 lower division units as determined by stream 1, 2, or 3 below.

### Upper Division Requirements

Students complete 32 upper division IS units including both of  
IS 450W-4 Seminar on Global Problems in Interdisciplinary Perspective  
IS 451-4 Seminar on Core Texts in International Studies

The remaining 24 units must be from one of the three streams (see "Streams" on page 120). Students must also fulfil the foreign cultural component (see "Foreign Cultural Component" on page 121).

## Honors Program

This program is for those who wish to refine their discussion skills, and their expository writing and critical thought with an international context. Apply to the program director after completion of all the lower division units and 12 upper division IS units with a minimum grade point average of 3.4. Those admitted must maintain a minimum 3.4 cumulative GPA.

For an honors degree, students complete 24 lower division units including required lower division courses for a major  
50 upper division units including all requirements for the major

plus both of  
IS 490-4 Honors Seminar  
IS 499-5 Honors Essay

The additional upper division units can be from any of the streams or foreign cultural component.

## Minor Program

### Lower Division Requirements

Students complete 12 units including both of  
ECON 102-3 The World Economy  
IS 101-3 Introduction to International Studies:  
Studying Global Conflict and Co-operation  
plus two of  
IS 200-3 Historical Perspectives on Diplomatic Relations, International Security and Law (required for students completing stream 1)  
IS 210-3 Comparative World Politics: Trajectories, Regimes, Challenges (required for students completing stream 2)  
IS 220-3 Wealth and Poverty of Nations (required for students completing stream 3)  
IS 230-3 Transnationalism and Society

### Upper Division Requirements

Students complete 16 upper division units from one of the three streams (see *Streams* below).

## Streams

Students complete upper and lower division requirements in each stream. No more than two of the required upper division courses can be fulfilled with courses from any one department, except the School for International Studies. As well, the advisor may approve selected international field school or exchange courses (see below) for credit toward a stream when the topic is appropriate. It is the student's responsibility to ensure that all prerequisites are met for upper division requirements.

### Stream 1 International Security and Conflict

#### Lower Division

Students complete  
IS 200-3 Historical Perspectives on Diplomatic Relations, International Security and Law

plus two of

IS 210-3 Comparative World Politics: Trajectories, Regimes, Challenges  
IS 220-3 Wealth and Poverty of Nations  
IS 230-3 Transnationalism and Society

plus two of

additional IS 210, 220 or 230 (whichever course is not completed to fulfil above requirement)  
GEOG 102-3 World Problems in Geographic Perspective  
HIST 130-3 Modern World History  
POL 241-3 Introduction to International Politics  
SA 203-4 Violence in War and Peace

#### Upper Division

Students complete 24 units from the following.  
IS 302-4 Introduction to Humanitarian Intervention  
IS 303-4 Ethnic Minorities, Identity Politics and Conflict in SE Asia  
IS 304-4 Russian Foreign Policies and Security Policies  
IS 311-4 Democratic Transition in Comparative Perspective  
IS 315-4 Introduction to Middle East Politics  
IS 400-4 State Building and State Failure: Comparative Perspectives  
IS 402-4 The Great Game: International Politics in Asia in Historical Perspective  
IS 403-4 Gender, Conflict and Nationalism  
IS 406-4 Selected Topics – Complex Emergencies  
IS 407-4 Selected Topics – Terrorism  
IS 408-4 Directed Readings I  
IS 409-4 Special Topics I  
IS 412-4 Central Asia, the Transcaucasus and Russia: Democracy, Development and Conflicts  
IS 452-4 Special Topics: Field School I  
HIST 338-4 World War II  
HIST 371-4 The Asia-Pacific War in Modern Japanese History  
HIST 465-4 The Palestinian-Israeli Conflict  
POL 342-4 Developing Countries in Global Politics  
POL 344-4 International Law  
POL 346-4 International Organizations  
POL 348-4 Theories of War, Peace, and Conflict Resolution  
POL 417-4 Human Rights Theories  
POL 443-4 Nuclear Strategy, Arms Control and International Security  
POL 446-4 International Relations in East Asia  
POL 448-4 Selected Topics in International Relations  
POL 449-4 Selected Topics in International Relations II  
SA 302W-4 Global Problems and the Culture of Capitalism (SA)

Students completing a major or honors must also complete

IS 450W-4 Seminar on Global Problems in Interdisciplinary Perspective

IS 451-4 Seminar on Core Texts in International Studies

## Stream 2 Comparative World Politics, Culture and Society

### Lower Division

Students complete

IS 210-3 Comparative World Politics: Trajectories, Regimes, Challenges

plus one of

IS 230-3 Transnationalism and Society

POL 231-3 Comparative Politics

plus one of

IS 200-3 Historical Perspectives on Diplomatic Relations, International Security and Law

IS 220-3 Wealth and Poverty of Nations

IS 230-3 Transnationalism and Society (if not completed to fulfil above requirement)

plus two of

additional IS 200, 220 or 230 (whichever course is not completed to fulfil above requirements)

IS 231-3 Introduction to South Asia

IS 232-3 Introduction to Southeast Asia

HIST 130-3 Modern World History

HIST 146-3 Africa after the Transatlantic Slave Trade

HIST 151-3 The Modern Middle East

HIST 206-3 Japan since 1868

HIST 209-3 Latin America: the National Period

HIST 231-3 History of Africa to the 19th Century:

From Ancient Times to the Slave Trade

HIST 255-3 China Since 1800

HIST 256-3 The People's Republic of China

LAS 100-3 Introduction to Latin American Issues

POL 241-3 Introduction to International Politics

SA 203-4 Violence in War and Peace

SA 275-4 China in Transition

WS 200-3 Women in Cross-Cultural Perspective

### Upper Division

Students complete 24 units from

GEOG 420-4 Cultural Geography

GEOG 446-4 Migration and Globalization

HIST 335-4 The Soviet Project

HIST 343-4 Africa and the Slave Trade

HIST 344-4 Themes in Modern East Africa

HIST 348-4 A History of Twentieth Century South Africa

HIST 352-4 Religion and Politics in Modern Iran

HIST 354-4 Imperialism and Modernity in the Middle East

HIST 355-4 The Arab Middle East in the Twentieth Century

HIST 368W-4 Selected Topics in the History of the Wider World

HIST 388-4 Christianity and Globalization

HIST 420-4 Russia as a Multiethnic Empire

HIST 421-4 Modern Greece, 1864-1925

HIST 457-4 The Turkish Republic: Politics, Society, and Culture, 1918-present

HIST 465-4 The Palestinian-Israeli Conflict

HIST 467-4 Modern Egypt

HIST 472-4 Problems in World History

HIST 473-4 The Making of South African Society

HIST 479-4 Change, Conflict and Resistance in Twentieth Century China

IS 311-4 Democratic Transition in Comparative Perspective

IS 312-4 Europe: Undivided but Plural

IS 313W-4 Nationalism, Democracy and

Development in Modern India

IS 314-4 National, Regional, and International Politics in Southeast Asia

IS 315-4 Introduction to Middle East Politics

IS 410-4 Politics, Institutions and Development

IS 412-4 Central Asia, the Transcaucasus and Russia: Democracy, Development and Conflicts

IS 418-4 Directed Readings II

IS 419-4 Selected Topics II

IS 452-4 Special Topics: Field School I

ISPO 337-4 Comparative Politics of Latin America

ISPO 450-4 Globalization and Regional Politics in Latin America

Students completing a major or honors must also complete

IS 450W-4 Seminar on Global Problems in

Interdisciplinary Perspective

IS 451-4 Seminar on Core Texts in International Studies

## Stream 3 International Development, Economic, and Environmental Issues

### Lower Division

Students complete both of

ECON 105-4 Principles of Macroeconomics

IS 220-3 Wealth and Poverty of Nations

plus three of

ECON 103-4 Principles of Microeconomics

GEOG 221-3 Economic Geography

IS 200-3 Historical Perspectives on Diplomatic

Relations, International Security and Law

IS 210-3 Comparative World Politics: Trajectories, Regimes, and Challenges

IS 230-3 Transnationalism and Society

### Upper Division

Students complete 24 units from the following.

ECON 342-3 International Trade

ECON 345-3 International Finance

ECON 355W-4 Economic Development

ECON 362-4 Economics of Natural Resources

ECON 443-3 Seminar in International Trade

ECON 446-3 Seminar in International Finance

ECON 455W-3 Seminar in Economic Development

GEOG 312-4 Geography of Natural Hazards

GEOG 322-4 World Resources

GEOG 327-4 Geography of Tourism

GEOG 382-4 Population Geography

GEOG 389W-4 Nature and Society

GEOG 422-4 Theories and Practices of Development

GEOG 428-4 World Forests

GEOG 429-4 Environment and Inequality

GEOG 446-4 Migration and Globalization

GEOG 466-4 Latin American Regional Development

GEOG 468-4 Society and Environment in China

IS 315-4 Introduction to Middle East Politics

IS 320-4 Selected Problems in the International Economy

IS 421-4 The Economics of International Organizations and Development

IS 427-4 Selected Topics – Globalization, Poverty and Inequality

IS 428-4 Directed Readings III

IS 429-4 Special Topics III

IS 452-4 Special Topics: Field School I

ISPO 450-4 Globalization and Regional Politics in Latin America

ISPO 450W-4 Globalization and Regional Politics in Latin America

POL 374-4 Africa in the Global Political Economy

POL 442-4 The Political Economy of International Trade

POL 453-4 The Political Economy of Cities and City Regions

SA 316-4 Tourism and Social Policy

WS 309-4 Gender and International Development

Students completing a major or honors must also complete

IS 450W-4 Seminar on Global Problems in Interdisciplinary Perspective

IS 451-4 Seminar on Core Texts in International Studies

## Foreign Cultural Component

### Language Proficiency

An acquaintance with a language other than English is required. Those without this requirement should complete language courses either at the Language Training Institute (page 126) or the Department of French (page 111). Demonstrated proficiency in a second language will consist of one of the following.

- the equivalent of two 200 division courses within the same language in a Simon Fraser University language program (either through completion of courses, course challenge, or placement tests)
- completion of high school equivalence in a language other than English in a foreign country.\*
- completion of high school in a francophone educational system within Canada (i.e. French immersion or in a Francophone province).\*

\* the School for International Studies will require a copy of the high school transcript, officially translated where necessary.

### Language Courses

See CHIN, FREN, GERM, GRK, ITAL, JAPN, SPAN in the *Course Index* section of this Calendar.

### Study Abroad Programs

This program requires some study abroad as part of the undergraduate education, preferably in the third or fourth years. Such study can be counted toward the elective requirements with the approval of the program, for example, through

- field schools (see “Field Schools” on page 215)
- short-term foreign visits. Opportunities for international conferences, colloquia and research are available through the program.
- co-op education internship. Students work in a foreign country for an overseas organization or a Canadian affiliate. Other work experience includes employment through the Department of Foreign Affairs under its internships programs including Global Issues, International Trade, and Value and Culture. Students in good standing with a minimum 3.0 GPA may apply to co-op after satisfactory completing 45 units. The program consists of two separate work terms in a foreign relations field. Arrangements are made with the Faculty of Arts and Social Sciences co-op advisor.

## International Field School and Exchange Courses

The following are available in approved Simon Fraser University field schools or as transfer credit when completed abroad in an exchange program. When topics are appropriate, these courses may be applied to international studies module requirements. See the program advisor for course approval procedures.

IS 452-4 Special Topics – Field School I  
LAS 402-5 Field Study  
LAS 404-3 Special Topics: Field School I

### Advisor

Ms. K. Payne, 5055 Academic Quadrangle,  
778.782.3726

This program offers a minor, extended minor, and nine joint majors in Latin American studies in association with nine disciplinary programs. The multidisciplinary perspective focuses on historical and contemporary development issues, with solid grounding in one joint discipline, providing a sound background in teaching, journalism, travel, community relations, law, diplomacy, government, international trade, and international development projects, and for advanced scholarly work. Important components are the multidisciplinary field school in Latin America, and exchange programs with top Latin American universities. Students must consult regularly with the advisor regarding course selection.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See “Writing, Quantitative, and Breadth Requirements” on page 7 for information. For the faculty's requirements, see “Writing, Quantitative, and Breadth Requirements” on page 88.

## Minor Program

The Latin American Studies Program offers students the maximum opportunity to integrate understanding of Latin America and its relationship with Canada, the Pacific Rim, and the world.

## Language Requirements

The following courses or equivalents are required.  
SPAN 102-3 Introductory Spanish I  
SPAN 103-3 Introductory Spanish II

Although all courses are taught in English, students must demonstrate a reading knowledge of Spanish (the equivalent of two college level courses) or Portuguese or, in exceptional circumstances, French. This is a recommended skill for upper division courses that frequently require independent investigation of specialized topics.

## Lower Division Requirements

Students complete 12 units including  
LAS 100-3 Introduction to Latin American Issues

and two of  
ARCH 273-3 Archaeology of the New World  
HIST 208-3 Latin America: The Colonial Period  
HIST 209-3 Latin America: The National Period

and one of  
BUS 130-3 Business in the Networked Economy I  
CMNS 110-3 Introduction to Communication Studies  
CMNS 130-3 Explorations in Mass Communication  
ECON 102-3 The World Economy  
ECON 110-3 Foundations of Economic Ideas  
GEOG 100-3 Human Geography  
GEOG 111-3 Earth Systems  
POL 100-4 Introduction to Politics and Government  
REM 100-3 Global Change  
SA 101-4 Introduction to Anthropology  
SA 150-4 Introduction to Sociology

## Upper Division Requirements

Students complete 15 upper division units of courses with Latin American focus.

## Extended Minor Program

This program consists of the lower division requirements for a joint major, including language requirements, and the upper division requirements for a minor. Students' programs must be approved by the advisor of the program.

## Joint Major Programs

Joint majors are available with the Departments of Archaeology, Economics, Geography, History, Political Science, Sociology and Anthropology, the School of Communication and the Faculty of Business Administration. The joint major combines selected disciplines leading to a BA or a BBA.

Courses used toward the upper division Latin American development studies requirements may not be used as part of the other discipline's requirements, or vice versa. Any lower division course that counts toward the separate Latin American development studies requirements and the other subject may count towards both. Joint majors complete all the courses listed for the discipline in which they are pursuing the other major. During the last year of their Latin

American development studies joint major, students complete LAS 498 to complete a capstone project which is written according to the standards of their disciplinary joint major, and will generally be of approximately six to eight thousand words. Students must satisfy the prerequisites of all required lower and upper division courses, and should consult regularly with the program advisor regarding course selection.

## Language Requirements

The following courses or equivalents are required.

SPAN 102-3 Introductory Spanish I  
SPAN 103-3 Introductory Spanish II  
SPAN 201-3 Intermediate Spanish I  
SPAN 202-3 Intermediate Spanish II

## Latin American Studies Requirements Lower Division Requirements

A minimum of 12 units is required including  
LAS 100-3 Introduction to Latin American Issues

and two of  
ARCH 273-3 Archaeology of the New World  
HIST 208-3 Latin America: The Colonial Period  
HIST 209-3 Latin America: The National Period

and one of  
BUS 130-3 Business in the Networked Economy I  
CMNS 110-3 Introduction to Communication Studies  
CMNS 130-3 Explorations in Mass Communication  
ECON 102-3 The World Economy  
ECON 110-3 Foundations of Economic Ideas  
GEOG 100-3 Human Geography  
GEOG 111-3 Earth Systems  
POL 100-4 Introduction to Politics and Government  
REM 100-3 Global Change  
SA 101-4 Introduction to Anthropology  
SA 150-4 Introduction to Sociology

## Upper Division Requirements

A minimum of 40 upper division units is required, with at least 20 in upper division units with primary or substantial Latin American studies focus, including LAS 498-5 Capstone Project

and 20-32 upper division units in the joint discipline selected, as specified below.

## Other Discipline Requirements

To satisfy the requirements of the other joint major discipline, students must complete 20-32 units, as indicated below for the specific discipline.

### Anthropology

Students complete 20 units in upper division anthropology courses and must fulfil the anthropology major program's theory and methods requirements. See “Sociology or Anthropology and Latin American Studies Joint Major Program” on page 136.

### Archaeology

Students complete 20 units in archaeology in the 300 and 400 division.

### Business Administration

See “Business Administration and Latin American Studies Joint Major Program” on page 147.

### Communication

Students complete 26 communication upper division units, including  
CMNS 347-4 Communication in Conflict and Intervention  
CMNS 362-6 Evaluation Methods for Applied Communication Research  
CMNS 446-4 The Communication of Science and the Transfer of Technology

and also the faculty requirements of applied sciences or arts, depending on the desired degree: bachelor of arts (Faculty of Applied Sciences) or bachelor of arts (Faculty of Arts and Social Sciences).

## Economics

Students complete the lower division requirements as specified for the economics major program (see "Major Program" on page 105). In addition, students complete 25 upper division units including BUEC 333-4 Statistical Analysis of Economic Data ECON 301-4 Microeconomic Theory I: Competitive Behavior ECON 302-4 Microeconomic Theory II: Strategic Behavior ECON 305-5 Intermediate Macroeconomic Theory and at least one 400 division ECON or BUEC course (excluding ECON 431, 435, BUEC 433 and 485).

### Group Requirements

To meet the Department of Economics group requirements for the economics major program, students must include at least one course from the economics group requirements. For information, see "Group Requirements" on page 105.

## Geography

Students complete 20 geography units including a minimum of eight 400 division units, at least one of which should include Latin American content.

## History

Students complete 24 units of 300 and 400 division history courses, of which 12 units must be in 400 division courses. Students complete at least two courses from any two groups, and at least one from the remaining group. For a description of the three groups, see "Major Program" on page 116.

## Political Science

Students complete 32 units in upper division political science, as required for political science majors. (POL 337 may not be used to satisfy LAS requirements.)

## Sociology

Students complete 20 units in upper division sociology courses and must fulfil the sociology major program's theory and methods requirements. See "Sociology or Anthropology and Latin American Studies Joint Major Program" on page 136

## Courses with Primary Latin American Focus\*

Students may complete any of the following courses to fulfil LAS requirements. Others may be offered in addition to those below. Consult the advisor for a complete list each term.

ARCH 273-3 Archaeology of the New World  
ARCH 330-3 Prehistory of Latin America  
GEOG 466-4 Latin American Regional Development  
HIST 208-3 Latin America: The Colonial Period  
HIST 209-3 Latin America: The National Period  
HIST 458-4 Problems in Latin American Regional History  
HIST 459-4 Problems in the Political and Social History of Latin America  
LAS 200-3 Introduction to Latin American Issues  
LAS 300-3 Latin American Literature  
LAS 312-3 Special Topics: Latin American Cultural Topics  
LAS 404-3 Special Topics: Field School I  
LAS 405-3 Special Topics: Field School II  
LAS 493-3 Directed Readings  
LAS 498-5 Capstone Project  
POL 320-4 Canada-Latin America  
POL 337-4 Government and Politics: Selected Latin American Nations I  
POL 440-4 Latin American International Relations  
POL 450-4 Globalization and Regional Politics in Latin America  
POL 483-4 Political Economy of Latin American Development  
SA 392-4 Latin America  
SA 403-4 Special Topics: Latin American Economy and Society

SA 404-4 Andean Society and Culture  
WS 323-4 Women in Latin American Literature and Society

\*students may use other courses with primary Latin American content to fulfil Latin American course requirements with approval of the program advisor

## Courses with Substantial Latin American Focus

Courses in which Latin America is substantially emphasized may fulfil LAS joint major requirements. Students should review the department's course outlines and consult the Latin American studies advisor for permission to complete these courses.

A special topics course to be completed for Latin American studies credit should approved by the instructor and the program advisor.

CMNS 347-4 Communication in Conflict and Intervention  
CMNS 444-4 Political Economy of International Communication  
CMNS 446-4 The Communication of Science and Transfer of Technology  
ECON 355-4 Economic Development  
ECON 362-4 Economics of Natural Resources  
GEOG 322-3 World Resources  
GEOG 422-4 Theories and Practices of Development  
GEOG 428-4 World Forests  
HIST 104-3 History of the Americas to 1763  
HIST 299-3 Problems in History  
HIST 324-4 Slavery in the Americas  
POL 342-4 Relations Between Developed and Developing Nations  
POL 345-4 The Nation-State and the Multinational Corporation  
POL 433-4 Comparative Developing Systems  
SA 388-4 Comparative Studies of Minority Indigenous Peoples  
SA 429-4 Sex, Work and International Capital  
WS 200-3 Women in Cross-Cultural Perspective  
WS 309-4 Gender and Development

## Field School

The field school is a full term in Latin America. Students gain, through direct experience, a deeper insight into the cultural, political, and economic issues of Latin American development. One faculty member and up to 20 students travel every second year to a selected location.

## Co-operative Education

For admission, 30 units with a minimum 2.75 CGPA is required. Prior to admission, students should complete LAS 200, two other lower division courses and SPAN 102. Transfer students complete at least 15 Simon Fraser University units. (See page 212). Work term arrangements are made through the faculty's co-op co-ordinator who should be consulted at least one term in advance.

Ms. L. Yam BA (S Fraser), certificate in First Nations language proficiency, and joint major in First Nations studies and linguistics advisor, 9089 Arts and Social Sciences Complex 1, 778.782.5595, first\_nations@sfu.ca

The Department of Linguistics offers honors, major, extended minor and minor programs in linguistics and participates in the cognitive science program.

Program requirements for the honors, major, extended minor and minor programs are listed below. Students pursuing linguistics should seek advice early in their programs. General course descriptions are given in *Undergraduate Courses*.

## Courses of Interest to Students Outside the Department

These general interest courses give insight into language and linguistics, and have no prerequisites.

LING 100-3 Communication and Language  
LING 110-3 The Wonder of Words  
LING 160-3 Language, Culture, and Society  
LING 200-3 Introduction to the Description of English Grammar  
LING 220-3 Introduction to Linguistics

LING 290-3 The Science of Speech  
LING 295-3 Language and the Law

The following courses have no prerequisites and may interest those with particular language specialties (when they focus on the language of their interest).

LING 231-3 Introduction to a First Nations Language I  
LING 232-3 Introduction to a First Nations Language II  
LING 431-3 Language Structures I  
LING 432-3 Language Structures II

The selected focus languages for these courses are shown in the *Undergraduate Schedule of Classes and Examinations*.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements. See “Writing, Quantitative, and Breadth Requirements” on page 7. For the faculty’s requirements, see “Writing, Quantitative, and Breadth Requirements” on page 88.

### Major Program

An overall 2.25 cumulative GPA and a minimum C grade in LING 220 is required for admission to the major and all joint major programs.

#### Lower Division Requirements

Students complete all of  
LING 220-3 Introduction to Linguistics  
LING 221-3 Introduction to Phonetics and Phonology  
LING 222-3 Introduction to Syntax  
plus six additional lower division linguistics units.

#### Upper Division Requirements

Students complete both of  
LING 321-3 Phonology  
LING 322-3 Syntax  
plus one of  
LING 301W-3 Linguistic Argumentation  
LING 309W-3 Sociolinguistics

plus any two of  
LING 323-3 Morphology  
LING 324-3 Semantics  
LING 330-3 Phonetics  
plus 15 additional upper division linguistics units.

### Honors Program

An overall cumulative GPA of 3.0 and a minimum C grade in LING 220 is required for admission.

#### Lower Division Requirements

Students complete all of  
LING 220-3 Introduction to Linguistics  
LING 221-3 Introduction to Phonetics and Phonology  
LING 222-3 Introduction to Syntax  
plus six additional lower division linguistics units.

#### Upper Division Requirements

Students complete all of  
LING 321-3 Phonology  
LING 322-3 Syntax  
LING 490-3 Honors Essay  
plus one of  
LING 301W-3 Linguistic Argumentation  
LING 309W-3 Sociolinguistics

plus any two of  
LING 323-3 Morphology  
LING 324-3 Semantics  
LING 330-3 Phonetics  
plus 33 additional upper division linguistics units.

### Minor Program

A cumulative GPA of 2.00 and a minimum C grade in LING 220 is required for admission.

#### Lower Division Requirements

Students complete  
LING 220-3 Introduction to Linguistics  
plus 12 additional units in lower division linguistics

#### Upper Division Requirements

Students complete 15 upper division linguistics units.

**Note:** General course descriptions are given in the *Undergraduate Courses* section (page 123).

### Extended Minor Program

An extended minor consists of the lower division requirements for a major and the upper division requirements for a minor. Certain other criteria may be set by individual departments and programs. A student must have their program approved by the advisor for the extended minor program.

### Computing Science and Linguistics Joint Major Program

See “Computing Science and Linguistics Joint Major Program” on page 80.

### First Nations Studies and Linguistics Joint Major Program

See “First Nations Studies and Linguistics Joint Major Program” on page 109.

### Linguistics and Anthropology Joint Major Program

An overall cumulative GPA of 2.25 and a minimum C grade in LING 220 is required for admission.

Linguistics and anthropology are kindred disciplines, each concerned with culture, cognition and social relations. Students will acquire multidisciplinary expertise in anthropological aspects of language.

The joint major is of special interest to those pursuing the certificate in First Nations language proficiency or the certificate in native studies research, as well as to students interested in the anthropology of language, anthropological linguistics, or cognitive science.

#### Lower Division Requirements

##### Anthropology

Students complete all of  
SA 101-4 Introduction to Anthropology (A)  
SA 201W-4 Anthropology and Contemporary Life (A)  
SA 255-4 Introduction to Social Research (S or A)  
plus two additional 200 division courses in anthropology and/or sociology.

##### Linguistics

Students complete  
LING 220-3 Introduction to Linguistics  
plus one of  
LING 130-3 Practical Phonetics  
LING 221-3 Introduction to Phonetics and Phonology  
plus one of  
LING 160-3 Language, Culture, and Society  
LING 241-3 Languages of the World  
plus six additional units in 100 and 200 division LING courses. Note that LING 222 is required for many upper division courses.

### Upper Division Requirements

#### Anthropology

Students complete both of  
SA 301-4 Contemporary Ethnography (A)  
SA 356W-4 Ethnography and Qualitative Methods (S or A)

plus 12 additional upper division units chosen from the Calendar list of anthropology (A), or (S or A) courses when they are designated as anthropology.

#### Linguistics

Students complete three of  
LING 321-3 Phonology  
LING 322-3 Syntax  
LING 323-3 Morphology  
LING 324-3 Semantics  
LING 330-3 Phonetics  
LING 331-3 Description and Analysis of a First Nations Language I

plus one of  
LING 309W-3 Sociolinguistics  
LING 332-3 Description and Analysis of a First Nations Language II  
LING 408-3 Field Linguistics

plus nine additional upper division LING units. The following courses are recommended.

LING 407-3 Historical Linguistics  
LING 430-3 Native American Languages  
LING 441-3 Linguistic Universals and Typology

### Certificate in First Nations Language Proficiency

This program is for students who wish to acquire conversational and literacy skills in a particular First Nations language, to teach this language in schools, or to enhance their language for cultural reasons or professional objectives.

The certificate consists of 27 units. At least 12 must be earned by completing courses in the First Nations language itself. The certificate can be completed on a full or part time basis. Advanced placement through course challenge to a maximum of nine units is possible for fluent speakers. Credit may be applied to a specific language and is achieved by examination from an instructor in that language with the approval of the department.

#### Program Requirements

Students complete or achieve equivalent credit for the following.

LING 130-3 Practical Phonetics  
LING 220-3 Introduction to Linguistics  
LING 231-3 Introduction to a First Nations Language I\*  
LING 232-3 Introduction to a First Nations Language II\*  
LING 331-3 Description and Analysis of a First Nations Language\*  
LING 332-3 Description and Analysis of a First Nations Language II\*

In addition, students must complete at least nine units selected from the following courses.

LING 160-3 Language, Culture and Society  
LING 241-3 Languages of the World  
LING 280-3 First Nations Language Immersion  
LING 335-3 Topics in First Nations Language I  
LING 360-3 Linguistics and Language Teaching  
LING 430-3 Native American Languages  
LING 431-3 Language Structures I\*  
LING 432-3 Language Structures II\*  
LING 433-3 First Nations Language Mentoring I\*  
LING 434-3 First Nations Language Mentoring II\*  
LING 435-3 Topics in First Nations Language II

\*may be used if the subject matter is the same First Nations language

## Certificate in German Studies

This program serves both full and part time students, and those seeking educational enrichment in areas related to the establishment and evolution of German humanism from the Reformation to modern times. The certificate may be completed concurrently with, and complements, major and minor programs in areas such as history, humanities, philosophy and political science.

The program requires basic proficiency in the German language (writing, reading, listening and speaking), and is intended for students who wish to pursue further studies in literature, history, philosophy and political science, and may be completed in conjunction with a degree program. Those students planning to obtain a bachelor of arts within the Faculty of Arts and Social Sciences (FASS) may complete the certificate in such a way that some of the FASS breadth requirements are fulfilled by the same courses. Courses used toward the certificate may also be used toward a major and minor.

This program requires a minimum of 21 units as stipulated below.

### Course Requirements

Students complete four German language courses including all of

GERM 102-3 Introductory German I  
GERM 103-3 Introductory German II  
GERM 201-3 Intermediate German I

and a minimum of three courses selected from the following list, or other courses with the approval of the Language Training Institute.

ENGL 392-4 Studies in World Literatures in English\*  
FPA 137-3 The History and Aesthetics of Cinema II\*  
FPA 337-3 Intermediate Selected Topics in Film and Video Studies\*  
HIST 224-3 Europe from the French Revolution to the First World War  
HIST 225-3 20th Century Europe  
HIST 332-4 Politics and Culture in Modern Germany  
HIST 337-4 The Balance of Power in Europe  
HIST 338-4 World War II  
HIST 401-4 Problems in Modern German History  
HIST 412-4 Marxism and the Writing of History  
HIST 414-4 The Impact of the Great War  
HUM 240-3 Studies in Modern European Culture\*  
HUM 307-4 Carolingian Civilization  
HUM 340-4 Great Cities in Their Time\*  
HUM 350-4 Great Figures in Humanistic Tradition\*  
PHIL 151-3 History of Philosophy II  
PHIL 280-3 Introduction to Existentialism  
PHIL 451-4 Kant  
POL 348-4 Theories of War, Peace and conflict Resolution\*  
POL 444-4 Politics and Foreign Policy of the European Union

\*may be used if the subject is primarily Germany and its people (literature, film and/or video, great historical figures, etc.); requires program director's approval

**Note:** it is the student's responsibility to ensure that all prerequisites are met

### Transfer Credit

A maximum of six transfer credit units of 100 division language courses (only GERM 102 and 103) may be used toward this certificate.

### Course Challenge Credit

A maximum of six units of 100 division language courses (only GERM 102 and 103) may be challenged for credit for this certificate.

## Certificate in Teaching ESL Linguistics

This certificate is for students seeking a basic introduction to principles and theory underlying current approaches to the teaching of English as a second language (TESL). The program emphasizes an understanding of linguistics and applied linguistics concepts. Successful completion of a 30 hour practicum in an adult ESL program is also required. The certificate requires at least four to five terms to complete and may be earned concurrently with an honors, major, extended minor or minor in linguistics.

While the certificate by itself is not a specific employment credential, it constitutes basic preparation for teaching English language skills to adult learners. The certificate also provides preparation for further applied linguistics and TESL studies. Those pursuing a long-term TESL career should plan to complete more advanced studies upon completion of the program. Monolingual students are strongly advised to complete at least two courses (six units) in a language other than English.

### Admission Requirements

Admission is not automatic. All candidates must complete and submit the required application form (available from the department) with a statement of purpose and all other required documents prior to one of three deadlines (September 30, January 31, May 31). An interview with a designated studies upon completion of the program. Monolingual students are strongly advised to complete at least two courses (six units) in a language other than English.

Prospective students may begin completing certificate courses prior to program admission. However, students are strongly advised to apply as soon as possible after completing LING 200, 220 and an upper division course, preferably in linguistics, with a minimum C- grade. Those who delay may be unable to enrol in the required courses at the desired time.

In addition to the University's admission requirements, students must demonstrate excellent spoken and written English. This requirement is more stringent than the University's minimum English language requirement. Students whose first language is not English should consult the department well in advance of applying. Oral communication skills will be assessed during the interview.

Applications are evaluated on merit. The department considers academic standing, communication skills as assessed in the interview, interests and motivations in the statement of purpose, and personal qualities. Priority is given to those enrolled in a Simon Fraser University degree program.

### Program Requirements

The program requires successful completion of 31 units as set out below, with a minimum 2.00 GPA calculated on grades in the specified required courses. Students also must complete a supervised practicum (LING 363) which includes 25 to 30 units of experience in an adult ESL classroom.

#### Lower Division

##### Required courses

Students complete all of  
LING 110-3 The Wonder of Words  
LING 200-3 Introduction to the Description of English Grammar  
LING 220-3 Introduction to Linguistics  
LING 221-3 Introduction to Phonetics and Phonology  
12 units

plus two of  
EDUC 220-3 Introduction to Educational Psychology  
LING 100-3 Communication and Language  
LING 160-3 Language, Culture, and Society  
LING 241-3 Languages of the World  
6 units

#### Upper Division

##### Required courses

Students complete all of  
EDUC 467-4 Curriculum and Instruction in Teaching English as an Additional Language  
LING 360-3 Linguistics and Language Teaching  
LING 362-3 English as a Second Language: Theory  
LING 363-3 English as a Second Language: Practice  
13 units

##### Recommended Courses

EDUC 468-4 Sociocultural Perspectives on Language, Cognitive Development and EAL Instruction  
LING 350-3 First Language Acquisition

## Post Baccalaureate Diploma in Teaching English as a Second Language

**This program is under revision and admission is suspended. Contact the department.**

The Department of Linguistics and the Faculty of Education jointly offer this program. Students should apply to the advisor for program admission and should seek University admission separately. Applicants will be admitted by the joint steering committee consisting of members of the Department of Linguistics and the Faculty of Education under the following general requirements.

- completion of a bachelor's degree
- demonstrated knowledge of spoken and written English. See "English Language and Literacy Admission Requirement, and Quantitative and Analytical Skills Requirement" on page 17.
- an undergraduate concentration in one or more related disciplines such as linguistics, education, English or psychology. Completion of the certificate in TESL linguistics, or equivalent fulfills this requirement. Students may be admitted once they complete LING 310 plus the general requirements.
- some academic training or demonstrated ability in a language other than English

### Course Requirements

Students complete a 31 unit minimum chosen from linguistics, education, and individual and social development. The requirements are as follows.

#### Linguistics

The program requires an understanding of general linguistic theory and analysis principles, English language linguistic structure and acquaintance with structures of the languages of English learners.

Students complete 12 units in upper division linguistics courses, consisting of any two of  
LING 321-3 Phonology  
LING 322-3 Syntax  
LING 323-3 Morphology  
LING 324-3 Semantics  
LING 330-3 Phonetics  
6 units

**Note:** Students completing at least 12 units from the above list or equivalents must select approved substitutes from 400 division linguistics courses to fulfil the requirement of six units in this section.

plus any two of  
LING 360-3 Linguistics and Language Teaching  
LING 362-3 English as a Second Language: Theory  
LING 408-3 Field Linguistics  
LING 431-3 Language Structures I  
LING 432-3 Language Structures II  
LING 441-3 Language Universals and Typology  
LING 480-3 Topics in Linguistics I (when offered with a suitable topic)  
LING 481-3 Topics in Linguistics II (when offered with a suitable topic)  
6 units

**Note:** Students who have already received credit for courses in this list through previous programs may not complete them for further credit.

#### Education

Students should be conversant with language pedagogy principles in various classroom situations, and have an understanding of testing and assessment principles in classroom settings. Also required are practical classroom skills specific to teaching English to non-native speakers.

Students complete both of  
 EDUC 467-4 Curriculum and Instruction in Teaching English as a Second Language  
 EDUC 470-4 Experience in Teaching Students Who Have Limited English Proficiency 8 units

**Note:** Only students who have a current teaching placement should enrol in EDUC 470. In exceptional circumstances, alternative arrangements may be made after consultation with the steering committee.

plus 8-12 units chosen from the following  
 EDUC 325-3 Assessment for Classroom Teaching  
 EDUC 341-3 Literacy, Education and Culture  
 EDUC 342-3 Contemporary Approaches to Literacy Instruction  
 EDUC 367-4 Teaching Children from Minority Language Backgrounds in Elementary Classrooms  
 EDUC 422-4 Learning Disabilities  
 EDUC 424-4 Learning Disabilities: Laboratory  
 EDUC 468-4 Cognition and Language in ESL Instruction 8-12 units

**Note:** Those with credit for courses in this list through previous programs may not complete them again for further credit. Those with prior credit for EDUC 467 or the equivalent must select an alternative from this list.

#### Individual and Social Development

Theories of human development and language use, their implications for the classroom, and of the sociocultural context of learners and speakers represents a basic component in the preparation for language teaching.

Students complete any one of the following courses that has not been completed previously.

EDUC 320-3 Instructional Psychology  
 EDUC 326-3 Classroom Management and Discipline  
 EDUC 420-4 Cognitive Strategies in Learning  
 EDUC 422-4 Learning Disabilities  
 EDUC 425-4 School Counselling for the Classroom Teacher  
 EDUC 441-4 Multicultural Education  
 LING 309W-3 Sociolinguistics  
 LING 350-3 First Language Acquisition  
 SA 400-4 Canadian Ethnic Minorities 3-4 units

## Language Training Institute

8109 Robert C. Brown Hall, 778.782.4790 Tel,  
 778.782.7223 Fax, [www.sfu.ca/lti](http://www.sfu.ca/lti)

#### Director

#### Advisor

Ms. L. Jung BA (S Fraser), 8109 Robert C. Brown Hall, 778.782.4790, [lisa\\_jung@sfu.ca](mailto:lisa_jung@sfu.ca)

The Language Training Institute offers courses in Mandarin Chinese (CHIN), German (GERM), modern Greek (GRK), Japanese (JAPN), Spanish (SPAN), as well as other languages under the general language course designation (LANG).

LANG 100-149 (1-5) Introduction to a World Language I  
 LANG 150-199 (1-5) Introduction to a World Language II  
 LANG 200-249 (1-5) Intermediate Language Study I  
 LANG 250-299 (1-5) Intermediate Language Study II

Students with language competence beyond the course level in which they are enrolled will be required to withdraw. Students who are unsure of their language level are responsible for having their proficiency assessed prior to enrolment. Inquire at the Language Training Institute about the procedure.

Students who have completed, within the last two years, grade 12 in German, Japanese, Farsi or Spanish will not be admitted to Simon Fraser University GERM 102, 104, JAPN 100, LANG 118 or SPAN 102 for credit.

Students with high school Mandarin up to grade 12 will not be admitted to any 100 or 200 Chinese language course. Students who read and write Chinese but speak a dialect other than Mandarin should complete CHIN 151 or 152.

Refer to each language course outline for details.

The department reserves the right to withdraw or to transfer a student to a higher level course should the language proficiency of the student prove greater than initially supposed.

Contact the Language Training Institute for information about current specific language offerings.

Other departments providing language instruction include the Department of French (FREN and ITAL) (page 111) and the Department of Linguistics (LING, for First Nations languages) (page 123).

## Course Challenge

### Spanish

Up to 12 lower division Spanish units may be challenged for credit. Students wishing to challenge any or all of these must enrol in the courses to be challenged and in a Spanish language course for which the course(s) challenged is a prerequisite. A minimum grade of C in the higher course must be obtained to receive challenge credit.

### Chinese

Up to six lower division Chinese units may be challenged for credit. Students wishing to challenge any or all of these must register in the courses to be challenged and in a Chinese language course for which the course(s) challenged is a prerequisite. A minimum grade of C in the higher course must be obtained to receive challenge credit.

### Japanese

Up to six lower division Japanese units may be challenged for credit. Students wishing to challenge any or all of these must register in the courses to be challenged and in a Japanese language course for which the course(s) challenged is a prerequisite. A minimum grade of C in the higher course must be obtained to receive challenge credit.

### German

Up to six lower division German units may be challenged for credit. Students wishing to challenge any or all of these must register in the courses to be challenged and in a German language course for which the course(s) challenged is a prerequisite. A minimum grade of C in the higher course must be obtained to receive challenge credit.

## Language Learning Centre

7403 Robert C. Brown Hall, 778.782.4698 Tel,  
[www.sfu.ca/language-learning-centre](http://www.sfu.ca/language-learning-centre)

The centre provides instructional support for language teaching through lab facilities, materials library, language instructors and student consultation.

A multimedia language lab provides integrated computer, audio, and video resources in separate classroom and drop-in facilities.

## Certificate in Spanish Language

This program is for elementary and secondary school teachers, and undergraduates, wishing to improve Spanish oral and written proficiency. [Note that Spanish is not considered a 'teachable subject' for professional development program (secondary) application.] It is also for those who want to enhance their Spanish language knowledge for cultural, professional or employment purposes, or who desire official certification of Spanish proficiency. However, the certificate in Spanish language is not meant for native Spanish speakers.

Courses are offered during the day and evening. Additionally, a sequential course offering is scheduled, subject to sufficient enrolment, at the Vancouver campus each term.

### Requirements

Students successfully complete all of  
 SPAN 102-3 Introductory Spanish I  
 SPAN 103-3 Introductory Spanish II  
 SPAN 201-3 Intermediate Spanish I  
 SPAN 202-3 Intermediate Spanish II  
 SPAN 204-3 Spanish Vocabulary  
 SPAN 302-3 Spanish Conversation Through Cinema  
 SPAN 303-3 Spanish Composition, Translation and Conversation  
 SPAN 304-3 Advanced Spanish Composition, Translation and Conversation

plus two of

SPAN 301 Advanced Spanish Grammar and Writing  
 SPAN 305-3 Spanish for Business  
 SPAN 306-3 Spanish-English Translation

**Notes:** Exemption of up to 12 units from lower division Spanish language courses (SPAN 102, 103, 201 and 202 only) is possible through advanced placement. Students must demonstrate equivalent preparation. The exempt courses are replaced with credit obtained by

- approved transfer credit for Spanish courses completed at another post-secondary institution (subject to University regulations governing transfer credit approval), up to a maximum of six units

or

- challenge credit for exempted courses (subject to University regulations governing challenge credit approval), up to a maximum of six units

and/or

- successful completion of other Spanish courses at Simon Fraser University.

Students who hope to gain exemption should consult the Language Training Institute departmental assistant early in their program. Certificate credit may apply toward degree requirements under normal regulations but cannot be applied toward another Simon Fraser University certificate or diploma.

## Co-operative Education

This program, for qualified students to acquire practical experience in linguistics, entails planned study and work terms. For admission, students must normally have completed 30 units, including LING 130 and 220, and three other LING courses. At least 15 of the 30 units must be completed at Simon Fraser University with a minimum CGPA of 2.75.

College transfer students must complete at least 15 Simon Fraser University units before becoming eligible for co-op education admission and must satisfy the requirements given above, or their equivalents. College transfers who participated in co-op programs elsewhere may be credited with

completed term(s). The applicability of such terms depends on the evaluation of the department.

The following four courses are completed during four work terms.

LING 370-0 Linguistics Practicum I  
LING 371-0 Linguistics Practicum II  
LING 470-0 Linguistics Practicum III  
LING 471-0 Linguistics Practicum IV

Work term arrangements are made through the Faculty of Arts and Social Sciences co-op co-ordinator at least one term in advance (see page 212). To continue in the program, students must maintain a minimum 2.75 CGPA in academic course work. Contact the department for further information.

## Mathematics Program

K10508 Shrum Science Centre,  
778.782.3331/3332 Tel, 778.782.4947 Fax,  
www.math.sfu.ca

### Advisor

Ms. D. Yamaura, K10508 Shrum Science Centre,  
778.782.4980

Students wishing to major in any of the Department of Mathematics programs should seek department advice early about program planning.

For descriptions and prerequisites, see "Mathematics MATH" on page 417, and "Mathematics and Computing Science MACM" on page 422.

The Department of Mathematics offers a program of study within the Faculty of Arts and Social Sciences leading to a bachelor of arts degree with a major or honors in mathematics. Students interested in a bachelor of science in mathematics should see page 196 in the *Faculty of Science* section. Requirements for the bachelor of arts in mathematics are set out below.

### General Regulations

BA mathematics major or honors must satisfy the Faculty of Arts and Social Sciences requirements and the general University cumulative GPA and unit requirements. See "Mathematics MATH" on page 417 for entry requirements and department workshops.

### Prerequisite Grade Requirement

To enrol in a course offered by the Department of Mathematics, a student must obtain a grade of C- or better in each prerequisite course. Some courses may require higher prerequisite grades. Check the course's Calendar description for details.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for more information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

### Beginning Level Requirements

See "Beginning Level Requirements" on page 197 for information concerning the Quantitative Placement Test, beginning mathematics courses and prerequisites.

## Major and Honors Programs

### Lower Division Requirements

Students complete either  
CMPT 126-3 Introduction to Computer Science and Programming

or both of  
CMPT 120-3 Introduction to Computing Science and Programming I  
CMPT 125-3 Introduction to Computing Science and Programming II

and one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I

and all of  
MACM 101-3 Discrete Mathematics I  
MACM 201-3 Discrete Mathematics II  
MACM 202-4 Mathematical Modeling and Computation  
MATH 152-3 Calculus II  
MATH 232-3 Elementary Linear Algebra  
MATH 242-3 Introduction to Analysis I  
MATH 251-3 Calculus III  
STAT 270-3 Introduction to Probability and Statistics

**Note:** With a C grade or better in relevant courses, these substitutions are permitted: MATH 154 or 157 for 151, MATH 155 or 158 for 152. Also, with a B grade or better, MATH 232 for 240. However, where possible, students are strongly encouraged to complete MATH 151, 152 and 240.

### Upper Division Requirements

All students must complete at least one from each of the following four groups of courses including one of  
MATH 308-3 Introduction to Optimization  
MATH 343-3 Applied Discrete Mathematics  
MATH 345-3 Introduction to Graph Theory

and one of  
MATH 320-3 Introduction to Analysis II  
MATH 322-3 Complex Variables

and one of  
MATH 338-3 Advanced Linear Algebra  
MATH 341-3 Algebra III: Groups  
MATH 342-3 Elementary Number Theory

and one of  
MATH 310-3 Introduction to Ordinary Differential Equations  
MACM 316-3 Numerical Analysis I

BA mathematics major students must obtain at least 30 units in upper division mathematics (MATH), or mathematics/computing science (MACM), or PHYS 413, or from the following statistics (STAT) courses: STAT 330, 350, 380, 402, 430, 450 and 460.

Of the 30 unit minimum total required for the mathematics major, at least 24 must be MATH or MACM courses. At least three of the courses used to satisfy this 30 unit requirement must be 400 division, of which at least two must be 400 division MATH or MACM courses. Students may not use a directed studies, job practicum, or honors essay course to fulfil the 400 division requirement.

### Honors Program Specific Requirements

In addition to the major program requirements, BA honors must complete CMPT 225, MATH 252 and obtain at least 18 additional units in upper division mathematics (MATH), or mathematics/computing science (MACM) courses, PHYS 413, or from the list of approved STAT courses listed under *Upper Division Requirements for the Mathematics Major Program*. Of this minimum 48 upper division units, at least 36 must be MATH or MACM courses.

At least five of the courses used to satisfy the 48 unit requirement must be 400 division, of which at least three must be MATH or MACM courses. Directed studies, job practicum or honors essay course may not be used to fulfil the 400 division requirement.

**Note:** Major or honors mathematics students should complete an upper division statistics course and an upper division MACM or CMPT course.

### Majors and Honors Program Electives

The student's program should include at least 65 units in arts subjects. Department of Mathematics courses may be counted. Also, the Faculty of Arts and Social Sciences breadth requirements must be met. Major students complete at least 45 upper division units including the major program requirements. Honors students must complete at least 60 upper division units including the honors requirements.

### Minor Program

For requirements, see "Department of Mathematics" on page 196 in the *Faculty of Science* section.

### Extended Minor Program

This program consists of the lower division requirements for a major and the upper division requirements for a minor. A student must have their extended minor program approved by the advisor.

## Department of Philosophy

4604 Diamond Building, 778.782.3343 Tel,  
778.782.4443 Fax, www.sfu.ca/philosophy

### Chair

### Professors Emeriti

R.D. Bradley BA, MA (Auck), PhD (ANU)  
S. Davis BA (Roch), MA, PhD (Ill)  
F.J. Pelletier BS, MA (Nebraska), MSc, MSc (Alta), PhD (Calif)  
L. Resnick BA, PhD (Cornell)  
N.M. Swartz BA (Harv), MA, PhD (Indiana)

### Professors

R.E. Jennings BA, MA (Qu), PhD (Lond)  
M. McPherran BA, MA, PhD (Calif)  
D. Zimmerman BA, MA, PhD (Mich)

### Associate Professors

K. Akins BA (Manit), PhD (Mich), Burnaby Mountain Endowed Professor  
S. Black BA (C'dia), PhD (Camb)  
M. Hahn BA (S Fraser), MA (Br Col), PhD (Calif)  
P.P. Hanson BA (Calg), MA, PhD (Prin)  
L. Shapiro BA (Wesleyan), PhD (Pitts)  
E. Tiffany BA (Albion), PhD (Calif)

### Senior Lecturers

P.T. Horban BA (Sask), MA, PhD (WOnt)  
J.S. McIntosh BA (S Fraser), PhD (Br Col)

### Lecturer

J. Lough BA, MA (S Fraser)

### Advisor

Mr. D. Bevington, 4625 Diamond Building,  
778.782.4852

### General Information

All 100 division courses and PHIL XX1 improve critical thinking skills, logical analysis, clarity of expression, and teach important philosophical problems, perspectives and methods. All 100 division courses have no prerequisites, and can be completed in any order by any student in any faculty.

The 200 division courses are slightly more advanced with more specific subject matter. It is recommended (not mandatory) that students have completed 15 units of university work or equivalent before enrolling in a 200 division philosophy course. (PHIL 201, 203 and 214 have additional prerequisites.)

For 300 and 400 division courses, students normally must have completed at least six philosophy lower division units. However, this requirement may be waived by the department. Four hundred division

courses are more advanced than 300 division courses (there is more reading, the reading is more difficult, and more writing is required). Students should complete at least two 300 division courses before enrolling in a 400 division course.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

### Seminars and Special Topics Courses

A student may not enrol in a philosophy seminar or selected topics course which duplicates work for which the student has received credit in another philosophy seminar or special topics course.

### Reading Lists and Course Outlines

Course outlines are available at the general office. Some course content varies with instructor.

## Major Program

### Lower Division Requirements

Students complete at least 15 lower division units including one of

PHIL 100-3 Knowledge and Reality  
PHIL 120-3 Introduction to Moral Philosophy

and one of

PHIL 150-3 History of Philosophy I  
PHIL 151-3 History of Philosophy II

and all of

PHIL 201-3 Epistemology  
PHIL 203-3 Metaphysics  
PHIL 210-3 Natural Deductive Logic

### Upper Division Requirements

At least 30 units of upper division credit is required as follows, and including one course at the 400 division.

At least one of

PHIL 320-3 Social and Political Philosophy  
PHIL 321-3 Moral Issues and Theories  
PHIL 322-3 History of Ethics\*  
PHIL 421-4 Ethical Theories

and at least one of

PHIL 302-3 Topics in Epistemology and Metaphysics  
PHIL 341-3 Philosophy of Science  
PHIL 343-3 Philosophy of Mind  
PHIL 344-3 Philosophy of Language I

and at least two of

PHIL 322-3 History of Ethics  
PHIL 350-3 Ancient Philosophy  
PHIL 352-3 17th Century Philosophy  
PHIL 356-3 18th Century Philosophy  
PHIL 357-3 Topics in the History of Philosophy  
PHIL 451-4 Kant

\*unless counted as a history stream requirement

## Honors Program

This program is for students who are capable of self-direction who wish to pursue advanced work in philosophy with the benefit of individual attention.

### Course Requirements

Entering students must first complete 60 units including 12 upper division philosophy units, and must fulfil lower division philosophy major requirements as listed above. Normally a 3.5 GPA or higher in upper division philosophy courses is expected for entrance and continuance but does not by itself guarantee

either. Students must submit an application (available in the department office), and consult the advisor.

Students pursuing honors must complete

- the philosophy major program requirements
- at least 50 philosophy upper division units
- and two honors tutorials in the last term, or last two terms, of the program

Tutorials offer sufficient time to examine in-depth several philosophical topics in a general area such as ethics, metaphysics, philosophy of mind, etc. The honors candidate must achieve a grade of B or higher in each honors tutorial to receive the honors degree.

## Minor Program

Students must complete at least 15 upper division units. Suggested lower division courses, including PHIL 100, 120, 150 or 151, and 201 or 203, provide a good basis for upper division courses. Other combinations are possible, and the student with particular upper division courses in mind should confirm prerequisites.

With the undergraduate advisor, a student may design a minor program with an emphasis that complements a special interest. For example, programs may be designed for students with an interest in law, language, natural or social science, history of ideas, social theory, value theory or logic.

## Extended Minor Program

This program consists of the lower division requirements for a major and the upper division requirements for a minor. Program approval by the advisor is required.

## Computing Science and Philosophy Joint Major Program

See "Computing Science and Philosophy Joint Major Program" on page 80 for information.

## Philosophy and Humanities Joint Major Program

See "Philosophy and Humanities Joint Major Program" on page 119 for information.

## Computing Science and Philosophy Joint Honors Program

See "Computing Science and Philosophy Joint Honors Program" on page 81 for information.

## Program in Cognitive Science

See page 98 for program information.

## Upper Division Courses Listed by Field (partial listing)

### Epistemology and Metaphysics

The following courses are a continuation of PHIL 100, 201 and 203 at a more advanced division.

PHIL 302-3 Topics in Epistemology and Metaphysics  
PHIL 455-4 Contemporary Issues in Epistemology and Metaphysics

### Logic

The following course offers concentrated work in logic and is a continuation of PHIL 210 and 214.

PHIL 314-3 Topics in Logic I

## Ethics

The following continuations of PHIL 120 and 220 present a wide range of issues and topics in ethics, and in political and social philosophy.

PHIL 320-3 Social and Political Philosophy  
PHIL 321-3 Moral Issues and Theories  
PHIL 322-3 History of Ethics  
PHIL 421-4 Ethical Theories

## History of Philosophy

The following continuations of PHIL 150 and 151 examine, at a more advanced division, the philosophical foundations of Western culture.

PHIL 322-3 History of Ethics  
PHIL 350-3 Ancient Philosophy  
PHIL 352-3 17th Century Philosophy  
PHIL 356-3 18th Century Philosophy  
PHIL 357-3 Topics in the History of Philosophy  
PHIL 451-4 Kant

## Science, Mind, Language

The following four courses introduce special areas of philosophical interest.

PHIL 341-3 Philosophy of Science  
PHIL 343-3 Philosophy of Mind  
PHIL 344-3 Philosophy of Language I  
PHIL 444-4 Philosophy of Language II

#### Advisor

Ms. L. Kool BA (S Fraser), 6075 Academic  
Quadrangle, 778.782.3588 Tel, polda@sfu.ca

\*joint appointment with women's studies

\*\*joint appointment with Asia-Canada, humanities

\*\*\*joint appointment with urban studies

\*\*\*\*joint appointment with Latin American studies

\*\*\*\*\*joint appointment with international studies

Several programs are offered: honors, major, joint major, extended minor, minor. Students must meet the Faculty of Arts and Social Sciences breadth requirements. Please see "Writing, Quantitative, and Breadth Requirements" on page 88.

Students cannot complete upper division courses until lower division prerequisites are complete. Specified prerequisites or department permission is required for course entry. Students who fulfil the requirements may also complete POL 497, 498 and 499.

### Fields of Study

The introductory course is POL 100. All others except POL 498 and 499 are divided into five fields of study.

#### Field A Political Theory

POL 201-3 Research Methods in Political Science

POL 210-3 Introduction to Political Philosophy

POL 211-3 Politics and Ethics

POL 312-4 History of Political Thought II

POL 313-4 Political Ideologies

POL 314-4 Theory and Explanation in Political Science

POL 315-4 Quantitative Methods in Political Science\*\*

POL 319-4 Selected Topics in Political Theory

POL 411-4 Normative Political Theory

POL 415-4 The Liberal Tradition

POL 416-4 Feminist Social and Political Thought

POL 417-4 Human Rights Theories

POL 418-4 Selected Topics in Political Theory I\*

POL 419-4 Selected Topics in Political Theory II\*

\*these courses may require special prerequisites

\*\*SA 355 may substitute for POL 315

#### Field B Canadian Government and Politics

POL 221-3 Introduction to Canadian Government

POL 222-3 Introduction to Canadian Politics

POL 320-4 Canada and Latin America

POL 321-4 The Canadian Federal System

POL 322-4 Canadian Political Parties

POL 323-4 Provincial Government and Politics

POL 324-4 The Canadian Constitution

POL 327-4 Globalization and the Canadian State

POL 329-4 Selected Topics in Canadian Government and Politics

POL 347-4 Introduction to Canadian Foreign Policy

POL 422-4 Canadian International Security Relations

POL 423-4 BC Government and Politics

POL 424-4 Quebec Government and Politics

POL 426-4 Canadian Political Behavior

POL 428-4 Selected Topics in Canadian Government and Politics I\*

POL 429-4 Selected Topics in Canadian Government and Politics II\*

\*may require special prerequisites

#### Field C Comparative Government and Politics

POL 231-3 Introduction to Comparative Government and Politics

POL 232-3 US Politics

POL 335-4 Government and Politics: People's Republic of China I

POL 337-4 Government and Politics: Selected Latin American Nations I

POL 339-4 Selected Topics in Comparative Government and Politics

POL 381-4 Politics and Government of Japan I

POL 431-4 Comparative Western European Systems

POL 432-4 Comparative Communist and

Post-Communist Political Systems

POL 433-4 Comparative Developing Systems

POL 435-4 Comparative Federal Systems

POL 436-4 Elections, Parties and Governments in Comparative Perspective

POL 437-4 Governance and Globalisation

POL 438-4 Selected Topics in Comparative Government and Politics I\*

POL 439-4 Selected Topics in Comparative Government and Politics II\*

POL 441-4 Comparative Foreign Relations: Selected Political Systems

POL 481-4 Ethnic Politics and National Identity: Comparative Perspectives

\*may require special prerequisites

#### Field D International Relations

POL 241-3 Introduction to International Politics

POL 327-4 Globalization and the Canadian State

POL 341-4 International Integration and Regional Association

POL 342-4 Relations between Developed and Developing Nations

POL 343-4 Global Political Economy

POL 344-4 Public International Law

POL 345-4 The Nation-State and the Multinational Corporation

POL 346-4 International Organizations

POL 347-4 Introduction to Canadian Foreign Policy

POL 348-4 Theories of War, Peace and Conflict Resolution

POL 349-4 Selected Topics in International Relations

POL 373-4 Human Security

POL 422-4 Canadian International Security Relations

POL 440-4 Latin American International Relations

POL 441-4 Comparative Foreign Relations: Selected Political Systems

POL 442-4 The Politics of International Trade

POL 443-4 Nuclear Strategy, Arms Control and International Security

POL 444-4 Politics and Foreign Policy of the European Union

POL 445-4 American Foreign Policy: Processes, Issues

POL 446-4 International Relations in East Asia

POL 447-4 Theories of International Political Economy

POL 448-4 Selected Topics in International Relations I\*

POL 449-4 Selected Topics in International Relations II\*

POL 450-4 Globalization and Regional Politics in Latin America

\*may require special prerequisites

#### Field E Public Policy/Administration and Local Government

POL 151-3 The Administration of Justice

POL 251-3 Introduction to Canadian Public Administration

POL 252-3 Local Democracy and Governance

POL 351-4 The Public Policy Process

POL 353-4 Public Sector Management

POL 354-4 Comparative Metropolitan Governance

POL 356-4 The Political Economy of Labor

POL 359-4 Selected Topics in Governance

POL 451-4 Public Policy Analysis

POL 454-4 Urban Public Policy Making

POL 455-4 Issues in Economic and Social Policy

POL 457-4 Controversies in Policy Innovation and Design

POL 458-4 Selected Topics in Local and Urban Governance\*

POL 459-4 Selected Topics in Governance\*

\*may require special prerequisites

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

### Major Program

#### Lower Division Requirements

Students complete

POL 100-3 Introduction to Politics and Government (or 101W)

and one of

IS 240-3 Research Methods in International Studies\*

POL 201-3 Research Methods in Political Science\*

STAT 203-3 Introduction to Statistics for the Social Sciences

and

POL 210-3 Introduction to Political Philosophy

\*students may not complete both of IS 240 and POL 201 for credit

If completing both POL 201 and STAT 203, a Field A credit may be claimed for POL 201. In this situation, POL 201 should be completed before STAT 203.

In addition, nine lower division POL units, covering at least three of the five fields of study, are required.

#### Upper Division Requirements

Students complete 32 upper division POL units. Eight of these 32 units must be at the 400 division. This allows a student to concentrate course work in one field of study while attaining a broader understanding of the political science discipline.

### Honors Program

Students with a 3.0 CGPA and an upper division GPA of 3.33 are encouraged to apply for the honors program. A complete application, available from the departmental advisor, includes the essay proposal for POL 499 (Honors Thesis) and a letter of evaluation from the faculty member who agrees to supervise and evaluate the essay. Once the application is submitted, it is reviewed by the undergraduate studies committee in the term prior to honor program entrance.

#### Lower Division Requirements

Students complete both of

POL 100-3 Introduction to Politics and Government (or 101W)

POL 210-3 Introduction to Political Philosophy

and one of

IS 240-3 Research Methods in International Studies\*

POL 201-3 Research Methods in Political Science\*

STAT 203-3 Introduction to Statistics for the Social Sciences

If students plan to complete both POL 201 and STAT 203, a field A credit may be claimed for POL 201. In this case, POL 201 should be completed before STAT 203.

In addition, nine lower division POL units, covering at least three of the five fields of study, are required.

\*students may not complete both of IS 240 and POL 201 for credit.

#### Upper Division Requirements

Students complete 53 upper division POL units, including five for POL 499 (Honors Essay). An additional 16 of these 53 must be at the 400 division. POL 315 is strongly recommended.

## French Language Cohort Program in Public Administration and Community Services

198-A Cornerstone Building, 778.782.6858 Tel,  
778.782.6682 Fax, www.sfu.ca/frcohort,  
frcohort@sfu.ca

This cohort program, leading to a political science major with a French extended minor, or a French major with a political science extended minor, is primarily for French immersion and students who wish to develop their French language ability. It is most suitable for those entering directly from secondary school who plan to undertake full time study over a four year period. The program prepares students for French language public administration and community service careers, and for graduate study in political science or public administration, or French.

A substantial proportion of the program's instruction will be given in the French language, both in the Departments of French and Political Science, and in specially offered courses in other departments.

Through elective study, students may also complete the social studies requirements for the Professional Development Program in the Faculty of Education, an option that is recommended for teaching at the primary or secondary level.

Non-French cohort program students who wish to enrol in French cohort program courses taught in French must contact the French cohort program advisor.

### Admission Requirements

The cohort program (see below) begins in the fall term only, and is for those who have adequate competency in French, as determined by the French language placement test. As it is a cohort program in which students will move together through a significant proportion of their undergraduate studies, those with substantial university transfer credit may need to complete more than the normal 120 units to complete this program.

### Cohort Program

This program's feature is the group cohort setting where students work together in the same specially designed cohort courses. Cohort specific courses and course sections will be offered in French, while some required and elective courses will be taught in English. Visit [www.sfu.ca/cohort](http://www.sfu.ca/cohort) for a list of designated program courses, including the language of instruction and the course offerings schedule. At least one term at a francophone university is included.

### Designated Courses

Specific courses designated as part of the cohort program and the specified language of instruction may vary from time to time. Required courses, as set out below, are designated as cohort specific (cs), are taught in French, and will normally be open only to cohort students. Regular (r) courses will be taught in English, except for those in the Department of French, which will be taught in French.

### Political Science Major, French Extended Minor Program Requirements

#### Lower Division Requirements

Students complete 18 political science units as follows, 12 units of which will be taught in French.

- POL 100-3 Introduction to Politics and Government (cs) (or 101W)
- POL 201-3 Research Methods in Political Science (r)
- POL 210-3 Introduction to Political Philosophy (cs)
- POL 221-3 Introduction to Canadian Government (cs)

- POL 223-3 Canadian Political Economy (r)
- POL 251-3 Introduction to Canadian Public (cs) Administration

Students must also complete 18 units of French as follows, including four cohort-specific courses.

- FREN 212-3 French for Immersion Program Students (cs)
- FREN 221-3 French Writing I (cs)\*
- FREN 222-3 French Writing II (cs)
- FREN 225-3 Topics in French Language (cs)
- FREN 230-3 Introduction to French-Canadian Literature (r)
- FREN 270-3 Introduction to French Linguistics I (r)

\*Students receiving advanced placement above this level may receive permission to waive or challenge it.

#### Upper Division Requirements

Students complete 32 units of political science courses, including the four cohort-specific courses as shown below.

- POL 329-4 Selected Topics in Canadian Government and Politics
- POL 359-4 Selected Topics in Governance
- POL 459-4 Selected Topics in Governance: Planning Community-based Projects
- POL 497-4 Directed Practice in Political Science

An additional four upper division POL courses are required, including one course in Canadian government and politics, and one in public policy/administration and local government. Normally, two or three, equivalent to at least eight units, will be selected from transferable political science courses offered at the institution hosting the term.

Students must also complete an additional 15 units of French as specified below.

- Students complete
- FREN 301-3 Advanced French Composition and one of
- FREN 425-3 Topics in the Varieties of French
- FREN 452-3 Topics in French Cultures

A further nine units of French, to be chosen from among the remaining courses at the 300 and 400 division, must be completed. (FREN 360 and/or 370 may be completed in partial fulfilment.)

#### Additional Requirements

In addition, up to 17 units in other departments may be required in either lower or upper division courses. Such additionally designated courses will usually be taught in French, and will be subjects directly related to the program. These additional courses will be designated at the beginning of each entering cohort. Overall, cohort students may expect at least 80 units of instruction in French.

### French Major, Political Science Extended Minor Program Requirements

#### Lower Division Requirements

These requirements are the same as those shown above for the political science major, French extended minor program.

#### Upper Division Requirements

Students complete 16 units of political science courses for the extended minor and 30 units of French courses, including all requirements for the French major (see "Honors, Major, Extended Minor Programs" on page 112).

#### Additional Cohort Requirements

The courses listed below are those that will typically be required to complete the cohort program. Other appropriate courses may occasionally be substituted.

#### History

- Students complete all of
- HIST 101-3 Canada to Confederation (r)
- HIST 102W-3 Canada since Confederation (cs)

and one of

- HIST 204-3 The Social History of Canada (cs)
- HIST 214-3 Quebec Society, Culture, and Politics (cs)

#### Canadian Studies

Students complete  
CNS 210-3 Foundations of Canadian Culture (cs)

#### Electives

The cohort course requirements constitute 99 units, 81 of which are obtained through courses taught in French (as outlined above). The remaining required 21 units may be chosen from other university courses. Students intending to pursue graduate work, or a career in public administration, should include ECON 103, 105, and STAT 203. Students should also be aware of general university requirements when planning their electives. Assistance in planning electives to meet additional program requirements is available from the cohort program advisor.

## Minor Program

### Lower Division Requirements

Students complete one of  
POL 100-3 Introduction to Politics and Government  
POL 101W-3 Introduction to Politics and Government  
and at least nine additional lower division POL units.

### Upper Division Requirements

Students are required to complete 16 upper division units in any of the fields of study.

## Extended Minor Program

This program is based on the lower division requirements (100 and 200 division courses) of the major program and the upper division requirements (300 and 400 division courses) of the minor program.

## French, History and Politics Joint Major Program

Please see "French, History and Politics Joint Major Program" on page 113 for information.

## Political Science and Canadian Studies Joint Major Program

The lower division requirements are identical to the political science major program except that students are encouraged but not required to complete POL 201 or STAT 203. Political science upper division requirements follow. Students complete 32 units in three of five fields. Up to 12 units in both political science and Canadian studies may be used toward upper division requirements of both departments. See the political science or Canadian studies advisor or see "Joint Major Programs" on page 96.

## Political Science and Economics Joint Major Program

This program explores the fields of political science and economics, and develops an appreciation of the ways in which economic and political phenomena condition and interact in the modern world. Consult advisors in both departments.

### Lower Division Requirements

#### Political Science

- Students complete all of
- POL 100-3 Introduction to Politics and Government (or 101W)
- POL 221-3 Introduction to Canadian Government
- POL 222-3 Introduction to Canadian Politics
- POL 251-3 Introduction to Canadian Public Administration

plus one of  
 BUEC 232-3 Elementary Economic and Business Statistics I  
 CRIM 220-3 Research Methods in Criminology  
 ISO 240-3 Research Methods in  
 POL 201-3 Introduction to Research Methods in Political Science\*  
 PSYC 201-4 Research Methods in Psychology  
 SA 255-4 Introduction to Social Research  
 STAT 203-3 Introduction to Statistics for the Social Sciences  
 STAT 270-3 Introduction to Probability and Statistics  
 plus six lower division units from at least one of the remaining fields of study (field A, C or D) to total 21.  
 \*recommended

### Economics

Students complete the following with a grade of at least C- prior to joint major program admission.

ECON 103-4 Principles of Microeconomics  
 ECON 105-4 Principles of Macroeconomics  
 MATH 157-3 Calculus for the Social Sciences (or equivalent)

To meet the requirements, students also complete BUEC 232-4 Data and Decisions I

and two 200 division ECON or BUEC courses (in addition to BUEC 232)

### Upper Division Requirements

#### Political Science

Students complete 24 units from at least three political science fields of study, including a minimum of eight units (two courses) in field E. Beyond field E, the following are highly recommended.

POL 313-4 Political Ideologies  
 POL 321-4 The Canadian Federal System  
 POL 342-4 Relations Between Developed and Developing Nations  
 POL 343-4 Global Political Economy  
 POL 345-4 The Nation-State and the Multinational Corporation  
 POL 427-4 The Legislative Process in Canada  
 POL 447-4 Theories of International Political Economy

#### Economics

Students complete at least 25 units of upper division credit in economics including all of  
 BUEC 333-3 Statistical Analysis of Economic Data  
 ECON 301-5 Microeconomic Theory I: Competition Behavior  
 ECON 302-4 Microeconomic Theory II: Strategic Behavior  
 ECON 305-5 Intermediate Macroeconomic Theory  
 and at least one 400 division ECON or BUEC course (excluding ECON 431, 435 and BUEC 433).

#### Group Requirements

To meet the Department of Economics group requirements for the economics major program, students must include at least one course from the economics group requirements. For information, see "Group Requirements" on page 105.

### Political Science and Latin American Studies Joint Major Program

Political science requirements are identical to the major program except that students are encouraged but not required to complete POL 201 or STAT 203. POL 337 may not be used to satisfy Latin American studies requirements. For information see the advisors see "Joint Major Programs" on page 122.

### Political Science and Women's Studies Joint Major Program

This program explores the political dimensions and context of women's experience, and the impact of women and feminist theory on the practice and study of politics. Consult advisors in both departments.

### Lower Division Requirements

#### Political Science

Students complete

POL 100-3 Introduction to Politics and Government (or 101W)

plus one of  
 BUEC 232-3 Elementary Economic and Business Statistics I  
 CRIM 220-3 Research Methods in Criminology  
 IS 240-3 Research Methods in  
 POL 201-3 Research Methods in Political Science\*  
 PSYC 201-4 Introduction to Research Methods in Psychology  
 SA 255-4 Introduction to Social Research  
 STAT 203-3 Introduction to Statistics for the Social Sciences  
 STAT 270-3 Introduction to Probability and Statistics

plus an additional nine units of lower division courses chosen from three of the five fields of study (field A, B, C, D and/or E), for a total of 15 lower division units.

\*recommended

#### Women's Studies

Students complete 15 lower division units in women's studies including both of  
 WS 101-3 Introduction to Women's Issues in Canada  
 WS 102-3 Introduction to Western Feminism

and one of  
 WS 207-3 Introduction to Feminist Theory  
 WS 208-3 Feminist Research Methods

### Upper Division Requirements

#### Political Science

Students complete 24 upper division units from at least three political science fields of study. It is strongly recommended that POL 416 be included.

#### Women's Studies

Students complete 20 upper division units in women's studies.

### Certificate in African Studies

This program requires a minimum of 30 units: 18 lower division and 12 upper division. Special topics courses relevant to Africa may be included in place of those listed below with permission of the certificate program committee. Visit the department's general office to obtain a list of University-wide courses with African content.

### Lower Division Requirements

Students complete six of the following courses.  
 ARCH 252-3 Ancient Egypt and Africa  
 HIST 146-3 Africa after the Transatlantic Slave Trade  
 HIST 151-3 The Modern Middle East  
 HIST 231-3 History of Africa to the Nineteenth Century: From Ancient Times to the Slave Trade  
 HIST 249-3 Classical Islamic Civilization  
 IS 210-3 Comparative World Politics: Trajectories, Regimes, Challenges  
 POL 231-3 Comparative Politics  
 POL 241-3 Introduction to International Politics

### Upper Division Requirements

Students complete three of the following, plus any prerequisite courses (see "Course Catalogue" on page 311 for relevant courses).

HIST 343-4 Africa and the Slave Trade  
 HIST 344-4 Themes in Modern East Africa

HIST 348-4 A History of Twentieth Century South Africa  
 HIST 354-4 Imperialism and Modernity in the Middle East  
 HIST 466-4 Religion and Society in Africa, Nineteenth and Twentieth Century  
 HIST 467-4 Modern Egypt  
 HIST 473-4 The Making of South African Society  
 POL 374-4 Africa in the Global Political Economy  
 POL 470-4 African Social and Political Thought

### Co-operative Education

Practical experience related to political science is gained through planned co-op study terms and employment, and is competitive. Not all applicants gain their exact chosen placements, but the program endeavors to provide a placement to all qualified applicants. For admission, 30 units with a minimum 3.0 CGPA is required. Transfer students must complete at least 15 Simon Fraser University units. See "Co-operative Education" on page 212. Work term arrangements are made with the Faculty of Arts and Social Sciences co-op co-ordinator at least one term in advance.

## Department of Psychology

5246 Robert C. Brown Hall, 778.782.3354 Tel, 778.782.3427 Fax, www.psyc.sfu.ca

 778.782.4840

## Letters of Permission

See "Courses at Other Institutions/Letters of Permission" on page 28. The department does not normally approve letters of permission for enrolled Simon Fraser University students to complete PSYC 201, 210 and 301 at a different institution. Such permission may be granted for other courses. Enquire of the psychology undergraduate advisor.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

## Major Program

To be admitted, students must obtain a grade of C (2.0) or better in **each** of the following courses.

PSYC 100-3 Introduction to Psychology I  
 PSYC 102-3 Introduction to Psychology II  
 PSYC 201-4 Introduction to Research Methods in Psychology  
 PSYC 207-3 Introduction to History of Psychology  
 PSYC 210-4 Introduction to Data Analysis in Psychology

**Note:** The above requirement applies to courses transferred from other institutions as well as to courses completed at Simon Fraser University.

PSYC 100 should be completed in the first term and PSYC 102 should follow PSYC 100 as early as possible. (Concurrent enrolment is not permitted.) PSYC 201 and 210 should be completed during the first four terms.

To receive a major in psychology, students must

- meet the graduation requirements of the University (see "Student Appeals" on page 32) and Faculty of Arts and Social Sciences (see "Graduation GPA Requirements" on page 89)
- complete one course from group A: PSYC 221 or 280
- complete one course from group B: PSYC 241, 250, 260, 268, 270
- complete one additional course from either group A or group B
- complete PSYC 300 with a grade of C or better
- complete 30 upper division psychology units. No more than six directed studies units may be applied to the major. A minimum of 15 upper division psychology units must be completed at Simon Fraser University.

## Honors Program

Obtain the application form and information hand-out at the general office, and at [www.psy.sfu.ca/ugrad](http://www.psy.sfu.ca/ugrad). Applicants meeting the minimum admission requirements are not assured program admission. Admission decisions are based on the student's academic record, potential, and suitability for the program as assessed by a review of the application. Application deadline: May 1.

## Admission Requirements

- completion of 75 units with a minimum 3.33 CGPA
- a minimum 3.33 CGPA on all Simon Fraser University courses
- completion of 15 Simon Fraser University psychology units with a minimum 3.0 CGPA
- completion of one course from group A, one from group B, and one from either group A or group B  
 Group A – PSYC 221, 280  
 Group B – PSYC 241, 250, 260, 268, 270

- completion of PSYC 300 with a grade of B or better
- completion of PSYC 301 with a grade of B or better
- attendance at an honors information session
- approval and signature of a psychology department faculty member to supervise the honors project
- approval of a brief research proposal

## Continuation

- maintain a minimum 3.0 CGPA for all courses completed in each term
- maintain a minimum 3.0 CGPA for all psychology courses completed in each term
- attend the appropriate graduate area research seminar while enrolled in PSYC 490/499.

Students not meeting the requirements may be dropped from the program, but may apply for readmission at a later date.

## Completion

Students complete 60 upper division units, of which 50 must be in upper division psychology courses, including both of  
 PSYC 490-4 Honors Project\*  
 PSYC 499-6 Honors Project\*

\*together comprise the honors project and are completed only after completion of 90 units, with at least 20 units in upper division psychology courses.

No more than nine upper division units may be in directed studies. Up to 12 upper division units may be approved options from other departments.

Students must also meet the University's and faculty's honors graduation requirements and obtain certification by the undergraduate studies committee that the program has been satisfactorily completed.

## Minor Program

To be admitted, students must obtain a final course grade of C (2.0) or better in **each** of the following.

PSYC 100-3 Introduction to Psychology I  
 PSYC 102-3 Introduction to Psychology II  
 PSYC 201-4 Introduction to Research Methods in Psychology

**Note:** The above applies to transferred courses as well as to Simon Fraser University courses.

Students complete two of  
 PSYC 221-3 Introduction to Cognitive Psychology  
 PSYC 241-3 Introduction to Abnormal Psychology  
 PSYC 250-3 Introduction to Developmental Psychology  
 PSYC 260-3 Introduction to Social Psychology  
 PSYC 268-3 Introduction to Law and Psychology  
 PSYC 270-3 Introduction to Theories of Personality  
 PSYC 280-3 Introduction to Biological Psychology

and a minimum of 15 upper division psychology units with a 2.0 cumulative CGPA. No more than three units may be in directed studies. At least eight upper division units must be completed at the University.

Approved criminology majors or honors who intend to minor in psychology, and have successfully completed CRIM 220 (with a final C grade [2.0] or better), may request a waiver for PSYC 201 by petitioning the undergraduate advisor.

## Extended Minor Program

An extended minor consists of all major program lower division requirements and all minor program upper division requirements. Programs must be approved by the extended minor program advisor.

## Behavioral Neuroscience Program

See "Behavioral Neuroscience Program" on page 94.

## Psychology and Business Administration Joint Major Program

For information, see "Business Administration and Psychology Joint Major Program" on page 147.

## Psychology and Criminology Joint Major Program

For information, see "Criminology and Psychology Joint Major Program" on page 102.

## Psychology and Women's Studies Joint Major Program

For information, see "Women's Studies and Psychology Joint Major Program" on page 141.

## Co-operative Education

Co-operative education, for qualified students who want work experience, entails study terms and employment in the area of the student's choice.

**Note:** This program will not provide training in clinical psychology or therapeutic techniques.

For admission, 30 units with a minimum 3.0 CGPA is required. Prior to admission, students must complete PSYC 100, 102, 201 and 210 or their equivalents. Transfer students must complete at least 15 units at Simon Fraser University. See page 212. Work arrangements are made through the Faculty of Arts and Social Sciences co-op co-ordinator who should be consulted at least one term in advance.

## Advice to Students from Other Departments

To enrol in psychology courses, students must meet the prerequisites or special instructions. The listed prerequisites indicate the minimal background expected by instructors.

The department reserves one hundred per cent of all 300 and 400 division PSYC courses for approved psychology major, minor or honors students. Those who are not approved cannot enrol in these upper division courses until the open enrolment date, which is usually day 21 of the enrolment period.

## Psychology and Statistics

A level of statistical sophistication is required before undertaking independent research or evaluating research of others. The department offers several courses in research methodology and data analysis: PSYC 201, 210, 301, 410, 411. Students who have a special interest in more extensive statistical training to facilitate their work in psychology should also consider courses from STAT 270 and above, and in particular, STAT 270, 302, 330, 403, 410 and 430.

## Directed Studies Courses

PSYC 493, 494, and 495 are directed studies courses. Enrolment enables an individual or small group to work with a faculty member on a reading or research project of mutual interest. Common reasons for a student requesting such a course are

- to continue a reading or research project begun in a 400 division seminar
- to cover material not included in regular courses

The minimum requirement is a B (3.0) average, at least 60 units and department permission. Directed studies students complete an application form (available in the department) with the intended instructor.

## Department of Sociology and Anthropology

5054 Academic Quadrangle, 778.782.3146 Tel, 778.782.5799 Fax, www.sfu.ca/sociology

Affiliation with the two divisions within the department is shown as follows: A – anthropology; S – sociology

\*\*\*joint appointment with First Nations studies

\*\*\*\*joint appointment with gerontology

\*\*\*\*joint appointment with women's studies

The department's courses provide theoretical analytical understanding of the social and cultural forces affecting our lives and other societies leading to more effective society participation. Simon Fraser University sociologists and anthropologists conduct research and teach courses about Western industrial

societies, Third World societies, and theoretical and comparative questions beyond national boundaries.

The department offers honors and majors in sociology and/or anthropology and minors in sociology and anthropology. Honors and major students may complete options such as an applied social research stream and a co-operative education program. Joint majors are available with archaeology, art and culture studies, Canadian studies, communication, criminology, Latin American studies, linguistics, and women's studies. Joint honors are available with Canadian studies, Latin American studies and sociology and anthropology. The department also offers a certificate in ethnic and intercultural relations.

As well as intellectual rewards, undergraduate sociology and anthropology training provides invaluable background for careers in urban planning, journalism, law, public administration, welfare related professions, teaching, personnel management, health care fields, and international development projects.

Courses provide students specializing in other disciplines with social and cultural processes that complement their studies. Especially appropriate are SA 100, 101, 150, 201, 286, which require no prerequisites. Other courses dealing with important contemporary issues such as SA 203, 218 and 260 are open to students with one introductory course.

## Course Selection

Consult departmental hand-outs available in the SA general office, as there are differing emphases in course outlines from term to term.

Normally, directed readings courses SA 496 and 497 are available only to SA major and honors students. Credit will be given for only one of these.

Some courses in other departments are relevant to certain areas of sociology and anthropology. Honors and majors in sociology and/or anthropology are urged to prepare themselves broadly by completing additional courses in other departments, after consultation with an advisor.

Many graduate schools require a reading knowledge of a language other than English. Those considering graduate studies should include an appropriate second language in their program.

To assist students to plan an interdisciplinary program, the following list of courses identify the three disciplines into which all sociology and anthropology courses are divided. For details about these courses, see "Sociology and Anthropology SA" on page 441 of the *Course Catalogue*.

### Anthropology Courses

SA 101, 201, 245, 286, 301, 318, 323, 332, 352, 401, 402, 451, 472, 486, 496

### Sociology Courses

SA 150, 231, 250, 260, 304, 321, 322, 325, 326, 327, 331, 333, 335, 350, 351, 353, 362, 416, 450, 497

### Sociology and Anthropology Courses

An SA course can be counted as either sociology or anthropology.

SA 100, 203, 218, 255, 275, 300, 302, 303, 315, 316, 319, 320, 337, 340, 345, 355, 356, 357, 358, 360, 361, 363, 364, 365, 371, 386, 388, 392, 396, 400, 418, 420, 429, 430, 435, 447, 455, 460, 463, 498, 499

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

## Major Programs

### Lower Division Requirements

Lower division requirements provide a broad introduction to both disciplines, to critical analysis of Canadian society, to basic logic and methods used in social research, and to the application of these methods to topics of special interest to students.

Students should complete all lower division requirements before completing upper division courses.

#### Anthropology Major

Students complete all of

- SA 101-4 Introduction to Anthropology (A)
- SA 150-4 Introduction to Sociology (S)
- SA 201W-4 Anthropology and Contemporary Life (A)
- SA 255-4 Introduction to Social Research (S or A)

plus one additional 200 division course in anthropology and/or sociology.

#### Sociology Major

Students complete all of

- SA 100-4 Perspectives in Canadian Society (S or A)
- SA 101-4 Introduction to Anthropology (A)
- SA 150-4 Introduction to Sociology (S)
- SA 250-4 Introduction to Sociological Theory (S)
- SA 255-4 Introduction to Social Research (S or A)
- STAT 203-3 Introduction to Statistics for Social Sciences

**Note:** Students with an equivalent post-secondary statistics course are exempt from STAT 203. It is, however, highly recommended that students complete SA 255 before completing STAT 203.

### Upper Division Requirements

Students must meet theory and methods requirements (see program options for specifics). In our information-based society, many employers and most graduate schools require considerable knowledge of conceptualizing research problems, information gathering, analysis and presentation. Students are strongly urged to balance theory courses with methods courses above the minimum and they may choose to range broadly across the two disciplines or to focus on a special interest. Courses fall broadly into the following groups.

#### Courses in Anthropology (A)

The following courses count as anthropology credit toward the anthropology major or minor.

- SA 301-4 Contemporary Ethnography (A)
- SA 302W-4 Global Problems and the Culture of Capitalism (S or A)
- SA 318-4 The Anthropology of Medicine (A)
- SA 319-4 Culture, Ethnicity and Aging (A)
- SA 323-4 Symbol, Myth and Meaning (A)
- SA 332-4 The Anthropology of Childhood (A)
- SA 352-4 Games, Sports and Culture (A)
- SA 355-4 Quantitative Methods (S or A)
- SA 356W-4 Ethnography and Qualitative Methods (S or A)
- SA 357W-4 Survey Methods (S or A)
- SA 365-4 Selected Regional Areas (A)
- SA 368-4 Language, Ideology, and Power (A)
- SA 401-4 The Politics of Culture in Contemporary Societies (A)
- SA 402-4 The Practice Of Anthropology (A)
- SA 421-4 Commodities and Substances: Bodies, Consumption and Ingestion (A)
- SA 451-4 Issues in Anthropological Theory (A)
- SA 472-4 Anthropology and the Past (A)
- SA 486-4 Aboriginal Peoples and British Columbia: Advanced Seminar (A)
- SA 496-4 Directed Readings in Anthropology (A)
- SA 498-8 Field Study in Sociology and/or Anthropology (S or A)
- SA 499-4 Independent Project (S or A)

#### Courses in Sociology (S)

These courses count as sociology credit toward the sociology major or minor.

- SA 300-4 Canadian Social Structure (S)
- SA 302W-4 Global Problems and the Culture of Capitalism (S or A)
- SA 304-4 Social Control (S)
- SA 321-4 Social Movements (S)
- SA 322-4 Sociology of Religion (S)
- SA 325-4 Political Sociology (S)
- SA 327-4 Sociology of Knowledge (S)
- SA 331-4 Politics of the Family (S)
- SA 333-4 Schooling and Society (S)
- SA 335-4 Gender Relations and Social Issues (S)
- SA 337-4 Sexuality and Society (S)
- SA 350-4 Classical Sociology Thought (S)
- SA 351-4 Classical Marxist Thought (S)
- SA 353-4 Sociology of Sport (S)
- SA 355-4 Quantitative Methods (S or A)
- SA 356W-4 Ethnography and Qualitative methods (S or A)
- SA 357W-4 Survey Methods (S or A)
- SA 362-4 Society and the Changing Global Division of Labor (S)
- SA 403-4 Selected Topics in Latin American Economy and Society (LAS)
- SA 404-4 Andean Society and Culture (LAS)
- SA 410-4 Advanced Topics in Power and the Regulation of Self and Others (S)
- SA 416-4 Sociology of Art Forms (S)
- SA 417-4 Contemporary Issues in Medical Sociology (S)
- SA 450-4 Advanced Sociological Theory (S)
- SA 497-4 Directed Readings in Sociology (S)
- SA 498-8 Field Study in Sociology and/or Anthropology (S or A)
- SA 499-4 Independent Project (S or A)

#### Courses in Sociology/Antropology (S or A)

These courses count as anthropology or sociology credit whenever they are completed.

- SA 302W-4 Global Problems and the Culture of Capitalism (S or A)
- SA 315-4 New Information Technology and Society (S or A)
- SA 316-4 Tourism and Social Policy (S or A)
- SA 340-4 Social Issues and Social Policy Analysis (S or A)
- SA 355-4 Quantitative Methods (S or A)
- SA 356W-4 Ethnography and Qualitative Methods (S or A)
- SA 357W-4 Survey Methods (S or A)
- SA 358-4 The Philosophy of the Social Sciences (S or A)
- SA 364-4 Urban Communities and Cultures (S or A)
- SA 386-4 The Ethnography of Politics (S or A)
- SA 392-4 Latin America (S or A)
- SA 418-4 International Health: Global Policies and Local Realities (S or A)
- SA 420-4 Sociology of Aging (S or A)
- SA 429-4 Sex, Work, and International Capital (S or A)
- SA 430-4 States, Cultures and Global Transitions (S or A)
- SA 447-4 Selected Issues in Social Policy Analysis (S or A)
- SA 498-4 Field Study in Sociology and/or Anthropology (S or A)
- SA 499-4 Independent Project (S or A)

#### Courses in Sociology/Antropology (S or A)

These courses may count as anthropology or sociology credit depending on the content of the course in the semester it is taught. See the departmental Advisor.

- SA 326-4 Ecology and Social Thought (S or A)
- SA 345-4 Race, Immigration and the Canadian State (S or A)

- SA 360-4 Special Topics in Sociology and Anthropology (S or A)
- SA 363-4 Process of Development and Underdevelopment (S or A)
- SA 371-4 The Environment and Society (S or A)
- SA 388-4 Comparative Studies of Minority Indigenous Peoples (S or A)
- SA 396-4 Selected Regional Areas (S or A)
- SA 455-4 Special Topics in Applied Social Research (S or A)
- SA 460-4 Special Topics in Sociology and Anthropology (S or A)
- SA 463-4 Special Topics in Development Studies (S or A)

Theory and methods requirements should be completed early in the upper division. Students are strongly urged to balance theory courses with methods courses over the required minimum.

#### Anthropology Major Program

Students complete 32 upper division units including

- SA 301-4 Contemporary Ethnography (A)
- SA 356W-4 Ethnography and Qualitative Methods (S or A)
- SA 402-4 The Practice of Anthropology (A)

plus eight upper division units chosen from the Calendar list of anthropology (A) courses.

plus an additional 12 upper division units chosen from the Calendar list of anthropology (A), sociology (S), or sociology and anthropology (S or A).

#### Sociology Major Program

Students complete 32 units in upper division SA courses, including

- SA 350-4 Classical Sociological Thought (S)

and one of

- POL 315-4 Quantitative Methods in Political Science
- SA 355-4 Quantitative Methods (S or A)

and one of

- SA 356W-4 Ethnography and Qualitative Methods (S or A)
- SA 357W-4 Survey Methods (S or A)

An additional 20 upper division units are required, to be chosen from any SA or S course. Courses designated S are highly recommended.

## Joint Major Programs

### Archaeology and Anthropology Joint Major Program

Please see "Archaeology and Anthropology Joint Major Program" on page 93.

### Art and Culture Studies and Anthropology Joint Major Program

Please see "Anthropology or Sociology, and Art and Culture Studies Joint Major Program" on page 158.

### Art and Culture Studies and Sociology Joint Major Program

Please see "Anthropology or Sociology, and Art and Culture Studies Joint Major Program" on page 158.

### Sociology or Anthropology and Canadian Studies Joint Major Program

Please see "Joint Major Programs" on page 96.

### Anthropology and Sociology Joint Major Program

#### Lower Division Requirements

Refer to the *Major Programs – Lower Division Requirements* for the two discipline requirement specifications.

Students complete all of

- SA 100-4 Perspectives in Canadian Society (S or A)

SA 101-4 Introduction to Anthropology (A)  
 SA 150-4 Introduction to Sociology (S)  
 SA 201W-4 Anthropology and Contemporary Life (A)  
 SA 250-4 Introduction to Sociological Theory (S)  
 SA 255-4 Introduction to Social Research (SA)  
 STAT 203-3 Introduction to Statistics for Social Sciences

plus one additional 200 division course in anthropology and/or sociology.

**Note:** Students with equivalent post-secondary statistics courses are exempt from STAT 203. It is highly recommended that students complete SA 255 before completing STAT 203.

When choosing lower division courses, consider the prerequisites for upper division courses.

#### Upper Division Requirements

Students complete 40 units in upper division SA courses, including the following.

SA 301-4 Contemporary Ethnography (A)  
 SA 350-4 Classical Sociological Thought (S)  
 SA 356W-4 Ethnography and Qualitative Methods (S or A)  
 SA 402-4 The Practice of Anthropology (A)

plus one of  
 POL 315-4 Quantitative Methods in Political Science  
 SA 355-4 Quantitative Methods (S or A)

plus 20 additional upper division units chosen from the list of anthropology and/or sociology courses.

#### Sociology or Anthropology and Communication Joint Major Program

Sociology, anthropology and communications overlap in many concerns: nature, production, commodification, and politics of culture; communicative processes and social identity, class, gender, etc. This joint major is for those who share these common interests. A minimum 2.50 CGPA is required for entry and continuation in this program.

Students must fulfil lower and upper division requirements for both sociology and anthropology, as listed below.

#### Lower Division Anthropology Requirements

Students complete all of  
 SA 101-4 Introduction to Anthropology (A)  
 SA 201W-4 Anthropology and Contemporary Life (A)  
 SA 255-4 Introduction to Social Research

plus two additional 200 division courses in anthropology and/or sociology.

#### Lower Division Sociology Requirements

Students complete all of  
 SA 100-4 Perspectives on Canadian Society  
 SA 101-4 Introduction to Anthropology  
 SA 150-4 Introduction to Sociology  
 SA 250-4 Introduction to Sociological Theory  
 SA 255-4 Introduction to Social Research  
 STAT 203-3 Introduction to Statistics for the Social Sciences

#### Lower Division Communication Requirements

Students complete the following core courses.

CMNS 110-3 Introduction to Communication Studies  
 CMNS 130-3 Explorations in Mass Communication  
 Students complete at least six (6) CMNS 200 division courses, including at least two of  
 CMNS 260-3 Empirical Communication Research Methods  
 CMNS 261-3 Documentary Research in Communication  
 CMNS 262-3 Design and Method in Qualitative Communication Research

and at least one course from each area of concentration in communication (see below).

#### Media and Culture

CMNS 220, 221, 223 or 235

#### Technology and Society

CMNS 210, 253

#### Political Economy and Policy

CMNS 230 or 240

The remaining 200 division CMNS course(s) can be chosen from any area of concentration.

A grade of C- or better is mandatory in each of the required lower division CMNS courses.

#### Upper Division Anthropology Requirements

Students complete a minimum of 20 upper division units including.

SA 301-4 Contemporary Ethnography (A)  
 SA 356W-4 Ethnography and Qualitative Method (S or A)s

plus 12 additional upper division units chosen from the Calendar list of anthropology (A), or (S or A) courses when they are designated as anthropology.

#### Upper Division Sociology Requirements

Students complete a minimum of 20 upper division units in sociology or SA courses (five courses) which must include the following.

SA 350-4 Classical Sociological Thought

and one of  
 SA 355-4 Quantitative Methods  
 SA 356-4 Ethnography and Qualitative Methods

#### Upper Division Communication Requirements

Students complete a minimum of 24 upper division communication units. Directed study and field placement courses may not be used.

#### Sociology or Anthropology and Criminology Joint Major Program

These disciplines have some common methods and theoretical concerns; the relation between such variables as class, gender, ethnicity and crime; the social construction of deviance; the law as a social phenomenon; and the general social, political, and economic frameworks of society that condition the nature and perception of social problems. This program is for those who share these concerns.

Admission is contingent upon the enrolment limitation requirements of the School of Criminology. Application for admission must follow the general procedures established by the school.

A grade of 1.67 (C-) or better is required in all non-elective courses.

The department offers degrees in sociology or anthropology and a joint degree in sociology and anthropology. Students interested in a joint program in sociology or anthropology and criminology should contact both department advisors.

#### Anthropology Requirements

##### Lower Division Requirements

Students complete both of  
 SA 101-4 Introduction to Anthropology (A)  
 SA 201W-4 Anthropology and Contemporary Life (A)

plus one of  
 CRIM 220-3 Research Methods in Criminology  
 SA 255-4 Introduction to Social Research (SA)

plus three additional 200 division courses in anthropology and/or sociology.

##### Upper Division Requirements

Students complete a minimum of 20 upper division units including both of  
 SA 301-4 Contemporary Ethnography (A)  
 SA 356W-4 Qualitative Methods (S or A)

plus 12 additional upper division units chosen from the Calendar list of anthropology (A), or (S or A) courses when they are designated as anthropology. SA 402 is highly recommended.

#### Sociology Requirements

##### Lower Division Requirements

For the joint major in sociology and criminology, students must complete all of  
 SA 100-4 Perspectives on Canadian Society  
 SA 101-4 Introduction to Anthropology  
 SA 150-4 Introduction to Sociology  
 SA 250-4 Introduction to Sociological Theory  
 plus one of  
 CRIM 220-3 Research Methods in Criminology  
 SA 255-4 Introduction to Social Research  
 plus one additional 200 division sociology/anthropology (SA) or sociology (S) course.

##### Upper Division Requirements

Students complete a minimum of 20 upper division units including  
 SA 350-4 Classical Sociological Thought  
 SA 355-4 Quantitative Methods  
 SA 356-4 Ethnography and Qualitative Methods (SA)  
 plus eight upper division units from sociology/anthropology (SA) or sociology (S) courses

##### Highly Recommended

SA 304-4 Social Control

#### Criminology Requirements

For either the joint major in sociology and criminology, or in anthropology and criminology, students must complete the following criminology lower division requirements with a 2.25 CGPA.

All criminology lower division requirements must be completed before application, and before formal admittance to upper division criminology courses.

CRIM 369 or 462 may not be used for credit towards this joint major.

Students who withdraw from the joint major program and pursue a criminology major only will be required to complete additional course work consistent with the requirements for a major in criminology.

##### Lower Division Requirements

all of  
 CRIM 131-3 Introduction to the Criminal Justice System — A Total System Approach  
 CRIM 135-3 Introduction to Canadian Law and Legal Institutions: A Criminal Justice Perspective  
 CRIM 203-3 Historical Reactions to Crime and Deviance  
 CRIM 230-3 Criminal Law

plus all of  
 CRIM 101-3 Introduction to Criminology  
 CRIM 103-3 Psychological Explanations of Criminal and Deviant Behavior  
 CRIM 104-3 Sociological Explanations of Criminal and Deviant Behavior

plus one of  
 CRIM 220-3 Research Methods in Criminology\*  
 SA 255-4 Introduction to Social Research\*

plus one of  
 BUEC 232-3 Elementary Economic and Business Statistics I  
 PSYC 210-4 Introduction to Data Analysis in Psychology  
 STAT 100-3 Chance and Data Analysis  
 STAT 101-3 Introduction to Statistics  
 STAT 203-3 Introduction to Statistics for Social Sciences

\*Students who complete CRIM 220 must obtain, from the sociology/anthropology advisor, a waiver of the SA 255 prerequisite for SA 355 and 356 in advance of enrolling for these courses. Students who complete SA 255 must obtain, from the criminology advisor, a waiver of the CRIM 220 prerequisite for CRIM 320 in advance of enrolling for this course.

**Upper Division Requirements**

Students complete a minimum 20 units in criminology with a C- or better including

CRIM 300-3 Current Theories and Perspectives in Criminology  
CRIM 330-3 Criminal Procedure and Evidence  
CRIM 332-3 Sociology of Law

CRIM 369 and 462 are not permitted.

## **Sociology or Anthropology and Latin American Studies Joint Major Program**

**Lower Division Sociology Requirements**

SA 100-4 Perspectives on Canadian Society  
SA 101-4 Introduction to Anthropology  
SA 150-4 Introduction to Sociology  
SA 250-4 Introduction to Sociological Theory  
SA 255-4 Introduction to Social Research  
STAT 203-3 Introduction to Statistics for the Social Sciences

**Lower Division Anthropology Requirements**

Students complete all of  
SA 101-4 Introduction to Anthropology (A)  
SA 201W-4 Anthropology and Contemporary Life (A)  
SA 255-4 Introduction to Social Research (SA)  
plus three additional 200 division courses in anthropology and/or sociology.

**Upper Division Sociology Requirements**

Students complete 20 units in sociology or SA courses, which must include

SA 350-4 Classical Sociological Thought  
and one of  
SA 355-4 Quantitative Methods  
POL 315-4 Quantitative Methods in Political Science

and one of  
SA 356-4 Ethnography and Qualitative Methods  
SA 357-4 Survey Research

**Upper Division Anthropology Requirements**

Students complete a minimum of 20 upper division units including both of  
SA 301-4 Contemporary Ethnography (A)  
SA 356W-4 Ethnography and Qualitative Methods (S or A)

plus 12 additional upper division units chosen from the Calendar list of anthropology (A), or (S or A) courses when they are designated as anthropology. SA 402 is highly recommended.

## **Anthropology and Linguistics Joint Major Program**

For requirements, see "Linguistics and Anthropology Joint Major Program" on page 124.

## **Sociology or Anthropology and Women's Studies Joint Major Program**

For requirements, see "Sociology or Anthropology and Women's Studies Joint Major Program" on page 141.

## **Honors and Joint Honors Programs**

**Anthropology Honors Program**

In addition to the lower division requirements (see "Major Programs" on page 134), students must complete 52 units in upper division SA courses, 32 units of which must be in anthropology. The remaining 20 units can be completed with any upper division course in the department irrespective of discipline.

**Course Work Option**

Students who choose this option must complete 12 of the 52 upper division SA units at the 400 division (or above), and must include SA 451.

**Independent Project Option**

Students must complete eight of the 52 upper division SA units at the 400 division (or above), plus SA 499. Students who wish to pursue further independent research based on previous upper division work may enrol in SA 499 with prior undergraduate curriculum committee approval. Submit applications four weeks prior to the term in which SA 499 is to be completed and submit a proposal for a paper, a work plan, and confirmation of a faculty supervisor.

A cumulative grade point average (CGPA) of 3.5 in SA courses is required for admission to, and graduation from, the honors program.

Students must contact the advisor to declare their honors program.

**Theory Requirements**

Please see "Major Programs" on page 134. Theory requirements should be completed as early as possible in the upper division program.

**Methods Requirements**

Please see "Major Programs" on page 134. Methods requirements should be completed as early as possible in the upper division program.

**Note:** Students are strongly urged to balance theory courses with methods courses beyond the minimum.

**Sociology Honors Program**

In addition to the specified lower division requirements (see "Major Programs" on page 134), students must complete 52 units in upper division SA, 32 of which must be in sociology. The remaining 20 units can be completed with any upper division courses in the department irrespective of discipline.

**Course Work Option**

Students who choose this option must complete 12 of the 52 upper division SA units at the 400 division (or above), and must include SA 450.

**Independent Project Option**

Students must complete eight of the 52 upper division SA units at the 400 division (or above), plus SA 499. Students who wish to pursue further independent research based on previous upper division work may enrol in SA 499 with prior approval from the undergraduate curriculum committee. Applications should be submitted four weeks prior to the term in which SA 499 is to be completed. Students should submit a proposal for a paper, a work plan, and confirmation of a faculty supervisor.

A cumulative grade point average (CGPA) of 3.5 in SA courses is required for admission to, and graduation from, the honors program.

Students must contact the advisor to declare their honors program.

**Theory Requirements**

Please see "Major Programs" on page 134. Theory requirements should be completed as early as possible in the upper divisions.

**Methods Requirements**

Please see "Major Programs" on page 134. Methods requirements should be completed as early as possible in the upper division program.

**Note:** Students are strongly urged to balance theory courses with methods courses beyond the minimum.

## **Sociology and Anthropology Joint Honors Program**

In addition to the lower division requirements specified earlier (see "Major Programs" on page 134), students must complete 60 units in upper division SA courses, 32 units of which must be in one discipline, with the remaining 28 units in the other discipline.

**Course Work Option**

Students who choose this option must complete 12 of the 60 upper division SA units at the 400 division (or above), and must include either SA 450 or 451.

**Independent Project Option**

Students must complete eight of the 60 upper division SA units at the 400 division (or above), plus SA 499. Students who wish to pursue further independent research based on previous upper division work may enrol in SA 499 with prior approval from the undergraduate curriculum committee. Applications should be submitted four weeks prior to the term in which SA 499 is to be completed. Students should submit a proposal for a paper, a work plan, and confirmation of a faculty supervisor.

A cumulative grade point average (CGPA) of 3.5 in SA courses is required for admission to, and graduation from, the honors program.

Students must contact the advisor to declare their honors program.

**Theory Requirements**

Please see "Major Programs" on page 134. Theory requirements should be completed early in the upper division program.

**Methods Requirements**

Please see "Major Programs" on page 134. Theory requirements should be completed early in the upper division program.

**Note:** Students are strongly urged to balance theory courses with methods courses beyond the minimum.

## **Sociology or Anthropology and Canadian Studies Joint Honors Program**

See "Joint Honors Program" on page 96.

## **Minor Programs**

**Anthropology Minor Program****Lower Division Requirements**

Students complete these 12 lower division units.

SA 101-4 Introduction to Anthropology  
SA 201W-4 Anthropology and Contemporary Life  
SA 255-4 Introduction to Social Research\*

\*other courses may substitute for SA 255 upon the advice and with permission of the department advisor.

**Note:** unassigned transfer credit (SA XXX-3) cannot be used instead of SA 101 or 201.

**Upper Division Requirements**

Students complete 15 upper division units including  
SA 301-4 Contemporary Ethnography  
SA 356W-4 Ethnography and Qualitative Methods

The balance of this requirement must be fulfilled from the list of upper division anthropology (A) courses.

**Sociology Minor Program****Lower Division Requirements**

Students complete 12 lower division units, of which eight must be in sociology (S). The remaining may be in S, A, or SA.

**Upper Division Requirements**

Students complete a minimum of 15 upper division units, all of which must be sociology (S) designated courses, or sociology or anthropology (S or A) courses when designated as sociology. No anthropology (A) courses will be allowed.

**Extended Minor Program**

An extended minor consists of lower division requirements for a major and upper division requirements for a minor. Other criteria may be set by individual departments. A student's program must be approved by the extended minor program advisor.

## Certificate Programs

### Certificate in Ethnic and Intercultural Relations

This interdisciplinary program is for those planning to work in multicultural or cross-cultural settings. In today's increasingly interdependent world, the need for critical understanding of ethnicity and social justice has been acknowledged by educators, community workers and other professionals. In response, the program explores causes of unequal treatment, to compare social justice issues internationally, and to develop strategies for social change.

The program is for both general students and those interested in working with human service professionals (social workers, educators, police, counsellors, personnel managers, health practitioners or civil servants) who are required to interact effectively with people from a variety of cultural and linguistic backgrounds to foster better understanding of the multi-ethnic society in which we live and work.

Day and evening courses are offered at the Burnaby campus and at Simon Fraser University Vancouver. Some are available through Distance Education.

#### Program Objectives

Program participation enables students to develop:

- critical perspectives on current debates about racism, equality and social justice
- a clearer understanding of the concept of diversity as it relates to hierarchical structuring of differences
- knowledge based on immigration, citizenship and civil rights
- skills that will prepare you for professional work or further academic study in the field.

#### Program Requirements

Students must successfully complete 30 units comprised of 12 required units, and the remaining chosen from two sets of specified electives. These courses, which include both lower and upper division courses, provide critical and interdisciplinary material.

A minimum 2.50 GPA calculated on the designated courses for the certificate is required. Duplicate courses will be counted only once.

#### Core Courses

POL 481-4 Identity Politics  
SA 203-4 Violence in War and Peace  
SA 345-4 Race, Immigration and the Canadian State\*  
SA 386-4 The Ethnography of Politics

#### Elective Courses

Students complete a minimum of 10 units from the following

ASC 101-3 Introduction to Asia-Canada Studies I  
CRIM 335-3 Human Rights and Civil Liberties  
CRIM 311-3 Minorities and the Criminal Justice System\*  
HIST 326-4 The History of Aboriginal Peoples of North America Since 1850  
SA 255-4 Introduction to Social Research  
SA 286-4 Aboriginal Peoples and British Columbia: Introduction  
SA 319-4 Culture Ethnicity and Aging  
SA 340-4 Social Issues and Social Policy Analysis  
WS 200-3 Women in Cross Cultural Perspective

#### Optional Courses

To fulfil the remaining eight units, students choose from the following list *when content is applicable to multicultural issues*. Consult with the department.

CMNS 447-4 Negotiations and Dialogue as Communication  
CRIM 419-3 Indigenous Peoples, Crime, and Criminal Justice  
EDUC 441-4 Multicultural and Anti-racist Education  
GEOG 102-3 World Problems in Geographical Perspective  
GEOG 420-4 Comparative Cultural Geography

HIST 424-4 Problems in the Cultural History of Canada  
POL 320-4 Canada and Latin America  
SA 402-4 The Practice of Anthropology  
WS 309-4 Gender and International Development

\*available through the Centre for Distance Education

Subject to steering committee approval, students may substitute relevant special topics or related courses.

**Note:** it is the student's responsibility to ensure completion of prerequisites and other department requirements before choosing elective courses.

### Certificate in Family Studies

This program studies families from an interdisciplinary perspective. Students gain an understanding of psychology, sociology, gerontology and health. Students may supplement core courses with electives in relevant disciplines such as communications, education, history, and women's studies.

#### Admission Requirements

In addition to normal University admission requirements, students must complete PSYC 100, 102, and SA 150 prior to formal program admission. GERO 300 is highly recommended. Students can be admitted under regular or special entry requirements.

#### Program Requirements

- successful completion of 30 units, of which 14 are earned by completing four required core courses. The remaining 16 units are selected from a set of three courses from which the students select one, and 12 units of elective credit. Some have prerequisites that are not included in the certificate program.
- minimum 2.25 GPA calculated on courses applied to the certificate. Duplicate courses are counted once.
- completion of the certificate normally within five years of admission to the certificate program.

#### Core Courses (18 units)

GERO 408-4 Families over the Life Course  
PSYC 250-3 Introduction to Developmental Psychology  
SA 231-4 Sociology of Families

and one of  
KIN 110-3 Human Nutrition: Current Issues  
KIN 140-3 Contemporary Health Issues

and one of\*  
SA 331-4 Politics of the Family  
SA 332-4 Anthropology of Childhood

\*If students choose more than one of these courses, it/they may be applied to their elective courses.

#### Elective Courses (12 units)

Students complete 12 units from the following.  
CMNS 320-4 Children, Media and Culture  
CRIM 210-3 Law, Youth and Young Offenders  
HIST 329-4 Canadian Family History  
PSYC 355-3 Adolescent Development  
PSYC 357-3 Adulthood and Aging  
SA 319-4 Culture, Ethnicity and Aging  
SA 335-4 Gender Relations and Social Issues  
SA 340-4 Social Issues and Social Policy Analysis  
SA 496-4 Directed Readings in Anthropology (or SA 497)

WS 200-3 Women in Cross-Cultural Perspective

To develop research skills, students may select the following as electives.

PSYC 210-4 Introduction to Data Analysis in Psychology  
SA 255-4 Introduction to Social Research

#### Transfer Credit

Up to 14 units assigned to specific courses may be transferred to the certificate, subject to University transfer credit regulations and the co-ordinator's approval. Normally, required upper division core courses will be completed at Simon Fraser University.

## Post Baccalaureate Diploma Program

### Post Baccalaureate Diploma in Social Policy Issues

This program, for those with a bachelor's degree, may be completed through a combination of courses offered through distance education, at the Burnaby and the downtown campuses. The program applies recent developments in social theory and research methods to the investigation of social programs and social policy issues. Courses examine substantive social policy issues. The program provides critical perspectives to understand processes by which social problems are defined, understood, and acted upon.

For the program's general regulations, see "Post Baccalaureate Diploma Program" on page 7.

#### Program Requirements

Students must successfully complete an approved program comprised of 30 units of third and fourth year courses. At least 16 are to be chosen from the set of core courses described below.

#### Core Courses

Students complete at least four of the following courses, one of which must be SA 340.

SA 316-4 Tourism and Social Policy  
SA 319-4 Culture, Ethnicity, and Aging  
SA 320-4 Population and Society  
SA 333-4 Schooling and Society  
SA 335-4 Gender Relations and Social Issues  
SA 340-4 Social Issues and Social Policy Analysis  
SA 363-4 Processes of Development and Underdevelopment  
SA 386-4 The Ethnography of Politics  
SA 420-4 Sociology of Aging

#### Optional Courses

An additional four courses from the following list would complete the requirements for the program.

POL 321-4 The Canadian Federal System  
POL 352-4 Canadian Local and Urban Government and Politics  
POL 451-4 Public Policy Analysis  
SA 300-4 Canadian Social Structure  
SA 304-4 Social Control  
SA 321-4 Social Movements  
SA 325-4 Political Sociology  
SA 362-4 Society and the Changing Global Division of Labor  
SA 371-4 Environment and Society  
SA 402-4 The Practice of Anthropology  
SA 463-4 Special Topics in Development Studies

To fulfil the optional course requirement, students may instead complete additional core courses, or upon the program steering committee's recommendation, select a course not included among listed options, but with appropriate content.

Acceptance of general Simon Fraser University admission does not automatically guarantee program admission. Students must apply for entry directly to the Department of Sociology and Anthropology.

## Co-operative Education

This program provides practical social sciences experience and entails planned study terms and employment in an area of the student's choice.

### Requirements

To be admitted, students must have completed 29 units with a minimum 2.75 CGPA.

Prior to admission, students must complete all of  
SA 101-4 Introduction to Anthropology  
SA 150-4 Introduction to Sociology  
SA 255-4 Introduction to Social Research

and one of

SA 201-4 Anthropology of Contemporary Life  
SA 250-4 Introduction to Sociological Theory

plus one additional 200 division SA course

College transfer students must complete at least 15 Simon Fraser University units for admission eligibility, and must satisfy the above requirements or equivalents. College transfer students who participated in co-op programs elsewhere may be credited with term(s) already completed but applicability depends on the department's evaluation.

Work terms are made through the Faculty of Arts and Social Sciences and department co-op co-ordinators. For program continuance, a minimum 2.75 cumulative GPA is required. See "Co-operative Education" on page 212 or contact the department.

## Statistics Program

TLX10545 Shrum Science Centre, 778.782.3803 Tel,

R. Insley BSc, MSc (Br Col)

\*joint appointment with health sciences

The program maintains a committee of advisors whose office hours are available at the general office and at [www.stat.sfu.ca](http://www.stat.sfu.ca). Students pursuing a major should seek advice early in their academic career.

A program within the Faculty of Arts and Social Sciences leading to a bachelor of arts with a major or honors in statistics is offered. Students interested in a bachelor of science degree in statistics should see "Department of Statistics and Actuarial Science" on page 206 in the *Faculty of Science* section.

The program trains students, not only in large data sets analysis, but also in the design and analysis of scientific experiments and sample surveys. These techniques are applied in a broad field range. To appreciate their application, students gain advanced training in an area of potential application by completing a minor in a field other than statistics. There are no other restrictions on the selection of a minor. Students are encouraged to discuss their minor selection with an advisor early in their program.

The following related programs may also be of interest: mathematics and computing science (page 199), management and systems science (page 195).

### Admission Requirements

For major or honors admission, an average B- grade in at least two approved Simon Fraser University STAT courses is required. Visit [www.stat.sfu.ca/programmes/statistics/admission](http://www.stat.sfu.ca/programmes/statistics/admission) for policy details.

### Other Requirements

#### Faculty of Arts and Social Sciences Requirements

Students planning a bachelor of arts with a statistics major or honors must satisfy the Faculty of Arts and Social Sciences requirements.

#### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

#### Courses for Further Credit

No student may complete, for further credit, any course offered by the Department of Statistics and Actuarial Science which is a prerequisite for a course that the student has already completed with a grade of C- or higher without permission of the department.

#### Computing Recommendation

Experience with a high level programming language is recommended by the start of the second year.

#### Non-specialist STAT Courses

The following courses are intended to be particularly accessible to students who are not specializing in statistics: STAT 100, 101, 201, 203, 302, 403. See "Statistics STAT" on page 446 for course descriptions and associated course information.

#### Open Workshops

Some introductory and service courses are organized through the department's open workshops. In addition to regularly scheduled lectures, students enrolled in STAT 100, 101, 201, 203, 270 and 302 are encouraged to come to the workshops for assistance anytime during posted hours to meet with the co-ordinator, teaching assistants and students, and to work together to understand statistics in a friendly and helpful environment. The statistics workshop is held in K9516 Shrum Science Centre (inside K9510).

#### Beginning Level Requirements in Statistics

Students who are considering enrolment in a statistics course and do not have BC high school math 11 (or equivalent), must see the basic math workshop co-ordinator, and may complete the non-credit basic algebra course offered by the Department of Mathematics. Those who are unsure of their level of preparation are strongly encouraged to complete the free math assessment test at the basic math workshop located in K9505 or at Simon Fraser University Vancouver. Be sure to discuss the test results with the workshop lab instructor, or designate.

#### Prerequisite Grade Requirement

Students must have a grade of C- or better in prerequisites for STAT courses offered by the Department of Statistics and Actuarial Science.

#### GPA Required for Continuation

To continue in the Statistics Program, students must maintain at least a 2.25 grade point average in MATH, STAT or ACMA courses.

#### Credit for Statistics Courses

Credit for STAT courses depends on the order in which the courses are completed. There are three kinds of courses:

- introductory course STAT 100
- service courses STAT 101, 201, 203, 301, 302, 403
- mainstream courses STAT 270, 285, 300, 330, 350, 380, 400, 410, 430, 450, 460

Once a service or mainstream course is completed, credit may not be obtained for STAT 100. Once a mainstream course is completed, credit may not be obtained for any service course. An except is that both STAT 302 and 403 may be completed for credit after completing STAT 270.

### Accreditation of Courses

The Statistical Society of Canada has accredited certain courses as being available for partial fulfilment of the educational requirements for the associate statistician (AStat) designation. The accredited courses list is available at [www.ssc.ca/accreditation/index\\_e.html](http://www.ssc.ca/accreditation/index_e.html). Please contact the department for details. Further information on the professional statistician (PStat) and associate statistician (AStat) designation is available at [www.ssc.ca](http://www.ssc.ca).

### Major Program

A major in statistics requires 120 units, of which at least 65 must be within the Faculty of Arts and Social Sciences and the Department of Statistics and Actuarial Science. Please see "Bachelor of Arts Program" on page 88 for general regulations, breadth requirements, upper division credit, etc.

Students must obtain credit for the following.

### Lower Division Requirements

#### Mathematics

Students complete one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences  
MATH 157-3 Calculus for the Social Sciences I

plus one of  
MATH 152-3 Calculus II  
MATH 155-3 Calculus II for the Biological Sciences  
MATH 158-3 Calculus for the Social Sciences II

plus one of  
MATH 232-3 Applied Linear Algebra  
MATH 240-3 Algebra I: Linear Algebra

and  
MATH 251-3 Calculus III

#### Statistics

Students complete both of  
STAT 270-3 Introduction to Probability and Statistics  
STAT 285-3 Intermediate Probability and Statistics

#### Computing Science

Students complete one of  
CMPT 125-3 Introduction to Computing Science and Programming II  
CMPT 126-3 Introduction to Computer Science and Programming

### Upper Division Requirements

#### Probability and Statistics

Students complete all of  
STAT 330-3 Introduction to Statistical Inference  
STAT 350-3 Linear Models in Applied Statistics  
STAT 402-3 Generalized Linear and Nonlinear Modelling  
STAT 410-3 Statistical Analysis of Sample Surveys  
STAT 430-3 Statistical Design and Analysis of Experiments  
STAT 450-3 Statistical Theory

plus four additional upper division ACMA, MACM, MATH or STAT courses excluding STAT 301, 302 and 403. Consult an advisor before selecting these courses. It is recommended that these four additional upper division courses be selected from STAT 300, 380, 400, 460, 490, 495 and MACM 316. Honors students may not overlap these four with those used to satisfy the *Additional Mathematics Requirements* and the *Additional Statistics Requirements* as shown in the honors program below.

## Minor Program Requirements

Students are required to complete a minor in a discipline other than statistics. The certificate in actuarial mathematics may fulfil this requirement.

## Honors Program

This bachelor of arts program requires 132 units, of which at least 65 must be within the Faculty of Arts and Social Sciences and Department of Statistics and Actuarial Science. See "Bachelor of Arts Program" on page 88 for general regulations, breadth requirements, upper division credit and other requirements. In addition to the requirements for a major, candidates must obtain credit for the following.

## Additional Mathematics Requirements

Students complete all of  
MATH 242-3 Introduction to Analysis  
MATH 320-3 Advanced Calculus of One Variable  
MATH 322-3 Complex Variables  
plus one of  
MATH 338-3 Advanced Linear Algebra  
MATH 340-3 Algebra II: Rings and Fields  
MATH 341-3 Algebra III: Groups

## Additional Statistics Requirements

Students complete both of  
STAT 380-3 Introduction to Stochastic Processes  
STAT 460-3 Decision Analysis and Bayesian Inference

## Minor Program

Statistics minor program requirements are listed in *Department of Statistics and Actuarial Science* (page 206) in the *Faculty of Science* section.

## Extended Minor Program

An extended minor comprises the lower division requirements for a major plus the upper division requirements for a minor. At least seven upper division units counted toward this requirement must be completed at Simon Fraser University.

## Co-operative Education

This program integrates work experience with academic study. See "Co-operative Education" on page 212. Consult with the science and environment co-op co-ordinator Mr. E. Simons at [esimons@sfu.ca](mailto:esimons@sfu.ca).

\*joint appointment with contemporary arts

\*\*joint appointment with political science

\*\*\*joint appointment with psychology

\*\*\*\*joint appointment with sociology and anthropology

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information. For the faculty's requirements, see "Writing, Quantitative, and Breadth Requirements" on page 88.

## Major Program

### Lower Division Requirements

Students complete 12 lower division units in women's studies including both of

WS 101-3 Introduction to Women's Issues in Canada  
WS 102-3 Introduction to Western Feminisms

and one of

WS 207-3 Introduction to Feminist Theory  
WS 208-3 Researching Women's Issues: How Do We Do What We Do?

### Upper Division Requirements

Students complete 32 upper division units in women's studies. Students may substitute up to eight units of upper division credit offered by other departments and approved by women's studies.

## Gender Studies Minor Program

This minor, which may be completed with any major program, offers opportunities to integrate understanding of gender relations in society and culture.

Students complete 24 units comprising nine lower and 15 upper division units, with one lower division core course (GDST 200) required of all minors. For the remaining required units needed to complete the minor, students can apply units from regularly offered courses listed below, or from a list of designated courses that is posted in the department.

It is the student's responsibility to ensure completion of prerequisite and other department requirements before choosing elective courses.

Students planning a minor in gender studies should consult with the women's studies advisor about course selection at their earliest opportunity.

## Lower Division Requirements

Students complete

GDST 200-3 Thinking About Gender

plus two of

CRIM 213-3 Introduction to Women and Criminal Justice

CRIM 231-3 Introduction to the Judicial Process

SA 100-4 Perspectives on Canadian Society

SA 286-4 Aboriginal Peoples and British Columbia: Introduction

## Upper Division Requirements

Students complete 15 upper division units selected from the following list and a list of designated courses that is posted in the women's studies department.

If in doubt about your eligibility to enrol in a particular upper division course, contact the undergraduate advisor in the appropriate department well in advance of any attempt to enrol.

CMNS 455-4 Women and New Information Technologies

CRIM 333-3 Women, Law and the State

CRIM 432-3 Gender in the Courts and the Legal System

ENGL 486-4 Topics in Gender, Sexuality and Literature

FPA 313-5 Arts, Audience, Patronage, Institutions

GDST 300-4 Mapping Masculinities

GDST 301-4 Queer Genders

GEOG 387-4 Geography and Gender

HIST 411-4 Class and Gender in European History

HIST 425-4 Gender and History

HIST 454-4 Gender and Sexuality in US History

SA 318-4 The Anthropology of Medicine

SA 331-4 Politics of the Family

SA 335-4 Gender Relations and Social Issues

SA 429-4 Sex, Work and International Capital

SA 435-4 Gender, Colonialism and Post-Colonialism

SA 486-4 Aboriginal Peoples and British Columbia

WS 309-4 Gender and Development

WS 314-4 Race, Class and Gender Relations

WS 315-4 Gender, War and Health

WS 323-4 Latin American Women in Literature and Society

WS 399-4 Numeracy, Gender and Cultures

## Women's Studies Minor Program

A women's studies minor may be completed with any major or honors bachelor's degree, or with a bachelor of general studies. The program offers students the maximum opportunity to integrate their understanding of the role of women in their society and culture.

### Lower Division Requirements

Students complete nine lower division units in women's studies including WS 101 and 102 or approved equivalents.

### Upper Division Requirements

Students complete 16 upper division units in women's studies. Those pursuing a minor normally fulfil lower division requirements before enrolling in 400 division courses, except with permission of the department.

Additional courses in various departments are designated for inclusion in the minor. A list is available from the department. Other courses which may have high women's studies content will be considered for credit toward the minor upon application. Only five units of designated courses will count toward the minor. Candidates for a history honors or major may count either or both of WS 201 and 202 toward the 18 lower division history units that are required.

## Extended Minor Program

An extended minor consists of the lower division major requirements and the upper division minor requirements in a subject area. See "Extended Minor Program" on page 89 for further details.

## Criminology and Women's Studies Joint Major Program

### Advisors

Ms. M. McIlroy, School of Criminology, 2644 Diamond Building, 778.782.3645

Ms. R. Neilson BA (S Fraser), Department of Women's Studies, 5103 Academic Quadrangle, 778.782.3593

### Program Requirements

Interested students should contact advisors in both the School of Criminology and the Department of Women's Studies.

To be admitted, students must satisfy admission requirements for both departments (refer to those Calendar sections). The School of Criminology must approve the student's admission before the student will be approved by women's studies.

To continue in this program, students must maintain a cumulative 2.25 GPA and cannot enrol in upper division CRIM courses with a CGPA of less than that. However, a student whose CGPA is between 2.00 and 2.25 may be eligible to apply for admission to the Department of Women's Studies major program.

### Lower Division Requirements

#### Criminology

All criminology lower division requirements must be completed with a cumulative GPA of not less than 2.25 before applying to the school for program acceptance, and before admittance is granted to undertake the upper division criminology courses. A C- grade or better is required in all required courses.

Students complete a minimum 60 units including all of  
 CRIM 101-3 Introduction to Criminology  
 CRIM 103-3 Psychological Explanations of Criminal and Deviant Behavior  
 CRIM 104-3 Sociological Explanations of Criminal and Deviant Behavior  
 CRIM 131-3 Introduction to the Criminal Justice System — A Total System Approach  
 CRIM 135-3 Introduction to Canadian Law and Legal Institutions: A Criminal Justice Perspective  
 CRIM 213-3 Introduction to Women and Criminal Justice  
 CRIM 220-3 Research Methods in Criminology  
 CRIM 230-3 Criminal Law  
 SA 150-4 Introduction to Sociology

plus one of

PHIL 001-3 Critical Thinking  
 PHIL 100-3 Knowledge and Reality  
 PHIL 110-3 Introduction to Logic and Reasoning  
 PHIL 120-3 Introduction to Moral Philosophy  
 PHIL 150-3 History of Philosophy I  
 PHIL 151-3 History of Philosophy II

PHIL 220-3 Introduction to Social and Political Philosophy

PHIL 244-3 Introduction to the Philosophy of Natural and Social Science

PHIL 280-3 Introduction to Existentialism

plus one of

POL 100-3 Introduction to Politics and Government  
 POL 151-3 The Administration of Justice

plus both of

PSYC 100-3 Introduction to Psychology I  
 PSYC 102-3 Introduction to Psychology II

plus one of

STAT 100-3 Chance and Data Analysis  
 STAT 101-3 Introduction to Statistics  
 STAT 203-3 Introduction to Statistics for Social Sciences

### Women's Studies

Students complete 15 lower division units in women's studies including both of

WS 101-3 Introduction to Women's Issues in Canada  
 WS 102-3 Introduction to Western Feminisms

and one of

WS 207-3 Introduction to Feminist Theory  
 WS 208-3 Feminist Research Methods

### Upper Division Requirements

#### Criminology

Students complete a minimum of 25 upper division units in criminology with a minimum CGPA of 2.25 including all of

CRIM 300-3 Current Theories and Perspectives in Criminology  
 CRIM 320-5 Quantitative Research Methods in Criminology  
 CRIM 330-3 Criminal Procedure and Evidence  
 CRIM 333-3 Women, Law and the State  
 CRIM 432-3 Gender in the Courts and the Legal Profession

**Note:** Students in this joint major program are not permitted to complete CRIM 369 nor 462.

The remaining required units may be selected at the student's discretion. Faculty of Arts and Social Sciences breadth requirements must be completed so general electives should be considered for that purpose.

### Women's Studies

Students complete a minimum of 20 upper division units in Women's Studies.

The special topics course WS 303-4 is recommended when offered as Women and the Law.

Exceptionally and only with the permission of the department, one course of designated women's studies credit offered by another department may be substituted for one course.

## English and Women's Studies Joint Major Program

### Advisors

Ms. K. Ward, Department of English, 6133 Academic Quadrangle, 778.782.4835

Ms. R. Neilson BA (S Fraser), Department of Women's Studies, 5103 Academic Quadrangle, 778.782.3593

This inter-departmental program explores various relationships between English literature and women's studies. Interested students must plan their program in consultation with both department advisors, and should consult *Guidelines for Course Selection* available from each department.

### Lower Division Requirements

#### English Requirements

Students complete the lower division requirements of the English major program.

#### Women's Studies Requirements

Students complete 15 lower division units in women's studies including both of

WS 101-3 Introduction to Women's Issues in Canada  
 WS 102-3 Introduction to Western Feminisms

and one of

WS 207-3 Introduction to Feminist Theory  
 WS 208-3 Feminist Research Methods

### Upper Division Requirements

#### English Requirements

Students complete 20 upper division English units. One course must come from ENGL 300, 304, 306, 310, 311, 313, 320, 322; and one from ENGL 354, 357, 359. Four units must be at the 400 division, excluding directed studies courses (ENGL 441, 442, 443 and 444).

#### Women's Studies Requirements

Students complete 20 upper division units in women's studies including two of

WS 304-4 Women and Religion  
 WS 305-4 Conceiving Creativity  
 WS 306-4 Women's Autobiographies, Memoirs and Journals  
 WS 313-4 Women and the Environment

The remaining units are from 300 and 400 division WS courses. Exceptionally and only with department permission, a maximum of one course of designated women's studies credit offered by another department may substitute for one WS course. The remaining upper division units are at the student's discretion.

## History and Women's Studies Joint Major Program

### Advisors

Mrs. T. Wright BA (S Fraser), Department of History, 6026 Academic Quadrangle, 778.782.4429

Ms. R. Neilson BA (S Fraser), Department of Women's Studies, 5105 Academic Quadrangle, 778.782.3593

This inter-department program explores the relationship between history and women's studies. Interested students must plan their program in consultation with the advisors in each department.

### Lower Division Requirements

#### Women's Studies

Students complete 15 lower division units in women's studies including all of

WS 101-3 Introduction to Women's Issues in Canada  
 WS 102-3 Introduction to Western Feminisms  
 WS 201-3 Colonizing Women: Canadian Women in Historical Perspective, 1600-1870s  
 WS 202-3 Modernizing Women: Canadian Women in Historical Perspective, 1870s-1970s

and one of

WS 207-3 Introduction to Feminist Theory  
 WS 208-3 Feminist Research Methods

### History

Students complete 18 units in 100 and 200 division history courses, including at least six units in 100 division history courses.

### Upper Division Requirements

#### Women's Studies

Students complete 20 upper division WS units.

### History

Students complete 24 units of 300 and 400 division history courses, of which 12 units must be in 400 division courses. Students complete at least two from any two groups, and at least one from the remaining group. For a description of the groups, see page 116.

## Humanities and Women's Studies Joint Major Program

### Advisors

Ms. C. Prislard, Department of Humanities, 5114 Academic Quadrangle, 778.782.4094

Ms. R. Neilson BA (S Fraser), Department of Women's Studies, 5103 Academic Quadrangle, 778.782.3593

This inter-department program explores relationships between humanities and women's studies. Students plan their program with advisors in each department.

### Lower Division Requirements

#### Women's Studies

Students complete 15 lower division units in women's studies including both of

WS 101-3 Introduction to Women's Issues in Canada  
WS 102-3 Introduction to Western Feminisms

and one of

WS 207-3 Introduction to Feminist Theory  
WS 208-3 Feminist Research Methods

#### Humanities

Students complete 15 units including  
HUM 101W-3 introduction to the Humanities

plus one of

HUM 102W-3 Classical Mythology  
HUM 105-3 Western Civilization from the Ancient  
World to the Reformation Era  
HUM 130-3 Introduction to Religious Studies

plus one of

HUM 201-3 Great Texts in the Humanities I  
HUM 202-3 Great Texts in the Humanities II  
HUM 203-3 Great Texts in the Humanities III

plus two further lower division humanities courses.

### Upper Division Requirements

#### Women's Studies

Students complete 20 upper division units in women's studies.

Exceptionally and only with permission of the department, one course of designated women's studies credit offered by another department may be substituted for one course.

#### Humanities

Students complete 22 units in upper division humanities courses which must include

HUM 495-2 Humanities Graduating Seminar

The following are recommended.

HUM 320-4 The Humanities and Philosophy  
HUM 321-4 The Humanities and Critical Thinking  
HUM 325-4 The Humanities and the Natural World

### Political Science and Women's Studies Joint Major Program

For requirements, see "Political Science and Women's Studies Joint Major Program" on page 131.

### Women's Studies and Psychology Joint Major Program

#### Advisors

Ms. T. Anbinder, Department of Psychology,  
5252 Robert C. Brown Hall, 778.782.3359

Ms. B. Davino, Department of Psychology,  
5249 Robert C. Brown Hall, 778.782.4840

Ms. R. Rogers BA (S Fraser), Department of  
Women's Studies, 5103 Academic Quadrangle,  
778.782.3593

Students are encouraged to consult advisors from both departments. This inter-departmental program explores relationships between psychology and women's studies. Joint major students (or prospective students) must plan their program in consultation with department advisors.

### Lower Division Requirements

#### Psychology

To be admitted to the major program, students must obtain a final course grade of C (2.0) or better in each of the following courses.

PSYC 100-3 Introduction to Psychology I  
PSYC 102-3 Introduction to Psychology II  
PSYC 201-4 Introduction to Research Methods in Psychology  
PSYC 207-3 Introduction to the History of Psychology  
PSYC 210-4 Introduction to Data Analysis in Psychology

**Note:** the above requirement applies to courses transferred from other institutions as well as to courses completed at Simon Fraser University.

Students must also complete two of

PSYC 221-3 Introduction to Cognitive Psychology  
PSYC 241-3 Introduction to Abnormal Psychology  
PSYC 250-3 Introduction to Developmental Psychology  
PSYC 260-3 Introduction to Social Psychology  
PSYC 268-3 Introduction to Law and Psychology  
PSYC 270-3 Introduction to Theories of Personality  
PSYC 280-3 Introduction to Biological Psychology

#### Women's Studies

Students complete 15 lower division units in women's studies including both of

WS 101-3 Introduction to Women's Issues in Canada  
WS 102-3 Introduction to Western Feminisms

and one of

WS 207-3 Introduction to Feminist Theory  
WS 208-3 Feminist Research Methods

### Upper Division Requirements

#### Psychology

Students complete 20 upper division psychology units. No more than three may be in directed studies. At least 11 upper division psychology units must be completed at Simon Fraser University.

#### Women's Studies

Students complete 20 upper division units in women's studies. Exceptionally and only with the permission of the department, one course of designated women's studies credit offered by another department may be substituted for one course.

### Sociology or Anthropology and Women's Studies Joint Major Program

#### Advisors

Ms. K. Payne, Department of Sociology and  
Anthropology, 5055 Academic Quadrangle,  
778.782.3726

Ms. R. Neilson BA (S Fraser), Department of  
Women's Studies, 5103 Academic Quadrangle,  
778.782.3593

The Departments of Sociology and Anthropology, and Women's Studies have common interests in women's issues and social sciences teaching and research. This joint major is for those who share these interests.

### Lower Division Requirements

#### Sociology

SA 101-4 Introduction to Anthropology  
SA 150-4 Introduction to Sociology  
SA 250-4 Introduction to Sociological Theory  
SA 255-4 Introduction to Social Research  
STAT 203-3 Introduction to Statistics for the Social Sciences

SA 231 is highly recommended.

#### Anthropology

Students complete all of

SA 101-4 Introduction to Anthropology  
SA 201W-4 Anthropology and Contemporary Life  
SA 255-4 Introduction to Social Research

plus two additional 200 division courses in anthropology and/or sociology

### Women's Studies

Students complete 15 lower division units in women's studies including all of

WS 101-3 Introduction to Women's Issues in Canada  
WS 102-3 Introduction to Western Feminisms  
WS 200-3 Women in Cross-Cultural Perspective

and one of

WS 207-3 Introduction to Feminist Theory  
WS 208-3 Feminist Research Methods

### Upper Division Requirements

#### Sociology

SA 350-4 Classical Sociological Thought  
SA 355-4 Quantitative Methods

Students must also complete an additional 12 units of upper division SA credit.

#### Anthropology Requirements

Students complete both of  
SA 301-4 Contemporary Ethnography  
SA 356W-4 Ethnography and Qualitative Methods

plus 12 additional upper division units chosen from the Calendar list of anthropology (A), or sociology or anthropology (S or A) courses when they are designated as anthropology

#### Women's Studies

Students complete 20 upper division women's studies units. Exceptionally and only with department permission, one course designated as women's studies credit offered by another department may be substituted for one WS course.

### Co-operative Education

This program is for qualified students to gain practical experience in women's studies. For admission, 30 units with a 3.0 CGPA, WS 101, 102, and two 200 division WS courses is required. Transfer students complete at least 15 Simon Fraser University units.

See "Co-operative Education" on page 212. Work term arrangements are made through the Faculty of Arts and Social Sciences co-op co-ordinator, who should be consulted at least one term in advance.

## World Literature Program

Simon Fraser University Surrey, Galleria 5, Central City, 250-13450 102nd Avenue, Surrey, BC V3T 0A3, 778.782.8731 Tel, [www.students.surrey.sfu.ca/worldliterature](http://www.students.surrey.sfu.ca/worldliterature), [worldlit-advisor@sfu.ca](mailto:worldlit-advisor@sfu.ca)

#### Acting Director

H. Dawkins BFA (Nova Scotia Art & Des), MA, PhD (Leeds)

#### Assistant Professors

S. Colby BA, MA (Vic, BC), PhD (Sus)\*  
P.L. Horta BA, MA (Br Col), MA (Qu), PhD (Tor)  
M. Ortatabi BA (Calif), MA, PhD (Wash)  
A. Yamini-Hamedani BA, MA, PhD (Calif)

#### Advisor

Ms. M. Yao BA (Br Col), 778.782.8478 Tel, [worldlit-advisor@sfu.ca](mailto:worldlit-advisor@sfu.ca)

\*joint appointment with explorations program

This bachelor of arts program focuses on writing from around the world, whether this is novels, essays, poetry, or prose, and whether traditional or experimental. World literature raises vital questions about cross-cultural understanding, translation as a creative and cultural enterprise, literature's role in history and society, and the nature of literature itself. Students will study historical, cultural, and theoretical approaches as well as the changing meanings of literature in translation. The major, minor, and honors programs examine literature in a comparative way,

emphasizing periods of cross-cultural contact and exchange. The language of instruction is English. The major and honors programs include language courses. Students are encouraged to study abroad.

## Major Program

This program consists of world literature (WL), history and language courses. Students are encouraged to complete 18 lower division WL units and three HIST units before proceeding to upper division world literature courses. (HIST 130 is recommended.) Students also complete nine units of language study in either the lower or upper division. Those who are multilingual can apply for a waiver of this requirement. Contact the student advisor for further information.

### Lower Division Requirements

Students complete 18 units including one of  
 WL 100-3 Introduction to World Literature  
 WL 101-3 Writing Global Migration  
 WL 102-3 Literature Across Cultures  
 and one of  
 WL 103-3 Pre-Modern World Literature  
 WL 104-3 Modern World Literature  
 plus  
 WL 200-3 Literary Analysis and Interpretation  
 and two of  
 WL 201-3 East/West  
 WL 202-3 North/South  
 WL 203-3 Selected Genres in World Literature  
 WL 204-3 Human Rights Literature  
 plus one additional three unit lower division course in world literature.

### Upper Division Requirements

Students complete a minimum of 31 upper division WL units including  
 WL 300-4 How Theory Travels  
 and any of  
 WL 301-4 Imperial Cultures  
 WL 302-4 Post-Imperial Cultures  
 WL 303-4 Global Culture and its Others  
 WL 304-4 Exiles and Émigrés  
 WL 305-4 Sages and Poets  
 and at least two of  
 WL 400-4 Literary Perspectives on Ancient Cultures  
 WL 401-4 Early Modernities

WL 402-4 Other Modernities  
 WL 403-3 After Modernities  
 WL 404-4 Literature in Translation  
 WL 410-4 Selected Topic in World Literature I  
 WL 420-4 Selected Topic in World Literature II  
 WL 430-4 Selected Topic in World Literature III  
 WL 440-4 Selected Topic in World Literature IV  
 WL 450-4 Directed Readings in Language and Literature

### Relevant Topic Courses

With prior approval, students may complete a maximum of three lower and eight upper division units of relevant topic courses from outside the program by submitting the course description to the advisor. The following pre-approved courses are appropriate.

ENGL 392-4 Studies in World Literatures in English  
 ENGL 492-4 Topics in World Literatures in English  
 FPA 341-3 World Music  
 FREN 342-4 Literature in Translation from the World  
 HUM 309-4 Literature and the Arts Across Cultures

### Study Abroad

Students are encouraged to study abroad, and may complete up to 15 upper division units at other universities or field schools with prior approval. Submit the relevant course description to the world literature advisor well in advance of the course.

## Honors Program

This program, for those who wish to study world literature beyond the major's course work, requires study in a language other than English and honors seminars of concentrated research and writing on a topic of their choice, with approval from the program.

To apply, students complete the same lower division requirements as the major, the language requirements, and 12 upper division units including WL 300. Applicants must have a minimum 3.0 grade point average (GPA). To complete the program, a minimum of 60 upper division units are required, with a minimum of 50 in world literature, and a 3.0 GPA.

### Language Requirements

In addition to the major program's nine units of language study, honors students also complete a minimum of three units of literature in a language other than English. This requirement may be fulfilled by completing a WL directed reading course (WL 450) or by completing an upper division course in another

Simon Fraser University department. With prior approval, this requirement may be met by completing an upper division course at another university.

## Upper Division Requirements

Students complete 50 upper division WL units by completing the same courses as the major program, excluding WL 450, (see above) plus the following.

WL 450-4 Directed Readings in Language and Literature  
 WL 480-4 Research Seminar for Honors Essay  
 WL 490-4 Honors Essay

### Relevant Topic Courses

With prior approval, students may complete a maximum of 12 upper division units of relevant topic courses from outside the program by submitting the appropriate course description to the world literature advisor. See "Relevant Topic Courses" on page 142 (above) for a list of pre-approved courses.

### Study Abroad

Students are encouraged to study abroad. See "Study Abroad" on page 142 (above).

## Minor Program

Students complete the following requirements.

### Lower Division Requirements

Students complete 12 units including one of  
 WL 100-3 Introduction to World Literature  
 WL 103-3 Pre-Modern World Literature  
 WL 104-3 Modern World Literature

plus  
 WL 200-3 Literary Analysis and Interpretation  
 and two additional three unit lower division WL courses.

### Upper Division Requirements

Students complete 16 upper division units in WL courses.

### Relevant Topic Courses

With prior approval, students may complete one lower or upper division relevant topic course (up to four units) from outside the World Literature Program by submitting the course description to the world literature advisor.

## Introduction

The faculty offers honors, major and minor programs at both the Burnaby and Surrey campuses, in co-operation with the Faculties of Applied Sciences, Arts and Social Sciences, and Science. The faculty also offers joint programs. For a complete list, please see *Programs Offered* above.

The value of a broadly based education is emphasized. Because of this objective, students will complete mainly non-business courses during the first 60 units, completing three categories of courses. The first category consists of lower division requirements which are mainly tool courses to prepare for more advanced upper division business courses. The second category consists of courses completed to meet university requirements in writing, quantitative and breadth. See "Writing, Quantitative, and Breadth Requirements" on page 144 (below). In the third category, choose courses are based on intellectual interest or to achieve academic goals. The first two categories should be completed during the first 60 units.

The last 60 units of the degree program consists of the completion of the core upper division business courses, at least one area of concentration, and lower and upper division electives. The following concentrations are available at the Burnaby campus: accounting, finance, international business, human resource management, management information systems, management science, and marketing. The following concentrations are available at the Surrey campus: entrepreneurship, finance, management and technology, and marketing. Students must choose either Burnaby or Surrey as their primary campus; however, they may freely choose to complete courses at both campuses.

The University Calendar in effect at the time the student's honors or major is approved establishes the degree requirements for the graduation of that student. All students should confirm with the undergraduate program co-ordinator the details of the requirements.

## Admission Requirements

### Criteria

Students will be selected competitively from one of four streams.

#### Category 1 – direct from secondary school

A portion of the annual admission will be selected from secondary school graduates based on the general Simon Fraser University admission requirements plus mathematics 12.\*

#### Category 2 – direct from college

A portion of the annual admission will be selected from students transferring from community colleges or technical institutes. These students must have completed all of the required lower division courses (except BUS 207 and 254 which may be completed after faculty admission\*\*). Students will be selected competitively based on the Simon Fraser University admission grade point average.

#### Category 3 – all courses at Simon Fraser University

A portion of the annual admission will be selected from students who have completed all of their courses at Simon Fraser University including the lower division requirement courses (except BUS 207 and 254 which may be completed after faculty admission\*\*). Students will be selected competitively based on the cumulative grade point average.

#### Category 4 – some Simon Fraser University and other post-secondary courses

A portion of the annual admission will be selected from students who have completed some courses at Simon Fraser University and some at other post-secondary institutions including the lower division requirement courses (except BUS 207 and 254 which may be completed after faculty admission\*\*). Students will be selected competitively based on a grade point average which will be a combination of grades earned at Simon Fraser University and other institutions. **Note:** minimum Simon Fraser University CGPA of 2.4 required.

To be considered for admission to the faculty, students in categories 2, 3 and 4 must have completed each lower division requirement course with a minimum C- grade. The number of undergraduate students granted entry to the faculty is limited to 500 to 600 new students per academic year.

\*or equivalent advanced placement or international baccalaureate courses as listed under *General Admission Requirements* for British Columbia Secondary Schools.

\*\*if BUS 207 and/or 254 have been completed, they will be calculated into the GPA used for faculty admission.

### Application Procedures

Students applying under category 1 or 2 should apply to the faculty at the same time that they apply for admission to the University.

Category 3 or 4 applicants should apply to the faculty after completing the 30th unit and before the 60th. Students should apply during the term in which the lower division requirements, as listed below (except BUS 207 and 254) are completed. Students not accepted upon initial application may reapply. Unsuccessful applicants may appeal through the faculty admissions appeals committee.

### Application Deadlines

April 1\* for summer term  
August 1\* for fall term  
December 1\* for spring term

\*application earlier in the term is recommended

In the second month of the term, students may apply online at [www.business.sfu.ca/bba/appform/index.php](http://www.business.sfu.ca/bba/appform/index.php)

### Non-Majors Access to Business Courses 300 and 400 division BUS Course Enrolment Restrictions

Students other than those accepted into a program in business administration may complete selected 300 division business administration courses contingent upon

- space available on day five of the first week of classes
- meeting the prerequisites for the requested course

Registration in BUS 360W and upper division courses in the honors accounting concentration is limited to students who are approved in a business plan.

Only students who have been formally admitted to the Faculty of Business Administration will be awarded a bachelor of business administration.

## General Requirements

In addition to the specific requirements for major, minor, honors and joint programs, all students should note the following.

In addition to normal university grade point average requirements, the faculty requires a minimum 2.40 cumulative grade point average (CGPA) for entry into all 300 and 400 division business administration courses.

For a course to be accepted as fulfilling a prerequisite, or for a lower division requirement, or for a core course to be accepted in a student's program in business administration, a student must have obtained a minimum grade of C- (C minus).

Students with fewer than 60 units may enrol in a maximum of 16 units per term. Those with 60 or more may enrol in a maximum of 18 units.

All upper division BUS courses have a prerequisite of 60 units. However, approved Business Administration majors or minors may complete 300 division BUS courses upon completion of 45 units.

For a course to be accepted as fulfilling a prerequisite, or for a core course to be accepted in a student's business administration program, a minimum grade of C- (C minus) must be obtained.

## Letters of Permission

Please see "Courses at Other Institutions/Letters of Permission" on page 28. The Faculty of Business Administration does not normally approve letters of permission for students already enrolled at Simon Fraser University.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

## Major Program

Students complete at least 120 units which must include a minimum of 50 units outside the Faculty of Business Administration. Within the 50 units, students must meet the University requirements for breadth — two courses labelled as Breadth-Humanities, two courses labelled as Breadth-Science, and two courses labelled as Breadth-Social Science. Courses not labelled as BUS or BUEC that are completed as part of the lower division requirements may be used toward the 50 units outside business administration.

### Lower Division Requirements

Students complete all of  
BUS 237-3 Introduction to Computers and Information Systems in Business  
BUS 251-3 Financial Accounting I  
BUS 254-3 Managerial Accounting I\*  
BUS 272-3 Behavior in Organizations  
ECON 103-4 Principles of Microeconomics  
ECON 105-4 Principles of Macroeconomics  
and one of  
BUEC 232-4 Data and Decisions I  
STAT 270-3 Introduction to Probability and Statistics  
and one of  
BUS 207-3 Managerial Economics\*  
ECON 301 Microeconomic Theory I: Competitive Behavior  
and one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences  
MATH 157-3 Calculus for the Social Sciences I

and two of

ENGL 101-3 Introduction to Fiction  
 ENGL 102-3 Introduction to Poetry  
 ENGL 103-3 Introduction to Drama  
 ENGL 104-3 Introduction to Prose Genres  
 ENGL 105-3 Introduction to Issues in Literature and Culture  
 ENGL 199-3 Introduction to University Writing  
 PHIL 001-3 Critical Thinking  
 PHIL 100-3 Knowledge and Reality  
 PHIL 120-3 Introduction to Moral Philosophy

\*may be completed following admission to the faculty.

### Upper Division Requirements

In the last 60 units, students must complete a minimum of 45 upper division units, of which a minimum of 36 units must be in business administration or BUEC courses.

The 36 upper division units in business administration must include the following.

- all core courses (see *Core Courses* below)
- an area of concentration (see *Areas of Concentration* below)
- at least three 400 division BUS or BUEC courses (excluding practicum courses and BUS 478). These courses may be used toward the requirements for the area(s) of concentration.

Further upper division courses in any discipline must be completed to bring the total upper division credit to 45 units minimum.

Students may not enrol in upper division (300 and 400 division) business administration courses before completing the first 60 lower division units, with two exceptions:

- approved business majors and minors may complete upper division BUS courses after the completion of 45 units

Any 300 or 400 division course completed before the completion of 60 units will not count as fulfilling the 45 upper division units required in the final 60 units of the program, or as part of the upper division units for the major or minor.

### Core Courses

Students majoring in business administration are required to complete all of  
 BUS 303-3 Business, Society and Ethics  
 BUS 312-4 Introduction to Finance  
 BUS 336-4 Data and Decisions II  
 BUS 343-3 Introduction to Marketing  
 BUS 360W-4 Business Communication  
 BUS 393-3 Commercial Law  
 BUS 478-3 Seminar in Administrative Policy

and one of

BUS 374-3 Organization Theory  
 BUS 381-3 Introduction to Human Resource Management

Students complete BUS 360W before their 75th unit.

### Areas of Concentration

Students complete a concentration within one or more of the following areas by completing the courses specified below.

#### Accounting (Honors Only)

BUS 251-3 Financial Accounting I  
 BUS 254-3 Managerial Accounting I  
 BUS 320-3 Financial Accounting: Assets  
 BUS 321-3 Financial Accounting: Equities  
 BUS 322-3 Intermediate Managerial Accounting  
 BUS 329-4 Income Tax for Business Decision-Making  
 BUS 420-3 Advanced Accounting  
 BUS 421-3 Accounting Theory  
 BUS 424-3 Advanced Managerial Accounting  
 BUS 426-3 Auditing and Assurance: Concepts and Methods

**Note:** see "Honors Program" on page 146 for additional requirements.

Students may apply for the honors accounting concentration once they have completed their lower division requirements and have either completed or enrolled in BUS 320 and 360W. Admission is on a competitive basis. Upon completion of BUS 320 and 360W with a minimum grade of C+ the admission decision will be made.

Once admitted a minimum 3.0 CGPA must be maintained in order to remain in the program. Only students formally admitted to the accounting honors concentration will be permitted to enrol in accounting courses in the 300 and 400 divisions (with the exception of BUS 320).

#### Entrepreneurship

BUS 342-3 Foundations of Entrepreneurship  
 BUS 361-3 Project Management  
 BUS 314-3 New Venture Finance  
 BUS 443-3 Marketing for New Ventures  
 BUS 486-3 Leadership

#### Finance

BUS 312-4 Introduction to Finance  
 BUS 315-4 Investments  
 BUS 316-3 Derivative Securities

and two of

BUS 410-3 Financial Institutions  
 BUS 413-4 Corporate Finance  
 BUS 417-4 Security Analysis  
 BUS 418-3 International Financial Management  
 BUS 419-3 Advanced Derivative Securities

#### Human Resource Management

Students complete one of  
 BUS 374-3 Organization Theory  
 BUS 381-3 Introduction to Human Resource Management

and one of

BUS 482-3 Performance Management  
 BUS 487-3 Organizational Development and Change Management

and three of

BUS 485-3 Negotiations and Conflict Management  
 BUS 432-3 International Human Resources Management  
 BUS 472-3 Seminar in Organizational Behavior  
 BUS 481-3 Recruitment and Selection  
 BUS 484-3 Employment Systems  
 BUS 486-3 Leadership  
 BUS 488-3 Group Dynamics and Teamwork

#### Option A

Students who wish to become a personnel specialist in a human resource function should complete both of  
 BUS 381-3 Introduction to Human Resource Management

BUS 482-3 Performance Management

and three of

BUS 485-3 Negotiations and Conflict Management  
 BUS 432-3 International Human Resources Management  
 BUS 481-3 Recruitment and Selection  
 BUS 488-3 Group Dynamics and Teamwork

#### Option B

Students who wish to develop skills in managing people, including employment systems design, change and organizational leadership, should complete both of

BUS 374-3 Organization Theory  
 BUS 487-3 Organizational Development and Change

and three of

BUS 485-3 Negotiations and Conflict Management  
 BUS 484-3 Employment Systems  
 BUS 486-3 Leadership  
 BUS 488-3 Group Dynamics and Teamwork

### International Business

BUS 346-3 International Business

and one of

BUS 380-3 Comparative Management  
 BUS 432-3 International Human Resources Management

and one of

BUS 434-3 Foreign Market Entry\*  
 BUS 435-3 Management of International Firms

and one of

BUS 431-3 Business with East Asian Countries  
 BUS 492-3 Selected Topics in Business Administration  
 BUS 493-3 Selected Topics in Business Administration  
 BUS 494-3 Selected Topics in Business Administration  
 BUS 495-3 Selected Topics in Business Administration

Students must also complete one of any 400 division international business course that has not previously been used to satisfy the above requirements, or one of

BUS 418-3 International Financial Management  
 BUS 447-3 International Marketing Management

Other upper division courses deemed to have significant international business relevance may, with prior faculty permission, be substituted for the above courses. These may be offered in another faculty.

\*or an approved selected topics course in international business

**Note:** students concentrating in international business are strongly advised to consider combining it with another business concentration.

### Management Information Systems

BUS 361-3 Project Management  
 BUS 362-4 Business Process Analysis  
 BUS 468-3 Managing Information Technology for Business Value

and two of

BUS 462-3 Business Intelligence  
 BUS 464-3 Data Management and IS Audit  
 BUS 466-3 Web-Enabled Business  
 BUS 492-496-3 Selected Topics in Business Administration

### Management of Innovation

BUS 338-3 Managing Technological Innovation  
 BUS 361-3 Project Management

and three of

BUS 450-3 Emerging Technologies for Business  
 BUS 453-3 Sustainable Innovation  
 BUS 452-3 Strategic Management of Innovation  
 BUS 454-3 Creativity in Business

### Management Science

BUS 336-4 Data and Decisions II  
 BUS 473-4 Operations Management

and two of

BUEC 433-5 Forecasting in Business and Economics  
 BUS 437-3 Decision Analysis in Business  
 BUS 440-4 Simulation in Management Decision Making  
 BUS 474-3 Supply Chain Management  
 BUS 492-3 Special Topics in Business Administration (if/when offered with a management science topic)

### Marketing

BUS 343-3 Introduction to Marketing  
 BUS 345-4 Marketing Research  
 BUS 347-3 Consumer Behavior

and three of

BUS 444-3 Business to Business Marketing  
 BUS 445-3 Analysis of Data for Management  
 BUS 446-4 Marketing Strategy  
 BUS 447-3 Global Marketing Management

BUS 448-4 Integrated Marketing Communications  
 BUS 449-3 Ethical Issues in Marketing  
 BUS 459-3 Services Marketing

## Honors Program

After the completion of 15 upper division business administration units, students may apply to enter the honors program. Honors students meet all major program requirements except where specifically modified for joint honors. The honors requires 12 units of 400 division courses beyond the 120 required for the major. These units must be in 400 division BUS or BUEC courses or in other faculties approved in advance by the undergraduate program's executive director. The 12 units are in addition to the area of concentration and major program core courses.

For details about the accounting concentration, which is available to honors students only, see page 145.

In the last 72 units, student complete 57 upper division units, 42 of which are BUS or BUEC.

## Grade Point Averages

For entry, continuance and graduation, the following grade point averages will be used.

- minimum 3.00 cumulative GPA (3.5 for first class honors at graduation)
- minimum 3.00 GPA for upper division BUS courses (3.5 for first class honors at graduation)
- minimum 3.00 GPA for upper division BUEC courses (3.5 for first class honors at graduation)

## Accounting Concentration

See "Accounting (Honors Only)" on page 145 for curriculum for this honors only concentration.

## Honors Term at the Segal Graduate School of Business

The Segal Graduate School of Business enables business administration undergraduate students to complete a 12 unit program fulfilling the honors requirements by completing all of  
 BUS 456-4 Segal Honors Seminar I  
 BUS 457-4 Segal Honors Seminar II  
 BUS 458-4 Segal Honors Seminar III

The honors term at Segal is offered once a year, usually in the fall or spring term. Students may apply after completing 90 units. Applications are available in the undergraduate offices, 2330 Lohn Building.

Each full-time, one-term program emphasizes

- current issues in business and society
- industry interaction
- dialogue and discussion as conduits for student centred learning
- small class sizes

Proposed entrance requirements

- 105 units
- minimum 3.5 cumulative grade point average

Possible themes

- sustainability and business – corporate environmental policy, sustainability and society, management of non-renewable resources, environmental finance and risk management
- ethics and corporate social responsibility – corporate environmental policy, ethics, leadership and scandal in large organizations, CSR as a strategic management tool
- business and globalization – outsourcing, managing the virtual company, globalization and the local business, the role of business in economic development
- management during technological change – HRM in a hi-tech environment, leadership and technological change; entrepreneurship and technological innovation, marketing the new thing

## Minor Program

### Lower Division Requirements

Students complete one of  
 BUEC 232-4 Data and Decisions I  
 STAT 270-3 Introduction to Probability and Statistics  
 and all of  
 BUS 237-3 Introduction to Computers and Information Systems in Business  
 BUS 251-3 Financial Accounting I  
 BUS 254-3 Managerial Accounting I\*  
 BUS 272-3 Behavior in Organizations  
 ECON 103-4 Principles of Microeconomics  
 ECON 105-4 Principles of Macroeconomics  
 and one of  
 MATH 150-4 Calculus I with Review  
 MATH 151-3 Calculus I  
 MATH 154-3 Calculus I for the Biological Sciences  
 MATH 157-3 Calculus for the Social Sciences I

\*may be completed after admission to the faculty

### Upper Division Requirements

If permission is granted to complete any 300 or 400 division BUS or BUEC course before the completion of 60 units, then those courses will not count toward fulfilling the 16 upper division units for the minor.

At least 16 upper division BUS or BUEC units are required including the following.

BUS 312-4 Business Finance  
 BUS 343-3 Introduction to Marketing

and one of

BUS 374-3 Organization Theory  
 BUS 381-3 Introduction to Human Resource Management

## SFU Business@Surrey

*Associate Director*

A.C. Gemino BA, MA, MBA (S Fraser), PhD (BR Col)

The first two BBA study years are similar at both the Burnaby and Surrey campuses since the core courses are common. The first year's preparatory courses form the business studies basis. At Simon Fraser University Surrey, these first year courses are offered through integrated, cohort-based programs in the Faculty of Arts and Social Sciences (Explorations), Faculty of Science (Science List 1 or 2), or Faculty of Communication, Art and Technology (TechOne). Students in these should complete ECON 103, 105, BUS 251, MATH 157 (or MATH 150, 151, or 154) during the first year. Visit <http://business.sfu.ca/bba/the-program/academic/program-requirements/course-planner-surrey.php>

The third and fourth year are also similar at both campuses. Students complete core upper division business courses, at least one area of concentration, and lower and upper division electives. The finance, entrepreneurship, management and technology, and marketing concentrations are offered at the Surrey campus; a concentration not offered in Surrey can be completed at the Burnaby campus.

Business Co-operative Education Program, International Exchange Program, Business Career Management Centre, and Business Student Affairs Office, are available at both campuses.

## Joint Programs

### Common Requirements

All joint major and honors programs require the student to qualify for, and receive admission to the program, and must remain qualified for continuance in the faculty of Business Administration, **and** must be

accepted as a joint major or joint honors in the co-operating department or school.

The Faculty of Business Administration lower division requirements and core courses must be completed, except as specifically modified below (see "Core Courses" on page 145). For joint programs, BUS 360W is recommended but not required. BUS 360W will be waived as a prerequisite for 400 division BUS courses for those in approved BUS joint programs.

With the exception of the joint major and joint honors in molecular biology, biochemistry and business administration (MBB&B), students in joint programs may opt for a degree from either faculty involved. The MBB&B joint major results in a bachelor of science degree from the Faculty of Science. Faculty requirements will be governed by the faculty from which the student chooses to complete a degree.

## Business Administration and Communication Joint Major Program

Students complete at least 32 upper division units in business administration or BUEC courses including the core courses, and the marketing courses specified below.

### Marketing Required Courses

BUS 343-3 Introduction to Marketing  
 BUS 347-3 Consumer Behavior  
 BUS 442-4 Introduction to Marketing Research  
 and at least one of the following  
 BUS 445-3 Analysis of Data for Management  
 BUS 446-4 Marketing Strategy  
 BUS 448-4 Advertising and Sales Promotion  
 BUS 449-3 Ethical Issues in Marketing

### Communication Lower Division Requirements

CMNS 110-3 Introduction to Communication Studies  
 CMNS 130-3 Explorations in Mass Communication  
 and six 200 division CMNS courses for a total of 24 units in communication including both of  
 CMNS 221-3 Media and Audiences  
 CMNS 223-3 Advertising as Social Communication  
 and at least two of  
 CMNS 260-3 Empirical Communication Research Methods  
 CMNS 261-3 Documentary Research in Communication  
 CMNS 262-3 Design and Method in Qualitative Communication Research

### Communication Upper Division Requirements for Marketing Concentration

Students complete six courses (minimum 24 units) of upper division courses in communication including  
 CMNS 323-4 Cultural Dimensions in Advertising  
 CMNS 425 is recommended but not required.

Directed studies (readings) and field placement credit will not count as part of the upper division units that are required by communication for the joint major.

## Business Administration and Economics Joint Major Program

Students complete at least 29 upper division units in business administration or BUEC,\* including the core courses with the following exceptions.

- BUS 207 and 303 are waived.
- BUEC 333, which must be completed, will count as upper division economics units rather than as upper division business administration units.

Three courses beyond the core must be completed within the requirements of a single concentration.

At least two 400 division BUS or BUEC courses\* (excluding practicum courses and BUS 478)

\*may be within the area of concentration.

Students must also complete at least 25 upper division units in economics or BUEC\* including

ECON 301-4 Microeconomic Theory I: Competitive Behavior

ECON 302-4 Microeconomic Theory II: Strategic Behavior

ECON 305-5 Intermediate Macroeconomic Theory and at least one 400 division economics or BUEC\* course (excluding ECON 431, 435, BUEC 433 and 485).

### Economics Group Requirements

Students complete one of

ECON 102-3 The World Economy

ECON 104-3 Economics and Government

ECON 110-3 Foundations of Economic Ideas

ECON 208-3 History of Economic Thought

ECON 250-3 Economic Development in the Pre-Industrial Period

ECON 309-3 Introduction to Marxian Economics

ECON 353-4 Economic History of Canada

ECON 354-3 Comparative Economic Institutions

ECON 355-4 Economic Development

ECON 404-3 Honors Seminar in Methodology of the Social Sciences

ECON 409-3 Seminar in Economic Thought

ECON 450-3 Seminar in Quantitative Economic History

ECON 451-3 Seminar in European Economic History

ECON 452-3 Economic Prehistory

ECON 453-3 The Economics of Education

ECON 455-3 Seminar in Economic Development

ECON 490-3 Seminar in Public Choice

\*BUEC courses may count only once as business administration units or as economics units.

### Business Administration and Geography Joint Major Program

#### Business Administration Requirements

The student must successfully complete the core courses and complete one additional 400 division course in the Faculty of Business Administration.

#### Geography Requirements

The student must successfully complete a minimum of 15 lower division geography units including

GEOG 100-3 Human Geography

GEOG 111-3 Earth Systems

GEOG 221-3 Economic Geography

The student must successfully complete a minimum of 24 units of upper division geography courses including the following.

12 units at the 300 division courses

12 units at the 400 division courses

### Business Administration and Latin American Studies Joint Major Program

#### Business Administration Requirements

The student must successfully complete the core courses plus BUS 346 and two of the following.

BUS 380-3 Comparative Management

BUS 432-3 International Human Resource Management

BUS 434-3 Foreign Market Entry

BUS 435-3 Management of International Firms

BUS 439-3 North American International Trade Issues

BUS 447-3 International Marketing Management

With the permission of the international business area co-ordinator and the faculty, another course may be substituted for one the five listed above.

### Latin American Studies Requirements

#### Lower Division

Students must demonstrate reading and speaking competence in Spanish or Portuguese equivalent to successful completion of three college level courses.

A minimum of 12 units is required including LAS 200-3 Introduction to Latin American Issues

plus any two of

ARCH 273-3 Archaeology of the New World

HIST 208-3 Latin America: The Colonial Period

HIST 209-3 Latin America: The National Period

plus one of

BUS 130-3 Business in the Networked Economy I

CMNS 110-3 Introduction to Communication Studies

CMNS 130-3 Explorations in Mass Communication

ECON 102-3 The World Economy

ECON 110-3 Foundations of Economic Ideas

GEOG 100-3 Human Geography

GEOG 111-3 Physical Geography

POL 100-3 Introduction to Politics and Government

REM 100-3 Global Change

SA 101-4 Introduction to Anthropology (A)

SA 150-4 Introduction to Sociology (S)

#### Upper Division

Students complete 20 upper division units in Latin American studies including

LAS 498-5 Capstone Project

The remaining 15 units must come from the approved list of courses with primary LAS focus (see "Courses with Primary Latin American Focus" on page 123).

### Molecular Biology and Biochemistry and Business Administration Joint Major Program

See "Molecular Biology and Biochemistry and Business Administration Joint Major Program" on page 202.

### Business Administration and Psychology Joint Major Program

#### Business Administration Requirements

- successful completion of at least one 400 division management and organization studies course
- completion of the business administration core courses, except with advance permission of the Faculty of Business Administration, the combination of PSYC 210 and 301 may be substituted for the combination of BUEC 232\* and BUS 336.

#### Psychology Requirements

##### Lower Division Requirements

all of

PSYC 100-3 Introduction to Psychology I\*

PSYC 102-3 Introduction to Psychology II\*

PSYC 201-4 Introduction to Research Methods in Psychology\*

PSYC 207-3 Introduction to the History of Psychology\*

PSYC 210-4 Introduction to Data Analysis in Psychology\*

PSYC 260-3 Introduction to Social Psychology

PSYC 268-3 Introduction to Law and Psychology

\*to be admitted to the psychology program, students must obtain a final course grade of C (2.0) or better in each of these courses.

**Note:** The above requirement applies to courses transferred from other institutions as well as to courses completed at Simon Fraser University.

Students complete one of

PSYC 221-3 Introduction to Cognitive Psychology

PSYC 241-3 Introduction to Abnormal Behavior

PSYC 250-3 Introduction to Developmental Psychology

PSYC 270-3 Introduction to Theories Personality

PSYC 280-3 Introduction to Biological Psychology

#### Upper Division Requirements

Students complete 21 units in upper division psychology courses. No more than five of these units may be in directed studies. At least 11 upper division psychology units must be completed at Simon Fraser University.

**Note:** students must complete either BUEC 232\* and BUS 336 or PSYC 210 and 301. Students who complete BUS 336 must still fulfil a minimum of 21 upper division psychology units. Students who complete PSYC 301 must still fulfil a minimum of 24 upper division units in business administration.

### Business Administration and Economics Joint Honors Program

#### Economics Group Requirements

To meet the Department of Economics group requirements for the economics major program, students must include at least one course from the economics group requirements. For information, see "Group Requirements" on page 105.

#### Lower Division Requirements

The requirements are the same as for the joint major in business administration and economics.

#### Upper Division Requirements

- at least 35 upper division units in business administration including the core courses
- an area of concentration
- at least three 400 division courses (excluding practicum courses and BUS 478). These courses may be within the area of concentration.
- plus at least 30 upper division units in Economics or BUEC including all of

BUEC 333-4 Statistical Analysis of Economic Data  
ECON 301-4 Microeconomic Theory I: Competitive Behavior

ECON 302-4 Microeconomic Theory II: Strategic Behavior

ECON 305-5 Intermediate Macroeconomic Theory

ECON 331-5 Introduction to Mathematical Economics\*\*

plus one of

ECON 402-3 Advanced Topics in Microeconomics

ECON 403-3 Advanced Topics in Macroeconomics

and one of

ECON 435-5 Quantitative Methods in Economics

ECON 499-6 Honors Seminar in Economics

\*these courses may be within the areas of concentration

\*\*joint honors students who have successfully completed both MATH 323 and 251 need not complete ECON 331. However, at least 30 upper division units in economics must still be completed.

#### Grade Point Averages

For entry, continuance and graduation with a BBA, the following grade point averages will be used.

- minimum 3.00 cumulative GPA (3.5 for first class honors at graduation)
- minimum 3.00 GPA for upper division BUS courses (3.5 for first class honors at graduation)
- minimum 3.00 GPA for upper division BUEC courses (3.5 for first class honors at graduation)
- minimum 3.00 GPA for upper division ECON courses (3.5 for first class honors at graduation)

For information about required grade point averages for the BA credential, see "Grade Point Averages Needed for Graduation" on page 31.

## Information Systems in Business Administration and Computing Science Joint Major Program

Students must qualify for and receive admission to, and must remain qualified for continuance in, the Faculty of Business Administration, and must be accepted as a computing science joint major.

### Lower Division Requirements

Students complete one of  
BUEC 232-4 Data and Decisions I  
STAT 270-3 Introduction to Probability and Statistics

and either

CMPT 126-3 Introduction to Computer Science and Programming

or both of

CMPT 120-3 Introduction to Computing Science and Programming I

CMPT 125-3 Introduction to Computing Science and Programming II

and all of

BUS 251-3 Financial Accounting I

BUS 254-3 Managerial Accounting I

BUS 272-3 Behavior in Organizations

CMPT 150-3 Introduction to Computer Design

CMPT 225-3 Data Structures and Programming

CMPT 275-4 Software Engineering

ECON 103-4 Principles of Microeconomics

ECON 105-4 Principles of Macroeconomics

MACM 101-3 Discrete Mathematics I

MACM 201-3 Discrete Mathematics II

and one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

MATH 157-3 Calculus for the Social Sciences I

and one of

MATH 152-3 Calculus II

MATH 158-3 Calculus for the Social Sciences II

ENGL 199-3 University Writing

PHIL 100-3 Knowledge and Reality

PHIL 120-3 Introduction to Moral Philosophy

### Upper Division Requirements

all of

BUS 312-4 Introduction to Finance

BUS 336-4 Data and Decisions II

BUS 343-3 Introduction to Marketing

BUS 364-3 Information Systems in Organizations and Society

BUS 468-3 Management Issues in Information Systems

BUS 478-3 Seminar in Administrative Policy

CMPT 300-3 Operating Systems

CMPT 307-3 Data Structures and Algorithms

CMPT 320-3 Social Implications of a Computerized Society

CMPT 354-3 Database Systems and Structures

CMPT 370-3 Information System Design

and one of

BUS 374-3 Organization Theory

BUS 381-3 Introduction to Human Resource Management

and one of

BUS 466-3 Managing Data Communications

CMPT 371-3 Data Communications and Networking

plus nine additional upper division CMPT units,

excluding CMPT 301. At least one of the courses

must be at the 400 division or above.

Upon completion of these requirements, students may choose either a BBA degree (offered by the Faculty of Business Administration), or a BSc degree (offered by the Faculty of Applied Sciences) with the completion of two additional specific courses. See "Information Systems in Business Administration and Computing Science Joint Major Program" on page 81 regarding the BSc requirements for joint majors.

## Interactive Arts and Technology and Business Administration Joint Major Program

For information, see "Interactive Arts and Technology and Business Administration Joint Major Program" on page 148.

## Molecular Biology and Biochemistry and Business Administration Joint Honors Program

For information, see "Molecular Biology and Biochemistry and Business Administration Joint Honors Program" on page 202.

## Second Bachelor's Degree

Please see "Second Bachelor's Degrees" on page 7.

The minimum requirements for completion of a second undergraduate degree in business administration (BBA) are as follows.

- formal admission to the program
- lower division course requirements
- writing, quantitative and breadth requirements (see "English Language and Literacy Admission Requirement, and Quantitative and Analytical Skills Requirement" on page 17 and "Quantitative and Analytical Skills Requirements" on page 19)
- 45 upper division units, of which 36 must be business administration (BUS) or business administration/economics (BUEC)
- 36 upper division BUS or BUEC units which must include core courses, an area of concentration and the 400 division requirement

See "Major Program" on page 144 for information.

## Certificate in International Experiential Learning

Students are required to complete a minimum of 18 units which are earned through the following three activities.

- participation in two international activities, one of which must be a study semester abroad as an exchange student at a Faculty of Business Administration preferred partner institution

- completion of two three-unit language courses in a second language other than English, commonly spoken in the region in which either one of the international activities will take place, and
- completion of a three unit courses, the topic of which will relate to the socio-economic and/or cultural environment in which the international activities will take place.

## Exchange and International Experience Component

Students will be required to complete one semester of at least nine units on an international exchange at a Faculty of Business Administration preferred partner institution. For the second international activity, students will have the option of the following.

- a second international exchange at the same or another Faculty of Business Administration preferred partner institution
- a Faculty of Business Administration sponsored field school; or
- an international co-operative education work term

Although students will be encouraged to choose one region or country to fulfil these requirements, they will have the option to enrol in international exchanges, field schools or co-operative education in countries or regions that are different from their first exchange.

## Language Component

To increase exposure to the local culture, students will be required to complete two three-unit courses in a language(s) of the region (preferably the host country) in which the exchange, Faculty of Business Administration sponsored field school or international co-operative education work term will take place. Students attending an international activity in an English-speaking country till have to select a second language that is commonly spoken in the region. These courses may be completed at Simon Fraser University, or at any institution of the student's choosing, provided that Simon Fraser University accepts the course as transfer credit, and the course could be completed during the exchange term abroad, or the international co-operative education work term. The purpose of this requirement is to strengthen the student's ability to communicate in the host country's language. Students who are already fluent in a language of the region may fulfil the language requirement by pursuing a third language, or by completing business courses that are taught in their second language.

## Socio-economic and/or Cultural Course

Prior to the exchange term, students will be required to complete, at Simon Fraser University, one of the following courses (or other courses with appropriate content and prior approval from the Faculty). Note that some of these courses may have prerequisites.

*For students in the Asia region*

ASC 200-3 Introduction to Chinese Culture

ASC 201-3 Introduction to Japanese Culture

ASC 202-3 Asian Cultures

HIST 206-3 Modern Japan

HIST 256-3 People's Republic of China

POL 335-4 Government and Politics: People's Republic of China

POL 381-4 Politics and Government of Japan

SA 275-4 Asian Societies

*For students in the Europe Region*

HIST 225-3 20th Century Europe

POL 333-4 Soviet and Post-Soviet Political Systems

POL 334-4 East European Political Systems

*For students in the Latin America region*

HIST 208-3 Latin America: The National Period

POL 320-4 Canada and Latin America

POL 337-4 Government and Politics: Latin America  
SA 392-4 Latin America

Alternatively, students may complete a similar course while studying abroad on an exchange semester at the host institution, with prior approval from the Faculty.

Although the Faculty of Business Administration promotes the institutions listed on this page through travel subsidies, students are not restricted to these universities. In addition to those listed here, Simon Fraser University has exchange agreements with many more institutions. For more information about application deadlines, etc., please contact SFU International or see [www.sfu.ca/international](http://www.sfu.ca/international).

## Field School Programs

A field school can be described as an extended field trip, group study tour, or an off-campus delivery of Simon Fraser University courses for a group of 12-20 students. Each field school is a full term program, directed by a Simon Fraser University instructor, consisting of nine to 12 units of selected courses delivered through course work, assignments, and field studies beginning at a Simon Fraser University campus and then traveling overseas to one or more locations. Tuition, shared accommodation, basic health insurance, and field excursions are included in the cost of the field school.

## Co-operative Education

2310 Lohn Building, 778.782.3619 Tel, 778.782.5922 Fax, [www.sfu.ca/coop](http://www.sfu.ca/coop)

### Program Director

S. Tonsaker BA (S Fraser), 2317 Lohn Building, 778.782.4993 Tel, 778.782.5922 Fax

The Faculty of Business Administration offers co-operative education to students including Simon Fraser University Surrey. Co-operative education formally integrates a student's academic studies on campus with relevant work experience. Employers from business, industry and government support and participate in the program. This 'hands-on' approach to education extends the learning process beyond the limits of the classroom and into the working world by

alternating full time study terms with full time paid work terms of career-related practical experience.

For those seeking a professional accounting designation (CA, CGA, CMA) arrangements have been made with respective accounting organizations so that work experience obtained during the program may be recognized toward the required practical experience.

## Admission

Admission to the Faculty of Business Administration is required before intake to the co-operative education program is considered.

A student must remain in good academic standing in the Faculty of Business Administration to continue in the program.

Co-op programs are open to Canadian citizens, permanent residents, and visa students.

## Application Process

Co-operative education has an application process which includes completing the Bridging Online (BOL) course. Refer to [www.sfu.ca/coop/bol](http://www.sfu.ca/coop/bol). BOL must be completed prior to your business co-op intake.

## Practicum Course Requirements

To qualify for the bachelor of business administration with a major in business administration and a co-operative education designation, students must meet University and Faculty of Business Administration graduation requirements.

In addition, students who choose the chartered accountancy option must complete three work terms. A co-operative education designation requires four work terms and a certificate requires three work terms.

During study terms a student must maintain full time status. A brochure which outlines program features is available from the business administration co-op education program co-ordinators.

## Business Career Management Centre

### Associate Director

L. Dalla Vecchia, 2320 Lohn Building, 778.782.5544 Tel, 778.782.3028 Fax, [bbcareers@sfu.ca](mailto:bbcareers@sfu.ca), [www.sfu.ca/business/careers](http://www.sfu.ca/business/careers)

The Business Career Management Centre offers resources and services to assist undergraduate and graduate students in the Faculty of Business Administration with preparation for business careers. One-on-one career counselling and advising, career workshops, company information sessions, on-campus recruitment activities, and the annual Business Career Expo provide opportunities to meet and network with employers. Extensive career-related resources are available at the centre and online at [www.sfu.ca/business/careers](http://www.sfu.ca/business/careers). Simon Fraser University business students and alumni have access to full time, part time, ongoing, temporary and volunteer work opportunities via Career Network at [www.business.sfu.ca/careers](http://www.business.sfu.ca/careers)

Faculty members are also available for consultations.

The school offers specialized programs leading to a  
bachelor of arts degree. It also offers a minor and a  
variety of courses. The school is interdisciplinary and  
international in its approach and offers study in three  
broad and interrelated areas of concentration (see  
below) but students may complete courses from more  
than one area. (Courses may be listed in more than  
one area.)

## Media and Culture

CMNS 200, 210, 220, 221, 223, 226, 230, 235, 240,  
258, 304, 310, 320, 321, 323, 324, 325, 326, 331,  
347, 348, 358, 363, 410, 423, 424, 425, 426, 428,  
431, 437, 443, 444, 445, 447, 448, 452

## Technology and Society

CMNS 210, 253, 258, 259, 342, 346, 347, 353, 354,  
358, 359, 362, 408, 446, 447, 453, 454, 455, 456, 458

## Political Economy and Policy

CMNS 210, 230, 235, 240, 310, 323, 331, 333, 334,  
336, 342, 346, 353, 354, 371, 410, 431, 433, 435,  
437, 438, 443, 444, 445, 446, 455

## Enrolment Limitations and Admission

Admission to all of the school's programs is based on  
cumulative grade point average (CGPA), and  
available places. Space in CMNS courses is mostly  
reserved for those with formal program acceptance.  
Every CMNS program applicant whose CGPA is  
greater than, or equal to, the annually announced  
requirement will be admitted. These requirements  
also apply to a transfer or second degree students.

CMNS course enrolment requires a C- grade or better  
in each prerequisite course. A minimum 2.25 CGPA  
and approval as a communication honors, major,  
extended minor, minor, dialogue, or publishing minor  
is required for entry into most communication upper  
division courses.

Transfer students are advised that residency  
requirements apply to all communication programs.

## Writing, Quantitative and Breadth Requirements

Students completing degree programs must fulfil  
writing, quantitative and breadth requirements as part  
of their program. See "Writing, Quantitative, and  
Breadth Requirements" on page 7 for information.

## Major Program

Program entry is via direct admission from high  
school, via college or university transfer, or via  
internal transfer if admitted to another Simon Fraser  
University department or program. At the time of  
printing, entry from high school requires a 75% or  
better CGPA; college or university transfer requires a  
CGPA of 3.00 (B; 75%) or better; and internal  
University transfer requires a 2.50 or better CGPA,  
upon completion of lower division requirements (see  
below). A minimum 2.25 CGPA is required to remain  
in the program.

## Lower Division Requirements

A grade of C- or better is *mandatory* in each of the  
required lower division CMNS courses below.

Students complete both of  
CMNS 110-3 Introduction to Communication Studies  
CMNS 130-3 Explorations in Mass Communication  
(or 130W)

and at least six 200 division CMNS courses (18 units),  
including at least two of  
CMNS 260-3 Empirical Communication Research  
Methods\*

CMNS 261-3 Documentary Research in  
Communication

CMNS 262-3 Design and Method in Qualitative  
Communication Research

\*completion of this quantitative (Q) course satisfies  
half of the University's Q requirement for students  
admitted in fall 2006 or later

*Media and Culture Concentration*  
and one of†

CMNS 220-3 Understanding Television

CMNS 221-3 Media and Audiences

CMNS 223-3 Advertising as Social Communication  
(or 223W)

CMNS 235-3 Introduction to Journalism in Canada

†to satisfy the University's upper division Writing  
requirement, students may choose to complete either  
CMNS 304W or 323W, in which case the  
prerequisites for either of these is **two** of CMNS 220,  
221, 223 (or 223W).

*Political Economy and Policy Concentration*  
and one of

CMNS 230-3 The Cultural Industries in Canada:

Global Context

CMNS 240-3 The Political Economy of  
Communication

*Technology and Society Concentration*  
and one of

CMNS 210-3 Media History

CMNS 253-3 Introduction to Information Technology:  
The New Media (or 253W)

## Upper Division Requirements

A minimum total of 45 upper division units is required.  
This includes the required upper division CMNS  
courses, any additional upper division CMNS courses  
completed, and any upper division courses completed  
to fulfil the required 40 units outside the school (see  
"External Requirements" on page 150).

Students complete seven upper division CMNS  
courses (at least 28 units), at least two of which are  
400 CMNS division courses. Directed study and field  
placement courses may not be used to meet this  
requirement. Students may enrol in upper division  
courses only when prerequisite have been  
completed.

Students who were admitted in fall 2006 or later are  
strongly urged to complete CMNS 363 because this  
six unit quantitative course satisfies the University's  
entire Q requirement. Also, CMNS 304W or 323W are  
strongly recommended because the completion of  
one of these courses will entirely satisfy the  
University's upper division writing requirement.

## External Requirements

In addition to the specified CMNS courses, students  
complete at least 40 units from disciplines other than  
communication including the following.

- 12 units minimum from Asia-Canada, contemporary arts, English, First Nations, French, general studies, history, humanities, Latin American development studies, linguistics, philosophy, Spanish or other languages; **or** to partially satisfy the University's breadth requirements (see "Writing, Quantitative, and Breadth Requirements" on page 7), two three-unit breadth-humanities and two three-unit breadth-social sciences courses with a minimum C- grade in each
- two science courses totalling six units; **or** to partially satisfy the University's breadth requirements (see "Writing, Quantitative, and Breadth Requirements" on page 7), two three-unit breadth-science courses with a minimum C- grade in each
- two upper division courses (minimum three units each) chosen from any department outside the school

Note that no course may be used to satisfy more than one of the above three requirements; for example, an upper division breadth-science course may be used as one of the two science courses required, or one of the two upper division non-CMNS courses required, but not both.

## Honors Program

Application forms are available from the general office and at [www.cmns.sfu.ca](http://www.cmns.sfu.ca). *The deadlines are March 15, July 15 and November 15.*

## Program Requirements

Students complete 132 total units including at least 60 upper division units, all of the communication major requirements, all with minimum CGPAs of 3.00 (overall and within the School of Communication; cumulative and at the upper division), and must include the following courses. Students who do not meet this CGPA requirement may be dropped from the program but may apply for readmission at a later date.

Students complete one of  
CMNS 362-6 Evaluation Methods for Applied Communication Research  
CMNS 363-6 Approaches to Media and Audience Research

As well, students produce an honors project by completing both of  
CMNS 497-5 Honors Research Proposal  
CMNS 498-10 Honors Research Project

Students must have completed at least 90 units with at least 20 in upper division communication before enrolling in the honors project. A plan must be approved by the faculty supervisors and the honors co-ordinator before work is begun. A pamphlet describing the honors project requirements can be obtained from the school's general office.

The school reserves the right to limit the number of honors students if faculty supervision resources are not available; priority will be given to those with a higher CGPA. Students who have difficulty finding an honors supervisor should contact the school's honors co-ordinator.

## Graduation Requirements

To receive honors in communication, students must

- meet the graduation requirements of the communication major program
- meet the honors graduation requirements of the University and the Faculty of Communication, Art and Technology including at least 60 upper division units
- successfully complete an honors project (CMNS 497 and 498)
- obtain certification by an undergraduate advisor of satisfactory program completion.

## Communication Minor Program

Admission is subject to enrolment limitations. Applicants will have a minimum 2.50 CGPA or transfer GPA upon lower division requirements completion. A minimum 2.25 CGPA is required to remain in good standing. Those who do not maintain this requirement may be dropped from the program, but may apply for readmission at a later date.

## Lower Division Requirements

Students complete, with a C- grade or better, both of  
CMNS 110-3 Introduction to Communication Studies  
CMNS 130-3 Explorations in Mass Communication

## Upper Division Requirements

Students complete four upper division CMNS courses (and the lower division prerequisites, if any). Directed study and field placement courses may not be used to meet this requirement.

## Dialogue Minor Program

Admission is subject to enrolment limitations. Applicants will have a minimum 3.00 CGPA or transfer CGPA upon completion of 50 units at Simon Fraser University and/or transfer units. A minimum 2.75 CGPA is required to remain in good standing. Those who do not maintain this requirement may be dropped from the program, but may apply for readmission at a later date.

## Upper Division Requirements

Students complete a total of 19 upper division units, including either Path A or B (see below), and one of  
CMNS 460-4 Seminar in Dialogue and Public Issues  
DIAL 460-4 Seminar in Dialogue and Public Issues

### Path A

In addition to the requirements listed above, students choosing this path must also complete all of  
DIAL 390-5 Undergraduate Semester: Dialogue  
DIAL 391-5 Undergraduate Semester: Seminar  
DIAL 392-5 Undergraduate Semester: Seminar

### Path B

In addition to the requirements listed above, students choosing this path must also complete one of  
CMNS 461-3 Field Placement in Dialogue  
DIAL 461-3 Field Placement in Dialogue

and three of  
CMNS 332-4 Communication and Rhetoric  
CMNS 347-4 Communication in Conflict and Intervention  
CMNS 425-4 Applied Communication for Social Issues  
CMNS 432-4 Public Opinion, Propaganda, and Political Communication  
CMNS 437-4 Media Democratization: From Critique to Transformation  
CMNS 447-4 Negotiation and Dialogue as Communication

Prerequisites for the above-mentioned CMNS courses may be waived for Dialogue minor students in consultation with the undergraduate advisor.

Upper division CMNS courses completed for the Dialogue minor may not count as part of the CMNS units for an honors, joint major, major, extended minor or minor (in communication or publishing).

## Publishing Minor Program

Admission is subject to enrolment limitations. Applicants will have a minimum 2.50 CGPA or transfer GPA upon lower division requirements completion. A minimum 2.25 CGPA is required to remain in good standing. Those who do not maintain this requirement may be dropped from the program, but may apply for readmission at a later date.

## Lower Division Requirements

Students complete four of the following, each with a C- grade or better. No more than two from each discipline are permitted for credit.

CMNS 110-3 Introduction to Communication Studies  
CMNS 130-3 Explorations in Mass Communication  
CMNS 230-3 Introduction to Communication Media  
CMNS 240-3 The Political Economy of Communication  
ECON 103-4 Principles of Microeconomics  
ECON 105-4 Principles of Macroeconomics  
ENGL 210-3 Writing and Critical Thinking  
LING 100-3 Communication and Language  
LING 110-3 The Wonder of Words  
LING 160-3 Language, Culture, and Society

## Upper Division Requirements

Students complete four of  
CMNS 371-4 The Structure of the Book Publishing Industry in Canada  
CMNS 372-4 The Publishing Process  
CMNS 375-4 Magazine Publishing  
CMNS 437-4 Media Democratization: From Critique to Transformation  
CMNS 472-4 Books, Markets and Readers  
CMNS 473-4 Publication Design and Print Production  
CMNS 474-4 The Business of Publishing  
CMNS 478-4 Publishing Project Group

Upper division CMNS courses completed for the publishing minor may not be used toward the school's honors, joint major, major, extended minor or minor programs.

## Communication Extended Minor Program

This program, along with another extended minor in a relevant department, may be completed as part of a Faculty of Arts and Social Sciences BA degree. See "Extended Minor Program" on page 89.

Admission is subject to enrolment limitations. Applicants will have a minimum 2.50 CGPA or transfer GPA upon completion of the lower division requirements. A minimum 2.25 CGPA is required to remain in good standing. Those who do not maintain this requirement may be dropped from the program, but may apply for readmission at a later date.

## Lower Division Requirements

Students complete the same lower division requirements as for the school's major program. See "Lower Division Requirements" on page 150.

## Upper Division Requirements

Students complete four upper division CMNS courses (and the lower division prerequisites, if any). Directed study and field placement courses may not be used to meet this requirement.

## Communication and Business Administration Joint Major Program

See "Business Administration and Communication Joint Major Program" on page 146 for requirements.

## Communication and Canadian Studies Joint Major Program

See "Joint Major Programs" on page 96 for requirements.

## Communication and Interactive Arts and Technology Joint Major Program

See "Communication and Interactive Arts and Technology Joint Major Program" on page 160.

## Communication and Latin American Studies Joint Major Program

See "Joint Major Programs" on page 122.

## Communication and Sociology/Anthropology Joint Major Program

See "Sociology or Anthropology and Communication Joint Major Program" on page 135 for requirements.

## Post Baccalaureate Diploma in Communication

This is for those who have completed a degree.

### Requirements

Successful completion of approved 30-32 units of upper division or graduate courses (normally eight four-unit courses numbered 300 or above) is required. Courses are selected with advisor consultation. At least five of the upper division courses (20 units) must be in communication; the remaining 10-12 units could be in related disciplines, such as sociology, Canadian studies, history, English, women's studies, etc.

Some other lower division courses may be required in preparation for the advanced courses. For example, a student who has a BA in an area not related to communication would be encouraged to complete at least CMNS 110 and/or 130 before enrolling in any of the 300 and 400 division courses.

For information, see "Post Baccalaureate Diploma Program" on page 7.

## Co-operative Education

Co-op education combines work experience with academic studies. The student spends alternate terms on campus and in paid, study-related jobs.

Arrangements for the work experiences are made through the school's co-op co-ordinators and the University's Office of Co-operative Education. See "Co-operative Education" on page 212.

## School for the Contemporary Arts

Room 600 SCA, 778.782.3363 Tel,  
778.782.5907 Fax, www.sfu.ca/sca, ca@sfu.ca

### Director

M.S. Gotfrit BA (C'dia), MA (McG) – music

### Professors Emeriti

S.A. Aloï BA (Cornell), MA (Col) – dance  
G. Strate BA, LLB (Alta) – dance

### Professors

C.V.A. Browne BA (RMC), MA (S Fraser) – film  
A. Clay BFA (Nova Scotia Art & Des), MFA (Br Col) – visual art  
M.S. Gotfrit BA (C'dia), MA (McG) – music  
D.K. MacIntyre BMus, MMus (Vic, BC) – music  
O. Underhill BMus (Vic, BC), MA (NY State) – music  
C. Welsby BA (Lond Inst) – film  
J. Yoon BA (Br Col), BFA (Emily Carr), MFA (C'dia) – visual art

### Associate Professors

H. Daniel MA (City University, London, UK), PhD (Brist) – dance  
A. Eigenfeldt BMus (Br Col), MA (S Fraser), DM (Northwestern) – music  
M. Eist BA (American DC), MFA (NY) – dance  
J. Garay – dance  
P. Gruben BA (Rice) – film  
D.D. Kugler BA (Ohio Northern), MFA (York, Can) – theatre  
J. Levitin BA, MA (Wash), PhD (NY State) – film\*\*  
L. Marks BA (Swarthmore), MA, PhD (Roch), Deana Wosk Professor in Art and Culture Studies  
J. Radul BA (S Fraser), MFA (Bard) – visual art  
P. Stella AB (Ill) – theatre

### Assistant Professors

S. Hill MFA (York, Can) – theatre  
R. Kitsos BA (Bard), MFA (Wash) – dance  
D. Oleksijczuk BA, MA (Tor), PhD (Br Col) – art and culture  
C. Pavsek BA (Cornell), PhD (Duke) – film

### Senior Lecturers

R. Groeneboer BA (Calvin Coll, Michigan), MSc (Wis) – film  
G. Harris – production and design, technical theatre  
B. Hegland BA (Leth), MFA (Ill) – production and design, technical theatre  
J.A. Macfarlane BA (Reed) – production and design, technical theatre  
C. Prophet BA (York, Can) – dance

### Laboratory Instructors

T. Kerr – film  
A. Smith – dance, music

### Advisor

Mr. D. Lastoria BA (S Fraser), CA 601, 778.782.3363, ca\_advisor@sfu.ca

\*joint appointment with communication  
\*\*joint appointment with women's studies

The school is committed to the study, production and promotion of contemporary art.

The school's philosophy is that the theory and practice of art, the doing and thinking, cannot be separated: all programs within the school, therefore, combine theoretical and critical study with practical experience. Theoretical and critical studies include the historical development of and the interrelationships among the arts, the process of art-making, and the relationship between art and the world within which it is made. Practical experience is available within studio or laboratory courses, and students are encouraged to acquire additional practical experience by participating in extracurricular productions, exhibitions or performances.

The school offers general interest courses and sponsors a variety of public events in order to make contemporary art more accessible to, and to provide cultural activities for, the wider community.

## Admission Requirements

Program and course admission is contingent upon University admission. Contact Student Services for admission procedures, requirements and deadlines. Entry to all programs and to many courses is by audition, interview or application. Contact the school's office for information on procedures and deadlines.

Although the University operates on a trimester system, most FPA courses are planned in a two term (fall and spring) sequence. Consequently, students enter in the fall term (September) and are advised to contact the school in the preceding January for program entry and requirements information.

## Transfer Credit and Advanced Standing

Unassigned or general elective (type 2 and 3, respectively) transfer credit awarded for courses completed at other recognized post-secondary institutions will not automatically entitle students to advanced standing in the school's programs. Advanced standing is generally given on an individual basis as a result of an audition or interview.

## Programs Offered

The school offers the following programs.

major in art and culture studies (BA)  
major in dance (BFA)  
major in film (BFA)  
major in music (BFA)  
major in theatre (BFA)  
major in visual art (BFA)  
joint major in art and culture studies and anthropology  
joint major in art and culture studies and sociology  
extended minor in dance  
extended minor in film  
extended minor in music  
extended minor in theatre  
extended minor in visual arts  
minor in art and culture studies  
minor in fine and performing arts  
minor in film and video studies  
master of fine arts (see page 280)

## About the School's Course Offerings

Students are encouraged to take advantage of interdisciplinary offerings within the school. As many programs depend on a continuing sequence of courses completed in order, students should plan carefully to gain the maximum benefit and efficiency from their study. Note that not all courses are offered every term and several are offered on a rotational basis, i.e. every third or fourth term. An advisor is available to help plan study programs.

Students are reminded that the school is an interdisciplinary fine and performing arts department, and are strongly advised to acquaint themselves with the many disciplinary courses that are available.

## Non-Specialist FPA Courses

The following FPA courses may be of particular interest to students in other departments.

School-wide courses: FPA 319W  
art and culture studies: FPA 111, 210, 289, 310, 311, 312, 313, 314, 389, 411, 412, 414, 416  
dance: FPA 120, 129, 226, 227, 228W, 229  
film: FPA 136, 137, 235, 236, 237, 238, 335, 337, 338, 436  
music: FPA 104, 140, 243, 249, 341  
theatre: FPA 150, 151, 170, 171, 257, 259, 270, 357  
visual art: FPA 160, 161, 167, 168

## Special Topics Courses

The subject matter (and prerequisites) of special or selected topics courses vary by term.

## Prior Approval Prerequisite

Where a prerequisite is or includes 'prior approval,' approval must be obtained before enrolling in the course. Contact the school for further information.

## Courses Divided by Discipline

FPA course disciplines are indicated by the middle digit of the course number.

0, 8 interdisciplinary or school-wide  
1 art and culture studies  
2 dance  
3 film

- 4 music
- 5 performance stream in theatre
- 6 visual art
- 7 production stream in theatre
- 9 video (film)

Examples: FPA 120 – dance; FPA 140 – music; FPA 111 – art and culture studies

### Suggested Courses for Interdisciplinary Requirements

For clarification, the courses listed below are the offerings from individual areas available to students in the school requiring units in other disciplines, either in studio or in theory/history. Students from the university at large may also find these courses of interest. Students are also advised that some of the courses listed below may have prerequisites.

#### Lower Division Theory and History Courses

- FPA 104-3 Music Fundamentals
- FPA 111-3 Issues in the Fine and Performing Arts
- FPA 136-3 The History and Aesthetics of Cinema I
- FPA 137-3 The History and Aesthetics of Cinema II
- FPA 140-3 Music After 1900
- FPA 167-3 Visual Art and Culture I
- FPA 168-3 Visual Art and Culture II
- FPA 210-3 Artworks, Theories, Contexts
- FPA 227-3 History of Dance: From the 20th Century to the Present
- FPA 228W-3 Dance Aesthetics
- FPA 229-3 Selected Topics in Dance I\*
- FPA 235-3 Experimental Film and Video
- FPA 236-3 Cinema in Canada
- FPA 237-3 Selected Topics in Film and Video
- FPA 244-3 Theory of Contemporary Music
- FPA 249-3 Selected Topics in Music I\*
- FPA 257-3 Context of Theatre I
- FPA 269-3 Selected Topics in Visual Arts I\*
- FPA 289-3 Selected Topics in the Fine and Performing Arts I\*

\*this course may only count in this category when it is offered as a theory/history course

#### Lower Division Studio Courses

- FPA 120-3 Introduction to Contemporary Dance
- FPA 124-3 Dance Improvisation
- FPA 129-3 Movement Fundamentals
- FPA 145-3 Introduction to Music Composition
- FPA 147-3 Introduction to Electroacoustic Music
- FPA 150-3 Introduction to Acting I
- FPA 151-3 Introduction to Acting II
- FPA 160-3 Introductory Studio in Visual Arts I
- FPA 161-3 Introductory Studio in Visual Arts II
- FPA 170-3 Introduction to Production Technology
- FPA 171-3 Stage and Production Management
- FPA 229-3 Selected Topics in Dance I\*
- FPA 232-3 Film Sound
- FPA 238-3 Screenwriting I
- FPA 243-3 Gamelan I
- FPA 247-3 Electroacoustic Music I
- FPA 249-3 Selected Topics in Music I\*
- FPA 262-3 Methods and Concepts: Drawing Practices
- FPA 263-3 Methods and Concepts: Painting Practices
- FPA 264-3 Methods and Concepts: Sculptural Practices
- FPA 265-3 Methods and Concepts: Photographic Practices
- FPA 268-3 Methods and Concepts: Spatial Presentation
- FPA 269-3 Methods and Concepts: Selected Topics
- FPA 270-3 Technical Theatre
- FPA 289-3 Selected Topics in the Fine and Performing Arts I\*
- FPA 290-3 Video Production I

\*this course may only count in this category when it is offered as a studio course

#### Upper Division Theory and History Courses

- FPA 308-4 Contemporary Arts Field School I (Theory/History)
- FPA 310-4 Interdisciplinary Methods
- FPA 311-4 Interdisciplinary Studies in the Arts
- FPA 312-3 Intermediate Seminar in Art and Culture
- FPA 313-5 Arts, Audience, Patronage, Institutions
- FPA 314-3 Readings in the History of Art and Culture
- FPA 319W-3 Critical Writing in the Arts
- FPA 335-3 Introduction to Film Theory
- FPA 337-3 Intermediate Selected Topics in Film and Video Studies
- FPA 341-3 World Music
- FPA 344-3 Contemporary Music Analysis and Criticism
- FPA 349-3 Selected Topics in Music II\*
- FPA 357-3 Context of Theatre II
- FPA 359-3 Selected Topics in Theatre\*
- FPA 366-3 Seminar in Visual Art I
- FPA 367-3 Seminar in Visual Art II
- FPA 369-3 Selected Topics in Visual Art II\*
- FPA 389-3 Selected Topics in the Fine and Performing Arts II\*
- FPA 408-4 Contemporary Arts Field School III (Theory/History)
- FPA 411-3 Interdisciplinary Topics in the Contemporary Arts
- FPA 412-4 Advanced Seminar in Art and Culture Studies
- FPA 414-3 Advanced Topic in the History of Art and Culture
- FPA 416-3 Practices in Art and Culture
- FPA 436-3 Advanced Seminar in Film and Video Studies
- FPA 457-3 Context of Theatre III

\*this course may only count in this category when it is offered as a theory/history course

#### Upper Division Studio Courses

- FPA 305-3 Explorations in Contemporary Arts I
- FPA 309-4 Contemporary Arts Field School II (Studio)
- FPA 324-3 New Dance Composition
- FPA 325-3 Special Project in Dance Composition
- FPA 338-3 Screenwriting II
- FPA 339-3 Directing and Acting for Film and Video
- FPA 343-3 Gamelan II
- FPA 349-3 Selected Topics in Music II\*
- FPA 359-3 Selected Topics in Theatre\*
- FPA 369-3 Methods and Concepts: Selected Topics\*
- FPA 375-3 Stage Design
- FPA 387-3 Digital Art
- FPA 389-3 Selected Topics in the Fine and Performing Arts II\*
- FPA 390-3 Video Production II
- FPA 405-5 Explorations in Contemporary Arts II
- FPA 409-4 Contemporary Arts Field School IV (Studio)
- FPA 425-4 Intensive Studies in Performance
- FPA 426-3 Dance/Movement Analysis
- FPA 443-3 Gamelan III
- FPA 489-5 Interdisciplinary Project in FPA

\*this course may only count in this category when it is offered as a studio course

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

The School for the Contemporary Arts currently offers two Q courses and two W courses:

- FPA 247-3 Electroacoustic Music I (Quantitative)
- FPA 447-3 Computer Music Composition (Quantitative)
- FPA 228W-3 Dance Aesthetics
- FPA 319W-3 Critical Writing in the Arts

### Field Schools

The school operates two bi-annual field schools. One is in Ghana and the other is in India.

The field school in Ghana, which has been part of the school since 1999, offers intensive classes, workshops and performances with a range of professors and professional artists. In addition to immersion into Ghanaian culture, the courses examine African culture, politics, music, dance, history, aesthetics, ethics and linguistics. Living in Ghana during the course intensifies every aspect of learning. Hands-on experience in world cultures enhances an interdisciplinary education.

The India field school, established in 2007, has offered courses in Indian cinema, art and culture. The field school's courses also explore the roots of contemporary Indian culture, ritual, politics, iconography and performance and have included workshops in music and dance and visits to religious rites on the Ganges River.

As well as offering disciplinary courses such as field studies, our field schools offer up to four dedicated contemporary arts field school courses. Depending on the topic, these courses may be applied toward a major as one of the required courses, as a studio or theory/history course outside the area, or as an elective. Contact the school's advisor for information.

The following courses are offered.

- FPA 308-4 Contemporary Arts Field School I (Theory/History)
- FPA 309-4 Contemporary Arts Field School II (Studio)
- FPA 408-4 Contemporary Arts Field School III (Theory/History)
- FPA 409-4 Contemporary Arts Field School IV (Studio)

For information about contemporary arts field schools, admission procedures, fees, etc., contact the office of SFU International at [www.sfu.ca/international/abroad/fieldschools](http://www.sfu.ca/international/abroad/fieldschools).

### Bachelor of Arts Program

#### Art and Culture Studies Major Program

This major leads to a bachelor of arts degree. Within the fine and performing arts, there are lively debates about the meaning and significance of individual artworks, as well as their relationships to audiences and to other forms of culture. The program investigates art and culture with attention to the historically changing forms of class, gender, race, ethnicity, sexuality and aesthetics. It provides students with the knowledge, research and communication skills needed to participate effectively in contemporary debates about art and culture. The core program includes two introductory studio courses from a multidisciplinary range of choices; these provide the experience of the creative process in dance, music, theatre, video or visual art. The program is interdisciplinary, but also provides a knowledge of and sensitivity to the distinctive qualities of specific art forms. Course selection beyond the program's core is flexible and students are encouraged to shape their studies in the school, or in the University at large.

#### Lower Division Requirements

Students complete 18 units including three of FPA 136-3 History and Aesthetics of Cinema I FPA 137-3 History and Aesthetics of Cinema II FPA 167-3 Visual Art and Culture I FPA 168-3 Visual Art and Culture II

plus

FPA 210-3 Artworks, Theories, Contexts

plus at least three units of studio courses from within the School for the Contemporary Arts

**Upper Division Requirements**

A minimum of 30 units must be completed as follows.  
FPA 310-4 Interdisciplinary Methods

plus 18 to 20 units from the following

FPA 311-4 Interdisciplinary Studies in the Arts\*  
FPA 312-3 Intermediate Seminar in Art and Culture\*  
FPA 313-5 Arts, Audience, Patronage, Institutions\*  
FPA 314-3 Readings in the History of Art and Culture\*  
FPA 319W-3 Critical Writing in the Arts  
FPA 411-3 Interdisciplinary Studies in the Contemporary Arts\*  
FPA 412-4 Advanced Seminar in Art and Culture\*  
FPA 414-3 Advanced Topic in the History of Art and Culture\*  
FPA 416-3 Practices in Art and Culture\*

(FPA 310, 311, 312, 313, 314, 315 completed prior to 99-2 will count towards this requirement.)

\*this course may be completed more than once for credit if the topic changes

**Additional Courses**

Six to eight units of additional upper division courses in the fine or performing arts must be completed. Courses in the above list of Art and Culture courses can be used to fulfil this requirement, as can other history, theory or studio courses offered by the School for the Contemporary Arts.

Relevant courses in other departments may also be used to fulfil this requirement. Student advisors in the School for the Contemporary Arts can provide students with a list of courses in other departments that are pertinent to the Art and Culture program. Students can also obtain individual approvals for courses other than FPA courses by providing course descriptions to the student advisors in the school.

Students are encouraged to plan in advance as some upper division courses may not be offered each year. Students who wish to complete upper division courses must make sure they have the disciplinary prerequisites and should be aware that studio courses may have limited enrollments.

**Art and Culture Studies Minor Program**

Within the fine and performing arts, there are lively debates about the meaning and significance of individual artworks, as well as their relationships to audiences and to other forms of culture. Art and culture studies investigates the arts with attention to the historically changing forms of class, gender, race, ethnicity, sexuality and aesthetics. This interdisciplinary program provides a knowledge of and sensitivity to the specific qualities of diverse artworks. The program is an excellent foundation for a dynamic, lifelong interest in the fine and performing arts, while complementing other programs of study.

**Lower Division Requirements**

Students are required to complete a minimum of 12 units including one of

FPA 167-3 Visual Art and Culture I  
FPA 168-3 Visual Art and Culture II

and one of

FPA 136-3 History and Aesthetics of Cinema I  
FPA 137-3 History and Aesthetics of Cinema II

and

FPA 210-3 Artworks, Theories, Contexts

plus three units of lower division history, theory, or studio courses within the School for the Contemporary Arts.

**Upper Division Requirements**

A minimum of 17 units must be completed as follows.

FPA 310-4 Interdisciplinary Methods

plus a minimum of 10 units from the following.

FPA 311-4 Interdisciplinary Studies in the Arts\*  
FPA 312-3 Intermediate Seminar in Art and Culture\*  
FPA 313-5 Arts, Audience, Patronage, Institutions\*

FPA 314-3 Readings in the History of Art and Culture\*

FPA 411-3 Interdisciplinary Studies in the Arts\*

FPA 412-4 Advanced Seminar in Art and Culture\*

FPA 414-3 Advanced Topic in the History of Art and Culture\*

FPA 416-3 Practices in Art and Culture\*

(FPA 311, 312, 313, 314, 315 completed prior to 99-2 will count toward this requirement.)

\*may be completed again for credit if topic changes

plus three units of upper division history or theory courses from within the School for the Contemporary Arts. The Art and Culture courses in the list above can be used to fulfil this requirement.

**Bachelor of Fine Arts Program****Degree Requirements**

Students must complete a minimum of 120 units, 24 of which must satisfy the writing, quantitative and breadth (WQB) requirements and 45 units must be in upper division courses.

To complete a major, students must include the following units in the required 120 units.

- dance major 78 units
- film major 75 units
- music major 72 units
- theatre major (performance stream) 74 units
- theatre major (production and design stream) 78 units
- visual arts major 74 units

**Dance Major Program**

The BFA major in dance approaches dance as an art form and integrates theory with creative and technical studio courses. Emphasis is given to contemporary dance technique, composition and experimentation. Courses are also offered in body conditioning practices, ballet, history and criticism, and movement analysis. Course work in other artistic disciplines is encouraged, and opportunities for participation in a variety of productions are available. The program is intended for students who desire to study dance in relation to other contemporary art disciplines and academic fields.

**Entry to FPA 122 Contemporary Dance I is by audition/interview** usually in early spring or late summer. Contact the school to make an appointment.

Continuation in the dance major is contingent upon the successful completion of FPA 122, 123, 124 and 129 and the approval of the Dance Area. Interviews will be held at the end of the first year and approval will be based on the student's potential, progress, academic record and suitability for the program.

Students are encouraged to plan their program in consultation with the school's advisor.

**Lower Division Requirements**

A minimum of 40 units including all of

FPA 111-3 Issues in the Fine and Performing Arts  
FPA 122-4 Contemporary Dance I  
FPA 123-4 Contemporary Dance II  
FPA 124-3 Dance Improvisation  
FPA 129-3 Fundamental Integration of Human Movement

FPA 220-4 Contemporary Dance III

FPA 221-4 Contemporary Dance IV

FPA 224-3 Dance Composition I

FPA 227-3 History of Dance: From the 20th Century to the Present

FPA 228W-3 Dance Aesthetics

plus six additional units in lower division FPA courses outside of dance as follows.

and one of

FPA 147-3 Introduction to Electroacoustic Music  
FPA 150-3 Introduction to Acting I

FPA 160-3 Introductory Studio in Visual Art I

FPA 170-3 Introduction to Production Technology

FPA 171-3 Introduction to Stage and Production Management

FPA 290-3 Video Production I

and one of

FPA 136-3 The History and Aesthetics of Cinema I

FPA 137-3 The History and Aesthetics of Cinema II

FPA 140-3 Music After 1900

FPA 167-3 Visual Art and Culture I

FPA 168-3 Visual Art and Culture II

FPA 210-3 Artworks, Theories, Contexts

FPA 247-3 Electroacoustic Music I

FPA 270-3 Production Ensemble I

FPA 271-3 Production Ensemble II

**Upper Division Requirements**

A minimum of 38 units including all of

FPA 320-4 Contemporary Dance V

FPA 321-4 Contemporary Dance VI

FPA 324-3 New Dance Composition

plus 18 units selected from the following\*

FPA 322-3 Ballet I

FPA 323-3 Ballet II

FPA 325-3 Special Project in Dance Composition

FPA 326-4 Repertory I

FPA 327-4 Repertory II

FPA 420-4 Contemporary Dance VII

FPA 421-4 Contemporary Dance VIII

FPA 425-4 Intensive Studies in Performance

FPA 426-3 Dance/Movement Analysis

FPA 427-3 Ballet III

FPA 428-3 Ballet IV

plus nine upper division FPA units including one upper division history or theory course

\*other dance related courses may be substituted with permission of the school

**Program with National Ballet School**

In addition to the BFA in dance and the extended minor, the school offers a combined degree/diploma program with the five year National Ballet School Teachers' Training Program where students initiate their studies at Simon Fraser University or at the National Ballet School (NBS). Those who begin at Simon Fraser University will spend three years at the University and two years at NBS to receive a BFA degree and a National Ballet School Teachers' Training diploma. Students who transfer to Simon Fraser University after three NBS study years will complete two years at Simon Fraser University and receive a bachelor of general studies degree and the NBS Teachers' Training Diploma.

**Dance Extended Minor Program**

This program is intended primarily for students who wish to obtain a BA degree with a view to teaching dance in the public schools. It may be used in combination with another extended minor. The program is balanced with dance technique, composition and theory, and some work in a relevant art discipline other than dance.

**Entry to FPA 122 is by audition/interview** usually scheduled for early spring and late summer. Contact the general office to make an audition appointment.

Continuation in the dance extended minor is contingent upon successful completion of FPA 122, 123, 124 and 129 and approval of the dance area. Interviews are held at the end of the first year and approval is based on the student's potential, progress, academic record and program suitability.

Students are encouraged to plan their program in consultation with the school's advisor.

Students without sufficient dance training to audition for program entry may enrol in FPA 120.

**Lower Division Requirements**

A minimum of 31 dance units including all of  
 FPA 122-4 Contemporary Dance I  
 FPA 123-4 Contemporary Dance II  
 FPA 124-3 Dance Improvisation  
 FPA 129-3 Fundamental Integration of Human Movement

FPA 220-4 Contemporary Dance III  
 FPA 221-4 Contemporary Dance IV  
 FPA 224-3 Dance Composition I

plus one of  
 FPA 227-3 History of Dance: The 20th Century  
 FPA 228W-3 Dance Aesthetics

plus one of  
 FPA 111-3 Issues in the Fine and Performing Arts  
 FPA 140-3 Music After 1900  
 FPA 150-3 Introduction to Acting I  
 FPA 170-3 Introduction to Production Technology

**Upper Division Requirements**

A minimum of 17 dance units including all of  
 FPA 320-4 Contemporary Dance V  
 FPA 321-4 Contemporary Dance VI

plus six units minimum selected from  
 FPA 322-3 Ballet I  
 FPA 323-3 Ballet II  
 FPA 325-3 Special Project in Dance Composition  
 FPA 326-4 Repertory I  
 FPA 327-4 Repertory II  
 FPA 420-4 Contemporary Dance VII  
 FPA 421-4 Contemporary Dance VIII  
 FPA 426-3 Dance/Movement Analysis

plus one upper division FPA course

**Film Major Program**

The BFA major in film provides creative, technical and analytical studies within the school's interdisciplinary setting. Film and video production courses emphasize the creation of original work and technical skills acquisition. Film courses familiarize students with the aesthetic and social issues surrounding contemporary film and video practice which are an integral part of the curriculum. Students augment the components of film and video through interdisciplinary studies and projects. Directed study courses are available for upper division students to work independently.

**Entry to all first year film production courses required for the major or extended minor is by questionnaire and interview.** Contact the school in early January prior to attendance at the University to request an information letter and questionnaire.

Film students who wish to complete the film major may apply for admission to the BFA major program after completing FPA 231, normally at the end of the second year of study. Approval will be based on the student's creative work and academic record in required lower division courses.

Students whose interest in film is related primarily to historical, critical, or theoretical aspects should see the art and culture studies major program, leading to a BA, and to the film and video studies minor.

**Lower Division Requirements**

A minimum of 44 units including the following.  
 FPA 111-3 Issues in the Fine and Performing Arts  
 FPA 130-4 Fundamentals of Film  
 FPA 131-4 Filmmaking I  
 FPA 136-3 The History and Aesthetics of Cinema I  
 FPA 137-3 The History and Aesthetics of Cinema II  
 FPA 230-5 Filmmaking II  
 FPA 231-5 Filmmaking III  
 FPA 233-2 The Techniques of Film

plus one of\*  
 FPA 235-3 Experimental Film and Video  
 FPA 236-3 Cinema in Canada  
 FPA 237-3 Selected Topics in Film and Video Studies\*\*

plus one of  
 FPA 232-3 Film Sound  
 FPA 238-3 Screenwriting I  
 FPA 290-3 Video Production I

\*with prior approval, students may substitute lower division courses from other departments devoted to a film or video topic to fulfil this requirement

\*\*may be repeated under another topic

plus six units of lower division FPA studio courses outside film. Students may apply CMNS 258 toward this requirement.

plus another FPA history or critical course outside film.

**Upper Division Requirements**

A minimum of 31 units including three of\*  
 FPA 335-4 Introduction to Film Theory\*\*  
 FPA 337-3 Intermediate Selected Topics in Film and Video Studies\*\*\*  
 FPA 436-3 Advanced Seminar in Film and Video Studies\*\*\*

\*with prior approval, students may substitute upper division courses devoted to a film or video studies topic in other departments, or in directed study in film studies, to fulfil this requirement

\*\*recommended

\*\*\*may be repeated under another topic

plus a minimum of 19 units from the following  
 FPA 332-3 Film Production Seminar  
 FPA 333-3 Cinematography and Lighting  
 FPA 334-3 Selected Topics in Film and Video Production

FPA 338-3 Screenwriting II  
 FPA 339-3 Directing and Acting for Film and Video  
 FPA 390-3 Video Production II  
 FPA 393-2 Techniques of Video  
 FPA 430-5 Filmmaking IV  
 FPA 432-5 Filmmaking V

With prior permission, a directed study course (FPA 400, 402 or 404), a film studies course, or another upper division FPA course may be substituted for one of the above.

plus one of  
 FPA 310-4 Interdisciplinary Methods  
 FPA 311-4 Interdisciplinary Studies in the Arts  
 FPA 312-3 Intermediate Seminar in Art and Culture  
 FPA 313-5 Arts, Audience, Patronage, Institutions  
 FPA 314-3 Readings in the History of Art and Culture  
 FPA 411-3 Interdisciplinary Studies in the Contemporary Arts  
 FPA 412-3 Advanced Seminar in Art and Culture Studies  
 FPA 414-3 Advanced Topic in the History of Art and Culture  
 FPA 416-3 Practices in Art and Culture

or another upper division FPA history or critical course outside film.

**Film Extended Minor Program**

This program is for students who wish to apply broad range studies from other University programs to film and video production. Film has affinities with many social sciences and humanities disciplines, as well as business and communication. Students from other contemporary arts areas may develop specific skills such as composing for film, multimedia installation, or directing actors through a film extended minor with another extended minor in an appropriate area.

**Entry to all film production courses is by questionnaire and interview.** Contact the school by early January for an information letter and questionnaire.

**Lower Division Requirements**

A minimum of 28 units including all of  
 FPA 111-3 Issues in the Fine and Performing Arts

FPA 130-4 Fundamentals of Film  
 FPA 131-4 Filmmaking I

plus two of  
 FPA 136-3 The History and Aesthetics of Cinema I  
 FPA 137-3 The History and Aesthetics of Cinema II  
 FPA 235-3 Experimental Film and Video  
 FPA 236-3 Cinema in Canada  
 FPA 237-3 Selected Topics in Film and Video Studies\*

plus at least eight units from among  
 FPA 230-5 Filmmaking II  
 FPA 231-5 Filmmaking III  
 FPA 232-3 Film Sound  
 FPA 233-2 The Techniques of Film  
 FPA 238-3 Screenwriting I  
 FPA 290-3 Video Production I

plus three units from another lower division FPA course.

\*may include film and video analysis, national cinemas, genre, political cinema, etc., and may be repeated for credit when a different topic is offered.

**Upper Division Requirements**

A minimum of 17 units including at least three of  
 FPA 332-3 Film Production Seminar  
 FPA 334-3 Selected Topics in Film and Video Production  
 FPA 338-3 Screenwriting II  
 FPA 339-3 Directing and Acting for Film and Video  
 FPA 390-3 Video Production II  
 FPA 393-2 Techniques of Video

An upper division FPA studio course outside film may be substituted for one of the above.

at least one of  
 FPA 335-4 Introduction to Film Theory  
 FPA 337-3 Intermediate Selected Topics in Film and Video Studies\*  
 FPA 436-3 Advanced Seminar in Film and Video Studies\*

plus one of  
 FPA 310-4 Interdisciplinary Methods  
 FPA 311-4 Interdisciplinary Studies in the Arts  
 FPA 312-3 Intermediate Seminar in Art and Culture  
 FPA 313-5 Arts, Audience, Patronage, Institutions  
 FPA 314-3 Readings in the History of Art and Culture  
 FPA 411-3 Interdisciplinary Studies in the Contemporary Arts  
 FPA 412-3 Advanced Seminar in Art and Culture Studies  
 FPA 414-3 Advanced Topic in the History of Art and Culture  
 FPA 416-3 Practices in Art and Culture

or another upper division FPA history or critical course outside film.

\*these courses may include studies in film and video analysis, national cinemas, genre, political cinema, etc. and may be repeated for credit when a different topic is offered.

**Note:** Courses devoted to film or video are occasionally offered by other departments. With prior permission, students may substitute one or more to fulfil requirements, up to a maximum of eight units.

**Film and Video Studies Minor Program**

This minor focuses on theoretical, analytical, historical and critical aspects of film and video.

**Lower Division Requirements**

A minimum of 12 units including both of  
 FPA 136-3 The History and Aesthetics of Cinema I  
 FPA 137-3 The History and Aesthetics of Cinema II

plus two of  
 FPA 235-3 Experimental Film and Video  
 FPA 236-3 Cinema in Canada  
 FPA 237-3 Selected Topics in Film and Video Studies\*  
 FPA 238-3 Introduction to Screenwriting

**Upper Division Requirements**

A minimum of 17 units including 12 units from  
 FPA 335-4 Introduction to Film Theory\*\*  
 FPA 337-3 Intermediate Selected Topics in Film and Video Studies\*  
 FPA 338-3 Advanced Screenwriting  
 FPA 436-3 Advanced Seminar in Film and Video Studies\*  
 plus one of  
 FPA 310-4 Interdisciplinary Methods  
 FPA 311-4 Interdisciplinary Studies in the Arts  
 FPA 312-3 Intermediate Seminar in Art and Culture  
 FPA 313-5 Arts, Audience, Patronage, Institutions  
 FPA 314-3 Readings in the History of Art and Culture  
 FPA 411-3 Interdisciplinary Studies in the Contemporary Arts  
 FPA 412-4 Advanced Seminar in Art and Culture Studies  
 FPA 414-3 Advanced Topic in the History of Art and Culture  
 FPA 416-3 Practices in Art and Culture

\*these courses may include studies in film and video analysis, national cinemas, genre, political cinema, etc. and may be repeated for credit when a different topic is offered

\*\*recommended

**Note:** Courses devoted to film or video are occasionally offered by other departments. With prior permission, students may substitute one or more of these courses to fulfil requirements, up to a maximum of eight units.

**Music Major Program**

The bachelor of fine arts – major in music is a flexible program that offers several options for the music student to pursue an interest in composition, electroacoustic music, world music or interdisciplinary collaboration. Complementary courses in music history, theory and criticism provide an integral balance to the in-depth studio nature of the program.

The program takes full advantage of the opportunities to experience and study other art forms that are provided in the School for the Contemporary Arts. Students are required to complete studio courses in other art disciplines as well as interdisciplinary courses in history, theory and criticism.

**Entry to specific courses required for the music major is by interview**, usually scheduled for early spring and late summer. Contact the general office to make an appointment.

The attention of students whose interest in music is related primarily to its historical, critical, or theoretical aspects, is directed to the art and culture studies major program, leading to a BA degree.

**Lower Division Requirements**

A minimum of 39 units including all of  
 FPA 111-3 Issues in the Fine and Performing Arts  
 FPA 140-3 Music After 1900  
 FPA 145-3 Introduction to Music Composition and Theory  
 FPA 147-3 Introduction to Electroacoustic Music  
 FPA 240-3 Contemporary Music Performance I  
 FPA 244-3 Theory of Contemporary Music

plus four of  
 FPA 243-3 Gamelan I  
 FPA 245-3 Music Composition I  
 FPA 246-3 Music Composition II  
 FPA 247-3 Electroacoustic Music I  
 FPA 248-3 Conducting I  
 FPA 249-3 Selected Topics in Music I  
 CMNS 258-3 Introduction to Electroacoustic Communication

plus two FPA studio courses outside music

plus one FPA theory or history course outside music.

**Upper Division Requirements**

A minimum of 33 upper division units must be completed. Fifteen units must be from the following.  
 FPA 340-3 Contemporary Music Performance II  
 FPA 341-3 World Music  
 FPA 343-3 Gamelan II  
 FPA 344-3 Contemporary Music Analysis and Criticism  
 FPA 345-3 Music Composition III  
 FPA 346-3 Music Composition IV  
 FPA 347-3 Electroacoustic Music II  
 FPA 348-3 Conducting II  
 FPA 349-3 Selected Topics in Music II

Nine units must be chosen from the following

FPA 400-3 Directed Study (Studio)\*  
 FPA 401-3 Directed Study (Theory/History)\*  
 FPA 402-4 Directed Study (Studio)\*  
 FPA 403-4 Directed Study (Theory/History)\*  
 FPA 404-5 Directed Study (Studio)\*  
 FPA 443-3 Gamelan III  
 FPA 445-3 Music Composition V  
 FPA 446-5 Senior Project in Music Composition  
 FPA 447-3 Computer Music Composition

plus a minimum of nine FPA units from outside music (CMNS 358 or 359 may be substituted).

\*content of directed studies courses must be approved by the music area

**Music Extended Minor Program**

Those who wish a BA general degree by completing two extended minors are directed to the music extended minor. A balanced introduction to music composition, theory, history and performance is supplied at the lower level. A less concentrated upper division allows experience in a particular area. This minor may be used for teaching in the schools.

**Entry to specific courses required for the extended minor in music is by interview**, usually scheduled for early spring and late summer. Contact the general office to make an appointment.

**Lower Division Requirements**

A minimum of 24 units including all of  
 FPA 140-3 Music After 1900  
 FPA 145-3 Introduction to Music Composition and Theory  
 FPA 147-3 Introduction to Electroacoustic Music

plus four of  
 FPA 240-3 Contemporary Music Performance I  
 FPA 243-3 Gamelan I  
 FPA 244-3 Theory of Contemporary Music  
 FPA 245-3 Music Composition I  
 FPA 246-3 Music Composition II  
 FPA 247-3 Electroacoustic Music I  
 FPA 248-3 Conducting I  
 FPA 249-3 Selected Topics in Music I

plus one FPA lower division theory or history course outside music.

**Upper Division Requirements**

A minimum of 15 units including three of  
 FPA 340-3 Contemporary Music Performance II  
 FPA 341-3 World Music  
 FPA 343-3 Gamelan II  
 FPA 344-3 Contemporary Music Analysis and Criticism  
 FPA 345-3 Music Composition III  
 FPA 346-3 Music Composition IV  
 FPA 347-3 Electroacoustic Music II  
 FPA 348-3 Conducting II  
 FPA 349-3 Selected Topics in Music II  
 FPA 443-3 Gamelan III  
 FPA 445-3 Music Composition V  
 FPA 446-5 Senior Project in Music Composition  
 FPA 447-3 Computer Music Composition

plus six additional units in upper division FPA courses. Additional music courses may be used to fulfil this requirement.

**Theatre Major Program**

Theatre students may choose a performance stream or a production and design stream. Both lead to a bachelor of fine arts with a major in theatre.

The performance stream emphasizes the development of the theatre artist. The studio courses are supplemented by courses in dramatic literature, theatre history, playmaking, and technical theatre. Courses chosen from disciplines outside theatre give the program an interdisciplinary component. Students are encouraged to participate in productions and to develop their own scripts and performance pieces.

The production and design stream provides a path for students who wish to study theatre, but prefer production and design aspects of the discipline.

Students whose interest in theatre is primarily historical, critical or theoretical are directed to the art and culture studies major program, leading to a BA.

**Lower Division Requirements for the Performance Stream**

**Entry to FPA 250, 252, 254 and to the major in theatre (performance stream) is by audition**, usually scheduled for early spring and late summer. Contact the school to make an appointment.

Students who wish to enrol in the theatre performance major normally complete FPA 150, 151, and 170, and are advised to complete other courses required for the major prior to auditioning for entry to the program.

A minimum of 41 units including all of  
 FPA 129-3 Fundamental Integration of Human Movement

FPA 150-3 Introduction to Acting I  
 FPA 151-3 Introduction to Acting II  
 FPA 170-3 Introduction to Production Technology  
 FPA 250-3 Acting I  
 FPA 251-3 Acting II  
 FPA 252-3 Playmaking I  
 FPA 253-3 Playmaking II  
 FPA 254-2 Theatre Laboratory I  
 FPA 255-3 Theatre Laboratory II  
 FPA 257-3 Context of Theatre I

plus one of  
 FPA 171-3 Stage and Production Management  
 FPA 270-3 Technical Theatre

plus two FPA studio courses other than theatre

**Upper Division Requirements for the Performance Stream**

A minimum of 33 units including all of  
 FPA 350-3 Acting III  
 FPA 351-3 Acting IV  
 FPA 354-2 Theatre Laboratory III  
 FPA 355-2 Theatre Laboratory IV  
 FPA 357-3 Context of Theatre II

plus an additional 20 units of upper division credit. Please note that no more than eight upper division units from outside FPA may be used toward the major.

**Lower Division Requirements for the Production and Design Stream**

**Entry to FPA 270 and/or 271 and to the major in theatre (production and design stream) is by interview**, usually scheduled for early spring and late summer. Contact the general office to make an appointment.

Students who wish to enrol in the theatre production and design stream major normally complete FPA 170, 171 and 150, and are advised to complete other courses required for the major prior to interviewing for entry into the program.

A minimum of 39 units including all of  
 FPA 147-3 Introduction to Electroacoustic Music

FPA 150-3 Introduction to Acting I  
 FPA 170-3 Introduction to Production Technology  
 FPA 171-3 Introduction to Stage and Production Management  
 FPA 257-3 Context of Theatre I  
 FPA 270-3 Production Ensemble I  
 FPA 271-3 Production Ensemble II  
 FPA 272-3 Production Practicum I  
 FPA 273-3 Production Practicum II

plus one of  
 FPA 120-3 Introduction to Contemporary Dance  
 FPA 124-3 Dance Improvisation  
 FPA 129-3 Fundamental Integration of Human Movement  
 FPA 226-3 Dancing in Cyberspace

plus one of  
 FPA 160-3 Introductory Studio in Visual Art I  
 FPA 161-3 Introductory Studio in Visual Art II  
 FPA 268-3 Methods and Concepts: Spatial Presentation

plus three units from any lower division FPA theory or history course outside of Theatre.

plus three units of any lower division FPA studio course outside of Theatre.

### Upper Division Requirements for the Production and Design Stream

A minimum of 39 units including all of

FPA 357-3 Context of Theatre II  
 FPA 370-3 Production Ensemble III  
 FPA 371-3 Production Ensemble IV  
 FPA 374-3 Stage Lighting  
 FPA 375-3 Stage Design

plus a minimum of nine units of Production and Design practicum from

FPA 372-3 Production Practicum III  
 FPA 373-3 Production Practicum IV  
 FPA 472-3 Production Practicum V  
 FPA 473-5 Production Practicum VI

plus one of  
 FPA 325-3 Special Project in Dance Composition  
 FPA 352-3 Playmaking III  
 FPA 353-3 Playmaking IV  
 FPA 450-3 Advanced Studio Skills  
 FPA 453-3 Theory and Practice of Directing  
 FPA 457-3 Context of Theatre III  
 FPA 470-3 Production Ensemble V  
 FPA 471-3 Production Ensemble VI  
 FPA 489-5 Interdisciplinary Project in FPA

plus 12 units of upper division FPA courses which may be drawn from any of the above or from other available FPA offerings. At least three of these units must be from an FPA theory or history course outside of Theatre.

### Theatre Extended Minor Program

This program is for students interested in technical, design and administrative aspects of theatre. Interdisciplinary requirements place theatre study in the context of contemporary art theory and practice.

### Lower Division Requirements

A minimum of 30 units including all of

FPA 150-3 Introduction to Acting I  
 FPA 170-3 Introduction to Production Technology  
 FPA 171-3 Introduction to Stage and Production Management  
 FPA 257-3 Context of Theatre I  
 FPA 270-3 Production Ensemble I  
 FPA 271-3 Production Ensemble II  
 FPA 272-3 Production Practicum I  
 FPA 273-3 Production Practicum II

plus three units from any lower division FPA theory or history course outside of Theatre

plus three units from any lower division FPA studio course outside of Theatre.

### Upper Division Requirements

A minimum of 18 units including all of

FPA 357-3 Context of Theatre II  
 FPA 374-3 Stage Lighting  
 FPA 375-3 Stage Design

plus one of

FPA 370-3 Production Ensemble III  
 FPA 371-3 Production Ensemble IV

plus one of

FPA 372-3 Production Practicum III  
 FPA 373-3 Production Practicum IV

plus one of

FPA 311-4 Interdisciplinary Studies in the Arts  
 FPA 313-5 Arts, Audience, Patronage, Institutions  
 FPA 325-3 Special Projects in Dance Composition  
 FPA 353-3 Playmaking IV  
 FPA 470-3 Production Ensemble V  
 FPA 471-3 Production Ensemble VI  
 FPA 389-3 Selected Topics in the Fine and Performing Arts II

or any other upper division FPA history or theory course outside of Theatre.

### Visual Art Major Program

The bachelor of fine arts – major in visual art prepares students to become practising artists. A combination of broad-based practical studio courses and theoretical and historical seminars prepares students to understand their production in relation to current visual art and other discipline developments. A strong emphasis is on an understanding of the position and responsibilities of the artist in contemporary society.

**Entry to the visual art major (BFA) program is granted after completion of FPA 111, 160, 161 and 168 in the first year followed by an application to FPA 260. Following the completion of FPA 260, 261 and 210 entry to the visual art major is granted based on an application. Both applications are determined by grades and portfolio assessment, usually scheduled at the end of the spring term. Contact the general office for further information.**

Methods and concepts courses are offered simultaneously as upper and lower division courses; with the exception of FPA 269/369, they may only be completed once for credit, either as a lower division course or an upper division course, but not both.

The attention of students whose interest in visual art is related primarily to its historical, critical, or theoretical aspects, is directed to the art and culture studies major program, leading to a BA degree.

### Lower Division Requirements

A minimum of 39 units including all of

FPA 111-3 Issues in the Fine and Performing Arts  
 FPA 160-3 Introductory Studio in Visual Art I  
 FPA 161-3 Introductory Studio in Visual Art II  
 FPA 167-3 Visual Art and Culture I  
 FPA 168-3 Visual Art and Culture II  
 FPA 210-3 Artworks, Theories, Contexts  
 FPA 260-3 Studio in Visual Art I  
 FPA 261-3 Studio in Visual Art II

plus three of

FPA 262-3 Methods and Concepts: Drawing Practices  
 FPA 263-3 Methods and Concepts: Painting Practices  
 FPA 264-3 Methods and Concepts: Sculptural Practices

FPA 265-3 Methods and Concepts: Photographic Practices

FPA 268-3 Methods and Concepts: Spatial Presentation

FPA 269-3 Methods and Concepts: Selected Topics\*

plus six additional units in lower division FPA courses outside of visual art. One must be a history or theory course, and one must be a studio.

### Upper Division Requirements

A minimum of 35 units including all of

FPA 360-3 Studio in Visual Art III  
 FPA 361-3 Studio in Visual Art IV  
 FPA 366-3 Seminar in Visual Art I  
 FPA 367-3 Seminar in Visual Art II  
 FPA 460-3 Studio in Visual Art V  
 FPA 461-5 Studio in Visual Art VI

plus two of

FPA 362-3 Methods and Concepts: Drawing Practices  
 FPA 363-3 Methods and Concepts: Painting Practices  
 FPA 364-3 Methods and Concepts: Sculptural Practices

FPA 365-3 Methods and Concepts: Photographic Practices

FPA 368-3 Methods and Concepts: Spatial Presentation

FPA 369-3 Methods and Concepts: Selected Topics\*

plus nine FPA upper division units including one of

FPA 310-4 Interdisciplinary Methods  
 FPA 311-4 Interdisciplinary Studies in the Arts  
 FPA 312-3 Intermediate Seminar in Art and Culture  
 FPA 313-5 Arts, Audience, Patronage, Institutions  
 FPA 314-3 Readings in the History of Art and Culture  
 FPA 411-3 Interdisciplinary Studies in the Contemporary Arts

FPA 412-3 Advanced Seminar in Art and Culture Studies

FPA 414-3 Advanced Topic in the History of Art and Culture

FPA 416-3 Practices in Art and Culture

\*may be completed more than once for credit under a different topic. Topics may change every term and include, but are not limited to, installation practices, performance practices, digital 2D practices, and time-based media practices. Contact the general office for further information.

### Visual Art Extended Minor Program

This program may interest those who wish to obtain a BA degree by completing two extended minors. The program offers a studio, history and theory courses in visual art, giving a good introduction to contemporary art issues and practices. A extended minor may be used for the purpose of teaching in the schools.

**Entry to the Visual Art Extended Minor program, after completion of FPA 111, 160, 161 and 168 in the first year, is determined by grades and portfolio assessment, usually scheduled at the end of the spring term. Contact the general office for further information.**

Methods and concepts courses are offered simultaneously as upper and lower division courses; with the exception of FPA 269/369, they may only be completed once for credit, either as a lower division course or an upper division course, but not both.

### Lower Division Requirements

A minimum of 30 units including all of

FPA 111-3 Issues in the Fine and Performing Arts  
 FPA 160-3 Introductory Studio in Visual Art I  
 FPA 161-3 Introductory Studio in Visual Art II  
 FPA 167-3 Visual Art and Culture I  
 FPA 168-3 Visual Art and Culture II  
 FPA 210-3 Artworks, Theories, Contexts  
 FPA 260-3 Studio in Visual Art I  
 FPA 261-3 Studio in Visual Art II

plus two of

FPA 262-3 Methods and Concepts: Drawing Practices  
 FPA 263-3 Methods and Concepts: Painting Practices  
 FPA 264-3 Methods and Concepts: Sculptural Practices

FPA 265-3 Methods and Concepts: Photographic Practices

FPA 268-3 Methods and Concepts: Spatial Presentation

FPA 269-3 Methods and Concepts: Selected Topics\*

**Upper Division Requirements**

A minimum of 15 units including two of  
 FPA 362-3 Methods and Concepts: Drawing Practices  
 FPA 363-3 Methods and Concepts: Painting Practices  
 FPA 364-3 Methods and Concepts: Sculptural Practices  
 FPA 365-3 Methods and Concepts: Photographic Practices  
 FPA 368-3 Methods and Concepts: Spatial Presentation  
 FPA 369-3 Methods and Concepts: Selected Topics\*

plus nine FPA upper division units including one history/theory courses.

\*may be completed more than once under a different topic. Topics may change every term and include, but are not limited to, installation practices, performance practices, digital 2D practices, and time-based media practices. Contact the school for further information.

**Minor Program**

In addition to the many Bachelor of Fine and Performing Arts extended minor programs, the school also offers the fine and performing arts minor which can be completed by FPA students or those in any other Simon Fraser University major.

**Fine and Performing Arts Minor Program**

This program accommodates a range of fine and performing arts interests, but some exposure to both the practical and theoretical aspects of art is assured by the lower division studio course requirement and the upper division seminar in art and culture studies.

**Lower Division Requirements**

A minimum of 12 FPA units must be completed including one studio course.

**Upper Division Requirements**

A minimum of 15 FPA units must be completed including at least three in upper division theory and history courses.

**Joint Major Program****Anthropology or Sociology, and Art and Culture Studies Joint Major Program**

These joint majors are interdisciplinary programs linking the study of contemporary arts with the social sciences. Students explore interrelationships between fine, performing and media arts, cultural criticism, intercultural relations, and social, economic or political processes. Alternatively, they may choose courses that pertain to one or two areas in particular.

**Art and Culture Studies Lower Division Requirements**

Students complete 18 units as follows.

plus one of

FPA 167-3 Visual Art and Culture I  
 FPA 168-3 Visual Art and Culture II

one of

FPA 136-3 History and Aesthetics of Cinema I  
 FPA 137-3 History and Aesthetics of Cinema II

plus

FPA 210-3 Artworks, Theories, Contexts

**Additional Disciplinary History Courses**

Students complete at least six units of lower division disciplinary history or theory courses from within the School for the Contemporary Arts.

**Studio Courses**

Students complete three to six units of lower division studio courses from within the school.

**Note:** For some studio courses, permission to enrol is selective and may be based on an interview or audition. Contact the school for more detail regarding specific studio courses.

**Art and Culture Studies Upper Division Requirements**

Students complete 20 units as follows.

**Interdisciplinary Theory Core**

Students complete

FPA 310-4 Interdisciplinary Methods

plus a minimum of 16 units chosen from

FPA 311-4 Interdisciplinary Studies in the Arts\*  
 FPA 312-3 Intermediate Seminar in Art and Culture\*  
 FPA 313-5 Arts, Audience, Patronage, Institutions\*  
 FPA 314-3 Readings in the History of Art and Culture\*  
 FPA 337-3 Intermediate Selected Topics in Film and Video Studies\*

FPA 390-3 Video Production II

FPA 393-2 Techniques of Video

FPA 411-3 Interdisciplinary Studies in the

Contemporary Arts\*

FPA 412-4 Advanced Seminar in Art and Culture\*

FPA 414-3 Advanced Topic in the History of Art and Culture\*

FPA 416-3 Practices in Art and Culture\*

FPA 436-3 Advanced Seminar in Film and Video Studies\*

**Note:** some courses have prerequisites beyond those required for the joint major program requirements

\*may be completed more than once if topic changes

**Anthropology Lower Division Requirements**

Students complete 20 units including

SA 101-4 Introduction to Anthropology (A)

SA 201W-4 Anthropology and Contemporary Life (A)

SA 255-4 Introduction to Social Research (S or A)

plus two additional 200 division A and/or S courses.

**Anthropology Upper Division Requirements**

Students complete 20 units including both of

SA 301-4 Contemporary Ethnography (A)

SA 356W-4 Ethnography and Qualitative Methods (S or A)

SA 402-4 The Practice of Anthropology (A)

and eight additional upper division units chosen from the Calendar list of anthropology (A) courses, or (S or A) courses, or (S or A) courses when they are designated as anthropology.

**Sociology Lower Division Requirements**

Students complete 19 units including all of

SA 150-4 Introduction to Sociology (S)

SA 250-4 Introduction to Sociological Theory (S)

SA 255-4 Introduction to Social Research (S or A)

STAT 203-3 Introduction to Statistics for the Social Sciences

plus four units chosen from any 200 division course in sociology and/or anthropology.

**Sociology Upper Division Requirements**

Students complete 20 units including both of

SA 350-4 Classical Sociological Thought (S)

SA 355-4 Quantitative Methods (S or A)

plus an additional 12 units chosen from the Calendar list of sociology (S) courses, or (S or A) courses, (S or A) courses when they are designated as sociology.

**Praxis Centre for Screenwriters**

Suite 3120, 515 West Hastings Street, Vancouver, BC, V6B 5K3, 778.782.7880 Tel, 778.782.7882 Fax, www.praxisfilm.com

**Director**

P. Gruben BA (Rice)

Praxis is a professional development workshop for screenwriters and filmmakers. Intensive non-credit workshops are held twice a year for writers whose feature film scripts have been chosen through a national competition. In addition, Praxis offers public seminars throughout the year and maintains a reference library of film scripts and other materials related to film production and studies.

siat\_advising@sfu.ca, www.siat.sfu.ca

The School of Interactive Arts and Technology offers an undergraduate degree that comprises three concentrations: design, media arts and informatics. The school offers a bachelor of science and bachelor of arts degree in interactive arts and technology.

**Programs Offered**

bachelor of arts with major in interactive arts and technology  
bachelor of arts (honors) in interactive arts and technology  
bachelor of science with major in interactive arts and technology  
bachelor of science (honors) in interactive arts and technology  
minor in interactive arts and technology

The following phased out programs are available only to students admitted in September 2002 or earlier.

bachelor of science (information technology, TechBC)  
bachelor of science (interactive arts, TechBC)

**Admission Requirements**

Admission to the school is via three routes.

**Route 1**

- direct admission from BC high school 12 or equivalent high school preparation in accordance with the requirements listed under the *Admission and Readmission* section (see "British Columbia and Yukon Applicants" on page 20).

**Route 2**

- internal transfer from another Simon Fraser University program; the normal choice will be TechOne.

**Route 3**

- direct transfer from another post-secondary institution.

In routes 2 and 3, students apply to either the BA or BSc after completing 18 units of the lower division requirements listed below, or equivalents. In route 2, a minimum of six units of IAT course work is required

Admission is competitive and based on the cumulative grade point average. Students whose first admission attempt is unsuccessful may improve their average by completing additional courses.

**Writing, Quantitative, and Breadth Requirements**

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7.

**Major Program**

Students complete the following.

- lower division requirements of 12 units of approved first year courses and the SIAT core requirements
- upper division requirements of at least one of the three concentrations in SIAT
- lower and upper division requirements of either the BA or BSc degree program
- at least 120 units including 45 upper division units.

Students enter this major by meeting the admission requirements specified above. Students will normally apply to either the BA or BSc program after completion of first year or its equivalent.

**Lower Division Core Requirements**

Students complete 12 units of approved first year course work showing evidence of breadth, communication, teamwork and project skills. The TechOne program, with a suitable choice of electives, meets these requirements by design.

SIAT lower division core requirements are as follows.

Students complete all of  
IAT 100-3 Systems of Media Representations  
IAT 102-3 Graphic Design  
IAT 265-3 Multimedia Programming for Art and Design (or other approved second year programming course)\*

plus an approved introduction to programming course (CMPT 120 or equivalent\*)

plus an introductory course in human computer interaction and cognition (IAT 201 or equivalent\*)

plus introductory courses reflecting the school's concentrations (IAT 233, 202, 267\*)

plus an introductory art and culture course (IAT 222 or equivalent)

plus an introductory designing information interfaces course (IAT 235 or equivalent)

\*these courses or their equivalents must have a science designation

**Upper Division Core Requirements****Three Concentrations**

A BSc and BA with a major or honors is offered with three concentrations: design, media arts, informatics (see below). All share the fundamental concern of people using technology in context. Each draws from distinct patterns of scholarship and thinking. Each has its own academic emphasis leading directly to its particular pattern of study and graduate outcome.

**Concentration in Media Arts**

This concentration studies the creation, analysis and understanding of new media. New media environments are both computational artifacts and cultural experiences that include historical, social, aesthetic, and economic processes. Graduates will be skilled in the critical analysis and making of new media forms such as electronic games, digital video, computer animation, and interactive multimedia.

Students in this concentration complete all of

IAT 313-3 Narrative and New Media  
IAT 320-3 Body Interface  
IAT 343-3 Animation  
IAT 344-3 Moving Images  
IAT 443-3 Interactive Video  
IAT 445-3 Immersive Environments

**Concentration in Informatics**

This concentration covers technological systems used in work, learning and play situations. Its emphasis is on system building with particular emphasis on how people use systems, how to design and program user-centered systems, and how to represent and reason about the objects and environments that people use. Graduates will make systems that people find useful and engaging.

Students in this concentration must complete all of  
IAT 351-3 Advanced Human-Computer Interaction  
IAT 352-3 Knowledge Media Architectures  
IAT 355-3 Introduction to Visual Analytics  
IAT 410-3 Advanced Game Design  
IAT 452-3 Developing Design Tools  
IAT 455-3 Computational Media

**Concentration in Design**

This concentration focuses on the design and use of interactive products and systems. It emphasizes designing and understanding all aspects of successful designs. Graduates will demonstrate ability in contemporary design from requirements through design to critique and evaluation.

Students in this concentration must complete all of  
IAT 333-3 Interaction Design Methods  
IAT 334-3 Interface Design  
IAT 336-3 Materials in Design  
IAT 337-3 Representation and Fabrication  
IAT 338-3 Interactive Objects and Environments  
IAT 431-3 Speculative Design

**BSc Degree Specific Requirements**

Students complete both lower and upper division core requirements as specified above, plus the following.

**Lower Division Requirements**

MACM 101-3 Discrete Mathematics I (or equivalent)

plus one additional three-unit lower division science course from computing science, engineering science, kinesiology, mathematics, statistics, or physics.

**Upper Division Requirements**

Students complete both of  
IAT 402-3 Interdisciplinary Design Studio I (Science)  
IAT 404-3 Interdisciplinary Design Studio II (Science)

plus 24 units chosen from the following, 18 units of which must be IAT courses.

IAT 333-3 Interaction Design Praxis: Practice and Methods

IAT 337-3 Representation and Fabrication  
IAT 351-3 Advanced Human-Computer Interaction

IAT 352-3 Knowledge Media Architectures

IAT 355-3 Introduction to Visual Analytics

IAT 410-3 Advanced Game Design

IAT 432-3 Design Evaluation

IAT 452-3 Developing Design Tools

IAT 455-3 Computational Media

IAT 484-3 Special Topics in Technology in Art and Design

plus any upper division course from computing science, engineering science, kinesiology, management and systems science, mathematics, cognitive science or psychology.

**BA Degree Specific Requirements**

The BA requires both lower and upper division core requirements as specified above, plus the following.

**Lower Division Requirements**

Students complete both of

IAT 206-3 Media Across Cultures (or equivalent)  
MATH 130-3 Geometry for Computer Graphics (or equivalent)

**Upper Division Requirements**

Students complete both of  
IAT 403-3 Interdisciplinary Design Studio I (Arts)  
IAT 405-3 Interdisciplinary Design Studio II (Arts)

plus 24 units chosen from the following, 18 units of which must be IAT courses

IAT 312-3 Foundations of Game Design

IAT 313-3 Narrative and New Media

IAT 320-3 Body Interface

IAT 334-3 Interface Design

IAT 343-3 Animation

IAT 344-3 Moving Images

IAT 431-3 Speculative Design

IAT 443-3 Interactive Video

IAT 445-3 Immersive Environments

IAT 483-3 Special Topics in New Media Environments

plus any upper division course from communication, cognitive science, contemporary arts, human geography, philosophy, business, or psychology

**Honors Program**

An honors degree is available in all three concentrations: design, media arts, and informatics.

**Lower Division Requirements**

Students complete the same lower division requirements as for the major program (see above).

## Upper Division Requirements

Students complete the requirements for a major plus additional IAT electives to total 48 upper division units, and complete the honors research project sequence (IAT 490, 491), which is an individually supervised study and research project for honors students only. In addition, students complete sufficient unspecified upper division courses to total 60, and unspecified courses at any division to total 132 units overall. For honors, a 3.0 or better CGPA and upper division grade point average (UDGPA) is required.

## Minor Program

### Lower Division Requirements

Students complete nine units from the major program's lower division core by choosing three of IAT 100-3 Systems of Media Representations  
IAT 102-3 Graphic Design  
IAT 201-3 Human-Computer Interaction and Cognition  
IAT 202-3 New Media Images  
IAT 222-3 Interactive Arts  
IAT 233-3 Spatial Design  
IAT 235-3 Information Design  
IAT 265-3 Multimedia Programming for Art and Design  
IAT 267-3 Introduction to Technological Systems

### Upper Division Requirements

Students complete 15 upper division IAT units. It should be recognized that some upper division courses have lower division prerequisites.

## Communication and Interactive Arts and Technology Joint Major Program

This BA or BSc program offers in-depth training in new media, design and informatics, and combines this with an understanding about how information is created, coded, communicated and controlled. Program graduates benefit from a unique mix of technical skill, communication theory, and practice from across traditional and new media.

### Communication

**Note:** CMNS directed studies and field placement courses cannot be used for credit in this program.

### Lower Division Requirements

Students complete both of  
CMNS 110-3 Introduction to Communication Studies  
CMNS 130-3 Explorations in Mass Communication

plus six 200 division CMNS courses totalling 18 units including

CMNS 253-3 Introduction to Information Technology: The New Media

and one of

CMNS 220-3 Understanding Television

CMNS 221-3 Media and Audiences

CMNS 223-3 Advertising as Social Communication

CMNS 235-3 Introduction to Journalism in Canada

and one of

CMNS 230-3 The Cultural Industries in Canada: Global Context

CMNS 240-3 The Political Economy of Communication

and one of

CMNS 226-3 Digital Media Communication Techniques

CMNS 258-3 Introduction to Electroacoustic Communication

CMNS 259-3 Acoustic Dimensions of Communication I

and two of

CMNS 260-3 Empirical Communication Research Methods

CMNS 261-3 Documentary Research in Communication

CMNS 262-3 Design and Method in Qualitative Communication Research

### Upper Division Requirements

Students complete five CMNS courses totalling 22 units including one of

CMNS 362-6 Evaluation Methods for Applied Communication Research

CMNS 363-6 Approaches to Media and Audience Research

and any two upper division four unit CMNS courses of the student's choice

and two courses in any one of the following concentrations.

#### Media and Culture Concentration

CMNS 326-4 Applied Media Workshop: On the Hill

CMNS 358-4 Sound Recording: Theory and Design

CMNS 426-4 Video Design for Social Communication

CMNS 428-4 Media Analysis Project Group

CMNS 437-4 Media Democratization: From Critique to Transformation

#### Technology and Society Concentration

CMNS 353-4 Social Contexts of Information Technology

CMNS 354-4 Communication and Social Issues in Design

CMNS 358-4 Sound Recording: Theory and Design

CMNS 359-4 Acoustic Dimensions of Communication II

CMNS 446-4 The Communication of Science and the Transfer Of Technology

CMNS 453-4 Issues in the Information Society

CMNS 454-4 Computer Mediated Work and Workplace Communication

CMNS 455-4 Women and New Information Technologies

#### Political Economy and Policy Concentration

CMNS 333-4 Broadcast Policy and Regulation in the Global Context

CMNS 353-4 Social Contexts of Information Technology

CMNS 433-4 Issues in Communication and Cultural Policy

CMNS 444-4 Political Economy of International Communication

CMNS 446-4 The Communication of Science and the Transfer Of Technology

CMNS 455-4 Women and New Information Technologies

## Interactive Arts and Technology

### Lower Division Requirements

Students complete all of

CMPT 120-3 Introduction to Computing Science and Programming I

IAT 100-3 Systems of Media Representation

IAT 102-3 Graphic Design

IAT 201-3 Human-Computer Interaction and Cognition

IAT/CMPT 265-3 Multimedia Programming for Art and Design

and one of

IAT 222-3 Interactive Arts

IAT 235-3 Information Design

and one of

MACM 101-3 Discrete Mathematics I (for BSc degree)

MATH 130-3 Geometry for Computer Graphics (for BA degree)

### Concentrations

Students choose one of three SIAT concentrations, the requirements of which are shown below.

For the media arts concentration, students complete IAT 202-3 New Media Images

or for the design concentration, students complete IAT 233-3 Spatial Design

or for an informatics concentration, students complete IAT 267-3 Introduction to Technological Systems

### Upper Division Requirements

For a BSc degree\*, students must complete both of IAT 402-3 Interdisciplinary Design Studio I (Science)  
IAT 404-3 Interdisciplinary Design Studio II (Science)

or for a BA degree, students must complete both of IAT 403-3 Interdisciplinary Design Studio I (Arts)  
IAT 405-3 Interdisciplinary Design Studio II (Arts)

\*for the BSc degree, students must ensure that they satisfy the complete BSc requirement of 30 upper division units as specified in the School of Interactive Arts and Technology bachelor of science requirements (see "BSc Degree Specific Requirements" on page 159). This may require completing additional courses beyond those required for this joint major program.

plus five courses totalling 15 units in any area of concentration as shown below.

#### Design Concentration

If students choose this concentration, then they must complete five of

IAT 333-3 Interaction Design Methods

IAT 334-3 Interface Design

IAT 336-3 Materials in Design

IAT 337-3 Representation and Fabrication

IAT 338-3 Interactive Objects and Environments

IAT 431-3 Speculative Design

#### Informatics Concentration

If students choose this concentration, then they must complete five of

IAT 351-3 Advanced Human-Computer Interaction

IAT 352-3 Knowledge Media Architectures

IAT 355-3 Introduction to Visual Analytics

IAT 410-3 Advanced Game Design

IAT 452-3 Developing Design Tools

IAT 455-3 Computational Media

#### Media Arts Concentration

If students choose this concentration, then they must complete five of

IAT 313-3 Narrative and New Media

IAT 320-3 Body Interface

IAT 343-3 Animation

IAT 344-3 Moving Images

IAT 443-3 Interactive Video

IAT 445-3 Immersive Environments

## Interactive Arts and Technology and Business Administration Joint Major Program

This BA, BSc, or BBA program produces well-rounded graduates with expertise in the school's concentrations as well as solid business knowledge. All programs are human-centred and technology oriented. Combining these aspects with business knowledge prepares for industry leadership positions, and provides a strong understanding of how to deploy design processes in larger managerial and technological contexts. As well, students will identify market and funding opportunities.

### Minimum Grade Requirement

Students must achieve a minimum C- grade (or higher) in all required courses.

## Business Administration

### Lower Division Requirements

Students complete all of  
 BUS 207-3 Managerial Economics  
 BUS 251-3 Financial Accounting I  
 BUS 254-3 Managerial Accounting I  
 BUS 272-3 Behaviour in Organizations  
 ECON 103-4 Principles of Microeconomics  
 ECON 105-4 Principles of Macroeconomics  
 MATH 157-3 Calculus for the Social Sciences I  
 and one of  
 BUEC 232-4 Data and Decisions I  
 STAT 270-3 Introduction to Probability and Statistics  
 plus a 100 or 200 division three-unit course that carries a writing designation.

### Upper Division Requirements

Students complete all of  
 BUS 303-3 Business, Society and Ethics  
 BUS 312-4 Introduction to Finance  
 BUS 343-3 Introduction to Marketing  
 BUS 393-3 Commercial Law  
 BUS 478-3 Seminar in Administrative Policy  
 and one of  
 BUS 374-3 Organization Theory  
 BUS 381-3 Introduction to Human Resource Management  
 plus an additional 400 division three-unit BUS course  
 BUS 360W is highly recommended.

In addition to the above, students may also choose to complete a business administration concentration, but additional courses are required (see "Areas of Concentration" on page 145).

## Interactive Arts and Technology

### Lower Division Requirements

Students complete all of  
 CMPT 120-3 Introduction to Computing Science and Programming I  
 CMPT/IAT 265-3 Multimedia Programming for Art and Design  
 IAT 100-3 Systems of Media Representation  
 IAT 102-3 Graphic Design  
 IAT 201-3 Human-Computer Interaction and Cognition  
 IAT 235-3 Information Design

#### Concentrations

Students are also required to choose one of three SIAT concentrations, the requirements of which are shown below.

For those who choose a media arts concentration, students complete  
 IAT 202-3 New Media Images

or for the design concentration, students complete  
 IAT 233-3 Spatial Design

or for the informatics concentration, students complete  
 IAT 267-3 Introduction to Technological Systems

### Upper Division Requirements

#### BSc Requirements

Students who are pursuing a BSc degree complete both of  
 IAT 402-3 Interdisciplinary Design Studio I (Science)  
 IAT 404-3 Interdisciplinary Design Studio II (Science)  
 and also must ensure that the required 30 upper division units, as specified in the SIAT BSc major program, are completed (see "Major Program" on

page 159. Additional courses beyond those required for the joint major program may be necessary.

#### BA Requirements

Students pursuing a BA degree complete both of  
 IAT 403-3 Interdisciplinary Design Studio I (Arts)  
 IAT 405-3 Interdisciplinary Design Studio II (Arts)

#### Concentrations

As in the lower division requirements, students are required to choose one of three SIAT concentrations in the upper division.

For the design concentration, students complete five of  
 IAT 333-3 Interaction Design Methods  
 IAT 334-3 Interface Design  
 IAT 336-3 Materials in Design  
 IAT 337-3 Representation and Fabrication  
 IAT 338-3 Interactive Objects and Environments  
 IAT 431-3 Speculative Design

or for the informatics concentration, students complete five of  
 IAT 351-3 Advanced Human-Computer Interaction  
 IAT 352-3 Knowledge Media Architectures  
 IAT 355-3 Introduction to Visual Analytics  
 IAT 410-3 Advanced Game Design  
 IAT 452-3 Developing Design Tools  
 IAT 455-3 Computational Media

or for the media arts concentration, students complete five of  
 IAT 313-3 Narrative and New Media  
 IAT 320-3 Body Interface  
 IAT 343-3 Animation  
 IAT 344-3 Moving Images  
 IAT 443-3 Interactive Video  
 IAT 445-3 Immersive Environments

## Co-operative Education

Arrangements for the work experiences are made through the school's co-op co-ordinators and the University's office of Co-operative Education. See "Co-operative Education" on page 212.

## TechOne Program

Simon Fraser University Surrey, Central City,  
 5385-13450 102nd Avenue, Surrey, BC V3T 0A3,  
 778.782.7412 Tel, 778.782.7557 Fax,  
 www.sfu.ca/techone, techone@sfu.ca

*Program Director*  
 (to be announced)

*Advisor*  
 A. Stewart BA (S Fraser), 5388 Central City,  
 778.782.7435 Tel, 778.782.7557 Fax,  
 techone\_advising@sfu.ca

TechOne is an innovative and challenging first year cohort program offered by the Faculty of Communication, Art and Technology at Simon Fraser University Surrey. TechOne offers a broad foundation and introduction to university for students who are curious about how technology, design and people influence one another. TechOne specifically prepares students for second year studies in business, communication, computing science, engineering science, and interactive arts and technology; however, students interested in any program at Simon Fraser University may choose TechOne as their first year of studies.

TechOne is an interdisciplinary cohort program where all students complete courses in smaller groups together with a set of other first year students. Access to all TechOne core courses is guaranteed.

### First Term Core

The first term of TechOne consists of two or more courses selected from the following set of three, plus electives, which may be chosen with a view to the student's intended subsequent course of study.

CMPT 120-3 Introduction to Computing Science and Programming I<sup>1</sup>

TECH 101W-3 Communication, Teamwork and Collaborative Process

TECH 106-3 Spatial Thinking and Communicating

<sup>1</sup>Students who already have a substantial background in computing should complete CMPT 126 in place of CMPT 120. See the self test at [www.cs.sfu.ca/undergrad/advising/placement.html](http://www.cs.sfu.ca/undergrad/advising/placement.html)

### Second Term Core

The second term of TechOne consists of two or more courses selected from the following set of three, plus electives, which may be chosen with a view to the student's intended subsequent course of study.

MACM 101-3 Discrete Mathematics I

TECH 114-3 Technology in Everyday Contexts

TECH 124 Design Thinking (or a discipline-specific project course<sup>2</sup>)

<sup>2</sup>The choice of a design/project course may be determined by the student's intended program major. ENSC 182 is required for mechatronics students; CMPT 150 for computing science students.

### TechOne Elective Requirements

In addition to core requirements, students choose electives that will help complete the lower division requirements of their program major. If students have not yet chosen a program major, a set of qualifying electives will be recommended. Students choose the number of electives they complete in any term and may complete electives at any campus.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. The TECH courses are designed to help with completion of these general graduation requirements. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

### After TechOne

Some students enter TechOne having already been admitted to a degree program. Other students will wait until completion of TechOne to apply for admission to a degree program. Either way, TechOne students will bring an understanding of how technology and people interact, as well as a toolkit of critical thinking and communication skills to their second year studies. TechOne will specifically help to prepare students who are interested in degree programs in business, communication, computing science, engineering, or interactive arts and technology. These programs may be subject to enrolment limitations, with competitive entry standards based on academic performance.

## Senior Lecturers

G.M. Ling BA, MA (Car), PhD (S Fraser)  
D. Paterson BEd (Alta), MA, PhD (Br Col)

## Undergraduate Degrees Offered

bachelor of education (honors)  
bachelor of education  
bachelor of general studies (education)

## Diplomas and Certificate Offered

certificate in literacy instruction  
post baccalaureate diploma (general)  
post baccalaureate diploma in counselling and human  
development  
post baccalaureate diploma in early childhood  
education  
post baccalaureate diploma in special education  
post baccalaureate diploma in environmental  
education

## Undergraduate Programs

breadon@sfu.ca

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil  
writing, quantitative and breadth requirements as part  
of their program. See "Writing, Quantitative, and  
Breadth Requirements" on page 7 for information.

## Bachelor of Education Program

The BEd must be approved by the Faculty of  
Education. Major or minor requirements also must be  
approved by the department(s) in which these  
requirements are administered. To complete a BEd, a

student must make application, and be accepted to  
the professional development program. The BEd  
prepares students academically and professionally for  
a teaching career at either the elementary or  
secondary school level. Students considering the BEd  
degree should seek academic counselling for:

## Lower Divisions (first 60 units)

Contact Student Academic Resources, 3300 Maggie  
Benston Student Services Centre, 778.782.4356.

## Upper Divisions (BEd degree, education minors, certificate in literacy instruction, post baccalaureate diplomas)

Contact the Undergraduate Advising Office,  
8560 Education Building, 778.782.3436

## Transfer Credit

Students may be admitted to the BEd program with  
advance standing. Credit may be granted for  
appropriate work at other institutions to a 60 unit  
maximum excluding professional education, or 90  
units including an acceptable year of professional  
education (EDUC 401, 402 and 405).

## General Program

### Requirements

Students complete a minimum of 150 units which  
includes **one** of the following.

- a major from the Faculties of Applied Sciences, Arts  
and Social Sciences, or Science, or
- two minors/extended minors, completed from the  
Faculties of Applied Sciences, Arts or Science or
- the Mathematical Sciences specialization completed  
from the Faculty of Education

and all of the following

- a minor from the Faculty of Education (may be fully  
or partially completed during EDUC 404)
- EDUC 401, 402, 405
- a minimum of 54 units in upper division courses  
(numbered 300 and 400), excluding EDUC 401,  
402, 405 and 406
- two of EDUC 220, 230, 240 or 250
- a minimum of 24 units of upper division education  
courses (excludes EDUC 401, 402, 405, 406 and all  
EDPR courses) which must include two Faculty of  
Education Designs for Learning courses (may  
include courses completed for EDUC 404 or for the  
education minor)
- certificate in liberal arts
- Students must achieve both a minimum cumulative  
grade point average (CGPA) of 2.0 and a minimum  
grade point average (GPA) of 2.0 calculated on the  
basis of all upper division courses completed at  
Simon Fraser University.

## Honors Program

### Requirements

Students complete 162 units minimum which include

- an honors from the Faculties of Applied Sciences,  
Arts and Social Sciences, or Science
- a minor from the Faculty of Education (may be fully  
or partially completed during EDUC 404)
- a minimum of 54 units in upper division courses  
(numbered 300 and 400), excluding EDUC 401,  
402, 405 and 406
- two of EDUC 220, 230, 240 or 250
- EDUC 401, 402 and 405
- a minimum of 24 units of upper division education  
(excludes EDUC 401, 402, 405 and 406) which  
must include two education designs for learning  
courses (may include courses completed for EDUC  
404 and the education minor)
- certificate in liberal arts

- Students must achieve a 3.0 minimum cumulative grade point average (CGPA) and a 3.0 minimum grade point average (GPA) calculated on all upper division courses completed at the University.

## Bachelor of Education as a Second Degree

To be admitted, students must possess a bachelor's degree and have been admitted to the Professional Development Program.

### Requirements

45 upper division units in education which includes

EDUC 401-8 Introduction to Classroom Teaching  
EDUC 402-7 Studies of Educational Theory and Practice

EDUC 405-15 Teaching Semester

A minor from the Faculty of Education

EDUC 404 (15 EDUC upper division units minimum)

Any additional course work needed to address academic requirements for a professional certificate and additional requirements to complete a minor must be completed over and above the required 45 units.

**Note:** It is the student's responsibility to ensure that they meet the BC College of Teachers requirements for a Professional Teaching Certificate.

### Education Courses in French

[www.sfu.ca/baff-offa/educfr](http://www.sfu.ca/baff-offa/educfr)

## Bachelor of General Studies (Education)

In this non-specialist program, students will learn through lectures, seminars, field experiences, service learning (learning while placed in an educational setting) and by distance education.

### Admission Requirements

Applicants will meet the minimum Simon Fraser University admission requirements. See "Admission and Readmission" on page 17.

### Program Requirements

Students complete 120 units including at least 45 upper division units. A 2.00 graduation grade point average (GPA) and upper division GPA is required.

With the exception of EDUC 401, 402, 405 and 406, courses completed in any faculty may be used to satisfy degree requirements, but course admission is subject to the prerequisites of various departments.

#### Writing, Quantitative and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7.

Students complete all of

EDUC 100-3 Selected Questions and Issues (Education)

EDUC 252-4 Introduction to Reflective Practice

EDUC 352-4 Building on Reflective Practice

Additional requirements are satisfied through completion of either the general education option, or the double minor option, or the specialization option as specified below.

#### General Education Option

In addition to the courses specified above, students who choose this option will complete nine lower division and 15 upper division units in EDUC courses.

#### Double Minor Option

In addition to the courses specified above, students complete two minors or extended minors, one of which must be from the Faculty of Education.

#### Specialization Option

Students who choose this option will satisfy the requirements by completing an approved specialization from the Faculty of Education. Students may choose to graduate without enrolling in the Professional Development Program (PDP).

### Transfer Credit

Students may transfer a maximum of 60 units into the BGS (Education) from accredited institutions.

Students may transfer an additional 30 units from an accredited degree-granting institution with Faculty of Education approval, providing 30 of the required 45 upper division units are Simon Fraser University courses. Also note that any minor program must include at least seven upper division units earned at Simon Fraser University. See "Undergraduate Degree Requirements" on page 7 for regulations.

### Professional Development Program

This one year teacher training program is an integral component of the bachelor of education requirements. Admission is by application.

Declaration of BEd as a degree goal does not guarantee acceptance into PDP. See "Professional Development Program (PDP)" on page 167.

### Specializations

#### Early Learning Specialization

This bachelor of general studies (education) program is for students who are considering an early elementary (kindergarten to grade three) teaching career. Note that admission to this program does not guarantee admission to the Professional Development Program (PDP). Students who receive credit for this specialization cannot also receive credit for the minor in early childhood education.

#### Admission Requirements

To be admitted, applicants must have credit for 30 units from an approved early childhood education diploma program with a minimum 3.0 grade point average, or have completed all of  
EDUC 464-4 Early Childhood Education  
EDUC 466-4 Early Childhood Education: Curriculum and Development  
PSYC 250-3 Introduction to Developmental Psychology

#### Lower Division Requirements

Students complete all of  
EDUC 100-3 Selected Questions and Issues in Education  
EDUC 252-4 Introduction to Reflective Practice  
MATH 190-4 Principles of Mathematics for Teachers  
plus six additional EDUC units

#### Upper Division Requirements

Students complete a total of 45 upper division units including  
EDUC 352-4 Building on Reflective Practice  
plus seven units chosen from  
EDUC 322-3 The Social Lives of School Children  
EDUC 332-3 Naturalistic Observations in Early Learning Settings  
EDUC 465-4 Children's Literature  
EDUC 472-4 Designs for Learning: Elementary Language Arts  
EDUC 475-4 Designs for Learning: Elementary Mathematics

plus 20 upper division units in the area of BC elementary school curriculum including at least three units from two of the following areas: biology, Canadian studies, chemistry, computing science, earth sciences, English, environmental science, explorations, fine and performing arts, First Nations, French, geography, history, humanities, kinesiology, mathematics, and physics.

Students may have to complete additional upper division course work to total the required 45 upper division units.

#### Other Requirements

Students also complete

- six units of English, which may include a maximum of three units of English composition\*

- and three units in each of Canadian history, Canadian geography and laboratory science\*

\*see [www.educ.sfu.ca/pdp/admissions/requirements.html](http://www.educ.sfu.ca/pdp/admissions/requirements.html) for a list of acceptable courses

#### Recommended Courses

It is recommended that students complete three units of FPA courses and three units of KIN courses.

### Mathematical Sciences Specialization

For a bachelor of education degree, or a bachelor of general studies (education) degree, with a mathematical sciences specialization, students complete 150 units, comprised of a minimum of 30 lower division and 30 upper division units, including the following, as well as all the bachelor of education requirements.

#### Lower Division Requirements Group 1

Students complete

MACM 101-3 Discrete Mathematics I

and one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I for the Biological Sciences

MATH 154-3 Calculus I for the Biological Sciences

MATH 157-3 Calculus for the Social Sciences I

and one of

MATH 152-3 Calculus II

MATH 155-3 Calculus II for the Biological Sciences

MATH 158-3 Calculus for the Social Sciences II

#### Lower Division Requirements Group 2

Students complete at least four of

CMPT 120-3 Introduction to Computing Science and Programming I (or 126)

MACM 201-3 Discrete Mathematics II

MACM 202-4 Mathematical Modeling and Computation

MATH 113-3 Euclidean Geometry\*

MATH 240-3 Algebra I: Linear Algebra\* (or 232)

MATH 242-3 Introduction to Analysis

STAT 270-3 Introduction to Probability and Statistics

#### Lower Division Requirements Group 3

Students complete at least three of

EDUC 211-3 Mathematical Experience I: Numbers and Beyond

EDUC 212-3 Mathematical Experience II: Shape and Space

MATH 121-3 Mathematical Expeditions

MATH 160W-3 Mathematics in Action

MATH 178W-3 Fractals and Chaos

MATH 197-3 Hitchhikers Guide to Everyday Math

STAT 101-3 Introduction to Statistics

#### Upper Division Requirements

Students complete a total of 30 units chosen from the following

CMPT 320-3 Social Implications – Computerized Society

MACM 316-3 Numerical Analysis I

MATH 308-3 Linear Programming

MATH 309-3 Continuous Optimization

MATH 310-3 Introduction to Ordinary Differential Equations

MATH 338-3 Advanced Linear Algebra

MATH 340-3 Algebra II: Rings and Fields

MATH 341-3 Algebra III: Groups

MATH 342-3 Elementary Number Theory\*

MATH 343-3 Applied Discrete Mathematics

MATH 345-3 Introduction to Graph Theory

MATH 380-3 History of Mathematics\*

MATH 408-3 Discrete Optimization

MATH 419-3 Linear Analysis

MATH 440-3 Galois Theory

MATH 443-3 Combinatorial Theory

MATH 445-4 Graph Theory

MATH 447-3 Coding Theory

\*recommended

## Counselling and Human Development Minor Program

This minor teaches a combination of theoretical, empirical, and practical matters central to the understanding and practice of counselling and human development. The course work provides students with a strong theoretical and critical foundation on which to base and evaluate counselling and teaching practices aimed at enhancing human development.

### Lower Division Requirements

EDUC 220-3 Introduction to Educational Psychology  
EDUC 222-3 Research Methods in Educational Psychology  
PSYC 250-3 Introduction to Developmental Psychology

### Upper Division Requirements

(15 units minimum)

Students complete both of  
EDUC 322-3 Social Lives of School Children  
EDUC 323-3 Introduction to Counselling Theories

Students must also complete three electives selected from the following. At least two of

EDUC 324-3 Foundations of Multicultural Counselling  
EDUC 327-3 Self, Psychology and Education  
EDUC 328-3 Theories of Career Development and Education  
EDUC 423-4 Helping Relationships  
EDUC 464-4 Early Childhood Education

If courses chosen from the list above do not add up to a minimum of 15 units, then one additional course chosen from the following is required:

EDUC 371-4 School Health Education  
EDUC 422-4 Learning Disabilities  
EDUC 428-4 Nature and Nurture of Gifted Students  
EDUC 437-4 Ethical Issues in Education  
EDUC 441-4 Multicultural/Anti-Racist Education  
EDUC 445-4 Legal Context of Teaching

## Curriculum and Instruction Minor Program

This minor is for those desiring theoretical and practical expertise in contemporary approaches to curriculum development and instructional design.

### Lower Division Requirements

Students complete two of  
EDUC 220-3 Introduction to Educational Psychology  
EDUC 230-3 Introduction to Philosophy of Education  
EDUC 240-3 Social Issues in Education  
EDUC 250-3 Studies in the History of Education in the Western World

### Upper Division Requirements

Students complete  
EDUC 471-4 Curriculum Development: Theory and Practice

plus 11 upper division EDUC units and/or EDPR courses to total 15 units.

## Early Learning Minor Program

This minor provides a focus for students wishing to work with children aged three through eight. Students who receive credit for this minor cannot also receive credit for the early learning specialization with the bachelor of general studies program.

### Lower Division Requirements

PSYC 250-3 Introduction to Developmental Psychology

### Upper Division Requirements

EDUC 464-4 Early Childhood Education  
EDUC 466-4 Early Childhood Education: Curriculum and Development

plus seven units chosen from the following  
EDUC 322-3 The Social Lives of School Children  
EDUC 332-3 Naturalistic Observations in Early Learning Settings

EDUC 422-4 Learning Disabilities  
EDUC 465-4 Children's Literature  
EDUC 472-4 Designs for Learning: Elementary Language Arts  
EDUC 473-4 Designs for Learning: Reading  
EDUC 475-4 Designs for Learning: Elementary Mathematics

Students will not receive credit for both the early learning minor and the early childhood minor.

## Education and Technology Minor Program

This minor provides a structure for undergraduate studies of education and technology.

### Lower Division Requirements

Students complete  
EDUC 260-3 Learning and Teaching Through Technology

and one of

EDUC 220-3 Introduction to Educational Psychology  
EDUC 230-3 Introduction to Philosophy of Education  
EDUC 240-3 Social Issues in Education

### Upper Division Requirements

Students complete all of  
EDUC 358-3 Foundations of Educational Technology  
EDUC 463-4 Multimedia for Curriculum Design  
EDUC 482-4 Designs for Learning: Information Technology

and one of

EDUC 320-3 Instructional Psychology  
EDUC 325-4 Assessment for Classroom Teaching  
EDUC 412-4 Designs for Learning: Second Language Arts  
EDUC 414-4 Designs for Learning: Secondary Social Studies  
EDUC 415-4 Designs for Learning: Secondary Mathematics  
EDUC 416-4 Designs for Learning: Secondary Science  
EDUC 426-4 Teaching Children and Youth with Special Needs  
EDUC 430-4 Designs for Learning: Dance  
EDUC 437-4 Ethical Issues in Education  
EDUC 471-4 Curriculum Development: Theory and Practice  
EDUC 472-4 Designs for Learning: Elementary Language Arts  
EDUC 473-4 Designs for Learning: Reading  
EDUC 474-4 Designs for Learning: Elementary Social Studies  
EDUC 475-4 Designs for Learning: Elementary Mathematics  
EDUC 476-4 Designs for Learning: Elementary Science  
EDUC 477-4 Designs for Learning: Art  
EDUC 478-4 Designs for Learning: Music  
EDUC 479-4 Designs for Learning: Physical Education  
EDUC 480-4 Designs for Learning: French as a Second Language  
EDUC 481-4 Designs for Learning: French Immersion Programs and Francophone Schools  
EDUC 482-4 Designs for Learning: Information Technology  
EDUC 483-8 Designs for Learning: Curriculum Studies  
EDUC 485-8 Designs for Learning: Writing

## Educational Psychology Minor Program

Educational psychology makes theoretical and experimental inquiries into how students learn from instruction, how they acquire and express motivation in educational settings, and how they develop skills in school subjects and for learning. This program also studies how this first line of inquiry contributes to designs for instructional experiences that promote a full spectrum of achievements.

The minor consists of required courses that develop a broad background in educational psychology supplemented by electives. For a teaching career, it provides a research based foundation in the psychology of teaching and learning underlying a professional studies program. For others, it articulates applied psychology serving one of our society's most important aims, education of people of all ages.

### Lower Division Requirements

EDUC 220-3 Introduction to Educational Psychology  
EDUC 222-3 Research Methods in Educational Psychology

### Upper Division Requirements

Students complete all of  
EDUC 320-3 Instructional Psychology  
EDUC 325-3 Assessment for Classroom Teaching  
EDUC 326-3 Classroom Management and Discipline plus two of  
EDUC 327-3 Self, Psychology and Education  
EDUC 422-4 Learning Disabilities  
EDUC 428-4 Nature and Nurture of Gifted Students  
EDUC 464-4 Early Childhood Education

## Environmental Education Minor Program

This minor develops teacher skills in environmental and outdoor education programs from kindergarten through grade 12, and in the organization and operation of residential and day centre outdoor education, wilderness outdoor recreation, and other interdisciplinary environmental school programs.

### Prerequisite Courses

Students complete nine units selected from the following.

BISC 102-4 General Biology  
BISC 204-3 Introduction to Ecology\*  
EDUC 240-3 Social Issues in Education  
GEOG 100-3 Human Geography  
GEOG 111-3 Earth Systems  
GEOG 215-3 Biogeography\*  
GEOG 241-3 Social Geography  
KIN 142-3 Introduction to Kinesiology  
PHIL 001-3 Critical Thinking  
PHIL 120-3 Introduction to Moral Philosophy  
PSYC 106-3 Psychological Issues in Contemporary Society  
SA 150-4 Introduction to Sociology  
SA 202-4 Post-Industrial Society

\*students with credit for GEOG 215 may not receive credit for BISC 204

### Required Courses

Students complete a minimum of 14 units including  
EDUC 452-8 Environmental Education

and two of

BISC 304-3 Animal Ecology  
BISC 306-3 Invertebrate Biology  
BISC 310-3 The Natural History of British Columbia  
BISC 317-3 Insect Biology  
BISC 337-3 Plant Biology  
BISC 404-3 Plant Ecology  
EDUC 414-4 Designs for Learning: Secondary Social Studies  
EDUC 416-4 Designs for Learning: Secondary Science  
EDUC 433-4 Philosophical Issues in Curriculum  
EDUC 471-4 Curriculum Development: Theory and Practice  
EDUC 474-4 Designs for Learning: Elementary Social Studies  
EDUC 476-4 Designs for Learning: Elementary Science  
EDUC 459-4 Instructional Activities in Physical Education  
EDUC 482-4 Designs for Learning: Information Technology  
GEOG 322-4 World Resources  
GEOG 369-4 Human Microgeography

## French Education Minor Program

This minor explores contemporary second language teaching and learning theory, as well as experientially based approaches to French language curriculum development and instructional design, so that culturally informed and appropriate practices can be developed and used in French-speaking classrooms.

### Lower Division Requirements

Students complete three EDUC lower division units as well as six FREN units at the 200 division (or can demonstrate an equivalent knowledge of the language).

### Upper Division Requirements

Students complete a minimum of 15 units as specified below, including one or both of

EDUC 378-3 Developing Skills for Teaching Core French\*

EDUC 380-4 Introduction to Teaching French in Canadian Contexts\*\*

and one of

EDUC 480-4 Designs for Learning: French as a Secondary Language

EDUC 481-4 Designs for Learning: French Immersion Programs and Schools

To bring the total to 15 required units as specified above, students must also complete two to three of the following courses, when taught in French.

EDUC 414-4 Designs for Learning: Secondary Social Studies

EDUC 415-4 Designs for Learning: Secondary Mathematics

EDUC 416-4 Designs for Learning: Secondary Science

EDUC 474-4 Designs for Learning: Elementary Social Studies

EDUC 475-4 Designs for Learning: Elementary Mathematics

EDUC 476-4 Designs for Learning: Elementary Science

\*required for students entering Université Laval's Explore Program

\*\*students pursuing second and subsequent degrees are not required to complete this course

### Explore Program at Université Laval

Simon Fraser University has an official agreement with Université Laval Language School (ELUL) in Québec City. Students in this program can complete specially designed methodology courses in the *Explore* program, and then use one of the following Laval courses towards Simon Fraser University's French Education Minor.

These courses are recognized by the British Columbia College of Teachers as part of the requirements for teacher certification.

DID 18200 Didactics of Oral French

DID 18201 Didactics of Written French

Either of these would replace EDUC 380 as part of the French Education Minor requirements here at Simon Fraser University.

Although not a requirement, students are strongly encouraged to apply for entry into this French as a second language program for the linguistic and cultural experience in a setting.

A bursary is available through the BC Ministry of Education's French Program branch.

## International and Global Education Minor Program

This minor explores an interdisciplinary, experientially based approach to international and global education so that appropriate learning experiences can be created and infused in any given elementary and secondary course.

## Lower Division Requirements

Students complete one of the following.

EDUC 100-3 Questions and Issues in Education

EDUC 230-3 Introduction to Philosophy of Education

EDUC 240-3 Social Issues in Education

EDUC 250-3 Studies in the History of Education in the Western World

## Upper Division Requirements

Students complete a minimum of 15 units as specified below plus an intercultural/international experience (see below).

EDUC 370-4 International and Intercultural Education

EDUC 435-4 Infusing Global Perspectives in Curriculum

and either

one Designs for Learning course and one of the following courses

or two of

EDUC 311-3 Foundations in Aboriginal Education, Language and Culture

EDUC 367-4 Teaching Children and Minority Language Backgrounds in Elementary Classrooms

EDUC 382-4 Diversity in Education: Theories, Policies, Practices

EDUC 441-4 Multicultural/Anti Racist Education

EDUC 448-4 Teaching about Justice, Law and Citizenship

EDUC 452-8 Environmental Education

EDUC 467-4 Curriculum and Instruction in Teaching English as a Second Language

EDUC 471-4 Curriculum Development: Theory and Practice

## Intercultural/International Experience

In addition to the requirements listed above, an academic intercultural and/or international experience is also required before students complete this minor. This post-secondary experience may be an intercultural experience within Canada, such as a practicum experience in a First Nations community, or outside of Canada. Examples include

- co-operative education placement in an intercultural/international setting
- participation in an international field school program
- international student exchange term outside of Canada or the United States
- teaching English as a foreign language outside of Canada or the United States

Experiences fulfilling the requirements of this minor will need to meet the following criteria.

- successful completion of the program experience as indicated by an official document from the supervising institution
- an experience with high participatory involvement
- an experience completed within five years prior to enrolling in the minor, or five years after completing the course work for the minor

Those who successfully complete the PDP ITEM program or international field school at Simon Fraser University will meet the above requirements.

All other applicants must submit a report indicating the nature of their experience, an analysis of their learning, and a letter of support from a person involved in supervising the experience. The director of undergraduate programs will oversee the submission assessment. A follow-up interview may be required.

## Learning and Developmental Disabilities Minor Program

This minor enhances understanding of learning and developmental disabilities, and explores an interdisciplinary approach to the health, education and care of infants, children and adults with disabilities.

## Lower Division Requirements

Students complete one of

EDUC 220-3 Introduction to Education Psychology

PSYC 250-3 Introduction to Developmental Psychology

## Recommended Lower Division Courses

It is strongly recommended that minor program students complete at least one of the following.

LING 220-3 Introduction to Linguistics

PSYC 221-3 Introduction to Cognitive Psychology

## Upper Division Requirements

Students complete a minimum of 15 units as specified below.

EDUC 422-4 Learning Disabilities

EDUC 424-4 Learning Disabilities: Laboratory

plus one of

EDUC 315-3 Individual and Developmental Differences in Language Acquisition

EDUC 473-4 Designs for Learning: Reading

plus one of

EDUC 426-4 Teaching Children and Youth with Special Needs

EDUC 427-4 Teaching Children with Special Needs in Inclusive Classrooms

EDUC 428-4 Nature and Nurture of Gifted Students

EDUC 475-4 Designs for Learning: Elementary Mathematics

PSYC 354-3 Development of Children's Thinking

PSYC 355-3 Adolescent Development

PSYC 356-3 Developmental Psychopathology

PSYC 491-3 Developmental Disabilities

## Physical Education Minor Program

This minor program provides students in the professional development program with competence to teach physical education.

### Prerequisite Courses

Prospective students should complete at least three of the following courses (or approved transfer courses from community colleges or other universities) prior to enrolling in EDUC 401. Students should choose those courses which are prerequisites to the upper division courses they will complete for the minor.

EDUC 220-3 Introduction to Education Psychology

EDUC 230-3 Introduction to Philosophy of Education

EDUC 240-3 Social Issues in Education

FPA 120-3 Introduction to Contemporary Dance

KIN 105-3 Fundamentals of Human Structure and Function

KIN 110-3 Human Nutrition: Current Issues

KIN 140-3 Contemporary Health Issues

KIN 142-3 Introduction to Kinesiology

KIN 143-3 Exercise Management

KIN 205-3 Introduction to Human Physiology

KIN 241-3 Sports Injuries — Prevention and Rehabilitation

All minor candidates must complete designated curriculum seminars and workshops during EDUC 402 and a specified teaching assignment in physical education during EDUC 405. Details of these requirements are available during EDUC 401. The minor in physical education may not be declared on a student's program until all prerequisites, including a practicum placement in EDUC 405, are met.

## Upper Division Requirements

Students complete a minimum of 14 units as specified below.

EDUC 459-4 Instructional Activities in Physical Education

EDUC 479-4 Designs for Learning: Physical Education

plus two of

EDUC 330-3 Movement Language Elements for Dance in Education

EDUC 457-4 Education and Drama  
KIN 342-3 Active Health

Students can include only one Designs for Learning course chosen from the following.

EDUC 412-4 Designs for Learning: Secondary Language Arts  
EDUC 414-4 Designs for Learning: Secondary Social Studies  
EDUC 415-4 Designs for Learning: Secondary Mathematics  
EDUC 416-4 Designs for Learning: Secondary Science  
EDUC 430-4 Designs for Learning Dance  
EDUC 472-4 Designs for Learning: Elementary Language Arts  
EDUC 473-4 Designs for Learning: Reading  
EDUC 474-4 Designs for Learning: Elementary Social Studies  
EDUC 475-4 Designs for Learning: Elementary Mathematics  
EDUC 476-4 Designs for Learning: Elementary Science  
EDUC 477-4 Designs for Learning: Art  
EDUC 478-4 Designs for Learning: Music  
EDUC 480-4 Designs for Learning: French as a Second Language  
EDUC 481-4 Designs for Learning: French Immersion and Programme-cadre de Français  
EDUC 482-4 Designs for Learning: Information Technology  
EDUC 485-8 Designs for Learning: Writing

### Secondary Mathematics Education Minor Program

This minor will interest pre-service teachers who are considering a career in teaching secondary mathematics.

#### Admission Requirements

Applicants must have sufficient course work to teach secondary mathematics (usually the equivalent of a minor in mathematics).

#### Upper Division Requirements

Students complete a minimum of 15 units as specified below.

EDUC 411-3 Investigations in Mathematics for Secondary Teachers  
EDUC 415-4 Designs for Learning: Secondary Mathematics

plus one of the following electives. This list is composed of topics that are directly related to mathematics such as technology, science, philosophy and music.

EDUC 358-3 Foundations of Educational Technology  
EDUC 416-4 Designs for Learning: Secondary Science  
EDUC 433-4 Philosophical Issues in Curriculum  
EDUC 463-4 Multimedia for Curriculum Design  
EDUC 469-4 Music Education as Thinking in Sound  
EDUC 482-4 Designs for Learning: Information Technology

Students complete an additional 300 or 400 division course(s) in education to complete the total of at least 15 units (excluding EDUC 475).

### Certificate in Literacy Instruction

Contact the Undergraduate Advising Office, 8631 Education Building, 778.782.3436.

This certificate prepares students to teach literacy skills to adult learners. By combining courses from different disciplines with opportunities for guided practice, it provides historical and contextual perspectives on literacy, acquaints students with current field practices and develops practical skills.

Completion of the certificate is normally within five years of admission to the program.

### Program Requirements

Students complete 29 units, of which 23 are in the following seven required courses.

EDUC 240-3 Social Issues in Education  
EDUC 341-3 Literacy, Education and Culture  
EDUC 342-3 Contemporary Approaches to Literacy Instruction  
EDUC 343-5 Literacy Practicum  
ENGL 210-3 Advanced University Writing

plus two of

ENGL 101-3 Introduction to Fiction  
ENGL 102-3 Introduction to Poetry  
ENGL 103-3 Introduction to Drama  
ENGL 104-3 Introduction to Prose Genres

In addition, students must complete at least an additional six units in Faculty of Education or Faculty of Arts and Social Sciences courses designated below. Students must select courses that will further their own specific interests in literacy instruction and should be aware that some courses require the completion of prerequisites outside the certificate program.

#### Faculty of Education

EDUC 325-3 Assessment for Classroom Teaching  
EDUC 422-4 Learning Disabilities  
EDUC 441-4 Multicultural/Anti-Racist Education  
EDUC 467-4 Curriculum and Instruction in Teaching English as a Second Language  
EDUC 471-4 Curriculum Development: Theory and Practice  
EDUC 472-4 Designs for Learning: Language Arts  
EDUC 473-4 Designs for Learning: Reading

#### Faculty of Arts and Social Sciences

ENGL 370-4 Studies in Language  
ENGL 371-4 Writing: Theory and Practice  
HUM 320-4 The Humanities and Philosophy  
HUM 321-4 The Humanities and Critical Thinking  
LING 260-3 Language, Culture and Society  
PHIL 001-3 Critical Thinking  
PSYC 206-3 Introduction to Psychological Assessment  
SA 304-4 Social Control  
SA 333-4 Schooling and Society

#### Notes

- Units applied to this certificate may not be applied to any other Simon Fraser University certificate or diploma, but they may be applied toward major or minor program requirements or toward a bachelor's degree under regulations governing those programs.
- At least 15 of the 29 required units must be completed at Simon Fraser University.
- Students must achieve a minimum 2.0 GPA, calculated on all Simon Fraser University courses applied to the program, with the exception that duplicate courses are counted only once.
- The certificate program cannot be used in place of the Faculty of Education's professional development program or equivalent as a route to a British Columbia teaching certificate.

### Post Baccalaureate Diploma (General)

Contact the Undergraduate Advising Office, 8631 Education Building, 778.782.3436.

This diploma offers students the opportunity to design and pursue a program of individualized study. Students wishing to use the post baccalaureate diploma to raise their teacher qualifications should speak with the Teacher Qualification Service or their school district regarding acceptable courses.

#### Program Requirements

Successful completion, within five years, of an approved program comprised of 30 units of upper division or graduate work plus any necessary prerequisites is required. A minimum of 15 of the 30 units must be earned in education and/or educational

professional courses and a maximum of 12 may be transfer units.

Courses completed within 10 years of starting the PBD may (with permission) be considered as part of the requirements for the diploma.

Students must maintain a 2.5 GPA on courses used for the diploma.

Courses completed during the EDUC 404 term may not be used toward a post baccalaureate diploma.

### Post Baccalaureate Diploma in Counselling and Human Development

This program offers individuals, who are employed or seeking employment in a human services or health care profession, a focused introduction to the core knowledge bases involved in counselling. Course work is designed to enhance the effectiveness of students in their current job or better prepare them for a future career in a helping profession.

#### Admission Requirements

In addition to the following requirements, students must also meet the Post Baccalaureate Diploma (General) program's requirements as listed in the "Program Requirements" on page 166. Applications will be reviewed by cognate faculty, the graduate faculty associate, or their designates. Typically, candidates will have the following prerequisites prior to admission to this program.

- a bachelor's degree with at least an introductory psychology course, a course in human development, plus one more upper division psychology or sociology course
- a minimum 50 hours of relevant voluntary or paid experience
- a written statement of career interest
- an admission grade point average of 2.5 or equivalent

#### Required Courses (17 units)

Students complete all of  
EDUC 323-3 Introduction to Counselling Theories  
EDUC 324-3 Foundations of Multicultural Counselling  
EDUC 328-3 Theories of Career Development and Education  
EDUC 423-4 Helping Relationships  
EDUC 437-4 Ethical Issues in Education  
**Elective Courses (13 units)**  
Students complete a minimum of 13 units chosen from the following.

EDUC 326-3 Classroom Management and Discipline  
EDUC 327-3 Self, Psychology and Education  
EDUC 322-3 The Social Lives of School Children  
EDUC 370-4 International and Intercultural Education  
EDUC 464-4 Early Childhood Education  
GERO 302-3 Health Promotion and Aging

### Post Baccalaureate Diploma in Early Childhood Education

This program provides a focus for students wishing to work with children aged three through eight. In addition to the following requirements, students must also meet the requirements stated above, in the *Program Requirements* section of the *Post Baccalaureate Diploma* (page 166).

#### Program Requirements

EDUC 322-3 The Social Lives of School Children  
EDUC 464-4 Early Childhood Education  
EDUC 465-4 Children's Literature

plus a minimum of three courses chosen from the following

EDUC 311-3 Foundations in Aboriginal Education, Language and Culture  
EDUC 315-3 Individual and Development Differences in Language Acquisition  
EDUC 326-3 Classroom Management and Discipline

EDUC 330-3 Movement Language Elements for Dance in Education  
 EDUC 341-3 Literacy, Education and Culture  
 EDUC 367-4 Teaching Children from Minority Language Backgrounds in Elementary Classrooms  
 EDUC 457-4 Drama and Education  
 EDUC 459-4 Instructional Activities in Physical Education  
 EDUC 467-4 Curriculum and Instruction in Teaching English as a Second Language  
 EDUC 471-4 Curriculum Development: Theory and Practice  
 EDUC 473-4 Designs for Learning: Reading  
 EDUC 475-4 Designs for Learning: Elementary Mathematics  
 EDUC 477-4 Designs for Learning: Art  
 EDUC 478-4 Designs for Learning: Music  
 plus additional upper division units in related topic areas to bring the total to 30 upper division units.

### Post Baccalaureate Diploma in Environmental Education

This program will interest practicing teachers who want to assist students to develop a greater awareness and understanding of the broadly defined environment. The program encompasses aspects of environment education. Through selected course work, environmental issues are explored using a multidisciplinary approach and historical and contemporary issues in human-environment interaction as related to diverse curricula.

In addition to the following requirements, students must also meet the requirements stated above, in the *Program Requirement* section of the "Post Baccalaureate Diploma (General)" on page 166.

Students complete 30 units as specified below including all of  
 EDUC 452-8 Environmental Education  
 EDUC 493-4 Directed Studies in Environmental Education

plus one of  
 EDUC 414-4 Designs for Learning: Secondary Social Studies  
 EDUC 416-4 Designs for Learning: Secondary Science  
 EDUC 474-4 Designs for Learning: Elementary Social Studies  
 EDUC 476-4 Designs for Learning: Elementary Science

plus two of  
 EDUC 311-3 Foundations in Aboriginal Education, Language and Culture  
 EDUC 433-4 Philosophical Issues in Curriculum  
 EDUC 437-4 Ethical Issues in Education  
 EDUC 441-4 Multicultural and Anti-Racist Education  
 EDUC 471-4 Curriculum Development: Theory and Practice

plus a minimum of six upper division units from the following.

For applicants with an academic background in the humanities/social sciences:

BISC 304-3 Animal Ecology  
 BISC 310-1 Natural History of BC  
 BISC 425-3 Biology and Society  
 EASC 303-3 Environmental Geoscience  
 EVSC 401-1 Current Topics in Environmental Science  
 GEOG 449-4 Environmental Processes and Urban Development  
 REM 311-3 Applied Ecology and Sustainable Environments  
 REM 412-3 Environmental Modeling  
 REM 445-3 Environmental Risk Assessment and Management

For applicants with an academic background in the sciences/applied sciences:

ECON 460-3 Seminar in Environmental Economics  
 GEOG 315-4 World Ecosystems  
 GEOG 316-4 Ecosystem Biogeochemistry  
 GEOG 385-3 Agriculture and the Environment  
 GEOG 389W-4 Human Ecology, Human Relations to Nature  
 GEOG 449-4 Environmental Processes and Urban Development  
 HIST 432-3 Problems in Environmental History  
 SA 326-4 Ecology and Social Thought  
 SA 371-4 Environment and Society

Additional courses consistent with the aims of the post baccalaureate diploma (PBD) may be substituted for courses in the above list with permission from the Undergraduate Programs office. Students are responsible for prerequisites and other permissions needed to gain entry to courses listed above. Departments sometimes give course enrolment priority to their own students. Because this will reduce access to others, PBD students should consult with faculty and departmental advisors when planning their program.

### Post Baccalaureate Diploma In French and Education

See "Post Baccalaureate Diploma in French and Education" on page 114.

### Post Baccalaureate Diploma in Special Education

This program offers educators and health care professionals who work with children and adults with disabilities the opportunity to consolidate work in lifespan development and special education in a way that facilitates a common discussion ground. The course work emphasizes knowledge and skills about lifespan development, individual differences, and assessment and support. Emphasis is placed on understanding how challenges presented to families of children with disabilities change over time as children mature and as they make transitions across home, school and community contexts.

#### Required Courses (22 units)

EDUC 315-3 Individual and Developmental Differences in Children's Language Acquisition  
 EDUC 422-4 Learning Disabilities  
 EDUC 426-4 Teaching Children and Youth with Special Needs  
 EDUC 464-4 Early Childhood Education

plus one of  
 EDUC 322-3 Social Lives of School Children  
 GERO 302-3 Health Promotion and Aging  
 PSYC 361-3 Social Cognition

plus one of  
 EDUC 424-4 Learning Disabilities Laboratory  
 EDUC 427-4 Seminar in Teaching Children with High-Incidence

#### Optional Courses (8 units)

EDUC 323-3 Introduction to Counselling Theories  
 EDUC 351-3 Teaching the Older Adult  
 EDUC 382-4 Diversity in Education: Theories, Policies, Practices  
 EDUC 423-4 Helping Relationships  
 EDUC 428-4 Nature and Nurture of Gifted Students  
 EDUC 433-4 Philosophical Issues in Education  
 EDUC 468-4 Cognition and Language in ESL Instruction  
 GERO 300-3 Introduction to Gerontology  
 GERO 401-3 Aging and the Built Environment  
 PSYC 354-3 Development of Children's Thinking  
 PSYC 355-3 Adolescent Development  
 PSYC 356-3 Developmental Psychopathology

### Post Baccalaureate Diploma In Teaching English As a Second Language

See "Post Baccalaureate Diploma in Teaching English as a Second Language" on page 125.

### Co-operative Education

This program is for qualified students who wish to combine work experience with academic studies.

Please note that this program is not part of the Professional Development Program and will not provide the training required for a teaching certificate from the BC College of Teachers.

For admission to co-operative education, students must have completed 30 units with a CGPA of 3.0 and have completed

EDUC 100-3 Selected Questions and Issues in Education

and two of  
 EDUC 220-3 Introduction to Educational Psychology  
 EDUC 230-3 Introduction to Philosophy of Education  
 EDUC 240-3 Social Issues in Education  
 EDUC 260-3 Learning and Teaching Through Technology

Transfer students must complete at least 15 units at Simon Fraser University before applying. Arrangements for work terms are made through the co-op co-ordinator, who should be consulted at least one term in advance. For details, see "Co-operative Education" on page 212.

### Field Programs

 778.782.5882 Fax, [www.educ.sfu.ca/fp](http://www.educ.sfu.ca/fp),  
[edprgps@sfu.ca](mailto:edprgps@sfu.ca)

#### Director

L. Kanevsky BA (S Fraser), MASpEd (San Diego),  
 MPhil, PhD (Col)

Field Programs enhances teacher continuing education through collaboration with other British Columbia educational agencies. All courses and programs are located at sites other than the Burnaby Mountain campus or Simon Fraser University Surrey or Simon Fraser University Vancouver. Courses offered through Field Programs (designated EDPR) are shown on page 370. Field Programs also offers a graduate diploma in advanced professional studies in education. Field Programs works with associations to co-develop ongoing professional in-service opportunities for teachers, including annual conferences and theme-specific non-credit in-service series.

### Professional Programs

8531 Education Building, 778.782.4326 Tel,

 (Qld), PhD (Alta)

#### Admissions Advisor

Ms. D. Kelso BA (S Fraser), 8624 Education Building,  
 778.782.3620/3149

### Professional Development Program (PDP)

Applicants must be attending Simon Fraser University or be admissible. See "Admission and Readmission" on page 17.

- All candidates are required to complete the on-line Professional Development Program application form.
- Candidates who have not attended Simon Fraser University previously, or who have not attended in

any of the three terms prior to intended enrolment, must apply for admission or readmission. See "Admission and Readmission" on page 17.

- All applications must be submitted to the PDP admissions office by January 15 for the fall term and May 15 for the spring term.
- All applicants pay the PDP application fee on-line or directly to the PDP admissions office, Faculty of Education.

The Professional Development program is also available in French, for students aspiring to teach in Core French, French Immersion or Programme Francophone. See "Bureau des affaires francophones et francophiles (BAFF) /Office of Francophone & Francophile Affairs (OFFA)" on page 453

### Elementary Applicants

Elementary applicants must, by the date of application, have completed a minimum of 76 units of courses acceptable for credit at Simon Fraser University (should include 16 units of upper division) including the following prerequisite courses.

- six units in English (a maximum of three units of English composition may be included)
- one course (three units) in each of Canadian history, Canadian geography, and laboratory science
- MATH 190
- elementary applicants should have education, fine and performing arts and kinesiology courses

### Secondary Applicants

Applicants who plan to teach at the secondary level must fulfil the requirements of a teachable major subject or two teachable minor subjects prior to commencing PDP.

#### Teachable Majors or Minors

biology  
Canadian studies (minor only)\*  
chemistry  
computing science (minor only)  
dance (FPA) (minor only)  
earth sciences  
English  
English and French literatures (joint major)  
First Nations (minor only)\*  
French  
French, history and politics (joint major)\*  
geography\*  
history\*  
humanities (minor only)\*  
kinesiology  
mathematics  
music (FPA)  
physics  
social studies\*  
theatre (FPA) (minor only)  
visual art (FPA)  
world literature

\*see requirements sheet in the Faculty of Education

Students planning to teach at the secondary level must complete requirements prior to commencing PDP, except BEd candidates who cannot complete their degree until they have successfully completed PDP. These BEd candidates complete one teachable major or two teachable minors prior to commencing PDP. Students from other institutions may apply prior to degree completion, but must have completed the degree one full term prior to commencing PDP.

Secondary applicants must complete six English units (a maximum of three units of English composition may be included) one full term prior to starting PDP.

Secondary applicants are encouraged to have education courses.

### All Applicants

- A minimum of two reference letters, and no more than three (one should describe the candidate's

experience in teaching/instructional related functions) must be submitted.

- A written assignment (described further on the PDP website) is required.
- A resumé must also be submitted by all applicants (see PDP website for information).
- Before program admission, applicants must demonstrate competence in written and oral English (and written and oral French for French immersion and French as a second language programs).
- Students may be asked to submit evidence of good health before being considered for admission.
- Students may be required to have an interview before being considered for program admission.
- If the number of PDP applicants exceeds facilities and staffing capabilities, the admissions committee will select the best qualified candidates.
- Admission selection is generally given to students whose applications show experience with and commitment to community service that may include teaching or other helping roles.
- Because the number of well qualified PDP applicants, it is most improbable that candidates who have been unsuccessful in four previous competitions will be considered favorably in any subsequent competition. Those who have been unsuccessful in gaining entry on at least four occasions are discouraged from further application.

### Program Description

The program's duration is three terms. Professional studies and activities are arranged in this sequence.

#### First Term of Professional Development Program

EDUC 401-8 Introduction to Classroom Teaching\*  
EDUC 402-7 Studies of Educational Theory and Practice\*

\*not offered in summer term

EDUC 401 and 402 are offered as an integrated program, combining theory and practice in both on campus seminars and in-school practice in the first term of PDP. This is accomplished by alternating blocks of classroom teaching with workshops and instruction on campus.

During EDUC 401, students are assigned to a teacher (school associate) identified by school authorities and supervised by a faculty associate appointed by the University. Students observe, teach and participate in school routines and programs.

During EDUC 402, students participate in the study of teaching, learning to make meaning of the complex world of educational practice, informed by extensive study of pedagogical literature.

#### French Education

French immersion, programme cadre and basic French for kindergarten to grade 12 are normally available. The majority of the program in immersion and programme cadre is in French.

#### Special Focus Modules

Special focus modules are offered during fall and spring terms. Entry may be competitive.

### EDUC 405-15 Teaching Semester

(Not offered in summer term) *Prerequisites: EDUC 401 and 402.*

A term of classroom experience supervised by University appointed faculty associates. The school placement is appropriate to the educational level and subject specialties in which the student expects to obtain certification. Students assume a large measure of responsibility and participate in a wide range of teaching and supervisory activities.

School placements in EDUC 405-15 are made in school districts throughout the Lower Mainland.

Grading in EDUC 401, 402 and 405 is on a pass/withdrawal basis.

### EDUC 404-0 Course Work Semester

*Prerequisites: EDUC 401 and 402.*

Course programming in this term is in consultation with undergraduate programs, faculty members, and the student's faculty associate to ensure that professional, academic and certification requirements are satisfied or to satisfy the educational requirements of designated PDP modules. Students undertake 15 units of studies in education (18 units if no previous recognized education course has been completed).

**Note:** Students completing degrees from the Faculties of Applied Sciences, Arts, Business Administration or Science may apply credit for EDUC 404 towards that degree.

To be recommended for certification, the student must achieve in EDUC 404 a GPA at least equivalent to that required for a degree in the University.

#### General Regulations

Students complete normal Simon Fraser University enrolment procedures before commencing studies in any term of the professional development program.

Successful applicants will be required to undergo a criminal record check. If the check indicates the applicant has a criminal record, that may preclude continuation in PDP.

Students must meet program goals, as outlined in the *Professional Development Handbook*.

- This program is normally completed in three consecutive terms. However, those with valid reasons may be given permission by the professional programs director to interrupt their program participation. A formal request must be submitted in writing to the director.
- A program interruption requested by a student may normally last no longer than two years.
- Students who indicate their intention to undertake a given term of the professional development program and who do not honor this commitment are considered to have withdrawn from the program. Permission to re-enter is not given automatically.

#### Readmission

Students who withdraw from EDUC 401/402 must re-apply to the admissions committee.

Students may apply for EDUC 405 re-entry by completing a re-entry application and submitting it and supporting documents to the professional programs director. Deadlines for re-application: April 15 for fall term; October 15 for spring term.

Permission to re-enter the program will be granted if

- the student has satisfactorily met the conditions for re-entry established when he/she interrupted or withdrew from the program
- space is available in the term for which the student applies

**Note:** After being withdrawn from EDUC 405 for a second time, a student may not re-enter the program unless by appeal.

Students who re-enter PDP should apply for re-entry within two years of withdrawal. Students who do not re-enter within the specified time may be required to complete additional course work before readmission.

Students who wish to re-enter EDUC 404 must apply to re-enter the program not later than six weeks prior to the beginning of the term. An application for re-entry to PDP must be completed.

#### Recommendation for Certification

The academic and professional records of all students who have completed the three professional development program terms will be subject to review by the faculty before a recommendation for certification is forwarded to BCCT.

## Special Professional Program Opportunities

### EDUC 405-15 Course Challenge

Students with a minimum of one year of full-time teaching experience in Canada or in a school setting where English or French was the normal language of instruction, and where the curriculum was reasonably similar to a Canadian public school curriculum, may challenge EDUC 405 subject to the following.

- Course challenge applicants will be considered according to generally established requirements and procedures. See "Course Challenge" on page 28.
- Normally, students can enrol in course challenge for EDUC 405 only while enrolled in EDUC 401/402. Additional full fees will be levied for challenging EDUC 405 regardless of whether the challenge is successful.
- Course challenge credit for EDUC 405 will not be granted before successful completion of EDUC 401/402.
- Applications, available from the professional programs director, must be submitted by: May 15 for the fall term; September 15 for the spring term.

## External Professional Development Programs

### External Programs Admissions Advisor

Ms. F. Verret, Simon Fraser University Surrey, (seducadv@sfu.ca), Tel 778.782.8128

There is an external professional development program that operates under the auspices of a consortia of local community colleges, northern school districts and Simon Fraser University. The consortia invite applicants with strong local northern connections. (Deadlines and admission procedures are different from the Lower Mainland application.)

AHCOTE – Alaska Highway Consortium on Teacher Education (Fort St. John, Dawson Creek) (subject to funding) Telephone 1.250.785.6981 local 2050 for information.

## Professional Qualification Program (PQP)

This is a three term (36 unit) program leading to a certificate in professional practices for those who wish to recertify their teaching credentials.

### Admission

PQP applicants must be admissible to Simon Fraser University. Those who have never attended here, or who have not attended in any of the previous three terms prior to their intended enrolment, must apply for university admission (<http://students.sfu.ca>). See "Admission and Readmission" on page 17.

PQP applicants must also provide the Professional Programs admissions office with a BC College of Teachers letter showing recommendation for enrolment in PQP or a similar program.

Send applications to: Faculty of Education, Simon Fraser University Surrey, Special Programs Advisor 250-13450 102nd Avenue, Surrey BC, V3T 0A3. These are due by March 31. An interview is required.

### Requirements

#### First Term

EDUC 352-4 Building on Reflective Practice  
EDUC 483-8 Designs for Learning: Curriculum Studies

#### Second Term

EDUC 401-8 Introduction to Classroom Teaching plus one additional upper division EDUC course (at least four units) selected by the student and approved by the director of PDP or designate

#### Third Term

EDUC 406-12 Supervised Observation and Teaching

Upon successful completion of the first two terms, students will then have satisfied the BC College of Teachers (BCCT) familiarization and methodology requirement for the certification of foreign trained teachers. Upon approval of the director of professional programs, PQP students may then enter EDUC 406, and upon satisfactory completion of that course, will meet the BCCT's practicum requirement for the certification of foreign trained teachers.

PQP students who complete all 36 units will also have met the requirements for the certificate in professional practices (see below).

In exceptional circumstances, the faculty associate and the PQP co-ordinator may recommend to the program director that the student complete EDUC 406 after completion of the first 12 units of PQP. In this case, the student does not need to complete the second term of course work. It is recommended that students complete at least eight units in Designs for Learning courses (EDUC 412, 414-416, 430, 472-483, 485) to enhance classroom skills.

## Certificate in Professional Practices

### External Programs Admissions Advisor

Ms. F. Verret, Simon Fraser University Surrey, (seducadv@sfu.ca), Tel 778.782.8128

This certificate trains either foreign trained teachers or previously credentialed Canadian teachers by upgrading skills to current practices. By completion of appropriate education courses and opportunities for guided practice, the student will: learn contextual perspectives on teaching in BC; become acquainted with contemporary school practices; and develop practical skills to British Columbia College of Teachers standards.

### Program Requirements

To qualify for the credential, students complete, within five years, either the Professional Qualification Program requirements for foreign trained teachers or complete the HEART (see below) requirements of the EDUC 406 practicum, and complete an additional three upper division EDUC courses (12 units).

Students must be admitted to the Professional Qualification Program or HEART teacher education module to qualify for the certificate.

Students must achieve a minimum 2.0 GPA, calculated on all Simon Fraser University courses applied to the program, with the exception that duplicate courses are counted only once.

## HEART (Helping Expand Access for Returning Teachers)

### EDUC 406-12 (HEART) Supervised Observation and Teaching

This EDUC 406 option within professional programs is a supervised orientation/observation and teaching sequence of about 12 weeks in a BC public school. This practicum offers educators, who do not meet BC certification requirements, an opportunity to familiarize themselves with the BC school system and to update teaching skills to acquire certification.

EDUC 406 is normally offered in the fall and spring terms only and space is limited.

Grading is on a pass/withdraw basis.

Applicants to HEART must be attending Simon Fraser University or be admissible to the University. See "Admission and Readmission" on page 17.

Candidates who have not attended Simon Fraser University previously, or who have not attended in any of three terms prior to intended enrolment in EDUC 406, must submit the application for undergraduate admission form to Student Services. Students intending to complete Simon Fraser University courses in preparation for application to EDUC 406 should contact Ms. F. Verret, 778.782.8128.

HEART applications should be received by: April 15 for fall term; September 15 for spring term. An interview is normally required. Applications should be sent to Faculty of Education, Simon Fraser University Surrey, 250-13450 102nd Avenue, Surrey BC, K3T 0A3, attention Special Programs Advisor.

## Certification

Simon Fraser University does not confer teaching certificates. The BC College of Teachers (BCCT) is the only body in BC authorized to grant such certificates. Under July 1, 1974 regulations, qualified students from provincial universities, upon making application and submitting birth or baptismal certificate as proof of name and age, will receive a teaching credential.

**Note:** Persons convicted of a criminal offence and considering a teaching career should write to the BCCT for clarification of their status before undertaking a teacher education program.

### Types of Certificates

There are two types of teaching certificates. The conditional certificate is awarded after successful completion of an acceptable four year program. Included in the acceptable four year program are both academic and professional studies. The professional certificate is awarded after successful completion of an acceptable five year program of professional and academic studies culminating in a degree.

The conditional certificate requires a minimum of 76 units (five terms) in applied sciences, arts, business administration, science, or education, plus the professional development program (three terms). The conditional certificate (a minimum of 120 units of academic and professional credit) will normally qualify for Teacher Qualification Service category four.

### Notes Regarding Requirements for Teaching Certificates

The following are required for teacher certification.

- a minimum of six Department of English units (a maximum of three units of English composition may be included)

### Applying for a Certificate

The Faculty of Education sends the BCCT a list of students who have completed teacher certification requirements. Each student is given or mailed an application for teacher's certificate of qualification form. Students must forward the completed form to BCCT for formal evaluation for certification. Applications for certificate upgrading (e.g., when a teacher wishes to convert a conditional certificate to a professional certificate) must also be made to BCCT.

**Note:** There is a delay between the completion of the professional development program and the forwarding to the BCCT of documented recommendation for a teaching certificate.

Applicants for certification upon degree completion should note the University regulations in this Calendar concerning final deadlines for submission of graduation applications. Exceptions cannot be made.

## Teacher Qualification Service

This service is sponsored jointly by the BC Teachers' Federation and the BC School Trustee's Association and is an advisory service to teachers and school boards in evaluating the academic and professional preparation of teachers. At present, the service assists teachers who are newly certified, new to a school district, or who are upgrading their certificates. Evaluation forms are available from the Teacher Qualification Service, 106-1525 West 8th Avenue, Vancouver, BC, V6T 1T5, or from the PDP admissions office, Faculty of Education, Simon Fraser University.

# Faculty of Environment

8900 Technology and Science Complex 2,  
778.782.8787 Tel, 778.782.8788 Fax,  
www.sfu.ca/fenv

## Dean

J.T. Pierce BA (Tor), MA (Wat), PhD (Lond)

## Associate Dean

D. Knowler BA, MA (Alta), PhD (York, UK)

## Advisor

L. McGregor BComm (McM), 8905 Technology and  
Science Complex 2, 778.782.8810, fenvinfo@sfu.ca

## Undergraduate Degrees Offered

bachelor of arts (honors)  
bachelor of arts  
bachelor of science (honors)  
bachelor of science

## Diplomas and Certificates Offered

certificate in spatial information systems  
certificate in urban studies  
post baccalaureate diploma in sustainable community  
development

The Faculty of Environment offers programs in  
development studies, environmental science,  
geography, resource and environmental  
management, and sustainable community  
development.

## Student Responsibility

It is the responsibility of each student to be aware of  
faculty regulations as stated in this Calendar.  
Departmental and faculty advisors and staff are  
available for advice and guidance. However, the  
ultimate responsibility for completeness and  
correctness of course selection, for compliance with  
and completion of program and degree requirements,  
and for observance of regulations and deadlines rests  
with the student.

## Graduation Requirements

For a major, students must achieve both a minimum  
2.00 cumulative grade point average (CGPA) and a  
minimum 2.00 grade point average (GPA) calculated  
on all upper division courses. This GPA is calculated  
by dividing the total grade points earned in upper  
division by the total term units assigned for those  
courses, counting only the higher grade in courses  
that have been duplicated.

Normally 45 units of upper division courses are  
required of the 120 units required to graduate.  
Individual degrees may have supplementary  
graduation requirements. Therefore, students should  
check with the advisor about a possible higher  
minimum GPA or other additional requirements for  
graduation. For general undergraduate degree,  
diploma and certificate requirements, see page 6.

## Environmental Science Program

8109a South Science Building, 778.782.5621 Tel,  
778.782.3496 Fax, www.sfu.ca/biology/faculty/  
bendell

## Program Director

L. I. Bendell-Young BSc PhD (Tor)  
778.782.5621 Tel, 778.782.3496 Fax, bendell@sfu.ca

This program provides a broad education with  
specialization in one of six areas of emphasis:  
biology, chemistry, environmetrics, physical

geography, pollutant transport, and quantitative  
techniques for resource management. Extensive  
lower division requirements necessitate careful  
planning of course sequencing to ensure timely  
completion of the program. For advice about  
admission and general program requirements, see  
the director or faculty assistant.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfill  
writing, quantitative and breadth requirements as part  
of their program. See "Writing, Quantitative, and  
Breadth Requirements" on page 7 for information.

## Major Program

The minimum CGPA for continuation and graduation  
is 2.50. General University and Faculty of Science  
regulations also apply. The following requirements,  
organized by year, suggest a sequence for timely  
program completion.

## Biology

### Year One

BISC 101-4 General Biology  
BISC 102-4 General Biology  
CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 126-2 General Chemistry Laboratory II  
REM 100-3 Global Change

and one of

MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences  
MATH 157-3 Calculus for the Social Sciences I

and one of

MATH 152-3 Calculus II  
MATH 155-3 Calculus II for the Biological Sciences  
MATH 158-3 Calculus for the Social Sciences II

and one of

PHYS 101-3 Physics for the Life Sciences I  
PHYS 120-3 Mechanics and Modern Physics

### Year Two

BISC 204-3 Introduction to Ecology  
CHEM 215-4 Introduction to Analytical Chemistry  
CHEM 230-3 Inorganic Chemistry  
CHEM 281-4 Organic Chemistry I  
EVSC 200-3 Introduction to Environmental Science  
GEOG 111-3 Earth Systems  
MBB 231-3 Cellular Biology and Biochemistry

and one of

STAT 270-3 Introduction to Probability and Statistics  
STAT 201-3 Statistics for the Life Sciences

and one of

PHYS 102-3 Physics for the Life Sciences II  
PHYS 121-3 Optics, Electricity and Magnetism

### Year Three

BISC 304-3 Animal Ecology  
BISC 305-3 Animal Physiology  
BISC 312-3 Environmental Toxicology I  
ECON 103-4 Principles of Microeconomics  
ECON 105-4 Principles of Macroeconomics  
PHYS 346-3 Energy and the Environment  
STAT 302-3 Analysis of Experimental and  
Observational Data

### Year Four

BISC 202-3 Genetics  
BISC 404-3 Plant Ecology  
BISC 414-3 Limnology  
EVSC 401-1 Current Topics in Environmental Science

GEOG 316-4 Ecosystem Biogeochemistry  
STAT 403-3 Intermediate Sampling and Experimental  
Design

and any three courses from the following to be  
completed in years three or four (suggested course  
groupings need not be followed).

### Field Course

EVSC 491W-3 Advanced Field Studies in  
Environmental Science

### Plant Biology

BISC 310-3 The Natural History of British Columbia  
BISC 326-3 Biology of Algae and Fungi  
BISC 337-3 Plant Biology  
BISC 366-3 Plant Physiology

### Invertebrate Biology

BISC 306-3 Invertebrate Biology  
BISC 406-3 Marine Biology and Oceanography

### Vertebrate Biology

BISC 316-3 Vertebrate Biology  
BISC 407-3 Population Dynamics  
BISC 416-3 Fish Biology  
BISC 419-3 Wildlife Biology

### Resource and Environmental Management

REM 311-3 Applied Ecology and Sustainable  
Environments  
REM 356-3 Management Institutions  
REM 412-3 Environmental Modelling  
REM 445-3 Environmental Risk Assessment  
REM 471-3 Forest Ecosystem Management

**Note:** MBB 231 and 222 are complementary courses  
and together cover all aspects of cellular structure  
and function. It is strongly recommended that  
students complete MBB 222 as an elective.

## Electives

Additional electives are required to total 120 units,  
including at least 44 at the upper division.

## Chemistry

These Year One and Two requirements are the same  
as for the biology area of emphasis. Please refer to  
that section above.

### Year Three

CHEM 236-3 Inorganic Chemistry Laboratory  
CHEM 282-2 Organic Chemistry II  
CHEM 286-2 Organic Chemistry Laboratory II  
CHEM 360-3 Thermodynamics and Chemical  
Kinetics  
CHEM 316-4 Introductory Instrumental Analysis  
CHEM 371-3 Chemistry of the Aqueous Environment  
ECON 103-4 Principles of Microeconomics  
ECON 105-4 Principles of Macroeconomics  
STAT 302-3 Analysis of Experimental and  
Observational Data

### Year Four

BISC 312-3 Environmental Toxicology I  
CHEM 317-2 Analytical Environmental Chemistry  
CHEM 332-3 Chemistry of the Transition Metals  
CHEM 372-3 Chemistry of the Atmospheric  
Environment  
EVSC 401-1 Current Topics in Environmental Science  
PHYS 346-3 Energy and the Environment  
STAT 403-3 Intermediate Sampling and Experimental  
Design

and at least 18 units from the following courses to be  
completed in years three or four.

BISC 305-3 Animal Physiology  
BISC 414-3 Limnology  
CHEM 380-4 Chemical and Instrumental Methods of  
Identification of Organic Compounds

CHEM 460-3 Advanced Physical Chemistry  
 EVSC 491W-3 Advanced Field Studies in  
 Environmental Science  
 GEOG 316-4 Ecosystem Biogeochemistry  
 GEOG 317-4 Soil Science I  
 NUSC 341-3 Introduction to Radiochemistry  
 NUSC 342-3 Introduction to Nuclear Science  
 NUSC 346-2 Radiochemistry Laboratory  
 REM 311-3 Applied Ecology and Sustainable  
 Environments  
 REM 356-3 Management Institutions  
 REM 412-3 Environmental Modelling  
 REM 445-3 Environmental Risk Assessment

### Electives

Additional electives may be required to meet the 120 unit graduation requirement, including at least 44 at the upper division.

### Environmetrics

These Year One and Two requirements are the same as for the biology area of emphasis except that students must complete STAT 270, and not the alternative course, STAT 201. Please refer to that section for other requirements.

#### Year Three

CHEM 360-3 Chemical Kinetics and  
 Thermodynamics  
 CHEM 316-4 Introductory Instrumental Analysis  
 CHEM 371-3 Chemistry of the Aqueous Environment  
 ECON 103-4 Principles of Microeconomics  
 ECON 105-4 Principles of Macroeconomics  
 MATH 232-3 Elementary Linear Algebra  
 MATH 251-3 Calculus III  
 STAT 285-3 Intermediate Probability and Statistics  
 STAT 350-3 Linear Models in Applied Statistics

#### Year Four

CHEM 317-2 Analytical Environmental Chemistry  
 EVSC 401-1 Current Topics in Environmental Science  
 PHYS 346-3 Energy and the Environment  
 STAT 402-3 Generalized Linear and Nonlinear  
 Modelling  
 STAT 410-3 Statistical Analysis of Sample Surveys  
 STAT 430-3 Statistical Design and Analysis of  
 Experiments

and at least three courses from the following to be completed in years three or four.

BISC 304-3 Animal Ecology  
 BISC 312-3 Environmental Toxicology I  
 BISC 414-3 Limnology  
 CHEM 372-3 Chemistry of the Atmospheric  
 Environment  
 EVSC 491W-3 Advanced Field Studies in  
 Environmental Science  
 GEOG 214-3 Climatology I  
 GEOG 316-4 Ecosystem Biogeochemistry  
 GEOG 354-4 Introduction to Geographic Information  
 Systems  
 REM 311-3 Applied Ecology and Sustainable  
 Environments  
 REM 356-3 Management Institutions  
 REM 412-3 Environmental Modelling  
 REM 445-3 Environmental Risk Assessment and  
 Management of Hazardous Substances  
 REM 471-3 Forest Ecosystem Management

### Electives

Additional electives are required to meet the total 120 unit graduation requirement including at least 44 at the upper division.

### Suggested Groupings of Courses

The following course groupings for different focuses are suggested.

#### Biology Focus

BISC 304-3 Animal Ecology  
 BISC 312-3 Environmental Toxicology I  
 GEOG 316-4 Ecosystem Biogeochemistry

REM 311-3 Applied Ecology and Sustainable  
 Environments  
 REM 412-3 Environmental Modelling  
 REM 445-3 Environmental Risk Assessment and  
 Management of Hazardous Substances

#### Aqueous Chemistry Focus

BISC 414-3 Limnology  
 GEOG 311-4 Hydrology I  
 GEOG 316-4 Ecosystem Biogeochemistry  
 REM 311-3 Applied Ecology and Sustainable  
 Environments  
 REM 412-3 Environmental Modelling  
 REM 445-3 Environmental Risk Assessment

#### Atmospheric Focus

CHEM 372-3 Chemistry of the Atmospheric  
 Environment  
 GEOG 214-3 Climatology I  
 REM 311-3 Applied Ecology and Sustainable  
 Environments  
 REM 412-3 Environmental Modelling  
 Toxic Materials Focus  
 BISC 312-3 Environmental Toxicology I  
 REM 311-3 Applied Ecology and Sustainable  
 Environments  
 REM 356-3 Management Institutions  
 REM 412-3 Environmental Modelling  
 REM 445-3 Environmental Risk Assessment

### Physical Geography

#### Years One and Two

BISC 101-4 General Biology  
 BISC 102-4 General Biology  
 CHEM 121-4 General Chemistry and Laboratory I  
 CHEM 122-2 General Chemistry II  
 CHEM 126-2 General Chemistry Laboratory II  
 REM 100-3 Global Change  
 GEOG 111-3 Earth Systems  
 GEOG 213-3 Introduction to Geomorphology  
 GEOG 214-3 Climatology and the Environment  
 EVSC 200-3 Introduction to Environmental Science

and one of

MATH 151-3 Calculus I  
 MATH 154-3 Calculus I for Biological Sciences  
 MATH 157-3 Calculus I for Social Sciences

and one of

MATH 152-3 Calculus II  
 MATH 155-3 Calculus II for Biological Sciences  
 MATH 158-3 Calculus II for Social Sciences

and one of

PHYS 101-3 Physics for the Life Sciences I  
 PHYS 120-3 Mechanics and Modern Physics

and one of

PHYS 102-3 Physics for the Life Sciences II  
 PHYS 121-3 Optics, Electricity and Magnetism

and one of

BISC 204-3 Introduction to Ecology  
 GEOG 215-3 Biogeography

and one of

STAT 201-3 Statistics for the Life Sciences  
 STAT 270-3 Introduction to Probability and Statistics

and one of

GEOG 250-3 Cartography I  
 GEOG 253-3 Aerial Photographic Interpretation  
 GEOG 255-3 Geographical Information Science I  
 Eight units of electives Total 60 units

#### Years Three and Four

ECON 103-4 Principles of Microeconomics  
 ECON 105-4 Principles of Macroeconomics  
 EVSC 401-1 Current Topics in Environmental Science  
 GEOG 311-4 Hydrology  
 GEOG 316-4 Ecosystem Biogeochemistry  
 GEOG 317-4 Soil Science  
 PHYS 346-3 Energy and the Environment  
 STAT 302-3 Analysis of Experimental and  
 Observational Data

and one of

GEOG 352-4 Techniques in Spatial Analysis II  
 STAT 403-3 Intermediate Sampling and Experimental  
 Design

and two of

GEOG 313-4 River Geomorphology  
 GEOG 314-4 Weather and Climate  
 GEOG 315-4 World Ecosystems  
 GEOG 411-4 Advanced Hydrology  
 GEOG 412-4 Glacial Processes and Environments  
 GEOG 413-4 Advanced River Geomorphology  
 GEOG 414-4 Advanced Climatology  
 GEOG 415-4 Advanced Biogeography  
 GEOG 417-4 Advanced Soil Science

and three of

BISC 310-3 Plants and Animals of British Columbia  
 BISC 366-3 Plant Physiology\*  
 BISC 367-3 Plant Physiology Laboratory\*  
 BISC 404-3 Plant Ecology  
 BISC 414-3 Limnology  
 BISC 416-3 Fish Biology\*  
 BISC 434-3 Paleoecology and Palynology  
 CHEM 371-3 Chemistry of the Aqueous Environment\*  
 CHEM 372-3 Chemistry of the Atmospheric  
 Environment\*  
 EASC 303-3 Environmental Geoscience  
 EASC 304-3 Hydrogeology\*  
 EASC 403-3 Quaternary Geology  
 EASC 409-3 Rivers: Environments and Engineering\*  
 EASC 410-3 Groundwater Geochemistry and  
 Contaminant Transport\*  
 EVSC 491W-3 Advanced Field Studies in  
 Environmental Science  
 REM 311-3 Applied Ecology and Sustainable  
 Environments  
 REM 356-3 Management Institutions  
 REM 412-3 Environmental Modelling  
 REM 445-3 Environmental Risk Assessment  
 REM 471-3 Forest Ecosystem Management

and one of

GEOG 351-4 Cartography and Visualization  
 GEOG 353-4 Remote Sensing  
 GEOG 355-4 Geographical Information Science II

In addition to the above, students must complete 7-11 elective units to bring the total to the required 120 units. Also, of these units 44 must be upper division to satisfy the Faculty of Science requirements for a major.

\*requires prerequisites to be completed as electives

### Suggested Groupings of Courses

Three groupings of courses are identified below to aid students in their choice of electives.

#### Aquatic Environments

BISC 414-3 Limnology  
 BISC 416-3 Fish Biology  
 CHEM 371-3 Chemistry of the Aqueous Environment  
 EASC 409-3 Rivers: Environments and Engineering  
 GEOG 411-4 Advanced Hydrology  
 GEOG 413-4 Advanced River Geomorphology

#### Plants and Environment

BISC 310-3 Plants and Animals of British Columbia  
 BISC 366-3 Plant Physiology  
 BISC 367-3 Plant Physiology Laboratory  
 BISC 404-3 Plant Ecology  
 BISC 434-3 Paleoecology and Palynology  
 GEOG 314-4 Weather and Climate  
 GEOG 315-4 World Ecosystems  
 GEOG 415-4 Advanced Biogeography  
 GEOG 417-4 Advanced Soil Science  
 REM 471-4 Forest Ecosystem Management

#### Biogeochemistry

BISC 414-4 Limnology  
 CHEM 371-3 Chemistry of the Aqueous Environment  
 CHEM 372-3 Chemistry of the Atmospheric  
 Environment  
 EASC 304-3 Hydrogeology

EASC 410-3 Groundwater Geochemistry and Contaminant Transport  
GEOG 417-4 Advanced Soil Science

### Pollutant Transport

#### Year One

BISC 101-4 General Biology  
CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 126-2 General Chemistry Laboratory II  
EASC 101-3 Physical Geology  
EASC 102-3 Historical Geology  
REM 100-3 Global Change

and one of

MATH 151-3 Calculus I\*  
MATH 154-3 Calculus I for the Biological Sciences  
MATH 157-3 Calculus for the Social Sciences I

and one of

MATH 152-3 Calculus II\*  
MATH 155-3 Calculus II for the Biological Sciences  
MATH 158-3 Calculus for the Social Sciences II

and one of

PHYS 101-3 Physics for the Life Sciences I  
PHYS 120-3 Mechanics and Modern Physics\*

and one of

PHYS 102-3 Physics for the Life Sciences II  
PHYS 121-3 Optics, Electricity and Magnetism\*

\*recommended

#### Year Two

CHEM 281-4 Organic Chemistry I  
EASC 201-3 Stratigraphy and Sedimentation  
EASC 206-1 Field Geology I  
EVSC 200-3 Introduction to Environmental Science  
MATH 232-3 Elementary Linear Algebra  
MATH 251-3 Calculus III  
STAT 270-3 Introduction to Probability and Statistics

and one of

CMPT 120-3 Introduction to Computing Science  
Programming I

CMPT 102-3 Introduction to Scientific Computer  
Programming\*

#### Years Three and Four

BISC 102-4 General Biology  
EASC 202-3 Mineralogy  
EASC 304-3 Hydrogeology  
EASC 410-3 Groundwater Geochemistry and Contaminant Transport  
EVSC 401-1 Current Topics in Environmental Science  
GEOG 311-4 Hydrology  
MATH 252-3 Vector Calculus  
MATH 310-3 Introduction to Ordinary Differential Equations  
MATH 314-3 Boundary Value Problems  
STAT 285-3 Intermediate Probability and Statistics

and one of

GEOG 214-3 Climate and Environment  
GEOG 213-3 Introduction to Geomorphology

and one of

BISC 204-3 Introduction to Ecology  
GEOG 215-3 Biogeography

and at least 24 upper division units of electives selected from the following. Note that some courses may require lower division prerequisites.

BISC 312-3 Environmental Toxicology I  
BISC 414-3 Limnology  
CHEM 316-4 Introductory Instrumental Analysis  
CHEM 317-3 Analytical Environmental Chemistry  
CHEM 360-3 Chemical Kinetics and Thermodynamics  
CHEM 371-3 Chemistry of the Aqueous Environment  
CHEM 372-3 Chemistry of the Atmospheric Environment  
EASC 303-3 Environmental Geoscience  
EASC 307-3 Applied Geophysics

EASC 313-3 Introduction to Soil and Rock Engineering  
EASC 403-3 Quaternary Geology  
EASC 416-3 Field Techniques in Hydrogeology  
EVSC 491W-3 Advanced Field Studies in Environmental Science

GEOG 313-4 River Geomorphology  
GEOG 314-4 Weather and Climate  
GEOG 315-4 World Ecosystems  
GEOG 316-4 Ecosystem Biogeochemistry  
GEOG 317-4 Soil Science  
GEOG 354-4 Introduction to Geographic Information Systems

GEOG 414-4 Advanced Climatology  
GEOG 415-4 Advanced Biogeography  
MATH 322-3 Complex Variables  
MATH 415-3 Ordinary Differential Equations  
MATH 416-3 Numerical Analysis II  
MATH 418-3 Partial Differential Equations

MATH 462-3 Fluid Dynamics  
MATH 467-3 Dynamical Systems  
MACM 316-3 Numerical Analysis I

NUSC 341-3 Introduction to Radiochemistry  
PHYS 346-3 Energy and the Environment  
REM 311-3 Applied Ecology and Sustainable Environments  
REM 356-3 Management Institutions  
REM 412-3 Environmental Modelling  
REM 445-3 Environmental Risk Assessment and Management of Hazardous Substances  
STAT 403-3 Intermediate Sampling and Experimental Design

### Suggested Groupings of Courses

The following groupings of courses for different focuses are suggested.

#### Aqueous Biology Focus

BISC 312-3 Environmental Toxicology I  
BISC 414-3 Limnology  
CHEM 360-3 Chemical Kinetics and Thermodynamics  
GEOG 315-4 World Ecosystems  
GEOG 316-4 Ecosystem Biogeochemistry  
GEOG 415-4 Advanced Biogeography  
REM 311-3 Applied Ecology and Sustainable Environments  
REM 412-3 Environmental Modelling

#### Aqueous Chemistry Focus

BISC 414-3 Limnology  
CHEM 316-4 Introductory Instrumental Analysis  
CHEM 317-2 Analytical Environmental Geography  
CHEM 360-3 Chemical Kinetics and Thermodynamics  
CHEM 371-3 Chemistry of the Aqueous Environment  
EASC 416-3 Field Techniques in Hydrogeology  
NUSC 341-3 Introduction to Radiochemistry  
REM 412-3 Environmental Modelling  
REM 445-3 Environmental Risk Assessment and Management of Hazardous Substances

#### Earth Properties Focus

EASC 303-3 Environmental Geoscience  
EASC 307-3 Applied Geophysics  
EASC 313-3 Introduction to Soil and Rock Engineering  
EASC 403-3 Quaternary Geology  
EASC 416-3 Field Techniques in Hydrogeology  
GEOG 313-4 River Geomorphology  
GEOG 317-4 Soil Science  
GEOG 354-4 Introduction to Geographic Information Systems  
STAT 403-3 Intermediate Sampling and Experimental Design

#### Atmospheric Focus

BISC 312-3 Environmental Toxicology I  
CHEM 360-3 Chemical Kinetics and Thermodynamics  
CHEM 372-3 Chemistry of the Atmospheric Environment

GEOG 314-4 Weather and Climate  
GEOG 414-4 Advanced Climatology  
NUSC 341-3 Introduction to Radiochemistry  
PHYS 346-3 Energy and the Environment  
REM 412-3 Environmental Modelling

#### Transport Modelling Focus

EASC 416-3 Field Techniques in Hydrogeology  
GEOG 354-4 Introduction to Geographic Information Systems  
MATH 322-3 Complex Variable  
MATH 416-3 Numerical Analysis II  
MATH 418-3 Partial Differential Equations  
MATH 467-3 Dynamical Systems  
MATH 462-3 Fluid Dynamics  
MACM 316-3 Numerical Analysis I  
REM 412-3 Environmental Modelling  
STAT 403-3 Intermediate Sampling and Experimental Design

### Quantitative Techniques for Resource Management

#### Year One

BISC 101-4 General Biology  
BISC 102-4 General Biology  
CHEM 120-3 General Chemistry I  
CHEM 122-2 General Chemistry II  
ECON 103-4 Principles of Microeconomics  
REM 100-3 Global Change

and one of

MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences  
MATH 157-3 Calculus for the Social Sciences I

and one of

MATH 152-3 Calculus II  
MATH 155-3 Calculus II for the Biological Sciences  
MATH 158-3 Calculus for the Social Sciences II

and one of

PHYS 101-3 Physics for the Life Sciences I  
PHYS 120-3 Mechanics and Modern Physics

#### Year Two

BISC 204-3 Introduction to Ecology  
ECON 105-4 Principles of Macroeconomics  
ECON 260-3 Environmental Economics  
EVSC 200-3 Introduction to Environmental Science  
GEOG 111-3 Earth Systems  
MATH 232-3 Elementary Linear Algebra  
MATH 251-3 Calculus III  
STAT 270-3 Introduction to Probability and Statistics

and one of

CMPT 120-3 Introduction to Computing Science and Programming I

CMPT 102-3 Introduction to Scientific Computer Programming

and one of

PHYS 102-3 Physics for the Life Sciences II  
PHYS 121-3 Optics, Electricity and Magnetism

#### Year Three

BISC 304-3 Animal Ecology  
MACM 316-3 Numerical Analysis I  
MATH 308-3 Linear Programming  
MATH 310-3 Introduction to Ordinary Differential Equations  
PHYS 346-3 Energy and the Environment  
STAT 285-3 Intermediate Probability and Statistics  
STAT 350-3 Linear Models in Applied Statistics

#### Year Four

BISC 407-3 Population Dynamics  
EVSC 401-1 Current Topics in Environmental Science  
MATH 309-3 Continuous Optimization  
STAT 402-3 Generalized Linear and Nonlinear Modelling  
STAT 410-3 Statistical Analysis of Sample Surveys  
STAT 430-3 Statistical Design and Analysis of Experiments

and at least four courses from the following to be completed in years three or four

BISC 300-3 Evolution  
BISC 305-3 Animal Physiology  
ECON 261-3 Resources and the Economy of British Columbia  
EVSC 491W-3 Advanced Field Studies in Environmental Science  
GEOG 354-4 Introduction to Geographic Information Systems  
REM 311-3 Applied Ecology and Sustainable Environments  
REM 356-3 Management Institutions  
REM 412-3 Environmental Modelling  
REM 445-3 Environmental Risk Assessment and Management of Hazardous Substances  
REM 471-3 Forest Ecosystem Management

### Electives

Additional electives are required to meet the total graduation requirement of 120 units, including at least 44 at the upper division.

### Suggested Groupings of Courses

The following groupings of courses for different focuses are suggested.

#### Fisheries Focus

BISC 300-3 Evolution  
BISC 305-3 Animal Physiology  
GEOG 354-4 Introduction to Geographic Information Systems  
REM 311-3 Applied Ecology and Sustainable Environments  
REM 356-3 Management Institutions  
REM 412-3 Environmental Modelling

#### Economic Focus

ECON 261-3 Resources and the Economy of British Columbia  
GEOG 354-4 Introduction to Geographic Information Systems  
REM 311-3 Applied Ecology and Sustainable Environments  
REM 356-3 Management Institutions  
REM 445-3 Environmental Risk Assessment and Management of Hazardous Substances

#### Forestry Focus

ECON 261-3 Resources and the Economy of British Columbia  
GEOG 354-4 Introduction to Geographic Information Systems  
REM 311-3 Applied Ecology and Sustainable Environments  
REM 356-3 Management Institutions  
REM 471-3 Forest Ecosystem Management

## Honors Program

This program requires 132 units including writing, quantitative and breadth requirements (see page 7). At least 60 must be upper division, at least 48 must be in one subject area and are normally from the 300-400 division required or optional courses in an area of emphasis. Exceptions must be approved by a faculty advisor. Further requirements are listed in each area of emphasis. Minimum CGPA for continuation and graduation is 3.00. University and Faculty of Science regulations also apply.

## Biology

Students complete all requirements in the major program, plus all requirements for the honors program. The required 48 upper division units in a specific subject requires all of  
BISC 490-5 Research Design  
BISC 491-5 Research Technique  
BISC 492-5 Research Reporting

Other courses may be substituted subject to the approval of a faculty advisor.

## Chemistry

Students complete all requirements for this major program area of emphasis, plus all requirements for the honors program, and also

CHEM 481-5 Undergraduate Research

To fulfil the required 48 upper division units in a specific subject, students choose further major program courses as options in years three and four. Other courses may substitute, subject to faculty advisor approval.

## Environmetrics

Students complete all requirements for this area of emphasis in the major program, plus all requirements for the honors program, and also both of

STAT 330-3 Introduction to Mathematical Statistics  
STAT 450-3 Statistical Theory

To fulfil the required 48 upper division units in a specific subject area, students normally will choose further courses listed in the major program as options in years three and four. Other courses may be substituted on approval of a faculty advisor.

## Physical Geography

Students complete all area of emphasis requirements, plus all honors requirements. To fulfil the required 48 upper division units in a specific subject area, students must complete

GEOG 491-4 Honors Essay

and choose further major program courses as options in years three and four. Other courses may be substituted with the approval of a faculty advisor.

## Pollutant Transport

Students complete all requirements for this area of emphasis in the major program, plus all requirements for the honors program. To fulfil the required 48 upper division units in a specific subject area, the student normally will choose further courses listed in the major program as options in years three and four. Students wishing to use a research thesis towards meeting this requirement may seek approval from a faculty member in earth sciences to enrol in EASC 499. Other courses may be substituted with approval of a faculty advisor.

## Quantitative Techniques for Resource Management

Students complete all major program requirements for this area of emphasis plus all honors program requirements. To fulfil the 48 upper division units in a specific subject area, students normally choose further courses listed in the major program as options in years three and four. Other courses may be substituted with approval of a faculty advisor.

## Co-operative Education

This program combines relevant work experience with academic studies. Students alternate study terms with study-related employment. The program includes pre-employment orientation and four full-time paid work terms. A major and honors program leading to an environmental science BSc degree and co-op education are available to qualified students.

To enrol, students should attend co-op information meetings held in the term's first two weeks prior to the term in which they wish to work. Also seek advice from Faculty of Science co-op education as early as possible in the university career to facilitate optimal scheduling. For information, contact the co-operative education co-ordinator, Science and Environment Co-op Program, Department of Geography, 7130 Robert C. Brown Hall, 778.782.3115 Tel.

## Qualifications for Registered Professional Biologist of BC

Registered professional biologist (RPBio) status is an important, common qualification for BC biologists practising in BC. Environmental science students can meet the academic qualifications by completing three more 200 division or higher biology courses beyond the biology stream requirements. RPBio status is then possible after three years of appropriate work experience and completion of an acceptable professional report. Students and graduates may join the College of Applied Biology of BC (CAB) as *student biologists* and *biologists in training* respectively, before they meet all of the qualifications. Contact the biology stream advisor or the College of Applied Biology of BC at cab@cab-bc.org

## Department of Geography

### Chair

R. Hayter BA (Newcastle, UK), MA (Alta), PhD (Wash)

### Professors Emeriti

R.C. Brown BS, MS (Oregon State), PhD (Mich State)  
C.B. Crampton BSc, PhD (Brist)  
A. MacPherson MA (Edin), FRMetS  
T.K. Poiker PhD (Heidel)  
M.C. Roberts BSc (Lond), MA (Tor), PhD (Iowa), PGeo  
P.L. Wagner AB, MA, PhD (Calif)  
J.W. Wilson BSc (Glas), MSc (MIT), MPP (N Carolina)  
S.T. Wong AB (Augustana, Ill), AM (Yale), PhD (Chic)

### Professors

N.K. Blomley BSc, PhD (Brist)  
A.M. Gill BA (Hull), MA (Alta), PhD (Manit)\*\*\*  
R. Hayter BA (Newcastle, UK), MA (Alta), PhD (Wash)  
E.J. Hickin BA, PhD (Syd), PGeo  
J.T. Pierce BA (Tor), MA (Wat), PhD (Lond)  
M.L. Roseland, BA MA (Wesleyan, Conn), PhD (Br Col)

### Associate Professors

T.A. Brennand MA (Camb), PhD (Alta)  
J.A.C. Brohman BA (Car), MA, PhD (Calif)  
R.A. Clapp BA (Yale), MA, PhD (Calif)  
S. Dragicevic BEng (Belgrade), MSc (Belgrade), PhD (Montr)  
J. Hyndman BA (Alta), MA (Lanc), PhD (Br Col)  
L.F.W. Lesack BSc (Manit), PhD (Calif)\*  
E. McCann MA (Glas), MA (Miami, Ohio), PhD (Kentucky)  
M.G. Schmidt BSc (Guelph), MSc (Lakehead), PhD (Br Col)  
N.C. Schuurman BSc (Nfld), MA, PhD (Br Col)  
J. Taylor BS, MA (Ore), PhD (Wash)\*\*

### Assistant Professors

V.A. Crooks BA (WOnt), MA, PhD (McM)  
N. Hedley BSc (Lanc), MA (Colorado), PhD (Wash)  
M. Holden BSc (Vic, BC), MS (Rutgers), PhD (NY State)\*\*\*\*  
P.T. Kingsbury BA (Wales), MA, PhD (Kentucky)  
G.P. Mann BA (McGill), MSc (Guelph), PhD (Calif)  
J. Sturgeon BA (Calif), MA (Wash), PhD (Yale)  
I. Tromp-van Meerveld BSc, MSc (Vrije, Amsterdam), PhD (Oregon State)  
J. Venditti BSc (Guelph), MSc (S Calif), PhD (Br Col)

### Senior Lecturers

O. Hertzman, BASc, MSc (Br Col), PhD (Wash)  
I. Winton MA (Glas), MA (Br Col), PhD (Minn)

**Lecturer**

S. Balram BSc (Guy), MPhil (Camb), PhD (McG)

**Associate Members**

W.G. Gill, Vice-President, University Relations

M.V. Hayes, Faculty of Health Sciences

S. Markey, Explorations Program

**Adjunct Professors**

O. Lian BSc, MSc (S Fraser), PhD (WOnt)

L.J.B. McArthur BSc (McM), MSc (Br Col),

PhD (McM)

**Advisor**Ms. R. Multani, 7126 Robert C. Brown Hall,  
778.782.4529

\*joint appointment with biological sciences

\*\*joint appointment with history

\*\*\*joint appointment with resource and environmental  
management

\*\*\*\*joint appointment with urban studies

**Writing, Quantitative, and Breadth  
Requirements**Students completing degree programs must fulfil  
writing, quantitative and breadth requirements as part  
of their program. See "Writing, Quantitative, and  
Breadth Requirements" on page 7 for information.**BA Geography Major Program**Students must complete 120 units including 45 upper  
division (see "Graduation Requirements" on  
page 170). Transfer students may enter without  
fulfilling all lower division requirements. See the  
advisor as soon as possible about program entry.**Lower Division Requirements**

Students complete all of

GEOG 100-3 Human Geography

GEOG 111-3 Earth Systems

GEOG 221-3 Economic Geography

GEOG 241-3 Social Geography

and one of

GEOG 213-3 Introduction to Geomorphology

GEOG 214-3 Climate and Environment

GEOG 215-3 Biogeography

and one of

GEOG 251-3 Quantitative Geography

GEOG 253-3 Aerial Photographic Interpretation

GEOG 255-3 Geographical Information Science I

18 units

**Upper Division Requirements**Consult with an advisor when formally declaring a  
geography major, or risk prolonging the program.Students complete 32 units of 300 and 400 division  
courses in geography, including at least eight units at  
the 400 division and one of the following.

GEOG 311-4 Hydrology

GEOG 312-4 Geography of Natural Hazards

GEOG 313-4 River Geomorphology

GEOG 314-4 Weather and Climate

GEOG 315-4 World Ecosystems

GEOG 316-4 Ecosystem Biogeochemistry

GEOG 317-4 Soil Science

32 units

**BA Geography – Environmental  
Specialty Major Program****Lower Division Requirements**

Students complete all of

GEOG 100-3 Human Geography

GEOG 111-3 Earth Systems

GEOG 215-3 Biogeography

GEOG 221-3 Economic Geography

GEOG 241-3 Social Geography

and one of

GEOG 251-3 Quantitative Geography

GEOG 253-3 Aerial Photographic Interpretation

GEOG 255-3 Geographical Information Science I

and the following two trans-disciplinary core courses

EVSC 200-3 Introduction to Environmental Science

REM 100-3 Global Change 24 units

**Upper Division Requirements**A minimum of 32 upper division units as follows is  
required, including four of the following core courses.

GEOG 322-4 World Resources

GEOG 377-4 Environmental History

GEOG 382-4 Population Geography

GEOG 385-4 Agriculture and the Environment

GEOG 389W-4 Human Ecology: Human Relations to  
NatureREM 311-3 Applied Ecology and Sustainable  
EnvironmentsREM 356-3 Institutional Arrangements for  
Sustainable Environmental Management

14-16 units

plus one of

GEOG 311-4 Hydrology

GEOG 312-4 Geography of Natural Hazards

GEOG 313-4 River Geomorphology

GEOG 314-4 Weather and Climate

GEOG 315-4 World Ecosystems

GEOG 316-4 Ecosystem Biogeochemistry

GEOG 317-4 Soil Science

4 units

plus one of

GEOG 351-4 Cartography and Visualization

GEOG 352-4 Spatial Analysis

GEOG 353-4 Remote Sensing

GEOG 355-4 Geographical Information Science II

GEOG 356-4 3D Geovisualization

GEOG 391-4 Qualitative Research Methods 4 units

plus two of

GEOG 426-4 Industrial Change and Local  
Development

GEOG 428-4 World Forests

GEOG 429-4 Environment and Inequality

GEOG 432-4 Problems in Environmental History

GEOG 445-4 Resource Planning

GEOG 449-4 Environmental Processes and Urban  
Development

GEOG 468-4 Society and Environment in China

REM 445-3 Environmental Risk Assessment

REM 471-3 Forest Ecosystem Management

6-8 units

plus additional upper division (300 and 400 division)  
units in geography needed for 32 units minimum.**BSc Geographic Information  
Science Major and Honors  
Programs**Offered by the School of Computing Science and the  
Department of Geography, students may pursue  
major or honors leading to BSc or BSc (honors)  
degrees within the Faculty of Applied Sciences.**BSc Physical Geography Major  
Program**Students should contact the advising committee to  
plan the course work for recommended options:  
biogeography, climatology or geomorphology.**Lower Division Requirements**

(52-53 units)

**Required Geography Courses**

Students complete both of

GEOG 100-3 Human Geography

GEOG 111-3 Earth Systems

and two of

GEOG 213-3 Introduction to Geomorphology

GEOG 214-3 Climate and Environment

GEOG 215-3 Biogeography

and one of

GEOG 221-3 Economic Geography

GEOG 241-3 Social Geography

and one of

GEOG 250-3 Cartography I

GEOG 253-3 Aerial Photographic Interpretation

GEOG 255-3 Geographical Information Science I

18 units

**Required Faculty of Science Courses**

Students complete all of

BISC 101-4 General Biology

BISC 102-4 General Biology

CHEM 121-4 General Chemistry and Laboratory I

CHEM 122-2 General Chemistry II

EASC 101-3 Physical Geology

and one of

PHYS 101-3 General Physics I\*

PHYS 120-3 Modern Physics and Mechanics

and one of

PHYS 102-3 General Physics II\*

PHYS 121-3 Optics, Electricity and Magnetism

and one of

PHYS 130-2 General Physics Laboratory\*

PHYS 131-2 Physics Laboratory I

and one of

STAT 270-3 Introduction to Probability and Statistics

STAT 201-3 Statistics for the Life Sciences

and one of

MATH 150-4 Calculus I

MATH 151-3 Calculus I

MATH 154-3 Calculus I for the Biological Sciences

and one of

MATH 152-3 Calculus II

MATH 155-3 Calculus II for the Biological Sciences

34-35 units

\*a minimum grade may be required to serve as a  
prerequisite to certain Faculty of Science coursesSee "Physics PHYS" on page 428 for possible  
physics course substitutions.**Upper Division Requirements**

(45 units)

**Required Geography Courses**

Students complete three of

GEOG 311-4 Hydrology

GEOG 313-4 River Geomorphology

GEOG 314-4 Weather and Climate

GEOG 315-4 World Ecosystems

GEOG 316-4 Ecosystem Biogeochemistry

GEOG 317-4 Soil Science

and one of

GEOG 322-4 World Resources

GEOG 323-4 Industrial Location

GEOG 324-4 Geography of Transportation

GEOG 325-4 Geographies of Consumption

GEOG 327-4 Geography of Tourism

GEOG 362-4 Geography of Urban Development

GEOG 369-4 Human Microgeography

GEOG 381-4 Political Geography

GEOG 382-4 Population Geography

GEOG 383-4 Regional Development and Planning I

GEOG 385-4 Agriculture and the Environment

GEOG 386-4 Geography, Health and Health Care

GEOG 387-4 Geography and Gender

GEOG 389W-4 Human Ecology: Human Relations to  
Nature

and one of

GEOG 301-4 Geographic Ideas and Methodology

GEOG 351-4 Cartography and Visualization

GEOG 352-4 Spatial Analysis

GEOG 353-4 Remote Sensing  
 GEOG 355-4 Geographical Information Science II  
 GEOG 356-4 3D Geovisualization 20 units

and two of

GEOG 411-4 Advanced Hydrology  
 GEOG 412-4 Glacial Processes and Environments  
 GEOG 413-4 Advanced River Geomorphology  
 GEOG 414-4 Advanced Climatology  
 GEOG 415-4 Advanced Biogeography  
 GEOG 416W-4 Pleistocene Geography  
 GEOG 417-4 Advanced Soil Science

**plus eight additional upper division units** from any 300 or 400 division courses in geography 16 units

#### Faculty of Science Courses

Students complete a minimum of nine units from 300 to 400 division BISC, CHEM, EASC, MASC, MATH, MBB, NUSC, PHYS and STAT courses. 9 units

Students complete 44 upper division units (excluding EDUC 401, 402, 405 and 406), and additional credit in any courses (excluding EDUC 401, 402, 405 and 406) to total 120 units.

### BA Geography Honors Program

Students complete all the major program requirements (see above) plus at least 10 additional units from 300 and 400 division courses in geography, and the following courses.

GEOG 301-4 Geographic Ideas and Methodology  
 GEOG 491-4 Honors Essay 18 units

A total of 132 units is required, of which 60 must be at the upper division. To graduate with honors, students must have a grade point average of not less than 3.00. See "Grade Point Averages" on page 30.

Program entry requires the approval of the department and an admission GPA of 3.00.

### BA Geography – Environmental Specialty Honors Program

Students complete all environmental specialty major requirements (see above) plus

GEOG 301-4 Geographic Ideas and Methodology  
 GEOG 491-4 Honors Essay

and any additional 400 division geography units to total 50 upper division units. An overall total of 132 units is required, of which 60 must be in upper division. Honors students must have a grade point average of not less than 3.00. See "Grade Point Averages" on page 30.

Program entry requires the approval of the department and an admission GPA of 3.00.

### BSc Physical Geography Honors Program

This is the same as the physical geography major except that it includes 60 units minimum of 300 to 400 division courses, of which 48 must be in geography or other closely related science subjects approved by the department. Seek Department of Geography advice in advance about suitability of courses. GEOG 491 (honors essay) may be included in these 48 units. The remaining 12 upper division units must be from BISC, CHEM, EASC, MASC, MATH, MBB, NUSC, PHYS or STAT courses. A total of 132 units is required and a 3.00 graduation GPA. See "General Regulations" on page 32. Honors program entry requires department approval.

### BA Geography Minor Program

Students are expected to consult with a departmental advisor when they formally declare a minor in

geography. Those who do not seek advice from the department run a risk of prolonging their programs.

#### Lower Division Requirements

Students complete both of  
 GEOG 100-3 Human Geography  
 GEOG 111-3 Earth Systems

and one of

GEOG 221-3 Economic Geography  
 GEOG 241-3 Social Geography

and one of

GEOG 251-3 Quantitative Geography  
 GEOG 253-3 Aerial Photographic Interpretation  
 GEOG 255-3 Geographical Information Science I 12 units

#### Upper Division Requirements

Students complete a minimum of 15 units in GEOG courses numbered 300 and 400. 15 units  
 Total 27 units

### BSc Physical Geography Minor Program

#### Lower Division Requirements

Students complete both of  
 GEOG 100-3 Human Geography  
 GEOG 111-3 Earth Systems

and one of

GEOG 250-3 Cartography I  
 GEOG 253-3 Aerial Photographic Interpretation  
 GEOG 255-3 Geographical Information Science I

#### Upper Division Requirements

A minimum of 15 units is required to be selected from the following or their equivalents.

GEOG 311-4 Hydrology  
 GEOG 313-4 River Geomorphology  
 GEOG 314-4 Weather and Climate  
 GEOG 315-4 World Ecosystems  
 GEOG 316-4 Ecosystem Biogeochemistry  
 GEOG 317-4 Soil Science  
 GEOG 411-4 Advanced Hydrology  
 GEOG 412-4 Glacial Processes and Environments  
 GEOG 413-4 Advanced River Geomorphology  
 GEOG 414-4 Advanced Climatology  
 GEOG 415-4 Advanced Biogeography  
 GEOG 416W-4 Pleistocene Geography  
 GEOG 417-4 Advanced Soil Science

### Extended Minor Programs

Students are expected to consult with a departmental advisor when they formally declare an extended minor in geography. The programs consist of the lower division requirements for a major and the upper division requirements for a minor (see above).

### Geography and Business Administration Joint Major Program

See "Business Administration and Geography Joint Major Program" on page 147 for requirements.

### Geography and Canadian Studies Joint Major Program

See "Joint Major Programs" on page 96.

### Geography and Latin American Studies Joint Major Program

See "Joint Major Programs" on page 96.

### Geography and Economics – Environmental Specialty BA Joint Major Program

#### Lower Division Requirements

##### Economics

Students complete the same requirements as for the economics major program and also complete ECON 260. The latter course can be counted as one of the 200 division requirements.

##### Geography

Students complete the same requirements as for the geography – environmental specialty major program.

#### Upper Division Requirements

##### Economics

Students complete 25 units in economics including BUEC 333-4 Statistical Analysis of Economic Data  
 ECON 301-4 Microeconomic Theory I: Competitive Behavior

ECON 302-4 Microeconomic Theory II: Strategic Behavior

ECON 305-5 Intermediate Macroeconomic Theory  
 ECON 362-4 Economics of Natural Resources

and at least one 400 division ECON or BUEC course (excluding ECON 431, 435, BUEC 433 and 485).

##### Group Requirements

Students must include at least one course from the economics group requirements. For details, See "Group Requirements" on page 105.

##### Geography

Students complete 24 units in geography including GEOG 322-4 World Resources  
 GEOG 382-4 Population Geography

plus one of

GEOG 323-4 Industrial Location  
 GEOG 383-4 Regional Development and Planning I  
 GEOG 385-4 Agriculture and the Environment  
 GEOG 386-4 Geography, Health and Health Care

plus three of

GEOG 422-4 Theories and Practices of Development  
 GEOG 426-4 Industrial Change and Local Development  
 GEOG 444-4 Regional Development and Planning II  
 GEOG 449-4 Environmental Processes and Urban Development

plus the following five core courses

GEOG 389W-4 Human Ecology: Human Relations to Nature

GEOG 428-4 World Forests

GEOG 445-4 Resource Planning

REM 311-3 Applied Ecology and Sustainable Environments

REM 356-3 Institutional Arrangements for Sustainable Environmental Management

##### Breadth Requirements

The following are recommended to fulfil the Faculty of Arts and Social Sciences breadth requirements.

ARCH 201-3 Introduction to Archaeology

ARCH 365-3 Ecological Archaeology

ARCH 386-3 Archaeological Resource Management

CMNS 347-4 Communication in Conflict and Intervention

CMNS 446-4 The Communication of Science and the Transfer of Technology

HUM 325-4 The Humanities and the Natural World

PHIL 120W-3 Introduction to Moral Philosophy

PHIL 144-3 Introduction to the Philosophy of Natural and Social Science

SA 371-4 The Environment and Society

## Certificate in Spatial Information Systems

### Admission Requirements

Consult with the advisor as early as possible for program admission. Formal approval is required before completion of the certificate. Units applied to one certificate may not be applied to another Simon Fraser University certificate or diploma.

### Requirements

To qualify for the certificate, students complete the following courses (or their equivalents from another department or institution) including all of  
GEOG 251-3 Quantitative Geography  
GEOG 253-3 Aerial Photographic Interpretation  
GEOG 255-3 Geographical Information Science I

plus three of  
GEOG 351-4 Cartography and Visualization  
GEOG 352-4 Spatial Analysis  
GEOG 353-4 Remote Sensing  
GEOG 355-4 Geographic Information Science II  
GEOG 356-4 3D Geovisualization

plus two of  
GEOG 451-4 Spatial Modeling  
GEOG 455-4 Theoretical and Applied GIS  
GEOG 457-4 Geovisualization Interfaces

### Certificate in Urban Studies

This certificate studies the nature and functions of the contemporary city from an interdisciplinary perspective of geography, political science, sociology and anthropology. Completion is possible in one year but additional terms may be required. It is suited to those contemplating careers in urban planning, governance or consulting. Units applied to one certificate may not be applied to another Simon Fraser University certificate or diploma.

### Admission Requirements

Normal requirements for admission to Simon Fraser University apply. Prior to formal approval into the certificate program, students complete two of  
GEOG 100-3 Human Geography  
POL 100-3 Introduction to Politics and Government (or 151)  
SA 101-4 Introduction to Anthropology (or 150)

### Course Requirements

Students will successfully complete eight courses for a total of 29 or 30 units, including all of  
GEOG 261-3 Introduction to Urban Geography  
POL 252-3 Local Democracy and Governance  
SA 201W-4 Anthropology and Contemporary Life  
and at least three of  
GEOG 325-4 Geography of Consumption  
GEOG 362-4 Geography of Urban Development  
GEOG 363-4 Urban Planning and Policy  
HUM 340-4 Great Cities in Their Time  
POL 352-4 Urban and Local Governance in Canada  
POL 354-4 Comparative Metropolitan Governance  
SA 302W-4 Global Problems and the Culture of Capitalism  
SA 362-4 Society and the Changing Global Division of Labour  
SA 364-4 Urban Communities and Cultures  
and at least one of these four capstone seminars  
GEOG 441-4 Cities, Space, and Politics  
GEOG 449-4 Environmental Processes and Urban Development  
POL 454-4 Urban Public Policy Making  
POL 458-4 Selected Topics in Local and Urban Governance  
and at least one of these research methods courses  
GEOG 251-3 Quantitative Geography

GEOG 255-3 Geographical Information Science I  
GEOG 391-4 Qualitative Research Methods  
POL 201-3 Research Methods in Political Science  
POL 315-4 Quantitative Methods in Political Science  
SA 255-4 Introduction to Social Research  
SA 356W-4 Ethnography and Qualitative Methods

Of the eight required courses, no more than four may be in any one department. Substitutions may be approved on a case-by-case basis by the advisor.

### Professional Registration as a BC Geoscientist

The right to practise in and to accept professional responsibility for geoscience in BC is limited to registered members of the Association of Professional Engineers and Geoscientists of British Columbia (APEGBC). Registration requirements can be met through the physical geography BSc major program and selected courses in other university departments. Consult the undergraduate advisor in the Department of Geography for details.

### Co-operative Education

This program integrates workplace learning with academic studies via alternate academic terms with four full-time paid work terms. Apply to co-operative education as early as possible to facilitate optimal scheduling. To enter, geography students must have a minimum 2.75 cumulative grade point average (CGPA), and must maintain a 2.5 CGPA to continue in the program. University and college transfer students who have previously participated in co-op elsewhere may be credited with the term(s) already completed.

To enrol, students should attend a co-op information session that is held during the first week of classes every term or visit the environment co-op co-ordinator. For further information and contact details, please visit the Science and Environment Co-op Program at <http://www.sfu.ca/coop/science>.

## Centre for Sustainable Community Development

2622 West Mall Complex, 778.782.5849 Tel,  
778.782.5473 Fax, [www.sfu.ca/cscd](http://www.sfu.ca/cscd)

Sciences Program

#### Advisor

2622 West Mall Complex, 778.782.5849,  
[scdadmin@sfu.ca](mailto:scdadmin@sfu.ca)

Sustainable community development (SCD) integrates economic, social and environment objectives in community development. Sustainable community development is based on the relationship between economic factors and other community elements such as housing, education, the natural environment, health accessibility and the arts. SCD has emerged as a compelling alternative to conventional approaches to development, a participatory, holistic and inclusive process that leads to positive, concrete changes in communities by creating employment, reducing poverty, restoring the health of the natural environment, stabilizing local economies, and increasing community control.

The Centre for Sustainable Community Development (CSCD), formerly the Community Economic

Development Centre, was founded in 1989. It supports the sustainable development of communities through education, research, and community mobilization. It provides research, training, and advisory services throughout BC and Canada, as well as internationally. The CSCD offers an undergraduate certificate and post baccalaureate diploma (also available through distance education), graduate support, and a non-credit professional program.

### Certificate

This program offers basic accreditation in sustainable community development and is for those who seek an holistic, active, practical credential either as part of an undergraduate degree or as a stand-alone certificate. General certificate regulations apply. Courses completed for this certificate may also apply toward major or minor program requirements or toward a bachelor's degree under normal regulations. This program may be completed by distance education.

### Admission Requirements

General undergraduate admission to the university and formal application for program approval with the Centre for SCD. Students must normally complete 30 units before applying for this program.

Application deadlines: May 1 for fall term, October 1 for spring term, February 1 for summer term, Intercession and summer session.

### Program Requirements

Students complete a minimum of 19 units of required courses and approved elective courses, attain at least a C+ grade in SCD 201 and SCD 301 for program continuance, and must maintain at least a 2.5 CGPA in all SCD courses to obtain the certificate.

Students complete 15 units from the following four required courses.

SCD 201-3 Introduction to Sustainable Community Development  
SCD 301-4 Sustainable Community Development Theory and Practice  
SCD 401-4 Social Enterprise for Sustainable Community Development  
SCD 403-4 Leadership in Sustainable Community Development

The remaining minimum of four units are selected from a list of multidisciplinary courses approved by the Centre or other electives approved by the director. These include SCD 410 Special Topics, offered annually with a changing SCD related topic. Under circumstances where fieldwork or work experience is not available as part of a student's major, minor or co-op program, the student may apply to complete SCD 404 Project as their elective. Selecting a three credit elective means that more than one elective will be required to fulfil the minimum units for completion of the certificate. Electives may be either upper or lower division courses, but must be approved by the CSCD. Courses in other departments may have prerequisites not included in this certificate program.

### Transfer Credit

Transfer credit for work done at other institutions, before or after program admission, may be approved toward program fulfillment provided they meet centre's requirements for community economic development relevance and that at least half of the total unit requirements are completed at Simon Fraser University. All other requirements for transfer credit under general undergraduate regulations apply.

### Limits

Those who complete the undergraduate certificate cannot enrol in the post baccalaureate diploma program (PBD). Those who have completed the CED

or sustainable community development (SCD) PBD may not enrol in this certificate. Those who have completed CED 400 or CED 402 may not complete SCD 201 or SCD 301 for credit toward the certificate.

More information is available at [www.sfu.ca/cscd](http://www.sfu.ca/cscd). See also "Centre for Sustainable Community Development" on page 176.

## Post Baccalaureate Diploma

This program is for those with an undergraduate degree or equivalent. The diploma is applicable to a wide range of occupational, professional and academic fields. By combining courses from several disciplines with a specially designed core of study and opportunities for guided practice, the program provides unique perspectives on sustainable community development.

### Admission Requirements

General undergraduate admission to the University and formal application for program approval with the centre is required. Students must complete a bachelor's degree or equivalent before applying to this program.

Application deadlines: May 1 for fall term, October 1 for spring term, February 1 for summer term, Intercession and summer session.

For information about post baccalaureate diploma program general regulations, see "Post Baccalaureate Diploma Program" on page 7.

### Required Courses

Students complete 30 upper division units, including 16 units in the following required courses.

SCD 301-4 Sustainable Community Development Theory and Practice

SCD 401-4 Social Enterprise for Sustainable Community Development

SCD 403-4 Leadership in Sustainable Community Development

SCD 404-4 Project in Sustainable Community Development

In addition to these required courses, students must complete at least 14 units in elective courses.

### Elective Courses

Select electives from the SCD electives (SCD 410, 412) and from a variety of departments, in consultation with the Centre for Sustainable Community Development's (CSCD) academic supervisor. A list of pre-approved electives is available but students may also propose courses for that meet the following requirements.

- the proposed course must be an upper division course (300-400 division) or higher.
- the elective proposal must be submitted and approved, in writing, before enrolling and include the course description. Students should complete electives early in the enrolment period.
- the proposed course must meet the CSCD's content requirements for being thematically related to SCD or applicable skills for SCD field work. It must be sufficiently related to SCD (e.g. underdevelopment, regional planning, public planning processes) and/or provide research and other skills relevant to SCD practice (e.g. business management, organizational behavior, fieldwork methodologies, qualitative and quantitative analysis). Determination of relevance and applicability will be made by the CSCD academic supervisor or their designate.
- a proposed directed studies course from another department requires a detailed study plan to be approved in advance by the CSCD academic

supervisor and the chosen faculty supervisor. The project's final report must be submitted to the centre as well as to the named faculty member.

- Students are responsible for prerequisite or other clearances to gain course entry. Many departments waive introductory courses for those with extensive experience. However, other Simon Fraser University departments give course enrolment priority to their own students and will not necessarily permit SCD students to enrol. Check all Calendar entries and consult both department and CSCD advisors before enrolling.

Other restrictions may apply.

### Transfer Credit

Transfer credit for work done at other institutions, before or after admission to the program, may be approved provided it meets SCD requirements for relevance to sustainable community development and provided that at least 18 of the total units are completed at Simon Fraser University. All other requirements for transfer credit under general post baccalaureate programs regulations apply.

Applications for transfer credit must be initiated at the time of application for admission to Simon Fraser University or by requesting a Letter of Permission from the admissions office. A GPA of 2.5 in all required and elective courses must be maintained in order to be credited toward the diploma and for continuance in the program.

More information on the centre and its programs is available at the Centre for Sustainable Community Development and its web site [www.sfu.ca/cscd](http://www.sfu.ca/cscd)

See also "Centre for Sustainable Community Development" on page 176 for information about research activities.

## Undergraduate Degrees Offered

bachelor of arts

bachelor of arts (honors)

bachelor of science

bachelor of science (honors)

The bachelor of arts in health sciences incorporates multi-disciplinary approaches to the study of health, illness and disease in human communities. The programs focus on the determinants of health, health promotion and disease prevention, health care systems, health policy and health technology. It features work that joins the biological, social, behavioral and policy sciences.

## Bachelor of Arts Program

### Major Program

This bachelor of arts degree requires 120 units including at least 45 in the upper division. The University's writing, quantitative, and breadth requirements (WQB) must also be met (see "Writing, Quantitative, and Breadth Requirements" on page 7).

### Lower Division Requirements

Students complete all of  
HSCI 100-3 Human Biology (or BISC 101 and 102)  
HSCI 130-3 Foundations of Health Sciences

and one of

SA 101-4 Introduction to Anthropology

SA 150-4 Introduction to Sociology

and at least one additional HSCI 100 division course

and one of

STAT 201-3 Statistics for the Life Sciences

STAT 203-3 Introduction to Statistics for the Social

Sciences

and at least four of

HSCI 211-3 Perspectives on Cancer, Cardiovascular  
and Metabolic Diseases

HSCI 212-3 Perspectives on Infectious and  
Immunological Diseases

HSCI 214-3 Perspectives on Mental Health and  
Illness

HSCI 215-3 Perspectives on Disability and Injury  
HSCI 216-3 Ecological Determinants of Human Growth, Development and Health

### Upper Division Requirements

Students complete all of  
HSCI 304-3 Perspectives on Environmental Health  
HSCI 305-3 The Canadian Health System  
HSCI 307-3 Research Methods in Health Sciences  
HSCI 330-3 Exploratory Strategies in Epidemiology  
HSCI 340-3 Social Determinants of Health  
STAT 302-3 Analysis of Experimental and Observational Data

and one of  
HSCI 319-3 Perspectives on Behavioral Risks  
HSCI 401-3 Health Promotion: Individuals and Communities

and one of  
HSCI 319-3 Applied Health Ethics  
PHIL 319-3 Applied Health Ethics

and one of  
HSCI 481-3 Senior Seminar in Social Health Science  
HSCI 482-3 Senior Seminar in Infectious Diseases  
HSCI 483-3 Senior Seminar in Environmental Health  
HSCI 484-3 Senior Seminar in Population Health Research  
HSCI 485-3 Senior Seminar in Mental Health and Addictions  
HSCI 486-3 Senior Seminar in Global Health

plus a minimum of six additional upper division courses related to the major, including at least 12 HSCI units.

### Honors Program

A 3.0 cumulative grade point average (CGPA) and a 3.0 upper division grade point average (GPA) is required for entry and must be maintained to graduate. Students must complete at least 132 units and meet all the requirements for the major program.

Also required is an honors thesis, based on independent research under the direction of a faculty member. Students will complete all of  
HSCI 490-5 Research Proposal  
HSCI 491-5 Independent Research  
HSCI 492-5 Honors Research Thesis

Students who obtain both a program and graduation GPA of 3.5 are eligible for the designation *first class*.

### Bachelor of Science Program

This program incorporates basic science courses (biology, chemistry, molecular biology and statistics) with courses about health and disease from the health sciences core. Building on a solid base of basic biomedical and applied health science, students will receive advanced training in pharmacology, toxicology, pathophysiology and epidemiology, as well as molecular biology and genetics.

Within the BSc program, students choose from three areas of emphasis: general studies; environmental and occupational health; or infectious diseases. Each includes a solid basis in the biomedical sciences.

### Major Program

This bachelor of science degree requires 120 units of required and elective courses, prerequisites, plus other electives to meet the University's writing, quantitative and breadth (WQB) requirements (see "Writing, Quantitative, and Breadth Requirements" on page 7).

The general studies area of emphasis requires a minimum of 41 units of upper division courses. The environmental and occupational health area of emphasis requires 48 upper division units, while the infectious diseases area of emphasis requires 46 upper division units.

### Lower Division Requirements

Students complete all of  
BISC 101-4 General Biology I  
BISC 102-4 General Biology II  
BISC 202-3 Genetics  
CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 281-4 Organic Chemistry I  
CHEM 282-2 Organic Chemistry II  
HSCI 130-3 Foundations of Health Science  
MBB 222-3 Biochemistry and Molecular Biology  
MBB 231-3 Cellular Biology and Biochemistry

#### Recommended Electives

KIN 105-3 Fundamentals of Human Structure and Function  
KIN 142-3 Introduction to Kinesiology  
MATH 154-3 Calculus I for the Biological Sciences  
PHYS 101-3 Physics for the Life Sciences I  
PSYC X99W-3 Brain, Mind and Society

Additional lower division courses are required for each of the three BSc areas of emphasis below.

### Upper Division Requirements

Students complete all of  
HSCI 305-3 The Canadian Health System  
HSCI 321-3 Human Pathophysiology  
HSCI 324-3 Human Population Genetics and Evolution  
HSCI 330-3 Exploratory Strategies in Epidemiology  
MBB 331-3 Molecular Biology

and one of  
HSCI 319-3 Applied Health Ethics  
PHIL 319-3 Applied Health Ethics

Additional upper division courses are required for each of the three BSc areas of emphasis as listed below.

### General Studies Area of Emphasis

In addition to the lower and upper division requirements, the following courses are required.

#### Lower Division Requirements

Students complete at least three of  
HSCI 211-3 Perspectives on Cancer, Cardiovascular and Metabolic Diseases  
HSCI 212-3 Perspectives on Infectious and Immunological Diseases  
HSCI 214-3 Perspectives on Mental Health and Illness  
HSCI 215-3 Perspectives on Disability and Injury  
HSCI 216-3 Ecological Determinants of Human Growth, Development and Health

and one of  
STAT 201-3 Statistics for the Life Sciences  
STAT 203-3 Introduction to Statistics for the Social Sciences

#### Upper Division Requirements

Students complete  
STAT 302-3 Analysis of Experimental and Observational Data

and at least one of the following sets

either all of  
HSCI 310-3 Techniques for Population Health Research  
HSCI 422-3 Diffusion Pathways in the Spread of Disease  
HSCI 424-3 Strategic Applications of GIS in Health

or all of  
BISC 303-4 Microbiology  
HSCI 426-3 Immune System I: Basis of Innate and Adaptive Immunity  
MBB 308-3 Molecular Biology and Biochemistry Lab I

or all of  
HSCI 304-3 Perspectives on Environmental Health  
HSCI 323-3 Principles of Pharmacology and Toxicology  
HSCI 476-3 Seminar in Molecular Basis of Drug Action and Environmental Exposure

and at least one of  
HSCI 427-3 Immune System II: Immune Responses in Health and Disease  
HSCI 432-3 Infectious Disease Epidemiology  
HSCI 474-3 Seminar in Neuropharmacology  
HSCI 475-3 Seminar in Molecular Mechanisms of Epigenetics  
HSCI 476-3 Seminar in Molecular Basis of Drug Action and Environmental Exposure  
HSCI 477-3 Seminar in Vaccine Immunology  
HSCI 478-3 Seminar in Molecular Epidemiology of Infectious Diseases  
HSCI 482-3 Senior Seminar in Infectious Diseases  
HSCI 483-3 Senior Seminar in Environmental Health  
HSCI 484-3 Senior Seminar in Population Health Research

In addition, students must also complete a minimum of two additional upper division HSCI courses that will total a minimum of six units.

### Environmental and Occupational Health Area of Emphasis

In addition to the lower and upper division requirements, the following courses are required for students pursuing this area of emphasis.

#### Lower Division Requirements

Students complete all of  
HSCI 211-3 Perspectives on Cancer, Cardiovascular and Metabolic Diseases  
HSCI 216-3 Ecological Determinants of Human Growth, Development and Health  
STAT 201-3 Statistics for the Life Sciences

and one of  
HSCI 212-3 Perspectives on Infectious and Immunological Diseases  
HSCI 214-3 Perspectives on Mental Health and Illness  
HSCI 215-3 Perspectives on Disability and Injury

#### Upper Division Requirements

Students complete all of  
BISC 313-3 Environmental Toxicology II  
HSCI 304-3 Perspectives on Environmental Health  
HSCI 323-3 Principles of Pharmacology and Toxicology  
HSCI 443-4 Environmental Health Toxicology Lab  
MBB 308-3 Molecular Biology and Biochemistry Lab  
STAT 302-3 Analysis of Experimental and Observational data

and at least one of  
HSCI 474-3 Seminar in Neuropharmacology  
HSCI 475-3 Seminar in Molecular Mechanisms of Epigenetics  
HSCI 476-3 Seminar in Molecular Basis of Drug Action and Environmental Exposure  
HSCI 483-3 Senior Seminar in Environmental Health

In addition, students must also complete a minimum of three additional upper division HSCI units as electives.

### Infectious Diseases Area of Emphasis

In addition to the lower and upper division requirements, the following courses are required for students pursuing this area of emphasis.

#### Lower Division Requirements

Students complete all of  
HSCI 212-3 Perspectives on Infectious and Immunological Diseases  
HSCI 216-3 Ecological Determinants of Human Growth, Development and Health  
STAT 201-3 Statistics for the Life Sciences

and one of  
HSCI 211-3 Perspectives on Cancer, Cardiovascular and Metabolic Diseases  
HSCI 214-3 Perspectives on Mental Health and Illness  
HSCI 215-3 Perspectives on Disability and Injury

**Upper Division Requirements**

Students complete all of  
 BISC 303-4 Microbiology  
 HSCI 426-3 Immune System I: Basis of Innate and Adaptive Immunity  
 HSCI 438-3 Animal Virology  
 MBB 308-3 Molecular Biology and Biochemistry Lab I  
 STAT 302-3 Analysis of Experimental and Observational Data

and at least one of

HSCI 441-4 Virology Laboratory  
 HSCI 442-4 Immunology Laboratory

and at least one of

HSCI 427-3 Immune System II: Immune Responses in Health and Disease  
 HSCI 432-3 Infectious Disease Epidemiology  
 HSCI 439-3 Pathogenesis of Human and Animal Viral Infectious Diseases  
 HSCI 477-3 Seminar in Vaccine Immunology

HSCI 478-3 Seminar in Molecular Epidemiology of Infectious Diseases  
 HSCI 482-3 Senior Seminar in Infectious Diseases

In addition, students must also complete a minimum of three additional upper division HSCI units as electives.

**Honors Program**

A 3.0 cumulative grade point average (CGPA) and a 3.0 upper division grade point average (GPA) is required for entry and must be maintained for graduation. Students must complete at least 132 units and meet all the requirements for the major program.

Also required is an honors thesis, based on independent research under the direction of a faculty member. Students will complete all of  
 HSCI 490-5 Research Proposal  
 HSCI 491-5 Independent Research  
 HSCI 492-5 Honors Research Thesis

Students who obtain both a program and graduation GPA of 3.5 are eligible for the designation *first class*.

**Minor Program**

Students complete at least four of  
 HSCI 211-4 Perspectives on Cancer, Cardiovascular, and Metabolic Diseases  
 HSCI 212-4 Perspectives on Infectious and Immunological Diseases  
 HSCI 214-4 Perspectives on Mental Health and Illness  
 HSCI 215-4 Perspectives on Disability and Injury  
 HSCI 216-4 Ecological Determinants of Human Growth, Development and Health

Students must also complete at least 15 upper division HSCI units.

**Co-operative Education**

This program integrates work experience with academic study. For information see "Co-operative Education" on page 212.

# Faculty of Science

P9309 Shrum Science Centre, 778.782.4590 Tel,  
778.782.3424 Fax, [www.sfu.ca/~science](http://www.sfu.ca/~science)

## Dean

M. Plischke BSc (Montr), MPhil (Yale), PhD (Yeshiva)

## Associate Dean

R.W. Mathewes BSc (S Fraser), PhD (Br Col)

For research interests of faculty members, see  
"Faculty of Science" on page 300.

## Undergraduate Degrees Offered

bachelor of science (honors)  
bachelor of science

## Diplomas and Certificates Offered

certificate in actuarial mathematics  
certificate in earth sciences  
certificate in forestry geoscience  
certificate in health and fitness studies  
certificate in applied human nutrition  
post baccalaureate diploma in biological sciences  
post baccalaureate diploma in kinesiology

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

## Major Program

This program provides a broad education in several fields and some specialization in one field known as the major. Optional programs, including double majors or majors and minors, are possible. General regulations are in Faculty of Science requirements for the BSc (major). For specific requirements, see the academic department concerned. Students not pursuing a specialization may undertake a general science program. See "General Science Program" on page 194. For information, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

## Requirements for Major

Students complete 120 units including

- minimum of 28 units at the 300 and 400 division as specified by the major program
- additional upper division units to total a minimum of 44 upper division units (excluding EDUC 401, 407)
- all undergraduate students enrolling in September 2006 and thereafter must fulfil the new curriculum writing, quantitative, and breadth requirements
- a minimum program 2.00 cumulative grade point average (CGPA) must be obtained on the overall major program requirements, as well as a minimum program 2.00 grade point average in the upper division major courses. (See "Grade Point Averages Needed for Graduation" on page 31 regarding graduation GPA requirements on all course work completed at Simon Fraser University.)

Additional requirements, as specified by the major program and in *General Information*, may be required and

## For students enrolled beginning fall 1991 or later

- upper division GPA and CGPA as specified in the *General Information* section of this Calendar

or

## For students enrolled before fall 1991

- a graduation GPA of 2.00 calculated on the required 120 units, or on the last 60 units completed including the 44 units of upper division credit
- a 2.00 GPA in the required upper division courses

## For students enrolled before fall 2006

- a minimum of 12 units in subjects completed outside the Faculty of Science (excluding EDUC 401 to 407) including six units minimum completed in the Faculty of Arts and Social Sciences are required

## Honors Program

This program provides in-depth study in a single field and requires the student to concentrate his/her studies in the fifth to eighth levels in the chosen field. It is recommended for those intending to proceed to advanced degrees provided they meet the entrance requirements and maintain the required standing.

Students applying for honors program admission will normally have a cumulative grade point average of 3.00 (B standing) and are expected to maintain this standard to continue in the honors program.

## Requirements for Honors and Honors First Class

- Students complete 132 units including
- a minimum of 48 upper division units in one subject area
  - additional upper division units to total to a minimum of 60 units of upper division credit
  - all undergraduate students enrolling in September 2006 and thereafter must fulfil the new curriculum writing, quantitative and breadth requirements
  - a program 3.00 CGPA minimum must be obtained on the overall honors requirements, as well as a minimum program GPA of 3.00 in the upper division required honors program courses. (See "Student Appeals" on page 32 of the *General Regulations* section regarding graduation GPA requirements on all course work completed at Simon Fraser University.) Honors students who obtain both a program and a graduation minimum GPA of 3.5 are eligible for the designation 'first class.'

Students must also complete additional requirements as specified by the honors and in the section called "Honors Program" on page 6.

## Program Guidelines

- At the outset, students are requested to indicate their intended major to facilitate counselling.
- Students who have not determined a major or intend to transfer to a professional school (i.e., medicine, dentistry, etc.) should seek advice from Student Services or the Office of the Dean of Science.
- Declaration of major or honors must be officially accepted by that department, prior to the completion of 60 units.
- New students intending to complete more than 15 units in their first term should seek advice from Student Services, the Office of the Dean of Science or their major department.
- Normally, the graduation requirements, as published in the Calendar at the time of formal declaration of major or honors, will apply.
- In any combination of science programs (honors/minor, major/major, major/minor, minor/minor) the same upper division course may not be used for both programs. One course might fulfil content requirements of two related areas, but in such a case additional replacement units in upper division work satisfactory to one of the departments

or program committees must be completed in one of the subjects to fulfil overall credit for the two programs.

- Programs totalling more than 18 units per term require the approval of the dean.

## Minor Program

Consult advisors in appropriate departments for course selection. Suggested programs and prerequisites are shown in each department's section. An average 2.00 grade is required in those upper division courses used to satisfy the requirements for a minor.

## General Science Program

This program, consisting of 120 units, provides a broad education in several fields with some specialization in at least two. It requires two minors, one of which must be chosen from within the Faculty of Science. The groupings of courses from which the two minors can be chosen are given under the *General Science Program* section (page 194), along with the general course requirements for this degree. It should be noted that all lower division requirements for the two chosen minors must also be completed.

## Co-operative Education

These programs are available in all programs including biological sciences, chemistry, earth sciences, environmental science, geography, mathematics, molecular biology and biochemistry, physics, and statistics and actuarial science. Details are given in the departmental sections and in "Co-operative Education" on page 212. Students are encouraged to complete the co-op option.

## Withdrawal of Program Approval

A student whose progress, in the judgment of the department, is below the standard for graduation from a program may be refused entry to, or required to withdraw from, that program in the department.

## Transfer Credit and Bachelor of Science Degrees for Students Who Successfully Complete First Year Medical Science Professional Training

Students who complete at least 90 units in a science degree program and are accepted into an accredited professional program in medicine, dentistry, optometry or veterinary medicine are eligible for a Simon Fraser University bachelor of science degree after successful completion of the first professional study year. To be acceptable, courses completed in the professional program must not duplicate those already completed at Simon Fraser University and must be acceptable for transfer credit in a major or honors program. Candidates must apply for transfer credit and a bachelor's degree through Simon Fraser University. Since official transcripts of the work completed in the first year of the professional program are required for transfer credit, application for graduation should be delayed until the summer term following the completion of requirements.

**Faculty of Dentistry at the University of British Columbia requires the following courses which are prerequisites for applying to enter the first year of dentistry (DMD).**

ENGL 199 and one of 101 or 102 or 103 or 104 or 105  
MBB 222 and 321  
BISC 101 and 102

CHEM 121, 122, 126, 281, 282, 286

MATH 154 and 155, or 157 and 158, or 151 and 152  
PHYS (101, 102, 130) or (120, 121, 131) or (125, 126, 131) or (140, 141)

Additional courses are required to complete six terms (90 UBC units) and should be chosen in accordance with a specific Simon Fraser University degree program but students are advised to select some courses from humanities and social sciences.

**Contact address**

For student admissions: Faculty of Dentistry – Student Services, University of British Columbia, 278 – 2199 Wesbrook Mall, Vancouver, BC, V6T 1Z3. Telephone 604.822.8063, Fax 604.822-8279, fodadms@interchange.ubc.ca, www.dentistry.ubc.ca

**Faculty of Forestry at the University of BC**

The Faculty of Forestry offers four-year bachelor of science degree programs in: Forest Sciences, Natural Resources Conservation, Wood Products Processing, Forest Operations and Forest Resources Management. The curricula allows students to enter the programs directly from high school, or following a year of science at the University of BC, or its equivalent at another post-secondary institution. If first year science at Simon Fraser University, the following courses are recommended.

ENGL one of 101 or 102 or 103 or 105 or 199

BISC 101 and 102

CHEM 111 and 121 or PHYS 100 or 101

MATH 154 and 155, or 157 and 158, or 151 and 152  
ECON 103 and 105

STAT 270

Students are encouraged to contact the Faculty of Forestry's advisors for more detailed information:

Student Services, Faculty of Forestry, University of British Columbia, Forest Science Centre, FSC 2609, 2424 Main Mall, Vancouver, BC, V6T 1Z4 Telephone 604.827.5195, toll free 1.888.933.9663, advising@forestry.ubc.ca, www.forestry.ubc.ca

**Faculty of Medicine at the University of British Columbia requires the following courses which are prerequisites for applying to enter the first year of medicine.**

English: any **two** of ENGL 101, 102, 103, 104, 105, 199 (199 recommended)

Chemistry: all of CHEM 121, 122, 126, 281, 282, 286  
Biochemistry: both MBB 222 and 321 (MBB 222 is a prerequisite for MBB 231; MBB 231 is a prerequisite for MBB 321)

Biology: both of BISC 101 and 102

Final authority regarding course equivalency rests with academic advisors in the Faculty of medicine and is only available after the application has been submitted and evaluated by an academic advisor.

Official admission requirements are defined in the UBC Calendar and may be subject to change. For information refer to [www.med.ubc.ca/admissionsmd/](http://www.med.ubc.ca/admissionsmd/)

**Contact address**

Admissions office: Faculty of Medicine, University of British Columbia, 317 – 2194 Health Sciences Mall, Vancouver, BC, V6T 1Z3. Telephone 604.822.4482, admissions.md@ubc.ca, www.med.ubc.ca

**Faculty of Pharmaceutical Sciences at the University of British Columbia requires the following courses which are prerequisites for**

**applying to enter the first year of a four year program of pharmacy.**

BISC 101 and 102

CHEM 121 / 122 / 126

ENGL any **two** of ENGL 199, 101, 102, 103, 104, 105  
MATH 151 / 152 (or 154 / 155 or 157 / 158)

PHYS (101, 102, 130) or (120, 121, 131) or (125, 126, 131) or (140, 141)

Refer to a current University of British Columbia Calendar for specific information. All applicants must submit additional supplemental admission requirements. Students should consult the Faculty of Pharmaceutical Sciences at the University of BC.

**Contact address**

Admissions, Enrolment Services, University of BC, 2016 – 1874 East Mall, Vancouver, BC, V6T 1Z1. Telephone 604.822.3014, www.pharmacy.ubc.ca

**Western College of Veterinary Medicine at the University of Saskatchewan, Saskatoon, requires the following courses as prerequisites for applying to enter this program.**

ENGL any **two** of 101, 102, 103 or 104

MBB 222 and 231

BISC 101, 102, 202, 303

CHEM 121, 122, 126, 281, 282, 286

MATH 151, 152 (or 154, 155 or 157, 158) STAT 201

may be substituted for MATH 152, or 155 or 158

PHYS (101, 102, 130) or (120, 121, 131) or (125, 126, 131) or (140, 141)

Electives 15 units

Electives should be based on the program in which the student is enrolled, and may include non-science related subjects. Students are encouraged to choose electives that broaden perspectives. The electives should not include courses which are equivalent to BC high school grade 12, or which are general education courses at the 000 division.

**Contact address**

Admission Office, Western College of Veterinary Medicine, University of Saskatchewan, 52 Campus Drive, Saskatoon, Saskatchewan, S7N 5B4

**General Note**

All course requirements should be completed by the end of the spring term preceding the proposed date of entry to a professional school.

The Western College of Veterinary Medicine requires a minimum 70% cumulative average for veterinary program admission. Grades are converted to a common scale for comparative purposes and this converted average will be used.

The college has recently, with Saskatchewan Human Rights Commission approval, introduced an Educational Equity Program for Aboriginal students. A defined number of seats have been allocated for self-identified Aboriginal descent applicants who will be ranked among themselves and not against the general applicant pool. Proof of Aboriginal ancestry is required and must be provided at the time of application. For the purpose of admission the accepted documents for Aboriginal ancestry proof are in the University of Saskatchewan Calendar.

**Breadth-Science Courses for Non-specialists**

The following courses may be completed to fulfill science Breadth requirements. They are specifically designed for those not specializing in pure or applied science and will introduce historical and contemporary perspectives on various scientific disciplines.

BISC 110-3 The Evolution and Diversity of Life on Earth

BISC 111-3 ST: Current Topics in Biology I

BISC 112-3 ST: Current Topics in Biology II  
CHEM 191-3 Living in a Materials World: From the Stone Age to Nanoscience

CHEM 192-3 Chemistry in Your Home, Work and Environment

CHEM 193-3 Close Encounters of the Radioactive Kind

EASC 103-3 The Rise and fall of the Dinosaurs

EASC 104-3 Geohazards: The Earth in Turmoil

EASC 106-3 Earth Through Time

MATH 160-3 Mathematics in Action

MATH 178-3 Fractals and Chaos

MBB 310-3 Genes, Biotechnology and Society

PHYS 190-3 Introduction to Astronomy

PHYS 192-3 Logarithm and Blues

SCI 300-3 Science and Its Impact on Society

STAT 100-3 Chance and Data Analysis

## Behavioral Neuroscience Program

*Department of Biomedical Physiology and Kinesiology*

K9625, 778.782.3573 Tel, 778.782.3040 Fax, kin\_advisor@sfu.ca, www.neuroscience.sfu.ca

*Department of Psychology*

5246 Robert C. Brown Hall, psyc-advisor@sfu.ca 778.782.3354 Tel, 778.782.3427 Fax

*Director*

M. Liotti MD (Naples), PhD (Parma)

The Department of Psychology and the Department of Biomedical Physiology and Kinesiology co-operate to offer this major and honors program leading to a bachelor of science or bachelor of science (honors) in the Faculty of Arts and Social Sciences or the Faculty of Science. The program is administered by a co-ordinating committee of two members each from the Department of Psychology and the Department of Biomedical Physiology and Kinesiology. The committee chair, who serves as program director, is appointed from either of the two departments, alternating every two years.

## Admission

The admission requirements for the three possible entry routes appear below.

### High School Admission

Students pursuing this major via the Faculty of Arts and Social Sciences will satisfy the faculty's general admission requirements. Students seeking Faculty of Science admission to this major will satisfy the same admission requirements as students seeking admission into the Department of Biomedical Physiology and Kinesiology.

### Post Secondary Transfer and Internal Transfer Applicants

Post-secondary transfer applicants may apply after at least 18 Simon Fraser University units are completed. Post-secondary transfer and internal transfer applicants are required to achieve a 2.5 cumulative grade point average (CGPA) for admission.

As well, applicants must have completed the following courses with a grade of C or better.

BISC 101-4 General Biology

CHEM 121-4 General Chemistry and Laboratory I

KIN 142-3 Introduction to Kinesiology

PSYC 100-3 Introduction to Psychology I

PSYC 102-3 Introduction to Psychology II

PSYC 201W-4 Introduction to Research Methods in Psychology

PSYC 210-4 Introduction to Data Analysis in Psychology

and one of  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences

and one of  
PHYS 101-3 Physics for the Life Sciences I  
PHYS 120-3 Mechanics and Modern Physics  
PHYS 140-4 Studio Physics – Mechanics and Modern Physics

### Program Continuation

Students must maintain a 2.5 cumulative grade point average to remain in the program, and obtain a C grade or higher in all required courses.

### Major Program

This program requires 120 units: 60 required lower division, plus 45 upper division units including 42 required upper division units plus three upper division Simon Fraser University elective units, plus six units designated Breadth-Humanities; plus nine lower or upper division Simon Fraser University elective units.

### Lower Division Requirements

Students complete all of the following 60 units.

#### Biology

BISC 101-4 General Biology  
MBB 221-3 Cellular Biology and Biochemistry

#### Chemistry

CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 281-4 Organic Chemistry I

#### Kinesiology

KIN 142-3 Introduction to Kinesiology  
KIN 205-3 Introduction to Human Physiology  
KIN 207-3 Human Motor Systems

#### Mathematics

MATH 154-3 Calculus for the Biological Sciences  
MATH 155-3 Calculus II for the Biological Sciences

#### Physics

PHYS 101-3 Physics for the Life Sciences I  
PHYS 102-3 Physics for the Life Sciences II  
PHYS 130-2 Physics for the Life Sciences Laboratory

#### Psychology

PSYC 100-3 Introduction to Psychology I  
PSYC 102-3 Introduction to Psychology II  
PSYC 201W-4 Introduction to Research Methods in Psychology  
PSYC 210-4 Introduction to Data Analysis in Psychology  
PSYC 221-3 Introduction to Cognitive Psychology  
PSYC 280-3 Introduction to Biological Psychology

### Upper Division Requirements

Students complete a total of 45 units including 42 required units as shown below.

#### Kinesiology

Students complete 21 units including these 12 units.  
KIN 305-3 Human Physiology I  
KIN 306-3 Human Physiology II (Principles of Physiological Regulation)  
KIN 324-3 Principles of Human Anatomy  
KIN 426-3 Neuromuscular Anatomy

plus nine additional units selected from the following.

KIN 336-3 Histology  
KIN 407-3 Human Physiology Laboratory  
KIN 415-3 Neural Control of Movement  
KIN 416-3 Control of Limb Mechanics  
KIN 446-3 Neurological Disorders  
KIN 448-3 Rehabilitation of Movement Control  
KIN 461-3 Physiological Aspects of Aging  
KIN 467-3 Human Motor Control

#### Psychology

Students complete 21 units including these 12 units.  
PSYC 300W-3 Critical Analysis of Issues in Psychology  
PSYC 381-3 Behavioral Endocrinology  
PSYC 382-3 Cognitive Neuroscience  
PSYC 388-3 Biological Rhythms and Sleep

plus nine additional units selected from the following.

PSYC 303-3 Perception  
PSYC 330-3 Attention  
PSYC 335-3 Sensation  
PSYC 383-3 Psychopharmacology  
PSYC 384-3 Developmental Psychobiology  
PSYC 386-4 Laboratory in Behavioral Neuroscience  
PSYC 387-3 Human Neuropsychology  
PSYC 480-4 Selected Topics in Biological Psychology I  
PSYC 482-4 Selected Topics in Biological Psychology II  
PSYC 491-3 Selected Topics in Psychology  
PSYC 493-3 Directed Studies  
PSYC 494-3 Directed Studies  
PSYC 495-3 Directed Studies  
plus three upper division elective units.

### Breadth, Quantitative and Writing Intensive Requirements

A minimum of six units of designated humanities breadth (B-Hum) courses must be completed. The social sciences breadth (B-Soc), science breadth (B-Sci), undesignated breadth (UB) and quantitative (Q) requirements are satisfied through completion of the behavioral neuroscience lower division required courses so no additional course work is required. As well, the writing intensive requirement is satisfied by the completion of required courses PSYC 201W and 300 W. For more information, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

### Honors Program

This program is for behavioral neuroscience major students who wish to pursue advanced study.

### Admission Requirements

To apply for admission, students must have completed a minimum of 60 units in the behavioral neuroscience major program with a minimum 3.00 cumulative grade point average (CGPA). Applicants complete a program approval form that is available at [www.neuroscience.sfu.ca](http://www.neuroscience.sfu.ca) and submit this, together with a recent unofficial transcript, to the chair of the behavioral neuroscience co-ordinating committee.

### Graduation Requirements

A minimum of 132 units is required consisting of the major program requirements (see above) plus one of KIN 457-3 Behavioral Neuroscience Undergraduate Honors Thesis Proposal  
PSYC 457-3 Behavioral Neuroscience Undergraduate Honors Thesis Proposal

and one of

KIN 459-9 Behavioral Neuroscience Undergraduate Honors Thesis  
PSYC 459-9 Behavioral Neuroscience Undergraduate Honors Thesis

At least 60 upper division units including 50 in upper division psychology and kinesiology are required with the following CGPAs: an overall University CGPA of 3.00; an overall upper division CGPA of 3.00; an overall behavioral neuroscience CGPA of 3.0 calculated on lower and upper division requirements; an upper division behavioral neuroscience CGPA of 3.00 calculated on upper division requirements.

## Department of Biological Sciences

\*joint appointment with geography

\*\*joint appointment with molecular biology and  
biochemistry

Programs offered include: major, honors, minor;  
environmental toxicology minor, post baccalaureate  
diploma. Co-operative education is available to  
students in major and honors programs.

### Academic Advising

Biological sciences majors should contact an advisor  
before enrolment.

### Field Schools

International field schools are offered in a range of  
areas, e.g. African studies, tropical biology or marine  
ecology. Students interested in completing field  
courses at an outside accredited institution for  
possible transfer credit should consult an advisor.

### Minimum Grade Requirement

A grade of C- or better is required on all prerequisite  
BISC and MBB courses.

### Prerequisites

Entry into courses numbered 300 and above normally  
requires completion of the lower division core in  
biological sciences. Prerequisites for any course may  
be waived with the approval of the department.

### Designated Breadth in Science Courses

Several BISC courses are available for non-majors to  
earn designated breadth in science (DB-Sci) credit.  
Included are BISC 101 and 102. These courses  
primarily deliver prerequisite information to BISC and  
science majors in related departments. Faculty of Arts  
and Social Sciences students are encouraged to earn  
their DB-Sci units in other BISC breadth courses (e.g.  
BISC 110, 111 and 112).

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil  
writing, quantitative and breadth requirements as part  
of their program. See "Writing, Quantitative, and  
Breadth Requirements" on page 7 for information.

### Major Program

All majors should complete the lower division core  
requirements within the first 60 units (four terms), and  
maintain a minimum 2.00 GPA in these courses. BISC  
majors are encouraged to choose their stream upon  
lower division core completion. Students who have  
had more than five course repeats are normally not  
permitted to remain in the program. Direct entry to the  
BISC major upon acceptance to the University is  
possible if Faculty of Science criteria is met.

Basic unit requirements underlying all areas of  
emphasis follow.

BISC/MBB (lower division)	20 units
non BISC/MBB (lower division)	27 units
BISC/MBB (upper division)	36 units
*electives	37 units
total (minimum)	120 units

\*see "Requirements for Major" on page 181

### Lower Division Core

Normally all biological sciences majors complete the  
following, or equivalents, within the first 60 units (four  
terms) of their programs.

### Courses in the Faculty of Science

Students complete all of  
BISC 101-4 Introduction to Biology  
BISC 102-4 Introduction to Biology  
BISC 202-3 Genetics  
BISC 204-3 Introduction to Ecology  
CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 281-4 Organic Chemistry and Laboratory I  
CHEM 282-2 Organic Chemistry II  
MBB 222-3 Molecular Biology and Biochemistry  
MBB 231-3 Cell Biology and Biochemistry  
STAT 201-3 Statistics for the Life Sciences

and one of

MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences

and one of

MATH 152-3 Calculus II  
MATH 155-3 Calculus II for the Biological Sciences

and one of

PHYS 101-3 Physics for the Life Sciences I  
PHYS 120-3 Mechanics and Modern Physics

PHYS 125-3 Mechanics and Special Relativity  
PHYS 140-4 Studio Physics – Mechanics and Modern  
Physics

and one of

PHYS 102-3 Physics for the Life Sciences II  
PHYS 121-3 Optics, Electricity and Magnetism  
PHYS 126-3 Electricity, Magnetism and Light  
PHYS 141-4 Studio Physics – Optics, Electricity and  
Magnetism

Students are encouraged to complete a full year of  
organic chemistry. Medical, dental or veterinary  
school applicants should include all CHEM courses  
above.

### Upper Division Requirements and Electives

All biological sciences majors will complete a  
minimum of 12 upper division BISC/MBB courses.  
The following two courses form an upper division core  
required by all BISC major/honors students.

BISC 300-3 Evolution  
BISC 333-3 Developmental Biology

All students must complete at least one physiology  
course from the following  
BISC 305-3 Animal Physiology  
BISC 366-3 Plant Physiology

and at least one organism lab course from the  
following

BISC 303-4 Microbiology  
BISC 306-4 Invertebrate Biology  
BISC 316-4 Vertebrate Biology  
BISC 317-3 Insect Biology  
BISC 326-3 Biology of Algae and Fungi  
BISC 337-4 Plant Biology  
BISC 416-4 Fish Biology  
BISC 418-3 Parasitology

Students should choose remaining requirements in an  
area of specialization. Four biology streams are  
offered: cell and molecular biology, integrative  
biology, ecology and evolution and an open stream.  
The open stream provides broad biological training, or  
may be used to specialize in an area not offered by  
the main streams (consult the undergraduate  
program advisor, individual faculty, or department  
website for advice on other areas of specialization).  
The course requirements for each stream are as  
follows.

### Cell and Molecular Biology

Students complete five stream specific courses from  
the following

BISC 302-3 Genetic Analysis  
BISC 303-4 Microbiology\*  
BISC 357-3 Gene Cloning\*  
BISC 403-3 Current Topics in Cell Biology\*  
BISC 405-3 Cell Physiology  
BISC 429-4 Separation Methods  
BISC 430-3 Plant Pathology  
BISC 439-4 Industrial Microbiology  
BISC 449-4 Histological Techniques in Biology  
BISC 457-3 Plant Molecular Biology and  
Biotechnology  
BISC 497W-3 Undergraduate Research: Writing  
Intensive  
BISC 498-3 Undergraduate Research I  
BISC 499-3 Undergraduate Research II  
MBB 308-3 Molecular Biology and Biochemistry  
Laboratory I  
MBB 322-3 Molecular Physiology\*  
MBB 331-3 Molecular Biology\*

\*recommended

plus three electives (nine units) chosen from any  
upper division undergraduate BISC, MASC or special  
topics courses appropriate for the selected stream, or  
alternative courses (e.g. MBB, KIN) as approved by  
the program advisor.

Students complete a total of five lab courses (which may include one of BISC 497W, 498, 499) among their upper division courses.

### Integrative Physiology

Students complete one of the following lab courses  
BISC 307-3 Animal Physiology Lab  
BISC 367-3 Plant Physiology Lab

plus four stream specific courses from the following  
BISC 312-3 Environmental Toxicology I  
BISC 313-3 Environmental Toxicology II  
BISC 405-3 Cell Physiology  
BISC 432-3 Chemical Pesticides and the Environment  
BISC 439-4 Industrial Microbiology  
BISC 445-3 Environmental Physiology of Animals  
BISC 455-3 Endocrinology  
BISC 497W-3 Undergraduate Research: Writing Intensive  
BISC 498-3 Undergraduate Research I  
BISC 499-3 Undergraduate Research II  
MBB 321-3 Intermediary Metabolism\*  
MBB 322-3 Molecular Physiology\*

\*recommended

plus three elective courses (nine units) chosen from any upper division undergraduate BISC or MASC course or special topics courses appropriate for the selected stream, or alternative courses (e.g. MBB, KIN) as approved by the program advisor.

Students complete a total of five lab courses (which may include one of BISC 497W, 498, 499) among their upper division courses.

### Ecology and Evolution

Students complete at least one of

BISC 304-3 Animal Ecology  
BISC 404-3 Plant Ecology

plus four stream specific courses from the following  
BISC 310-3 Natural History of British Columbia  
BISC 406-3 Marine Biology and Oceanography  
BISC 407-3 Population Dynamics  
BISC 410-3 Behavioral Ecology  
BISC 411-3 Behavioral Ecology Laboratory  
BISC 414-3 Limnology  
BISC 419-3 Wildlife Biology  
BISC 422-3 Population Genetics  
BISC 434-3 Paleocology and Palynology  
BISC 435-3 Introduction to Pest Management  
BISC 440-3 Biodiversity  
BISC 441-3 Evolution of Health and Disease  
BISC 497W-3 Undergraduate Research: Writing Intensive  
BISC 498-3 Undergraduate Research I  
BISC 499-3 Undergraduate Research II

\*recommended

plus three elective courses (nine units) chosen from any upper division undergraduate BISC or MASC or special topics courses appropriate for the selected stream, or alternative courses (e.g. MBB, KIN) as approved by the program advisor

Students complete a total of five lab courses (which may include one of BISC 497W, 498, 499) among their upper division courses.

### Open Stream

Students complete an additional eight courses (24 units) chosen from any upper division undergraduate BISC or MASC or special topics courses (e.g. MBB, KIN) as approved by the advisor.

Students complete five lab courses (which may include one of BISC 497W, 498, 499) among their upper division courses.

### Typical Lower Division Core Program

Although there are many variations, the following is a typical program for the first four terms.

### Term 1

BISC 102-4 Introduction to Biology  
CHEM 121-4 General Chemistry and Laboratory I  
MATH 154-3 Calculus I for the Biological Sciences  
PHYS 101-3 Physics for the Life Sciences I

### Term 2

BISC 101-4 Introduction to Biology  
CHEM 122-2 General Chemistry II  
CHEM 281-4 Organic Chemistry I  
MATH 155-3 Calculus II for the Biological Sciences

### Term 3

CHEM 282-2 Organic Chemistry II  
MBB 222-3 Molecular Biology and Biochemistry  
PHYS 102-3 Physics for the Life Sciences II  
Elective

and one of  
BISC 202-3 Genetics  
BISC 204-3 Introduction to Ecology

### Term 4

MBB 231-3 Cell Biology and Biochemistry  
STAT 201-3 Statistics for the Life Sciences (or 102)  
Electives

and one of  
BISC 202-3 Genetics  
BISC 204-3 Introduction to Ecology

**Note:** Biological sciences majors normally complete the chemistry, mathematics and physics requirements as well as the lower division biological sciences courses within the first 60 units (four terms).

## Honors Program

This program offers independent research and in-depth study. Entry requires a cumulative grade point average (CGPA) of 3.0 or higher (B standing), and department permission. Students complete all lower division requirements and at least 15 upper division units in biological sciences prior to application for entry. The honors program has the same requirements as the major except for the following additional requirements.

- maintenance of a minimum of 3.00 CGPA
- completion of a minimum of 60 upper division units in biological sciences or related subjects approved by the department, which must include a research-based honors thesis comprising BISC 490, 491 and 492W
- completion of appropriate electives to achieve 132 units, including the writing, quantitative and breadth requirements (see "Writing, Quantitative, and Breadth Requirements" on page 7).

## Biological Sciences Minor Program

Students complete all of  
BISC 101-4 Introduction to Biology  
BISC 102-4 Introduction to Biology

at least two of  
BISC 202-3 Genetics  
BISC 204-3 Introduction to Ecology  
MBB 222-3 Molecular Biology and Biochemistry  
MBB 231-3 Cell Biology and Biochemistry  
plus any 15 upper division biological sciences units, or closely related subject areas (including MASC courses), as approved by the department.

## Environmental Toxicology Minor Program

This program gives science undergraduates a thorough overview of environmental toxicology. They will be better qualified and eligible for employment with various industrial and governmental agencies engaged in environmental monitoring and research.

## Lower Division Requirements

The following lower division courses are required. Most students pursuing science degree programs will already have credit for most of these courses.

Students complete all of  
BISC 101-4 Introduction to Biology  
BISC 102-4 Introduction to Biology  
CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 126-2 General Chemistry Laboratory II  
CHEM 281-4 Organic Chemistry I  
CHEM 282-2 Organic Chemistry II  
CHEM 286-2 Organic Chemistry Laboratory II  
MBB 222-3 Molecular Biology and Biochemistry  
MBB 231-3 Cellular Biology and Biochemistry  
STAT 201-3 Statistics for the Life Sciences

and one of  
BISC 204-3 Introduction to Ecology  
EVSC 200-3 Introduction to Environmental Science

and one of  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences

and one of  
MATH 152-3 Calculus II  
MATH 155-3 Calculus II for the Biological Sciences

and one of  
PHYS 101-3 Physics for the Life Sciences I  
PHYS 120-3 Mechanics and Modern Physics  
PHYS 125-3 Mechanics and Special Relativity  
PHYS 140-4 Studio Physics – Mechanics and Modern Physics

and one of  
PHYS 102-3 Physics for the Life Sciences II  
PHYS 121-3 Optics, Electricity and Magnetism  
PHYS 126-3 Electricity, Magnetism and Light  
PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism

## Upper Division Requirements

BISC 312-3 Environmental Toxicology I  
BISC 313-3 Environmental Toxicology II  
BISC 432-3 Chemical Pesticides and the Environment  
plus two of  
BISC 445-3 Environmental Physiology of Animals (prerequisite BISC 305)  
CHEM 371-3 Chemistry of the Aqueous Environment (prerequisites CHEM 281 [or 150] and 360 [or 261])  
KIN 431-3 Environmental Carcinogenesis

and their prerequisites as noted in the "Actuarial Mathematics ACMA" on page 311.

Upper division credit may not fulfil units for more than one program. Some substitutions may be required. Appropriate course substitutions follow.

BISC 366-3 Plant Physiology  
BISC 405-3 Cell Physiology  
KIN 305-3 Human Physiology I  
KIN 306-3 Human Physiology II (Principles of Physiological Regulation)  
MBB 412-4 Enzymology

Students interested in an environmental toxicology minor should contact the department early. A 2.00 or higher GPA is required for minor program courses.

## Post Baccalaureate Diploma in Biological Sciences

This program is available in various biological sciences areas for students who have already completed a degree (usually) in science and who wish to upgrade their academic credentials. See "Biological Sciences BISC" on page 315 for 600 and 800 division course descriptions.

## Marine Science

Marine science programs may include both BISC and MASC courses to fulfil upper division biological sciences requirements.

MASC courses are offered on Vancouver Island's Bamfield Marine Sciences Centre in conjunction with universities in summer and fall in three or six week blocks. See the department in January for courses, and their use as substitutes for upper division BISC courses in major, minor or honors programs.

Course entry requires application through the Department of Biological Sciences well in advance of course commencement because candidate selection is limited. For information, consult the biological sciences department. To complete marine science courses, students must apply for university admission through the usual procedures, and be accepted (see "Admission and Readmission" on page 17). See page 416 for a list of MASC courses.

MASC course offerings may vary because instructors are drawn from different universities so prerequisites may vary slightly. Generally, upper division standing in biology is required; admission is competitive. Consult the brochure published each fall by the Bamfield Marine Sciences Centre which is available from the Department of Biological Sciences. Periodically, graduate courses will be offered (see "Department of Biological Sciences" on page 300).

## Students from other Departments

Those not enrolled in biological sciences programs may complete BISC 100, 101, 102. Admission to certain other courses is by permission of the department.

## Co-operative Education

Majors and honors students may apply for co-op education which includes four work terms during the academic program. See [www.sfu.ca/coop/science](http://www.sfu.ca/coop/science) or contact the science co-op co-ordinators in P9447 Shrum Science Centre, 778.782.5934.

### Director

P.C. Ruben, BSc, MSc (G Washington), PhD (Calg), Burnaby Mountain Endowed Professor

### Professors Emeriti

E.W. Banister BSc (Manc), MPE (Br Col), PhD (Ill), FASCM  
T.W. Calvert BSc(Eng) (Lond), MSEE (Wayne), PhD (Carnegie Tech), PEng  
A.E. Chapman Dip Phys Ed (Lough), MA (Ohio), MPhil, PhD (Lond)  
A.J. Davison BSc (Cape Town), MSc, PhD (Rutgers)  
J. Dickinson BA (Birm), PhD (Nott)  
R.G. Marteniuk BPE, MA (Alta), EdD (Calif)  
J.B. Morrison BSc (Glas), PhD (Strath), ARCST  
W.D. Ross BPE (Br Col), MA, MS, PhD (Ore), FASCM  
H. Weinberg BSc, MSc, PhD (Washington)

### Professors

P.N.S. Bawa BSc, MSc (Panjab), MSc, PhD (Alta)  
D.T. Finegood BSChE (Mich), MS (Northwestern), PhD (Calif)  
D. Goodman BPE, MPE (Br Col), PhD (Iowa)  
J.A. Hoffer BS (Mudd), PhD (Johns H)  
C. Krieger MD (Tor), MSc (Montr), PhD (London)  
C.L. MacKenzie BSc, MSc, PhD (Wat)

W.S. Parkhouse BPE (Alta), MPE, PhD (Br Col), Dean of Graduate Studies  
M.P. Rosin BSc (Sask), PhD (Tor)  
P.C. Ruben, BSc, MSc (G Washington), PhD (Calg), Burnaby Mountain Endowed Professor  
G.F. Tibbitts BEd (McG), MS, PhD (Calif), Canada Research Chair

### Associate Professors

A.P. Blaber BSc (Guelph), BEd (WOnt), MSc (Guelph), PhD (Wat)  
A.R. Brooks-Wilson BSc (S Fraser), MSc (Tor), PhD (Br Col)  
S.A. Lear BSc (S Fraser), PhD (Br Col)  
S.N. Robinovitch BSc (Br Col), MSc (MIT), PhD (Harvard/MIT), Canada Research Chair\*  
A.V. Vieira BSc (Calg), PhD (Alta)

### Assistant Professors

T.W. Claydon BSc, PhD (Leeds)  
V.E. Claydon BSc, PhD (Leeds)  
M. Donelan BKin (McM), MA, PhD (Calif)  
M.J. Wakeling BA, MA, PhD (Camb)  
M.D. White BSc, MSc (S Fraser), PhD (Laval)

### Senior Lecturers

J. Anthony BSc, MSc (Madr), PhD (All India IMS)  
R.C. Asmundson BSc, MSc (S Fraser)  
S. Brown BSc, MSc (S Fraser)  
R. Dill BSc, MSc (S Fraser)  
A.J. Leyland BEd (Exe), MSc (S Fraser)  
R. Ward BSc (Lough), MSc, PhD (S Fraser)

### Adjunct Professors

L. Hove-Madsen BSc, MSc, PhD (Aarhus)  
M.S. Koehle BSc (Qu), MSc (Tor), PhD (Br Col)  
P.M. Lane BEngMgt (McM), MASC (TechUNS), PhD (Dal)  
P. Pretorius BSc, MSc (Potchefstroom), DSc (Amst)  
D. Robinson BSc (Br Col), MSc, PhD (S Fraser)  
I. Rossberg-Gempton BA (S Fraser), MA (WLaure), PhD (S Fraser)  
A.W. Sheel BPE (New Br), MSc, PhD (Br Col)  
R.A. Strath MSc (Br Col), PhD (Alta), OD (New Eng Optometry)  
D.E.R. Warburton BA, MSc (York), PhD (Alta)  
L. Zhang BDS Dentistry (Western China), PhD (Tor)

### Associate Members

For areas of research, refer to the departments listed.

M.F. Beg, School of Engineering Science  
G. Chapman, School of Engineering Science  
B.L. Gray, School of Engineering Science  
B. Kaminska, School of Engineering Science  
C. Menon, School of Engineering Science  
M. Parameswaran, School of Engineering Science  
A.H. Rawicz, School of Engineering Science  
M.V. Sarunic, School of Engineering Science  
N.V. Watson, Department of Psychology  
E.C. Young, Department of Molecular Biology and Biochemistry

### Advisors

\*joint appointment with engineering science

## Mission

Our mission is to study human structure and function and their relation to health and movement. We seek to advance, apply and disseminate relevant knowledge and expertise.

The department builds on the basic sciences to link the study of movement, physiology and health with the broad scope of human endeavor. Faculty comprise anatomists, biochemists, biologists, biomechanists, biophysicists, engineers,

ergonomists, kinesiologists, physicians, physiologists and psychologists who study structure and function throughout the life cycle in health and disease, in benign and extreme environments, at work, at home, at sports and at play. Their educational goals impart a sound knowledge base and promote critical thinking, problem solving, research, technical and communication skills appropriate to the field, through undergraduate, graduate and continuing studies programs.

To this end, we strive for excellence in teaching, research and service programs focused on the following aspects of the human condition

- movement and its control
- regulation and adaptation of physiological systems
- growth, development and aging

and on the following applied disciplines.

- health promotion
- prevention of injury and disease
- functional evaluation and rehabilitation
- ergonomics/human factors
- environmental, exercise and work physiology

## Transfer Credit and Residency Requirements

Transfer students are advised that residency requirements apply to kinesiology programs.

## Programs Offered

The department offers a major in biomedical physiology and a major in kinesiology, leading to a BSc, BSc honors. The department also offers a minor in kinesiology, a minor in biomedical physiology, a post baccalaureate diploma in kinesiology, a certificate in applied human nutrition, and a certificate in health and fitness studies. Co-operative education helps biomedical physiology and kinesiology majors gain valuable work experience during their undergraduate studies.

The kinesiology major and honors programs are accredited with the Canadian Council of University Physical Education and Kinesiology Administrators (CCUPEKA).

Note that students cannot combine: a kinesiology major with a biomedical physiology minor; nor a biomedical physiology major with a kinesiology minor; nor a double major in kinesiology and biomedical physiology; nor a double minor in kinesiology and biomedical physiology.

## Teaching Certification

Kinesiology students with appropriate courses can apply to the British Columbia College of Teachers (BCCT) to have their degree accepted for professional certification. BCCT reviews applications individually. Contact the department for information.

## Prerequisite Course Grade

Students enrolling in kinesiology courses must have a grade of C- or better in prerequisite courses. Students enrolled in kinesiology certificate, minor, major (including concentrations), honors, second degree, and post baccalaureate diploma programs must have grade of C- or better in all required courses.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

## Admission Requirements

Bachelor of science program entry is possible via

- direct admission from high school

- transfer from a recognized post-secondary institution
- internal transfer from within Simon Fraser University

Admission is competitive. A separate admission average for each of the three entry routes is established each term, depending on spaces available and subject to the dean's approval. Admission averages are calculated on five required high school courses or five or more required post-secondary courses. If one or more courses have been duplicated (repeated), the grades from all course attempts will be used equally to calculate the kinesiology admission GPA.

#### Direct Admission – High School and Direct Transfer, Post Secondary Institutions

See "British Columbia and Yukon Applicants" on page 20.

#### Internal Transfer

Simon Fraser University students applying for Department of Biomedical Physiology and Kinesiology admission must complete the following courses with a grade of C- or better.

BISC 101-4 General Biology  
CHEM 121-4 General Chemistry and Laboratory I  
KIN 142-3 Introduction to Kinesiology

one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences

one of  
PHYS 101-3 Physics for the Life Sciences I  
PHYS 120-3 Mechanics and Modern Physics  
PHYS 125-3 Mechanics and Special Relativity  
PHYS 140-4 Studio Physics–Mechanics and Modern Physics

Applicants are selected based on an admission GPA calculated over these five required courses together with any of the following 9-10 courses.

CHEM 122-2 General Chemistry II  
CHEM 281-4 Organic Chemistry I  
KIN 201-3 Biomechanics  
KIN 205-3 Introduction to Human Physiology  
KIN 207-3 Human Motor Systems  
MBB 221-3 Cellular Biology and Biochemistry

and one of  
MATH 152-3 Calculus II  
MATH 155-3 Calculus II for the Biological Sciences

and one of  
PHYS 102-3 Physics for the Life Sciences II  
PHYS 121-3 Optics, Electricity and Magnetism  
PHYS 126-3 Electricity, Magnetism and Light  
PHYS 141-4 Studio Physics–Optics, Electricity and Magnetism

and  
STAT 201-3 Statistics for the Life Sciences

Apply for admission as soon as the five required courses have been completed. Unsuccessful applicants may complete any of the 10 additional courses to improve the admission GPA. A C- grade or better is required in each course used for the admission application. Those not meeting the kinesiology admission GPA upon completion of all four additional courses will be advised of alternatives.

**For students transferring some of core courses from another post-secondary institution:** only courses completed at Simon Fraser University (and not previously completed elsewhere) are used in the kinesiology admission GPA. Normally, at least 15 units from core courses are required as a basis for the GPA calculation. Exceptions must be approved by the department.

#### Application Procedure

Students should complete a program approval form available at the kinesiology general office and submit it to the kinesiology advisor by July 1 for fall term approval, November 1 for spring term approval, or March 1 for summer term approval.

### Biomedical Physiology Major Program

#### Program Requirements

To obtain a bachelor of science in biomedical physiology, students complete the following.

#### Lower Division Requirements

##### Biochemistry

Students complete both of  
MBB 222-3 Molecular Biology and Biochemistry  
MBB 231-3 Cellular Biology and Biochemistry 6 units

##### Biological Sciences

Students complete both of  
BISC 101-4 General Biology  
BISC 102-4 General Biology 8 units

##### Chemistry

Students complete all of  
CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 126-2 General Chemistry Laboratory II  
CHEM 281-5 Organic Chemistry I  
CHEM 282-2 Organic Chemistry II  
CHEM 286-2 Organic Chemistry Laboratory II 16 units

##### Kinesiology

Students complete all of  
KIN 142-3 Introduction to Kinesiology  
KIN 201-3 Biomechanics  
KIN 205-3 Introduction to Human Physiology 9 units

##### Mathematics

Students complete one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences  
plus one of  
MATH 152-3 Calculus II  
MATH 155-3 Calculus II for the Biological Sciences 6 units

##### Physics

Students complete one of  
PHYS 101-3 Physics for the Life Sciences I  
PHYS 120-3 Modern Physics and Mechanics  
PHYS 125-3 Mechanics and Special Relativity  
PHYS 140-4 Studio Physics – Mechanics and Modern Physics

plus one of  
PHYS 102-3 Physics for the Life Sciences II  
PHYS 121-3 Optics, Electricity and Magnetism  
PHYS 126-3 Electricity, Magnetism and Light  
PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism 6-8 units

##### Statistics

Students complete  
STAT 201-3 Statistics for the Life Sciences 3 units  
Total 54-56 units

#### Upper Division Requirements

The following courses must each be completed with a grade of C- or higher.

KIN 304W-3 Inquiry and Measurement in Kinesiology<sup>1</sup>  
KIN 305-3 Human Physiology I  
KIN 306-3 Human Physiology II  
KIN 326-4 Functional Anatomy  
KIN 407-3 Human Physiology Laboratory  
MBB 321-3 Intermediary Metabolism 19 units

and one of  
BISC 303-3 Microbiology

BISC 329-4 Introduction to Experimental Techniques  
BISC 333-3 Developmental Biology  
BISC 357-3 Gene Cloning  
BISC 403-3 Current Topics in Cell Biology  
BISC 405-3 Cell Physiology  
BISC 431-3 Molecular Biotechnology  
MBB 308-3 Molecular Biology and Biochemistry Laboratory I  
MBB 309-3 Molecular Biology and Biochemistry Laboratory II  
MBB 322-3 Molecular Physiology  
MBB 323-3 Introduction to Physical Biochemistry  
MBB 331-3 Molecular Biology 3-4 units

and seven of  
KIN 301-3 Biomechanics Laboratory  
KIN 310-3 Exercise/Work Physiology  
KIN 336-3 Microscopic Anatomy  
KIN 340-3 Active Health: Behavior and Promotion  
KIN 402-3 Mechanical Properties of Tissues  
KIN 412-3 Molecular and Cellular Cardiology  
KIN 415-3 Neural Control of Movement  
KIN 416-3 control of Limb Mechanics  
KIN 420-3 Selected Topics I\*  
KIN 421-3 Selected Topics II\*  
KIN 422-3 Selected Topics III\*  
KIN 423-3 Selected Topics IV\*  
KIN 426-3 Neuromuscular Anatomy  
KIN 430-3 Human Energy Metabolism  
KIN 431-3 Environmental Carcinogenesis  
KIN 442-3 Biomedical Systems  
KIN 444-3 Cardiac Disease: Pathophysiology and Assessment  
KIN 446-3 Neurobiology of Disease  
KIN 448-3 Rehabilitation of Movement Control  
KIN 484-3 Altitude and Aerospace Physiology  
KIN 496-3 Directed Study I\*  
KIN 498-3 Directed Study II\* 21 units

plus three upper division units from any faculty  
Total 46-47 units

<sup>1</sup>KIN 304W satisfies the University's breadth requirements of three upper division units in writing

\*must be selected topics courses in physiology

#### Unspecified and Partially Specified Electives

A total of 20 elective units are also required. These 20 units must include units from courses that will satisfy the University breadth requirement of six units each of designated humanities breadth (B-Hum) and social science breadth (B-Soc), and three units of lower division writing (W). For more information, please visit <http://www.sfu.ca/ugcr>. 20 units

Total 120-121 units

### Kinesiology Major Program

Please read descriptions of required courses before enrolling in the major or honors program (see "Kinesiology KIN" on page 408). The following is a summary outline of the general degree requirements for a bachelor of science.

#### Areas of Concentration

The department offers three areas of concentration for those wishing to complete a more specialized approach to their studies in kinesiology.

- active health and rehabilitation kinesiology
- ergonomics/human factors
- health and physiological sciences

Students majoring in kinesiology may choose the general program or one of the three concentrations. Each concentration has specific course requirements beyond the general requirements for a major.

#### Lower Division Requirements

The major program's lower division requirements are structured as a common core set for all majors, an additional set of required courses for one of the

concentrations, and breadth requirements for all kinesiology majors.

### Lower Division Core

The following are specified for kinesiology majors.

#### Biochemistry

Students complete one of

MBB 201-3 Biochemistry of the Cell

MBB 231-3 Cellular Biology and Biochemistry 3 units

#### Biological Sciences

Students complete

BISC 101-4 General Biology 4 units

#### Chemistry

Students complete all of

CHEM 121-4 General Chemistry and Laboratory I

CHEM 122-2 General Chemistry II

CHEM 281-4 Organic Chemistry I 10 units

#### Biomedical Physiology and Kinesiology

Students complete all of

KIN 142-3 Introduction to Kinesiology

KIN 201-3 Biomechanics

KIN 205-3 Introduction to Human Physiology

KIN 207-3 Information Processing in Human Motor Systems 12 units

#### Mathematics

Students complete one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

MATH 154-3 Calculus I for the Biological Sciences

plus one of

MATH 152-3 Calculus II

MATH 155-3 Calculus II for the Biological Sciences 6 units

#### Physics

Students complete one of

PHYS 101-3 General Physics I

PHYS 120-3 Modern Physics and Mechanics

PHYS 125-3 Mechanics and Special Relativity

PHYS 140-4 Studio Physics – Mechanics and Modern Physics

plus one of

PHYS 102-3 General Physics II

PHYS 121-3 Optics, Electricity and Magnetism

PHYS 126-3 Electricity, Magnetism and Light

PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism

Statistics

Students complete

STAT 201-3 Statistics for the Life Sciences 3 units

Total 46 units

### Concentration Requirements

Students choosing to specialize in one of the kinesiology concentrations must complete additional lower division courses as specified below.

#### Active Health and Rehabilitation Concentration

Students complete all of

KIN 110-3 Human Nutrition: Current Issues

KIN 140-3 Contemporary Health Issues

KIN 143-3 Exercise Management

KIN 241-3 Sports Injuries: Prevention and Rehabilitation 12 units

#### Ergonomics and Human Factors Concentration

Students complete

KIN 180-3 Introduction to Ergonomics

#### Health And Physiological Sciences Concentration

*It is anticipated that this program will be discontinued.*

*Interested students should contact the advisor for more information.*

Students complete all of

CHEM 126-2 General Chemistry Laboratory II

CHEM 282-2 Organic Chemistry II

CHEM 286-2 Organic Chemistry Laboratory II

MBB 222-3 Molecular Biology and Biochemistry 9 units

### Breadth Requirements

For students admitted prior to September 2006, a minimum of six units must be selected from the Faculty of Arts and Social Sciences.

For students admitted September 2006 or later, a minimum of six units each of designated humanities breadth (B-Hum) and social sciences breadth (B-Soc) must be completed. At least three units of lower division course work should also be writing-intensive (W). The quantitative (Q), science breadth (B-Sci) and undesignated breadth (UB) requirements are satisfied through completion of the kinesiology lower division core and hence do not require additional work. For more information, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

### Upper Division Requirements

Kinesiology majors complete the general program or one of three concentrations. Each option's upper division requirements is common to all plus additional upper division requirements specific to the option.

#### Upper Division Core

The following courses are required of all majors and must each be completed with a grade of C- or higher.

KIN 304W-3 Inquiry and Measurement in Kinesiology<sup>1</sup>

KIN 305-3 Human Physiology I

KIN 306-3 Human Physiology II

KIN 326-4 Functional Anatomy

KIN 340-3 Active Health: Behavior and Promotion

and one of<sup>2</sup>

KIN 301-3 Biomechanics Laboratory

KIN 407-3 Human Physiology Laboratory 19 units

<sup>1</sup>KIN 304W satisfies the University's breadth requirements of three upper division units in writing

<sup>2</sup>Students specializing in the ergonomics and human factors concentration can take both KIN 301 and 407 and count one as an elective.

#### General Program

Students complete an additional 21 kinesiology upper division units, excluding courses reserved for the minor program (KIN 325-3 and 342-3) or the honors program (KIN 497-3 and 499-12). MBB 321-3 may be used to satisfy three units of this requirement.

Total 40 units

For the degree, students must also complete an additional five upper division units chosen from any discipline within the University. Total 45 units

Students admitted in September 2006 or later must also complete WQB requirements with three units of writing-intensive credit at the upper division. This may be included within the 45 unit total for the degree. For more information, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

#### Active Health and Rehabilitation Concentration

Students choosing this concentration must complete

KIN 303-3 Kinanthropometry

KIN 310-3 Exercise/Work Physiology

KIN 343-3 Active Health: Assessment and Programming 9 units

and four of

KIN 311-3 Applied Human Nutrition

KIN 312-3 Nutrition for Fitness and Sport

KIN 375-3 Human Growth and Development

KIN 412-3 Molecular and Cellular Cardiology

KIN 426-3 Neuromuscular Anatomy

KIN 431-3 Environmental Carcinogenesis

KIN 444-3 Cardiac Rehabilitation

KIN 445-3 Advanced Cardiac Rehabilitation

KIN 446-3 Neurobiology of Disease

KIN 448-3 Rehabilitation of Movement Control

KIN 461-3 Physiological Aspects of Aging

KIN 467-3 Human Motor Control

KIN 481-3 Activity-Generated Musculo-Skeletal Disorders

KIN 496-3 Directed Study I\*

KIN 498-3 Directed Study II\*

and one additional upper division kinesiology course, excluding courses reserved for the minor program (KIN 325, 342) or the honors program (KIN 497, 499). 3 units

\*can be counted toward area of concentration if relevant to active health or rehabilitation kinesiology. Please see the head of the area of concentration for permission to count any of these courses towards the area of concentration requirement. 24 units

Total 43 units

For the degree, students must also complete an additional two units of upper division work chosen from any discipline within the University. 2 units

Total 45 units

Students admitted in September 2006 or subsequently must also complete WQB requirements with three units of writing-intensive credit at the upper division. This may be included within the 45 unit total for the degree. For information, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

#### Ergonomics and Human Factors Concentration

Students choosing this concentration complete all of

KIN 303-3 Kinanthropometry

KIN 488-3 Ergonomics Laboratory 6 units

and four of\*

KIN 310-3 Exercise/Work Physiology

KIN 380-3 Occupational Biomechanics

KIN 381-3 Psychology of Work

KIN 382-3 Physical Hazards in the Workplace

KIN 383-3 Human-Machine and Human-Computer Interaction

KIN 481-3 Activity-Generated Musculoskeletal Disorders

KIN 486-3 Human Factors in Industrial Design 12 units

\*The remaining three courses in the above list that are not used, may be used as electives (see electives course list below).

and six of

GERO 401-3 Aging and the Built Environment

IAT 333-3 Interaction Design Methods†

IAT 334-3 Interface Design†

IAT 335-3 Analysis of Design Situations†

KIN 343-3 Active Health: Assessment and

Programming

KIN 367-3 Psychology of Motor Skill Acquisition

KIN 402-3 Mechanical Properties of Tissues

KIN 415-3 Neural Control of Movement

KIN 416-3 Control of Limb Mechanics

KIN 420-3 Selected Topics I\*

KIN 421-3 Selected Topics II\*

KIN 422-3 Selected Topics III\*

KIN 423-3 Selected Topics IV\*

KIN 442-3 Biomedical Systems

KIN 448-3 Rehabilitation of Movement Control

KIN 461-3 Physiological Aspects of Aging

KIN 467-3 Human Motor Control

KIN 484-3 Altitude and Aerospace Physiology

KIN 485-4 Human Factors in the Underwater Environment

KIN 496-3 Directed Studies I\*

KIN 498-3 Directed Studies II\*

†requires additional prerequisites

\*can be counted towards area of concentration if relevant to ergonomics or human factors. See the area of concentration head for permission to count these toward the area of concentration requirement.

Relevant courses from other departments may be considered as electives upon advance approval by the ergonomics and human factors concentration steering committee. 18 units

Total 55 units

A further 10 lower or upper division elective units may be completed from any discipline within the university. The following are recommended.

IAT 201-3 Human-Computer Interaction and Cognition†  
IAT 235-3 Information Design†

†requires additional prerequisites

For the degree, students admitted September 2006 or subsequently must also complete WQB requirements with three units of writing-intensive credit at the upper division. This may be included within the 52 unit total. For more information, see [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr).

### Health and Physiological Sciences

#### Concentration

*It is anticipated that this program will be discontinued. Interested students should contact the advisor.*

Students choosing this concentration complete all of MBB 321-3 Intermediary Metabolism

and one of

BISC 303-3 Microbiology  
BISC 405-3 Cell Physiology  
BISC 431-3 Molecular Biotechnology  
MBB 308-3 Molecular Biology and Biochemistry Laboratory I  
MBB 309-3 Molecular Biology and Biochemistry Laboratory II  
MBB 322-3 Molecular Physiology

and seven of

KIN 310-3 Exercise/Work Physiology  
KIN 336-3 Microscopic Anatomy  
KIN 402-3 Mechanical Properties of Tissues  
KIN 412-3 Molecular and Cellular Cardiology  
KIN 415-3 Neural Control of Movement  
KIN 416-3 Control of Limb Mechanics  
KIN 420-3 Selected Topics I\*  
KIN 421-3 Selected Topics II\*  
KIN 422-3 Selected Topics III\*  
KIN 423-3 Selected Topics IV\*  
KIN 426-3 Neuromuscular Anatomy  
KIN 430-3 Human Energy Metabolism  
KIN 431-3 Environmental Carcinogenesis  
KIN 442-3 Biomedical Systems  
KIN 446-3 Neurobiology of Disease  
KIN 448-3 Rehabilitation of Movement Control  
KIN 484-3 Altitude and Aerospace Physiology  
KIN 496-3 Directed Study I\*  
KIN 498-3 Directed Study II\*

27 units  
Total 46 units

\*must be selected topics courses in physiology

Students admitted in September 2006 or subsequently must also complete WQB requirements with three upper division units of writing-intensive credit. This may be included within the 46 unit total. See [www.sfu.ca/ugcr](http://www.sfu.ca/ugcr) for more information.

### Unspecified and Partially Specified Electives

A total of 23 elective units are required. Of these, six must be from the social science and humanities course list (see "Social Science and Humanities Course List, Breadth Designated Courses" below) to meet CCUPEKA certification requirements. These 23 units must also include courses that will satisfy the University breadth requirements of six units each of designated humanities breadth (B-Hum) and social science breadth (B-Soc). However, courses from the social science and humanities course list that have B-Hum or B-Soc designation may be used to satisfy both requirements.

23 units  
Total 120 units

### Social Science and Humanities Course List, Breadth Designated Courses

ARCH 105-3 The Evolution of Technology B-Soc  
ARCH 201-3 Introduction to Archaeology B-Soc  
CMNS 354-3 Communications and Social Issues in Design  
COGS 100-3 Introduction to Cognitive Science B-Hum, B-Soc, B-Sci

CRIM 101-3 Introduction to Criminology B-Soc  
CRIM 355-3 The Forensic Sciences B-Soc  
FPA 129-3 Fundamental Integration of Human Movement  
GEOG 386-3 Geography, Health and Health Care  
GERO 300-3 Introduction to Gerontology B-Soc  
GERO 302-3 Health Promotion and Aging  
GERO 404-3 Health and Illness in Later Life  
GERO 420-4 Sociology of Aging  
HIST 409-3 Disease and Society  
HUM 227-3 Introduction to the Study of the Future B-Hum  
PHIL 001-3 Critical Thinking  
PHIL 100-3 Knowledge and Reality B-Hum Writing-Intensive  
PHIL 110-3 Introduction to Logic and Reasoning  
PHIL 120-3 Introduction to Moral Philosophy B-Hum Writing-Intensive  
PHIL 210-4 Natural Deductive Logic  
PHIL 144-3 Introduction to the Philosophy of Natural and Social Science  
PHIL 300-3 Introduction to Philosophy B-Hum  
PSYC 100-3 Introduction to Psychology I B-Soc  
PSYC 102-3 Introduction to Psychology II B-Soc  
PSYC 106-3 Psychological Issues in Contemporary Society B-Soc  
PSYC 365-3 Health Psychology  
SA 101-4 Introduction to Anthropology B-Soc  
SA 150-4 Introduction to Sociology B-Soc  
SA 218-4 Illness, Culture and Society  
SA 318-3 Anthropology of Medicine

### Requirements to Transfer to Professional Schools

Students are eligible to receive a BSc degree after completion of the second year of professional study and have completed at least 90 units of Simon Fraser University credit comprising the following.

- all lower division requirements
- 27 upper division units in biomedical physiology and kinesiology (including KIN 304, 305, 306, 326, 340 and either 301 or 407)
- acceptance into an accredited professional program in dentistry, medicine, chiropractic, or veterinary medicine

Professional program courses must not duplicate those already completed at Simon Fraser University and must be acceptable for transfer credit to the University. Candidates apply for transfer credit and for receipt of the degree through Student Services.

### Suggested Course Pathways

Suggested course selections for majors and any of the three areas of concentration are available from the kinesiology general office.

#### Typical First Year Course Schedule

**Term 1**  
BISC 101-4 General Biology  
CHEM 121-4 General Chemistry and Laboratory I  
KIN 142-3 Introduction to Kinesiology  
MATH 154-3 Calculus I for the Biological Sciences  
**Term 2**  
CHEM 122-2 General Chemistry II  
CHEM 281-4 Organic Chemistry I  
MATH 155-3 Calculus II for the Biological Sciences  
PHYS 101-3 General Physics I  
elective (KIN 143 recommended)

### Biomedical Physiology Honors Program

#### Application Requirements

- Application requires
- completion of a minimum of 60 units
  - a minimum CGPA of 3.00

- submission of a completed program approval form, along with the student's most recent unofficial record, to the undergraduate advisor.

### Graduation Requirements

To graduate with a bachelor of science with honors, the student must successfully complete

- a minimum of 132 units, with a minimum of 60 upper division units of which at least 54 must be in biomedical physiology and kinesiology courses
- completion of all biomedical physiology major program requirements
- KIN 497 and KIN 499
- a minimum CGPA of 3.00 on all relevant measures (CGPA, upper division grade point average, department grade point average, department upper division grade point average)

Note: honors students may count only one of either KIN 496 or 498 toward their 27 upper division elective biomedical physiology and kinesiology units.

### Kinesiology Honors Program

#### Application Requirements

The application requirements are the same as for the biomedical physiology honors program (see above).

### Graduation Requirements

Graduation requirements are the same as for the biomedical physiology program except that kinesiology honors students will complete the kinesiology major program requirements instead of the biomedical physiology major program requirements (see above).

### Biomedical Physiology Minor Program

#### Application Requirements

Acceptance into this program is based on the same application requirements as for the biomedical physiology major program.

### Program Requirements

There is a maximum number of allowable transferable units that count towards the minor program from any other institution.

#### Lower Division Requirements

##### Biochemistry

Students complete both of  
MBB 222-3 Molecular Biology and Biochemistry  
MBB 231-3 Cellular Biology and Biochemistry

##### Biological Sciences

Students complete both of  
BISC 101-4 General Biology  
BISC 102-4 General Biology

##### Chemistry

Students complete all of  
CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 126-2 General Chemistry Laboratory II  
CHEM 281-4 Organic Chemistry I  
CHEM 282-2 Organic Chemistry Laboratory II

##### Kinesiology

Students complete  
KIN 205-3 Introduction to Human Physiology

##### Mathematics

Students complete one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences

plus one of

MATH 152-3 Calculus II

MATH 155-3 Calculus II for the Biological Sciences

#### Physics

Students complete one of

PHYS 101-3 General Physics I

PHYS 120-3 Modern Physics and Mechanics

PHYS 125-3 Mechanics and Special Relativity

PHYS 140-4 Studio Physics – Mechanics and Modern Physics

plus one of

PHYS 102-3 General Physics II

PHYS 121-3 Optics, Electricity and Magnetism

PHYS 126-3 Electricity, Magnetism and Light

PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism

#### Upper Division Requirements

Students complete both of

KIN 305-3 Human Physiology I

KIN 306-3 Human Physiology II

and one of

KIN 324-4 Principles of Human Anatomy

KIN 325-3 Basic Human Anatomy

Students complete six additional upper division KIN units from the following list. Note that some courses may require additional prerequisites.

KIN 304W-3 Inquiry and Measurement in Kinesiology†

KIN 310-3 Exercise/Work Physiology

KIN 336-3 Microscopic Anatomy

KIN 402-3 Mechanical Properties of Tissues

KIN 412-3 Molecular and Cellular Cardiology

KIN 415-3 Neural Control of Movement

KIN 420-3 Selected Topics I\*

KIN 421-3 Selected Topics II\*

KIN 422-3 Selected Topics III\*

KIN 423-3 Selected Topics IV\*

KIN 426-3 Neuromuscular Anatomy

KIN 430-3 Human Energy Metabolism

KIN 431-3 Environmental Carcinogenesis

KIN 444-3 Cardiac Disease: Pathophysiology and Assessment

KIN 446-3 Neurobiology of Disease

KIN 448-3 Rehabilitation of Movement Control

KIN 484-3 Altitude and Aerospace Physiology

KIN 485-3 Human Factors in the Underwater Environment

and one of

KIN 496-3 Directed Study I\*

KIN 498-3 Directed Study II\*

†KIN 304W satisfies the University's breadth requirements of three upper division units in writing

\*must be selected topics courses in physiology

A minimum GPA of 2.0 calculated on all biomedical physiology and kinesiology courses used to satisfy the requirements is required as well as a minimum upper division GPA of 2.0 calculated on those upper division biomedical physiology and kinesiology courses used to satisfy the requirements.

## Kinesiology Minor Program

### Application Requirements

Application requires

- completion of KIN 105 or 205 or 208, and KIN 142 and 143 with a minimum grade of C- in each course
- completion of two of KIN 110, 201, 207 or 241 with a minimum grade of C- in each
- submission of a program approval form to the undergraduate advisor.

Admission is competitive. The admission GPA is calculated each term on the five required courses. If one or more have been duplicated (repeated), grades from all course attempts will be used equally to calculate kinesiology's admission GPA.

### Program Requirements

There is a maximum number of allowable transferable units that count towards the minor program from any other institution, including the Open Learning Agency.

Students complete

KIN 105-3 Fundamentals of Human Structure and Function

and both of

KIN 142-3 Introduction to Kinesiology

KIN143-3 Exercise Management

and two of

KIN 110-3 Human Nutrition: Current Issues

KIN 201-3 Biomechanics

KIN 207-3 Information Processing in Human Motor Systems

KIN 241-3 Sports Injuries — Prevention and Rehabilitation

and one of

KIN 325-3 Basic Human Anatomy

KIN 342-3 Active Health

KIN 367-3 Psychology of Motor Skill Acquisition

plus 12 additional upper division kinesiology units

A minimum GPA of 2.0 calculated over all kinesiology courses used to satisfy the requirements is required as well as a minimum upper division GPA of 2.0 calculated from those upper division kinesiology courses used to satisfy the requirements.

## Certificate in Applied Human Nutrition

This certificate is intended for professionals who are not dietitians nor nutritionists, but are concerned with health and wellness promotion such as nurses, kinesiologists, professional coaches and personal trainers, teachers, trained food service supervisors, dietary technicians, pharmacists and clinical psychologists. The certificate provides an enhanced understanding of the relationships among food, body composition, health, and human performance.

Please note that this certificate does not qualify the individual as a registered dietitian.

Admission is governed by the University's admissions regulations (see "British Columbia and Yukon Applicants" on page 20). After University admission, submission of a completed program approval form to the kinesiology undergraduate advisor is required for formal acceptance in the program.

### Requirements

There is an allowable transferable credit maximum that counts toward the certificate program from any other institution, including the Open Learning Agency.

Students complete one of

KIN 105-3 Fundamentals of Human Structure and Function\*

KIN 205-3 Introduction to Human Physiology

KIN 208-3 Introduction to Physiological Systems

and all of

KIN 110-3 Human Nutrition: Current Issues\*

KIN 111-3 Food and Food Safety\*

KIN 212-3 Food and Society\*

KIN 311-3 Applied Human Nutrition

Students must also complete nine units (three courses) of electives chosen from the following. Only three of these units may be from 100 division courses.

GERO 302-3 Health Promotion and Aging†

GERO 407-3 Nutrition and Aging†

KIN 140-3 Contemporary Health Issues\*

KIN 142-3 Introduction to Kinesiology\*

KIN 143-3 Exercise Management\*

KIN 303-3 Kinanthropometry†

KIN 312-3 Nutrition in Fitness and Sport\*

KIN 342-3 Active Health\*

KIN 375-3 Human Growth and Development\*†

KIN 430-3 Human Energy Metabolism†

KIN 431-3 Environmental Carcinogenesis†

KIN 461-3 Physiological Aspects of Aging\*

\*courses available by distance education

†courses which have additional prerequisites

Students must have a minimum 2.00 GPA calculated on all required courses. The certificate is normally completed within five years of admission to the certificate program. Units applied to one certificate may not be applied to another certificate or diploma.

## Certificate in Health and Fitness Studies

This program provides a co-ordinated program of study on a full or part time basis in the areas of health, fitness and nutrition, and provides basic knowledge in the functions of the healthy human body at rest and during physical exertion. The program is useful to those supervising training and/or fitness programs, to sport coaches, and to the general public.

Admission is governed by the University admissions regulations. See "British Columbia and Yukon Applicants" on page 20.

After being admitted to Simon Fraser University, submission of a completed program approval form to the kinesiology undergraduate advisor is required for formal acceptance in the program.

### Requirements

There is a maximum number of allowable transferable units that count towards the certificate from any other institution, including the Open Learning Agency.

Students complete one of

KIN 105-3 Fundamentals of Human Structure and Function\*

KIN 205-3 Introduction to Human Physiology

KIN 208-3 Introduction to Physiological Systems

and all of

KIN 110-3 Current Topics in Nutrition\*

KIN 140-3 Contemporary Health Issues\*

KIN 142-3 Introduction to Kinesiology\*

KIN 143-3 Exercise Management\*

and one of

KIN 342-3 Active Health\*

KIN 343-3 Active Health: Assessment and Promotion†

Students must also complete nine units (three courses) of electives chosen from the following.

KIN 207-3 Information Processing Human Motor Systems

KIN 221-3 Special Topics in Kinesiology

KIN 241-3 Sports Injuries – Prevention and Rehabilitation

KIN 303-3 Kinanthropometry†

KIN 310-3 Exercise/Work Physiology\*†

KIN 312-3 Nutrition for Fitness and Sport\*

KIN 325-3 Basic Human Anatomy\*

KIN 340-3 Active Health: Behavior and Promotion

KIN 367-3 Psychology of Motor Skill Acquisition\*†

KIN 375-3 Physiological Basis of Growth and Development\*

KIN 461-3 Physiological Aspects of Aging†

\*courses available by distance education

†courses which have additional prerequisites

Students must have a minimum 2.00 GPA calculated on courses used toward the certificate, and a current cardiopulmonary resuscitation (CPR) certificate at time of completion. The certificate is normally completed within five years of program admission.

Units applied to one certificate may not be applied to another certificate or diploma.

## Post Baccalaureate Diploma in Kinesiology

This program is normally available for students who have completed a degree other than kinesiology. For further information about the program's general regulations, see "Post Baccalaureate Diploma Program" on page 7.

### Requirements

Successful completion of an approved program comprised of 30 units of upper division or graduate courses, including the following courses, is required.

KIN 304-3 Inquiry and Measurement in Kinesiology  
KIN 305-3 Human Physiology I  
KIN 306-3 Human Physiology II  
KIN 326-4 Functional Anatomy  
KIN 340-3 Active Health: Behavior and Promotion  
and one of  
KIN 301-3 Biomechanics Laboratory  
KIN 407-3 Human Physiology Laboratory

A minimum 2.5 grade point average is required for courses that are applied to the diploma. Courses must be selected from an approved list in consultation with an advisor. Students interested in this program normally hold a BSc or equivalent. Students are responsible for satisfying the necessary prerequisites.

### Co-operative Education

Co-operative education combines work experience with academic studies. Students spend alternate terms on campus and in paid, study-related jobs. Co-op programs are available in kinesiology and biomedical sciences.

Arrangements for work experiences are made through the department's co-op co-ordinator and the University's co-op education office. For further details, see "Co-operative Education" on page 212.

## Department of Chemistry

C8035 Shrum Science Centre, 778.782.3590 Tel, 778.782.3765 Fax, [www.sfu.ca/chemistry](http://www.sfu.ca/chemistry)

### Chair

R.D. Sharma MSc, PhD (Panjab)

### Lecturers

R.L. Goyan BSc, PhD (Calg)  
G. Mund BSc (Br Col), PhD (S Fraser)

### Advisor

Dr. K.S. MacFarlane BSc, MSc, PhD (Br Col), C8049 Shrum Science Centre, 778.782.3350, [kenmac@sfu.ca](mailto:kenmac@sfu.ca)

\*joint appointment with biochemistry

## Students Intending to Specialize in Chemistry

The point at which a high school or regional college student enters the chemistry program is governed by the student's subject knowledge. CHEM 110 and 111 are not required for the BSc degree but are available as electives to those with no chemistry knowledge or who are starting from BC high school chemistry 11. Those with BC high school chemistry 12 (or equivalent) normally start with CHEM 121. Major and honors students must fulfil program requirements below. Whether majoring in chemistry or not, students may not enrol in any CHEM course for which a D grade was obtained in any prerequisite.

The following statements clarify and standardize the minimum requirements that a student must fulfil to complete a chemistry course as well as those to pass a combination lecture/laboratory course.

### Course Non-completion

The following will constitute non-completion of the required material in a chemistry course.

- not writing the final examination or its equivalent
- not completing the required minimum number of experiments in a laboratory course or the laboratory component of a course
- not completing additional or alternative material specified by the instructor

The letter grade N will be awarded in these cases.

Students must pass both the lecture and laboratory components individually to obtain a passing grade in lecture/laboratory combination courses.

### Graduate Courses

Graduate courses are available to senior undergraduate students for upper division chemistry credit. See "Chemistry CHEM" on page 328 for a list of all CHEM courses offered, or consult an advisor for specific course offerings.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

## Major Program

Mathematics and physics courses should be completed as early as possible.

### Lower Division Requirements

(53-54 units)

CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 126-2 General Chemistry Laboratory II  
CHEM 215-4 Introduction to Analytical Chemistry  
CHEM 230-3 Inorganic Chemistry  
CHEM 236-3 Inorganic Chemistry Laboratory  
CHEM 260-4 Atoms, Molecules, Spectroscopy  
CHEM 281-4 Organic Chemistry I  
CHEM 282-2 Organic Chemistry II  
CHEM 286-2 Organic Chemistry Laboratory II  
MATH 152-3 Calculus II  
MATH 232-3 Applied Linear Algebra  
MATH 251-3 Calculus III  
MBB 222-3 Molecular Biology and Biochemistry  
and one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I

and all of  
PHYS 120-3 Mechanics and Modern Physics  
PHYS 121-3 Optics, Electricity and Magnetism  
PHYS 131-2 Physics Laboratory I

or all of

PHYS 125-3 Mechanics and Special Relativity  
PHYS 126-3 Electricity, Magnetism and Light  
PHYS 131-2 Physics Laboratory I

or both of

PHYS 140-4 Studio Physics – Mechanics and Modern Physics  
PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism

### Upper Division Requirements

(28 units)

CHEM 316-4 Introductory Instrumental Analysis  
CHEM 332-3 The Chemistry of Transition Metals  
CHEM 336-2 Advanced Inorganic Chemistry Laboratory  
CHEM 360-3 Thermodynamics and Chemical Kinetics  
CHEM 366-3 Physical Chemistry Laboratory  
CHEM 380-4 Chemical and Instrumental Methods of Identification of Organic Compounds

and an additional 9 units of upper division credit in CHEM, MBB or NUSC courses, including at least six units of 400 division CHEM courses.

### Electives

(38-39 units)

In addition to the above, students must complete

- courses chosen to fulfil the WQB requirements (see "Writing, Quantitative, and Breadth Requirements" on page 7)
- upper division courses chosen from any faculty (but excluding EDUC 401-407) to total a minimum of 44 upper division units
- electives at any division from any faculty to provide 120 units as is required for the degree.

Specialization in physical or theoretical chemistry requires more mathematics and physics courses than specified above and a computer programming course.

### Typical Course Sequence

The following is a typical course sequence for the first four terms. Variations are possible.

#### Term 1

CHEM 121-4 General Chemistry and Laboratory I  
MATH 151-3 Calculus I  
PHYS 120-3 Mechanics and Modern Physics electives

#### Term 2

CHEM 122-2 General Chemistry II  
CHEM 126-2 General Chemistry Laboratory II  
MATH 152-3 Calculus II  
PHYS 121-3 Optics, Electricity and Magnetism  
PHYS 131-2 Physics Laboratory I elective

#### Term 3

CHEM 230-3 Inorganic Chemistry  
CHEM 236-3 Inorganic Chemistry Laboratory  
CHEM 281-4 Organic Chemistry I  
MATH 232-3 Applied Linear Algebra  
MBB 222-3 Molecular Biology and Biochemistry

#### Term 4

CHEM 215-4 Introduction to Analytical Chemistry  
CHEM 260-4 Atoms, Molecules, Spectroscopy  
CHEM 282-2 Organic Chemistry II  
CHEM 286-2 Organic Chemistry Laboratory II  
MATH 251-3 Calculus III

### Honors Program

Mathematics and physics courses should be completed as early as possible to benefit the study of chemistry.

### Lower Division Requirements

(59-60 units)

Students complete the same lower division requirements as those specified for the major program plus the following two additional courses.

PHYS 211-3 Intermediate Mechanics  
PHYS 231-3 Physics Laboratory II

### Upper Division Requirements

(48 units)

CHEM 316-4 Introductory Instrumental Analysis  
CHEM 332-3 The Chemistry of Transition Metals  
CHEM 336-2 Advanced Inorganic Chemistry Laboratory  
CHEM 360-3 Thermodynamics and Chemical Kinetics  
CHEM 366-3 Physical Chemistry Laboratory  
CHEM 380-4 Chemical and Instrumental Methods of Identification of Organic Compounds  
CHEM 481-5 Undergraduate Research  
NUSC 341-3 Introduction to Radiochemistry and one of  
CHEM 460-3 Advanced Physical Chemistry  
CHEM 464-3 Quantum Chemistry

and an additional 18 upper division units in CHEM, MBB or NUSC courses, including at least nine units of 400 division CHEM courses.

### Electives

(24-25 units)

In addition to the above, students must complete

- courses chosen to fulfil the WQB requirements (see page 7)
- upper division courses from any faculty (excluding EDUC 401-407) to total 60 upper division units minimum
- electives at any division from any faculty to provide the minimum 132 units for the honors

Those specializing in physical or theoretical chemistry should complete more mathematics courses than specified above and a course in computer programming.

### Minor Program

See "Major – Minor Program" on page 6 for regulations. Chemistry minors require a minimum of 14 upper division units in chemistry, biochemistry or nuclear science (including at least eight units in chemistry and excluding undergraduate research courses) plus prerequisites.

### Environmental Chemistry Minor Program

Students complete all of

CHEM 121-4 General Chemistry I  
CHEM 122-2 General Chemistry II  
CHEM 126-2 General Chemistry Laboratory II  
CHEM 215-4 Introduction to Analytical Chemistry  
CHEM 230-3 Inorganic Chemistry  
CHEM 236-3 Inorganic Chemistry Laboratory  
CHEM 281-4 Organic Chemistry I  
CHEM 316-4 Introductory Instrumental Analysis  
CHEM 317-2 Analytical Environmental Chemistry  
CHEM 371-3 Chemistry of the Aqueous Environment\*  
CHEM 372-3 Chemistry of the Atmospheric Environment\*

and at least one of

CHEM 380-4 Chemical and Instrumental Methods of Identification of Organic Compounds  
CHEM 419-3 Special Topics in Analytical Chemistry  
NUSC 341-3 Introduction to Radiochemistry

\*CHEM 360 must be completed as a prerequisite

### Nuclear Science Minor Program

To qualify for this program offered jointly with the Department of Physics, students must complete 14 upper division units from the following.

CHEM 482-3 Directed Study in Advanced Topics of Chemistry  
NUSC 341-3 Introduction to Radiochemistry  
NUSC 342-3 Introduction to Nuclear Science  
NUSC 344-3 Nucleosynthesis and Distribution of the Elements  
NUSC 346-2 Radiochemistry Laboratory  
NUSC 444-3 Special Topics in Nuclear Science  
NUSC 485-3 Particle Physics  
PHYS 385-3 Quantum Physics

### Advice to Students from Other Faculties

Prerequisites and corequisites cited in the *Course Catalogue* are for those intending to specialize in science. Some may be waived for programs in the Faculties of Applied Sciences, Arts and Social Sciences, Business Administration, Education, and Health Sciences. CHEM 110 and 111 are for students with no previous training in chemistry.

### Biochemistry

For information about biochemistry, see "Department of Molecular Biology and Biochemistry" on page 200.

### Chemical Physics

See "Chemical Physics Major Program" on page 204.

### Co-operative Education

N. Erickson, co-op co-ordinator, Faculty of Science, 778.782.4654

Co-operative education combines work experience with academic studies. The student spends alternate terms on campus and in study-related jobs.

A major and honors leading to a BSc, and a co-op education program incorporating four work terms, are available in chemistry and related areas. The work practicum requirements are CHEM 306, 307, 406 and 407. Application is at least three months prior to term start in which CHEM 306 is completed. Seek department advice early. A minimum 2.67 CGPA is required to enrol and continue in the co-op major. Higher averages are required an honors in co-op. See "Co-operative Education" on page 212.

Geology Stream Advisor Mr. K. Cameron, 7530  
 Technology and Science Complex 2,  
 778.782.4703 Tel

**Minimum Grade Requirement**

Students wishing to register for earth sciences  
 courses must obtain a C- grade or better in  
 prerequisite courses.

**Writing, Quantitative, and Breadth Requirements**

Students completing degree programs must fulfil  
 writing, quantitative and breadth requirements as part  
 of their program. See "Writing, Quantitative, and  
 Breadth Requirements" on page 7 for information.

**Major Program**

The department offers three course streams leading  
 to course concentrations: geology stream,  
 environmental geoscience stream, and general earth  
 sciences stream.

The geology stream and environmental geoscience  
 stream are designed to permit students to enrol as a  
 geologist or environmental geoscientist respectively,  
 in the Association of Professional Engineers and  
 Geoscientists of British Columbia (APEGBC), the  
 governing body that regulates geoscience practice in  
 BC. All students intending to practice as a  
 geoscientist in BC must be licensed by APEGBC, and

are strongly advised to pursue one of these two  
 streams. Many other Canadian provinces also require  
 professional licensing.

Students not intending to practice as professional  
 geoscientists or seek accreditation may choose to  
 pursue the general earth sciences stream. This  
 stream may best accommodate students in some joint  
 major programs.

Students should seek the advice of a departmental  
 program advisor.

**Lower Division Requirements**

Students in all streams must complete a minimum of  
 54 units including all of

CHEM 121-4 General Chemistry and Laboratory I  
 CHEM 122-2 General Chemistry II  
 CHEM 126-2 General Chemistry Laboratory II  
 EASC 101-3 Physical Geology  
 EASC 201-3 Stratigraphy and Sedimentation  
 EASC 202-3 Introduction to Mineralogy  
 EASC 204-3 Structural Geology I  
 EASC 205-3 Introduction to Petrology  
 EASC 206-2 Field Geology I  
 EASC 207-3 Introduction to Applied Geophysics  
 EASC 208-3 Introduction to Geochemistry  
 EASC 210-3 Historical Geology  
 GEOG 213-3 Introduction to Geomorphology  
 MATH 152-3 Calculus II

and one of  
 MATH 150-4 Calculus I with Review  
 MATH 151-3 Calculus I

and one of  
 STAT 101-3 Introduction to Statistics  
 STAT 201-3 Statistics for the Life Sciences

and one of  
 PHYS 101-3 Physics for the Life Sciences I\*  
 PHYS 120-3 Mechanics and Modern Physics  
 PHYS 125-3 Mechanics and Special Relativity

and one of  
 PHYS 102-3 Physics for the Life Sciences II\*  
 PHYS 121-3 Optics, Electricity and Magnetism  
 PHYS 126-3 Electricity, Magnetism and Light

and one of  
 PHYS 130-2 Physics for the Life Sciences  
 Laboratory\*

PHYS 131-2 Physics Laboratory I

\*with a grade of B or better

**Upper Division Requirements**

Students are encouraged to select upper division  
 elective courses in consultation with an academic  
 advisor, as APEGBC has specific groupings of  
 elective courses for each stream, respectively.

**Geology Stream**

Students must complete a minimum of 42 units  
 including all of  
 EASC 301-3 Igneous and Metamorphic Petrology  
 EASC 302-3 Sedimentary Petrology  
 EASC 306-3 Field Geology II  
 EASC 309-3 Global Tectonics  
 EASC 310-3 Paleontology

and at least one of  
 EASC 303-3 Environmental Geoscience  
 EASC 304-3 Hydrogeology  
 EASC 313-3 Introduction to Soil and Rock  
 Engineering  
 EASC 403-3 Quaternary Geology

and at least one of  
 EASC 406-3 Field Geology III  
 EASC 416-3 Field Methods in Hydrogeology

and at least 18 units chosen from  
 EASC 300-3 Selected Topics in Earth Sciences  
 EASC 303-3 Environmental Geoscience  
 EASC 304-3 Hydrogeology

EASC 307-3 Applied Geophysics  
 EASC 312-3 Stratigraphy  
 EASC 313-4 Introduction to Soil and Rock  
 Engineering  
 EASC 314-3 Principles of Glaciology  
 EASC 317-3 Global Geophysics  
 EASC 400-3 Selected Topics in Earth Sciences  
 EASC 401-3 Mineral Deposits  
 EASC 402-3 Sedimentology  
 EASC 403-3 Quaternary Geology  
 EASC 404-3 Structural Geology II  
 EASC 406-3 Field Geology III  
 EASC 408-3 Regional Geology of Western Canada  
 EASC 410-3 Groundwater Contaminant and  
 Transport  
 EASC 411-3 Terrain Analysis  
 EASC 412-3 Groundwater Geochemistry  
 EASC 413-3 Resource Geotechnics  
 EASC 416-3 Field Techniques in Hydrogeology  
 EASC 417-3 Seismology  
 EASC 420-3 Petroleum Geology  
 EASC 421-3 Volcanology  
 EASC 491-1 Directed Reading\*  
 EASC 492-2 Directed Reading\*  
 EASC 493-3 Directed Reading\*

**Environmental Geoscience Stream**

Students complete a minimum of 25 units including all  
 of

EASC 303-3 Environmental Geoscience  
 EASC 304-3 Hydrogeology  
 EASC 306-3 Field Geology II  
 EASC 313-3 Introduction to Soil and Rock  
 Engineering  
 EASC 403-3 Quaternary Geology

and one of  
 GEOG 311-4 Hydrology  
 GEOG 317-4 Soil Science

and at least one of  
 EASC 301-3 Igneous and Metamorphic Petrology  
 EASC 302-3 Sedimentary Petrology  
 EASC 309-3 Global Tectonics  
 EASC 310-3 Paleontology

and at least one of  
 EASC 406-3 Field Geology III  
 EASC 416-3 Field Techniques in Hydrogeology

and a minimum of 19 additional units chosen from  
 EASC 300-3 Selected Topics in Earth Sciences  
 EASC 301-3 Igneous and Metamorphic Petrology  
 EASC 302-3 Sedimentary Petrology  
 EASC 307-3 Applied Geophysics  
 EASC 309-3 Global Tectonics  
 EASC 310-3 Paleontology  
 EASC 312-3 Stratigraphy  
 EASC 314-3 Principles of Glaciology  
 EASC 317-4 Global Geophysics  
 EASC 400-3 Selected Topics in Earth Sciences  
 EASC 401-3 Mineral Deposits  
 EASC 402-3 Sedimentology  
 EASC 404-3 Structural Geology II  
 EASC 406-3 Field Geology III  
 EASC 408-3 Regional Geology of Western Canada  
 EASC 410-3 Groundwater Contaminant and  
 Transport  
 EASC 411-3 Terrain Analysis  
 EASC 412-3 Groundwater Geochemistry  
 EASC 413-3 Resource Geotechnics  
 EASC 416-3 Field Techniques in Hydrogeology  
 EASC 417-3 Seismology  
 EASC 418-1 Terrain Stability: Assessment and  
 Mitigation  
 EASC 419-1 Forest Harvesting Technology  
 EASC 420-3 Petroleum Geology  
 EASC 421-3 Volcanology  
 EASC 491-1 Directed Readings\*  
 EASC 492-2 Directed Readings\*  
 EASC 493-3 Directed Readings\*  
 GEOG 311-4 Hydrology

GEOG 313-4 River Geomorphology  
 GEOG 317-4 Soil Science  
 GEOG 412-4 Glacial Processes and Environments

### General Earth Sciences Stream

Students complete a minimum of six units including EASC 306-3 Field Geology II

and at least one of

EASC 406-3 Field Geology III

EASC 416-3 Field Techniques in Hydrogeology

and at least 30 other upper division EASC units.

\*students may only complete a maximum of three units from a combination of EASC 491, 492, or 493

### Other Requirements

Students in the geology stream must also complete at least two additional units in the Faculty of Science or physical geography at the upper division. These courses may be used toward the minor requirements in another department. Some of these courses may also satisfy APEGBC requirements.

Students in the general earth sciences stream must also complete at least eight additional units in the Faculty of Science or physical geography at the upper division. These courses may be used toward the minor requirements in another department.

In addition, of the 120 units required for graduation, students complete six units of courses designated as Writing (W), six units of courses designated as Quantitative (Q); and 24 units of courses identified as Breadth (B), including 18 units of courses identified as Designated Breadth courses (six units of social sciences, six of humanities and six of science), and six units of courses identified as Undesignated Breadth (UB) completed outside the major program. Several WQB courses are satisfied within the major program.

### Honors Program

This BSc program offers a wider cross-section of discipline-related courses while providing an opportunity for independent research. Entry requires a 3.00 or higher (B standing) CGPA, and departmental permission. This program has the same requirements as the major except for the following additional requirements.

- maintenance of a minimum 3.00 CGPA
- completion of 60 units minimum of 300 and 400 division EASC or physical geography courses, or related courses approved by the department. Students are strongly advised to select courses in consultation with advisors with career goals in mind.
- completion of appropriate electives to achieve a final total of at least 132 units, including at least 12 units from outside the Faculty of Science
- completion of EASC 499

### Minor Program

Earth Sciences minor students are subject to the general regulations of the faculty in which they are enrolled and must complete a minimum of 15 upper division units in Earth Sciences (EASC 300 division and above), together with all prerequisites.

### Certificate in Earth Science

This program provides both part-time and full-time students with the opportunity to understand the fundamentals of earth sciences without necessarily specializing in earth sciences.

### Program Requirements

This certificate requires completion of at least 23 units of required course work and electives as follows. Students complete the following eight units.

one of

EASC 101-3 Physical Geology

GEOG 111-3 Earth Systems

and one of

EASC 106-3 Earth Through Time

EASC 210-3 Historical Geology

and

EASC 206-2 Field Geology I

and at least 15 units selected from the following.

EASC 103-3 The Rise and Fall of the Dinosaurs

EASC 104-3 Geohazards — Earth in Turmoil

EASC 107-3 Economic Geological Resources

GEOG 213-3 Introduction to Geomorphology

REM 100-3 Global Change

and any other 200, 300 or 400 division EASC course.

This certificate allows students to pursue their 15 elective units in specific course concentrations. Some suggested electives grouping are as follows.

#### Environmental Focus

EASC 104-3 Geohazards — Earth in Turmoil

EASC 107-3 Economic Geological Resources

EASC 208-3 Introduction to Geochemistry

EASC 303-3 Environmental Geoscience

EASC 304-3 Hydrogeology

REM 100-3 Global Change

#### General Earth Sciences Breadth Courses

EASC 103-3 The Rise and Fall of the Dinosaurs

EASC 104-3 Geohazards — Earth in Turmoil

EASC 107-3 Economic Geological Resources

REM 100-3 Global Change

#### Geology Focus

EASC 201-3 Stratigraphy and Sedimentation

EASC 202-3 Introduction to Mineralogy

EASC 204-3 Structural Geology I

EASC 208-3 Introduction to Geochemistry

#### Hazards Focus

EASC 104-3 Geohazards — Earth in Turmoil

EASC 303-3 Environmental Geoscience

EASC 207-3 Introduction to Geophysics

GEOG 213-3 Introduction to Geomorphology

#### Paleontology Focus

EASC 103-3 The Rise and Fall of the Dinosaurs

EASC 201-3 Stratigraphy and Sedimentation

EASC 210-3 Historical Geology

EASC 310-3 Paleontology

### Certificate in Forestry Geoscience

This program, which utilizes geoscience courses that with direct relevance to forestry industry careers, is directed to earth sciences or physical geography majors. Certificate units may not be applied to another University certificate or diploma.

### Program Requirements

The certificate requires the completion of 30-32 units of required course work and electives as follows.

#### Required Courses (24 units)

EASC 204-3 Structural Geology I

EASC 313-3 Introduction to Soil and Rock

Engineering

EASC 411-3 Terrain Analysis

EASC 413-3 Resource Geotechnics

EASC 418-1 Terrain Stability: Assessment and Mitigation

EASC 419-1 Forest Harvesting Technology

GEOG 213-3 Introduction to Geomorphology

GEOG 317-4 Soil Science

and either

GEOG 253-3 Aerial Photographic Interpretation

or both of

EASC 206-2 Field Geology

EASC 306-3 Field Geology II

### Elective Courses

Students complete one of

EASC 304-3 Hydrogeology

GEOG 311-4 Hydrology

and one of

EASC 403-3 Quaternary Geology

GEOG 313-4 River Geomorphology

GEOG 412-4 Glacial Processes and Environments

GEOG 417-4 Advanced Soil Science

### Co-operative Education

Co-operative education, combining relevant work experience with academic studies in alternate terms on campus and in study related employment, includes pre-employment orientation and four full-time paid work terms. Co-operative education is available to qualified earth sciences major and honors students.

To enrol, students should attend the co-op information meetings held in the first two weeks of the term prior to the term in which they wish to work. Students should seek advice from the science and environment co-operative education office as early as possible in their university careers to facilitate optimal scheduling. Contact the Co-operative Education Office, 8108 South Science Building, 778.782.4716.

### Professional Registration as a BC Geoscientist

The right to practice in, and to accept professional responsibility for geoscience in BC is limited to registered members of the Association of Professional Engineers and Geoscientists of British Columbia (APEGBC). Requirements can be met through the Department of Earth Sciences and selected courses from other university departments. Consult the advisor for further details.

#### Advisor

Ms. R. Hotell, Faculty Assistant

This degree program provides broad education in several fields with specialization in at least two. It requires two minors chosen from below, one of which must be in the Faculty of Science. Restrictions for the combination of minors is listed below.

Students must have their selection of minors for the BSc general science program approved by the program advisor as early in their program as possible.

Only one minor may be selected from each of the following six subject areas.

- biological sciences, environmental toxicology, kinesiology
- molecular biology and biochemistry, chemistry, environmental chemistry
- mathematics, statistics, computing science
- physics, nuclear science
- earth science, physical geography
- archaeology, psychology

Because of the proximity of subject matter, the following combinations of minors are *not acceptable*:

- biological sciences, molecular biology and biochemistry
- molecular biology and biochemistry, environmental toxicology
- chemistry, nuclear science
- kinesiology, molecular biology and biochemistry
- environmental chemistry, environmental toxicology

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

## Lower Division Requirements

Students complete all of  
 BISC 101-4 General Biology  
 BISC 102-4 General Biology  
 CHEM 121-4 General Chemistry and Laboratory I  
 CHEM 122-2 General Chemistry II  
 CHEM 126-2 General Chemistry Laboratory II  
 and all of  
 PHYS 101-3 Physics for the Life Sciences I  
 PHYS 102-3 Physics for the Life Sciences II  
 PHYS 130-2 Physics for the Life Sciences Laboratory  
 or all of  
 PHYS 120-3 Mechanics and Modern Physics  
 PHYS 121-3 Optics, Electricity and Magnetism  
 PHYS 131-2 General Physics Laboratory I  
 or all of  
 PHYS 140-4 Studio Physics – Mechanics and Modern Physics  
 PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism  
 and both of  
 MATH 154-3 Calculus I for the Biological Sciences  
 MATH 155-3 Calculus II for the Biological Sciences  
 or both of  
 MATH 151-3 Calculus I (or MATH 150)  
 MATH 152-3 Calculus II  
 and one of  
 EASC 101-3 Physical Geology  
 GEOG 111-3 Earth Systems  
 and one lower or upper division statistics course

## Other Requirements

The following general requirements must be satisfied.

- additional upper division courses (excluding EDUC 401-407) to total 44 units of upper division credit
- a 2.0 GPA in upper division courses required for each of two subject area minors, with a minimum C- grade in all courses used for the subject area minors

Consult departmental advisors about selection of upper division courses in subject minors. Students should include science-related courses such as PHIL 244, 341 and HIST 360, 361 in their programs.

# Management and Systems Science Program

Simon Fraser University Surrey, Central City,  
 250–13450 102nd Avenue, Surrey, BC V3T 0A3,  
 778.782.7486 Tel, 778.782.7488 Fax,  
<http://students.surrey.sfu.ca/mssc>

For a list of faculty, see "Department of Mathematics" on page 196 and "Department of Statistics and Actuarial Science" on page 206.

### Program Director

Dr. T.M. Loughin BSc (Rensselaer), MSc (N Carolina), PhD (Iowa State), 14–335 Central City, Simon Fraser University Surrey, 778.782.8037

### Advisor

Mrs. N. Williams BA (S Fraser), 14th floor Central City, Simon Fraser University Surrey, 778.782.7486

The Faculty of Science, with the Departments of Mathematics, Statistics and Actuarial Science, Economics, the Faculty of Business Administration,

and the School of Computing Science, offer a major and honors in management and systems science (MSSC) at the Surrey campus leading to a BSc degree. These are highly structured programs providing a multidisciplinary approach to quantitative methods for business and industry in an environment of rapid changes in technology.

The program is managed by the Faculty of Science at the Surrey campus. A steering committee consisting of representatives from the above mentioned departments and faculty serve as liaison between participating departments and the program director. Where possible, the director and steering committee members will be based on the Surrey campus.

Students formally apply to be admitted into the program. Applications can be considered both for students entering Simon Fraser University, and for students already enrolled. Admission into the program is decided on a competitive basis. Students must maintain a 2.7 cumulative grade point average (CGPA) in MSSC program course work to remain in the program and to graduate. It is strongly recommended that students contact the Surrey science advisor or program director early about admission and scheduling.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

## Major Program

Under program and University regulations, a general degree requires 44 upper division units in courses numbered 300 and above, completion of 120 units, and the major program. Completion of all lower and upper division courses shown below is required. However, students should be aware of particular department requirements for course entry. Contact those departments for information.

## Lower Division Requirements

### Business Administration

Students complete all of  
 BUS 207-3 Managerial Economics  
 BUS 251-3 Financial Accounting I Computing Science  
 BUS 272-3 Behavior in Organizations

**Note:** the BUS 207 requirement may be waived if the student has credit for ECON 301

### Computing Science

Students complete one of  
 CMPT 125-3 Introduction to Computing Science and Programming II  
 CMPT 126-3 Introduction to Computing Science and Programming

and both of  
 CMPT 225-3 Data Structures and Programming  
 CMPT 275-4 Software Engineering

### Economics

Students complete both of  
 ECON 103-4 Principles of Economics (I)  
 Microeconomics  
 ECON 105-4 Principles of Economics (II)  
 Macroeconomics

### Mathematics and Computing Science

Students complete both of  
 MACM 101-3 Discrete Mathematics I  
 MACM 201-3 Discrete Mathematics II

### Mathematics

Students complete one of  
 MATH 150-4 Calculus I with Review  
 MATH 151-3 Calculus I

MATH 154-3 Calculus I for the Biological Sciences  
 MATH 157-3 Calculus for the Social Sciences I

and both of

MATH 152-3 Calculus II  
 MATH 251-3 Calculus III

and one of

MATH 232-3 Applied Linear Algebra  
 MATH 240-3 Algebra I: Linear Algebra

### Statistics

Students complete both of  
 STAT 270-3 Introduction to Probability and Statistics  
 STAT 285-3 Intermediate Probability and Statistics

### Recommended

The following course is recommended.

CMPT 212-3 Object-oriented Applications Design in C++

## Upper Division Requirements

For a BSc degree, all of the upper division courses listed below are required.

### Business Administration

Students complete all of  
 BUS 343-3 Introduction to Marketing  
 BUS 360-4 Business Communication  
 BUS 361-3 Project Management  
 BUS 473-4 Operations Management

### Computing Science

Students complete one of  
 BUS 440-4 Simulation in Management Decision Making  
 CMPT 305-3 Computer Simulation and Modelling  
 and all of  
 CMPT 307-3 Data Structures and Algorithms  
 CMPT 354-3 Database Systems I  
 CMPT 370-3 Information System Design

### Management and Systems Science

Students complete both of  
 MSSC 480-1 Undergraduate Seminar in Management and Systems Science  
 MSSC 481-1 Undergraduate Seminar in Management and Systems Science

### Mathematics

Students complete both of  
 MATH 308-3 Linear Optimization  
 MATH 348-3 Probabilistic Models in Operations Research

and one of

MACM 316-3 Numerical Analysis I  
 MATH 310-3 Introduction to Ordinary Differential Equations  
 MATH 343-3 Applied Discrete Mathematics  
 MATH 345-3 Introduction to Graph Theory

### Statistics

Students complete both of  
 STAT 350-3 Linear Models in Applied Statistics  
 STAT 380-3 Introduction to Stochastic Processes

Students should note the prerequisites for these courses. However, BUS 237 and 336 are waived for MSSC majors and honors. MSSC 480 and 481 cannot be completed concurrently.

## Recommended Courses

For major or honors, the following upper division courses are recommended.

BUS 312-4 Business Finance  
 BUS 445-3 Analysis of Data for Management  
 BUS 488-3 Group Dynamics and Teamwork  
 BUEC 396-3 The Structure of Industry  
 CMPT 405-3 Design and Analysis of Computing Algorithms  
 CMPT 417-3 Intelligent Systems  
 ECON 431-5 Intermediate Mathematical Economics  
 MATH 309-3 Continuous Optimization  
 MATH 408-3 Discrete Optimization

MATH 448-3 Network Flows  
 STAT 300-3 Statistics Communication  
 STAT 400-3 Data Analysis  
 STAT 410-3 Statistical Analysis of Sample Surveys  
 STAT 430-3 Statistical Design and Analysis of Experiments  
 STAT 460-3 Bayesian Statistics

## Double Majors and Minors

Students wishing to complete a second major or minor in addition to a management and systems science (MSSC) major must satisfy all MSSC requirements. At least 34 upper division units must be allocated exclusively to the MSSC major. This includes MSSC 480/481 and at least nine units from each of the lists under the sub-headings *Business Administration*, *Computing Science*, *Mathematics* and *Statistics*. Units used to satisfy MSSC upper division requirements beyond these 34 can be applied simultaneously to other major, minor or honors.

## Honors Program

Under University regulations, an honors degree requires completion of a minimum of 60 upper division units in courses numbered 300 and above, including at least 50 upper division units in the honors program, and completion of at least 132 units. Honors students require a graduation grade point average of not less than 3.00.

Students complete all of the requirements, as specified above, for the major program.

In addition, the following upper division courses are required including

STAT 330-3 Introduction to Mathematical Statistics

and one of

CMPT 405-3 Design and Analysis of Computing Algorithms

CMPT 417-3 Intelligent Systems

and one of

MATH 309-3 Continuous Optimization

MATH 408-3 Discrete Optimization

MATH 445-3 Graph Theory

MATH 448-3 Network Flows

Students must also complete at least three business administration or economics units at the 400 division.

**Note:** Students who wish to combine the MSSC honors program with another major or minor should consult with the MSSC director.

P. Menz BSc (Tor), MSc, BEd (Br Col)

J. Mulholland BSc (S Fraser), MSc, PhD (Br Col)

### Advisor

Ms. D. Yamaura, K10508 Shrum Science Centre,  
 778.782.4980

Students wishing to major in any Department of Mathematics programs should seek advice early from the departmental advisor.

Students are also invited to apply to enter the co-operative education program in mathematics, which integrates work experience with academic study. For further details, see "Co-operative Education" on page 212 and also consult the mathematical sciences co-op co-ordinator, Ms. F. Solano, in EAA 1205, telephone 778.782.7632, fsolano@sfu.ca.

The major and minor programs listed below lead to a bachelor of science degree in the Faculty of Science. Students interested in a bachelor of arts degree in mathematics or should see "Mathematics Program" on page 127 in the *Faculty of Arts and Social Sciences* section.

Students interested in mathematics may also wish to consider related programs detailed under the section headings applied mathematics, mathematics and computing, mathematical physics, management and systems science, statistics and actuarial science.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for more information.

## Minimum Grade Requirements

Students wishing to enrol for Department of Mathematics courses must have obtained grades of C- or better in prerequisite courses. Some courses may require higher prerequisite grades. Check the course's Calendar description for details (see "Mathematics MATH" on page 417). Students will not normally be permitted to enrol in any course for which a D grade or lower was obtained in any prerequisite. No student may complete, for further credit, any course offered by the Department of Mathematics which is a prerequisite for a course the student has already completed with a grade of C- or higher, without permission of the department.

Major or honors students must satisfy Faculty of Science requirements, general University CGPA, and unit requirements.

## Computing Recommendation

Some experience with a high level programming language is recommended by the beginning of the second year.

## Open Workshops

Some introductory and service courses are organized through the department's open workshops. In addition to regularly scheduled lectures, students enrolled in these courses are encouraged to come to the workshops for assistance any time during posted working hours. At the workshop students have the opportunity to meet with the co-ordinator, teaching assistants and other students, and work together to understand mathematics in a friendly and helpful environment.

## Burnaby Campus

Quantitative Courses Support Workshop (4100 Academic Quadrangle) – FAN X99, MATH 190

Algebra Workshop (4135 Academic Quadrangle) – MATH 100, 232, 240, MACM 201

Calculus Workshop (4110 Academic Quadrangle) – MATH 150, 151, 152, 251

Applied Calculus Workshop (K9503 Shrum Science Centre) – MATH 154, 155, 157, 158

**Simon Fraser University Surrey**

Introductory Mathematics Workshop – FAN X99,  
MATH 100, 130, 190, MACM 201

Pure Calculus Workshop – MATH 150, 151, 152, 251

Applied Calculus and Algebra Workshop – MATH  
154, 155, 157, 232, 240

**Beginning Level Requirements**

**Students who do not have the appropriate prerequisites as listed below must successfully complete the Quantitative Placement Test in order to enrol in a mathematics course.**

Students who are unsure of their level of preparation, or who completed their last mathematics course more than five years ago, are also strongly encouraged to complete the Quantitative Placement Test. Students should make certain that they discuss the test results with the mathematics advisor. Please check the Department of Mathematics website for further information at <http://math.sfu.ca/ugrad/qtest>

The first mathematics courses prerequisites follow.

**MATH 100,**

BC principles of mathematics 11 (or equivalent) with a grade of at least B- or Simon Fraser University FAN X99 with a grade of at least B-, or achieving a satisfactory grade on the Simon Fraser University Quantitative Placement Test.

**MATH 113, 190**

BC principles of mathematics 11 (or equivalent) with a grade of at least B- or Simon Fraser University FAN X99 with a grade of at least C, or achieving a satisfactory grade on the Simon Fraser University Quantitative Placement Test.

**MATH 151**

BC principles of mathematics 12 (or equivalent) with a grade of at least A; or MATH 100 with a grade of at least B-, or achieving a satisfactory grade on the Simon Fraser University Calculus Readiness Test.

**MATH 150, 154, 157**

BC principles of mathematics 12 (or equivalent) with a grade of at least B; or MATH 100 with a grade of at least C, or achieving a satisfactory grade on the Simon Fraser University Calculus Readiness Test.

**Applied Mathematics Major Program**

Applied mathematics traditionally consists of areas of mathematics which are closely related to the physical sciences and engineering, but nowadays sophisticated mathematical tools are used across many disciplines, and applied mathematics has become increasingly computationally oriented.

The Department of Mathematics offers applied mathematics major and honors programs; applied mathematics courses are also excellent choices for students concentrating in other sciences or engineering. Students interested in applied mathematics may also wish to consider the joint honors program in mathematics and computer science, and the mathematical physics honors program, both of which include a substantial number of applied mathematics courses.

Required courses are as follows.

**Lower Division Requirements**

Students complete either  
CMPT 126-3 Introduction to Computer Science and Programming

or both of

CMPT 120-3 Introduction to Computing Science and Programming I

CMPT 125-3 Introduction to Computing Science and Programming II

and all of

MACM 202-4 Mathematical Modeling and Computation

MATH 152-3 Calculus II

MATH 240-3 Algebra I: Linear Algebra

MATH 242-3 Introduction to Analysis I

MATH 251-3 Calculus III

MATH 252-3 Vector Calculus

PHYS 211-3 Intermediate Mechanics

STAT 270-3 Introduction to Probability and Statistics

and one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

and one of

PHYS 120-3 Modern Physics and Mechanics

PHYS 125-3 Mechanics and Special Relativity

and one of

PHYS 121-3 Optics, Electricity and Magnetism

PHYS 126-3 Electricity, Magnetism and Light

**Note:** With a C grade or better in the relevant course, these substitutions are permitted: MATH 154 or 157 for MATH 151; MATH 155 or 158 for MATH 152. Also, with a B grade or better, MATH 232 for MATH 240. However, where possible, students are strongly encouraged to complete MATH 151, 152 and 240.

**Upper Division Requirements**

Students complete all of

MACM 316-3 Numerical Analysis I

MATH 310-3 Introduction to Ordinary Differential Equations

MATH 314-3 Boundary Value Problems

MATH 320-3 Introduction to Analysis II

MATH 322-3 Complex Variables

MATH 418-3 Partial Differential Equations

plus at least one of

MATH 461-3 Continuous Mathematical Models

MATH 462-3 Fluid Dynamics

plus at least two of

MACM 401-3 Introduction to Computer Algebra

MACM 409-3 Numerical Linear Algebra and Optimization

MACM 416-3 Numerical Analysis II

MATH 308-3 Introduction to Optimization

MATH 309-3 Continuous Optimization

MATH 338-3 Advanced Linear Algebra

MATH 343-3 Applied Discrete Mathematics

MATH 345-3 Introduction to Graph Theory

MATH 419-3 Linear Analysis

MATH 424-3 Complex Analysis

MATH 425-3 Real Analysis

MATH 461-3 Continuous Mathematical Models

MATH 462-3 Fluid Dynamics

MATH 467-3 Dynamical Systems

MATH 470-3 Variational Calculus

MATH 495-3 Topics in Applied Mathematics

PHYS 413-3 Advanced Mechanics

STAT 380-3 Introduction to Stochastic Processes

Plus one additional upper division MATH or MACM course or any pre-approved quantitative upper division course offered by the Faculties of Applied Sciences, Arts and Social Sciences, Business Administration or Science. This course, if other than MATH or MACM, must be pre-approved by a department advisor. Students are encouraged to explore the option of completing courses outside the department and to discuss possibilities with a department advisor.

Choices from the third group ("at least two of") must not include the course used to satisfy the second group ("at least one of"). At least three of the courses used to satisfy the upper division requirements must be at the 400 division.

**Other Requirements**

Of the total 120 units required for the major, at least 12 must be completed outside the Faculty of Science including at least six in the Faculty of Arts and Social Sciences. At least 44 of the units must be at the upper division. In the courses used to satisfy the upper division requirements, a grade point average (GPA) of at least 2.00 is required. In addition, University regulations require a cumulative GPA of at least 2.00 and an upper division GPA of at least 2.00. These averages are computed on all courses completed at the University. See "Grade Point Averages Needed for Graduation" on page 31.

**Applied Mathematics Honors Program****Lower Division Requirements**

Students complete either

CMPT 126-3 Introduction to Computer Science and Programming

or both of

CMPT 120-3 Introduction to Computing Science and Programming I

CMPT 125-3 Introduction to Computing Science and Programming II

and all of

CMPT 225-3 Data Structures and Programming

MACM 202-4 Mathematical Modeling and Computation

MATH 152-3 Calculus II

MATH 240-3 Algebra I: Linear Algebra

MATH 242-3 Introduction to Analysis I

MATH 251-3 Calculus III

MATH 252-3 Vector Calculus

PHYS 125-3 Mechanics and Special Relativity

PHYS 126-3 Electricity, Magnetism and Light

PHYS 211-3 Intermediate Mechanics

STAT 270-3 Introduction to Probability and Statistics

and one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

**Note:** With a C grade or better in the relevant course, these substitutions are permitted: MATH 154 or 157 for MATH 151; MATH 155 or 158 for MATH 152. Also, with a B grade or better, MATH 232 for 240. However, where possible, students are strongly encouraged to complete MATH 151, 152 and 240.

**Upper Division Requirements**

Students complete all of

MACM 316-3 Numerical Analysis I

MATH 310-3 Introduction to Ordinary Differential Equations

MATH 314-3 Boundary Value Problems

MATH 320-3 Introduction to Analysis II

MATH 322-3 Complex Variables

MATH 418-3 Partial Differential Equations

at least one of

MATH 461-3 Continuous Mathematical Models

MATH 462-3 Fluid Dynamics

plus at least one of

MACM 416-3 Numerical Analysis II

MATH 467-3 Dynamical Systems

plus at least six additional courses chosen from

MACM 401-3 Introduction to Computer Algebra

MACM 409-3 Numerical Linear Algebra and

Optimization

MACM 416-3 Numerical Analysis II

MATH 308-3 Introduction to Optimization

MATH 309-3 Continuous Optimization

MATH 338-3 Advanced Linear Algebra

MATH 343-3 Applied Discrete Mathematics

MATH 345-3 Introduction to Graph Theory

MATH 419-3 Linear Analysis

MATH 424-3 Complex Analysis  
 MATH 425-3 Real Analysis  
 MATH 461-3 Continuous Mathematical Models  
 MATH 462-3 Fluid Dynamics  
 MATH 467-3 Dynamical Systems  
 MATH 470-3 Variational Calculus  
 MATH 495-3 Topics in Applied Mathematics  
 PHYS 395-3 Computational Physics  
 PHYS 413-3 Advanced Mechanics  
 PHYS 484-3 Nonlinear Physics  
 STAT 380-3 Introduction to Stochastic Processes

Two additional upper division courses in MATH or MACM or any pre-approved quantitative upper division courses offered by the Faculties of Applied Sciences, Arts and Social Sciences, Business Administration or Science. For this purpose a course, if not MATH or MACM, must be pre-approved by an advisor. Students should explore the option of completing courses outside the department and should discuss possibilities with an advisor.

Choices from the fourth group ("at least six of") must not include the courses used to satisfy the second and third groups ("at least one of"). At least five of the courses used to satisfy the upper division requirements must be at the 400 division.

### Other Requirements

Of the total 132 units required for honors, at least 12 must be completed outside the Faculty of Science including at least six in the Faculty of Arts and Social Sciences. At least 60 of the units must be at the upper division. A cumulative grade point average (CGPA) of at least 3.00 and an upper division grade point average of at least 3.00 are required. These averages are computed on all courses completed at the University. If both averages are at least 3.50, the designation 'first class' applies.

## Industrial Mathematics

### Advisors

Dr. M. Monagan, K10501 Shrum Science Centre,

Dr. R. Pyke, Room 14–260 Central City Tower, Simon  
 Fraser University Surrey, 778.782.7530,  
 rpyke@sfu.ca

Dr. J.F. Williams, K10524 Shrum Science Centre,  
 778.782.4544, jfw@math.sfu.ca

This program prepares students for careers in industry. Students choose a program area from either operations research and applied statistics (offered at Simon Fraser University Surrey), scientific computing or discrete mathematics (both offered at the main Burnaby campus).

In addition to the program requirements set out below, general university and Faculty of Science regulations must be met.

### Major Program

The requirements are divided into three parts: a common core for all students, an area requirement and a minor or interdisciplinary requirement. The minor requirement is additional to those specified, and is stipulated by relevant departments or schools.

### Lower Division Core Requirements

Students complete either  
 CMPT 126-3 Introduction to Computer Science and  
 Programming

or both of

CMPT120-3 Introduction to Computer Science and  
 Programming I

CMPT 125-3 Introduction to Computer Science and  
 Programming II

plus all of

CMPT 225-3 Data Structures and Programming

MACM 101-3 Discrete Mathematics I  
 MATH 152-3 Calculus II\*  
 MATH 240-3 Algebra I: Linear Algebra\*  
 MATH 251-3 Calculus III  
 STAT 270-3 Introduction to Probability and Statistics

 MATH 150-4 Calculus I with Review\*  
 MATH 151-3 Calculus I\*

\*with a grade of C or better, these substitutions are permitted: MATH 154 or 157 for 151 (or 150); MATH 155 or 158 for MATH 152. With a grade of B or better, MATH 232 for MATH 240.

### Area Requirements

Students complete the requirements for one of option A, B or C.

*Option A: Operations Research and Applied Statistics*  
 (offered at Simon Fraser University Surrey)

For this option, students must complete all of  
 MACM 201-3 Discrete Mathematics II  
 MATH 208-3 Introduction to Operations Research  
 MATH 308-3 Introduction to Optimization  
 MATH 309-3 Continuous Optimization  
 MATH 348-3 Probabilistic Models in Operations  
 Research  
 MATH 402-4 Industrial Mathematics  
 MATH 408-3 Discrete Optimization  
 MATH 448-3 Network Flows  
 STAT 350-3 Linear Models in Applied Statistics  
 STAT 380-3 Introduction to Stochastic Processes  
 TECH 101-3 Communication, Teamwork and  
 Collaborative Process

plus at least two additional courses from Table I  
 below, and at least one from Table II below.

### Table I

ACMA 445-3 Loss Models: Estimation and Selection\*  
 BUEC 433-5 Forecasting in Business and Economics  
 STAT 390-3 Selected Topics in Probability and  
 Statistics  
 STAT 400-3 Data Analysis  
 STAT 402-3 Generalized Linear and Nonlinear  
 Modelling  
 STAT 410-3 Statistical Analysis of Sample Surveys  
 STAT 430-3 Statistical Design and Analysis of  
 Experiments  
 STAT 460-3 Bayesian Statistics  
 STAT 490-3 Selected Topics in Probability and  
 Statistics

\*students must meet the entry requirements for the  
 actuarial science program to enrol in this course

### Table II

CMPT 305-3 Computer Simulation and Modelling  
 CMPT 307-3 Data Structures and Algorithms  
 MACM 316-3 Numerical Analysis I  
 MATH 343-3 Applied Discrete Mathematics  
 MATH 345-3 Introduction to Graph Theory  
 MATH 445-3 Graph Theory

### Interdisciplinary Requirement for Option A

Students complete at least 15 units from application  
 areas with advisor approval. Application courses are  
 chosen from: ACMA, BUEC, BUS, ECON, MACM,  
 MATH, REM and STAT. Courses used for the Option  
 A major cannot be used for this requirement. If the  
 industrial mathematics major is completed as part of a  
 second bachelor's degree, then the interdisciplinary  
 requirement may be waived if the previous degree  
 contains an approved major. Approvals are given  
 individually. Those majors that are approved will not  
 be limited to the disciplines listed above.

*Option B: Scientific Computing*  
 (offered at the main Burnaby campus)

For this option students must complete all of  
 MACM 202-4 Mathematical Modeling and  
 Computation  
 MACM 316-3 Numerical Analysis I

MACM 409-3 Numerical Linear Algebra and  
 Optimization  
 MATH 252-3 Vector Calculus  
 MATH 308-3 Introduction to Optimization  
 MATH 310-3 Introduction to Differential Equations  
 MATH 314-3 Boundary Value Problems  
 MATH 402-4 Industrial Mathematics Project  
 MATH 418-3 Partial Differential Equations

plus two of

MACM 416-3 Numerical Analysis II  
 MATH 309-3 Continuous Optimization  
 MATH 320-3 Introduction to Analysis II  
 MATH 322-3 Complex Variables  
 MATH 462-3 Fluid Dynamics  
 MATH 467-3 Dynamical Systems  
 MATH 470-3 Variation Calculus

plus two additional courses from Table II below.

*Option C: Discrete Mathematics*  
 (offered at the main Burnaby campus)

For this option, students must complete all of  
 MACM 201-3 Discrete Mathematics II  
 MACM 202-4 Mathematical Modeling and  
 Computation  
 MACM 316-3 Numerical Analysis I  
 MATH 308-3 Introduction to Optimization  
 MATH 310-3 Introduction to Differential Equations  
 MATH 340-3 Algebra II: Rings and Fields  
 MATH 343-3 Applied Discrete Mathematics  
 MATH 345-3 Introduction to Graph Theory

plus two of

MACM 401-3 Introduction to Computational Algebra  
 MACM 442-3 Cryptography  
 MATH 408-3 Discrete Optimization  
 MATH 447-4 Coding Theory

plus two additional courses from Table III below.

### Table III

CMPT 305-3 Computer Simulation and Modelling  
 CMPT 307-3 Data Structures and Algorithms  
 CMPT 361-3 Introduction to Computer Graphics  
 CMPT 405-3 Design and Analysis of Computing  
 Algorithms  
 CMPT 461-3 Advanced Computer Graphics  
 MACM 316-3 Numerical Analysis I  
 MACM 401-3 Introduction to Computational Algebra  
 MACM 409-3 Numerical Linear Algebra  
 MACM 416-3 Numerical Analysis II  
 MACM 442-3 Cryptography  
 MATH 309-3 Continuous Optimization  
 MATH 310-3 Introduction to Ordinary Differential  
 Equations  
 MATH 314-3 Boundary Value Problems  
 MATH 320-3 Introduction to Analysis II  
 MATH 322-3 complex Variables  
 MATH 338-3 Advanced Linear Algebra  
 MATH 340-3 Algebra II: Rings and Fields  
 MATH 342-3 Elementary Number Theory  
 MATH 343-3 Applied Discrete Mathematics  
 MATH 345-3 Introduction to Graph Theory  
 MATH 348-3 Probability Models in Operations  
 Research  
 MATH 408-3 Discrete Optimization  
 MATH 418-3 Partial Differential Equations  
 MATH 438-3 Linear Algebra  
 MATH 443-3 Combinatorial Theory  
 MATH 445-3 Graph Theory  
 MATH 447-4 Coding Theory  
 MATH 448-3 Network Flows  
 MATH 461-3 Continuous Mathematical Models  
 MATH 462-3 Fluid Dynamics  
 MATH 467-3 Dynamical Systems  
 MATH 470-3 Variational Calculus  
 PHYS 395-3 Computational Physics

### Minor Requirement for Options B and C

Students complete the requirements for a minor in  
 economics, engineering or computing science, or any  
 Faculty of Science minor (e.g. biological sciences,

chemistry, earth science, physics, statistics). Students must be accepted into the minor program of the relevant department or school. Upper division courses used to satisfy the major requirements cannot also be used to satisfy the minor. If the industrial mathematics major is completed as part of a second bachelor's degree, then the minor requirement may be waived if the previous degree contains an approved major. Approvals will be given individually and those approved majors will not be limited to the disciplines listed in the minor.

#### Other Requirements for all Options

Students complete the Faculty of Science major program requirements as outlined on page 181. Computing courses completed in the industrial mathematics major will count towards the 12 unit requirement from outside of the Faculty of Science.

#### Honors Program

Students must satisfy the requirements for the major program, and complete additional course work (see below) for a total of 132 units.

Students complete

MATH 242-3 Introduction to Analysis I

and one of

MATH 320-3 Introduction to Analysis II

MATH 340-3 Algebra II: Rings and Fields

and additional Table III courses to total 48 upper division units, of which at least four courses must be at the 400 division. One upper division MATH course that is not shown in Table I may be substituted.

Students must also fulfil the Faculty of Science honors requirements (see page 181). Note that the only requirement which is not already met by the industrial mathematics honors (including the minor requirement) as shown above is the minimum grade point average requirement of 3.00 in the subject area.

#### Co-operative Education

Industrial mathematics students are encouraged to enter co-operative education which integrates work experience with academic study. Augmenting academic studies with co-op work/study is an advantage that employers consistently affirm. To obtain a co-op degree designation, students are required to complete four co-op work terms while completing the academic requirements for the degree. See "Co-operative Education" on page 212.

### Mathematics Major and Honors Programs

#### Lower Division Requirements

Students complete either

CMPT 126-3 Introduction to Computer Science and Programming

or both of

CMPT 120-3 Introduction to Computing Science and Programming I

CMPT 125-3 Introduction to Computing Science and Programming II

and all of

MACM 101-3 Discrete Mathematics I

MACM 201-3 Discrete Mathematics II

MACM 202-4 Mathematical Modeling and Computation

MATH 152-3 Calculus II

MATH 240-3 Algebra I: Linear Algebra

MATH 242-3 Introduction to Analysis I

MATH 251-3 Calculus III

STAT 270-3 Introduction to Probability and Statistics

and one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

**Note:** With a C grade or better in the relevant course, these substitutions are permitted: MATH 154 or 157 for MATH 151, MATH 155 or 158 for MATH 152. Also, with a B grade or better, MATH 232 for 240. However, where possible, students are strongly encouraged to complete MATH 151, 152 and 240.

#### Upper Division Requirements

All students must complete

MATH 340-3 Algebra II: Rings and Fields

and at least one from each of the following four groups of courses.

MATH 308-3 Introduction to Optimization

MATH 343-3 Applied Discrete Mathematics

MATH 345-3 Introduction to Graph Theory

and one of

MATH 320-3 Introduction to Analysis II

MATH 322-3 Complex Variables

and one of

MATH 338-3 Advanced Linear Algebra

MATH 341-3 Algebra III: Groups

MATH 342-3 Elementary Number Theory

and one of

MATH 310-3 Introduction to Ordinary Differential Equations

MACM 316-3 Numerical Analysis I

BSc mathematics majors must obtain at least 30 units in upper division mathematics (MATH), or mathematics/computing science (MACM), or PHYS 413, or from the following list of statistics (STAT) courses: STAT 330, 350, 380, 402, 430, 450 and 460.

Of the required 30 unit minimum total for the MATH major, at least 24 must be MATH or MACM courses. At least three used for this requirement must be at the 400 division, of which at least two must be 400 division MATH or MACM. A directed studies, job practicum, or honors essay course cannot be used to fulfil the 400 division requirement.

#### Honors Program Specific Requirements

In addition to the major program requirements, honors complete CMPT 225, MATH 252 and 341, and obtain at least 15 additional units in upper division mathematics (MATH), or mathematics/computing science (MACM) courses, PHYS 413, or from the list of approved STAT courses listed under *Upper Division Requirements for the Mathematics Major Program*. Of this minimum 48 upper division units, at least 36 must come from MATH or MACM courses.

At least five courses used to satisfy the 48 unit requirement must be 400 division, of which at least three must be 400 division MATH or MACM courses. Directed studies, job practicum or honors essay courses may not be used to fulfil this requirement.

**Note:** Major or honors math students are advised to complete an upper division statistics course and an upper division MACM or CMPT course.

#### Major and Honors Program Electives

Students obtain at least six units in courses offered by the Faculty of Science outside the Departments of Mathematics, and Statistics and Actuarial Science. Students must obtain at least six units in Faculty of Arts and Social Sciences courses. (The two required CMPT courses and the Faculty of Arts and Social Sciences six unit requirement fulfil the Faculty of Science requirement that students complete 12 units from outside the Faculty of Science.)

Major program students must complete at least 44 upper division units, including the requirements for the major. Honors program students must complete at least 60 upper division units, including the requirements for honors.

### Mathematics Minor Program

Students completing a minor in mathematics are subject to the general regulations of the faculty in which they are enrolled. Students normally are required by the Department of Mathematics to

- obtain at least 12 mathematics units (MATH 100, 190, 197 or 198 may not be included) or mathematics/computing science (MACM) courses numbered 101-299 inclusive. These courses normally will include MATH 150 or 151 (or 154 or 157), 152 (or 155 or 158), and 232 or 240.
- obtain at least 15 units of upper division mathematics (MATH), or mathematics/computing science (MACM).

### Mathematics and Computing Science (MACM) Joint Major and Joint Honors Program

MACM joint major and joint honors programs are offered co-operatively by the Department of Mathematics and the School of Computing Science. In general, students are expected to meet the requirements of both the department and the school with respect to admission, continuation and graduation requirements.

#### Lower Division Requirements

##### Joint Major Program

Students complete either

CMPT 126-3 Introduction to Computer Science and Programming

or both of

CMPT 120-3 Introduction to Computing Science and Programming I

CMPT 125-3 Introduction to Computing Science and Programming II

and all of

CMPT 150-3 Introduction to Computer Design

CMPT 225-3 Data Structures and Programming

MACM 101-3 Discrete Mathematics I

MACM 201-3 Discrete Mathematics II

MATH 152-3 Calculus II

MATH 240-3 Algebra I: Linear Algebra

MATH 242-3 Introduction to Analysis

MATH 251-3 Calculus III

STAT 270-3 Introduction to Probability and Statistics

plus one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

plus one of

CMPT 275-4 Software Engineering

MACM 202-4 Mathematical Modeling and Computation

**Note:** With a C grade or better in relevant course, these substitutions are permitted: MATH 154 or 157 for MATH 151; MATH 155 or 158 for MATH 152. Also, with a B grade or better, MATH 232 for MATH 240. However, where possible, students are strongly encouraged to complete MATH 151, 152 and 240.

In addition, students must complete writing and breadth requirements in accordance with the regulations of both the department and the school.

#### Lower Division Requirements

##### Joint Honors Program

Students pursuing the MACM joint honors program must complete both of the following courses as well as the remaining requirements of the MACM major.

CMPT 275-4 Software Engineering

MACM 202-4 Mathematical Modeling and Computation

**Upper Division Requirements****Joint Major Program**

Students complete the following core requirements.

All of  
 CMPT 307-3 Data Structures and Algorithms  
 MACM 316-3 Numerical Analysis I  
 MATH 340-3 Algebra II: Rings and Fields  
 plus one of  
 CMPT 300-3 Operating Systems I  
 CMPT 371-3 Data Communications and Networking  
 CMPT 379-3 Principles of Compiler Design

plus one of  
 MATH 308-3 Introduction to Optimization  
 MATH 310-3 Introduction to Ordinary Differential Equations

MATH 345-3 Introduction to Graph Theory

Additional work is required to total 21 upper division MATH and 24 upper division CMPT units including core requirements. MACM are counted in an alternating fashion toward the MATH and CMPT requirements, starting with the first MACM course completed, counting toward either MATH or CMPT. Twelve units must be 400 division or higher, including at least three units each of CMPT and MATH.

**Upper Division Requirements****Joint Honors Program**

Students complete these core requirements.

All of  
 CMPT 307-3 Data Structures and Algorithms  
 CMPT 405-3 Design and Analysis of Computing Algorithms  
 MACM 316-3 Numerical Analysis I  
 MATH 310-3 Introduction to Ordinary Differential Equations  
 MATH 340-3 Algebra II: Rings and Fields  
 MATH 345-3 Introduction to Graph Theory

plus one of  
 CMPT 308-3 Computability and Complexity  
 MACM 300-3 Introduction to Formal Languages and Automata with Applications

plus one of  
 CMPT 300-3 Operating Systems I  
 CMPT 371-3 Data Communications and Networking

plus one of  
 CMPT 361-3 Introduction to Computer Graphics  
 CMPT 379-3 Principles of Compiler Design

plus one of  
 MATH 308-3 Introduction to Optimization  
 MATH 309-3 Continuous Optimization

Additional course work is required to total 27 upper division MATH units and 30 upper division CMPT units including core requirements. MACM courses are counted in an alternating fashion towards the MATH and CMPT requirements, starting with the first MACM course completed counting towards either MATH or CMPT. A total of 18 units must be completed at the 400 division or higher, including at least six units each of CMPT and MATH credit.

**General Requirements**

The program is subject to Faculty of Science and University regulations. Course and prerequisite admission is subject to departmental requirements. MACM major graduation is contingent upon a cumulative grade point average (CGPA) and upper division grade point average (UDGPA) of 2.00 or better. Students must also achieve a 2.00 or better CGPA and UDGPA in each of the CMPT, MACM and MATH designations. Admission, continuation and graduation in the MACM honors is contingent upon 3.00 or better on all relevant GPAs. Faculty of Applied Sciences residency requirements apply to the computing science courses used toward the program.

**Mathematical Physics Honors Program**

This program, offered jointly with the Department of Physics, consists of theoretical and laboratory physics and applied and pure mathematics courses. See page 205 for details.

**Co-operative Education**

This program integrates work experience with academic study. See "Co-operative Education" on page 212. Contact the mathematical sciences co-op co-ordinator at 778.782.7632, EAA 1205, for admission requirements and information.

honors). In addition, honors may not complete more than 15 research and/or reading units in one term.

### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

### Major Program

(120 units)

All students must complete lower and upper division requirements.

#### Lower Division Core Requirements

(52-53 units)

Students complete all of

BISC 101-4 Introduction to Biology

BISC 102-4 Introduction to Biology

BISC 202-3 Genetics

CHEM 121-4 General Chemistry and Laboratory I

CHEM 122-2 General Chemistry II

CHEM 126-2 General Chemistry Laboratory II

CHEM 215-4 Introduction to Analytical Chemistry

CHEM 281-4 Organic Chemistry I

CHEM 282-2 Organic Chemistry II

CHEM 286-2 Organic Chemistry Laboratory II

MBB 222-3 Molecular Biology and Biochemistry

MBB 231-3 Cell Biology and Biochemistry

and one of

CMPT 102-3 Introduction to Scientific Computer Programming

CMPT 110-3 Event-Driven Programming in Visual Basic

CMPT 120-3 Introduction to Computing Science and Programming I

and one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

MATH 154-3 Calculus I for the Biological Sciences

and one of

MATH 152-3 Calculus II

MATH 155-3 Calculus II for the Biological Sciences

and one of

PHYS 101-3 General Physics I

PHYS 120-3 Modern Physics and Mechanics

PHYS 125-3 Mechanics and Special Relativity

PHYS 140-4 Studio Physics – Mechanics and Modern Physics

and one of

PHYS 102-3 General Physics II

PHYS 121-3 Optics, Electricity and Magnetism

PHYS 126-3 Electricity, Magnetism and Light

PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism

#### Upper Division Core Requirements

(22 units)

Students complete all of

MBB 308-3 Molecular Biology Laboratory

MBB 309W-4 Biochemistry Laboratory

MBB 321-3 Intermediary Metabolism

MBB 322-3 Molecular Physiology

MBB 331-3 Molecular Biology

and one of

CHEM 360-3 Chemical Kinetics and

Thermodynamics

MBB 323-3 Introduction to Physical Biochemistry

and one of

MATH 310-3 Introduction to Ordinary Differential Equations

STAT 201-3 Statistics for the Life Sciences

STAT 270-3 Introduction to Probability and Statistics

Students complete a minimum of five courses which include a minimum of one as indicated by # and a minimum of one as indicated by \*. There is no upper limit on the quantity in this list that can be completed.

MBB 402-3 Molecular Genetics

MBB 420-3 Special Topics in Biochemistry

MBB 421-3 Nucleic Acids#

MBB 422-3 Biomembranes#

MBB 423-3 Protein Structure and Function#

MBB 426-3 Immunology

MBB 432-3 Advanced Molecular Biology Techniques

MBB 435-3 Genomic Biology\*

MBB 436-3 Gene Expression

MBB 437-3 Selected Topics in Signal Transduction

MBB 438-3 Human Molecular Genetics

MBB 440-3 Special Topics in Molecular Biology

MBB 441-3 Bioinformatics\*

MBB 442-3 Proteomics\*

MBB 443-3 Protein Biogenesis and Degradation#

PHYS 433-3 Biological Physics Laboratory

In addition to the above, students must complete enough electives to total 120. Of these 120 units,

- 44 must be upper division

- 12 must be from outside the Faculty of Science, fulfilled as follows: six units from the Faculty of Arts and Social Sciences (excluding EDUC 401-406). Faculty of Applied Sciences courses may be used.

In addition, students should consult the bachelor of science regulations in *Faculty of Science*. See "Requirements for Major" on page 181.

Although many variations are possible, those with BC high school chemistry 12, mathematics 12 and physics 12 (or equivalents) might complete the following typical program.

#### Term 1

BISC 101-4 or 102-4

CHEM 121-4

MATH 150-4, 151-3 or 154-3

PHYS 120-3

#### Term 2

BISC 101-4 or 102-4

CHEM 122-2

CHEM 281-4

MATH 152-3 or 155-3

#### Term 3

CHEM 282-2

CHEM 286-2

MBB 222-3

PHYS 121-3

#### Term 4

BISC 202-3

CHEM 126-2

MBB 231-3

CMPT 102-3, 110-3 or 120-3

#### Levels 5 and 6

MBB 331-3

CHEM 360-3 or MBB 323-3

MATH 310-3 or STAT 201-3 or STAT 270-3

MBB 308-3, 309W-3, 321-3 and 322-3

MBB 432-3

nine units of electives

Total 34 units

#### Levels 7 and 8

15-18 units; 11-16 units of electives Total 29-31 units

### Honors Program

(132 units)

A minimum 3.0 CGPA, 3.0 upper division GPA, and department permission is required for admission. In addition to the major requirements, honors complete one of the following individual study term options.

either all of (option A)

MBB 481-5 Individual Study Semester – Research Design

MBB 482-5 Individual Study Semester – Research Performance

MBB 483-5 Individual Study Semester – Research Reporting

or both of (option B)

MBB 491-5 Undergraduate Research

MBB 492-10 Individual Study Semester\*

\*This may be accomplished by breaking the individual study term project into two consecutive terms.

Students complete 12 units outside the Faculty of Science (including six units in the Faculty of Arts and Social Sciences, but excluding EDUC 401 to 406) and at least 60 upper division units. See "Requirements for Major" on page 181.

### Minor Program

(56-60 units minimum)

#### Lower Division Requirements

(42 units minimum)

Students complete all of

BISC 101-4 General Biology

BISC 102-4 General Biology

CHEM 121-4 General Chemistry and Laboratory I

CHEM 122-2 General Chemistry II

CHEM 126-2 General Chemistry Laboratory II

CHEM 281-4 Organic Chemistry I

CHEM 282-2 Organic Chemistry II

CHEM 286-2 Organic Chemistry Laboratory II

MBB 222-3 Molecular Biology and Biochemistry

MBB 231-3 Cell Biology and Biochemistry

and one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

MATH 154-3 Calculus I for the Biological Sciences

and one of

MATH 152-3 Calculus II

MATH 155-3 Calculus II for the Biological Sciences

and one of

PHYS 101-3 General Physics I

PHYS 120-3 Modern Physics and Mechanics

and one of

PHYS 102-3 General Physics II

PHYS 121-3 Optics, Electricity and Magnetism

#### Cumulative Grade Point Average Requirement

Students must meet the same criteria as required for the MBB major program with the exception of BISC 202 which is not required for an MBB minor.

#### Upper Division Requirements

(14-18 units)

Students complete five upper division MBB courses (plus any lower division prerequisites) excluding MBB 481, 482, 483 and 492.

### Computing Science and Molecular Biology and Biochemistry Joint Major Program

The School of Computing Science and the Department of Molecular Biology and Biochemistry co-operate in offering this joint major program. The student enrolment, appeals, and graduation processing are handled by either the School of Computing Science in the Faculty of Applied Sciences or the Department of Molecular Biology and Biochemistry in the Faculty of Science.

#### Lower Division Requirements

(63-67 units)

Students complete

CMPT 126-3 Introduction to Computing Science and Programming

or both of

CMPT 120-3 Introduction to Computing Science and Programming I

CMPT 125-3 Introduction to Computing Science and Programming II

and one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

and all of the following

BISC 101-4 General Biology

BISC 102-4 General Biology

BISC 202-3 Genetics

CHEM 121-4 General Chemistry and Laboratory I

CHEM 122-2 General Chemistry and Laboratory II

CHEM 281-4 Organic Chemistry I

CHEM 282-2 Organic Chemistry II

CMPT 150-3 Introduction to Computer Design

CMPT 225-3 Data Structures and Programming

CMPT 275-4 Software Engineering

MACM 101-3 Discrete Mathematics I

MACM 201-3 Discrete Mathematics II

MATH 152-3 Calculus II

MBB 222-3 Molecular Biology and biochemistry

MBB 231-3 Cell Biology and Biochemistry

STAT 270-3 Introduction to Probability and Statistics

plus one of

PHYS 101-3 General Physics I

PHYS 120-3 Modern Physics and Mechanics

PHYS 125-3 Mechanics and Special Relativity

PHYS 140-4 Studio Physics – Mechanics and Modern Physics

plus one of

PHYS 102-3 General Physics II

PHYS 121-3 Optics, Electricity and Magnetism

PHYS 126-3 Electricity, Magnetism and Light

PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism

Students are strongly encouraged to take CHEM 286.

### Upper Division Requirements

(45 units)

Students complete all of

CMPT 307-3 Data Structures and Algorithms

CMPT 320-3 Social Implications of a Computerized Society

CMPT 354-3 Database Systems and Structures

CMPT 441-3 Introduction to Computational Biology

MBB 308-3 Molecular Biology Laboratory

MBB 331-3 Molecular Biology

MBB 441-3 Bioinformatics

STAT 302-3 Analysis of Experimental and Observational Data

plus one of

CMPT 376W-3 Technical Writing and Group Dynamics

MBB 309W-4 Biochemistry Laboratory

plus at least two of

CMPT 305-3 Computer Simulation and Modeling

CMPT 310-3 Artificial Intelligence Survey

CMPT 340-3 Computers in Biomedicine

CMPT 361-3 Introduction to Computer Graphics

MACM 316-3 Numerical Analysis

MBB 321-3 Intermediary Metabolism

plus at least three of

CMPT 405-3 Design and Analysis of Computing Algorithms

CMPT 413-3 Computational Linguistics

CMPT 419-3 Special Topics in Artificial Intelligence

CMPT 454-3 Database Systems II

MBB 423-3 Protein Structure and Function

MBB 435-3 Genomic Analysis

MBB 438-3 Human Molecular Genetics

MBB 442-3 Proteomics

Students must complete an additional two to three units to total 45 required upper division units.

Students should enrol in co-operative education.

### Electives

Students must complete additional elective courses to bring the degree program total to 120 units.

## Molecular Biology and Biochemistry and Business Administration Joint Major Program

This program offers in-depth combined training that is pertinent to development and administration in emergent biotechnology enterprises. Molecular biology and biochemistry form the scientific and technological underpinnings of today's burgeoning biotechnology field while business administration teaches fundamentals of economics, management, marketing, investment and business law.

Students complete most required courses in both the department (MBB) and the Faculty of Business Administration (FBA). Upon completion, a bachelor of science from the Faculty of Science is awarded. The program requires 70 units in MBB-related courses and 52 in BUS-related ones with little curriculum scheduling flexibility. Students are strongly encouraged to participate in the co-operative education program.

### Lower Division Molecular Biology and Biochemistry Requirements

Students complete all of

BISC 101-4 General Biology

BISC 102-4 General Biology

BISC 202-3 Genetics

CHEM 121-4 General Chemistry and Laboratory I

CHEM 122-2 General Chemistry II

CHEM 281-4 Organic Chemistry I

CHEM 282-2 Organic Chemistry II

MBB 222-3 Molecular Biology and Biochemistry

MBB 231-3 Cellular Biology and Biochemistry

and one of

MATH 150-4 Calculus I with Review

MATH 151-3 Calculus I

MATH 154-3 Calculus I for the Biological Sciences

and one of

MATH 152-3 Calculus II

MATH 155-3 Calculus II for the Biological Sciences

and one of

PHYS 101-3 General Physics I

PHYS 120-3 Modern Physics and Mechanics

PHYS 125-3 Mechanics and Special Relativity

PHYS 140-4 Studio Physics – Mechanics and Modern Physics

and one of

PHYS 102-3 General Physics II

PHYS 121-3 Optics, Electricity and Magnetism

PHYS 126-3 Electricity, Magnetism and Light

PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism

CHEM 286 is strongly recommended.

### Lower Division Business Administration Requirements

Students complete all of

BUS 251-3 Financial Accounting I

BUS 254-3 Managerial Accounting I

BUS 272-3 Behavior in Organizations

ECON 103-4 Principles of Microeconomics

ECON 105-4 Principles of Macroeconomics

and one of

BUEC 232-4 Data and Decisions I

STAT 270-3 Introduction to Probability and Statistics\*\*

and one three-unit PHIL course.

### Upper Division Molecular Biology and Biochemistry Requirements

Students complete all of

MBB 300-1 Special Topics in Biotechnology and Business

MBB 308-3 Molecular Biology Laboratory

MBB 309W-4 Biochemistry Laboratory

MBB 321-3 Intermediary Metabolism

MBB 322-3 Molecular Physiology

MBB 331-3 Molecular Biology

and any two 400 division MBB courses (except MBB 490 and 491), one of which can be fulfilled by completing BISC 303 or 333.

### Upper Division Business Administration Requirements

Students complete all of

BUS 303-3 Business, Society and Ethics

BUS 312-4 Introduction to Finance

BUS 336-4 Data and Decisions II

BUS 343-3 Introduction to Marketing

BUS 360W-3 Business Communication

BUS 393-3 Commercial Law

BUS 477-4 New Venture Planning

and one of

BUS 347-3 Consumer Behavior

another marketing course

and one of

BUS 374-3 Organization Theory

BUS 381-3 Introduction to Human Resource Management

## Computing Science and Molecular Biology and Biochemistry Joint Honors Program

To enter, students must meet the honors program admission requirements as specified by both departments, including seeking permission from the School of Computing Science. In addition to the major program requirements, students also complete six 400 division computing science units beyond those required for the joint major, and six research-related MBB units, which are fulfilled by completing MBB 496.

## Molecular Biology and Biochemistry and Business Administration Joint Honors Program

(132-133 units)

Students must meet the criteria specified by each program (i.e. MBB and Faculty of Business Administration) for entering an honors program, and must seek MBB permission. In addition to the major requirements, MBB/business administration joint honors students must complete

- six units of 400 division BUS or BUEC courses beyond those required for the joint major
- a minimum of six units of research-related MBB courses, which can be fulfilled with MBB 496-6

### Grade Point Averages

For program entry, continuance and graduation, the following grade point averages (GPAs) will be used: minimum 3.00 cumulative GPA; minimum 3.00 GPA for upper division courses.

### Co-operative Education

Majors and honors students may apply to the science co-operative education program which includes up to five work terms during the normal academic program. See "Co-operative Education" on page 212.

\*joint appointment with biochemistry

## Minimum Grade Requirement

Students wishing to enrol for physics courses must  
obtain a C- grade or better in prerequisite courses.

## Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil  
writing, quantitative and breadth requirements as part  
of their program. See "Writing, Quantitative, and  
Breadth Requirements" on page 7 for information.

## First Year Physics

Four streams of introductory physics are offered.  
Students should choose a stream that is based on  
their interests and abilities, and on requirements for  
their intended program.

## Advanced: PHYS 125/126

Recommended for students intending to major in  
physics or applied mathematics as well as for most  
engineering students. Prerequisite: a grade of 'A' in  
both Physics 12 and Principles of Mathematics 12, or  
equivalent. MATH 151/152 are corequisites.

## Standard: PHYS 120/121

General, introductory physics for non-life science  
students. MATH 151/152 are corequisites.

## Life Sciences: PHYS 101/102

Recommended for students who wish to specialize in  
bioscience, kinesiology or other life sciences. MATH  
154/155 are corequisites.

## Studio Physics: PHYS 140/141

Offered only at the Surrey campus, this covers the  
same material as PHYS 120/121 plus PHYS 131 but  
in a more interactive, combined lecture-lab  
environment. MATH 151/152 are corequisites.

The content of all four streams is similar, although  
each demands different levels of mathematical  
sophistication and problem-solving. The lab  
component is incorporated into PHYS 140/141 but is  
completed as a separate course for the other  
streams. The courses count as duplicates so students  
may switch from one stream to another between  
terms or during the first three weeks of the term.

Students interested in pursuing a physics degree  
should complete PHYS 125/126 because this stream  
offers the best preparation. However, PHYS 120/121  
or PHYS 140/141 should be adequate. Students who  
achieve B grades or better in PHYS 101/102 should  
be able to continue in physics. All potential physics  
students should consult a physics advisor as early as  
possible to discuss their program.

## Open Workshops

PHYS 100, 101 and 102 have tutorials that are held in  
an open workshop format with unstructured periods.  
Each week teaching assistants are available to  
answer questions and help with assignments.

## Computer Skills

Some students become proficient in a high-level  
programming language such as those taught in  
CMPT 102 through self-study. Such individuals  
should consult the physics advisor.

## Recommended Programs

The recommended schedules for all physics  
programs can be found on the web at  
<http://physics.sfu.ca/teaching/undergrad/programs>.

## Applied Physics Major Program

This BSc program offers a solid physics background  
combined with the applied aspects of physics  
necessary for careers in high technology industries.  
Students should enrol in the co-op program to acquire  
valuable industrial experience.

## Lower Division Requirements

(54 units)

Students complete all of  
CHEM 121-4 General Chemistry and Laboratory I  
CHEM 122-2 General Chemistry II  
CHEM 126-2 General Chemistry Laboratory II  
CMPT 102-3 Introduction to Scientific Computer  
Programming  
CMPT 150-3 Introduction to Computer Design  
CMPT 250-3 Introduction to Computer Architecture  
MATH 152-3 Calculus II†  
MATH 251-3 Calculus III  
MATH 252-3 Vector Calculus  
PHYS 131-2 Physics Laboratory I\*  
PHYS 211-3 Intermediate Mechanics  
PHYS 231-3 Physics Laboratory II  
PHYS 233-2 Physics Laboratory III  
PHYS 255-3 Vibrations and Waves  
PHYS 285-3 Introduction to Relativity and Quantum  
Mechanics

and one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I

and one of  
MATH 232-3 Applied Linear Algebra  
MATH 240-3 Algebra I: Linear Algebra

and one of  
PHYS 120-3 Mechanics and Modern Physics  
PHYS 125-3 Mechanics and Special Relativity†  
PHYS 140-4 Studio Physics – Mechanics and Modern  
Physics\*

and one of  
PHYS 121-3 Optics, Electricity and Magnetism  
PHYS 126-3 Electricity, Magnetism and Light†  
PHYS 141-4 Studio Physics – Optics, Electricity and  
Magnetism\*

\*students with credit for PHYS 140 and 141 are not  
required to complete PHYS 131

†recommended

## Upper Division Requirements

(36 units)

MATH 310-3 Introduction to Ordinary Differential  
Equations  
PHYS 321-3 Intermediate Electricity and Magnetism  
PHYS 326-4 Electronics and Instrumentation  
PHYS 332W-4 Optics Laboratory  
PHYS 344-3 Thermal Physics  
PHYS 385-3 Quantum Mechanics I  
PHYS 421-3 Electromagnetic Waves  
PHYS 455-3 Modern Optics

and 10 units selected from  
MACM 316-3 Numerical Analysis I (or PHYS 395†)  
NUSC 341-3 Introduction to Radiochemistry  
NUSC 346-2 Radiochemistry Laboratory  
PHYS 365-3 Semiconductor Device Physics  
PHYS 430-4 Digital Electronics and Interfacing  
PHYS 431-4 Advanced Physics Laboratory I  
PHYS 465-3 Solid State Physics

†recommended

**Other Requirements**

Please see “Requirements for Major” on page 181.

**Biological Physics Major Program**

This program is for students who are interested in using physical approaches to tackle biological problems. Students should speak with an advisor as soon as possible to schedule their programs.

**Lower Division Requirements**

(64 units)

Students complete all of  
 BISC 101-4 General Biology  
 BISC 102-4 General Biology  
 BISC 202-3 Genetics  
 CHEM 121-4 General Chemistry and Laboratory I  
 CHEM 122-2 General Chemistry II  
 CHEM 281-4 Organic Chemistry  
 CHEM 282-2 Organic Chemistry II  
 MATH 152-3 Calculus II  
 MATH 251-3 Calculus III  
 MATH 252-3 Vector Calculus  
 MBB 222-3 Molecular Biology and Biochemistry  
 MBB 231-3 Cellular Biology and Biochemistry  
 PHYS 211-3 Intermediate Mechanics  
 PHYS 231-3 Physics Laboratory II  
 PHYS 255-3 Vibrations and Waves

and one of  
 MATH 150-4 Calculus I with Review  
 MATH 151-3 Calculus I

and one of  
 MATH 232-3 Applied Linear Algebra  
 MATH 240-3 Algebra I: Linear Algebra  
 and one of  
 CHEM 260-4 Atoms, Molecules, Spectroscopy  
 PHYS 285-3 Introduction to Relativity and Quantum Mechanics

and one of  
 PHYS 101-3 Physics for the Life Sciences I  
 PHYS 120-3 Mechanics and Modern Physics  
 PHYS 125-3 Mechanics and Special Relativity†  
 PHYS 140-4 Studio Physics – Mechanics and Modern Physics\*

and one of  
 PHYS 102-3 Physics for the Life Sciences II  
 PHYS 121-3 Optics, Electricity and Magnetism  
 PHYS 126-3 Electricity, Magnetism and Light†  
 PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism\*†

and one of  
 PHYS 130-2 Physics for the Life Sciences Laboratory  
 PHYS 131-2 Physics Laboratory I\*

\*students with credit for PHYS 140 and 141 are not required to complete PHYS 131

†recommended

**Upper Division Requirements**

(40 units)

Students complete all of  
 MATH 310-3 Introduction to Ordinary Differential Equations  
 MBB 309W-4 Biochemistry Laboratory  
 MBB 322-3 Molecular Physiology  
 MBB 331-3 Molecular Biology  
 PHYS 321-3 Intermediate Electricity and Magnetism  
 PHYS 347-3 Introduction to Biological Physics  
 PHYS 385-3 Quantum Mechanics I  
 PHYS 433-3 Biological Physics Laboratory

and one of  
 CHEM 360-3 Thermodynamics and Chemical Kinetics  
 MBB 323-3 Introduction to Physical Biochemistry  
 PHYS 344-3 Thermal Physics

and four other upper division MBB or PHYS courses. MATH 462 may be included amongst these four. The following courses are suggested.

MBB 308-3 Molecular Biology Laboratory  
 MBB 321-3 Intermediary Metabolism  
 MBB 413-2 Physical Biochemistry Laboratory  
 MBB 421-3 Nucleic Acids  
 MBB 422-3 Biomembranes  
 MBB 423-3 Protein Structure and Function  
 MBB 441-3 Bioinformatics  
 MBB 442-3 Proteomics  
 PHYS 492-3 Special Topics in Physics  
 PHYS 413-3 Advanced Mechanics  
 PHYS 445-3 Statistical Physics  
 PHYS 455-3 Modern Optics  
 PHYS 484-3 Nonlinear Physics  
 MATH 462-3 Fluid Dynamics

**Chemical Physics Major Program**

This program is offered jointly by the Departments of Chemistry and Physics. Entry requires permission of both. Students are strongly encouraged to complete at least three lower division computing science units.

**Lower Division Requirements**

(57 units)

Students complete all of  
 CHEM 121-4 General Chemistry and Laboratory I  
 CHEM 122-2 General Chemistry II  
 CHEM 126-2 General Chemistry Laboratory II  
 CHEM 215-4 Introduction to Analytical Chemistry  
 CHEM 230-3 Inorganic Chemistry  
 CHEM 236W-3 Inorganic Chemistry Laboratory  
 CHEM 281-4 Organic Chemistry I  
 MATH 152-3 Calculus II  
 MATH 251-3 Calculus III  
 MATH 252-3 Vector Calculus  
 PHYS 131-2 Physics Laboratory I\*  
 PHYS 211-3 Intermediate Mechanics  
 PHYS 231-3 Physics Laboratory II  
 PHYS 255-3 Vibrations and Waves

and one of  
 MATH 150-4 Calculus I with Review  
 MATH 151-3 Calculus I

and one of  
 MATH 232-3 Applied Linear Algebra  
 MATH 240-3 Algebra I: Linear Algebra

and one of  
 CHEM 260-4 Atoms, Molecules, Spectroscopy  
 PHYS 285-3 Introduction to Relativity and Quantum Mechanics

and one of  
 PHYS 120-3 Mechanics and Modern Physics  
 PHYS 125-3 Mechanics and Special Relativity†  
 PHYS 140-4 Studio Physics – Mechanics and Modern Physics\*

and one of  
 PHYS 121-3 Optics, Electricity and Magnetism  
 PHYS 126-3 Electricity, Magnetism and Light†  
 PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism\*

\*students with credit for PHYS 140 and 141 are not required to complete PHYS 131

†recommended

**Upper Division Requirements**

(40 units)

CHEM 340-3 Materials Chemistry  
 CHEM 366W-3 Physical Chemistry Laboratory I  
 CHEM 462-3 Molecular Spectroscopy  
 MATH 310-3 Introduction to Ordinary Differential Equations  
 PHYS 321-3 Intermediate Electricity and Magnetism  
 PHYS 421-3 Electromagnetic Waves

and one of  
 PHYS 326-4 Electronics and Instrumentation  
 PHYS 332W-4 Optics Laboratory\*

and one of  
 CHEM 360-3 Thermodynamics and Chemical Kinetics  
 PHYS 344-3 Thermal Physics

and one of  
 CHEM 460-3 Advanced Physical Chemistry  
 PHYS 445-3 Statistical Physics

and one of  
 CHEM 464-3 Quantum Chemistry  
 PHYS 385-3 Quantum Mechanics I

plus 10 upper division chemistry, nuclear science or physics units chosen to maintain a minimum of 15 upper division units in both chemistry and physics

\*the requirement of PHYS 233 as a prerequisite for PHYS 332 is waived for students in the chemical physics major and honors programs

**Other Requirements**

Please see “Requirements for Major” on page 181.

**Physics Major Program**

This program offers a solid physics background with the opportunity to explore other disciplines. Because of flexibility in upper division physics requirements, students can plan their own upper division to fit individual objectives. Consult an advisor when planning and to have their program approved.

**Lower Division Requirements**

(46 units)

Students complete all of  
 CHEM 121-4 General Chemistry and Laboratory I  
 CHEM 122-2 General Chemistry II  
 CMPT 102-3 Introduction to Scientific Computer Programming  
 MATH 152-3 Calculus II  
 MATH 251-3 Calculus III  
 MATH 252-3 Vector Calculus  
 PHYS 131-2 Physics Laboratory I\*  
 PHYS 211-3 Intermediate Mechanics  
 PHYS 231-3 Physics Laboratory II  
 PHYS 233-2 Physics Laboratory III  
 PHYS 255-3 Vibrations and Waves  
 PHYS 285-3 Introduction to Relativity and Quantum Mechanics

and one of  
 MATH 150-4 Calculus I with Review  
 MATH 151-3 Calculus I

and one of  
 MATH 232-3 Applied Linear Algebra  
 MATH 240-3 Algebra I: Linear Algebra

and one of  
 PHYS 120-3 Mechanics and Modern Physics  
 PHYS 125-3 Mechanics and Special Relativity†  
 PHYS 140-4 Studio Physics – Mechanics and Modern Physics\*

and one of  
 PHYS 121-3 Optics, Electricity and Magnetism  
 PHYS 126-3 Electricity, Magnetism and Light†  
 PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism\*

\*students with credit for PHYS 140 and 141 are not required to complete PHYS 131

†recommended

**Upper Division Requirements**

(31 units)

Students complete all of  
 MATH 310-3 Introduction to Ordinary Differential Equations

PHYS 321-3 Intermediate Electricity and Magnetism  
 PHYS 332W-4 Optics Laboratory  
 PHYS 344-3 Thermal Physics  
 PHYS 385-3 Quantum Mechanics I

In addition, a minimum of 15 other upper division physics units must be completed to satisfy the physics subject area requirements for a major.

### Other Requirements

Please see "Requirements for Major" on page 181.

## Applied Physics Honors Program

This program offers a solid physics background combined with an extensive introduction to the applied aspects necessary for high technology careers. Students have the option of various specialized upper division courses. Enrol in co-op education to acquire industrial experience.

PHYS 432 should be based on an industrially motivated project. An additional second year CMPT course, such as CMPT 212, is recommended. Students considering physics graduate programs should complete PHYS 413, 415 and 445.

### Lower Division Requirements

Requirements are the same as for the applied physics major program.

### Upper Division Requirements

(52 units)

Students complete all of  
 MATH 310-3 Introduction to Ordinary Differential Equations  
 PHYS 321-3 Intermediate Electricity and Magnetism  
 PHYS 326-4 Electronics and Instrumentation  
 PHYS 332W-4 Optics Laboratory  
 PHYS 344-3 Thermal Physics  
 PHYS 384-3 Methods of Theoretical Physics I  
 PHYS 385-3 Quantum Mechanics I  
 PHYS 421-3 Electromagnetic Waves  
 PHYS 431-4 Advanced Physics Laboratory I  
 PHYS 432-5 Undergraduate Honors Thesis  
 PHYS 455-3 Modern Optics  
 PHYS 465-3 Solid State Physics

and 11 additional units chosen from  
 CHEM 340-3 Materials Chemistry (or ENSC 330)  
 MACM 316-3 Numerical Analysis I (or PHYS 395)†  
 ENSC 426-4 High Frequency Electronics  
 ENSC 495-4 Introduction to Microelectronic Fabrication\*

PHYS 365-3 Semiconductor Device Physics  
 PHYS 430-4 Digital Electronics and Interfacing

\*the prerequisite (ENSC 222) can be replaced by PHYS 326

†recommended

### Other Requirements

Please see "Requirements for Honors and Honors First Class" on page 181.

## Biological Physics Honors Program

(15-17 additional upper division units)

Honors program graduates may undertake graduate work in either physics or molecular biology, or related areas, and should choose their courses accordingly.

### Additional Upper Division Requirements

Students complete 15-17 upper division units in addition to the biological physics major program (see "Biological Physics Major Program" on page 204) by

choosing either Option A or Option B as stipulated below.

#### Option A

MBB 481-5 Individual Study Semester – Research Design  
 MBB 482-5 Individual Study Semester– Research Performance  
 MBB 483-5 Individual Study Semester – Research Reporting

#### Option B

PHYS 384-3 Methods of Theoretical Physics I  
 PHYS 415-3 Quantum Mechanics II  
 PHYS 432-5 Undergraduate Honors Thesis  
 PHYS 445-3 Statistical Physics

## Chemical Physics Honors Program

This program is offered jointly by the Departments of Chemistry and Physics. Entry requires permission of both. Honors program graduates may undertake graduate work in either chemistry or physics and should choose their courses accordingly. Students are strongly encouraged to complete at least three lower division computing science units.

### Lower Division Requirements

Requirements are the same as for the chemical physics major program.

### Upper Division Requirements

(51 units)

Students complete all of  
 CHEM 340-3 Materials Chemistry  
 CHEM 366W-2 Physical Chemistry Laboratory I  
 CHEM 462-3 Molecular Spectroscopy  
 MATH 310-3 Introduction to Ordinary Differential Equations  
 PHYS 321-3 Intermediate Electricity and Magnetism  
 PHYS 384-3 Methods of Theoretical Physics I  
 PHYS 415-3 Quantum Mechanics II  
 PHYS 421-3 Electromagnetic Waves

and one of  
 CHEM 360-3 Thermodynamics and Chemical Kinetics  
 PHYS 344-3 Thermal Physics

and one of  
 CHEM 460-3 Advanced Physical Chemistry  
 PHYS 445-3 Statistical Physics

and one of  
 CHEM 464-3 Quantum Chemistry  
 PHYS 385-3 Quantum Mechanics I  
 and one of  
 CHEM 440-3 Solid State Materials Chemistry  
 PHYS 465-3 Solid State Physics

and one of  
 CHEM 481-5 Undergraduate Research  
 PHYS 432-5 Undergraduate Honors Thesis

and one of  
 PHYS 326-4 Electronics and Instrumentation  
 PHYS 332W-4 Optics Laboratory\*

plus upper division chemistry, nuclear science or physics units chosen to bring the total upper division units to 51, and maintain a minimum of 21 upper division units in both chemistry and physics

\*the requirement that PHYS 233 as a prerequisite for PHYS 332 is waived for students in the chemical physics major and honors programs

### Other Requirements

Please see "Requirements for Honors and Honors First Class" on page 181.

## Mathematical Physics Honors Program

This program is offered jointly by the Departments of Mathematics and Physics. Entry requires permission of both. Graduates may undertake graduate work in mathematics or physics depending on interest. Some additional work in either mathematics or physics may be required. Students should speak with an advisor as soon as possible to schedule their programs.

### Lower Division Requirements

(46 units)

Students complete one of  
 CMPT 126-3 Introduction to Computing Science and Programming† (or CMPT 120 and 125)  
 CMPT 102-3 Introduction to Scientific Computer Programming

and all of  
 MATH 152-3 Calculus II  
 MATH 242-3 Introduction to Analysis I  
 MATH 251-3 Calculus III  
 MATH 252-3 Vector Calculus  
 PHYS 131-2 Physics Laboratory I\*  
 PHYS 211-3 Intermediate Mechanics  
 PHYS 231-3 Physics Laboratory II  
 PHYS 233-2 Physics Laboratory III  
 PHYS 255-3 Vibrations and Waves  
 PHYS 285-3 Introduction to Relativity and Quantum Mechanics  
 STAT 270-3 Introduction to Probability and Statistics  
 and one of  
 MATH 150-4 Calculus I with Review  
 MATH 151-3 Calculus I

and one of  
 MATH 232-3 Applied Linear Algebra  
 MATH 240-3 Algebra I: Linear Algebra

and one of  
 PHYS 120-3 Mechanics and Modern Physics  
 PHYS 125-3 Mechanics and Special Relativity†  
 PHYS 140-4 Studio Physics – Mechanics and Modern Physics\*

and one of  
 PHYS 121-3 Optics, Electricity and Magnetism  
 PHYS 126-3 Electricity, Magnetism and Light†  
 PHYS 141-4 Studio Physics – Optics, Electricity and Magnetism\*

\*students with credit for PHYS 140 and 141 are not required to complete PHYS 131

†recommended

### Upper Division Requirements

(58 units)

Students complete all of  
 MACM 316-3 Numerical Analysis I  
 MATH 310-3 Introduction to Ordinary Differential Equations  
 MATH 320-3 Introduction to Analysis II  
 MATH 322-3 Complex Variables  
 MATH 418-3 Partial Differential Equations

and one of  
 MATH 419-3 Linear Analysis  
 MATH 424-3 Complex Analysis  
 MATH 425-3 Real Analysis

and one of  
 MATH 461-3 Continuous Mathematical Models  
 MATH 462-3 Fluid Dynamics  
 MATH 495-3 Selected Topics in Applied Mathematics

and one of  
 MACM 401-3 Introduction to Computer Algebra  
 MACM 416-3 Numerical Analysis II  
 MATH 467-3 Dynamical Systems

and all of  
 PHYS 321-3 Intermediate Electricity and Magnetism

PHYS 332W-4 Optics Laboratory  
 PHYS 344-3 Thermal Physics  
 PHYS 384-3 Methods of Theoretical Physics I  
 PHYS 385-3 Quantum Mechanics I  
 PHYS 413-3 Advanced Mechanics  
 PHYS 415-3 Quantum Mechanics II  
 PHYS 421-3 Electromagnetic Waves  
 PHYS 445-3 Statistical Physics

and two of

PHYS 390-3 Introduction to Astrophysics  
 PHYS 432-5 Undergraduate Honors Thesis  
 PHYS 455-3 Modern Optics  
 PHYS 465-3 Solid State Physics  
 PHYS 484-3 Nonlinear Physics  
 PHYS 485-3 Particle Physics  
 PHYS 490-3 General Relativity and Gravitation

### Other Requirements

Please see "Requirements for Honors and Honors First Class" on page 181. CHEM 121 and 122 should be included among the elective courses.

### Physics Honors Program

This program provides an in-depth understanding of basic physics in preparation for post-graduate study in physics and closely related disciplines. A grade average of B or higher is required to graduate.

### Lower Division Requirements

Requirements are the same as for the physics major.

### Upper Division Requirements

(52 units)

Students complete all of  
 MATH 310-3 Introduction to Ordinary Differential Equations  
 PHYS 321-3 Intermediate Electricity and Magnetism  
 PHYS 332W-4 Optics Laboratory  
 PHYS 344-3 Thermal Physics  
 PHYS 384-3 Methods of Theoretical Physics I  
 PHYS 385-3 Quantum Mechanics I  
 PHYS 413-3 Advanced Mechanics  
 PHYS 415-3 Quantum Mechanics II  
 PHYS 421-3 Electromagnetic Waves  
 PHYS 431-4 Advanced Physics Laboratory I  
 PHYS 432-5 Undergraduate Honors Thesis  
 PHYS 445-3 Statistical Physics

and at least nine units chosen from

PHYS 390-3 Introduction to Astrophysics  
 PHYS 455-3 Modern Optics  
 PHYS 465-3 Solid State Physics  
 PHYS 485-3 Particle Physics  
 PHYS 490-3 General Relativity and Gravitation

and at least three units chosen from

PHYS 326-4 Electronics and Instrumentation  
 PHYS 380-3 Introduction to Subatomic Physics  
 PHYS 395-3 Computational Physics  
 PHYS 430-4 Digital Electronics and Interfacing  
 PHYS 484-3 Nonlinear Physics

### Other Requirements

Please see "Requirements for Honors and Honors First Class" on page 181.

### Nuclear Science Minor Program

This minor program is offered jointly with the Department of Chemistry. See page 192 for details.

### Physics Minor Program

Students complete a minimum of 14 upper division physics units in courses numbered 300 and above, together with all the prerequisites. Students will select a reasonable list of courses that must be approved by the Department of Physics.

### Co-operative Education

Ms. N. Yano, Faculty of Science co-op co-ordinator,  
 P9441 Shrum Science Centre, 778.782.4654,  
 nmyano@sfu.ca

Co-op combines work experience with academic studies. The student spends alternate terms on campus and in study related jobs. Please see "Co-operative Education" on page 212.

#### Chair

R.A. Lockhart BSc (Br Col), MA, PhD (Calif)

#### Professor Emeritus

M.A. Stephens BSc (Brist), AM (Harv), PhD (Tor)

#### Professors

C.B. Dean BSc (Sask), MMath, PhD (Wat), Burnaby Mountain Endowed Professor  
 R.A. Lockhart BSc (Br Col), MA, PhD (Calif)  
 T.M. Loughin BSc (Rensselaer), MSc (N Carolina), PhD (Iowa State)  
 R.D. Routledge BSc (Qu), MSc (Alta), PhD (Dal)  
 C.J. Schwarz BSc, MMath (Wat), MSc, PhD (Manit)  
 T.B. Swartz BMath (Wat), MSc, PhD (Tor)  
 B. Tang BS, MS (Peking), PhD (Wat)  
 S. Thompson AB (Calif), MS, PhD (Oregon State), Gordon M. Shrum Chair in Science

#### Associate Professors

J. Graham BSc, MSc (Br Col), MSc, PhD (Wash)  
 J. Hu BS, MS (Peking), PhD (Wat)  
 W.B. McNeney BSc, MSc (Br Col), MSc, PhD (Wash)  
 G. Parker BSc, MSc (Laval), PhD (H-W)

#### Assistant Professors

R. Altman BA (Wat), MS (Cornell), PhD (Br Col)  
 D. Bingham BSc (C'dia), MSc (Car), PhD (S Fraser), Canada Research Chair  
 D.A. Campbell BSc (S Fraser), MSc (Dal), PhD (McG)  
 J. Cao BSc (Beijing Normal), PhD (McG)  
 Y. Lu BSc (Fudan), MSc, PhD (C'dia)  
 C. Tsai BS (Ntnl Taiwan), MS (Ntnl Chiao-Tung Taiwan), MS (Wisc), PhD (Wat)  
 L. Zeng BSc (Nankai), MSc, PhD (Wat)\*

#### Adjunct Professors

R.F. Balshaw BSc, MSc (Manit), PhD (S Fraser)  
 S.G. Banneheka MSc (Lond), MSc, PhD (S Fraser)  
 P. Gill BSc, MSc (PunjAg), PhD (IIT Kanpur)  
 F. He BSc, MSc (Nanjing Forest), MSc (Chin Acad Sc), MSc (Vic, BC), PhD (Montr)  
 N.W. Hengartner BSc (Laval), MMath (Wat), PhD (Calif)  
 J.J. Spinelli BSc, MSc, PhD (S Fraser)

#### Associate Member

N. Reilly, Department of Mathematics

#### Senior Lecturer

R. Insley BSc, MSc (Br Col)

#### Statistical Consulting Service

I. Bercovitz BSc (Br Col), MSc (Car)  
 M.M. Loughin BA (St Olaf), MS (N Carolina)

\*joint appointment with health sciences

The department maintains a committee of advisors each year. Their office hours are available through the general office and on the department's website at www.stat.sfu.ca. Major students should seek advice early in their academic careers about program planning from these advisors.

The department offers a program within the Faculty of Science leading to a bachelor of science with a major or honors in statistics and a major or honors in actuarial science (see page 138). The department

also offers a statistics minor and a certificate in actuarial mathematics.

The following programs in statistics train students, not only in the analysis of large data sets, but also in the design and analysis of scientific experiments and sample surveys. These techniques are applied in a broad range of fields. To fully appreciate their application, it is important that students also gain advanced training in an area of potential application. To this end, major or honors students in statistics complete a minor in a field other than statistics. In keeping with the almost universal applicability of statistical methodology, there are no other restrictions on the selection of a minor. Students should discuss this selection with an advisor early in their program.

Students interested in statistics or in actuarial science may consider the following related programs: mathematics and computing science, management and systems science.

### Admission Requirements

#### Actuarial Science

For admission, students must have completed each lower division required course in mathematics and statistics, or its equivalent, with a minimum C+ grade. They must also have completed ACMA 210 with a minimum grade of C+ and have a CGPA of at least 3.0. Students will be selected competitively. Achieving the minimum grade requirements will not guarantee program admission.

The program will only admit 25-30 students each year. Students should apply in the term in which they complete ACMA 210.

#### Management and Systems Science

For major or honors admission, a program-related Simon Fraser University grade point average (GPA) of 2.7 is required. This GPA is based on the lower division courses required for the Management and Systems Science program completed at Simon Fraser University. Admission is competitive and achieving the minimum GPA does not guarantee admission to the program. Please see "Management and Systems Science Program" on page 195.

#### Statistics

Students may be admitted to a statistics major program by direct entry on their university application or by application to the statistics department after they have been admitted. Students applying for a statistics minor must apply to the department. Visit [www.stat.sfu.ca/programmes/statistics/admission-continuation](http://www.stat.sfu.ca/programmes/statistics/admission-continuation) for admittance and continuation requirements.

### Other Requirements

#### Writing, Quantitative, and Breadth Requirements

Students completing degree programs must fulfil writing, quantitative and breadth requirements as part of their program. See "Writing, Quantitative, and Breadth Requirements" on page 7 for information.

#### Courses for Further Credit

No student may complete, for further credit, any course offered by the Department of Statistics and Actuarial Science which is a prerequisite for a course the student has already completed with a grade of C- or higher without permission of the department.

## Computing Recommendation

Some experience with a high level programming language is recommended by the beginning of the second year.

## Non-specialist STAT Courses

The following courses are intended to be particularly accessible to students who are not specializing in statistics: STAT 100, 101, 201, 203, 302, 403.

## Open Workshops

Some introductory and service courses are organized through the department's open workshops. In addition to regularly scheduled lectures, students enrolled in STAT 100, 101, 203, 270, 201, 302 are encouraged to come to the workshops for assistance any time during posted hours. At the workshop students meet with the co-ordinator, teaching assistants and students, and work together to understand mathematics in a friendly and helpful environment. The statistics workshop is held in K9516 Shrum Science Centre (inside K9510).

## Beginning Level Requirements in Statistics

Students considering enrolling in a statistics course who do not have BC high school mathematics 11 (or equivalent) must see the basic math workshop co-ordinator. These students may complete the non-credit basic math course, basic algebra, offered through the Department of Mathematics.

Students who are unsure of their level of preparation are strongly encouraged to complete the free math assessment test at the basic math workshop, K9505 or at Simon Fraser University Vancouver. Be sure to discuss the test results with the lab instructor in the basic math workshop, or her designate.

## Prerequisite Grade Requirement

Students must have obtained a grade of C- or better in prerequisite for courses labelled STAT, and C or better for courses labelled ACMA, offered by the Department of Statistics and Actuarial Science.

## GPA Requirement for Continuation

To continue in the actuarial science or statistics programs, students must maintain a GPA of at least 2.25 on courses labelled MATH, STAT or ACMA.

To continue in management and systems science, students must maintain a CGPA of at least 2.5.

## Faculty of Science Requirements

Students must satisfy the Faculty of Science upper division credit, breadth and grade point average requirements.

## Credit for Statistics Courses

Credit for STAT courses can depend on the order that the courses are completed. There are three kinds of courses offered.

- Introductory courses STAT 100
- Service courses STAT 101, 201, 203, 301, 302, 403.
- Mainstream courses STAT 270, 285, 300, 330, 350, 380, 400, 410, 430, 450, 460.

Upon completing any service or mainstream course, credit may not be subsequently obtained for STAT 100.

Upon completing any mainstream course, credit may not be obtained for any service course. An exception to this rule is that both STAT 302 and STAT 403 may be completed for credit after having completed STAT 270.

## Accreditation of Courses

The Statistical Society of Canada has accredited certain courses within the department for partial fulfilment of the educational requirements for the

associate statistician (AStat) designation. The list of accredited courses is available at [www.ssc.ca/accreditation/courses\\_e.html](http://www.ssc.ca/accreditation/courses_e.html). Please contact the department for details. Further information on the professional statistician (PStat) and associate statistician (AStat) designations is available at [www.ssc.ca](http://www.ssc.ca).

## Actuarial Science Major Program

Actuarial science majors must achieve a cumulative grade point average (CGPA) of 2.50 or better to graduate.

Students must obtain credit for the following courses.

### Lower Division Requirements

Students complete all of  
ACMA 210-3 Mathematics of Compound Interest  
ECON 103-4 Principles of Microeconomics  
ECON 105-4 Principles of Macroeconomics  
MATH 152-3 Calculus II  
MATH 251-3 Calculus III  
STAT 270-3 Introduction to Probability and Statistics  
STAT 285-3 Intermediate Probability and Statistics

and one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I

and one of  
MATH 232-3 Elementary Linear Algebra  
MATH 240-3 Algebra I: Linear Algebra\*

plus two of  
BUS 207-3 Managerial Economics  
BUS 251-3 Financial Accounting  
BUS 254-3 Managerial Accounting  
ECON 210-3 Money and Banking  
ECON 290-3 Canadian Microeconomics  
ECON 291-3 Canadian Macroeconomics

plus two CMPT courses. CMPT 120 and 125 are recommended, or CMPT 126 and any other CMPT course is recommended.

plus two ENGL or PHIL courses

\*recommended

### Upper Division Requirements

Students complete both of  
ACMA 320-5 Actuarial Mathematics I  
STAT 330-3 Introduction to Mathematical Statistics

#### List 1

plus four of the following list 1 courses  
ACMA 315-3 Credibility Theory  
ACMA 335-3 Risk Theory  
ACMA 425-3 Actuarial Mathematics II  
ACMA 445-3 Loss Models: Estimation and Selection  
STAT 450-3 Statistical Theory

#### List 2

plus four of the following list 2 courses (at least one must be ACMA 465, 470 or 475)  
ACMA 395-3 Special Topics in Actuarial Science  
ACMA 465-3 Mathematics of Demography  
ACMA 470-3 Property and Casualty Insurance  
ACMA 475-3 Theory of Pension  
ACMA 490-3 Selected Topics in Actuarial Science  
ACMA 495-3 Directed Studies in Actuarial Science  
BUS 312-4 Introduction to Finance  
BUS 315-4 Investments  
BUS 316-3 Derivative Securities  
BUS 360-3 Business Communication  
BUS 410-3 Financial Institutions  
BUS 413-4 Corporate Finance  
BUS 419-3 Advanced Derivative Securities  
ECON 301-4 Intermediate Microeconomic Theory  
ECON 305-5 Intermediate Macroeconomic Theory  
MACM 316-3 Numerical Analysis I  
MATH 308-3 Linear Programming

MATH 310-3 Introduction to Ordinary Differential Equations  
STAT 350-3 Linear Models in Applied Statistics  
STAT 380-3 Introduction to Stochastic Processes

Certain elective courses are pre-approved courses for Valuation by Educational Experience (VEE) units from the Society of Actuaries. Information is available at [www.soa.org](http://www.soa.org)

To satisfy Faculty of Science requirements, students complete additional upper division credit to total 44 units. Job practicum courses, STAT 302 and 403 may not be used to fulfil this requirement. Under University regulations, students must complete at least 120 units to receive the major degree.

## Statistics Major Program

### Lower Division Requirements

#### Computing Science

Students complete one of  
CMPT-125-3 Introduction to Computing Science and Programming II  
CMPT 126-3 Introduction to Computer Science and Programming

#### Mathematics

Students complete one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences  
MATH 157-3 Calculus for the Social Sciences I

plus one of  
MATH 152-3 Calculus II  
MATH 155-3 Calculus II for the Biological Sciences  
MATH 158-3 Calculus for the Social Sciences II

plus one of  
MATH 232-3 Elementary Linear Algebra  
MATH 240-3 Algebra I: Linear Algebra\*

and students must also complete  
MATH 251-3 Calculus III

#### Statistics

Students complete both of  
STAT 270-3 Introduction to Probability and Statistics  
STAT 285-3 Intermediate Probability and Statistics

\*recommended

### Upper Division Requirements

Students complete all of  
STAT 330-3 Introduction to Mathematical Statistical  
STAT 350-3 Linear Models in Applied Statistics  
STAT 402-3 Generalized Linear and Nonlinear Modelling  
STAT 410-3 Statistical Analysis of Sample Surveys  
STAT 430-3 Statistical Design and Analysis of Experiments  
STAT 450-3 Statistical Theory

plus four additional upper division courses labelled ACMA, MACM, MATH or STAT, excluding STAT 301, 302 and 403.\*

\*consult a departmental advisor before selecting these courses. It is recommended that the four additional upper division courses be selected from STAT 300, 380, 400, 460, 490, 495 and MACM 316. For honors, these four may not overlap with those used to satisfy the *Additional Mathematics Requirements* and the *Additional Statistics Requirements* as stipulated below.

### Minor Program Requirement

Students are required to complete a minor in a discipline other than statistics. The certificate in actuarial mathematics may fulfil this requirement.

## Actuarial Science Honors Program

See the University and Faculty of Science regulations for required total units and cumulative grade point average (CGPA), and upper division units and upper division grade point average (GPA) for graduation in this program.

Honors students must complete

- the lower and upper division requirements for the Actuarial Science major program (see "Actuarial Science Major Program" on page 207)
- the upper division requirements in list 1 for the Actuarial Science major (see "List 1" on page 207)
- seven list 2 courses in the upper division requirements for the Actuarial Science major program (see "List 2" on page 207). At least two of these seven courses must be from ACMA 465, 470, 475 or 490.

## Statistics Honors Program

A bachelor of science with honors in statistics requires 132 units. Please see "Requirements for Major" on page 181 for further breadth, upper division credit, and other requirements.

In addition to the statistics major program's lower division, upper division and minor program requirements (see above), candidates for a statistics honors degree must complete the following.

### Additional Mathematics Requirements

Students complete all of  
MATH 242-3 Introduction to Analysis  
MATH 320-3 Advanced Calculus of One Variable  
MATH 322-3 Complex Variables

plus one of  
MATH 338-3 Advanced Linear Algebra  
MATH 340-3 Algebra II: Rings and Fields  
MATH 341-3 Algebra III: Groups

### Additional Statistics Requirements

Students complete all of  
STAT 380-3 Introduction to Stochastic Processes  
STAT 460-3 Decision Analysis and Bayesian Inference

## Statistics Minor Program

Statistics minor candidates are subject to the general regulations of the faculty in which they are enrolled. In addition, students will be required to obtain credit for the following courses.

### Mathematics Requirements

Students complete one of  
MATH 150-4 Calculus I with Review  
MATH 151-3 Calculus I  
MATH 154-3 Calculus I for the Biological Sciences  
MATH 157-3 Calculus for the Social Sciences I

and one of  
MATH 152-3 Calculus II  
MATH 155-3 Calculus II for the Biological Sciences  
MATH 158-3 Calculus for the Social Sciences II

and one of  
MATH 232-3 Applied Linear Algebra  
MATH 240-3 Algebra I: Linear Algebra

and students must also complete  
MATH 251-3 Calculus III

### Statistics Requirements

Students complete both of  
STAT 270-3 Introduction to Probability and Statistics  
STAT 285-3 Intermediate Probability and Statistics

and at least five of the following courses.  
ACMA 315-3 Credibility Theory and Loss Distributions

ACMA 320-3 Actuarial Mathematics I  
ACMA 335-3 Risk Theory  
ACMA 445-3 Survival Models  
ACMA 490-3 Special Topics in Actuarial Science  
STAT 300-3 Statistics Communication  
STAT 330-3 Introduction to Mathematical Statistics\*  
STAT 350-3 Linear Models in Applied Statistics\*  
STAT 380-3 Introduction to Stochastic Processes  
STAT 400-3 Data Analysis  
STAT 402-3 Generalized Linear and Nonlinear Modelling  
STAT 410-3 Statistical Analysis of Sample Surveys  
STAT 430-3 Statistical Design and Analysis of Experiments  
STAT 450-3 Statistical Theory  
STAT 460-3 Decision Analysis and Bayesian Inference  
STAT 490-3 Special Topics in Probability and Statistics  
STAT 495-3 Directed Studies in Probability and Statistics

\*these core courses are recommended

## Certificate in Actuarial Mathematics

This program provides the mathematical and statistical background for the Society of Actuaries early examinations. Students must already have completed MATH 151, 152 or their equivalents and have knowledge of one programming language.

To obtain the certificate, four lower division courses and eight upper division courses must be completed including all of

ACMA 210-3 Mathematics of Compound Interest  
MATH 232-3 Elementary Linear Algebra  
STAT 270-3 Introduction to Probability and Statistics  
STAT 285-3 Intermediate Probability and Statistics

A 2.50 grade point average (GPA) is required on the eight required upper division courses. These eight courses must be chosen from the list below and must include

ACMA 320-5 Actuarial Mathematics I  
and at least four of  
ACMA 315-3 Credibility Theory and Loss Distributions

ACMA 335-3 Risk Theory  
ACMA 395-3 Special Topics in Actuarial Science  
ACMA 425-3 Actuarial Mathematics II  
ACMA 445-3 Survival Models  
ACMA 490-3 Selected Topics in Actuarial Science  
ACMA 495-3 Directed Studies in Actuarial Science

and at least one of  
MACM 316-3 Numerical Analysis I  
MATH 308-3 Linear Programming  
STAT 330-3 Introduction to Mathematical Statistics  
STAT 350-3 Linear Models in Applied Statistics

Degree holders may receive waivers and/or transfer credit. In all cases, a minimum of nine courses is required while in the certificate program. At least six courses must be completed at Simon Fraser University, of which a minimum of four must be ACMA courses. The graduation GPA will be calculated based only on courses completed at Simon Fraser University.

No student may complete, for further credit, any course offered by the Department of Statistics and Actuarial Science which is a prerequisite for a course the student has already completed with a grade of C- or higher, without permission of the department.

## Management and Systems Science Program

Please see "Management and Systems Science Program" on page 195 for information.

## Co-operative Education

This program integrates work experience with academic study. See "Co-operative Education" on page 212 and consult early with the co-op co-ordinator, Mr. E. Simons, at [esimons@sfu.ca](mailto:esimons@sfu.ca).

## Surrey Science Cohort Programs

Simon Fraser University Surrey, Central City,  
250–13450 102nd Avenue, Surrey, BC V3T 0A3,  
778.782.7486 Tel, 778.782.7488 Fax,  
[www.surrey.sfu.ca/science](http://www.surrey.sfu.ca/science)

Advisor

Mrs. N. Williams BA (S Fraser), 14th floor Central City, 778.782.7486

### Science Year One Program

This cohort program, offered at the Surrey campus, provides a solid foundation for those interested in a science major program offered by any faculty. The program provides a viable avenue to complete the prerequisites for various professional programs such as medicine, optometry, dentistry, pharmacy, veterinary medicine, naturopathic medicine, chiropractic, and dental hygiene. The admission requirements are the same as those of the Faculty of Science. However, students who were admitted to other Simon Fraser University faculties may also enrol, should space allow, but may be required to complete additional courses to augment a deficiency.

This is a full-time two term program beginning in fall.

The program is organized by Faculty of Science disciplines. A list of courses, offered by the program, is published in the fall for future fall and spring terms. For planning, see [www.surrey.sfu.ca/science](http://www.surrey.sfu.ca/science).

Students are free to complete other Simon Fraser University courses (offered at any campus or by distance education) provided that those courses do not conflict with the Science Year One Program.

Students complete both full time Science Year One Program terms before they are eligible to transfer to any other Simon Fraser University program.

The program advisor may approve a modification of the program requirements when appropriate. For example, a student who enters with advance credit for MATH 151 may substitute an elective course offered at Simon Fraser University Surrey. Consult the program advisor for advice.

Students without a declared major are encouraged to discuss their academic goals with the program advisor during their first term.

Students will complete biological sciences and chemistry laboratory sessions at the Burnaby campus.

### Life Sciences Year Two Program

This program, offered at Simon Fraser University Surrey, consists of 200 division science courses in biological sciences (BISC), chemistry (CHEM), molecular biology and biochemistry (MBB) and statistics (STAT). The courses, completed over two consecutive terms (fall and spring), are useful for students intending to major in either biological sciences or molecular biology and biochemistry. The program will also aid those students who wish to apply to professional schools in dentistry, medicine, pharmacy, optometry, veterinary science, and other life sciences areas.

Students who have completed appropriate courses in the Science Year One Program (see "Surrey Science Cohort Programs" on page 208) are guaranteed admission to the Life Sciences Year Two Program.

Other students who have completed appropriate prerequisites by the fall of program admission will be admitted to the Life Sciences Year Two Program depending on available space.

A list of courses, offered by this program, is published in the fall for future fall and spring terms. For planning purposes, this can be viewed at [www.surrey.sfu.ca/science](http://www.surrey.sfu.ca/science).

Students are required to enrol in at least two of the courses offered in this program each term.

Students are free to complete other Simon Fraser University courses (offered at any campus or by distance education) provided that those courses do not conflict with the program.

Note that the lab courses CHEM 126 and 286, and the laboratory component of CHEM 281 use the laboratory facilities at the Burnaby campus because

suitable facilities are not yet available at Simon Fraser University Surrey.

After completion of this program, students will continue their studies as students in the faculty to which they were originally admitted.

Students without a declared major are encouraged to discuss their long term academic goals with the program advisor during their first term.

## Part Time Credit Study

### SFU NOW: Nights or Weekends

SFU NOW provides flexible, part-time study leading  
to a degree for working adults through regular Simon  
Fraser University courses offered in the evenings and  
on weekends. For further information regarding  
admissions or enrolment processes, please visit  
www.sfu.ca/cstudies/sfunow or call 778.782.8655.

Students seeking day or evening study for degree  
credit on a part-time basis are governed by the same  
regulations, have the same privileges, and follow the  
same admission and enrolment procedures as  
full-time students. Consult relevant sections of this  
Calendar concerning policies and procedures for  
admission, enrolment, academic programs available,  
program requirements, and current fees. Specific  
details for individual credit programs are available  
from faculties and departments. Students pursuing  
certificates, diplomas, or minors in the evenings at  
Simon Fraser University Surrey, or at Simon Fraser  
University Vancouver should consult academic  
advisors at the Academic Resource Office (Burnaby  
campus), or Information and Registration Services  
(Simon Fraser University Vancouver) or Registrar and  
Information Services (Simon Fraser University  
Surrey), or with the certificate or diploma program  
advisor regarding course availability. Course  
scheduling is available on request at Simon Fraser  
University Vancouver, or Simon Fraser University  
Surrey, please call 778.782.5134.

### Integrated Studies

Sponsored by the Faculty of Arts and Social  
Sciences, Integrated Studies (IS) programs are  
part-time interdisciplinary degree completion  
programs leading to a bachelor of general studies.  
Recognizing and building upon work experience and  
other post-secondary education, the cohort-based IS  
programs differ significantly from typical  
undergraduate programs. They are specifically for  
mid-career adults to complete undergraduate degrees  
in a respectful and intellectually challenging  
environment.

### Liberal and Business Studies

This program's part-time curriculum integrates the  
broad perspectives of a liberal arts education with  
substantial business administration skills. The  
three-year (nine-term) program is offered at Simon  
Fraser University Vancouver and Simon Fraser  
University Surrey on alternate Fridays and Saturdays,  
six times each term. The application deadline for the  
September intake is March 1st. Visit www.sfu.ca/  
integratedstudies or call 778.782.8655.

## Special Audit Student

The course category enables community members to  
access University credit courses as auditors. Those  
interested in completing regular courses but don't  
meet the general admission requirements, or who do  
not desire University admission, may apply as special  
audit students to attend courses. They do not write  
final exams or receive degree credit, records of

attendance, or statements of standing. Obtain a  
special audit application from the Burnaby campus'  
Academic Resource Office, Information and  
Registration Services at Simon Fraser University  
Vancouver, Registrar and Information Services at  
Simon Fraser University Surrey, or from Continuing  
Studies. The form must be signed by the instructor  
during the second week of classes. Special audit fees  
(payable at the Academic Resource Office or  
Information and Registration Services) are calculated  
at one half the normal course fee. Designated seniors  
credit courses are not eligible for special audit.  
Special audit students may not change enrolment  
status after the term begins.

## Seniors Program

This program is an integral part of the University's  
commitment to "help adults achieve their intellectual,  
professional and cultural goals through programs for  
lifelong learning that build on the strengths of the  
University and the resources of the community." Now  
in its 35th year, it offers up to 20 challenging  
non-credit courses at the Vancouver campus. Open to  
anyone 55 years of age and older regardless of  
educational background, courses meet once a week  
during mornings or early afternoon for two hours, and  
run for 7-10 weeks. New courses begin in September,  
January and May. In addition, a seniors program  
non-credit certificate in the liberal art is available.

Senior citizens are also invited to apply for University  
admission to complete courses leading to a degree.  
Once admitted, courses may be completed one at a  
time or through a full course load at any campus. A  
Senior Citizens Certificate is available for those who  
complete 30 units. All credit courses count toward a  
university degree. For full details, please visit our  
website at www.sfu.ca/seniors, or call 778.782.5212.

## Services

### Office of International Development

Through its development projects and programs, this  
office builds sustainable global partnerships. It offers  
support in project identification, preparation,  
management, implementation, and consultancy  
services and tailor-makes contract training programs  
and study tours for international audiences at home or  
abroad. Visit www.sfu.ca/cstudies/international or  
contact 778.782.3987 for more information.

### Research and Evaluation Unit

The unit provides a range of research and evaluation  
services to University program areas and to  
community organizations and businesses.  
Customized courses and workshops in organizational  
research and evaluation techniques are also  
available. Visit www.sfu.ca/cstudies/eval.htm or  
contact 778.782.5071.

### 7th Floor Media

Established in 1987, 7th Floor Media partners with  
local, national and international organizations to  
create compelling educational and cultural content  
applications for interactive media. The unit's focus is  
researching models for effective and engaging  
technology-enhanced learning in both traditional and  
non-traditional educational settings. Visit  
www.7thfloormedia.com or contact 778.782.5271.

## Centre for Online and Distance Education

The centre, working in partnership with academic units, offers courses leading to majors, minors, certificates, diplomas and course work in various degree programs. Students may complete some programs through distance/online study.

The centre offers courses and programs in archaeology, biological sciences, communication, sustainable community development, computing science, contemporary arts, criminology, education, First Nations studies, geography, gerontology, history, humanities, kinesiology, linguistics, philosophy, political science, psychology, sociology and anthropology, statistics, women's studies, and various language courses.

The centre's courses are governed by the same regulations and follow the same admission and enrolment procedures as other university credit courses. Students can enrol in day, evening or distance/online courses, or a combination. For information, visit [www.sfu.ca/cde](http://www.sfu.ca/cde), e-mail [codehelp@sfu.ca](mailto:codehelp@sfu.ca) or telephone 778.782.3524; 1.800.663.1411 (toll free in Canada).

## Non-credit Certificates, Diplomas and Courses

In addition to degree credit, Continuing Studies offers certificates, diplomas and non-credit courses in a variety of disciplines. Developed in association with faculty and professional organizations, and adding to the richness of Continuing Studies' range of courses, workshops and seminars, these programs extend university expertise to the community and bring community knowledge and priorities to the university.

### Certificate Programs

#### Business Analysis

This 18-day certificate has been designed to equip participants with the analytical skill set required for gathering, validating, communicating, documenting and testing business requirements as well as the effective development and implementation of business processes. Courses will cover gap analysis, stakeholder analysis, vendor evaluation analysis, business process modeling, and a number of techniques to document requirements and create business cases. Participants will be able to share ideas and will enhance their business analysis knowledge, including their non-technical skills.

#### Business Writing, Public Relations and Marketing Communication

Designed with the business writer in mind, this program teaches the skills to prepare business documents, from marketing materials to position papers, and from speeches to advertising copy.

#### Career Development Practitioner

These programs (part-time and full-time) prepare graduates to facilitate, implement and plan career development programs for clients with vocational needs. Students will perform tasks such as leading job-finding clubs, developing job placements, providing employment counselling and designing new programs. Graduates will meet the training requirements for international certification as a global career development facilitator (GCDF). This curriculum follows the Canadian standards and guidelines for career development practitioners.

#### Editing

Designed to assist participants to sharpen their eye, clarify their thoughts and learn to write, edit and proofread copy efficiently, this program provides participants with the skills, knowledge and confidence needed to effectively bridge the distance between writers, publishers and readers.

### English Language and Culture

This program, for participants with first languages other than English, emphasizes English speaking, listening, reading and writing skills while gaining a working knowledge of the Canadian cultural context. Participants focus on developing effective English communication skills whether they are international students seeking entrance to a Canadian university, or working professionals pursuing their career path.

### Management

This intensive, part-time program is for individuals to develop their professional skills and master management concepts and techniques. Courses can be completed individually, as well as applied toward the certificate. Students enrolled in the Certificate Program in Management may consider concurrently earning designations with various professional associations, including the Canadian Institute of Management, the Insurance Institute of Canada, the Risk and Insurance Management Society, and the Purchasing Management Association, among others.

### Publishing

Participants work through the fundamentals that are important to all aspects of publishing: writing, editing, proofreading, design, production, and process.

### Sustainable Community Development

Traditional development and growth has come at a price: resource depletion, environmental degradation, climate change, social instability and inequity. A more sustainable approach is required. The certificate in sustainable community development addresses the confusion and ideology around sustainability enabling participants to become effective champions of sustainable development initiatives and projects in their communities. The non-credit program, jointly offered by the Centre for Sustainable Community Development and The City Program, targets a mid-career professional audience. Instructors are leading sustainability experts and practitioners from interdisciplinary backgrounds.

### Technical Communications

Technical communications are an essential component of the *high tech* sector in the creation of documents used to train and support software and hardware users. Also essential in other business sectors and government, technical communicators produce training materials, policy and procedure manuals, and other organizational documents.

### Urban Design

This interdisciplinary program features two- and three-day intensive courses taught by leading urban design practitioners. The program includes theory and practice through lectures, site visits, case studies, group projects, and assignments which enhance mid-career urban design skills. Drawing on the expertise of architects, landscape architects, planners, engineers, economists, sociologists, real estate professionals, lawyers, and the collective knowledge and experiences of the public, this program encourages interdisciplinary discussion on current western Canadian urban design issues.

### The Writer's Studio: Certificate in Creative Writing

Through a blend of courses, readings and working with mentors one-on-one and in groups, this program emphasizes learning in community with other local writers and provides opportunities to develop and finish a significant portion of a manuscript. Participants work on the editorial, design, and production of *Emerge*, an anthology of student work.

### Diploma Programs

#### Diploma in Advanced Interpretation

This program is a multidisciplinary and interdisciplinary program in which student interpreters develop an understanding of cross cultural communication, international politics and economies,

institutional structures and dynamics, social and cultural studies, and linguistic skills. Students have the opportunity to perform interpretation at a variety of public and private sector institutions.

### Advanced Project Management and Development

This comprehensive program for mid-level professionals broadens project management and development training. It provides an overview of the project management life cycle, giving participants exposure to concepts and skills such as developing the project concept, building the business case, creating successful teams, assessing technology options, supporting the project environment and setting up a project management office.

### Diploma in Dialogue and Negotiation

An interactive, experiential program led by experienced faculty, this nine-month program is for mid-career professionals from diverse sectors charged with leading change through negotiating agreements, developing policies and programs and managing conflict. Participants will learn to design and implement agreement-seeking processes.

### Management Skills in Advanced Technology

This program covers the essential skills and knowledge required of managers in technically oriented businesses, and includes study of the principles of human and organizational behavior, resource allocation, demand forecasting, economic and financial analysis, project management, sales and marketing, eBusiness strategies, operations, business planning, writing and public speaking.

### Rehabilitation Management

This program is aimed at individuals working in the health care community who wish to expand or complement their educational background and/or practical expertise. It uses theoretical and practical hands-on activities to deliver a broad-based series of modules in the field of rehabilitation management.

## Non-credit Certificates, Diplomas and Courses

Continuing Studies offers a broad variety of unique non-credit courses, and certificate and diploma programs frequently generate new, complementary short courses, workshops and seminars. All non-credit short courses, workshops, seminars, colloquia, conferences, round-tables and dialogues are developed with the approval and sponsorship of an academic department or academic advisory committee. Most programs have external partners from the public and private sectors, all levels of government and community groups.

The following are the non-credit programs.

Chinese/Korean programs  
City Program  
community education programs  
community outreach and engagement programs  
continuing health education  
Dialogue programs  
English language and culture program  
interdisciplinary programs  
interpretation and translation program  
international teaching assistants seminars  
language programs  
management and professional programs  
Project JAPAN  
science programs  
Seniors Program  
Writing and Publishing Program

For more details about Continuing Studies non-credit courses, visit [www.sfu.ca/cstudies](http://www.sfu.ca/cstudies).

Simon Fraser University has consistently placed  
within the top five comprehensive Canadian  
universities as ranked by Macleans Magazine. All  
undergraduate Simon Fraser University programs  
have a co-operative education option. A complete list,  
including specific disciplines, is available at  
http://www.sfu.ca/wil/sfuprograms.

## Explore Co-operative Education

In the Co-operative Education Program (co-op)  
students alternate between study terms and paid  
work terms to gain relevant, real-world experience  
before graduation and the advantage to help them  
succeed after university.

A sample outline of a co-op student's academic and  
work schedule is provided below. See "Sample  
Work/Study Sequence" on page 213.

## Admission Requirements

All Canadian citizens, permanent residents, and visa  
students are eligible to participate in the co-op

program. Visa students are eligible for work permits  
which are only valid for co-op employment arranged  
through the co-op program.

Co-op is an optional program, except in the School of  
Engineering Science where it is mandatory within the  
program's structure (see "School of Engineering  
Science" on page 82).

Acceptance into the co-op employment process is  
based on academic performance and entry interviews  
where motivation, interpersonal, and communication  
skills are evaluated. Students must normally have  
45-60 units and a CGPA of at least 2.5 before  
participating in the co-op employment process,  
however all students are admitted on an individual  
basis and the requirements may be flexible.

## Application Procedure

All students (except those in engineering science)  
must apply for admission to the co-op program.  
Students are encouraged to attend an information  
session that is offered at the beginning of every term.  
Visit [www.sfu.ca/coop/apply](http://www.sfu.ca/coop/apply) to view session dates.

After attending an information session, students  
complete the general co-op application form which is  
available at [www.sfu.ca/coop/apply](http://www.sfu.ca/coop/apply).

All students complete the co-op curriculum course  
Bridging Online (BOL), (except those in engineering  
science). Visit [www.sfu.ca/coop/bol](http://www.sfu.ca/coop/bol) for details.

Students are encouraged to contact appropriate  
co-op co-ordinators in their faculty area as early in  
their university career as possible, but no later than  
two terms prior to the first work term.

## Transfer Students

Transfer students should contact the co-op office as  
soon as possible and must complete at least one  
study term before engaging in a work term. Students  
transferring from an approved accredited co-op  
program elsewhere, and who have successfully  
completed work terms, will receive transfer credit for  
those work terms. However, 50% of the student's  
degree program, including work terms, must be  
completed at Simon Fraser University.

## The Employment Process

Once accepted into the co-op program and the  
required Bridging Online curriculum is complete, the  
student can then participate in the employment  
competition. Job opportunities are identified and  
posted through co-op. Students select those for which  
they wish to compete and an interview may ensue. If  
an employment offer is made, the student may accept  
or decline based on contractual obligations and ethics  
associated with progression in the employment  
process. These obligations are made clear to all  
participants at each point in the employment process.

Once the student accepts an employment offer, they  
are required to fulfil that work term obligation and they  
must be enrolled in a co-op practicum course.

Application form submission and/or participation in  
the employment competition indicates a commitment  
to the program and acceptance of the following:

- permission for release to prospective employers of  
copies of transcript
- agreement to enrol in the appropriate co-operative  
education course
- agreement to inform Simon Fraser University of the  
acceptance of any co-op employment position

- agreement to complete the co-op education  
program
- all accepted students are responsible for following  
the policies and procedures outlined in the *Co-op  
Student Handbook* that is posted on the web at  
[www.sfu.ca/coop/student\\_handbook.html](http://www.sfu.ca/coop/student_handbook.html).

## Operation of the Program

The co-op program staff facilitate all pre-employment  
student preparation, negotiate work terms, meet  
employers to establish employer needs, and meet  
with students to monitor progress. They oversee job  
competition and visit students on the job, counsel and  
advise students, and deal with special problems.

## Self-Directed Work Search

Students may also find or create their own work  
terms, locally or abroad. Guidance is provided.  
Self-initiated jobs must be approved by co-op in  
advance of the work term. Students are required to  
enrol in and pay for the appropriate co-op practicum.

## International Opportunities

Students may travel internationally to complete a work  
term. Contact the international co-op co-ordinators at  
[icoop@sfu.ca](mailto:icoop@sfu.ca) for more information.

## Sample Schedule(s)

The next page shows two sample work term and  
study patterns (see "Sample Work/Study Sequence"  
on page 213). An alternating sequence, beginning  
before year three, provides the best learning  
structure. Other combinations can be arranged to  
meet student and employer needs. Students may not  
normally complete their final term at Simon Fraser  
University on a co-op work term.

## Additive Credits

The co-op courses are deemed to have additive  
credit. These units do not count toward the total units  
required for the degree.

## Fees

There is a one-time co-op application fee, with a  
co-op work term course fee charged for each four  
month work practicum in which the student enrolls.  
These fees are tax deductible. For information, see  
"Undergraduate Fees" on page 33.

## Degree Designation

Four work terms must be successfully completed for a  
degree with a co-op designation. Successful  
completion includes a passing grade (comprised of  
both a work project evaluation and performance  
evaluation) and compliance with minimum standards  
of participation. (A work term typically consists of full  
time employment for 13-16 weeks.)

## Certificate Option

Students (except those in engineering science) who  
successfully complete three work terms are eligible  
for a certificate of completion. The same performance  
criteria as noted above are required for the certificate  
option. Students who receive a certificate do not  
receive recognition on their diploma, nor are they  
eligible for further work terms in their current program.

UNDERGRADUATE

# Undergraduate Semester in Dialogue

3309 Simon Fraser University Vancouver, 515 West Hastings Street, Vancouver, BC V6B 5K3, 778.782.7893 Tel, 778.782.7892 Fax, www.sfu.ca/dialogue/undergrad, ugsid@sfu.ca

## Director

M.L. Winston BA, MA (Boston), PhD (Kansas)

## Assistant Professor

J. Moore BSc (Br Col), MSc (McG), PhD (Br Col)

The Undergraduate Semester in Dialogue provides a unique opportunity to affirm the role of a university to educate students into productive, creative, well-balanced, thoughtful, and reflective members of society.

The full time, one term, 15 credit Undergraduate Semester in Dialogue will provide intensive

mentoring, strong emphasis on communication skills, an ability to think critically and evaluate effectively, a perspective that encourages discipline bridging, and an opportunity to learn from, and network with, stimulating and accomplished individuals from off-campus.

Each term's program will consist of a core course (DIAL 390W) that will be similar for each offering, and individual topics varying with each offering that are focussed on a subject that encourages broad interdisciplinary approaches (DIAL 391W and 392W).

Admission to the program will be by application. Students should consult with their department prior to their Dialogue term to determine the application of DIAL units to fulfil major, minor or elective course requirements. All three courses must be completed

simultaneously. Prospective students should apply eight months prior to the Dialogue program in which they wish to participate. Admission decisions will be made no later than four months prior to program start. A course outline for each offering of DIAL 390W, 391W and 392W will be available prior to the application deadline.

## Admission Requirements

Students must have completed 45 units prior to beginning the Dialogue program. Individual courses may have other prerequisites. Application forms, information about course content, and other information are available from the program office.

These courses also are eligible to fulfil electives in post baccalaureate diploma programs.

# International Learning Opportunities

SFU International, 1200 Maggie Benston Student Services Centre, 778.782.4232 Tel, 778.782.5880 Fax, [sfu\\_international@sfu.ca](mailto:sfu_international@sfu.ca), [www.sfu.ca/international](http://www.sfu.ca/international)

SFU International is responsible for co-ordinating Simon Fraser University's international activities.

## SFU International

SFU International should be the international student's first stop after moving into accommodation. We offer programs and services such as

- orientation programming for all new international and exchange students
- non-academic advising concerning student visas, employment regulations, and academic and cultural transition issues
- assistance for exchange students with course enrolment
- information about health insurance
- a mentorship program to support personal and cultural transition while fostering intercultural understanding as well as friendships
- workshops and social events to enhance the university experience
- referrals to other services and resources both on and off campus

All international and exchange students, visiting scholars, faculty, and their families are encouraged to contact us. For more information about resources that are available to international students, please visit <http://www.sfu.ca/international>.

## International Exchange Programs

Third and fourth year students may apply for a student exchange. With planning, courses may be used toward a Simon Fraser University degree, and need not extend a student's period of study. Simon Fraser University has over 100 exchange relationships in more than 40 countries around the world and in Canada.

A student may, with the approval of his/her major department(s), undertake a maximum of 30 lower or upper division exchange units while participating in the program. Students who have transferred to Simon Fraser University may count the 30 exchange units in addition to any transfer credit previously awarded.

Formal exchange program students may receive exchange credit for approved courses completed at the host university with a passing grade.

See "International Program" on page 33 for information about international program fees.

### Eligibility for Undergraduate Exchanges

Participants on all exchanges must meet certain academic and residency requirements. All domestic and international exchange participants must

- have completed 36 units (prior to application) with a minimum of 12 units completed at Simon Fraser University prior to application
- have been approved in a program specialization (for example, a major or minor)
- have achieved a minimum 2.67 grade point average in the last two terms (minimum 24 units) or higher as required by partner institutions
- be registered as a Simon Fraser University student at the time of application

The residency requirement for completing a credential at Simon Fraser University may include up to 15 exchange units.

## Field Schools

A field school is a full term program led by a Simon Fraser University faculty member for seven to 12 weeks in the field with some Simon Fraser University course work prior to departure. Field school participants can earn nine to 12 Simon Fraser University units toward their degree and grade point average. All applicants should

- be 19 years of age or older on the day of departure
- have completed 30 units prior to application
- have a minimum 2.5 grade point average

Additional requirements may apply.

For a complete list of exchange destinations, field school details, information sessions, deadlines and application information, visit [www.sfu.ca/international](http://www.sfu.ca/international)

All field schools are subject to cancellation due to insufficient enrolment, departmental funding and availability of instructors, or safety issues in the destination country.

## Czech Republic

### Humanities Field School

summer 2009; offered annually; seven weeks abroad; 11 units completed

This field school in Prague provides in-depth study of European society and culture, literature, art, film and contemporary politics seen through the window of the Czech Republic. The program includes courses in language, film and art history, and political science.

## Fiji

### Archaeology Field School

summer 2010; offered biennially; seven weeks abroad; 12 units completed

This program consists of formal course work at Simon Fraser University and the University of the South Pacific, followed by archaeological field training at excavation sites at the Sigatoka Sand Dunes National Park, one of the most important archaeological sites in Oceania, on the Coral Coast of Viti Levu. Participants will have the opportunity to tour other archaeological sites on Viti Levu as well as to experience the beauty of Fiji and its diverse cultures. Courses will be taught by faculty from Simon Fraser University and the University of the South Pacific.

## France

### Literature and Civilization Field School

summer 2011; offered biennially; seven weeks abroad; nine units completed

Students participating in this field school will spend seven weeks in Tours, France, where they will complete courses in French literature, culture and civilization. In addition to course work, students will have opportunities to participate in a number of cultural activities to enhance the educational experience. They will discover the region through its architecture, cuisine and fine arts. Activities may include cooking classes, theatre performances and local chateaux and winery visits. The program will conclude with four days in Paris.

## Ghana

### Contemporary Arts Field School

summer 2009; offered biennially; eight weeks abroad; 12 units completed

Students explore the development and nature of traditional West African societies, language, family, clans, lineage, gender, marriage, birth, the individual, education, religious/ceremonial, political, and

occupational and economic systems, and values in specific African cultures. They will also be exposed to various West African dance and music styles, forms and structures and their cultural significance. There will be opportunities to interact with local communities, artists and academics, thereby gaining a unique, integrated learning experience with performing and cultural arts in Ghana.

## Greece

### Hellenic Studies Field School

summer 2009; offered annually; 7 weeks abroad; 12 units completed

Students will begin their Greek journey in Athens, Greece's capital, with an exhilarating trip through Plaka to the truly majestic ancient Acropolis. Led by local experts, students will interactively learn Greece's history and culture. Students will spend the remainder of their time on the island of Lesbos, the third largest island on the east coast of Greece. This scenic island, rich with Byzantine, Ottoman and Roman history, is perched between Northern Greece and Turkey on the crystal waters of the Aegean Sea.

## India

### Contemporary Arts Field School

fall 2009; offered biennially; seven weeks abroad; 11 units completed

India offers every visitor a vivid kaleidoscope of landscapes, magnificent historical sites and royal cities, as well as a rich mix of cultures, traditions and artistic innovations. This Field School offers every participant a broad introduction to the Arts and Culture of Contemporary India. Jawaharlal Nehru University (JNU) in New Delhi will be the host university and students will participate in a variety of field trips including several days in Varanasi, India's holiest city, and two weeks in Mumbai, the epicenter of film in India. The program will provide a compelling canvas upon which to discover the Arts and Culture of this great nation and will be a marked non-traditional learning experience for all involved.

## Indonesia

### Environmental and Ecological Education Field School

fall 2010; offered biennially; nine weeks abroad; 12 units completed

From volcano geology to highland agriculture studies to coral reef ecology, students can look forward to a range of course work about the environment. With the current trends in sustainable development, this field school will develop students' environmental perspectives through hands-on field work in an international setting. This program is for students who wish to pursue teacher training, specifically by exploring the environment in relation to international education. Participants will be introduced to methods for promoting environmental and ecological thinking across all grades and all subject areas.

## Italy

### English Field School

fall 2010; offered biennially; eight weeks abroad; 11 units completed

After three weeks of preparatory work on the Burnaby campus, this field school moves for eight weeks to Prato, Italy, which is a city about 15 kilometers outside of Florence. The field school program is centered on the cultural consequences of the Black Death of the mid-fourteenth century. To do this, students engage in interdisciplinary projects while working with the

literature, history, and art of Italy, all of which significantly influenced international European culture, especially the culture of England. The program's goal is to consider one striking example of the ways culture and its institutions adjust, respond and change in times of grave crisis.

**Interactive Arts and Technology Field School**  
summer 2009; offered annually; seven weeks abroad; 15 units completed

This innovative field school, comprised of a team of 12 undergraduate student researchers, will travel to Italy to study and interview design firms and companies across the country. This experience will expose students to the great masters of design, and to diverse theories and application of the design process. Students will apply their knowledge to tangible projects while in Italy, and will spend the fall term analyzing and publishing their work.

## Mexico

**Communication/CPROST Field School**  
spring 2010; offered during the Olympic Games class break (February 13-27, 2010); two weeks duration; four undergraduate units or five graduate units completed

Recent scholarship has shown that there is a strong relationship between technology and culture in the development of industrial clusters. In North America, with a few exceptions, culture is not a major component of the economic life of regional industrial clusters. Mexico has a far more vibrant, and long-established tradition of culture embedded in regional economies. The purpose of this field school is to explore the interrelationships among cultural industries, conventional manufacturing and technology-based industries. Guadalajara, in the state of Jalisco, has a complete spectrum of these industrial clusters, and will be the base for this field school.

## Southeast Asia

**International Studies Field School**  
spring 2010; offered biennially; eight weeks abroad; 12 units completed

This field school will include lectures, tutorials and field trips to museums, archaeological and historical sites, and rural communities. Lectures will provide an overview of society in Thailand and Vietnam with particular reference to minorities and traditional arts.

## Funding for Study Abroad

The following financial aid is available to help with the cost of international study through Simon Fraser University. See "Financial Aid and Awards" on page 36 for more information.

Dr. Rosena Davison Bursary for France Field School  
Embassy of Italy Scholarships  
Institute for the Humanities Travel-Study Award  
International Mobility Awards  
International Scholarship Program  
Barry Macdonald Award in Business Administration  
Barry and E. Anne Macdonald Asia-Canada Awards  
Mitsubishi Canada Limited Student Exchange Award  
Kelly O'Hagan Memorial Bursary  
Pacific Horizons Scholarship Irving K. Barber BC  
SFU Field School Bursary  
SFU Foreign Exchange Bursary  
SFU International Co-operative Education Bursary  
Catherine Tse Bursary for Simon Fraser University Field Schools  
Ben West Student Exchange Annual Award  
Brian Williamson Memorial Award in Archaeology

## Independent Study Abroad

Simon Fraser University students may study and receive transfer credit at institutions which do not have a formal exchange agreement. Students arrange this individually, and must also organize transfer credit using a letter of permission. Finance, tuition, academic and language requirements of the host institution must be met. Contact the host university regarding application and admission

requirements. Information regarding the process for a Simon Fraser University letter of permission (LOP) is available from Student Services (see "Courses at Other Institutions/Letters of Permission" on page 28).

## Dual Degree Programs

A unique dual degree program is offered by Simon Fraser University and Zhejiang University (ZU) in China. Participating students obtain a degree in computing science from both universities. See "Simon Fraser University – Zhejiang University Dual Degree Program" on page 79 for more information.

## Double Degree Program with Monash University, Australia

See "Double Degree Program with Monash University, Australia" on page 90.

## Kefalonia Semester Abroad Program

See "Kefalonia Semester Abroad Program" on page 90.

## International Co-operative Education

Over the past several years Simon Fraser University's International Co-operative Education program has placed students around the world on international work terms. The co-op program is open to all students from all faculties. In addition to developing partnerships with employers from government, non-profit, private and public sector organizations, co-op also offers a range of educational resources to ensure optimal learning and smooth transitions from the classroom to the workplace.

For more information, please visit <http://www.sfu.ca/coop/international> or contact the international co-op co-ordinator at [icoop@sfu.ca](mailto:icoop@sfu.ca).

## Academic Honesty

All members of the University community share the responsibility for the academic standards and reputation of the University. Academic honesty is a cornerstone of the development and acquisition of knowledge. Academic honesty is a condition of continued membership in the university community.

Academic dishonesty, like other forms of dishonesty, is misrepresentation with intent to deceive or without regard to the source or the accuracy of statements or findings. Academic dishonesty, in whatever form, is ultimately destructive of the values of the University; it is, furthermore, unfair and discouraging to the majority of students who pursue their studies honestly. Scholarly integrity is required of all members of the University.

The following examples are representative but not exhaustive of activities constituting academic dishonesty: plagiarism (presenting the work of another person as your own); submitting the same work more than once without prior approval; cheating; impersonation; submitting false records or information; stealing or destroying the work of another student; removing, mutilating, misplacing or destroying books or other library material; unauthorized or inappropriate use of computers, calculators and other forms of technology in course work, assignments or examinations.

The University code of academic honesty is contained in policy S10.02 at [www.sfu.ca/policies/students](http://www.sfu.ca/policies/students).

For more information, see "Student Appeals" on page 32.

## Penalties for Acts of Academic Dishonesty

Penalties imposed by the University for academic dishonesty may include one or more of the following: a warning, a verbal or written reprimand, reassessment of work, failure on a particular assignment, failure in a course, denial of admission or readmission, forfeiture of awards or financial assistance, suspension or expulsion from the University.

## Student Conduct

Simon Fraser University is committed to creating a scholarly community characterized by civility, diversity, free inquiry, mutual respect and individual safety. The code of student conduct is intended to define students' basic responsibilities as members of the academic community, to define inappropriate student conduct and to provide procedures and penalties to be invoked and applied if they engage in such unacceptable behavior. Each student is responsible for his/her conduct which affects the University community. The code shall not be construed to unreasonably prohibit peaceful assemblies, demonstrations or free speech.

The following activities are representative but not exhaustive of behaviors constituting misconduct: disruptive or dangerous behavior; behavior which results in damage, destruction and theft of University property or the property of any member of the University; forgery or alteration of University documents or records; misuse of University resources including information (computing) resources; unauthorized entry or presence in University premises; misuse of student disciplinary procedures.

The University code of student conduct is contained in policy S10.01 at [www.sfu.ca/policies/students](http://www.sfu.ca/policies/students).

## Penalties for Acts of Student Misconduct

Penalties imposed by the University for misconduct may include one or more of the following: a verbal or written reprimand, exclusion from specified areas of the University, restitution or other ameliorative measures, suspension or expulsion from the University.

### 1.1 Degrees Offered

Listed under each faculty.

### 1.2 Administration of Graduate Studies

#### Dean of Graduate Studies

The dean is responsible for the general supervision of graduate work at the University and chairs the senate graduate studies committee.

#### Director, Graduate Admissions and Records

The director is responsible for enrolment of students, assessment of fees, maintenance of records, and other administrative duties.

#### Committees

The committees responsible for the supervision of graduate students are the supervisory committee, graduate program committee, the faculty graduate studies committee and the senate graduate studies committee. The functions of these committees in relation to individual students are as follows.

#### Supervisory Committee (see 1.6.4)

The student's supervisory committee helps the student define and develop a program of studies and reports on the student's progress to the graduate program committee. The supervisory committee forms part of the student's final examination committee.

#### Graduate Program Committee

The graduate program committee is responsible for recommending admission, reviewing the student's progress and arranging for the supervision and examination of the student. For most graduate programs, the graduate program committee is the departmental graduate studies committee. In the Faculties of Business Administration and Education, the graduate committee is the faculty graduate studies committee.

#### Faculty Graduate Studies Committee

This committee makes recommendations to the senate graduate studies committee on such matters as awarding of degrees, examining committees for doctoral candidates, changes to established programs and establishment of new programs.

#### Senate Graduate Studies Committee

This committee has the final authority on admissions and the administration of senate regulations which concern graduate work. This committee serves as the graduate program committee for students enrolled under special arrangements.

The administrative officers of the University who are responsible for the supervision of graduate students

are the director, graduate admissions and records, and the dean of graduate studies. They and the chairs of graduate program committees are available to students for consultation.

## Graduate Studies Information

A wide range of additional information on graduate studies at Simon Fraser University may be found on the University's website at [www.sfu.ca/dean-gradstudies](http://www.sfu.ca/dean-gradstudies). In addition, most departments offer publications describing their graduate programs. These are available directly from the departments and are usually posted on the department's web sites.

### 1.3 Admission

#### 1.3.1 General

A student may seek admission to a graduate diploma, master's or doctoral program. A student who is not qualified to enter a specific program may seek admission to the University as a qualifying student under the provisions of paragraph 1.3.6.

For admission to post baccalaureate programs, refer to the undergraduate section of this Calendar.

Before applying for admission, the student should obtain information about admission requirements and procedures. This information can be obtained from the websites of departments and faculties, or by contacting the appropriate program's graduate secretary.

Applicants meeting the minimum University requirements for admission given below are not assured admission into any graduate program. Most graduate programs have admission requirements in addition to the minimum. Furthermore, programs must restrict admission to students whose interests are compatible with available resources and faculty expertise.

#### 1.3.2 Admission to a Graduate Diploma Program

The minimum University requirements for admission to a graduate diploma program are as follows:

- a bachelor's degree from a recognized university, or the equivalent;
- submitted evidence, usually references from qualified referees, of the student's ability to undertake advanced work in the area of interest.

In exceptional circumstances, a student may be admitted with lower formal qualification than in (a) when there is significant professional experience relevant to the proposed area of study.

Students must satisfy any further requirements set by the graduate program committee. Students whose native language is not English may be required to satisfy the University and the graduate program committee as to their capability in English. (See also 1.3.12.)

#### 1.3.3 Admission to a Master's Program

The minimum University requirements for admission to a master's program are as follows.

- a bachelor's degree with a cumulative grade point average of at least 3.0 from a recognized university, or the equivalent;
- submitted evidence, usually references from qualified referees, of the student's ability to undertake advanced work in the area of interest.

In exceptional circumstances, a student may be admitted with lower formal qualification than in (a) when there is significant professional experience relevant to the proposed area of scholarship.

Students must satisfy any further requirements set by the graduate program committee. Students whose native language is not English may be required to satisfy the University and the graduate program committee as to their capability in English. (See also 1.3.12).

### 1.3.4 Admission to a Doctoral Program

The minimum University requirements for admission to a doctoral program are as follows.

a) either

i) a master's degree from a recognized university, or the equivalent, or

ii) a bachelor's degree, with a cumulative grade point average of at least 3.5, from a recognized university, or the equivalent, or

iii) completion of at least 75% of the course work units required for the relevant department's master's program, with a cumulative grade point average of at least 3.5. All graduate courses, whether completed at this University or at another university, shall be considered in the calculation.

and

b) submitted evidence that the applicant is capable of undertaking substantial original research. Normally, such capability will be judged from letters of reference from qualified referees, and the completion of a master's thesis or other scholarly work.

Students must satisfy any further requirements set by the graduate program committee. Students whose native language is not English may be required to satisfy the University and the graduate program committee as to their capability in English. (See also 1.3.12.)

### 1.3.5 Admission Under Special Arrangements

Exceptionally able applicants who wish to work for a master's or doctoral degree outside or between existing programs at Simon Fraser University may apply to work under special arrangements. A student applying for special arrangements must have a well developed plan of studies in an area that can be shown to have internal coherence and academic merit, and in which the university has appropriate expertise and interest among its faculty members.

Graduate students applying or working under special arrangements are required to conform to Senate regulations for graduate students. However, there are additional regulations which concern only those applying or working under special arrangements. Enquiries about these regulations should be directed to the Dean of Graduate Studies by December 1st of each year for admission to the fall term.

Students working under special arrangements may be required to complete a selection of courses from existing programs.

#### 1.3.5.a Cohort Special Arrangements

Cohort-based special arrangements programs are designed to meet the educational needs of specific student groups in fulfilling the requirements for a master's degree where these needs cannot be met within existing programs. Each program will integrate studies from across two or more departments, schools or faculties and will involve a curriculum and requirements recommended by each program's graduate program committee and approved by the senate graduate studies committee. Students may undertake this degree program only through specific admission to the cohort program. Admission criteria,

degree requirements and any other special conditions for a particular cohort special arrangements program must be approved in advance by the senate graduate studies committee; these may not be below the minimum admission and degree requirements of regular graduate programs. In some instances, tuition fees may differ from the regular graduate fee schedule published in the Calendar, and will be announced separately.

### 1.3.6 Admission as a Qualifying Student

Normally, qualifying students will be working either to improve cumulative grade point averages in order to meet the minimum University requirement, or to make up deficiencies in their backgrounds to satisfy the graduate program committee in their area of interest. An applicant may be recommended for admission as a qualifying student when it is expected that the admission requirements for a master's or a doctoral program can be met through the satisfactory completion of no more than 30 units of specified courses. A qualifying student who has completed the make-up work may then apply under 1.3.3 or 1.3.4 for admission to a master's or doctoral program.

The minimum University requirements for admission as a qualifying student are as follows.

a) a bachelor's degree, or the equivalent

b) submitted evidence of academic ability, usually in the form of references from qualified referees

Admission as a qualifying student does not guarantee future admission to a master's or doctoral program unless the offer of admission states that satisfying specific requirements within a specific period of time will result in automatic admission to the program.

Normally a student will be admitted with qualifying status for a maximum of one year (three consecutive terms).

### 1.3.7 Admission as a Non-degree Student

Normally, a non-degree student at the graduate level has at least a bachelor's degree, or the equivalent, is admitted in order to complete specified courses, but is not seeking a degree from this University. A non-degree student will not be permitted to enrol in undergraduate courses.

Application is through the graduate program committee in the department in which the student wishes to work; applicants are advised to contact the department before submitting an application (see 1.3.1). Transcripts of previous university work (or proof of obtaining a degree) will be required at the time of application, but letters of reference will not necessarily be required.

No credit will be given towards any degree offered by the University for courses completed as a non-degree student except, under unusual circumstances, on petition to the senate graduate studies committee.

### 1.3.8 Conditional Admission

Conditional admission may be offered to an applicant who is substantially ready to undertake a program but who has not completed all admission requirements at the time of application. An offer of conditional admission will specify the remaining requirements to be met and a limited time period within which the requirements must be met. Normally, the requirements must be fulfilled either prior to enrolling in the program, or within the first term of enrolment.

### 1.3.9 Admission as an Exchange Student

Bona fide graduate students at other universities who wish to complete courses at Simon Fraser University, not leading to a degree at this University, will be admitted to complete specific graduate courses on the recommendation of the chair of the department

(or equivalent officer) and the dean of graduate studies at the other university, and with the permission of the appropriate graduate program committee and the dean of graduate studies at Simon Fraser University.

### 1.3.9a Admission as a Visiting Researcher

Simon Fraser University accepts visiting research students under the terms of the Canadian Graduate Student Research Mobility Agreement. For details, see the Graduate Studies website at [www.sfu.ca/gradstudents/prospective/visiting.html](http://www.sfu.ca/gradstudents/prospective/visiting.html)

### 1.3.10 Application for Admission

Application is through the Dean of Graduate Studies website. Completed applications and accompanying materials must be submitted to the department before the deadline specified by the department. Applicants are advised to check with the appropriate department as to the prevailing application procedures and deadlines for the graduate program in which they are interested. Applicants are advised that deadlines for applications for awards and teaching assistantships may be earlier than the deadlines for application to a graduate program.

All decisions on graduate admissions are made by the senate graduate studies committee, on recommendation from graduate program committees. Decisions on admissions shall be final. Final approval of admission for non-degree students or exchange graduate students is by the dean of graduate studies.

### 1.3.11 Application to complete a Second Master's or Doctoral Degree

Students who have a master's or a doctoral degree (either from Simon Fraser University or another university) can apply to complete a second master's or doctoral degree under the following constraints.

a) no course work completed for the first degree shall count towards the second.

b) none of the research done for the first degree shall be used for the second.

c) none of the time spent in residence for the first degree shall count towards the residence for the second degree.

### 1.3.12 English Language Competence

English is the language of instruction and communication in the University. Accordingly, an applicant whose primary language is not English or whose previous education has been conducted in another language must demonstrate command of English sufficient to pursue graduate studies in the chosen field. Applicants normally will be required to achieve a satisfactory score on a standardized English test acceptable to the University. This test must include a writing component. The Test of English as a Foreign Language (TOEFL) including reading, writing, speaking, and listening components, is acceptable for this purpose. The IELTS (International English Language Testing Systems) is also acceptable. The minimum university requirements for test scores is TOEFL 88 with a minimum of 20 in each category (internet based exam), or TOEFL 570 and TWE 5 (paper based), or TOEFL 230 (computer based), and IELTS overall band score of 7.0; some graduate programs have higher requirements, as described elsewhere in this Calendar. Some graduate programs have higher requirements, as described elsewhere in this Calendar.

Further details about the above tests may be obtained from the following.

TOEFL and TWE – Education Testing Service, CN 6151, Princeton, NJ, 08541-6151 USA

Other acceptable English tests – Director, Graduate Records and Admissions

### 1.3.13 Certificate Programs

A certificate program consists of approved combinations of graduate courses completed from at least two different departments. Graduate certificate programs are intended to be both thematic and interdisciplinary.

Courses completed for credit in a graduate degree program may be applied to certificate programs. A certificate program must include a minimum of four courses and a minimum of 12 units.

Certificate programs may be completed only by students already enrolled in a master's or doctoral program at Simon Fraser University.

Certificates are awarded at the time of convocation.

## 1.4 Enrolment

Students are enrolled in one of two different types of programs. In 'per term fee' programs, students are charged a standard fee for each term of enrolment. In 'per credit fee' programs, students are charged a fee based on the number of units completed. (See "Graduate Fees" on page 227 for current tuition fee rates.) All students are in per term fee programs except for students in per credit fee programs as listed under Graduate Fees (page 227).

### 1.4.1 Date of Entry

University regulations permit graduate students to enter programs at the beginning of any term, unless a program requires students to start in a specific term.

### 1.4.2 Enrolment

Enrolment begins two months before the start of each term and must be completed by the Friday preceding the start of classes; see "Academic Calendar of Events" on page 12. New students are allowed an additional two weeks to finalize their enrolment, without financial penalty. The course or research-related work for which the student enrolls must have the approval of the chair of the graduate program committee and of his/her senior supervisor, once the senior supervisor is appointed. In addition, enrolment for courses completed outside the student's department must have the approval of the course instructor. Students going on leave are required to enrol (see "1.8.4 Application to go on Leave" on page 223).

### 1.4.3 Continuity of Enrolment

Students in per term fee programs are required to enrol in every term until all requirements for the degree have been fulfilled. This includes students enrolled on leave. A student who does not enrol is considered to have withdrawn from the University. (See 1.8.4 for regulations on student leave.) Students in per unit fee programs enrol only in those terms in which they are taking courses or working on other requirements, such as a project or field exam. A student in a per unit fee program who does not enrol in at least one of three consecutive terms is considered to have withdrawn from the University. Enrolment in an undergraduate course or audit course only does not satisfy the requirement for continuity of enrolment.

### 1.4.6 Course Audit

Graduate students may audit graduate courses, with permission of the instructor, senior supervisor and graduate program chair of the student's department. Such audits are recorded as AU on the student's transcript.

Prior to enrolment, the student and instructor must agree on the requirements for auditing the class.

These requirements must include regular attendance at class meetings, completion of readings and participation in class activities.

Audited courses will not count toward degree requirements.

A student may change enrolment status in a course from audit to regular enrolment, or from regular enrolment to audit until the deadline for late enrolment for the term. Normally, no further change in enrolment status will be permitted after that date.

### 1.4.7 Co-operative Education

Co-operative education integrates work experience and graduate studies. The name reflects the co-operative relationship among the University, employer and student. Practical experience from work terms is related to the student's major interests within the graduate program. A number of graduate programs have been approved, by the relevant graduate program committee, for co-operative education (co-op). These are listed below.

chemistry (MSc)  
economics (MA)  
environmental toxicology (MET)  
mathematics (MSc)  
resource and environmental management (MRM)  
statistics and actuarial science (MSc)

The list of approved programs is subject to change. In addition, some faculties may permit co-op work terms for individual students on a case-by-case basis. Interested students should consult the co-op co-ordinator.

The application to enrol in co-op is subject to departmental approval. Each department has a specific course for the co-op work term or practicum.

## 1.5 Academic Standing

### 1.5.1 Normal Grading System

The following grades are used at the graduate level in the University.

A+ = 4.33 point (in use since 2002-3)  
A = 4.00 points  
A- = 3.67 points  
B+ = 3.33 points  
B = 3.00 points  
B- = 2.67 points  
C+ = 2.33 points (in use since 2002-3)  
C = 2.00 points  
F = 0 points  
IP = 0 points  
CO = 0 points  
N = 0 points

A student in a master's or doctoral program must maintain a cumulative grade point average (CGPA) of 3.0 in courses completed at Simon Fraser University. The CGPA is the cumulative average of the grade points earned in the Simon Fraser University graduate courses completed towards a graduate diploma, or towards a master's or doctoral degree.

A student in a diploma program must maintain a cumulative grade point average (CGPA) of 2.5 in courses completed at Simon Fraser University. Courses graded on a satisfactory/unsatisfactory basis are not included in the grade point average.

When a student is working on a thesis, extended essay or project as part of the requirements for the degree, the notation IP (in progress) shall be entered on the transcript. IP is not a grade and is not used in calculating the student's CGPA. When a thesis, extended essay or project is completed, the notation CO shall be entered on the transcript. CO is not a grade and is not used in calculating the student's CGPA.

In exceptional circumstances, the grade for a course may be deferred for a specified period determined by the course instructor. This shall be entered as DE in the student's record. If the grade is not received by the director, graduate records and admissions by the last day of the first month of the next term, the DE grade will automatically be converted to an F. DE grades may not be extended beyond this time limit. A DE grade may be changed to a WE if the student can provide medical documentation that they were unable to complete the work within the extended period because of illness. Upon request to the Dean of Graduate Studies a DE grade can be changed to a grade of IP and the course requirements completed in a subsequent term of registration. When the grade for a course is not deferred and no grade is received by the director, admissions and records, the notation N will be placed in the student's record. For the purposes of calculating the CGPA, N counts for 0 points.

A course that is dropped before the end of the second week of the term will not be recorded on the student's transcript. A course that is dropped within the third to eighth weeks (inclusive) will be recorded on the transcript with the notation WD. No course may be dropped after the end of the eighth week and before the end of the twelfth week, except in extenuating circumstances approved by the director, admissions and records. Courses dropped under extenuating circumstances will receive a WE notation. See "Academic Calendar of Events" on page 12 for dates that apply each term. WD and WE grades carry no credit value and are not used in GPA calculations.

### 1.5.2 GN Notation

The notation GN (grade not reported) may be used if circumstances beyond the control of the University make it impossible for grades to be assigned for a course. The notation has no numerical equivalent and does not affect either the term grade point average or cumulative grade point average.

### 1.5.3 Satisfactory/Unsatisfactory Grading (S/U)

With the approval of senate graduate studies committee, a department may require that a designated course be graded satisfactory/unsatisfactory (S/U) for all students in the course.

An individual student may request to complete a course on an S/U basis by applying to the supervisory committee. If that committee concurs, the request will be submitted to the graduate program committee for final approval. If the course is outside the student's department, the approval of the other graduate program committee must also be obtained.

Having enrolled in a course on any grading basis, a student may not change to another grading basis for that course.

None of the student's minimum course work requirement under 1.7.2 may be completed S/U. Neither an S nor a U will count in the CGPA, but the grade received shall be recorded on the transcript.

### 1.5.4 CGPA Required For Continuation and Graduation

A student in a master's or doctoral program is required to maintain a CGPA of at least 3.0. A student in a graduate diploma program is required to maintain a CGPA of at least 2.5. Failure to meet the minimum CGPA is evidence of unsatisfactory progress and the matter will be considered by the graduate program committee as required under the *Procedure for the Review of Unsatisfactory Progress* in regulation 1.8.2.

Under no circumstances will a student, whose CGPA is below 3.0, be awarded a graduate degree.

Under no circumstances will a student with a CGPA below 2.5 be awarded a graduate diploma.

### 1.5.5 Graduate Students Retaking a Course

A graduate student may retake a course under the following conditions.

- a) when the same numbered course covers different material in different terms (many special topics and directed readings courses are of this nature).
- b) when the student wishes to improve the grade earned in the course. Permission of the graduate program committee is required.

Under a), both grades are recorded on the student's transcript, and the grade and the units for both iterations of the course are used for the calculation of the CGPA and towards the units required for the degree. Under b), both grades are recorded on the student's transcript with the notation that the course was retaken to improve the grade. However, only the better grade is used in calculating the CGPA and the units for the course are used only once towards the requirements for the degree.

A student must indicate at the time of enrolment under which of the two conditions the course is being retaken. The correctness of this indication must be certified by the chair of the graduate program committee.

### 1.5.6 FD Notation

The notation FD (failed, academic dishonesty) may be given in case of academic dishonesty, according to academic policy S10.02.

## 1.6 Supervision

### 1.6.1 General

When a graduate student has been admitted, the graduate program committee will exercise general supervision and counselling for the student through the chair of the graduate program committee or a faculty member designated by the chair, until a senior supervisor has been appointed when appropriate.

### 1.6.2 Supervision of a Qualifying Student

A qualifying student comes under the general supervision of the graduate program committee, exercised through the chair of that committee or a faculty member designated by the chair.

### 1.6.3 Senior Supervisor

For degrees that culminate in a thesis, the senior supervisor must be a 'tenure-track' Simon Fraser University faculty member at the rank of assistant professor or above. Associate members may serve as the senior supervisor in their affiliated academic units at the discretion of the academic unit's graduate program committee. Adjunct faculty members may not serve as the senior supervisor but can be co-supervisors.

For degrees that culminate in a project, extended essay, field or comprehensive examination, the senior supervisor must be a Simon Fraser University faculty member deemed to be qualified by the academic unit's graduate studies committee and approved by the dean of graduate studies.

In consultation with the student, the graduate program committee will appoint a senior supervisor as soon as possible after admission to the graduate program. Normally, this appointment shall be made no later than the beginning of the second term of full time equivalent enrolment after the student's admission. The senior supervisor is the person principally responsible for supervising the student throughout the degree program. A senior supervisor must hold the

rank of assistant professor or above at Simon Fraser University.

A senior supervisor who is planning to be off campus for more than three months shall arrange for proper supervision of the student during this absence. The graduate program committee and the dean of graduate studies shall be informed in writing of the arrangement.

A senior supervisor is not required for students in a graduate diploma program. The director of a diploma program is responsible for roles normally assigned to the senior supervisor (e.g. advising students, signing forms).

### 1.6.4 Supervisory Committee

A supervisory committee is not required for students in graduate diploma programs or in degree programs that culminate in an extended essay, field or comprehensive examination.

In degree programs in which there is a requirement for a thesis or a project, a supervisory committee must be established. For students in master's degree programs that culminate in an extended essay, field or comprehensive examination, the senior supervisor alone may comprise the supervisory committee.

Where a supervisory committee requires members in addition to the senior supervisor, the senior supervisor, in consultation with the student, shall recommend the composition of the supervisory committee. The supervisory committee consists of the senior supervisor and at least one other person. Normally, this recommendation shall be made during the same term in which the senior supervisor is appointed.

At least one member of the committee (in addition to the senior supervisor) must normally be a faculty member or an adjunct professor or a research associate at Simon Fraser University. When deemed appropriate by the faculty graduate studies committee and the dean of graduate studies, other member(s) of the supervisory committee may be other suitably qualified person(s). A recommendation for a supervisory committee that includes a person who is not a faculty member at Simon Fraser University should be accompanied by a curriculum vitae of that person.

The composition of the supervisory committee, for which the senior supervisor is chair, shall be approved by the graduate program committee and sent to the dean of graduate studies for final approval. It shall be sent to the faculty graduate studies committee for information.

The supervisory committee is responsible for helping the student develop a program of study leading to a degree and for reporting to the graduate program committee at least once a year on the student's progress towards completing the degree requirements. The supervisory committee shall be available to the student for consultation on a regular basis.

### 1.6.5 Co-supervision

A co-supervisor may be designated when a member of the supervisory committee exercises a degree of supervision and support similar to that of a senior supervisor. Normally, a co-supervisor will be appointed if:

- a) he or she is an Simon Fraser University faculty member holding the rank of assistant professor or above (see 1.6.3); or holds an appointment as an adjunct professor (see policy A12.08) at Simon Fraser University in the same department as the student and senior supervisor; or holds an appointment as an associate member (see policy A12.07) at Simon Fraser University in the same

department as the student and senior supervisor; and

- b) the department graduate program committee satisfies the faculty graduate studies committee and the dean of graduate studies that the level of supervision and/or support to be provided by the co-supervisor is greater than normally expected from regular members of a supervisory committee.

Reasons for approving co-supervision will vary, but could include: co-investigator with the senior supervisor of a research grant funding the student's research; providing significant supervision in a field outside the senior supervisor's area of expertise; supervising a laboratory where the student undertakes research.

Appointment as co-supervisor recognizes significant contribution of time, expertise or financial resources. However, the supervision of the student remains the responsibility of the senior supervisor, who must perform all of the activities normally expected of a senior supervisor. The co-supervisor will not take on any of the administrative responsibilities of the senior supervisor. The co-supervisor may not substitute for the senior supervisor, except under circumstances described in 1.6.3.

Co-supervisory status is recommended by the department graduate program committee to the faculty graduate studies committee. Departments and faculties are responsible for setting criteria and standards appropriate to their disciplines. If the faculty graduate studies committee supports the appointment, it shall be forwarded to the dean of graduate studies for approval. Status as co-supervisor will be noted on all relevant documents, and on the signature page of the thesis.

Co-supervisory status may be terminated by the dean of graduate studies if either condition a) or b) (above) is no longer met, or if the co-supervisor is unable to comply with Simon Fraser University policies and procedures relevant to graduate supervision.

It is the responsibility of the co-supervisor to inform his/her department chair (at Simon Fraser University) or employer (off campus) of his/her status as co-supervisor.

### 1.6.6 Change in the Supervisory Committee

Continuity of supervision is important in all graduate work. As a consequence, a change in supervisory committee, especially a change in senior supervisor, may be made only on the basis of strong reasons.

A request for a change in the supervisory committee may come from the student or any member of the supervisory committee. It shall be sent to the graduate program committee accompanied by the reasons, in writing, for the proposed change. If the graduate program committee concurs in the request, it shall be sent to the dean of graduate studies for final approval.

### 1.6.7 Human Subjects Ethics Review

**All research plans involving human subjects must receive ethics approval. Copies of the policy (R20.01), procedures and forms for this review may be obtained from the Office of Research Services or from the University web site ([www.sfu.ca/policies/research/index.htm](http://www.sfu.ca/policies/research/index.htm)).**

## 1.7 Residence and Course Requirements

Minimum course work requirements are defined in 1.7.1, 1.7.2 and 1.7.4. See 1.7.6 for regulations concerning courses completed at other institutions. There is a residence requirement for all doctoral programs (see 1.7.3).

### 1.7.1 Requirements for the Graduate Diploma

There is no residence requirement for the graduate diploma. Candidates must complete the University minimum requirement of 22 units of graduate course work. A graduate program committee may require graduate or undergraduate work in addition to the minimum requirements, either on an individual basis or, with senate ratification, for all students in the program.

### 1.7.2 Residence Requirement for the Master's Degree

Master's candidates must complete the University minimum requirement in one of the following ways.

- successfully complete a minimum of 12 units of graduate course work and submit a thesis;
- successfully complete a minimum of 20 units of graduate course work and submit at least two extended essays, or a project;
- successfully complete a minimum of 30 units of graduate course work and pass a final examination

Not all of these options are available for every program. A graduate program committee may require work in addition to the minimum requirements either on an individual basis or, with Senate ratification, for all students in its program.

### 1.7.3 Residence Requirement for the Doctoral Degree

The aim of the residence requirement is that the student spend a period of time in contact with faculty members and other students. Doctoral students must enrol for a minimum of five terms. On leave terms will not count toward this minimum.

### 1.7.4 Course Requirements for the Doctoral Degree

There are no University course requirements for the doctoral degree. However, a student's supervisory committee, graduate program committee or the faculty graduate studies committee, may require a student to complete specified courses or units as part of the degree program.

### 1.7.5 Doctoral Thesis

All doctoral programs require a doctoral thesis based on substantial original research.

### 1.7.6 Courses in Master's and Doctoral Programs

The following rules apply to the minimum course work requirement.

One half of the minimum course work of the University or departmental degree requirements must be completed at this University.

None of the University minimum may be courses completed in order to qualify for admission.

None of the University minimum may be undergraduate courses.

A graduate student may apply to complete one or more courses at another university for credit towards a degree at Simon Fraser University under the following conditions.

- Such applications shall be made at least one month before the course/courses start and shall be approved by the student's supervisory committee and graduate program committee and be sent to the Dean of Graduate Studies for final approval.
- While completing a course/courses at another university under these provisions, the student shall maintain normal enrolment at this University, not enrolment on leave.

c) Transfer credit is not used in the calculation of the cumulative grade point average.

A graduate student may apply to have credit for graduate courses completed prior to admission applied to the requirements for the degree, under the following conditions.

- Courses must have been completed within two years of starting the Simon Fraser University program
- Courses may not have been used to earn another credential and may not have been completed as part of a qualifying year
- application for advance credit must be made at the time of application for admission, and must be approved by the graduate program committee and the dean of graduate studies.

## 1.8 Progress, Withdrawal and Leave

### 1.8.1 Progress Evaluation

For master's and doctoral students, the supervisory committee shall report on the student's progress at least once each year. This report will be sent, in writing, to the graduate program committee with a copy to the student. The evaluation of student progress in course work will rely in part on their maintenance of a CGPA of 3.0, as required by graduate regulation 1.5.4.

For graduate diploma students, a progress review will be initiated if the CGPA drops below 2.5.

### 1.8.2 Review of Unsatisfactory Progress

If a student's progress appears to be unsatisfactory, the supervisory committee or the chair of the graduate program committee shall make a written report to the graduate program committee, and provide a copy to the student. That committee shall consider whether the student's progress has been satisfactory. The graduate program committee, on consultation with the supervisory committee, if one has been appointed, may:

- require the student to withdraw, or
- inform the student of the unsatisfactory progress and require the student to improve in specific ways in a specific period of time.

The student concerned has the right to appear before the graduate program committee when the case is considered, and may submit any materials relevant to the case. A student who is required to withdraw shall be informed, in writing, with copies to the dean of graduate studies and the director, graduate admissions and records. If required to improve within a specific period of time, the student shall be informed in writing as to what precisely is required, with copies to the dean of graduate studies and the director, admissions and records.

Any decision of the graduate program committee under the provisions of this section may be appealed to the senate graduate studies committee through the dean of graduate studies. The student has the right to appear before the senate graduate studies committee when the case is heard. The decision of that committee shall be final.

### 1.8.3 Withdrawal from Courses and from the University

Permission of the senior supervisor and the chair of the graduate program committee is required to withdraw from a course. If the senior supervisor is not yet appointed, or if the student is in a graduate diploma program, permission of the chair of the graduate program committee is required. If such permission is granted, a student may withdraw from a

course without academic penalty up to the end of the ninth week of classes in any term.

Under extenuating circumstances, a student may withdraw from a course without academic penalty during the tenth to the 12th week of classes. Such circumstances must be beyond the control of the student (e.g., medical or financial crisis); under such circumstances, therefore, 898 (Master's Thesis Research), 899 (PhD Research) or a similar course may be added, as appropriate. Permission of the senior supervisor and the chair of the graduate program committee is required.

A student may withdraw from the University at any time by notifying the chair of the graduate program committee and the director, graduate admissions and records.

A student who has withdrawn from the University and who wishes to re-enter shall apply for permission under the same conditions as any other applicant.

### 1.8.4 Application to go on Leave

In this section, exceptional circumstances for interrupting a student's graduate program normally means illness, accident, disability, pregnancy or parenting responsibilities. Students in such circumstances are expected to present documentation for those reasons when applying to go on leave.

Students in per unit fee programs are not required to maintain continuous enrolment, and so are not eligible to enrol on leave. Students in per unit degree programs are required to register for courses in at least one term out of every three, and failure to do so will result in the student being considered to have withdrawn from the University (see "1.4.3 Continuity of Enrolment" on page 221). If a student in a per unit fee program is unable to undertake course work in a term for exceptional circumstances, and by not registering in courses for that term, would be withdrawn automatically from the University, s/he should discuss the situation with the dean of graduate studies, who will advise on processes for readmission under such circumstances.

Students in per term fee programs are expected to maintain continuous enrolment (see 1.4.3). However, a student may apply to go on leave if both of the following conditions are satisfied.

- a situation arises which makes it necessary to interrupt the graduate program;
- and
- no substantial use will be made of University facilities.

Permission to enrol on leave must be approved by the student's senior supervisor and the chair of the student's graduate program committee. When the situation necessitating the interruption of the student's graduate program is due to exceptional circumstances, permission to enrol on leave will not normally be denied. Students who apply for a leave due to exceptional circumstances and have permission denied for that leave should apply to the dean of graduate studies for consideration of their application.

Students on leave are required to enrol during the normal enrolment period for each term by indicating on leave status when enrolling, and they will be assessed an on leave fee (see "On Leave" on page 227 in the "Graduate Fees" section). This fee will be waived for students enrolled on leave due to exceptional circumstances.

Enrolling on leave may impact upon a student's ability to complete their degree within the maximum time allowed (see "1.12 Maximum Time for Completion of the Requirements for the Degree" on page 225). For students in master's degree programs (see "1.12 Maximum Time for Completion of the Requirements for the Degree" on page 225), no term or enrolment

on leave will count toward the maximum 12 terms of enrolment allowed for the completion of their degree requirements. Further to this, each term of on leave enrolment for exceptional circumstances will extend, by four months, the six calendar year period of time from the student's initial enrolment in their graduate program in which they must complete their degree requirements. Terms of enrolment on leave for other reasons will not extend that six calendar year period. For students in doctoral programs (see "1.12.3 Doctoral Degree" on page 226), each term of on leave enrolment for exceptional circumstances will extend, by four months, the eight calendar year period of time from the student's initial enrolment in their graduate program in which they must complete their degree requirements. Terms of enrolment on leave for other reasons will not extend that eight calendar year period. Further, no term of on leave enrolment, regardless of the reasons for enrolment on leave, will count toward the minimum of five terms the student must spend enrolled in their program (see "1.7.3 Residence Requirement for the Doctoral Degree" on page 223). Students who wish to enrol on leave for more than three sequential terms must submit a written explanation for all subsequent on leave enrolments. Such applications require approval from the dean of graduate studies.

## 1.9 Preparation for Examinations

### Master's Students

#### 1.9.1 Examining Committee for a Master's Degree Candidate

Each candidate for a master's degree shall be examined on the thesis, extended essays field or comprehensive examination, or project. The nature of the examination and the composition of the examining committee of a student's extended essay, field or comprehensives shall be as designated by the appropriate faculty graduate studies committee and the dean of graduate studies.

Examination of projects for all graduate programs shall be as for the examination of theses with the same requirements for committee composition unless a different examination process has been designated by the appropriate faculty graduate studies committee and the dean of graduate studies.

Examination of projects for all other graduate programs shall be as for the examination of theses with the following exceptions: when the project is live, taped or filmed, only one presentation is required for examination, and only one recording is required for deposition in the library. The one copy deposited in the library shall be the property of the University. The student shall have the right to copy the original, and the right to borrow it for external showing at the discretion of the librarian.

Where such an examination is required for a thesis the examining committee shall have the following minimum composition.

- the chair of the student's graduate program committee, or his/her designate, who shall be a non-voting chair of the examining committee. If the chair of the graduate program committee is also on the student's supervisory committee, he/she shall designate a member of faculty at this University, who is not a member of the student's supervisory committee, as chair.
- all members of the student's supervisory committee.
- a member of faculty at the university, or a person otherwise suitably qualified, who is not a member of the student's supervisory committee. For those seeking a degree under special arrangements, this person shall be from outside the University. For a thesis defence in the Faculty of Arts and Social Sciences, a master's examiner may not be a member

of the same department as the one granting the degree, unless a waiver is granted by the Dean of Arts and Social Sciences or his/her designate.

#### 1.9.2 Preparation for Examination of Master's Thesis

Preparation for the examination of a master's thesis shall not take place until the thesis is substantially complete and in the format laid down in *Preparation of Thesis, Extended Essays and Project: Regulations and Guidelines* (revised February 1997).

The candidate's supervisory committee shall make a recommendation to the chair of the graduate program committee concerning the date, place and time of the thesis examination and the composition of the examining committee in conformity with 1.9.1.

Upon approval of the chair of the graduate program committee, this recommendation, with the thesis title and an abstract, shall be sent to the director, graduate records and admissions for entry into the University's records. The examining committee composition shall reach the director at least four weeks before the examination date. At this time, the chair of the graduate program committee will notify the University community of the intended time and place of the examination.

At least two weeks before the date of the thesis examination, unbound copies of the completed thesis shall be distributed to the examining committee by the chair of the graduate program committee, and one copy shall be made generally available for inspection by interested members of faculty and students. Department rules may require earlier submission of the completed thesis.

If the date or place has been changed, the chair of the graduate program committee will notify the University community.

The examination of the thesis shall take place under the regulations for thesis examination given in 1.10.1.

### Doctoral Students

#### 1.9.3 Examining Committee for Doctoral Thesis

Each candidate for a doctoral degree shall be examined on the thesis. Each examining committee shall have the following minimum composition:

- the chair of the graduate program committee, or designate, who shall be a non-voting chair of the examining committee. If the chair of the graduate program committee is also on the student's supervisory committee, he shall designate a member of faculty at the University, who is not a member of the student's supervisory committee, as chair.
- all members of the student's supervisory committee
- a member of faculty at the University or a person otherwise suitably qualified, who is not a member of the student's supervisory committee. For a thesis defence in the Faculty of Arts and Social Sciences, the 'internal external' examiner may not be a member of the same department as the one granting the degree.
- an external examiner who shall be specifically qualified in the field of the thesis and not be a member of faculty at the University

#### 1.9.4 Preparation for Examination of Doctoral Thesis

Preparation for the examination of a doctoral thesis shall not take place until the thesis is substantially complete and in the format laid down in *Preparation of Thesis, Extended Essays and Project: Regulations and Guidelines* (revised February 1997).

The candidate's supervisory committee shall make a recommendation to the chair of the graduate program committee concerning the composition of the examining committee (in conformity with 1.9.3) and the date, place and time of the thesis examination. Upon approval of the chair of the graduate program committee, this recommendation, with the thesis title, abstract, and curriculum vitae of the external examiner, shall be sent to the Dean of Graduate Studies for final approval. The examining committee composition shall reach the Dean of Graduate Studies at least six weeks before the examination date. At this time, the chair of the graduate program committee will notify the University community of the intended time and place of the examination.

After the recommendation is approved, the Dean of Graduate Studies shall formally invite the external.

Unbound copies of the completed thesis shall be distributed to the examining committee by the chair of the graduate program committee after approval of the examining committee and thesis examination arrangements by the dean and at least four weeks before the date of examination. The chair of the examining committee shall inform the Dean of Graduate Studies in writing when the thesis has been distributed. Department rules may require earlier submission of the completed thesis.

The examination of the thesis shall take place under the regulations for thesis examination given in 1.10.1.

#### 1.9.5 The Role of the External Examiner

The external examiner should be a distinguished scholar with particular experience in the field of the thesis research. The examiner shall be free from potential conflict of interest which may arise, for example, from research collaboration with the student or prospective employment of the student. Whether the external examiner will participate in person or in absentia, including the possibility of a conference telephone connection or similar means, will be determined by the dean of graduate studies who will take into account the departmental views.

The external examiner shall be asked to report on the thesis, to the dean of graduate studies only, before the examination. If the report states that the thesis is ready for defence, a copy shall be sent to the chair of the examining committee by the dean of graduate studies for distribution to all members of the examining committee before the examination. The contents of the report will not be communicated to the student. If the report recommends that the examination be postponed, the dean shall send a copy to the chair of the examining committee, the senior supervisor and the chair of the graduate program committee. The chair of the graduate program committee and the senior supervisor will inform the student of the content of the report. Following discussions with the student and the supervisory committee, the chair of the graduate program committee shall report to the dean whether the examination will take place as scheduled or be postponed.

Once the examination has happened, and if the thesis is passed, the external examiner shall send a brief report to the senior supervisor which indicates the general quality of the thesis. That report (which may be either a copy of the initial report to the dean of graduate studies or a report prepared after the thesis defence) shall accompany the recommendation for award of the degree.

In the event of examination in absentia, the report of the external examiner should be quite extensive and give a specific recommendation as to whether the thesis ought to pass, fail, or be subject to revision as under 1.10.2. The report may contain specific questions the external examiner would like posed to the candidate. The report shall be copied, by the dean

of graduate studies, to the chair of the examining committee, for distribution to all members of the examining committee before the examination. Specific questions raised by the external examiner in that report shall be directed to the candidate during the examination by members of the examining committee selected by the chair of the examining committee.

### 1.9.6 Notification of Doctoral Thesis Examination

At least 10 days before the proposed examination, the chair of the graduate program committee will notify the candidate, the examining committee, the dean or deans of faculty concerned and the dean of graduate studies of the date, place and time of the thesis examination; this date shall not be earlier than the originally proposed date. The dean of graduate studies will notify the University community.

## 1.10 Examinations

### 1.10.1 Thesis Examination

The candidate shall give an oral account of the research on which the thesis is based and defend the thesis itself. The candidate must be prepared to answer questions on the field of the research and related fields.

Thesis examinations are open to the University community. Copies of the thesis abstract shall be made available to all those attending the examination. The chair of the examining committee shall allow proper opportunity for questions on the thesis to come from persons who are not members of the examining committee but are attending the examination. The dean of graduate studies or designate shall have the right to attend all phases of the examination.

After the chair of the examining committee is satisfied that all relevant questions have been answered, the examining committee shall meet *in camera* to classify the thesis.

### 1.10.2 Classification of the Thesis

There are four possible outcomes of the thesis defence.

- 1) the thesis may be passed as submitted
- 2) the thesis may be passed on the condition that revisions be completed to the satisfaction of the senior supervisor
- 3) the examining committee may defer making judgement if it judges that the thesis could pass after additional work by the candidate. A thesis upon which judgement is deferred shall come forward for re-examination within a period specified by the examining committee. The examining committee may require formal re-examination under section 1.10.1 or may reach its decision by examination of the revised thesis. The examining committee may not defer judgement a second time.
- 4) the thesis may be failed. In this case, the candidate is required to withdraw from the University.

The decision of the examining committee is by simple majority vote except that, in the cases of doctoral candidates or candidates enrolled under special arrangements, the classification of the thesis may not be at a higher level than that of the external examiner. A decision to pass the thesis or to defer making judgement may not be reached on a tie vote of the examining committee. If at first a majority vote to pass the thesis cannot be reached, and subsequently, if a majority vote to defer judgement cannot be reached, the thesis will be failed.

### 1.10.3 Recommendation for the Award of the Degree

When a student has successfully defended the thesis and made any minor revisions required, the supervisory committee shall recommend award of degree. This recommendation goes for approval respectively to the graduate program committee, the faculty graduate studies committee, the senate graduate studies committee and senate, which has the final authority to award the degree.

The title of the thesis, extended essays, professional paper and projects will be recorded on the student's transcript.

### 1.10.4 Submission of the Thesis to the Library

If the examining committee has required minor revisions to a thesis, these will be completed as soon as possible after the examination and checked by the senior supervisor. Two unbound copies of the final draft of the completed thesis shall be sent to the library together with a memorandum from the senior supervisor certifying that all required revisions have been made. These two copies will be bound, catalogued and retained by the library, one for the general collection and one for the University archives. graduate program committees may also require not more than two bound copies for departmental files and these should be submitted for binding at the same time.

When the library representative of the dean of graduate studies has checked the thesis and accepted the format, the representative will notify the director of graduate programs, admissions and records. No degree will be approved by senate until the director of graduate programs, admissions and records has been so notified.

## 1.11 Publication of Thesis

When the thesis is submitted to the library, the student shall authorize the copying and publication of the thesis as follows.

### 1.11.1 Partial Copyright License

Except as noted in 1.11.3, the student shall sign a partial copyright license which grants to the University the right to lend the thesis to users of the library, and to make partial or single copies for such users. Multiple copying is not permitted without written permission from the author except that, if the author is unobtainable, the dean of graduate studies may give this permission.

### 1.11.2 Reproduction

Except as noted in 1.11.3, the student shall sign an agreement form authorizing the National Library of Canada to reproduce the thesis and to sell microfilm copies on request.

### 1.11.3 Postponement of Publication

The results of research conducted at Simon Fraser University should be available freely to the public, and it is expected that theses will be placed in the library immediately following final revisions. It is the responsibility of graduate students to ensure that this policy is communicated clearly to relevant individuals and organizations outside the university prior to the initiation of any research project.

A thesis may be withheld from circulation and from copying for a period of 12 months from the date of defence of the thesis, in order to protect confidential commercial information, patentable material, pending application, or where immediate commercial publication is anticipated. No extensions to this time limit will be permitted. At the time of the thesis defence, a thesis withholding document requesting

and authorizing such delay shall be signed by the student, the senior supervisor, and the dean of graduate studies. The official copies of the thesis and all pertinent forms shall be deposited in the library along with the withholding document. A copy of the thesis shall not be sent to The National Library of Canada during the restricted period but the abstract of the doctoral thesis shall be sent to Dissertation Abstracts International with the period of restriction duly noted.

Under exceptional circumstances, portions of a thesis may be withheld from the reference copy of the thesis that is made available to faculty members and students (see 1.9.2 and 1.9.4). This procedure must be authorized by the dean of graduate studies well before the distribution of the thesis. The dean must ensure that only the most confidential material is withheld from the thesis, and that the overall content of the thesis is not lost.

### 1.11.4 Publication of the Thesis by the Student

None of the clauses above preclude the student from publishing the thesis in any form at any time.

## 1.12 Maximum Time for Completion of the Requirements for the Degree

### 1.12.1 General

The maximum times for completion given below are not intended to be the normal times for completion. They are intended to take into account a wide variety of extraordinary circumstances and events that may delay completion. Individual departments may specify their expectations of normal degree completion times as a guide to determining whether a student's progress is satisfactory.

Although it is expected that most students will complete their programs well before reaching the time limit, some students may be required to suspend work for a period of time because of mental or physical disability, pregnancy or family responsibilities. In such cases, students should apply to go on leave, should present evidence (e.g. from a doctor) of the necessity of the interruption of studies, and should request that their on-leave fees be waived. On-leave terms completed under such circumstances will be added to the maximum length of time in program. Students who take on-leave terms for other reasons will not receive extensions. Students in per unit fee programs do not take on-leave terms. Students in those programs should submit a letter to the chair of the graduate program committee outlining the circumstances and requesting that their maximum time in program be extended, together with the required documentation.

Students with long-term disabilities should discuss their situation with the Centre for Students with Disabilities early in their graduate studies or as soon as possible after the condition is diagnosed. The centre will assist students and their departments to develop plans for completion of programs, and this may include an extension beyond the normal time limits. Such plans must be approved by the Dean of Graduate Studies.

### 1.12.2 Master's Degree

Students in per term fee programs (see 1.4) shall complete all of the requirements for a master's degree within 12 terms of equivalent enrolment. On-leave terms will not be counted as terms of enrolment. In addition, all requirements of the master's degree must be completed within six calendar years of initial enrolment as a master's student. Students in per unit fee programs (see 1.4)

shall complete all of the requirements for a master's degree within six calendar years of initial enrolment.

### 1.12.3 Doctoral Degree

A student shall complete all the requirements for a doctoral degree within eight calendar years of initial enrolment as a doctoral student or, in the case of a student who has transferred from a master's program into the doctoral program without completing the master's degree, within eight calendar years of initial enrolment as a master's student.

### 1.12.4 Readmission

Students who have withdrawn from their program and have not reached their maximum time can be readmitted to complete their degree requirements. Students who have reached their maximum time, did not complete the degree requirements, and thus were required to withdraw, can apply for readmission for one term only to complete those requirements. The term of readmission may be no later than the ninth term after the one in which the student withdrew from the Program. The student applies for readmission to the relevant graduate program committee, who will make a recommendation to the dean of graduate students. Final approval for readmission is by the dean of graduate studies. Readmission decisions may be appealed in the same way as admission decisions (see 1.16.3).

Students who have not been withdrawn but have reached their maximum time can request an extension for one term to complete their degree requirements.

## 1.13 Award of the Degree

### 1.13.1 Application for Graduation

Every candidate for a graduate degree is responsible for applying for graduation online through mySFU.

### 1.13.2 Award of the Degree

Award of the degree is by resolution of senate.

### 1.13.3 Transcripts

Certified official transcripts of the student's graduate academic record may be obtained from the Office of the Dean of Graduate Studies. Only individually signed copies with the University seal are valid. For further information on cost refer to "Graduate Fees" on page 227.

## 1.14 Convocation Ceremony

Convocation is held twice annually. Graduates from the previous fall and spring terms convocate in early June, while graduates from the summer term convocate in October.

## 1.15 Class Interruption

Simon Fraser University makes reasonable efforts to ensure that its classes and courses of instruction proceed on a regular basis and without interruption. Faculty have certain discretion to cancel or change the timetable for their classes; they will endeavor to give reasonable notice of any cancellation or change. Simon Fraser University will not be responsible for cancellation or change of any class. Neither will Simon Fraser University be responsible for the interruption or termination of any class or course of instruction which results from fire, riot, labor disruption or any other event which occurs despite the

University's efforts, or for failure to give notice of the interruption or termination.

## 1.16 Graduate Student Appeals

Graduate students are advised to seek informal resolution of problems through discussions with their supervisor, graduate program chair, department chair or faculty dean, and the dean of graduate studies.

### 1.16.1 Grades

May be appealed to the instructor, department chair and, in some cases, faculty dean in accordance with academic policy T 20.01.

### 1.16.2 Progress Evaluations

May be appealed to the senate graduate studies committee (see 1.8.2).

### 1.16.3 Admission

Applicants who meet or exceed minimum requirements for admission are not assured of admission to any graduate program (see 1.3.1)

Normally, admission decisions may not be appealed (see 1.3.10). In exceptional circumstances, unsuccessful applicants may appeal to the committee to review university admissions. This committee will only review the fairness of admissions procedures and will not review an applicant's credentials.

Appeal forms are available at <http://students.sfu.ca/forms>.

### 1.16.4 Other Appeals

Appeals of decisions on enrolment, graduation, entry/re-entry to a program or any matter relating to academic standing (other than review of unsatisfactory progress) are referred to the senate appeals board. Appeal forms are available at <http://students.sfu.ca/forms>.

# Graduate Fees

## Tuition Fee Schedule 2009 – 2010

Fees are subject to change, subject to provincial legislation, and subject to board of governors approval. International students in graduate programs pay the same fees as domestic students unless otherwise noted.

\* As indicated some graduate programs fees at previous years' rates may apply for students who entered those programs prior to fall 2009.

Per Term Fee Programs	per Term
<i>Graduate students in 'per term fee' programs pay a set fee every term, regardless of the number of courses undertaken.</i>	
research programs, full-time fee*	\$1,565.60
research programs, continuing fee*	\$782.80
research programs, on-leave fee	\$195.70
graduate diploma in bioinformatics	\$1,565.60
executive master of business administration (EMBA)*, if entering in fall 2008 or later	\$9,500.00
master of education (MEd)*, off-campus, if entering in fall 2008 or later	\$2,484.30
master of education (MEd)*, international cohorts ESL/EFL and curriculum and instruction, if entering in fall 2008 or later	\$6,101.90
doctor of education (EdD)*, if entering in fall 2008 or later	\$4,095.10
graduate Co-operative Education practicum	\$665.40
Per Unit Fee Programs	per Unit
<i>Graduate students in 'per unit fee' programs pay tuition fees based on the number of units in which they are enrolled.</i>	
all graduate per unit fee programs – basic	\$157.30
graduate diploma in quantitative methods in fisheries management	\$157.30
graduate diploma in business administration	\$572.90
graduate diploma in education*	\$257.40
graduate diploma in global health*	\$247.40
graduate diploma in urban studies	\$253.90
master of financial risk management (MFRM)*	\$558.60
master of arts (MA) in international leadership	\$208.10
master of arts (MA) in liberal studies	\$151.10
master of business administration (MBA)	\$600.00
master of business administration (MBA) in management of technology (MOT)*, if entered in fall 2008 or later	\$574.10
master of business administration (MBA) in global asset and wealth management (GAWM)*	\$714.30
master of engineering (MEng)	\$451.00
master of public health (MPH)*	\$247.40
master of public policy (MPP)	\$217.90
master of publishing (MPub)	\$300.00
master of science (MSc) in kinesiology (course work-based program)	\$208.10
master of urban studies (MUrb)	\$253.90

## Master's Program

The minimum fee for a master's program is six term fee units. However, the minimum fee rule will be waived for students who complete all degree requirements in less than six terms of continuous full time enrolment.

Students who enrol on leave are not eligible for the waiver of the minimum fee requirements.

A master's students who has completed six terms of enrolment (excluding on leave enrolment) pays a continuing fee in subsequent terms equal to one half of the regular fee.

## Doctoral Program

A doctoral student who has completed eight terms of enrolment (excluding on leave enrolment) pays a continuing fee in subsequent terms equal to one half of the regular fee.

Terms in which a student enrolls on leave do not count towards the number of terms required to switch to the continuing fee.

## Co-operative Education

Per term fee students in a co-operative education term who are completing at least one course will pay a per term fee based on the stage they have reached in their program (either regular fee or continuing fee). Students not completing a course will pay the co-operative education fee.

Per unit fee students in a co-operative education term will pay the co-operative education fee. If students are also completing courses, they also pay the fees that are applicable to those courses.

Fees are listed in the tuition fee schedule.

## Per Unit Fee Programs

In programs in which there is a final 'capstone' requirement such as a thesis, project, extended essay or field exam, this requirement is assigned a number of units. Students must enrol for this and pay the appropriate fee for at least one term, normally at the end of their program of study. Once they have enrolled for this requirement in a particular term, they must enrol in all subsequent terms until degree requirements have been completed. In the subsequent terms of enrolment for this requirement, the units assigned will be half the first term's value.

Students who audit a course will pay the same audit fee as domestic undergraduate students.

Students in per unit programs who complete undergraduate or graduate courses in other programs at Simon Fraser University, or who complete courses at other institutions covered by the Western Deans' Agreement, will pay the same fee per unit as they do for courses in their own programs.

Fees are listed in the tuition fee schedule.

## Extension and Readmission

Per term fee students enrolled for a one term extension beyond the maximum time limits of their program, and students readmitted to complete their degree requirements pay the full per term fee.

Per unit fee students enrolled for a one term extension beyond the maximum time limits of their program, or readmitted for one term to complete their degree requirements pay the per unit fee that is applicable to their program.

All students pay a \$100 reinstatement fee and a \$75 application fee for readmission.

## Fees — Ancillary

For further information regarding these fees which are applicable to both graduate and undergraduate students, see "Student Services and Recreation-Athletics Fees" on page 33 and "Universal Transit Pass" on page 33.

## Student Activity Fee

This fee, which is set by the Graduate Student Society through a referendum of all Graduate students, is collected from all students who are enrolled in a graduate program as follows:

Student Activity Fee payable by all students, except as noted below	\$60.65
designated 'off-campus' courses only	\$30.33
less than six units in a per unit fee program	\$30.33
Co-operative Education only	\$30.33
students registered on leave	\$0.00

For a breakdown of the student activity fee, see "Graduate Student Society" on page 453.

## Special Fees

Application	\$75.00
On Leave (see <i>Graduate General Regulations</i> )	\$195.70
Reinstatement	\$100.00
Graduation	\$36.00
The non-refundable graduation fee is payable in six installments of \$6.00 in each of the student's first six terms of enrolment in the graduate program.	

## Mandatory Supplementary Course Fees

For information about these fees which are applicable to both graduate and undergraduate students, "Mandatory Supplementary Course Fees" on page 34.

## Biological Sciences

BISC 600 .....	\$189
BISC 812 .....	\$225

**Earth Sciences**

EASC 603.....	up to \$50
EASC 606.....	up to \$3,000
EASC 611.....	up to \$150
EASC 613.....	up to \$30
EASC 617.....	up to \$50
EASC 619.....	up to \$100
EASC 623.....	up to \$40
EASC 624.....	up to \$250
EASC 812.....	\$225

**Geography**

GEOG 612.....	\$100
GEOG 617.....	\$15
GEOG 628.....	up to \$50

**Marine Science**

All MASC courses offered at the Western Canadian Universities Marine Biological Station (Bamfield) .....	\$137 per unit
--	----------------

**Resource and Environmental Management**

REM 698 .....	\$150
---------------	-------

**Courses at Another Institution**

Except for situations covered by the Western Deans' Agreement, a student enrolled at Simon Fraser University who is approved to complete a course at another institution for credit toward their graduate program is responsible for enrolling at the other

institution and paying fees assessed by that institution. When the student submits proof of tuition fee payment at the other institution, the Simon Fraser University tuition fees for that term will be decreased by that amount and will not exceed the lesser of the two amounts.

**Graduate Benefit Plan**

See "Graduate Benefit Plan" on page 453.

**Admission Deposit**

See "Payment of the Admission Deposit for New Students" on page 35.

**Refund — Withdrawal from Program**

If a student withdraws from the graduate program without completing the degree before the end of the term or withdraws from the term, refunds will be calculated from the date the student officially notifies the Director of Graduate Admissions and Records in writing of his/her withdrawal from the term and/or from the University. Withdrawal in the first month of the term will result in a refund of 75% of the tuition fees and in the second month of the term a refund of 50% of the tuition fees. No other refund will be made.

**Refund — Course Drop**

Students in per term fee programs are not eligible for refunds if they drop one or more courses.

Students in per unit fee programs who drop a course in the first month of the term will receive a 75% refund of tuition fees for that course and 50% in the second month of the term. No refunds will be given if all courses are dropped after that date.

**Refund — Early Completion**

Students who complete their program early in the term may be eligible for a partial refund of the tuition portion of their term fees. For further information, see the dean of graduate studies website at <http://www.sfu.ca/dean-gradstudies>.

**Overdue Accounts and Dishonored Payments**

See "Overdue Accounts and Dishonored Payments" on page 35.

**Full Time and Part Time Attendance**

All graduate students in per term fee programs are considered full time students.

All graduate students enrolled for thesis, project or field exams are considered full time students.

Graduate students in per unit fee programs who enrol for six or more units in a term are considered full time students.

**Tuition Fee Certificates (T2202A)**

See "Tuition Fee Certificates (T2202A)" on page 35.

# Financial Aid for Graduate Students

Graduate students are eligible for a variety of financial assistance programs including entrance or continuing scholarships, graduate fellowships, awards, bursaries and government loans and grants.

**Scholarships and fellowships** recognize outstanding academic achievements; **awards** generally acknowledge outstanding achievements or community contributions. **Bursaries** are awarded on the basis of a demonstrated financial need.

**Government student loans and grants** are awarded on the basis of a demonstrated financial need by the student's province of residence. A grant is funding that a student is not normally required to repay.

Other sources of income are teaching assistantships (TAs) and research assistantships (RAs) which are available in most departments. Applications should be directed to the chair of the appropriate graduate program committee in the intended department.

All graduate scholarship and financial assistance programs are administered by one of two University units. Merit based graduate scholarships and awards (cumulative grade point average of 3.50 or better) are administered by the Office of the Dean of Graduate Studies, room 1100, Maggie Benston Student Services Centre, Tel: 778.782.5411, Fax: 778.782.3080.

Generally, the financial needs-based graduate scholarships, bursaries and loans, including government student loans and grants, the Work-Study program and graduate student bursaries are administered by the Financial Aid and Awards Office, Maggie Benston Student Services Centre, Tel: 778.782.4356.

## Categories of Graduate Scholarships, Awards, Bursaries and Stipends

Merit-based awards available to graduate students and post doctoral researchers from internal and external sources are listed in the graduate awards guide. The guide is available on the dean of graduate studies website at [http://www.sfu.ca/dean-gradstudies/scholarships\\_and\\_awards](http://www.sfu.ca/dean-gradstudies/scholarships_and_awards)

Every attempt has been made to provide up-to-date information. However, it remains the prerogative of the award-granting agencies to change deadline dates, discontinue awards, etc. without prior notice.

## Award Categories

The following awards are administered by the Office of the Dean of Graduate Studies.

- Simon Fraser University Entrance Scholarships (page 229)
- Awards for New and Continuing students (page 231)
- Private Awards (page 231)
- University Administered External Awards (page 237)
- Externally Administered Awards (page 239)

The following awards, bursaries and loans are administered by Financial Aid and Awards, Student Services.

- Bursaries Administered by the University (page 240)
- Bursaries for All Students (page 240)
- Bursaries for Applied Sciences Students (page 242)
- Bursaries for Arts and Social Sciences Students (page 242)
- Bursaries for Business Administration students (page 242)

- Bursaries for Education Students (page 243)
- Bursaries for Communication, Art, and Technology Students (page 243)
- Bursaries for Environment Students (page 243)
- Bursaries for Health Sciences Students (page 243)
- Bursaries for Science Students (page 243)

## General Information and Regulations

The following regulations apply generally to all financial assistance administered by the University.

- Plan and apply well in advance as many scholarship deadlines occur between 4 and 12 months before the granting of the award. Application deadlines are listed for each award on the following pages. Nomination Deadline: April 10. Please note that the published deadlines are approximate dates only, and are subject to change by the awarding agency.
- All scholarships and awards are given on the recommendations of the Senate Graduate Awards Adjudication Committees. Committee decisions, when announced, are final.
- **The University does not guarantee the payment of any scholarships, awards or bursaries listed in the Calendar other than those provided directly from funds of the University. If invested funds do not provide the necessary income for an endowed scholarship, award or bursary, payment of the award may be reduced or the award withheld. The University reserves the right to withhold awards donated by individuals or organizations where the funds required have not actually been received.**
- The University reserves the right to refrain from making an award if, in its opinion, none of the applicants meets the terms specified.
- **The individual graduate student is responsible for knowing deadlines, proper completion of application forms and supplying all appropriate documentation for the various scholarships, awards and bursaries. Incomplete applications may be rejected.**

**The following awards are contingent upon the availability of funds. Further information is available from the Office of the Dean of Graduate Studies, MBC 1100. Completed application forms and all required documentation should be submitted to the Graduate Secretary in the applicant's department of enrolment by the indicated deadlines, unless specified otherwise.**

## Special Awards

### Academic and Service Awards

*Terms of reference:* Graduate students are eligible for many of the University Service Awards listed in the undergraduate *Financial Assistance and Awards* section of the Calendar. Please refer to this section for detailed information.

### Athletic Awards

*Terms of reference:* Graduate students who compete on a Simon Fraser University varsity team may be eligible for Athletic Awards. Please refer to the undergraduate *Financial Assistance and Awards* section of the Calendar for further information. See "Financial Aid and Awards" on page 36.

### Dean of Graduate Studies Convocation Medals

*Nomination deadline:* April 10

*Terms of reference:* A silver medal has been established for a graduating graduate student from each faculty. The dean of the respective faculty will

recommend a student who has achieved the highest level of academic excellence in his/her graduate program.

The criteria for selection of special awards are quality of work, cumulative GPA, and timeliness of completion of the degree. All recommendations are to be forwarded to the dean of graduate studies in April every year.

### Governor General's Gold Medal

*Nomination deadline:* April 10

*Terms of reference:* The Governor General's Gold Medals will be awarded to students who achieve the highest academic standing in their master's or doctoral degree program. The two students selected will be from different faculties.

## Entrance Scholarships

### Major Graduate Entrance Scholarships

**The following entrance awards scholarships are by departmental nomination only. Students applying for admission to a graduate program at Simon Fraser University, and who wish to be considered for an entrance scholarship are strongly encouraged to submit their admission documents to their department of intended enrolment by January 31.**

#### Bert Henry Memorial Graduate Scholarship

*Value:* \$18,000 (subject to funding)

*Nomination deadline:* February 15

*Tenable:* Three consecutive terms

*Terms of reference:* The recipient is an outstanding student who has obtained a master's degree and is entering any PhD program. The recipient must show high academic performance and potential for significant contribution to the chosen field of study. Tenure is for one year and may commence in any term.

#### C.D. Nelson Memorial Graduate Scholarships

*Value:* \$18,000

*Nomination deadline:* February 15

*Tenable:* three consecutive terms

*Terms of reference:* Recipients are outstanding scholars entering any graduate program. Fifteen or more awards are made for a given academic year. Tenure is for one year and may commence in any term.

**Scott Paper Limited Bicultural Graduate Entrance Fellowship**

*Value:* \$18,000 (subject to funding)

*Nomination deadline:* February 15

*Tenable:* three consecutive terms

*Terms of reference:* The recipient is an outstanding student who has received a previous degree at a University in the province of Quebec and is entering any Simon Fraser University graduate program. One award is made. Tenure is for one year and may commence in any term.

**SFU Alumni Association Graduate Scholarship**

*Value:* \$18,000 (subject to funding)

*Nomination Deadline:* February 15

*Tenable:* three consecutive terms

*Terms of reference:* For an outstanding student entering any Simon Fraser University graduate program. Tenure is for one year and may commence in any term.

**Simons Foundation Doctoral Entrance Fellowship (for Women)**

*Value:* \$18,000 (subject to funding)

*Nomination deadline:* February 15

*Tenable:* three consecutive terms

*Terms of reference:* The recipient is an outstanding woman scholar entering any PhD program at Simon Fraser University. The recipient must show potential for significant contribution to society through achievement in her chosen field. Tenure is for one year and may commence in any term.

**Special Graduate Entrance Scholarships**

*Value:* \$300-\$7,000

*Nomination deadline:* April 30

*Tenable:* September, January or May

*Terms of reference:* One term awards up to a maximum of \$7,000 to students entering a new graduate program at Simon Fraser University. To be eligible, a student must show academic excellence and proof that he/she is being actively recruited by another university. Students must be nominated by their graduate program chair in their intended department to the dean of graduate studies.

**Private Entrance Awards**

The following annual or endowed awards are by departmental nomination. Students applying for admission to a graduate program at Simon Fraser University and who wish to be considered for an entrance scholarship in this category are strongly encouraged to submit their admission documents to their department of intended enrolment by January 31.

**Wm. F. and Ruth Baldwin Graduate Scholarship in History**

*Value:* \$9,000

*Nomination deadline:* February 15

*Tenable:* Two consecutive terms

*Terms of reference:* One or more, two-term awards. Preferentially to an incoming student pursuing a graduate degree in British history.

**Graduate Entrance Scholarship in Business Administration**

*Value:* \$3,500

*Nomination deadline:* February 15

*Tenable:* Any term

*Terms of reference:* An award for a student entering a graduate degree program in business administration in the Faculty of Business Administration.

**Cappgemini Graduate Entrance Scholarships in Business Administration**

*Value:* \$20,000

*Nomination Deadline:* February 15

*Tenable:* fall term

*Terms of reference:* To attract the best and brightest doctoral students to the Segal Graduate School of Business, whose research interests are in innovation,

technology and sustainability. Two, one-year awards, valued at \$20,000 each are available.

**Douglas Cole Memorial Graduate Entrance Scholarship in Cultural History**

*Value:* \$880

*Nomination deadline:* February 15

*Tenable:* fall

*Terms of reference:* One award will be awarded to a student entering the graduate program in history whose focus will be on cultural history.

**Deloitte Graduate Entrance Scholarship**

*Value:* \$6,375

*Nomination deadline:* September 30

*Tenable:* spring term

*Terms of reference:* For a full-time student entering the master of risk management program.

**DuPont Graduate Entrance Scholarship in Chemistry**

*Value:* \$2,575

*Nomination deadline:* February 15

*Tenable:* Any term

*Terms of reference:* Two scholarships will be awarded to the top entering graduate students in the Department of Chemistry. Candidates will be judged on their scholastic and research achievements and potential. Students must be nominated by their intended department.

**Fernandez Earle Graduate Entrance Fellowship in Fisheries**

*Value:* \$15,000 per year

*Nomination deadline:* February 15

*Tenable:* fall, spring and summer terms

*Terms of reference:* For a student entering a master's or doctoral program in any science discipline in the Faculty of Science at Simon Fraser University, after completion of a previous degree at Hawaii Pacific University or for a Simon Fraser University student registered in a research term of a master's or PhD program in the Faculty of Science who travels to Hawaii Pacific University to conduct research or write a project or thesis. Up to a maximum of two years of funding for a master's candidate and up to four years of funding for a doctoral candidate.

**A. John Ellis Graduate Entrance Scholarship in Business Administration**

*Value:* \$10,000

*Nomination deadline:* February 15

*Tenable:* fall and spring terms

*Terms of reference:* One or more awards to attract the best and brightest master's or doctoral students to the Segal Graduate School of Business

**EMAR Canada Annual Graduate Entrance Scholarship in Urban Studies**

*Value:* \$2,500

*Nomination deadline:* February 15

*Tenable:* fall term

*Terms of reference:* To attract and provide financial support for students entering the master of urban studies program.

**Executive MBA (EMBA) Alumni Entrance Scholarships**

*Value:* \$5,000 or \$10,000

*Nomination deadline:* September 30

*Tenable:* fall term

*Terms of reference:* Either one \$10,000 or two \$5,000 entrance scholarships per year for outstanding graduate students entering the executive MBA program in the Faculty of Business Administration. Students will be nominated for these awards by the associate dean on the basis of demonstrated career progression, potential for future career achievements and demonstrated outstanding leadership or service to the community.

**Thelma Finlayson Graduate Entrance Scholarship**

*Value:* \$6,000

*Nomination deadline:* February 15

*Tenable:* fall term

*Terms of reference:* A minimum of three scholarships are available each year to incoming students pursuing studies towards the master of pest management.

**Arthur and Ancie Fouks Graduate Entrance Award in Public Service**

*Value:* \$4,200

*Nomination deadline:* February 15

*Tenable:* Any term

*Terms of reference:* One award to recognize both outstanding academic performance and a high level of public service by a student entering a graduate program at Simon Fraser University. Student must be nominated by his/her intended department.

**Graduate Entrance Scholarship in Geography**

*Value:* \$4,000

*Nomination deadline:* February 15

*Tenable:* Any term

*Terms of reference:* One award for a student entering a graduate program in geography.

**Global Asset and Wealth Management Business Council Entrance Scholarship in Business Administration**

*Value:* \$6,000 or \$10,000

*Nomination deadline:* May 30, September 30, and January 30

*Tenable:* final two terms of the program

*Terms of reference:* Up to ten scholarships per calendar year, to full-time students entering the global asset and wealth management MBA program after having spent a minimum of at least two years employed in the financial services industry in a professional capacity. Students will be nominated for these awards by the director of the program.

**Meredith Kimball Graduate Entrance Scholarship in Women's Studies**

*Value:* \$1,275

*Nomination deadline:* February 15

*Tenable:* fall term

*Terms of reference:* One scholarship is available for a student entering a graduate program in the Department of Women's Studies. Applicants must be nominated for this award by the chair of the graduate program.

**Catherine Ann McKay Publishing Award**

*Value:* \$1,660

*Nomination deadline:* February 15

*Tenable:* summer term

*Terms of reference:* Enrolment in the master's of Publishing program. One award to defray a student's expenses incurred while participating in the internship component of the program.

**Master of Pest Management Graduate Entrance Scholarship**

*Value:* \$850

*Nomination deadline:* February 15

*Tenable:* fall term

*Terms of reference:* One award for a student entering a graduate program leading to the master of pest management in the Centre for Environmental Biology.

**Graduate Entrance Scholarship in Political Science**

*Value:* \$2,200

*Nomination deadline:* February 15

*Tenable:* Any term

*Terms of reference:* One award for a student entering an MA or PhD program in political science.

**Faculty of Science Graduate Entrance Scholarship**

*Value:* \$1,900

*Nomination deadline:* February 15

*Tenable:* fall term

*Terms of reference:* One award for a student from the University College of the Fraser Valley entering the

MSc program in a department in the Faculty of Science at Simon Fraser University.

**O.H. Sorila Memorial Graduate Scholarship in Philosophy**

Value: \$700

Nomination deadline: February 15

Tenable: fall term

Terms of reference: One scholarship for a student entering a master of arts program in the Department of Philosophy. Preference is given to a student coming from overseas, but intending to return to their homeland after degree completion.

**Southam Inc. Graduate Entrance Scholarship in Publishing**

Value: \$3,350

Nomination deadline: February 15

Tenable: Any term

Terms of reference: One award for a student entering the master of publishing program.

**William and Ada Isabelle Steel Memorial Graduate Scholarship**

Value: \$16,000

Nomination deadline: February 15

Tenable: three consecutive terms

Terms of reference: The recipient is an outstanding full time student in any Simon Fraser University graduate program whose research takes place outside the lower mainland of BC. One award (of which \$2,000 of the award value is targeted for travel, accommodation and related research expenses). Tenure is one year and may commence in any term.

**Dorothy Middel Thomas Graduate Entrance Scholarship in English**

Value: \$700

Nomination deadline: February 15

Tenable: Any term

Terms of reference: One award for a student entering a graduate program in the Department of English.

**Doreen Wilkinson Memorial Graduate Scholarship in Economics**

Value: \$2,425

Nomination deadline: February 15

Tenable: Any term

Terms of reference: One or more scholarships will be awarded to graduate students entering the doctoral program in economics. The fund honors Doreen Wilkinson, Economics Departmental Assistant, friend and mentor to many. Students must be nominated by the department.

**Grace Woodworth MacInnis Graduate Award**

Value: \$5,475

Nomination deadline: February 15

Tenable: Any term

Terms of reference: Established in honour of Grace Woodworth MacInnis in recognition of her outstanding contribution as a Canadian parliamentarian and a pioneer woman in Canadian politics. The award supports a student entering the graduate program in Women's Studies.

**Awards for New or Continuing Students**

**Graduate Fellowships**

Value: varies; GFs are awarded in increments of .5, 1.0, 1.5 and 2.0. A partial GF (.5) is valued at \$3,125; a full GF (1.0) is valued at \$6,250. Applicants may be eligible to receive up to a maximum of two full GFs, or four partial GFs during the academic year.

Application deadline: April 15

Tenable: Any term

Terms of reference: Recipients are new or continuing students who are enrolled full-time in a graduate degree program at Simon Fraser University. Awards are made on the basis of academic merit; the normal minimum criterion for eligibility is a 3.5 CGPA.

**Faculty of Applied Sciences Dean's Fund Graduate Fellowships**

Value: \$3,125

Application deadline: April 15

Tenable: Any term

Terms of reference: one term awards. Recipients are full time students in a graduate program in the Faculty of Applied Sciences. Awards are made based on academic merit (minimum of 3.50 cumulative grade point average) and good standing in research ability. Fellowship is based on matching basis: half from the Faculty of Applied Sciences and the other half from the thesis supervisor by way of a research assistantship for a total value of \$6,250.

**Graduate (International) Research Travel Award**

Value: up to a maximum of \$6,250

Application deadline: February 1

Tenable: summer, fall or spring term

Terms of reference: For master's and doctoral students enrolled in a graduate program at Simon Fraser University who must travel to undertake research for their degree requirements. The duration of the research trip must be a minimum of one month to a maximum of four consecutive months. The award value will be prorated depending on trip duration and location. Master's students must complete a project or thesis that will be deposited in the Simon Fraser University Library and hold the award within two years of beginning their degree program. Doctoral students must hold the award within three years of beginning their degree program.

**President's PhD Research Stipends**

Value: \$6,250

Application deadline: end of the second month of the term preceding the term of tenure.

Tenable: Any term

Terms of reference: Doctoral students who commenced their PhD program by January 2009 are eligible to apply. Applicants must be recommended for the PRS by the graduate program chair of the department of enrolment. At the time of application, eligible students must have completed all degree requirements with the exception of the thesis.

**Scotiabank Global Asset & Wealth Management MBA Entrance Scholarship in Business Administration**

Value: \$3,850

Nomination deadline: May 30 or September 30

Tenable: fall, spring or summer

Terms of reference: To attract and provide financial support to a full-time student in the GAWM MBA Program after having spent a minimum of at least two years employed in the financial industry in a professional capacity.

**Travel and Minor Research Awards for Graduate Students**

Value: varies

Application deadline: varies by department of enrolment

Tenable: fall, spring or summer term

Terms of reference: To encourage graduate students to attend conferences to present their research or to travel to undertake their research. Graduate students may also incur non-travel costs associated with their research or conference presentations. It is at the discretion of each graduate program chair to determine the number and value of travel and research awards available within their departmental allocation.

**Private Awards**

The following awards are contingent upon the availability of funds. Detailed information is available from the Office of the Dean of Graduate Studies, MBC 1100. Completed application forms

and all required documentation should be submitted to the graduate secretary in the applicant's department of enrolment by the indicated deadlines, unless specified otherwise

**J. Abbott/M. Fretwell Graduate Fellowship in Fisheries Biology**

Value: \$4,325

Application deadline: September 30

Tenable: spring term

Terms of reference: One fellowship to a graduate student showing academic merit in fisheries biology. Preference will be given to an applicant with a strong sports background. This fellowship was established in memory of Jeremy Abbott and Michael Fretwell after their death in a tragic helicopter accident in September 1988.

**Alan David Aberbach Scholarship in United States History**

Value: \$3,800

Nomination deadline: May 30

Tenable: fall

Terms of reference: One award to advance the study of U.S. history will be available to a student who is either entering, or registered in, a graduate program in the Department of History whose research focus is on some aspect of U.S. history.

**Access Copyright Graduate Award in Publishing Studies**

Value: \$1,775

Application deadline: September 30

Tenable: spring term

Terms of reference: One award to a graduate student in the master of publishing program, demonstrating experience within the Canadian book publishing and/or periodical and/or music publishing sector.

**M.D. Angus & Associates Graduate Fellowship in Psychology**

Value: \$900

Application deadline: September 30

Tenable: spring term

Terms of reference: One award for a graduate student in psychology for outstanding contributions to the measurement of behavior or innovation of new methods for quantifying behavior.

**Archaeometry Prize**

Value: \$200

Application deadline: April 15

Tenable: summer term

Terms of reference: A prize will be awarded annually in the summer term. The prize will be available to either an undergraduate or graduate student who has shown exceptional scholarship and an interest in the application of physical science to archaeology. Contact Financial Aid and Awards, Student Academic Resources, Maggie Benston Student Services Centre.

**Association of Women in Finance Graduate Scholarship**

Value: \$1,500

Nomination deadline: May 30

Tenable: fall term

Terms of reference: A one-term award for an outstanding student pursuing a master of business administration, with past work experience in the field of finance and future plans to pursue a career in the area of finance.

**David L. Baillie Graduate Fellowships in Molecular and Cellular Biology**

Value: \$1,700 each

Application deadline: May 31

Tenable: fall term

Terms of reference:

Two awards annually, currently valued at \$1,700 each, to students pursuing a PhD degree in the molecular biology and biochemistry department. Students can be pursuing any field of study within the

department and must have completed a minimum of two years towards their PhD program at the time of application.

#### **BCAA Environmental Studies in Transportation Award**

*Value:* \$700

*Application deadline:* September 30

*Tenable:* spring term

*Terms of reference:* One award to recognize outstanding academic performance by a graduate student whose thesis research is related to the study of land-based transportation systems and their relationship to, and improvement of, the environment.

#### **BC Council of Garden Clubs — Mildred Wells Scholarship**

*Value:* \$1,500

*Application Deadline:* May 30

*Tenable:* fall term

*Terms of Reference:* A scholarship for a student in the master of pest management program whose course of studies emphasizes horticultural pest control. The recipient must be a Canadian citizen.

#### **Aphra Behn Graduate Scholarship in English**

*Value:* \$7,000 each

*Application deadline:* May 30

*Tenable:* fall, spring or summer term

*Terms of reference:* One or more, one-term awards supported by the Ann Messenger endowment. For a mature (minimum age 30) female student pursuing a graduate degree program in English and conducting research, preferably in pre-20th century English literature.

#### **B.P. Beirne Prize in Pest Management**

*Value:* \$2,000

*Nomination deadline:* April 30

*Tenable:* Any term

*Terms of reference:* An annual prize with accompanying certificate will be awarded during May each year to the outstanding graduate from the master of pest management program in the three terms immediately preceding Convocation. The award is in honor of the late Dr. B.P. Beirne, founder of the Centre for Environmental Biology at Simon Fraser University. It will be made by nomination by the director of the Centre for Environmental Biology in consultation, as necessary, with faculty. The candidate will be judged equally on his or her scholastic record, professional paper and relevant professional attributes. The student must be nominated by the department by April 30.

#### **Margaret Lowe Benston Memorial Graduate Bursary in Women's Studies**

*Value:* \$1,950

*Application deadline:* May 30

*Tenable:* fall term

*Terms of reference:* A one term award for students in the MA or PhD program in women's studies, with demonstrated financial need.

#### **Brian J. Blaha Memorial Annual Graduate Scholarship in Computing Science**

*Value:* \$1,000

*Application deadline:* May 31

*Tenable:* fall semester

*Terms of reference:* A one semester award to provide financial support to a master's or doctoral student in computing science with work experience in planning-related activities, organizations or involvement.

#### **BMO Graduate Scholarship in Business**

*Value:* \$3,200

*Nomination deadline:* May 30

*Tenable:* fall

*Terms of reference:* For graduate students who are pursuing, or intend to pursue, a graduate degree in business administration at the Segal Graduate School of Business at Simon Fraser University.

#### **Marilyn Bowman Graduate Scholarship in Psychology**

*Value:* \$1,325

*Nomination deadline:* September 30

*Tenable:* spring term

*Terms of reference:* An award for a graduate student who has completed his/her master's degree in clinical psychology and is enrolled in the PhD clinical program in the Department of Psychology. Where possible, preference will be given to a Canadian citizen or landed immigrant. A student will be nominated for the award by the chair of the Department of Psychology.

#### **Gene Bridwell Graduate Scholarship In Special Collections**

*Value:* \$1,000

*Application deadline:* October 15

*Tenable:* spring term

*Terms of reference:* An award for a graduate student who shows evidence of scholarly interest or creative achievement related to Simon Fraser University's contemporary literature collection. Applicants submit an outline of studies and relevance to the Simon Fraser University contemporary literature collection directly to the dean of graduate studies.

#### **Burnaby Rhododendron and Garden Society**

*Value:* \$500

*Application deadline:* September 30

*Tenable:* fall term

*Terms of reference:* A one term award for a student in a master of pest management program. Applicants will be evaluated based on their previous contributions to pest management, performance in graduate course work, conference presentations and community engagement.

#### **Roy L. Carlson Graduate Scholarship in Prehistoric British Columbia Archaeology**

*Value:* \$4,275

*Application deadline:* May 30 (by nomination)

*Tenable:* fall term

*Terms of reference:* A one-term award for a graduate student in archaeology whose research is on the prehistoric archaeology of BC. Eligible theses topics include those based on analysis of BC archaeological collections held by the Simon Fraser University Museum of Archaeology and Ethnology. Where possible, preference will be given to a Canadian citizen or landed immigrant. A student will be nominated for the award by the Department of Archaeology's graduate program committee.

#### **Phyllis Carter Burr Graduate Scholarship in Developmental Biology and Cell Biology**

*Value:* \$2,250 each

*Application deadline:* September 30

*Tenable:* any term

*Terms of reference:* two awards valued at \$2,250 each annually for graduate students in any department who intend to pursue an academic research career specializing in developmental biology and/or cell biology. Currently this would include students in the Departments of Biological Sciences, Molecular Biology and Biochemistry and Biomedical Physiology and Kinesiology in the Faculty of Science. Preference will be given but not restricted to, female applicants.

#### **Cable Television Pioneer Graduate Scholarship**

*Value:* \$825

*Application deadline:* September 30

*Tenable:* spring term

*Terms of reference:* One scholarship for a graduate student in communication specializing in and communication policy.

#### **Canron Limited Sidney Hogg Memorial Graduate Scholarship**

*Value:* \$650

*Application deadline:* September 30

*Tenable:* spring term

*Terms of reference:* Canron Limited has established a scholarship in memory of the late Mr. Sidney Hogg, a Convocation founder of Simon Fraser University. This annual scholarship will be awarded to a worthy and deserving student in postgraduate studies in physics. The spirit of this scholarship is to assist a student who requires financial aid to continue studies and who, at the same time, qualifies in terms of character and scholarship as determined by the physics department and the Senate Graduate Awards Adjudication Committee.

#### **CanWest Global Graduate Fellowship in Communications**

*Value:* \$14,000

*Application deadline:* September 30

*Tenable:* two consecutive terms

*Terms of reference:* One or more scholarships awarded annually to graduate students in the School of Communication with a particular interest in issues related to broadcasting.

#### **Chemistry Alumni Graduate Scholarship**

*Value:* varies

*Application deadline:* September 30 (by nomination)

*Tenable:* spring term

*Terms of Reference:* Awards equal to one term's tuition fees will be disbursed to one or more candidates in a master's or doctoral program in chemistry who do not currently hold an NSERC grant or other award of equal or greater value. Candidates must be nominated for this award by the Department of Chemistry scholarship committee with the approval of the chair of the department.

#### **Chemistry Graduate Research Award**

*Value:* \$1,350

*Application deadline:* May 30

*Tenable:* fall term

*Terms of reference:* One award to recognize superior performance in the first year of graduate studies in chemistry.

#### **David and Rachelle Chertkow Healthy Families Essay Prize**

*Value:* \$500

*Application deadline:* January 30

*Tenable:* summer term

*Terms of reference:* One award for a graduate student in any faculty who is pursuing research in the area of healthy families. The prize will consist of the cash award plus a plaque or certificate. The criteria include demonstrated academic excellence at the undergraduate or graduate level and submission of an essay/research paper on promoting healthy families, or prevention of family violence.

#### **Israel Chertkow Memorial Scholarship in Gerontology**

*Value:* \$525

*Nomination deadline:* September 30

*Tenable:* spring term

*Terms of reference:* Awarded to the top graduating student in the gerontology diploma program. It is made by nomination by the director of the Gerontology Research Centre. Nomination deadline: September 30.

#### **Dr. J.V. Christensen Graduate Scholarship**

*Value:* \$5,100

*Application deadline:* September 30

*Tenable:* spring term

*Terms of reference:* One or more awards for graduate students who are pursuing, or intend to pursue, a graduate degree in history or archaeology.

#### **CIOABC/SAP Graduate Scholarship in Business Administration**

*Value:* \$2,000

*Nomination deadline:* September 30

*Tenable:* spring term

*Terms of reference:* An award for a graduate student in the Faculty of Business Administration preferably with a focus on management information systems. A student will be nominated for the award by the associate dean, MBA programs, Faculty of Business Administration.

#### **Contemporary Literature Graduate Research Award**

*Value:* \$1,000

*Nomination deadline:* May 31

*Tenable:* fall term

*Terms of reference:* Supported from the Robin Blaser Endowment Fund, this award is for a term of research in the contemporary literature collection at Simon Fraser University, for a graduate student in the Department of English. Preference will be given to a doctoral student.

#### **Barry Clark Memorial Graduate Scholarship in Pre-Twentieth Century English Literature**

*Value:* \$1,150

*Application deadline:* September 30

*Tenable:* spring term

*Terms of reference:* One award for a graduate student in English, specializing in pre-twentieth century English literature.

#### **Graduate Award in Communication**

*Value:* \$5,500

*Nomination deadline:* May 30

*Tenable:* fall term

*Terms of reference:* A one-term award for a graduate student pursuing an MA or PhD program in the School of Communication. Applicants must have demonstrated involvement in athletics, campus life and/or community leadership. A student will be nominated for the award by the director of the School of Communication.

#### **CN/Joe Segal Graduate Entrepreneurship Award In Business**

*Value:* \$3,300

*Nomination deadline:* September 30

*Tenable:* spring term

*Terms of reference:* A one term award for a student pursuing a graduate degree in Business Administration. Applicants should demonstrate their involvement in entrepreneurial endeavours by providing their resume and cover letter describing their interest and involvement in entrepreneurial pursuits. An applicant will be nominated for the award by the chair, Faculty of Business Graduate Committee.

#### **Coastal Zone Canada (B.C.) Association Graduate Scholarship in Coastal Studies.**

*Value:* \$725

*Nomination deadline:* May 30

*Tenable:* fall term

*Terms of reference:* One award to provide financial support for a graduate student focussing on community-based approaches to coastal management, specific to issues within the province of BC. Student must be affiliated with the Centre for Coastal Studies.

#### **COGECO Graduate Scholarship in Communications**

*Value:* \$12,225

*Application deadline:* September 30

*Tenable:* spring and summer terms

*Terms of reference:* One two-term award for a graduate student in Communication.

#### **Samuel and Leatrice Cohen Prize in Environmental Physiology**

*Value:* \$825

*Application deadline:* September 30

*Tenable:* spring term

*Terms of reference:* One prize to recognize the best student paper resulting from graduate research in the field of environmental physiology.

#### **The Graduate Prize in Computing Science**

*Value:* \$200

*Nomination deadline:* January 30

*Tenable:* summer term

*Terms of reference:* One prize is awarded to the top graduate student in computing science from income earned from the Graduate Prize in Computing Science endowment fund.

#### **Cook Conference Scholarship**

*Value:* \$1,675

*Application deadline:* January 30

*Tenable:* summer term

*Terms of reference:* One or more scholarships will be awarded to graduate students studying in any field of history on the basis of high academic performance.

#### **Criminology Graduate Student Research and Education Grants**

*Value:* maximum of \$250 each

*Application deadline:* January 15, September 15

*Tenable:* summer or spring term

*Terms of reference:* Travel grants for graduate students in the School of Criminology to travel to conduct research or participate at a conference, workshop or attend a course.

#### **Alan Dakin Annual Graduate Award in Hydrogeology**

*Value:* \$500

*Application deadline:* May 30

*Tenable:* fall term

*Terms of reference:* To provide support for a graduate student in a master's or doctoral program in hydrogeology in the Department of Earth Sciences, geography or master of resource management program who shows promise of making a contribution to the evaluation, protection and sustainable use of groundwater resources in BC. Applicants will be evaluated based on their previous contributions to hydrogeology, performance in graduate course work, conference presentations and community engagement.

#### **Isabel Dawson Memorial Scholarship in Gerontology**

*Value:* \$575

*Application deadline:* September 30

*Tenable:* spring term

*Terms of reference:* To provide financial recognition to an outstanding student engaged in research or study in gerontology.

#### **Manuela Dias Memorial Scholarship in Publishing Studies**

*Value:* \$500

*Application deadline:* September 30

*Tenable:* spring term

*Terms of reference:* A one-term award for a student entering or pursuing a master's degree in publishing studies. Applicants must submit at least one short sample of professional, academic or business writing or a portfolio piece.

#### **Chad Day Graduate Fellowship in Resource Management**

*Value:* \$5,000

*Application deadline:* May 30

*Tenable:* fall and spring terms

*Terms of reference:* One award for a graduate student in the School of Resource and Environmental Management specializing in environmental and resource management problems in British Columbia.

#### **Gordon Diewert Graduate Scholarship in Kinesiology**

*Value:* \$2,000

*Application deadline:* May 30

*Tenable:* fall term

*Terms of reference:* Awarded to a graduate student on the basis of high academic performance and study in the area of motor learning. This fund has been established in honor of Dr. Gordon Diewert for his

contribution to the Department of Biomedical Physiology and Kinesiology at Simon Fraser University.

#### **Downtown Vancouver Association Graduate Awards in Urban Studies**

*Value:* \$1,125

*Nomination deadline:* May 30

*Tenable:* fall term

*Terms of reference:* A one-term award to recognize and reward an outstanding student pursuing a graduate degree in urban studies who submits the best essay or project in a given year. A student must be nominated for the award by the chair of the department.

#### **Doug Drummond Research Fellowship**

*Value:* \$2,775

*Application Deadline:* May 30

*Tenable:* fall term

*Terms of Reference:* A one-term award for a graduate student pursuing research on subjects related to the planning and management of the environment and infrastructure of the City of Burnaby. The fellowship is granted in recognition of the work of Doug Drummond, Mayor of the City of Burnaby (1996-2002) in building effective relationships between the City of Burnaby and Simon Fraser University.

#### **Robert Hancock Dunham Memorial Scholarship in English**

*Value:* \$3,725

*Application deadline:* May 30

*Tenable:* fall term

*Terms of reference:* One award for a student pursuing a graduate degree program in the Department of English. Students must be nominated for this award by the chair of the department.

#### **Ebco/Eppich Graduate Scholarships**

*Value:* \$700-\$1,400 each

*Nomination deadline:* September 30

*Tenable:* spring term

*Terms of reference:* One or more scholarships valued between \$700 and \$1,400 each are available to graduate students in computing science, engineering science, resource management, kinesiology, physics, math, statistics, and interactive arts and technology. These are:

The Robert, Edwin, Richard and Elizabeth Eppich Graduate Scholarship  
The Helmut Eppich Graduate Scholarship  
The Hugo Eppich Graduate Scholarship  
The Gordon, Monica, and Sonia Eppich Graduate Scholarship  
The Kaltenecker Family Graduate Scholarship  
The Ralph M. Howatt Family Graduate Scholarship  
The Century 21/Charlwood Family Graduate Scholarship  
The Frieder Karl Kempe Graduate Scholarship  
The Cy and Emerald Keyes Graduate Scholarship  
The Franklin D. and Helen K. Van Pykstra Graduate Scholarship  
The Bel Construction Ltd. Graduate Scholarship  
The Clark, Wilson Graduate Scholarship  
The Canadian Liquid Air Ltd. Graduate Scholarship  
The Hanson Inc. Graduate Scholarship  
The Deskin Sales Graduate Scholarship  
The Jardine Rolfe Ltd. Graduate Scholarship  
The Nova-Tech Engineering Inc. Graduate Scholarship  
The Westak International Sales, Inc. Graduate Scholarship  
The Transco Tool and Equipment Ltd. Graduate Scholarship  
The ABC Recycling Ltd. Graduate Scholarship  
The Robar Industries Limited Graduate Scholarship  
The Opus Building Corporation Graduate Scholarship  
Borden Ladner Gervais Graduate Scholarship  
The Pacific Metals/Leon Lotzkar Memorial Graduate Scholarship

The Backwater Industries/Jost Family Graduate Scholarship  
 The Global (West) Wholesalers Ltd. Graduate Scholarship  
 The Kreykenbohm Family Graduate Scholarship  
 The Anna Kreykenbohm Graduate Scholarship  
 The Wilhelm Kreykenbohm Graduate Scholarship  
 The Michael and Grace Kreykenbohm, Karen Kreykenbohm Montgomery, and Anthony Montgomery Graduate Scholarship  
 Praxair Inc. Graduate Scholarship

Students are recommended for these awards by the associate dean of the Faculty of Applied Sciences to the dean of graduate studies. Application deadline: September 30.

**Editors' Association of Canada/Association Canadienne de Reviseurs, BC Branch Graduate Scholarship in Publishing Studies**  
 Value: \$250

Application deadline: May 30

Tenable: fall term

Terms of reference: A one-term award for a student pursuing a master of publishing degree. Application must be accompanied by a sample of professional, academic or business writing or a portfolio piece.

**Emergency Preparedness Conference Scholarship in Emergency Communications**  
 Value: \$3,000

Application deadline: September 30

Tenable: spring term

Terms of reference: An award to provide financial support for a graduate student in the School of Communication or other appropriate area in the emergency communications field, pursuing an applied research project in the area of emergency/disaster management.

**Faculty of Education Field Programs Research Fellowships**

Value: \$2,400 (Master's) \$2600 (PhD)

Application Deadline: by the end of the second month of the term preceding the term of tenure

Tenable: any term

Terms of Reference: A one-term award for students who have identified the topic of "teacher inservice professional development" as their area of interest and plan to undertake a thesis in which the investigation is closely related to the work of field programs in the Faculty of Education. Students may receive the award only once during the term of their graduate program.

**Dr. E.A. Fattah Graduate Scholarship in Criminology**

Value: \$2,300

Application deadline: September 30

Tenable: spring term

Terms of reference: An award to a graduate student in Criminology pursuing graduate work in the area of victimology. Student should show promise of outstanding achievement at the graduate level with particular emphasis on intellectual ability, originality and ability in research.

**Dr. Marguerite Fauquency Graduate Scholarship in French**

Value: \$975

Application deadline: September 30 or January 30

Tenable: spring or summer term

Terms of reference: One award to a graduate student who has completed at least one term of graduate work at Simon Fraser University in the area of French linguistics, varieties of French, French-based Creoles, French literature, or French studies.

**Barbara Ferrier Chemistry Research Award**

Value: \$1,075

Nomination deadline: May 30

Tenable: fall term

Terms of reference: One award for a student in a graduate program in chemistry to help with the costs associated in attending an academic conference. Students will be evaluated based on their previous annual progress. Evidence of a suitable conference with a high impact for the student's program must be included as part of the nomination package, as well as a concise outline of the proposed benefits of attending the conference. A student will be nominated for the award by the graduate program committee in the Department of Chemistry.

**Diana Filer/Quirks & Quarks Graduate Award for Best PhD Thesis**

Value: varies

Nomination deadline: April 30

Tenable: June convocation

Terms of reference: The purpose of this award is to recognize the best PhD thesis by a convocating doctoral student. The award recipient will be announced by the dean of graduate studies during the convocation ceremonies each spring.

**Professor Thelma Finlayson Graduate Fellowship**

Value: \$6,000

Application deadline: September 30

Tenable: spring term

Terms of reference: Professor Thelma Finlayson has established a fellowship to be offered to graduate students pursuing studies toward the master of science degree in pest management. Preference will be given to students who are studying entomology.

**French Memorial Graduate Scholarship**

Value: \$1,675

Application deadline: May 30

Tenable: fall term

Terms of reference: One award for a graduate student in French.

**Mahatma Gandhi Memorial Scholarship in Kinesiology**

Value: \$850

Application deadline: January 30

Tenable: summer term

Terms of Reference: A scholarship will be awarded to a graduate student in the Department of Biomedical Physiology and Kinesiology whose research interests are in the areas of nutrition and/or aging. Preference may be given to students who are considered to be deserving and financially needy.

**Dr. Ellen Gee Memorial Graduate Scholarship for Excellence**

Value: \$1,850

Nomination deadline: September 30

Tenable: spring term

Terms of reference: A one-term award for a student in their first year of study, pursuing a graduate degree in sociology or anthropology and whose research is in the area of family, gender, ethnicity, ageing, health and/or social policy. A student must be nominated for the award by the chair of the department.

**Glen Geen Graduate Scholarship in Marine Biology**

Value: \$775

Application deadline: September 30

Tenable: spring term

Terms of reference: One award for a graduate student in biological sciences with a concentration on marine biology.

**Michael Geller Graduate Scholarship in Urban Development**

Value: \$4,000

Application Deadline: May 30

Tenable: fall term

Terms of Reference:

A one-term award to provide financial support to a master's or PhD student whose research focuses on urban development.

**German Canadian Benevolent Society of British Columbia Aulinger Award in Gerontology**

Value: \$600

Application deadline: September 30

Tenable: spring term

Terms of reference: The Aulinger Award in Gerontology provides financial support for a graduate student pursuing a master's degree in gerontology. Emphasis is on high academic performance and a research focus on aging and the built environment or on health promotion and aging.

**Gloria Gutman Conference Travel Award**

Value: \$800

Nomination deadline: September 30

Tenable: spring term

Terms of reference: For a student in a graduate program in the Department of Gerontology to help with the costs associated with participating in an academic conference whose abstract has been accepted for presentation at a suitable conference on aging.

**Laurine Harrison Graduate Thesis Award**

Value: \$1,675

Application deadline: May 31

Tenable: fall, spring or summer term

Terms of reference: Eligible students must be enrolled in a master's program in the Faculty of Arts and Social Sciences, have completed all course work and comprehensive exams (if applicable), and are in the final, thesis-writing term of a master's program.

**Faculty of Health Sciences Faculty and Staff Community Health Practice Awards**

Value: \$500-\$1,000

Application deadline: January 30

Tenable: summer term

Terms of reference: Up to ten achievement awards per year ranging in value between \$500 and \$1,000 will be given to graduate students in the Faculty of Health Sciences who are applying for a full-time practicum term for the summer term and intend to use the award to help defray costs to participate in field research in health sciences.

**Sidney Hogg Memorial Graduate Scholarship**

Value: \$700

Application deadline: September 30

Tenable: spring term

Terms of reference: Mrs. Sidney Hogg has established an endowment, the earned income therefrom to provide a perpetual scholarship annually. This scholarship is to be awarded to a graduate student in science who needs financial assistance in order to continue studies and who is qualified in terms of character and scholarship. The award may be held in conjunction with other awards.

**HSBC Graduate Award in Business**

Value: \$4,300

Nomination deadline: May 31

Tenable: fall and spring terms

Application deadline: January 30

Tenable: summer term

*Terms of reference:* One scholarship to a graduate student in economics who has completed one term of graduate work and is a citizen of an Asian developing country.

**Lang Wong Memorial Endowment Scholarship in Engineering**

Value: \$1,450

Application deadline: January 30

Tenable: summer term

*Terms of reference:* One scholarship awarded annually to a graduate student in engineering who has completed one term of graduate work and is a citizen of an Asian developing country.

**Dr. John Yorston Memorial Graduate Scholarship in Pest Management**

Value: \$1,575

Application deadline: May 30

Tenable: fall term

*Terms of reference:* One award for a graduate student in the master of pest management specializing in crop protection, plant pathology and nematology.

**University Administered External Awards****Accelerate BC Graduate Research Industrial Internship Program**

Value: \$15,000 - \$10,000 stipend with a \$5,000 research grant

*Application deadline:* none

*Tenable:* fall, spring or summer term

Available to all faculties, schools and departments at BC universities. It partners graduate student and postdoctoral fellow interns and their supervising professors in any discipline with BC companies, hospitals, government agencies and not-for-profit organizations. Graduate student interns spend 50% of their time over four months on site with the industrial partner researching an issue of interest to all parties. The balance of the intern's time is spent at Simon Fraser University further advancing the research under the guidance of their faculty supervisor. The program is administered by MITACS, a federally-funded Network of Centres of Excellence. Apply through [www.mitacsinternships.ca](http://www.mitacsinternships.ca)

#### **Action Canada Fellowships**

*Value:* varies

*Nomination deadline:* December, to the Office of the Dean of Graduate Studies

*Terms of reference:* Action Canada is seeking nominations for candidates who are in the early years of pursuing their graduate program, who have the promise to be future Canadian leaders and who will benefit by the study of leadership and public policy issues. The fellowship year is to be undertaken in conjunction with their graduate studies. Candidates must be nominated for this award. For full information about how to submit a nomination package to the dean of graduate studies, visit [www.actioncanada.ca](http://www.actioncanada.ca)

#### **Canadian Institutes of Health Research (CIHR) Sir Frederick Banting and Dr. Charles Best CGS M Scholarships**

*Value:* \$17,500 year

*Application deadline:* November 1

*Tenable:* annual

*Terms of reference:* The Canada Graduate Scholarships Master's Awards administered by CIHR are intended to provide special recognition and support to students who are pursuing or intend to pursue a master's degree in a health related field in Canada. Candidates are expected to have an exceptionally high potential for future research achievement and productivity. Candidates must have completed or be in the last year of a bachelor's degree or have been enrolled for no more than 10 months as a full time student in a master's program. Only those students engaged in full time master's programs in which research is a major component and who are studying under the supervision of faculty members holding research funds obtained through a competitive peer reviewed process are eligible to apply.

#### **Student Led Research Grants in the Social Policy Field**

*Value:* \$1,500

*Application deadline:* November

*Value:* \$10,000

*Application deadline:* May 1

*Tenable:* fall and spring terms

*Terms of reference:*

A two-term award for a mature, single woman in a graduate or undergraduate program at Simon Fraser University. Granted on the basis of financial need and academic proficiency.

#### **Natural Sciences and Engineering Research Council Awards**

*Value:* varies (see below)

*Application deadline:* fall

*Tenable:* annual

*Terms of reference:* NSERC offers post-graduate awards and post doctoral fellowships in science including interdisciplinary research, physical geography and experimental psychology, and engineering. Canadian citizens and permanent residents who at the time of application are residing in Canada are eligible. Five categories of post-graduate awards are available:

##### **NSERC PGS M**

*Value:* \$17,300 for one year

*Application deadline:* fall

*Tenable:* annual

*Terms of reference:* available to students for the first year of post-graduate study at the master's level.

##### **NSERC Alexander Graham Bell CGS M**

*Value:* \$17,500 for one year

*Application deadline:* fall

*Tenable:* annual

##### **NSERC PGS D**

*Value:* \$21,000 year

*Application deadline:* fall

*Tenable:* annual

*Terms of reference:* tenable during the third and fourth or fourth and fifth year of doctoral study.

##### **NSERC Alexander Graham Bell CGS D**

*Value:* \$35,000 per year for up to three years

*Application deadline:* fall

*Tenable:* annual

*Website:* [www.nserc.gc.ca](http://www.nserc.gc.ca). Further information is available from the Office of the Dean of Graduate Studies.

#### **NSERC Industrial Post-graduate Scholarships (IPS)**

Industrial post-graduate scholarships provide financial support for highly qualified science and engineering graduates. The support allows them to gain research experience in industry while

undertaking advanced studies in Canada. These scholarships are aimed at encouraging scholars to consider research careers in industry.

##### **IPS 1**

*Value:* \$15,000 per year for up to two years plus company contribution of \$6,000 minimum per year

*Application deadline:* may apply at any time

*Tenable:* annual, during the first three years of graduate study

##### **IPS 2**

*Value:* \$15,000 per year for up to three years plus company contribution of \$6,000 minimum per year

*Application deadline:* may apply at any time

*Tenable:* annual; must be held during the first four years of doctoral studies

*Website:* [www.nserc.gc.ca](http://www.nserc.gc.ca). Further information is available from the Office of the Dean of Graduate Studies.

#### **NSERC Northern Research Internships**

*Value:* \$10,000

*Tenable:* summer term

*Application deadline:* anytime

*Terms of reference:*

For senior undergraduate or graduate students or post-doctoral fellows pursuing research in the Canadian North, in natural sciences departments or in engineering. Must be a Canadian citizen or permanent resident. Contact the Office of the Dean of Graduate Studies for further information.

#### **NSERC Undergraduate Student Research Awards (USRAs)**

*Value:* \$5,625

*Application deadline:* January

*Tenable:* summer, fall or spring

*Terms of reference:*

To encourage undergraduate students to pursue a research career or diversify their research experience in the natural sciences and engineering, with the intent of potentially undertaking graduate studies upon completion of their bachelor's degree. USRA recipients are employed as research assistants working on a specific research project with a faculty supervisor for a 16-week period during the summer, fall or spring term.

#### **Northern Scientific Training Program (NSTP)**

*Value:* varies

*Application deadline:* mid-November latest

*Tenable:* summer term

*Terms of reference:* This program is administered by Simon Fraser University on behalf of the Department of Indian and Northern Affairs to assist with funding of graduate student research. NSTP will help pay for transportation and living costs while conducting practical field experiences in northern Canada.

*Eligibility:* Students must be Canadian citizens or permanent residents. Further information is available from the Office of the Dean of Graduate Studies, MBC 1100

#### **Pacific Century Graduate Scholarships (PCGS)**

*Value:* \$10,000

*Nomination deadline:* February 15

*Tenable:* fall, spring and summer

*Terms of reference:* The PCGS program is funded by the provincial government to attract top entering graduate students to one of the four BC universities. Award recipients will receive either a major Simon Fraser University Entrance Scholarship valued at \$19,000 in year one of their program and a PCGS valued at \$10,000 as well as other departmental funding in year two of their program. Other recipients will receive a PCGS plus a Special Graduate Entrance Scholarship for a total of \$19,000 in year one of their program.

### Pacific Institute for Climate Solutions Fellowships (PICS)

Value: \$10,000

Application deadline: fall

Tenable: fall, spring, summer

Terms of reference: One year fellowships offered by the Pacific Institute for Climate Solutions in collaboration with BC's four research intensive universities and the province to build capacity in priority areas of climate research. Awards are valued at \$10,000 with an additional \$10,000 to be matched through an academic supervisor's research grant or other departmental funding sources. Research topics must be in one of the following four areas: understanding future climate; understanding the implications; developing solutions and assessing options; and communicating the issues. Priority will be given to entering students and those who are in the early stages of their graduate program at Simon Fraser University.

### Pacific Leaders Graduate Student Fellowships (PLGSF)

Value: \$20,000 per year

Application deadline: October

Tenable: summer, fall and spring

Terms of reference: Intended for students in the final full-time year or the last two full time years of either a master's or doctoral degree producing research to address key issues facing British Columbia. Areas of focus will be related to the provincial government's priorities in areas of current and future skills shortages and/or immediate research needs. PLGSF recipients agree to work for the BC Public Service following graduation for at least one year for each year of fellowship support.

### Michael Smith Foundation for Health Research Trainee Award Programs

(1) Master's/Doctoral Studentship Award

Value: \$20,000 per year stipend

Research/travel allowance: \$2,500 per year

Application deadline: November 1 (approximate in last few years)

Tenable: annual, two years maximum for a master's award, non-renewable; five years maximum for a doctoral award, or combination of master's and doctoral awards.

Terms of reference: Open to highly qualified individuals at the master's, and doctoral levels who wish to pursue a career in an area of health research in BC and whose research fits one of the following: biomedical research, clinical research, research respecting health systems and health services, research on societal, cultural and environmental influences on health and the health of populations. Candidates must be either a Canadian citizen or permanent resident of Canada at the time the award is taken up.

(2) Postdoctoral Fellowship Award

Value: \$35,000 to \$45,000

Research/travel allowance: \$4,000 per year

Application deadline: varies

Tenable: Initially for two years, with the possibility of an additional one year extension.

Terms of reference: To enable highly qualified post graduates to prepare for careers in health research as independent investigators in biomedical research, clinical research, research respecting health systems and health services, research on societal, cultural and environmental influences on health and the health of populations. Information and application forms are available through the Office of the Dean of Graduate Studies, MBC 1100. Applications, guidelines and information regarding eligibility are also available for download from the MSFHR website locate at [www.msfr.org](http://www.msfr.org)

### Social Sciences and Humanities Research Council Awards

Alexander Graham Bell Canada Graduate

Scholarships (CGS) Master's Program

Value: \$17,500 per year

Application deadline: November 5

Tenable: One year, non-renewable

Terms of reference: Applicants must be applying for support to pursue a first graduate degree and not have completed, by the time of taking up the award, more than 12 months of full-time study.

Alexander Graham Bell DCGS Doctoral Scholarships

Value: \$35,000 per year for up to three years

Application deadline: November 5

Tenable: Annual

Terms of reference: SSHRC offers doctoral support in the humanities and social sciences. Applicants must be Canadian citizens or permanent residents, living in Canada. Applicants must have completed a master's degree or at least one year of doctoral study, and will be pursuing full time studies leading to a first PhD or its equivalent. The deadline for applications to the appropriate Simon Fraser University department is approximately October 15. Website: [www.sshrc.ca](http://www.sshrc.ca). Further information is available from the Office of the Dean of Graduate Studies.

SSHRC Doctoral Fellowships

Value: \$20,000 per year

### Trudeau Foundation Doctoral Scholarship

Value: \$50,000

Application deadline: December 1

Tenable: annual award, up to three years of funding

Terms of reference:

Fifteen awards are awarded nationally each year to outstanding students in the social sciences and humanities who are enrolled in their first or second year of a PhD program, or entering a doctoral program. Research must be in one of four themes of the foundation. Application through Simon Fraser University. See [www.trudeaufoundation.ca](http://www.trudeaufoundation.ca) for full information.

### Vanier Canada Graduate Scholarships (CGS)

Value: \$50,000 per year (up to three years)

Tenable: annual

Nomination deadline: fall

Terms of reference: To attract and retain world-class doctoral students who demonstrate leadership skills and a high standard of scholarly achievement in doctoral studies at Canadian universities. Canada's three federal granting agencies (Canadian Institutes of Health Research [CIHR], Natural Sciences and Engineering Research Council [NSERC] and Social Sciences and Humanities Research Council [SSHRC]) will provide a nomination quota to each Canadian university. Canadian, permanent residents and international students are eligible for consideration. Candidates must be nominated for a Vanier CGS via a Canadian university with a Vanier quota and be seeking support to pursue their first PhD. Visit [www.vanier.gc.ca](http://www.vanier.gc.ca) for further information.

### Worksafe Research Training Awards

Value: \$20,000, with a \$2,500 research and travel allowance

Application deadline: March 12

Tenable: annual award

Terms of reference:

For highly qualified graduate students at the master's and doctoral level who are undertaking full-time research on the prevention and/or treatment of occupational illness, injury and disability. Enquiries to: [resquery@worksafebc.com](mailto:resquery@worksafebc.com) and [www.worksafebc.com](http://www.worksafebc.com)

### Externally Administered Awards

The following awards are not administered by Simon Fraser University. The information is intended for general reference only; it may be subject to change. The student is responsible for enquiring and applying through the appropriate agency as indicated in the description.

### Awards Administered by the International Council for Canadian Studies

Value: varies

Application deadline: October

Terms of reference: The ICCS administers a number of national and international programs on behalf of Canadian and foreign donors. A brief description of some of the awards is given below. A comprehensive list of awards, including those offered for study abroad, is available from International Council for Canadian Studies, 800 – 325 Dalhousie Street, Ottawa, Ontario, K1N 7G2. Deadlines for application are normally in October of each year. Website: [www.iccs-ciec.ca](http://www.iccs-ciec.ca).

### BC Innovation Council (BCIC) Scholarships

BCIC is a crown agency of the Province of British Columbia that creates the conditions for top-tier innovation and commercialization within BC in partnership with government, industry and academia. The council offers the following scholarship programs:

B.C. Industrial Innovation Scholarships (BC-IIS)

Value: \$20,000 annually for master's students;

\$25,000 annually for PhD students

Application deadline: varies

Tenable: fall, spring and summer

Terms of reference: For graduate students in science, engineering or health research to partner with an MBA graduate student to collaborate in technology development and its successful commercialization.

B.C. Industrial Innovation Scholarships in Intelligent Systems (BC-IIS in Intelligent Systems)

Value: \$20,000 annually for master's students;

\$25,000 annually for PhD students

Application deadline: summer

Tenable: fall, spring and summer

Terms of reference: Jointly supported scholarships provided by the BC Innovation Council and Precarn Incorporated, for full-time engineering graduate students undertaking research projects with an intelligent systems component. Recipients will partner with an MBA student at any BC university to receive exposure to the technology commercialization process including business planning, technology integration, product development and market strategy. Precarn Inc., based in Ottawa, is an independent not-for-profit company that supports the pre-commercial development of leading-edge technologies.

British Columbia MBA Access to Commercialization Scholarship (BC-ACS)

Value: \$15,000 for the period

Application deadline: summer

Tenable: during the span of the student's program

Terms of reference: Scholarships for MBA students to participate in a real world business planning process that involves connecting with the investor community and to collaborate with a graduate student in the natural sciences, engineering and health sciences. Awards are intended to encourage top business students to pursue their MBA degree in BC and ultimately seek careers in technology commercialization in the province.

Canadian Institutes of Health Research (CIHR) Sir Frederick Banting and Dr. Charles Best, Canada Graduate Scholarships – Doctoral (CGS-D)

Value: varies

Application deadline: varies

Tenable: annual

*Terms of reference:* go to [www.CIHR-IRSC.gc.ca/el/193.html](http://www.CIHR-IRSC.gc.ca/el/193.html) and search their funding opportunities database for doctoral research awards.

### Commonwealth Scholarship Plan

*Value:* varies

*Application deadline:* October

*Tenable:* two years

*Terms of reference:* The Commonwealth Scholarship and Fellowship Plan offers awards to Canadian graduate students to study in Commonwealth countries to pursue advanced degrees. They are normally tenable for two years in any of the following countries: Malta, India, Jamaica, New Zealand, Nigeria, and the United Kingdom.

*Website:* [www.scholarships.gc.ca/csp](http://www.scholarships.gc.ca/csp)

### International Development Research Centre

*Value:* up to \$20,000 per award. For full information about these awards, visit [www.idrc.ca](http://www.idrc.ca).

*Application deadline:* unknown

*Terms of reference:* IDRC offers a number of awards to graduate students in Canadian universities to facilitate their involvement in Third World issues.

*Eligibility:* Canadian citizens or landed immigrants who have completed course work at graduate level and who have an affiliation with an institution in a developing country.

### OMAE Calgary Chapter (ASME) Graduate Scholarship

*Value:* \$2,500

*Terms of reference:* Annual scholarship, ranging from \$2,000 to \$4,000 from the American Society for Offshore Mechanics & Arctic Engineering (ASME). For graduate students at Simon Fraser University, University of British Columbia, University of Victoria, University of Saskatchewan, University of Regina and University of Manitoba, with preference to applicants doing thesis work that applies to offshore mechanics, arctic or pipeline engineering.

### Queen Elizabeth II British Columbia Centennial Scholarship

*Value:* \$30,000

*Application deadline:* January 31

*Tenable:* Any term

*Terms of reference:* The purpose of this scholarship is to enable selected British Columbians who have graduated from a public university in BC to complete further studies at approved universities in the British Commonwealth, except Canada. *Eligibility:* a graduate of the University of British Columbia, the University of Victoria, Simon Fraser University or the University of Northern British Columbia a) who has attended any British Columbia public university for a minimum of two years; b) whose ordinary domicile, home or residence is in BC; c) who is a Canadian citizen. *Deadline:* January 31. Applications are available on line.

### Rhodes Scholarships

*Value:* varies (in Euros)

*Application deadline:* September 30

*Terms of reference:* The Rhodes Trustees offer annually in the Province of British Columbia one Rhodes Scholarship, which is tenable at Oxford University for two years, and renewable for a third year. *Eligibility:* Canadian citizens or British subjects who have been ordinarily resident in Canada for at least five years by October 1st in the year of application; from 19 to 25 years of age on October 1st in the year of election, with at least three years of university study completed at time of tenure. Distinction of character and intellect are given most consideration in selection. Further information is available from the Financial Aid and Awards office and the Office of the Dean of Graduate Studies.

### Soroptimist Foundation of Canada

*Value:* \$7,500

*Application deadline:* January 31

*Tenable:* summer term

*Terms of reference:* These are grants to assist female students with university studies which will qualify them for careers serving other women by improving the quality of their lives.

*Eligibility:* enrolled in a graduate program. Must be Canadian citizens or permanent residents. [www.soroptimistfoundation.ca](http://www.soroptimistfoundation.ca)

### J.H. Stewart Reid Memorial Fellowship

*Value:* \$5,000

*Application deadline:* April 30

*Terms of reference:* The J.H. Stewart Reid Memorial fellowship is open to doctoral students in any field at any Canadian university. *Eligibility:* a) Canadian citizen or landed immigrant; b) completion of at least one full academic year of graduate work by June 1; c) a first class academic record. Application forms are available on the web: [stewartreid.caut.ca](http://stewartreid.caut.ca)

### Carl H. Westcott Memorial Fellowship

*Value:* \$10,000

*Application deadline:* December 1

*Terms of reference:* One scholarship is awarded annually to a student whose research work is being carried out at TRIUMF or on TRIUMF related projects. For further information visit [www.triumf.info/public/students/awards/westcott.php](http://www.triumf.info/public/students/awards/westcott.php).

## Bursaries and Loans

### Bursaries Administered by the University

The following regulations govern all university, private and endowed bursaries over which the University has jurisdiction.

#### Regulations

- Bursaries are a supplemental source of funding for students in high financial need. Students are expected to find their primary funding through other sources such as government student loan or grant programs, part time work, savings, family, etc.
- Students must have a demonstrated financial need.
- Both undergraduate and graduate students, domestic (Canadian) and international, are eligible unless otherwise indicated.
- Undergraduate students must have a minimum CGPA of 2.00 to be eligible for bursaries. Graduate students in eligible master's or doctoral programs must have a minimum CGPA of 3.00 to be eligible for bursaries.
- Graduate students must be enrolled for residence credit in an approved full time program for the term of application. Students who do not enrol or subsequently change to on-leave or part time status may have their awards cancelled.
- Domestic (Canadian) students must be approved for government student assistance from their home jurisdiction to be eligible. In exceptional circumstances, students may appeal for exemption.
- The student must apply using the Simon Fraser University online bursary/work-study application form via the student information system (<http://sis.sfu.ca>). It is the student's responsibility to meet applicable deadlines and supply all required documentation. Incomplete applications may be rejected.
- Unless otherwise stated, bursaries are tenable only at Simon Fraser University.
- Funds will be credited to the successful student's account with the University. Outstanding debts to the University will be deducted from the bursary funds before a cheque for the credit balance is issued.
- Bursaries are tenable only for the term indicated on the notice and may not be deferred. Students who do not enrol in the term for which the bursary is granted forfeit the award. To be considered for bursaries in future terms of enrolment, students must reapply.

## Bursaries for All Students

### Alumni Scholarship and Bursary Endowment Fund

*Program code:* GEBO-584

*Value:* \$500

*Awarded:* fall, spring, summer

*Terms of reference:* To undergraduate and graduate students. The awards are based on financial need and satisfactory academic standing.

### Laura (Pat) Band and Richard W. Band Bursary for First Nations Students

*Program code:* GEBO-540

*Value:* \$400

*Awarded:* fall, spring, summer

*Terms of reference:* The bursary is granted in any term based on financial need and community service to a student who is a member of the Squamish, Fort Langley, or Cheam First Nations and who have demonstrated volunteer involvement in service to the University or the community at large. The bursary may be granted to graduate or undergraduate students in all disciplines and fields of study. The successful student will have completed a minimum of 30 credits and will have achieved a minimum cumulative GPA of 2.33. The application should include a discussion of the student's volunteer involvement in community activities and confirmation of the student's status in the Squamish, Fort Langley or Cheam First Nations.

### Birks Family Foundation Bursary

*Program code:* GPBO-551

*Value:* \$500

*Awarded:* fall, spring, summer

*Terms of reference:* The Birks Family Foundation has established a plan of annual contributions to the student aid fund of recognized Canadian universities and colleges for the creation of these bursaries. The bursaries are awarded by the foundation on the recommendation of the university scholarship committee, are not restricted by faculty or year, and may be renewed. The number and amount of such awards may vary annually depending upon the funds available from the Foundation.

### The Honourable Angelo E. Branca and Mrs. Branca Bursary

*Program code:* GEBO-586

*Value:* \$800

*Awarded:* fall

*Terms of reference:* To students entering from secondary school. Applicants must demonstrate financial need and have satisfactory academic standing. Other bursaries valued approximately at one term's tuition are available to students from any faculty, who have a minimum of 60 units at Simon Fraser University, have maintained satisfactory standing, and are in financial need. In honor of the 50th wedding anniversary of the Honorable Angelo E. Branca and Mrs. Branca, and on the occasion of his retirement from the bench, this bursary endowment fund has been established by the following donors, Confratellanza Italo-Canadese and friends Mr. J. Diamond, Mr. J. Segal, Mr. Ben Wosk.

### Burrard Charitable Foundation Bursary

*Program code:* GPBO-554

*Value:* \$750

*Awarded:* fall

*Terms of reference:* Available in the Fall semester to a disabled student who has satisfactory academic standing and is in financial need.

### Chapman Foundation Graduate and Undergraduate Bursaries

*Program code:* GEBO-744

*Value:* \$250

*Awarded:* spring

*Terms of reference:* The Chapman Foundation Graduate and Undergraduate Bursaries will be

awarded to students in any faculty in good academic standing on the basis of demonstrated financial need.

#### **Father Della-Torre Bursary**

Program code: GEBO-592

Value: \$650

Awarded: fall

Terms of reference: Bursaries valued approximately at one term's tuition are available to students entering from secondary school. Applicants must demonstrate financial need and have satisfactory academic standing. Other bursaries valued approximately at one term's tuition are available to students in any faculty, who have a minimum of 60 units at Simon Fraser University, have maintained satisfactory academic standing and are in financial need.

#### **Alex W. Fisher Bursary**

Program code: GEBO-596

Value: \$450

Awarded: spring

Terms of reference: To a hard-working and deserving male student in need of financial assistance. Donated by Alex W. Fisher.

#### **Lois M. Fisher Bursary**

Program code: GEBO-597

Value: \$450

Awarded: spring

Terms of reference: To a hard-working and deserving female student in need of financial assistance. Donated by Mr. Alex W. Fisher.

#### **Graduate Emergency Bursaries**

Program code: GUBO-401

Value: \$100

Awarded: fall, spring, summer

Terms of reference: Bursaries are available to graduate students who have critical financial need.

#### **Hamber Foundation Bursary**

Program code: GPBO-559

Value: \$1,000

Awarded: fall

Terms of reference: To women students with satisfactory academic standing and need for financial assistance.

#### **Blayne and Sharon Johnson Bursary**

Program code: GEBO-523

Value: \$1100

Awarded: summer

Terms of reference: Granted on the basis of demonstrated financial need and satisfactory academic performance.

#### **Charles Chan Kent Golden Wedding Bursaries**

Program code: GPBO-563

Value: \$500

Awarded: fall

Terms of reference: To a student who is proceeding to a degree in any field, has successfully completed at least one year at Simon Fraser University, and needs financial assistance. Preferably the bursary will be made to a student of Chinese descent.

#### **Theodore and Abraham Maiman Graduate Bursary**

Program code: GEBO-752

Value: \$1,000

Awarded: fall, spring, summer

Terms of reference: Awarded annually on the basis of demonstrated financial need and good academic standing to any graduate students pursuing laser research.

#### **Dr. Carol Matusicky Family Studies Bursary**

Program code: GEBO-708

Value: \$500

Awarded: spring

Terms of reference: The bursary is given on the basis of demonstrated financial need and satisfactory academic performance. Preference will be given to a student in the certificate in family studies program or, failing that, to a student in any faculty whose course

work will prepare them to work with children, youth and families after university.

#### **Jo-Ann Mychaluk Bursary**

Program code: GEBO-602

Value: \$750

Awarded: fall

Terms of reference: To students with satisfactory academic standing. These bursaries are available to students who are, or have been, residents of the Chilcotin or Cariboo regions of BC. This fund has been established in memory of Jo-Ann Mychaluk who worked in the Centre for Distance Education.

#### **Madeleine A. Nelson Bursary**

Program code: GEBO-735

Value: \$750

Awarded: spring

Terms of reference: Granted annually to a graduate or undergraduate student who has demonstrated financial need and satisfactory academic performance. Preference will be given to mature female students beginning or returning to university.

#### **Nitikman/Chan Bursary**

Program code: GEBO-737

Value: \$1,000

Awarded: fall, spring, summer

Terms of reference: The bursary will substantially pay tuition and fees for two terms and will be disbursed over two terms. Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in any faculty or discipline. The recipient will be a single parent with preference given to entering students.

#### **Jean Pudney Bursaries**

Program code: GEBO-750

Value: \$500

Awarded: fall

Terms of reference: To graduate or undergraduate students in good academic standing on the basis of demonstrated financial need.

#### **Office of the Registrar Bursary**

Program code: GEBO-665

Value: \$500

Awarded: fall

Terms of reference: The Office of the Registrar Bursary provides one or more annual bursaries from a portion of the earned interest on the endowment. The award(s) will be given in the fall semester to a disabled graduate or undergraduate student in any faculty. The bursaries will be granted to disabled students holding satisfactory academic records and experiencing financial need in the continuing pursuit of studies.

#### **Mrs. Rosalie Segal Endowment Fund for Students With Special Needs**

Program code: GEBO-604

Value: \$500

Awarded: fall, spring, summer

Terms of reference: This fund has been established to provide bursaries to physically challenged students. Up to three bursaries will be awarded on the basis of financial need. Adjudication will occur in consultation with the physically challenged students' co-ordinator.

#### **Simon Fraser University Daycare Bursaries**

Program code: GUBO-700

Value: \$100

Awarded: fall, spring, summer

Terms of reference: Applications for daycare bursaries are available at the Daycare Centre. Eligible students may qualify for a bursary provided that financial need can be demonstrated by a completed Canada Student Loan assessment or an open bursary assessment. Daycare bursaries are available to both graduate and undergraduate students.

#### **Simon Fraser University Disabled Graduate Student Award**

Program code: GUBO-850

Value: \$2,000

Awarded: fall, spring

Terms of reference: An award of \$2,000 per term for one year may be made by the University to a disabled graduate student. The applicant must be a full-time enrolled graduate student in good standing whose disability substantially increases the cost of study and who can demonstrate financial need.

#### **SFU International Students' Bursary Fund**

Program code: GUBO-600

Value: \$500

Awarded: fall, spring, summer

Terms of reference: This fund has been established to assist undergraduate visa students who have critical financial need. Students applying for this bursary must be enrolled in a minimum of nine units and have satisfactory academic standing.

#### **Simon Fraser University Open Bursaries**

Program code: GUBO-500

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Must be enrolled in a minimum of nine units and have satisfactory academic standing.

#### **Jennifer Allen Simons Bursary**

Program code: GEBO-669

Value: \$1,000

Awarded: fall

Terms of reference: To an undergraduate or graduate woman student in any faculty. The bursary will be granted in the fall term to a student who is a single parent supporting a child, and who is in financial need and who has satisfactory academic performance. Applicants must have completed one term at Simon Fraser University as a full-time student.

#### **Harry and Dora Annie Smee Bursary**

Program code: GEBO-606

Value: \$800

Awarded: fall

Terms of reference: Up to three bursaries will be awarded to students in any faculty who have completed at least 30 units at Simon Fraser University. The awards will be based on financial need and satisfactory academic standing. Preference will be given to female students.

#### **Merle L. Smith Bursary**

Program code: GPBO-572

Value: \$525

Awarded: spring

Terms of reference: A physically challenged student in any faculty who is beyond first year studies. Initial preference will be given to wheelchair users.

#### **Squamish Nation Bursary**

Program code: GEBO-738

Value: \$500

Awarded: fall, spring, summer

Terms of reference: The bursary, based on financial need and community service, is granted to a student who is a member of the Squamish Nation. The bursary may be granted to graduate or undergraduate students in all disciplines. The successful student will have completed a minimum of 24 units and will have achieved a minimum CGPA of 2.00. The application should include a discussion of the student's involvement in Simon Fraser University or Squamish Nation community activities and confirmation of the student's status with the Squamish Nation.

#### **TSSU Member Child Care Bursary**

Program code: GUBO-550

Awarded: fall, spring, summer

Terms of reference: TSSU employees are eligible to apply to the TSSU Member Child Care Bursary for each term in which they hold an appointment and are enrolled as students at Simon Fraser University and in which they receive child care services from a paid child care provider. All applications are subject to verification. The applicant must identify him/herself as

an employee in the bargaining unit on the bursary application.

#### **University Women's Club of Vancouver Bursary**

Program code: GPBO-575

Value: \$985

Awarded: spring

Terms of reference: To a female student in any faculty enrolled in any program of study leading to a degree. The basis of the award is demonstration of financial need and satisfactory academic standing.

#### **Vancouver Foundation First Nations Bursary**

Program code: GPBO-697

Value: \$500

Awarded: fall

Terms of reference: Bursaries will be available annually in the fall term to undergraduate or graduate Aboriginal students (First Nations, status or non-status, Metis or Inuit) who permanently reside in British Columbia. Awards will be granted on the basis of demonstrated financial need and satisfactory academic performance.

#### **Western Businesswomen's Association Bursary**

Program code: GEBO-705

Value: \$800

Awarded: fall

Terms of reference: To a full or part-time student who is either entering the University for the first time or returning after an absence. Preference will be given to a mature female student. The bursary will be based on satisfactory academic performance and demonstrated financial need.

#### **Lisa and Christopher Yun "Pay It Forward" Annual Bursary**

Program code: GPBO-716

Value: \$1,000

Awarded: fall

Terms of reference: Available annually to full-time students in any faculty. Eligible students must demonstrate financial need and be in good academic standing. Preference will be given to students who are single parents with dependent(s).

#### **Bursaries for Applied Sciences Students**

##### **Olga and Richard Murray Bursary in Applied Sciences**

Program code: GEBO-725

Value: \$1,000

Awarded: fall, spring, summer

Terms of reference: Granted to graduate or undergraduate students in the Faculty of Applied Sciences on the basis of demonstrated financial need and satisfactory academic performance. To the extent feasible, preference will be given to a student, or the spouse or child of a person, who is a member of the Telecommunication Workers Union or of Van-Tel Credit Union.

#### **Bursaries for Arts and Social Sciences Students**

##### **School of Criminology Alumni Bursaries**

Program code: GEBO-530

Value: \$500

Awarded: summer

Terms of reference: Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the School of Criminology.

##### **Charles Drugan & Rose Anne Doonan Bursary in Labour History**

Program code: GEBO-542

Value: \$250

Awarded: fall, spring, summer

Terms of reference: The bursary will be granted to a graduate or undergraduate student pursuing research

in labor history in the Faculty of Arts. Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance.

##### **Aird Dundas Flavelle Memorial Bursary**

Program code: GEBO-659

Value: \$1,200

Awarded: fall

Terms of reference: To a student who has completed at least 15 units at Simon Fraser University with a satisfactory academic standing and whose course of study is in the following areas: political science, economics and/or business administration.

##### **Keith Gilbert Loughlin Bursary in Gerontology**

Program code: GEBO-702

Value: \$700

Awarded: fall

Terms of reference: To a graduate student enrolled in the master of gerontology program, or to an undergraduate student enrolled in the gerontology program, a post baccalaureate diploma program. The bursary will be granted to a student demonstrating financial need and in satisfactory academic standing. Preference will be given to a student specializing in quality of life issues in intermediate care facilities for seniors. Applicants should submit with their application, a letter outlining specialization or area of interest in the gerontology field. A departmental nomination is to be submitted along with the application form.

##### **MATCH International Centre Bursaries in Honour of Rosemary Brown**

Program code: GPBO-607

Value: \$625

Awarded: summer

Terms of reference: Granted on the basis of demonstrated financial need and satisfactory academic performance to full-time undergraduate or graduate students in the Department of Women's Studies.

##### **Dr. Grazia Merler Bursary in French**

Program code: GEBO-714

Value: \$500

Awarded: spring

Terms of reference: To a student in French on the basis of demonstrated financial need and satisfactory academic performance.

##### **Master in Public Policy Bursary**

Program code: GUBO-106

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for full and part-time students of the master of public policy program who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring financial support not available from a sponsoring organization, current income or assets.

##### **Master of Urban Studies Bursary**

Program code: GUBO-108

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for full-time students in the master of urban studies program who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring financial support that is unavailable from a sponsoring organization, current income or assets.

##### **L. R. (Bunny) Wright Memorial Bursary**

Program code: GEBO-537

Value: \$300

Awarded: fall, spring

Terms of reference: Granted on the basis of demonstrated financial need and satisfactory

academic performance, to a student(s) of the graduate Liberal Studies Program.

#### **Bursaries for Business Administration Students**

##### **Faculty of Business Administration Alumni Bursaries**

Program code: GEBO-531

Value: \$500

Awarded: summer

Terms of reference: Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the Faculty of Business Administration.

##### **Bursaries for Business Administration Masters Programs**

Program code: GUBO-110

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for full and part-time students enrolled in a master's program in the Faculty of Business Administration who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring financial support that is not available from a sponsoring organization, current income or assets. Students must submit a letter outlining their special circumstances with the bursary application. Awards will be made by the Senate Undergraduate Awards Adjudication Committee in consultation with the student's department.

##### **Executive Master of Business Administration Bursary**

Program code: GUBO-101

Value: \$250

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for students of the executive master of business administration program and who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring financial support not available from a sponsoring organization, current income or assets. Students must submit a letter outlining their special circumstances with the bursary application. Awards will be made by the Senate Undergraduate Awards Adjudication Committee in consultation with the student's department.

##### **Aird Dundas Flavelle Memorial Bursary**

Program code: GEBO-659

Value: \$1,200

Awarded: fall

Terms of reference: To a student who has completed at least 15 units at Simon Fraser University with a satisfactory academic standing and whose course of study is in the following areas: political science, economics and/or business administration.

##### **Global Asset and Wealth Management MBA Bursary**

Program code: GPBO-699

Value: \$250

Awarded: fall, spring, summer

Terms of reference: The bursary was established in 2004 by the business council of the global asset and wealth management MBA program. The bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the global asset and wealth management master of business administration program.

##### **Graduate Global Asset Wealth Management Bursary**

Program code: GUBO-104

Value: variable

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for full and part-time students of the global asset and wealth management master of business administration and

who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring financial support not available from a sponsoring organization, current income or assets. Students must submit a letter outlining their special circumstances with the bursary application. Awards will be made by the Senate Undergraduate Awards Adjudication Committee in consultation with the student's department.

#### **Graduate Diploma in Business Administration Bursary**

Program code: GUBO-103

Value: \$250

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for students within the graduate diploma in business administration and who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring financial support not available from a sponsoring organization, current income or assets. Students must submit a letter outlining their special circumstances with the bursary application. Awards will be made by the Senate Undergraduate Awards Adjudication Committee in consultation with the student's department.

#### **Management of Technology Master of Business Administration Bursary**

Program code: GUBO-102

Value: \$250

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for students of the management of technology master of business administration program and who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring financial support not available from a sponsoring organization, current income or assets. Students must submit a letter outlining their special circumstances with the bursary application. Awards will be made by the Senate Undergraduate Awards Adjudication Committee in consultation with the student's department.

#### **J. Rose Memorial Bursary**

Program code: GUBO-400

Value: \$1,000

Awarded: summer

Terms of reference: To an undergraduate or graduate business administration student who is in full time studies. The bursary will be granted on the basis of financial need and satisfactory academic performance. This bursary is provided by the Vancouver Foundation. A departmental recommendation is required.

#### **Specialist Masters of Business Administration Bursary**

Program code: GUBO-100

Value: \$250

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for students of the specialist master of business administration program and who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring financial support not available from a sponsoring organization, current income or assets. Students must submit a letter outlining their special circumstances with the bursary application. Awards will be made by the Senate Undergraduate Awards Adjudication Committee in consultation with the student's department.

#### **Bursaries for Communication, Art and Technology Students**

##### **Adaline May Clark Bursary**

Program code: GEBO-589

Value: \$400

Awarded: fall

Terms of reference: The late Mrs. Clark has provided for the endowment of funds for bursaries to enable students to attend, or continue to attend university. Students must be enrolled in the School for the Contemporary Arts, and must demonstrate financial need and a high level of achievement in the arts.

##### **School for the Contemporary Arts Alumni Bursaries**

Program code: GEBO-529

Value: \$500

Awarded: summer

Terms of reference: Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the School for the Contemporary Arts.

##### **Ancie and Arthur Fouks Bursary in Publishing Studies**

Program code: GEBO-526

Value: \$1,000

Awarded: fall

Terms of reference: One or more bursaries will be awarded annually in the fall term to a student enrolled in a degree program in publishing studies. Awards may also be given to graduate students undertaking a master's program in publishing studies. Student must have a minimum of 85 units. The successful applicant should have financial need, a satisfactory academic standing and a demonstrable intent to pursue a career in the publishing industry. Applicants must submit to the publishing studies program committee a resume, including education and work history, and at least one short sample of professional, academic or business writing or portfolio piece to be considered for the award.

##### **Master in Publishing Bursary**

Program code: GUBO-107

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for full and part-time students of the master of publishing program who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring financial support not available from a sponsoring organization, current income or assets.

#### **Bursaries for Education Students**

##### **Jean G.K. Bailey Graduate Bursary in Education**

Program code: GEBO-755

Value: \$2,000

Awarded: spring

Terms of reference: To a student enrolled in any graduate program in the Faculty of Education at Simon Fraser University.

##### **University Women's Club of Vancouver/Jean Beaty Memorial Bursary in Education**

Program code: GEBO-519

Value: \$700

Awarded: summer

Terms of reference: Granted on the basis of demonstrated financial need and satisfactory academic performance to a mature student in the Faculty of Education.

##### **Faculty of Education Alumni Bursaries**

Program code: GEBO-533

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the Faculty of Education.

##### **Master In Education (Off Campus) & Education Doctorate Program Bursary**

Program code: GUBO-105

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Bursaries are available for full and part-time students of the master of education (off campus) and education doctorate program who have demonstrated financial need. Bursaries will be awarded each term to students in good academic standing who have special circumstances requiring support not available from a sponsoring organization, current income or assets.

##### **Hildegard and Cornelius Renner Graduate Bursary in Education**

Program code: GEBO-517

Value: \$800

Awarded: fall, spring, summer

Terms of reference: Awarded annually in any term on the basis of demonstrated financial need and satisfactory academic performance to mature graduate students in the Faculty of Education. Preference will be given to mature graduate students with an interest in adult education. Application should include a discussion of the student applicant's interest in adult education.

#### **Bursaries for Environment Students**

##### **Stuart Olson Construction Inc. Annual Graduate Bursary in Resource and Environmental Management**

Program code: GPBO-712

Value: \$2,000

Awarded: fall

Terms of reference: To a full-time student pursuing a master's or PhD in resource and environmental management on the basis of demonstrated financial need.

#### **Bursaries for Health Sciences Students**

##### **TD Bank Financial Group Graduate Bursary Endowment for Health Sciences**

Program code: GEBO-746

Value: \$500

Awarded: fall, spring, summer

Terms of reference: Bursaries will be granted to Canadian graduate students in the Faculty of Health Sciences. The bursary is granted on the basis of demonstrated financial need and satisfactory academic progress.

##### **Vancouver Foundation Health Science Bursaries**

Program code: GPBO-578

Value: \$1,000

Awarded: fall, spring

Terms of reference: The bursary assistance program is limited to full-time students studying in health sciences. The funds are directed to students who have completed at least one year of post-secondary education and can demonstrate financial need. Areas of study include any of the following: pre-med program, kinesiology, biomedical engineering, and gerontology.

#### **Bursaries for Science Students**

##### **Curzon-Digman Bursary**

Program code: GEBO-594

Value: \$750

Awarded: fall, spring, summer

Terms of reference: Available to graduate students in physics or for majors or honors undergraduate students in physics, mathematical physics, chemical physics, biophysics or other joint programs with

physics. These bursaries are subject to demonstrated financial need and good academic standing. Nominations will be made by the chair of the physics department in consultation with Financial Aid and Awards.

#### **School of Kinesiology Alumni Bursaries**

Program code: GEBO-532

Value: \$500

Awarded: summer

Terms of reference: Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the School of Kinesiology.

#### **Dr. Tom Richardson Memorial Graduate Entrance Bursary**

Program code: GEBO-726

Value: \$1400

Awarded: fall, spring

Terms of reference: To a graduate student entering kinesiology, or in the first term of kinesiology, or for a student pursuing graduate studies in other departments with a focus on biomedical engineering. The criteria for this award are: financial need; demonstrated academic excellence at the undergraduate level and, if applicable, at the graduate level; intention to enrol in the graduate program in kinesiology, or completion of the first term in a graduate program in kinesiology, or intention to pursue research in biomedical engineering as a graduate student in another department.

#### **Faculty of Science Alumni Bursaries**

Program code: GEBO-528

Value: \$500

Awarded: summer

Terms of reference: Bursaries will be granted on the basis of demonstrated financial need and satisfactory academic performance to students in the Faculty of Science.

#### **Urea Formaldehyde Foam Insulation Action Association Bursary**

Program code: GEBO-607

Value: \$250

Awarded: fall, spring

Terms of reference: To students who have completed at least 60 units and who are studying in the areas of toxic chemicals or pollutants and their effects on human health and functioning. Please document eligibility. The endowment has been established by the association.

#### **Vancouver Foundation Health Science Bursaries**

Program code: GPBO-578

Value: \$1,000

Awarded: fall, spring

Terms of reference: The bursary assistance program is limited to full-time students studying in health sciences. The funds are directed to students who have completed at least one year of post-secondary education and can demonstrate financial need. Areas of study include any of the following: pre-med program, kinesiology, biomedical engineering, and gerontology.

#### **Vancouver Horticulture Society Bursary**

Program code: GEBO-590

Value: \$750

Awarded: fall, spring

Terms of reference: This award is available to students of the master of pest management program studying pest problems relating to horticulture. It is awarded to students who are in financial need and qualified in terms of character and scholarship.

## **University Administered Loans**

### **Student Emergency Loan Fund**

#### **Regulations**

The following regulations govern all loans for continuing students over which the University has jurisdiction.

- Short term emergency funds are available to students who urgently need money while awaiting receipt of other sources of funding.
- Emergency loans are not available for outstanding fees owed to the University.
- Students must have a demonstrated financial need and a secured source of repayment.
- Undergraduate students must be registered in a minimum of nine units of normal graded courses in the term of application. Challenge, audit, and credit free courses will not be considered.
- Graduate students must be registered for residence credit in an approved full-time program.
- Students must meet with a Financial Aid and Awards Advisor. It is the student's responsibility to supply all requested documentation. Incomplete applications may be rejected.
- Simon Fraser University Emergency Loans are tenable only at Simon Fraser University and only for the term indicated on the notice.

## **Work-Study Program**

The Simon Fraser University Work-Study program provides part time on-campus jobs for full time students.

#### **Regulations**

The following regulations apply to participate in the Work-Study Program.

- Students must have a demonstrated financial need.
- Undergraduate and graduate students, both domestic (Canadian) and international, are eligible to apply.
- Undergraduate students must have a minimum CGPA of 2.00.
- Graduate students in eligible master's or doctoral programs must have a minimum CGPA of 3.00.
- Undergraduate students must be enrolled in a minimum of nine units of normal graded courses in the term of application. Challenge, audit and credit-free courses will not be considered. Students who enrol in fewer than nine units or subsequently drop below nine units may have their work-study position cancelled.
- Graduate students must be enrolled for residence credit in an approved full-time program. Students who do not enrol or subsequently change to on-leave status may have their work-study position cancelled.
- Domestic (Canadian) students must be approved for government student assistance from their home jurisdiction to be eligible.
- The student must apply using the Simon Fraser University online bursary/work-study application form via the student information system (<http://sis.sfu.ca>). It is the student's responsibility to meet applicable deadlines and supply all required documentation. Incomplete applications may be rejected. Note: some BC students may be identified as eligible candidates through their StudentAid BC application and be notified of this opportunity.

## **Government Administered Programs**

### **Canadian Armed Forces Subsidization Plans**

#### **Admission Requirements**

An applicant must be a Canadian citizen; be physically fit for enrolment in the Canadian Forces; and be at least 16 years of age on the first day of January of the year the student commences first year studies at the university.

#### **How to Apply**

Individuals interested in obtaining more information or wishing to apply for any of these plans are requested to contact: Commanding Officer, Canadian Forces Recruiting Centre, 757 West Hastings Street, Vancouver, BC, V6C 1A1.

### **Government Loans**

A loan is a repayable sum of money borrowed by a student who demonstrates financial need. A grant is funding that a student is not normally required to repay.

### **Student Loan and Grant Programs**

#### **BC Residents Studying Full-Time**

StudentAid BC assists eligible students with the cost of post-secondary education through loans, grants, bursaries, scholarships and special programs. It also offers programs for students who need help to repay a student loan.

Most StudentAid BC programs are based on need, and provide financial assistance to students and their immediate families who do not have the financial resources to pay for post-secondary education and basic living expenses.

StudentAid BC administers programs on behalf of the Government of Canada including Canada student loans and Canada Student Grants. For detailed information about available opportunities, eligibility requirements and how to apply, visit the Student Aid BC website at [www.studentaidbc.ca](http://www.studentaidbc.ca).

#### **Out-of-Province Students Studying Full-Time**

Students must apply to their province of residence for provincial/territorial funding. On-line applications are available for most provinces. Check the Financial Aid and Awards website at <http://students.sfu.ca/financialaid> for links to each of the provincial/territorial ministries.

#### **New for 2009/2010**

The federal government is improving access to post-secondary education by assisting students and families to manage the cost through new and improved programs including

- a new Canada Student Grant for students from low-income or middle-income families
- more effective support for students with permanent disabilities
- a new Repayment Assistance Plan to help students who have difficulty repaying loans

There are also many other changes for married students, part-time students, and students with dependents. For detailed information, visit the CanLearn website at [www.canlearn.ca](http://www.canlearn.ca).

#### **Students Studying Part-Time**

Part-time students whose family income falls below established thresholds may be eligible for up to \$1,200 per year in grants and/or up to \$10,000 in part-time Canada Student Loan funding.

For detailed information about eligibility requirements and how to apply, visit the StudentAid BC website at [www.studentaidbc.ca](http://www.studentaidbc.ca) or the CanLearn website at [www.canlearn.ca](http://www.canlearn.ca)

### Program Exceptions to Government Student Loans and Grants

Although the majority of Simon Fraser University programs are eligible for government student loans and grants, some programs do not meet federal and provincial/territorial eligibility criteria (e.g. executive MBA, MEd off-campus, graduate diploma in business administration (GDBA), non-credit continuing studies programs).

Contact Financial Aid and Awards to determine if a program is eligible.

### International Students

Students who are not Canadian citizens or Permanent Residents, and who will require financial assistance to attend Simon Fraser University must arrange such assistance in their country of origin before arrival in Canada.

Simon Fraser University permits non-Canadian students to compete for most University administered scholarships and awards at the undergraduate or graduate level, once they have enrolled at the University, on the basis of course work undertaken at Simon Fraser University and/or community service. Bursaries are awarded on the basis of financial need, but only as supplemental funding, not as core funding needed to meet immigration requirements. Students are expected to exhaust all other sources of funding including government aid from their home country before being eligible for bursaries. See the bursary section for details.

It must be stressed that non-Canadian students should not predicate their tuition and living expense estimates upon these sources. Non-Canadian students are expected and required by federal law to have sufficient funds guaranteed for their education prior to arrival in Canada.

### United States Students

Citizens (or eligible non-citizens) of the United States attending the University may apply for funding through the US Department of Education's Federal Family Education Loan (FFEL) program. US students with permanent resident status or dual citizenship may also be eligible to apply for Canadian student loans.

For more information, visit the Financial Aid and Awards website at <http://students.sfu.ca/financialaid> or the US Department of Education website at [www.studentaid.ed.gov](http://www.studentaid.ed.gov)

### For More Information

For further information on programs offered by Financial Aid and Awards (Student Services) visit <http://students.sfu.ca/financialaid>.

# Dean of Graduate Studies Programs

1100 Maggie Benston Student Services Centre,  
778.782.6568 Tel, 778.782.3080 Fax,  
[www.sfu.ca/gradstudents/prospective/visiting.html](http://www.sfu.ca/gradstudents/prospective/visiting.html)

## Dean

W.S. Parkhouse BPE (Alta), MPE, PhD (Br Col)

## Associate Dean

G. Agnes BSc (Wat), PhD (Alta)

The dean of graduate studies is responsible for the overall administration of graduate programs through the graduate general regulations, for maintenance of student records, and for the administration of all merit-based awards. Processing of admissions is delegated to the dean by the senate graduate studies committee.

Most graduate programs are administered locally through graduate program committees in the departments, schools and faculties in which they are located. The dean of graduate studies administers special arrangements programs and graduate certificate programs.

## Individual Special Arrangements

(See "1.3.5 Admission Under Special Arrangements" on page 220.)

Individual students may apply by December 1<sup>st</sup> to the dean of graduate studies for admission to an individual special arrangements program. Applicants should request an application package from the graduate studies office at least three months prior to the deadline.

In addition to regularly scheduled courses in established graduate programs, the following courses are open to special arrangements students.

## SAR 891-3 Special Topics

To be selected by the student and supervisory committee.

## SAR 892-3 Special Topics

To be selected by the student and supervisory committee.

## SAR 893-4 Special Topics

To be selected by the student and supervisory committee.

## SAR 894-5 Special Topics

To be selected by the student and supervisory committee.

## SAR 895-3 Special Topics

To be selected by the student and the supervisory committee.

## SAR 896-6 Special Topics

To be selected by the student and the supervisory committee.

## SAR 897-5 Special Topics

To be selected by the student and the supervisory committee.

## SAR 898-6 Master's Thesis

## SAR 899-6 PhD Thesis

## Cohort Special Arrangements

(See "1.3.5.a Cohort Special Arrangements" on page 220.)

These programs are designed to meet the needs of specific groups of students pursuing a master's degree in a field that is not covered in existing programs. Programs are advertised when available.

## Digital Media Program

Simon Fraser University, University of British Columbia, Emily Carr Institute of Art and Design and the British Columbia Institute of Technology collaborate on the master of digital media degree, a full time professional graduate program offering team-based learning in close collaboration with the digital games and media industries. The program is offered at the Great Northern Way campus. For further information visit <http://www.gnwc.ca/mdm>

## Certificate Programs

(See "1.3.13 Certificate Programs" on page 221.)

Graduate certificate programs are combinations of courses completed while a student is pursuing a master's or doctoral degree program.

## Visiting Research Student

Simon Fraser University accepts visiting research students under the terms of the Canadian Graduate Student Research Mobility Agreement. For details, see the Graduate Studies website at [www.sfu.ca/dean-gradstudies](http://www.sfu.ca/dean-gradstudies). Students attending Simon Fraser University under this agreement must enrol every term for the course GRAD 800.

## GRAD 800-0 Visiting Research Student

All students who are attending Simon Fraser University under the terms of the Canadian Graduate Student Research Mobility Agreement must enrol for GRAD 800.

# Faculty of Applied Sciences

9861 Applied Sciences Building, 778.782.4724 Tel,  
778.782.5802 Fax, <http://fas.sfu.ca>

## Dean

N. Rajapakse BSc (SLanka), MEng, DEng (AIT),  
PEng

## Associate Dean

F. Popowich BSc (Alta), MSc (S Fraser), PhD (Edin)

## Graduate Degrees Offered

master of applied science  
master of engineering  
doctor of philosophy  
doctor of philosophy under special arrangements

## General Regulations

For admission requirements, enrolment, residence requirements and time limit for completion of degrees, see "Graduate General Regulations" on page 219.

## School of Computing Science

9971 Applied Science Building, 778.782.4277 Tel,  
778.782.3045 Fax, [www.cs.sfu.ca/gradpgm](http://www.cs.sfu.ca/gradpgm)

## Director

## Graduate Program Director

A.L. Liestman BGS (Kansas), MS, PhD (Ill)

## Faculty and Areas of Research

For a complete list of faculty, see "School of Computing Science" on page 76 and [www.cs.sfu.ca](http://www.cs.sfu.ca)

M.S. Atkins – medical image display and analysis, medical image denoising, human-computer interfaces for medical radiology workstations, eyegaze applications in medicine and sleep disorders, virtual laparoscopy training

P. Berenbrink – probabilistic methods, randomized algorithms, analysis of dynamic processes, ad hoc networks, load balancing, routing and scheduling

D. Beyer – software engineering, formal verification, analysis of large systems

B.K. Bhattacharya – computational geometry, robust geometric computation, resource allocation optimization

A. Bulatov – constraint problems, computational complexity, combinatorics, clone theory and universal algebra

F.W. Burton – functional programming, parallel computing

T.W. Calvert\* – information processing in man and machines, biomedical applications, graphics

R.D. Cameron – internet protocols, programming languages and systems, software engineering

V. Dahl – logic programming, computational linguistics, bioinformatics, deductive knowledge bases, information extraction, web-based technology

J.P. Delgrande – knowledge representation, nonmonotonic reasoning, belief revision, reasoning with preferences, logic in computer science, reasoning about action

M.S. Drew – multimedia, computer vision, computer graphics, color

A.F. Ergun – quality of service in high speed networks, combinatorial property testing, sublinear algorithms, randomized algorithms

M. Ester – database systems, data mining, text mining, bioinformatics

A. Fedorova – operating systems, multiprocessors, transactional memory

B.V. Funt – color imaging, computer vision

U. Glässer – software systems engineering: mathematical foundations, requirements specification and validation, formal semantics, system design languages, concurrent and reactive systems

Q. Gu – network communications, parallel/distributed computing, algorithms and computation, machine learning, computational biology

A. Gupta – constructive combinatorics, parallel complexity theory, bioinformatics

R.F. Hadley – computational approaches to cognitive science, connectionist models of mental processes, cognitive architecture

L.J. Hafer – constrained optimization, mixed-integer linear programming, scheduling

G. Hamarneh – medical image analysis (computational/artificial intelligence, computer vision and image processing in medical imaging); geometry, physics and statistics based shape modeling, web-based medical image computing

R. Harrop\* – medical applications, automata theory, logic

W.S. Haven\* – artificial intelligence, constraint programming, intelligent systems

M. Hefeeda – computer networks and distributed systems, multimedia communications, peer-to-peer systems

P. Hell – computational combinatorics, algorithmic graph theory

V. Kabanets – computational complexity, randomness in computation, pseudorandomness and derandomization

T. Kameda\* – distributed computing, computational geometry, polygon search problems, video-on-demand

A. Kirkpatrick – human-computer interaction

R. Krishnamurti – approximation algorithms, combinatorial optimization

Z.N. Li – computer vision, multimedia, pattern recognition, image processing, artificial intelligence

A.L. Liestman – analysis of algorithms, graph theory, network communications

J.C. Liu – internet architecture and protocols, multimedia (video) communications, wireless networks, mobile ad hoc networks, overlay networks and peer-to-peer communications

W.S. Luk – database systems, distributed processing

D. Mitchell – constraint satisfaction and satisfiability testing, computational logic, propositional proof complexity

T. Möller – computer graphics, scientific visualization, signal processing, approximation theory

G. Mori – computer vision, object recognition, pose estimation, activity recognition, machine learning

J. Pei – data mining and knowledge discovery, online analytical analysis and data warehousing, database systems, bioinformatics and biometrics

J.G. Peters – networks and communication, mathematical modeling, graph theory

F. Popowich – artificial intelligence, computational linguistics, natural language

understanding/processing

S.C. Sahinalp – algorithms: pattern matching, sequence embeddings, data structures;

computational genomics: genome analysis, comparative genomics, functional evolution of the human genome

A. Sarkar – artificial intelligence, statistical natural language processing, computational linguistics, machine learning, probabilistic grammars and formal language theory

O. Schulte – computational logic, computation decision theory and game theory, machine learning

T.C. Shermer – computer graphics, graph theory, computational geometry

T. Smyth – physics-based sound synthesis and digital audio signal processing for music applications

G. Tardos – combinatorics, discrete and computational geometry, complexity theory

E. Ternovska – computational logic, complexity of reasoning, formal verification, semantics of logic programming

R.T. Vaughan – autonomous systems, robotics, artificial intelligence, adaptive and distributed systems

K. Wang – database, data mining, data mining in bioinformatics

J.J. Weinkam\* – computational epidemiology, programming languages

K. Wiese – bioinformatics, evolutionary computation and biocomputing, intelligent systems and optimization

H. Zhang – 3D computer graphics, digital geometry processing, geometric mode

## Associate Members

For areas of research, refer to the department listed.

J. Borwein, Department of Mathematics

P.B. Borwein, Department of Mathematics

J.C. Dill, School of Engineering Science

M.B. Monagan, Department of Mathematics

F.J. Pelletier, Cognitive Science Program

R.D. Russell, Department of Mathematics

L. Trajkovic, School of Engineering Science

M.R. Trummer, Department of Mathematics

\*emeritus

## Research Facilities

The school operates several interconnected local area networks in co-operation with other Faculty of Applied Sciences departments. These networks are connected to Simon Fraser University LAN, the campus-wide network, for access to the Internet.

Facilities include over 300 networked workstations, file servers, CPU servers, and other specialized systems. The workstations are mostly SUN UltraSparc and PC, with some Silicon Graphics and Macintosh workstations. Additionally, the school has comprehensive resources to facilitate VLSI design, simulation, fabrication and testing.

Other computing resources are provided by Academic Computing Services including six large SGI 4D multi-processor systems, four Sun SPARC-II computers, an IBM RS6000, and an Auspex file server. These systems and a range of software and services are available to the campus community.

## Degrees Offered

The school offers programs leading to the MSc and PhD. It provides graduate studies in theoretical computing science; artificial intelligence; database systems; computer graphics and multimedia computing; hardware design; distributed computing; programming languages and systems; computer vision and medical imaging.

## Admission Requirements

To qualify for MSc program admission, a student must satisfy the University admission requirements stated in section 1.3 of the *Graduate General Regulations* and must have a bachelor's degree or the equivalent in computing science or a related field.

To qualify for PhD program admission, a student must satisfy the University admission requirements stated in *Graduate General Regulations* 1.3 (page 219) and

- have a master's degree or the equivalent in computing science or a related field or
- have a bachelor's degree or the equivalent in computing science or a related field, with a cumulative grade point average of 3.5 (on a scale of 0.0-4.0) or the equivalent.

At its discretion, the school's graduate admission committee may offer either MSc or PhD admission to students applying to the PhD program without a master's degree or equivalent in computing science or a related field. Students enrolled in the MSc program may apply to transfer to the PhD program after two terms in the MSc program; the school's evaluation procedure for such applications is the same as that used for outside applicants.

### Breadth and Course Requirements

For purposes of defining the MSc and PhD breadth requirements, courses are grouped into the five major areas shown in Table 1. Courses not related to the breadth requirements are shown in Table 2. Any courses completed outside the School of Computing Science must be approved by the student's senior supervisor and the director of the graduate program.

Only two special topics courses (two of CMPT 829, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889) may be used toward satisfaction of breadth requirements, except with permission of the graduate program breadth committee.

The courses used to satisfy the breadth requirements must include either CMPT 705 or 710, unless the student already has credit for one of these courses (or equivalent) from a previous degree as determined by the graduate program breadth committee.

**Table 1**

#### Area I – Algorithms and Complexity Theory

CMPT 701-3 Computability and Logic  
CMPT 705-3 Design and Analysis of Algorithms  
CMPT 710-3 Computational Complexity  
CMPT 711-3 Bioinformatics Algorithms  
CMPT 813-3 Computational Geometry  
CMPT 814-3 Algorithmic Graph Theory  
CMPT 815-3 Algorithms of Optimization  
CMPT 881-3 Special Topics in Theoretical Computing Science

#### Area II – Networks, Software and Systems

CMPT 730-3 Programming Languages  
CMPT 731-3 Functional Programming  
CMPT 745-3 Software Engineering  
CMPT 755-3 Compiler Theory  
CMPT 760-3 Operating Systems  
CMPT 765-3 Computer Communication Networks  
CMPT 771-3 Internet Architecture and Protocols  
CMPT 777-3 Formal Verification  
CMPT 816-3 Theory of Communication Networks  
CMPT 885-3 Special Topics in Computer Architecture  
CMPT 886-3 Special Topics in Networks, Software and Systems

#### Area III – Artificial Intelligence

CMPT 721-3 Knowledge Representation and Reasoning  
CMPT 725-3 Logical Methods in Computational Intelligence  
CMPT 726-3 Machine Learning  
CMPT 823-3 Formal Topics in Knowledge Representation  
CMPT 825-3 Natural Language Processing  
CMPT 826-3 Automated Learning and Reasoning  
CMPT 827-3 Intelligent Systems  
CMPT 882-3 Special Topics in Artificial Intelligence

#### Area IV – Databases, Data Mining and Computational Biology

CMPT 505-3 Problem Based Learning in Bioinformatics  
CMPT 740-3 Database Systems  
CMPT 741-3 Data Mining

CMPT 829-3 Special Topics in Bioinformatics

CMPT 880-3 Special Topics in Computing Science  
CMPT 889-3 Special Topics in Interdisciplinary Computing  
CMPT 894-3 Directed Reading

The course requirements for the MSc and PhD degrees each have a distribution requirement to ensure breadth across the major areas defined in table 1. This requirement specifies the number of courses selected from each of the five major areas.

### Supervisory Committees

A supervisory committee, at either the MSc or PhD level, consists of the student's senior supervisor, at least one other computing science faculty member, and others (typically faculty) as appropriate. The choice of senior supervisor should be made by mutual consent of the graduate student and faculty member based on commonality of research interests. The student and senior supervisor should consult on the remainder of the committee members.

*Graduate General Regulations 1.6* specifies that a senior supervisor be appointed normally no later than the beginning of the student's third term in the program, and that the remainder of the supervisory committee be chosen normally in the same term in which the senior supervisor is appointed.

### Research Topics Seminars

The research topics seminar series CMPT 891 is presented each year by faculty and graduate students to acquaint new students with faculty research interests, and to introduce relevant issues. Graduate students complete CMPT 891 in the first year.

### MSc Program

Students acquire breadth of knowledge through a course sequence, and depth of knowledge through completion and defence of a thesis or a project. Under normal circumstances, an MSc program is within six terms and not longer than eight. Students must choose between thesis and project options by the second term's end. Any change thereafter must be approved by the graduate program committee.

#### Breadth Requirement

Thesis MSc students must complete a breadth requirement consisting of five graduate courses (which is equivalent to 15 units). At least four of the courses must be drawn from table 1 so that at least one course must be from area I (Algorithms and Complexity Theory) and two of the four courses must be from two other areas.

Project MSc students complete a breadth requirement consisting of eight graduate courses (which is equivalent to 24 units). At least six of the courses

must be drawn from table 1 so that at least one course must be from area I (Algorithms and Complexity Theory) and so that the six courses cover at least three different areas.

Any 700 division course used to satisfy the MSc breadth requirement might be waived and replaced by an 800 division course. Students must produce convincing evidence to the graduate program committee that they have completed a comparable course or have comparable training in industry.

Any courses completed outside the school must be approved by the student's senior supervisor and the graduate breadth committee.

### Depth Requirement

Thesis MSc students are required to demonstrate depth of knowledge in their research area through a thesis seminar and defence based on their independent work. Students should consult with their supervisory committee members, and formulate and submit a written thesis proposal for approval. This should not be done any later than the third term.

Project MSc students must choose an area of specialization and submit a project report. Project topics may include a comprehensive survey of the literature of some computing science related research areas; implementation and evaluation of existing techniques/algorithms; development of interesting software/hardware applications.

Regulations specifying the examining committee's composition and procedures for the thesis or project exam appear in the *Graduate General Regulations*.

### PhD Program

Students will demonstrate breadth of knowledge as outlined below, and demonstrate the capacity to conduct original research through completion and defence of an original thesis. A PhD degree should be completed within 12 terms and should not require longer than 15 terms.

### Breadth Requirement

PhD students who already possess an MSc in computing science or a related field must complete a breadth requirement of four graduate courses (which is equivalent to 12 units of graduate course work). At least three of the courses must be drawn from table 1 so that they are all in different areas.

PhD students who do not possess an MSc in computing science or a related field must complete a breadth requirement of eight graduate courses (which is equivalent to 24 units of graduate course work). At least six of the courses must be drawn from table 1 so that at least one course must be from area I (Algorithms and Complexity Theory) and so that the six courses cover at least three different areas.

A PhD student must achieve a minimum 3.4 CGPA and passing grades in all courses.

### Depth Requirement

PhD students demonstrate depth of knowledge in their research area through a public depth seminar and oral examination, give a thesis proposal seminar, and submit and defend a thesis based on their independent work which makes an original contribution to computing science.

### Depth Examination

The depth seminar and examination may be scheduled at any time following the completion of breadth requirements. Typically this is between the fifth and seventh term in the PhD program; a recommendation is made by the graduate breadth committee, in proportion to the amount of course work required to satisfy the breadth requirement.

The examining committee consists of the supervisory committee and one or two additional examiners recommended by the examining committee, and approved by the graduate program committee. The depth exam centres on the student's research area. The examining committee, in consultation with the student, specifies the examination topics. The student prepares a written survey and gives a public depth seminar; the oral exam follows, and then the committee evaluates the student's program performance. The committee's evaluation is diagnostic, specifying additional work in weak areas if such exists. A second depth exam or withdrawal from the program may be recommended in extreme cases.

### Thesis Proposal

The student, in consultation with the supervisory committee, formulates and submits, for approval, a written thesis proposal consisting of a research plan and preliminary results. The student gives a seminar and defends the originality and feasibility of the proposed thesis to the supervisory committee. The thesis proposal is normally presented and defended within three terms of the depth examination.

### Thesis Defence

Regulations specifying the examining committee composition and procedures for the final public thesis defence are in the *Graduate General Regulations*. PhD students give a seminar; typically this will be about their thesis research and is presented in the interval between distribution of the thesis to the committee and the defence.

### Graduate Program Chair

K.K. Gupta B.Tech (IIT, Dehli), MEng, PhD (McG), PEng

### Faculty and Areas of Research

For a complete list of faculty, see "School of Engineering Science" on page 82.

S. Arzanpour – vibration control, nonlinear systems, smart materials and structures, vibration based energy harvesting, Haptic devices and interfaces, flexible fixtures, robotic assembly

M. Bahrami – heat transfer and fluid flow in microchannels, transport phenomena in new materials, porous media and metalfoams, microelectronics cooling, energy management thermal contact resistance

B. Bahreyni – micro-electromechanical systems (MEMS), micro-sensors, resonant devices,

microfabrication, interface circuit design for MEMS  
I.V. Bajic – signal processing and applications in image and video coding, multimedia communications, and computational biology

M.F. Beg – computational anatomy: algorithms for segmentation, registration and shape analysis from medical images. Applications to structure and function in the brain, heart and peripheral muscles and nerves

J.S. Bird – signal processing, sonar, underwater acoustics, underwater acoustic transducers, bottom mapping and target detection applications

T.W. Calvert\* – information processing in man and machines, biomedical applications, graphics

J.K. Cavers\* – wireless communication: modulation, single- and multi-user detection, adaptive antenna arrays, iterative processing, sensor networks

G.H. Chapman – microelectronics, EMS, IC defect avoidance designs, imaging sensors, microprocessors, biomedical optics, microfabrication, laser applications  
V. Cuperman\* – signal processing, speech coding and recognition, multimedia information compression, digital communications, digital signal processing structures and hardware

J.C. Dill\* – information visualization, visual analytics, human-computer interaction

D.A. George\* – adaptive signal processing for communications and remote sensing systems

M.F. Golnaraghi – intelligent sensor systems: developing sensors for various industrial and biomedical applications for response and motion characterization and control; smart actuation systems: applications of magnetorheological fluids and elastomers, magnetostrictive material, piezoelectric ceramics, shaped memory alloys; nonlinear vibration analysis and control

B.L. Gray – microfluidics, interconnect and microassembly, biomedical microdevices and instruments, high-aspect-ratio microfabrication techniques

W.A. Gruver\* – distributed intelligence, multi-agent and holonic systems, wireless peer-to-peer networks. Applications to manufacturing, robotics, and automation systems

K.K. Gupta – algorithmic robotics, robot motion and path planning algorithms, obstacle avoidance, sensor-based motion planning, range sensing for robotics

R.H.S. Hardy – wireless communication networks, protocols and performance, access control and management of multimedia networks, wide area wireless and ad hoc networks

P.K.M. Ho – wireless communications, with emphasis on space-time coding and processing modulation, coding, detection, and channel estimation

R.F. Hobson – system-on-chip, low power embedded memory, embedded processor design

J.D. Jones – finite element analysis, heat transfer, thermodynamics and their application to micromachining; history and philosophy of engineering

B. Kaminska – wireless sensor networks, micro-medical devices, biosensors, wearable electronics; physiological, behavioral, and environmental monitoring; microelectronic design, test, and fault-tolerance; design and test automation algorithm

E. Kjeang – micro and nanofluidic energy conversion devices, innovative fuel cell architectures and materials, modelling and simulation of transport phenomena in porous media

D.C. Lee – computer and communications networks, wireless communications, multimedia transport

A.M. Leung – microelectronics, integrated circuit technology, integrated micromachined physical sensors, optical lithography

J. Liang – image/video compression, image/video processing, filter bank, wavelets, multimedia communications, wireless communications

C. Menon – control and design of mechatronic systems such as medical robotics, novel sensors/actuators, flexure/vibration control

M. Moallem – mechatronics, real-time systems, embedded computer control systems, smart sensors and actuators, robotics, control applications, linear and nonlinear systems

S. Muhaidat – multi-input multi-output (MIMO) communications, space-time coding, co-operative communications, performance analysis over fading channels, channel estimation and equalization, modulation and detection techniques, orthogonal frequency division multiplexing (OFDM)

M. Parameswaran – silicon and plastic MEMS technology development; microelectronic sensors and actuators; microelectronic device and processing simulation; biomedical diagnostic chips and systems

E.J. Park – biomechanics and mechatronics, biomedical technologies, wearable technologies, biorobotics, smart sensors and actuators, control applications

S. Payandeh – robotics, distributed robotics, mechanics-based modeling and rendering, deformable objects, multi-modal interface, haptic devices, haptic rendering, medical robotics

A.B. Rad – autonomous mobile robots, SLAM, advanced vehicle control systems, intelligent control, time delay systems, system identification, process control

N. Rajapakse – adaptive (smart) materials and structures, nanomechanics and multi-scale modelling, fracture mechanics, geomechanics

A.H. Rawicz – biomedical transducers (sensors and actuators), optical engineering and biophotonics, brain-computer interfaces, vision sensors, reliability of biomedical devices

S.N. Robinovitch – dynamics and control of human movement, postural stability and balance, osteoporosis and hip fracture prevention, orthopedic biomechanics, rehabilitation engineering

P. Saeedi – computer vision, machine learning in computer vision, motion/trajectory tracking, object recognition using vision, structure from motion, and automatic 3D map generation

M. Saif – estimation and control theory, model based fault diagnosis, large scale systems, optimization, and application of the above to engineering systems

S.P. Stapleton – passive RF/microwave circuits, GaAs monolithic microwave integrated circuits, nonlinear RF/microwave devices, active RF/microwave circuits

M.V. Sarunic – biomedical optical imaging, optical coherence tomography (OCT), low-coherence interferometry, optical microscopy

L. Shannon – computing system design; system-on-chip and network-on-chip; architectures; reconfigurable computing and FPGAs; embedded system design; on-chip CAD tools

S.P. Stapleton – power amplifier linearization, high efficiency power amplifier design techniques, high speed digital signal processing, monolithic microwave integrated circuits, integrated RF/DSP systems, high power device characterization

M. Syrzycki – microelectronics, semiconductor devices, analog and mixed signal CMOS ICs, integrated circuit technology, integrated sensor microsystems, vision sensors, design for manufacturability of analog and digital CMOS ICs

L. Trajkovic – communication networks (traffic characterization and modeling, protocols and network control algorithms); nonlinear systems (circuit simulation tools, theory of nonlinear circuits, analysis of complex networks)

R.G. Vaughan – personal and mobile communications, compact antennas, diversity antennas, propagation, signal processing, DSP techniques wireless systems, microwave techniques, multiport and MIMO systems

G. Wang – product design optimization, design theories and methodologies, process improvement for health care, alternative energy for transportation, advanced manufacturing

### Associate Members

For areas of research, refer to the department listed.

M. Donelan, Department of Biomedical Physiology and Kinesiology

J.A. Hoffer, Department of Biomedical Physiology and Kinesiology

\*emeritus

### Degrees Offered

The School of Engineering Science offers two distinct master's degrees, master of engineering (MEng), or master of applied science (MASc) and a doctor of philosophy (PhD) degree.

## Previous Credit

If the subject matter of a listed course has been previously completed with graduate credit, the course may not be completed again for credit.

## Master's Programs

The MEng program, for part-time study by practising engineers, is based on a course set normally offered in the evenings, plus a project performed in industry. The principal areas of study are electronics, communications and signal processing, intelligent systems, and control theory.

The MASc is a full-time program with primary emphasis on the thesis rather than course work, is more exploratory than the MEng, and covers a greater range of study.

## Admission Requirements

The normal admission requirement to the MEng and MASc programs is a bachelor's degree in electrical engineering, computer engineering, engineering science or a related area, with a 3.0 CGPA (B grade) from a recognized university, or equivalent. The number of faculty members limits the number of MASc students accepted into the programs.

## Transfer from MEng to MASc Program

Normally transfer from the MEng to the MASc will be considered under the following conditions.

### Undergraduate Grade Point Average

Minimum undergraduate CGPA of 3.3 is required.

### MEng Grade Point Average

On at least two courses, a minimum CGPA of 3.5 is required.

## Degree Requirements – MEng Program Course Work

MEng candidates complete at least 21 graduate course units. All students complete ENSC 820, specialize in an area of study, and complete required courses as follows. Students specializing in communications complete ENSC 805 and 810; electronics specialization students complete one of ENSC 851, 852 or 853; and intelligent systems or control theory specialists complete ENSC 801. Elective courses (see below) comprise the remainder of the 21 required units. Additional courses may be required to correct background deficiencies.

In addition, a student completes a project which is expected to take a minimum of two full-time equivalent months. If the project is performed in the student's workplace, the student receives academic supervision from the senior supervisor, and day-to-day supervision from the manager, or designated associate. Industrial supervisors, who are on the supervisory committee, will be appointed by the graduate chair in consultation with the senior supervisor. In very small companies, alternate arrangements will be made for industrial supervision.

In addition to submission of a technical report at project completion, the student makes an oral presentation to the supervisory committee and the graduate chair. A grade will be assigned based on the report's quality, the presentation, and the student's understanding of the subject. A grade of 'complete' or 'in progress' will reflect the majority decision. In the case of an 'in progress' grade, the student re-submits the project report and presents it again.

## MEng Fees

Students may complete their program before paying the minimum total fee. An additional payment is required prior to graduation to satisfy the minimum fee requirement of six full-time fee units. See "Graduate Fees" on page 227.

## Degree Requirements – MASc Program

MASc candidates complete 30 units consisting of a minimum of 12 units, plus a thesis equal to 18 units. In consultation with the senior supervisor, the courses will normally be selected from the list below, except that ENSC 820 may not be used towards the MASc course requirements. At least six units must be ENSC graduate courses. At most, three units may be directed studies.

Additional courses may be required to correct deficiencies in the student's background.

The thesis is based on an independent project with a significant research component. The student defends the thesis at an exam, in accordance with regulations.

## Graduate Research Internship

With the supervisory committee's approval, students accepted to the MASc or PhD programs may do research internship in industry. The responsibility for finding a suitable internship rests with the student, though the senior supervisor will provide guidance. In addition to satisfying degree requirements, students must satisfy the following conditions.

### Proposal

The proposal must be approved by the supervisory committee and by the graduate committee. The proposal must include the following.

- justification for undertaking the work in industry
- agreement regarding intellectual property and publications
- funding arrangement

### On-campus Presence

During the internship, the student must spend at least one day per week (or equivalent as approved by the graduate committee) on campus to meet with his/her supervisor and attend regular seminars. This is in addition to time spent on campus for course work.

### Oral Presentations

At least two supervisory committee oral presentations (not including thesis defence) on the progress of the student's work will be given during the internship.

### Duration

The duration of the internship will not exceed two terms for an MASc student, or four terms in the case of a PhD student.

### Failure to Comply

See "1.8 Progress, Withdrawal and Leave" on page 223 in the *Graduate General Regulations*.

## PhD Program

### Admission Requirements

For admission, a student must have a master's degree in electrical engineering, mechanical engineering, physics, computer science or a related field, have submitted evidence of capability to undertake substantial original research, and have identified a faculty member as senior supervisor.

See "1.3 Admission" on page 219 for other PhD program admission requirements.

### Residence Requirement

Students will conform to the residence requirement (see "1.7 Residence and Course Requirements" on page 222).

## Transfer from the Master's Program to the PhD Program

Proceeding to a PhD program without completing a master's degree is discouraged. However, a student may be admitted after at least 12 months in the MASc program if all requirements have been completed with a 3.67 or better CGPA, outstanding potential for research has been shown, and approval of the

student's supervisory committee, graduate program committee and senate graduate studies committee has been given.

## Degree Requirements

### Course Work

The minimum requirement is 18 units beyond that of the MASc degree. Six of these units will be for prescribed courses in the option in which the student is enrolled. Alternatives can be substituted with the approval of the student's supervisory committee. At most, six units may be senior undergraduate courses. At most, six units may be directed studies. At least six units must be within engineering science, except that ENSC 820-3 may not be used toward the course requirement of the PhD degree. Additional courses may be required to correct deficiencies in the student's background.

### Qualifying Examination

To qualify the student will submit a brief written research proposal and defend it orally to his/her supervisory committee within the first 24 months of admission. The proposal defence will be judged according to the feasibility and scientific merits of the proposed research, and demonstration of a sophisticated understanding of general material in the student's major area of research. This level of understanding is associated with senior undergraduate and first year graduate course material. The possible outcomes of the qualifying examination are 'pass,' 'marginal' and 'fail' (a student with 'marginal' will be required to re-submit the research proposal and defend it for the second and final time within six months and/or to complete more courses; a 'failing' grade requires withdrawal).

### Thesis

Students define and undertake original research, the results of which are reported in a thesis. An examining committee is formed as defined in "1.9.3 Examining Committee for Doctoral Thesis" on page 224. Students conform to residence requirements (see "1.7.3 Residence Requirement for the Doctoral Degree" on page 223). The senior supervisor will be an engineering science faculty approved by the graduate program committee.

The student's progress will be reviewed every 12 months by a supervisory committee of three or more faculty members. At each annual review, the student presents a summary of his/her work to date, with the first review being the research proposal defence described in the section for *Qualifying Examination* (see above). Students not making satisfactory progress in their research topics, or failing to demonstrate satisfactory knowledge and understanding of recent publications in their general area of research, or failing to have their revised research proposal approved by the supervisory committee within 20 months of admission, may be required to withdraw as per section "1.8.2 Review of Unsatisfactory Progress" on page 223.

## Directed Studies and Special Topics Courses

Directed studies (ENSC 891, 892) and special topics (ENSC 893, 894, 895) courses may be offered by the following research groups, subject to student interest and demand.

### Communications Group

estimation theory  
network performance evaluation  
optical telecommunications networks  
advanced modulation techniques  
spread spectrum communications  
information flow and decision theory  
adaptive arrays

active and passive sonar systems  
 synthetic aperture radar  
 multimedia signal processing  
 multimedia communications  
 active and passive sonar systems  
 synthetic aperture radar  
 multimedia signal processing  
 multimedia communications  
 ad hoc and sensor networks  
 small antennas

#### **Microelectronic group**

analog VLSI signal and information processing  
 applied solid state electronics  
 CMOS compatible micromachining  
 embedded VLSI systems  
 low power, low noise, high frequency circuits  
 optoelectronic devices  
 photonics and laser applications in engineering  
 reliability engineering

sensor – principles and applications  
 VLSI circuits for telecommunications

#### **Intelligent Systems and Control Group**

design optimization  
 algorithms for robotics  
 intelligent design  
 intelligent control of robotic systems  
 intelligent manufacturing systems  
 model-based fault diagnostics in control systems  
 multivariable control systems  
 nonlinear control systems  
 numerical modelling of heat transfer  
 robotic synthesis

#### **Courses Offered by Other Departments**

These courses are of particular interest to engineering science students. Descriptions can be found in the "Course Catalogue" on page 311.

BUEC 820-4 Analysis of Dynamic Processes  
 CMPT 720-3 Artificial Intelligence  
 CMPT 750-3 Computer Architecture  
 CMPT 815-3 Algorithms of Optimization  
 CMPT 821-3 Robot Vision  
 CMPT 822-3 Computational Vision  
 CMPT 827-3 Expert Systems  
 CMPT 851-3 Fault-Tolerant Computing and Testing  
 CMPT 852-3 VLSI Systems Design  
 CMPT 853-3 Computer-Aided Design/Design Automation for Digital Systems  
 KIN 885-3 Seminar on Man-Machine Systems  
 MATH 851-4 Numerical Solutions of Ordinary Differential Equations  
 PHYS 425/821-3 Electromagnetic Theory  
 PHYS 810-3 Fundamental Quantum Mechanics  
 PHYS 861-3 Introduction to Solid State Physics

## Faculty and Areas of Research

See "Department of Archaeology" on page 92 for a complete list of faculty.

D.V. Burley – historical archaeology, cultural resource management, theory, northwest North America, South Pacific

R.L. Carlson – archaeology and ethnology North America, particularly Northwest Coast, Southwest, material culture, and early peopling of the New World, museology, primitive art

M. Collard – biological anthropology, human evolution, primate evolution, evolutionary archaeology, phylogenetics, systematics and taxonomy

A.C. D'Andrea – paleoethnobotany, early agriculture, ethnoarchaeology, subsistence, East Asia, Africa

J.C. Driver – zooarchaeology, cultural ecology, Western Canada, American Southwest

B.M.F. Galdikas – primate behavior, orangutan research and conservation

B.D. Hayden – lithics, ethnoarchaeology, Northwest Interior, Southeast Asia, hunter/gatherers, cultural ecology, method and theory

R.W. Jamieson – historical archaeology, Spanish colonialism, domestic architecture, material culture, ethnohistory, Andean South America

D. Lepofsky – Northwest Pacific, Oceania, cultural ecology, paleoethnobotany, households, prehistoric land use

G.P. Nicholas – northeast North America and Plateau, hunter/gatherers, cultural ecology, indigenous peoples and archaeology, wetlands, Quaternary studies

R.J. Reimer\*\* – northwest coast, landscape archaeology, oral history, indigenous and alpine archaeology, geoarchaeology, archaeometry

a.g. ross\*\* – art history, artistic and oral traditions, First Nations craft, indigenous environmental practice, studio art practice

M.F. Skinner – physical anthropology, skeletal biology, forensic anthropology, paleoanthropology, paleopathology

J.R. Welch\* – cultural heritage stewardship, Apache ethnohistory, archaeology and ethnology of the American Southwest, resource management practice and policy

D. Yang – physical anthropology, ancient DNA, DNA diagnosis of diseases from ancient remains, molecular forensic anthropology, molecular archaeology, North America, East Asia, Europe

E.C. Yellowhorn\*\* – plains and fur trade archaeology, oral history, traditional knowledge, ethno-science, archaeoastronomy, indigenous archaeology

## Adjunct Faculty

R.R. Adams – archaeology and ethnology of southeast Asia and northwestern North America

J. Cybulski – physical anthropology, forensic anthropology, Pacific Northwest

J.P. Delgado – historical archaeology, nautical archaeology, museology

R.A. Lazenby – biological and forensic anthropology

G.M. MacDonald – Northwest coast art and archaeology, museology

A.D. McMillan – archaeology and ethnology of Canada, particularly Northwest coast, native arts

M.C. Wilson – geoarchaeology, zooarchaeology, ethnoarchaeology, human use/construction of landscape, Western Canada, North American Plains, China, West Africa

## Associate Members

For areas of research, refer to the department listed.

J.J. Clague, Department of Earth Sciences

D.J. Huntley, Department of Physics

R.W. Mathewes, Department of Biological Sciences

P. Nepomnaschy, Faculty of Health Sciences

\*joint appointment with resource and environmental management

\*\*joint appointment with First Nations studies

## Areas of Study

The department offers specialization in archaeometry, art, ceramic analysis, cultural resource management, ethnoarchaeology, forensic anthropology, geoarchaeology, historical archaeology, lithic analysis, palaeoanthropology, palaeoethnobotany, skeletal biology and zooarchaeology.

The student gains a comprehensive understanding of the discipline and strives to acquire a general knowledge of world prehistory, physical anthropology, and archaeological theory and method, in addition to gaining knowledge and expertise in particular areas of research interest. Depending on enrollments,

individual or group courses can be arranged in addition to regularly scheduled courses.

## Degree Requirements

A distinction is made between program enrolment and formal advancement to degree candidacy. A candidate is a student who successfully completes advancement to candidacy requirements (defined below). Normally, advancement happens once the Simon Fraser University residency is fulfilled, but not later than the end of the ninth term after PhD admission and not later than the end of the sixth term for MA students.

## MA Program

This program consists of these sequential steps: course requirements, thesis prospectus, colloquium presentation, advancement to candidacy, and thesis completion and defence. Students are expected to complete all MA program requirements in a maximum of nine terms of full-time enrolment.

## Course Requirements

Students complete a minimum of three graduate courses including ARCH 871 and 876, and a thesis. They may be required to complete additional courses and must complete ARCH 872/873 each term that it is offered. ARCH 873 credit is not part of the normal MA requirement. ARCH 872 and 873 grading will be satisfactory/unsatisfactory (S/U). Course requirements, thesis prospectus and colloquium presentation should be completed by full-time students by the end of the second term.

## Advancement to Candidacy

Advancement to candidacy requirements follow.

- completion of two of the minimum three graduate courses.
- preparation of thesis prospectus. The prospectus discusses the proposed research and general background relevant to the research and is submitted to the supervisory committee and approved before step 3 is undertaken.
- after approval of the thesis prospectus, and after consultation between the student and his/her supervisory committee, the student will present a colloquium, the topic of which shall be the substance of the prospectus.

The colloquium is not considered a defence of the prospectus *per se*, but is a means whereby the student may benefit from the department's expertise.

## Thesis

After the above, students advance to candidacy and complete and defend the thesis. The defence topic should be the thesis itself and related matters. It should be focussed on problem-oriented research, involving the conceptualization of a problem, and the collection, analysis and interpretation of data. It should not normally exceed 100 pages of text. Students are expected to complete the MA thesis in a maximum of six terms of full-time enrolment.

## PhD Program

This program consists of these sequential steps: course requirements, comprehensive exam, thesis prospectus, colloquium presentation, advancement to candidacy, thesis completion and defence.

## Course Requirements

Course requirements are determined in consultation with the supervisory committee. In addition to the comprehensive exam and thesis, normal course requirements consist of a minimum of three graduate courses including ARCH 871 and 876. Students may be required to complete additional courses and are must complete ARCH 872/873 each term that the course is offered. ARCH 873 credit does not constitute part of the normal course requirements. Grading for ARCH 872/873 courses will be restricted to satisfactory/unsatisfactory (S/U).

## Comprehensive Exam

Students write a comprehensive examination prior to candidacy to test general knowledge in archaeology and in three regional or topical areas. Grading is on a pass/fail basis but the examination or parts thereof may be repeated once, at the department's discretion.

## Advancement to Candidacy

Formal advancement to candidacy shall take place when the following have been completed.

- completion of two of the minimum three graduate courses and successful performance in the comprehensive exam
- preparation of thesis prospectus. The prospectus' purpose is to discuss the proposed research and general background relevant to the research. It is submitted to the supervisory committee and approved before step 3 is completed.
- after approval of the thesis prospectus, and after consultation between the student and his/her supervisory committee, the student will present a colloquium, the topic of which shall be the substance of the prospectus.

The colloquium is not considered a defence of the prospectus, but a means whereby students may benefit from the department's collective expertise.

## Thesis

After the above, students advance to candidacy, and complete and defend the thesis. The defence topic will be the thesis itself and related matters. The thesis should represent original, problem-oriented research which makes a significant contribution to knowledge.

## Language Requirement

A knowledge of a language other than English is desirable, but there are no prescribed language requirements. However, if knowledge of a language is necessary for the field work or reading, he/she will be required to attain the necessary language proficiency.

# School of Criminology
